ATTN. PSC

Re: Docket no 20210015-E1

I am totally opposed to ANY FPL Rate increases regarding above Docket.

This rubber stamping must end. Floridians cannot afford monthly power bills as it is. A RAISE in our electric bill would be a hardship to ALL Floridians.

This is not a time for increase. It's a time for less spending and helping Americans get back on their feet financially.

The guaranteed 11.5 percent return on equity is at this time CRAZY. No one is offering such lucrative offerings. FPL has made record profits during Covid-19. People are suffering.
