Good Afternoon, Ivan Marroquin,

We will be placing your comments below in consumer correspondence in Docket 20210000, and the Office of Consumer Assistance and Outreach will be notified.

Sincerely,

Hong Wang

Subject: Tell the PSC Why They Need to Keep Your Power Bill Low

Dear Commissioner

Over the past year I have seen my FPL bill increase by 20% while I maintained the same level of use or at times reduced usage. I understand the need for alternative sources of power but the solar proposal by FPL does not tell how this project directly benefits consumers like me or how rates will be reduced. The only thing for sure is more RATE INCREASES for the next few years.

FPL also wants to install EV chargers, but that makes no sense since there are many companies already doing this. This seems very shady to me, as this is something that is not an absolute need or high demand. There is already an infrastructure and to build one on top of that is wasteful. This makes me wonder if this is needless work to give FPL more profits at our expense.

I urge you to consider the need to lower rates instead of increasing FPL's profits at our cost.

Thank you,

ivan marroquin
