RATES EDITION MAY - JUNE 2021

ONE YEAR INCREASE

Our commitment to clean, reliable, affordable energy

DOCKET No.

We take our duty to serve you extremely seriously. It's why we work hard every day to deliver America's best energy value - electricity that's not just clean and reliable, but also affordable. In fact, our typical residential customer bill is lower today than it was 15 years ago. Serving you today comes with the fundamental responsibility to always look over the horizon to ensure we're ready to meet your energy needs tomorrow.

20210015-EI

In a rapidly growing state on the frontlines of climate change and frequently severe weather, we're committed to building a more resilient and sustainable energy future that everyone can depend on - including future generations. To do that, we've proposed a comprehensive four-year rate plan to the Florida Public Service Commission (PSC) that strengthens our proven and disciplined approach to investing in infrastructure, clean energy and innovative technology. The request would support capital investments focusing on reliability, generation upgrades, growth, and solar and energy storage facilities. It would also unify rates with Gulf Power, the utility that serves much of Northwest Florida and is now part of the Florida Power & Light Company (FPL) family. In recognition of the initial difference in the costs of serving current Gulf Power customers, the plan includes a transition credit for existing FPL customers to address those differences in a reasonable manner.

The proposed plan would phase in four base rate increases from 2022 to 2025. If approved, the typical 1,000-kWh residential customer bill would grow at an average annual rate of about 3.4% from 2021 to 2025. Even with our proposed rate adjustment, FPL's typical residential bill would remain well below the national average through 2025.

Importantly, our proposed rate plan is designed to continue delivering you unmatched value through the types of long-term investments that have tangibly benefitted you over the years by way of electricity that's among the cleanest and most reliable for a price that's among the lowest in the nation.

To calculate proposed changes to your bill, visit FPL.com/answers.

ONE YEAR INCREASE

10.77%

Committed to helping those experiencing financial hardship during the pandemic, we continue to offer payment extensions, waive late fees and connect customers with available financial support. In addition, we expanded eligibility for our Care To Share® Program to help more families in need. Learn more: FPL.com/help.
