Subject: Electric power rate increases

My understanding is that electric companies are requesting a rate increase because of the increase in the cost of natural gas. I'd like to remind the Commission that the cost of EVERYTHING has risen due to global inflation. Ordinary citizens are being asked to "suck it up" while energy companies are making record profits. You now control what happens to citizens electricity bills. Please do not allow a consumer rate increase. Certainly don't allow TWO rate increases at once!! As far as I can see, you answer to no one but the Governor. He seems a little busy lately, so I'm just asking you to do the right thing and give Floridians a break. Thank you for your time
