Subject: \$25 base rate

I disagree with the changes that increased my monthly FPL bill. Just because I have solar shouldn't make me subject to the new \$25 base rate charge. Trying to help the environment and I get screwed because they want more money! This also effects lots of people who are seasonal and aren't here 6 months out of the year. I pay tge base fee, my charges/usage but also have to pay the solar company for the panels. I can't afford the extra \$25/mo! This charge needs to be removed for solar customers. They get to bank our unused energy so they are truly making a profit off this charge.
