**Subject:** Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

Continuous raising the rates is a disgrace. First you added the fuel charge which almost double our bill and now you requesting a rate increase again. I have lung issues which does not allow me to be in a place without any air condition and being in a fixed budget just makes it worst. I have cut back in many areas, place energy conservation light bulbs, sealed any door or window opening, keep the temperature at 79, etc and still my bill is high. I have to sit in the dark just to keep the air condition on due to my lung disease. There are many senior citizen's that are in the same boat and are constantly in the hospital because they can not afford to pay the high electricity rates and have to stay in a hot home. Many of us cut back on necessities just to survive during the summer months. Any money we think we saving some utilities comes and takes it from us. You need to find ways to save your customers money and you probably could start with the higher up salaries which I know are ridiculous.

Thank you,

Milta Vega
