Adam Teitzman Commission Clerk Florida Public Service Commission 2540 Shumard Oak Blvd. Tallahassee, FL 32399-0850

RE: Docket 20230000-OT Florida Power & Light Company 2022 Demand Side Management Annual Report

Dear Mr. Teitzman:

On March 1, 2023, in accordance with Rule 25-17.0021(5), Florida Administrative Code, Florida Power & Light Company ("FPL") filed its 2022 Demand Side Management ("DSM") Annual Report. FPL is amending the DSM Annual Report to correct data on pages 1 and 9. For FPL's Low-Income Program (page 9), a formula error and missing/incorrect savings factors caused incorrect amounts to be presented for the Per Installation savings and Program Total savings. The updated Low-Income savings are also reflected on (page 1) Comparison of Achieved MW and GWh Savings v Commission Goals Established November 26, 2019. Please find attached the corrected pages 1 and 9 in redline format (Attachment 1), as well as a clean copy of FPL's Amended DSM Annual Report (Attachment 2).

If there are any questions regarding this transmittal, please contact me at (561) 304-5662.

Sincerely,

<u>/s/ William P. Cox</u> William P. Cox Fla. Bar No. 0093531

Enclosure cc: Michael C. Barrett, Economic Supervisor, <u>mbarrett@psc.state.fl.us</u>

2021	730,375	730,375	0	0%	0	0	0%	0	
2022	2								
2023									
2024									

⁽¹⁾ Cumulative participants (MW) before 2020 = 1.15 Note: One Customer, Participant or Installation equals one Summer KW

OTHER CONSERVATION ACTIVITIES

FPL Conservation Research & Development ("CRD")

CRD is an umbrella program under which FPL researches a wide variety of new technologies and market strategies to evaluate their potential for reductions in peak demand and energy consumption as well as customer bill savings. Florida's climatic conditions are unique so the studies must reflect the effects of the hot and humid environment while considering the possibility of an extreme weather event. Favorable research results can lead to incorporation into FPL's DSM programs. Examples of technologies that have been included are: Energy Recovery Ventilators; Demand Control Ventilation; and Residential Air Conditioning Duct Plenum Seal.

FPL participates in relevant co-funded projects such as Electric Power Research Institute ("EPRI"). This co-funding enables FPL to gain the learnings from larger research projects at a fraction of the total cost. In 2022, FPL continued its access to gather learnings from EPRI's ongoing readiness assessment of multiple technologies in various stages of development which enables comparisons among these technologies.

FPL continues evaluation of smart panel and smart breaker technologies as potential future DSM offerings. FPL has initiated a customer smart panel pilot as part of the Stipulation and Settlement agreement in Docket 20210015-EI. This pilot will further evaluate the customer's acceptance of this technology and the capabilities to monitor and manage large appliance loads. FPL is also remaining abreast of evolving capabilities and technology solutions for automated load management and will conduct additional research as warranted.

FPL Cogeneration & Small Power Production

FPL facilitates delivery of capacity and energy from qualifying cogeneration facilities. In 2022, there were purchases from 15 facilities which produced summer capacity of 264 MW, winter capacity of 263 MW and 1,064 GWh.

2022 Goals Results Summary and Variance Explanations

<u>Residential Goals</u>: Summer MW- did not meet Winter MW- did not meet Annual GWh- met

Variance Explanation:

Enrollment in all of FPL's residential DSM programs exceeded 2021 participation levels. FPL also increased participation in the Low Income program beyond plan targets. These results contributed to FPL achieving the annual GWh savings goal for the Residential sector. However, enrollment in the Residential On Call program did not gain the number of participants necessary to achieve the Summer and Winter KW goals. FPL implemented a new web-based customer enrollment tool during 2022 that is expected to increase the successful installation rates going forward.

<u>Commercial/Industrial Goals</u>: Summer MW- did not meet Winter MW- did not meet Annual GWh- did not meet

Variance Explanation:

Enrollment in FPL's Commercial/Industrial energy efficiency programs increased in total as compared to 2021. However, enrollment in the Commercial/Industrial Demand Response (CDR), Business Lighting and Business HVAC programs fell short of the annual targets needed to achieve the Commission-approved goals. The Summer and Winter KW results were primarily impacted by anticipated CDR enrollments not sufficient to overcome shortfalls from the Business Lighting and Business HVAC programs. The Annual GWh results were impacted primarily by continued supply-chain challenges for qualifying lighting and HVAC measures. FPL expects the supply-chain for qualifying lighting and HVAC components to gradually improve in 2023. Additionally, FPL has a good pipeline of new CDR enrollments for 2023.
