Dear Commissioner

Bills should be lowered not increased. We have a lot of people in this state on fixed incomes. Florida has seen a 20% increase one of the largest increases. The big issue st hand is Florida continues to be the only utility without carbon emissions reduction goals. Why is that. Why should you be allowed not to go on record with clean energy goals and keep rates lower. NextEra FPL parent company invests in clean energy around the country. Look at what currently is happening with global warming do you not care about future generations and doing the right thing. You should. Trust big buisness to do the right thing NOT should be the motto.

Thank you,

Debby Osborne
