Subject: Docket #20200226-SU

To: Whom it may concern,

I am writing to you as a property owner on Little Gasparilla Island which is in the service area contained in the application for Environmental Utilities, LLC (EU) for a central sewer. **I object** for EU's request for the bifurcation of the certificate and rate making proceedings and **I STRONGLY OBJECT** to the granting of a temporary waiver of Rule 25-30.033(1)(p) and (q). Given the inadequate information regarding the applicants financial strength and management experience as well as the cost to the stakeholders involved with this project, the applicants request for a waiver should be DENIED.

As a stakeholder in the proposed service area, it is crucial to have all of the relevant information regarding the proposed central sewer, including the proposed rates, connection fees and the type of system intended for installation. I therefore request for EU's request for bifurcation and a temporary waiver be DENIED.

EU's owners currently operate a utility on Little Gasparilla Island and it is the one of the most self serving organizations I have ever had any dealings with, especially of a mandated use utility. Based on their historical performance I certainly am apprehensive about granting a license of such importance to owners with a history of placing self serving interests far above and beyond any community interests.

Granting a waiver as EU has requested, in my opinion is similar to allowing your neighbor to keep his fox in your chicken coupe.

Your Truly,

Craig Grant
