Hello, my name is Robert Griffith and I live at 785 Orange Avenue, St. Augustine, FL 32092.

I am 55 and moved to this area after living in the suburbs for decades and saving enough money to buy the 10 acres in the country I've always dreamed of. I just got here 6 years ago and now it appears that someone wants to build a mega community close by and destroy that retirement dream.

I am also starting an astronomy hobby and just purchased a very expensive telescope before I got news of this plant. This area is a Bortle Scale 4 area, meaning there is very little light pollution, To the west of me are the woods and the river, which produce no light pollution.

This plant is planned to be directly west of me and will create an enormous amount of light pollution and destroy my view of the night sky in the only direction that isn't already polluted..

This plant will ruin my enjoyment of all the reasons I moved here. I searched for this plot of land for 4 years and spent 15 months building the house.

There is plenty of raw land to the north that is already zoned for Residential. Please don't destroy the quality of country living my neighbors and I worked so hard to achieve.

--
