Good Morning, Captain William Meyers.

We will be placing your comments below in consumer correspondence in Docket No. 20200226, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Subject: Environmental Utilities LGI

Hello and good day,

After watching the video feed of John Boyer's redirect last week during the sewer hearings, I was dismayed that he lied under oath.

At approximately 51:05 of his redirect he responds to questions regarding easements. He claims all water easements are in place and paid for or "donated". This was a lie. He has illegally taken my property in two separate locations for water mains. He purchased easements or traded for future hookup fees, on each side of me but decided to take mine without permission. He continues to earn water profits by distributing and selling across my property illegally. He has used various excuses each time I confront him with it. His continued claims suggest he can do anything on my property that he wishes.

Our property has an east-west utility easement for parcels located within our beach to bay property only. No north-south easements exist nor any utility "through service". He has lied to the sheriff's office by stating that this issue was resolved in court, which is false as no case has been presented as of this date.

I cannot support EU's project in knowing that Boyer and LGWU have not conducted themselves honestly nor do they have any respect for private property rights.
