Subject: Stop Rubber Stamping FPL Requests!

Dear Commissioner

Florida Power & Light is asking for the largest single rate hike in Florida history at a time when consumers are facing an increased cost of goods and services as we recover from the economic downturn caused by COVID-19. Increasing the cost of electricity is something you, the Public Service Commission, can control.

It is unconscionable to think that we should have to pay more for our electric service at a time like this. Rubber stamping an all-time high return on equity of 11.5 percent goes against helping struggling Floridians. Putting people over profits should come first.

Now is not the time to give FPL want it wants; let's keep the public in Public Service Commission! I'm an FPL investor and I already have handsome returns on my investments. The whole reason I keep my FPL investment is because they are a leader in renewable energy and do it at affordable prices to Florida customers. The rate hike is unnecessary. There are a lot of Floridians living off Social Security and no other income. We don't need to improvise them further to enrich FPL investors. We investors are being paid well for our investment in the company. Thank you,
