**To:** Office of Commissioner Graham  
**Subject:** Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Art Graham,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Ms. Cricket Blanton

**Sent:** Friday, June 10, 2022 5:20 PM  
**To:** Office of Commissioner Graham  
**Subject:** Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Art Graham,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up.

FPL's projections are going to make rate-payer's bills increase without ever realizing any benefits from the the proposed FPL investment. It is clear that this means FPL, a public corporation, will become wealthier without any benefits to the Florida rate-payers. Furthermore, such proposed FPL investments are not designed to meet our everyday Florida's energy needs. Instead FPL should directly increase investment in sustainable and hardened utility-scale Solar and Solar Storage, utility-scale Wind-power and incentivized Energy Efficiencies that help FPL rate-payers with the real weather risks we are facing, like extreme heat during the summer months instead of the "half-baked" schemes on the present docket, which is based on an unrealistic winter scenario and impracticably flies in the face of all science research knows about climate climate.

FPL is able to pass the full-cost of their projects, plus more new profit for new infrastructure, onto the ratepayers with PSC approval. My sense is you withheld such approval. You should not motivate FPL to build more gas-fired plants or build the wrong non-renewable energy technologies that are unsuitable to Florida's actual need.

FPL are already raising our bills higher and higher, a crushing burden on the Florida rate-payer. Please reject FPL's proposed site plan and urge them to invest in renewable technologies and efficiency programs that conserve resources, save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Mr. Michael Brower

**To:** Office of Commissioner Graham  
**Subject:** Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Art Graham,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Mr. Robert Schoonmaker

437 Pier Ln Melbourne Beach, FL 32951-4266 lihuebob@yahoo.com

**Subject:** Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Art Graham,

I am writing to ask you to reject FPL's 10-year site plan. When Floridians are facing ever-increasing prices in every aspect of our lives and the immediate effects of climate change, it is completely inappropriate to grant their wish of millions of dollars in MORE dirty energy infrastructure. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need.
