COMMISSION
CLERK

-M-E-M-O-R-A-N-D-U-M-

DATE: September 28, 2009
TO: Ann Cole, Commission Clerk - PSC, Office of Commission Clerk
FROM: Cristina Slaton, Executive Secretary to Commissioner Skop (A)
RE: Docket Correspondence

Ann,

This office has received a copy of the attached letter from Representative Kelli Stargel, Florida representative for District 64, regarding docket no. 080121-WS.

The correspondence has not been viewed or considered in any way by Commissioner Skop. Under the terms of the advisory opinion from the Commission on Ethics (issued July 24, 1991 as CEO 91-31-July 19, 1001), the attached letter does not constitute an ex parte communication by virtue of the fact that it was not shown to the Commissioner. Because it is not deemed to be an ex parte communication, it does not require dissemination to parties pursuant to the provisions of section 350.042, Florida Statutes. However, in such cases Commissioner Skop has requested that a copy of the correspondence be placed in the docket file.

Chairman Matthew Carter II
 Florida Public Service Commission
 2540 Shumard Oak Blvd.
 Tallahassee, FL 32399-0850

Dear Chairman Carter:

I have received numerous emails from local citizens about the outrageous increase in rates recently approved by the PSC. I have been in contact with several employees at the PSC and have received background information and multiple explanations as to why these rates were increased. I had asked for an explanation why the Lake Gibson rates were substantially increased over other Aqua Utility Florida areas and was told this was due in part to the poor profitability of the utility when bought and the need for improvement and expansion. While I understand the need for improvement and that the cost for one utility system to upgrade may be more substantial than others due to its "size and age of the utility system, the quality of the water at its source, the number of customers, and the geographic spread of the service area;" I also understand economies of scale and how the costs could be spread over all the 82 systems Aqua Utilities Florida currently serves.

Of specific concern to me are the customers of the Lake Gibson Estates. If Lake Gibson Estates Aqua customers attended the public meetings or read the notice concerning the request for increase in rates, they would have been provided information about the proposed 58% increase. This information may have seemed somewhat reasonable and, while never fully embraced by customers, may have been understandable even though it was high. However, they would not have been told or been able to ascertain from the information given, that their rates would increase over 200%. Had this been the case, they would have vehemently opposed such an increase, as evidenced by the responses I am receiving today.

FPSC-COMMISSION CLERK

In this economic climate, with job losses and fixed incomes, allowing a private monopoly to increase an average household cost for water from \$14.56 to \$45.57 (over a 200% increase) and a wastewater household bill from \$26.81 to \$82.25 (again, over a 200% increase) is outrageous. In October of 2009, customers of the City of Lakeland water services experienced an increase in their rates. Along with the bill, the City submitted a chart demonstrating how their increase was "highly competitive". According to the City of Lakeland's chart of their and other water systems' rates, Aqua Water (which is not on the chart) would be the more than double Lakeland's new rates and the third highest rate in the state (see attached chart.)

I am requesting an inquiry into the current average rate for water and wastewater customers in all 82 areas Aqua Utilities Florida currently serve. Along with the current rates, I would like to see how the recent rate approval increased all of these customers' previous payments as well as the percentage change in rates for each area.

In addition, there has been a growing concern regarding the relationship between the PSC and the Utilities they regulate. It is my understanding there are employees of Aqua Water who were former employees of the PSC. This too needs to be investigated for both the perception and possibility of preferential treatment.

I look forward to seeing the results from my requested inquiry along with any solutions you may propose to help these Aqua Water Florida customers receive clean, pure water without having to experience extreme financial burdens in order to pay their bills.

Kelli Stargel
State Representative, District 64

NEW WATER AND WASTEWATER RATES COMMENCED OCTOBER 1, 2008

Rates for Lakeland water customers will increase beginning with the October 1, 2008 bills. Significant increases in costs of chemicals, materials, fuel, equipment, debt service and energy necessitate these rate changes. All customer groups (residential, commercial and industrial) will be subject to the new rates.

Lakeland's water services remain highly competitive, both in terms of quality and cost, providing continuing value to our customers. Data reveals our costs for 10,000 gallons of water and wastewater service to be below many comparable utilities (see below), and will remain amongst the lowest after the rate increase.

The chart compares Lakeland's FY2009 rates to the FY2008 rates of all other entities.
