Dear Commissioners,

First let me thank you for the work you are doing. I know this can be quite a wearisome job. But, as you know, you hold the power to change the lives of many citizens. A great responsibility, indeed.

I am a full-time resident of Don Pedro Island and was one of the many people who took both the opportunity to write to you and to speak on this matter.

Having just had my routine septic pump out last month, I am still convinced that the proposal by EU is not the correct path forward for many reasons, all of which you have already heard.

I am asking that you follow the staff recommendation and **deny the application made by EU.**

Thank You,

David Cohen

Thank you for your continued consideration in regards to the proposed sewer. I am extremely pleased to see the PSC staff carefully reviewed all documentation and feedback and is recommending denial based on a lack of need for service and that the application is not in the public interest. The pinpointed accuracy and clarity of their recommendation is heartening. We are beginning to put in our brand new septic system and while the cost is steep we are opting for extra measures to ensure we are good stewards of the island we feel so lucky to be able to call home. We now look to you to carry out this recommendation and ask that you deny the application.

Subject: EU Wastewater Application

To The Clerk of the PSC and Commissioners LaRosa, Clark and Passidomo:

It is with much appreciation that I wish to thank the Commissioners and staff of the PSC for their thorough and exhaustive research into the application by EU for wastewater service on our bridgeless barrier islands and the resultant recommendation to deny same!! I sincerely hope and urge the Commissioners to follow said recommendation.

As a full time resident of Don Pedro Island for over 45 years, I am heartened that we, as islanders, have collectively (even as our numbers have grown) been diligent stewards of our islands. The uniqueness of our location has dictated that we be ever mindful of our environment and its preservation. In keeping with that concern, I do not believe there is a need for sewer on our islands and that it would be detrimental on many levels.

Therefore, I am once again thanking the staff and asking the Commissioners to follow the recommendation of their staff and deny EU's application for wastewater service.

Yours truly,

Susan Sirmons
