Subject: Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

Power costs way to much as it is! There should be no more rate increases for at least the next 5 years to give us a chance to catch up! Costs of everything are constantly increasing. In the meantime we only get 1% or less cost of living increase each year. Therefore, we fall farther and farther behind. Such has been the case for the last 40 years! I estimate that we need a 300 percent cost of living increase just to break even! Buying power continues to decrease, quality of life and life expectancy continue to decrease, and we now have to worry about running out of money from increasing taxes as well as costs. All our hard earned tax money will to to support free-loading illegal aliens and enrich greedy politicians. Energy has again become a difficult financial burden.

Thank you,

Jeffrey Lustig
