Subject: RE: Docket #20240032-SU

Good Afternoon, Nicolas Caussade.

We will be placing your comments below in consumer correspondence in Docket No. 20240032, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Toni Hover

Subject: Docket #20240032-SU

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I just learned that Environmental Utilities has submitted another application for central sewer in Palm Island. I am firmly opposed to paying for a private utility with no experience or demonstrated financial wherewithal to provide a service I do not want or need at significant costs to the homeowners. I request the commission deny the application as the only benefit would be to the owners and investors in Environmental Utilities.

At the Administrative Hearing for this matter it was determined that there was no need for this service. The residents have not asked for this service and there is no proof that the current septic systems are impacting water quality in the area.

Additionally Environmental Utilities has no experience developing or managing such a system which would place burdens on the homeowners. These burdens would include giving up property rights without

compensation, costs to connect to the system, and purchase, installation, and maintenance of a system that is not suitable for the community given we are on a barrier island with no bridge to the mainland.

Again, I request you deny the application.

Sincerely,

Nicolas Caussade
