Dear Commissioner

(Please share your thoughts here.)

FPL is doing nothing to mitigate the climate change issues. It is beholden to share holders and not to consumers. They should save money and stop all the advertisement since we have no choice in S, Florida! Our rates should start going down instead of constantly increasing! The pandemic is still here and most of us have used savings to survive the two years without income, yet FPL raises our rates! Stop the rate hikes and help Floridians afford to keep the lights on and all other things that are powered by electricity. Since they have no competition here in my area of Florida, they should be trying to help the consumer instead of asking for rate hikes for FPL to use as they see fit, but somehow the consumer is forgotten. They have been funding improvements that benefit the company rather than the consumer and we are paying for it! NO MORE RATE HIKES, BRING THE CONSUMER COSTS DOWN!!!!

Thank you,

Stephanie Labow
