Hi John,

Which protest to use?

Thanks

#### COMPLAINT INFORMATION

Complaint: Other Complaints against Tampa Electric Company  
Details:

We have seen a rate increase over the past 2 years that is astronomical to the amount of electricity that is used. In a report it is said the Tampa Electric has needed to increase to pay for the storm damage and services brought on the the hurricanes and tropical storms last year but in our zip code the electricity never went out those no services were needed and should not impact the residence in the area of 33614 and near surrounding areas. I would like to see the reports on their finding of increase in work related matters that prompt Tampa electric to make such accusations, overall our increase since COVID-19 has risen 67.23% . Electricity is a human right in a first world society and shouldn't be increased so aggressively especially for apartments while all other bills steadily increase as well. After all the energy that is used is coming from the sun. in addition to the reports that were given to FPSC for data analyses and to claim their increase I would like to send over the 10,000 signatures I've collected to refute this increase. Is there someone I can schedule a meeting with to discuss fighting against this approval or to introduce a bill to decrease the rates? I have gathered

information from a collaborative community agency to also present a proposal to reduce the bills and seek to personally work with who I must to move forward on this. I have indicated my personal information above. I look forward to hearing from your company and coming to a resolution because this increase is not sustainable to Tampa.
