1.	Jurisdictional Adjusted Rate Base	Schedule B-1		$ 150,053,096
2.	Rate of Return on Rate Base Requested	Schedule D-1		7.15%
3.	Jurisdictional Net Operating Income Requested	Line 1 x Line 2		$ 10,734,307
4.	Jurisdictional Adjusted Net Operating Income	Schedule C-1		$ 991,558
5.	Net Operating Income Deficiency (Excess)	Line 3 - Line 4		$ 9,742,749
6.	Earned Rate of Return	Line 4/Line 1	0.66%	
7.	Net Operating Income Multiplier	Schedule C-44		1.3477
8.	Revenue Increase (Decrease) Requested	Line 5 x Line 7		$ 13,130,123
9.	Increase in Service Charges and Other Revenues	Schedule E		$ 164,495
10.	Increase in Base Rate Revenues	Line 8 less Line 9		$ 12,965,628
11	Increase Transferred from SPP			
12	Net Increase			$ 12,965,628

Note: This schedule includes the rate of return computed using the consolidated cost of debt. The Company is requesting the amount on Schedule A-1 Supplement.

Supporting Schedules: B-1, C-1, D-1, C-5, C-44

Schedule B-3a Florida Common (2024) 13 MONTH AVERAGE BALANCE SHEET - SYSTEM BASIS

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: Florida Public Utilities Company
Florida Common Division Allocation
DOCKET NO.: 20240099-EI

EXPLANATION: Derive the 13-month average system balance sheet by primary account by month for the test year, the prior year and the most recent historical year. For accounts including non-electric utility amounts, show these amounts as a separate subaccount.

Type of Data Shown:
_____ Projected Test Year Ended 12/31/25
__X__ Prior Year Ended 12/31/24
_____ Historical Test Year Ended 12/31/23
Witness: Galtman, Napier

_____ Historical Test Year Ended 12/31/23
Witness: Napier, Haffecke

Line No.	(1) Account Number	(2) Account Name	(3) Test Year Ended 12/31/2025 (000)	(4) Prior Year Ended 12/31/2024 (000)	Increase / (Decrease) (5) Amount (3)-(4) (000)	(6) Percent (5)/(4) (%)	(7) Reason(s) for Change
1	1010	Plant in Service	253,901	208,555	45,346	22%	Partially due to reduction in CWIP. In addition, the main additions
2							resulting in the increase are the increase in the Storm Protection Plan,
3							purchase of a new substation/transmission line and purchase of sections
4							and associated modifications of four substations, installation of a
5							new 75 MVA transformer, and finalization of the implementation
6							phase of the new customer information system software.
7							A portion of the increase related to regular blanket projects, vehicle
8							purchases, and small projects.
9							(Storm Protection Plan additions are removed in the rate base adjustments.)
10							
11	107	CWIP	5,748	15,229	(9,481)	-62%	Reduction in CWIP is a result of capitalization of the projects
12							listed above.
13							
14	108	Allocated Common Plant Reserve	(955)	(792)	(163)	21%	Increase is due to depreciation expense and offset by a lower allocation
15							rate in 2025.
16							
17	165	Prepaid Expenses	670	594	76	13%	Increased for prepaid insurance consistent with the increase in
18							insurance expense estimated by our carriers.
19							
20	182	Regulatory Assets	6,435	14,749	(8,314)	-56%	Decrease is mainly due to the end of the Hurricane Michael unrecovered
21							storm costs. (Removed in the adjustments to rate base.)
22							
23	186	Miscellaneous Deferred Debits	1,307	462	845	183%	Due to the decrease in the fuel under-recovery and increase in deferred
24							rate case costs. (Both are removed in the adjustments to rate base.)
25							
26	228.1	Storm Reserve	735	237	498	210%	Debit balance to the reserve account increased due to expected storm
27							activity due to increase in number of storms and costs incurred.
28							
29	Note: Amounts are before adjustments on MFR B-2

Supporting Schedules: Recap Schedules: B-1 (2023) B-3 (2023), B-6 (2023)

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: Florida Public Utilities Company
Consolidated Electric Division
DOCKET NO.: 20240099-EI

EXPLANATION: Provide the monthly plant balances for each account or sub-account to which an individual depreciation rate is applied. These balances should be the ones used to compute the monthly depreciation expenses excluding any amortization/recovery schedules.

Type of Data Shown:
_____ Projected Test Year Ended 12/31/25
_____ Prior Year Ended 12/31/24
__X__ Historical Test Year Ended 12/31/23
Witness: Galtman

Schedule B-8 (2024) MONTHLY PLANT BALANCES TEST YEAR - 13 MONTHS

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: Florida Public Utilities Company
Consolidated Electric Division
DOCKET NO.: 20240099-EI

EXPLANATION: Provide the monthly plant balances for each account or sub-account to which an individual depreciation rate is applied. These balances should be the ones used to compute the monthly depreciation expenses excluding any amortization/recovery schedules.

Type of Data Shown:
_____ Projected Test Year Ended 12/31/25
__X__ Prior Year Ended 12/31/24
_____ Historical Test Year Ended 12/31/23
Witness: Napier

Supporting Schedules: Recap Schedules: B-1 (2024) B-3 (2024), B-6 (2024)

MONTHLY PLANT BALANCES TEST YEAR - 13 MONTHS

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: Florida Public Utilities Company
Consolidated Electric Division
DOCKET NO.: 20240099-EI

EXPLANATION: Provide the monthly plant balances for each account or sub-account to which an individual depreciation rate is applied. These balances should be the ones used to compute the monthly depreciation expenses excluding any amortization/recovery schedules.

Type of Data Shown:
__x__ Projected Test Year Ended 12/31/25
_____ Prior Year Ended 12/31/24
_____ Historical Test Year Ended 12/31/23
Witness: Napier

Consolidated Electric Division
DOCKET NO.: 20240099-EI

EXPLANATION: Provide the monthly plant balances for each account or sub-account to which an individual depreciation rate is applied. These balances should be the ones used to compute the monthly depreciation expenses excluding any amortization/recovery schedules.

Type of Data Shown:
__x__ Projected Test Year Ended 12/31/25
_____ Prior Year Ended 12/31/24
_____ Historical Test Year Ended 12/31/23
Witness: Napier

Supporting Schedules: B-6 (2024), B-9 (2024), B-10 (2024) Recap Schedules: B-1 (2024), B-9 (2024)

Schedule B-10 (2024) MONTHLY RESERVE BALANCES TEST YEAR - 13 MONTHS

FLORIDA PUBLIC SERVICE COMMISSION

EXPLANATION: Provide the monthly reserve balances for each account or sub-account to which an individual depreciation rate is applied.

COMPANY: Florida Public Utilities Company
Consolidated Electric Division
DOCKET NO.: 20240099-EI

Type of Data Shown:
_____ Projected Test Year Ended 12/31/25
__X__ Prior Year Ended 12/31/24
_____ Historical Test Year Ended 12/31/23
Witness: Napier, Haffecke

Over and Under Adjustments

Account #	2024	2025	Over and Under Adjustments Reason	Witness	Electric %	2024	2025
555	$ 4,948,792	$ 3,414,933	Adjust purchase power costs to 2024 and 2025 estimates	Michelle Napier	100%	$ 4,948,792	$ 3,414,933
555	$ (3,601,911)	$ (13,604,449)	Adjust under-recovery of fuel to most recent estimates.	Michelle Napier	100%	$ (3,601,911)	$ (13,604,449)
560	$ 12,000	$ 12,000	Transmission Engineering study scheduled in Q1 2024 at $60,000 amortized over 5 years	William Haffecke	100%	$ 12,000	$ 12,000
580	$ 151,608	$ 155,717	2024 Restructure of Supervisor of Engineering (GM450) departmental duties resulting in increased expense to electric due to additional time related to substation maintenance planning, more focus on vegetation management, transmission/distribution relay modifications, and monitoring feeder loading.	William Haffecke	39.2%	$ 59,431	$ 61,041
580	$ 554,788	$ 569,823	Because of more underground facilities, beginning in 2024, the Damage Prevention department (MG119) is spending more time on the electric division. Costs are being spent in electric in order to provide a more active presence on the website and local activities to reinforce the need to call 811 and follow up when damages occur.	William Haffecke	6.1%	$ 33,842	$ 34,759
581	$ 69,530	$ 71,136	Costs related to Energy Logistics for Increased subscription expenses for S&P Global Platts CSM package used to forecast costs associated with the purchase power agreements with other generators.	William Haffecke	38%	$ 26,280	$ 26,887
582		$ 195,082	An additional IMC Technician will be needed due to the new NW Florida substation along with annual training. The new substation will also generate a need for additional equipment, supplies, and annual maintenance costs.	William Haffecke	100%		$ 195,082
582	$ 76,960	$ 79,045	Additional IMC Technician I in the NE region hired in September 2023; accounting for YoY variance January-August. This position is focusing on metering requirements such as programming, testing, and account verification, in addition to substation upgrades, substation maintenance, and additions workload to support the SPP program.	William Haffecke	100%	$ 76,960	$ 79,045
583	$ 70,000	$ 72,100	Additional costs for joint inspections 2024; to occur annually beginning in Q4 2024. The contractors will verify the joint attachments and verify the JWA payment. Not related to SPP.	William Haffecke	100%	$ 70,000	$ 72,100
588.1	$ 16,855	$ 52,335	Reclassification of an employee in EN403 who was working on a capital project that was completed. She will now work with the Field Service Management System that was part of the CIS conversion.	Michael Galtman & Kim Estrada	56.2%	$ 9,473	$ 29,412
592	$ 79,550	$ 106,000	Necessary substation maintenance up beginning in 2024.	William Haffecke	100%	$ 79,550	$ 106,000
5931	$ 98,818	$ 93,895	Increase in SPP Inspection Costs as filed in the SPP projection filing. The inspection costs are then removed in MFR C-2 because they are not part of base rates.	William Haffecke	100%	$ 98,818	$ 93,895
5932	$ 722,433	$ 783,754	Increase in SPP Tree Trimming as filed in the SPP projection filing. The tree trimming costs are then removed in MFR C-2 because they are not part of base rates.	William Haffecke	100%	$ 722,433	$ 783,754
594	$ 29,199	$ 59,276	Electric Line Operation Supervisor in the NE beginning October 2024 needed to manage daily operations of the Field and Meter services along with construction and maintenance activities. They will provide oversight of fleet maintenance, compliance, and qualifications of all FTE's.	William Haffecke	100%	$ 13,125	$ 52,500
594	$ -	$ 84,481	Electric Line Operation Supervisor in the NW beginning October 2024 needed to manage daily operations of the Field and Meter services along with construction and maintenance activities. They willl provide oversight of fleet maintenance, compliance, and qualifications of all FTE's.	William Haffecke	100%	$ 18,375	$ 73,500

FLORIDA PUBLIC SERVICE COMMISSION COMPANY: FLORIDA PUBLIC UTILITIES Consolidated Electric Division DOCKET NO.: 20240099-EI	EXPLANATION: Provide a copy of the company's most recent consolidated Federal Income Tax Return, State Income Tax Return and most recent final IRS revenue agent's report.	Type of Data Shown: ___ Projected Test Year Ended 12/31/25 ___ Prior Year Ended12/31/24 _x_ Historical Test Year Ended 12/31/23 Witness: Galtman

Since the acquisition by Chesapeake Utilities Corporation (the "Parent") in October 2009, Florida Public Utilities Company ("FPUC") files a consolidated federal income tax return with the Parent and its affiliates. FPUC files a separate state income tax return in the state of Florida.

FPU-Electric is a division within FPUC.

The returns and IRS Revenue agent's report are confidential and can be reviewed with prior arrangement at the Gunster law firm offices in Tallahassee.

1. For profit and loss purposes, which IRC section 1552 method is used for tax allocation?

A. The tax liability of the group is allocated to the members of the group on the basis of the percentage of the total tax which the tax of such member, if computed on a separate return, would bear to the total amount of the taxes of all members of the group so computed.

2. What tax years are open with the IRS?

A. 2022, 2021, 2020

3. For the last three tax years, what dollars were paid to or received from the parent for federal income taxes?

A.

	2022	2021	2020
Federal income taxes paid (received)	$0	$0	$0

4. How were the amounts in (3) treated?

A. Since the Electric operation of Florida Public Utilities Company does not have a separate cash account, all tax payments are made or refunds are received by its parent and other affiliates.

5. For each of the last three years, what was the dollar amount of interest deducted on the parent ONLY tax return?

A.

	2022	2021	2020
Interest deducted on Chesapeake ONLY return	$19,459,006	$20,136,491	$21,764,841

6. Complete the following chart for the last three years:

	Income/(Loss)					
				Tax Basis Year		
	2022	2021	2020	2022	2021	2020
Parent Only	$87,463	$92,394	($1,682)	($87,114)	($23,367,922)	($3,549,835)
Applicant Only	$3,951,405	$5,084,201	$4,393,226	($14,459,873)	($7,692,133)	($12,814,496)
Total Group	$89,795,882	$83,466,096	$71,497,533	$25,197,795	$16,046,511	$20,333,913
Total Group Excluding Parent & Applicant	$85,757,013	$ 78,289,501	$ 67,105,989	$39,744,782	$31,722,300	$11,069,252

Note - The information provide in this schedule is calendar year based since tax returns are filed for each calendar year.
Tax returns for 2023 have not been filed. Therefore, the information for 2022 is the most recent tax year available.

Recap Schedules:

FLORIDA PUBLIC SERVICE COMMISSION COMPANY: FLORIDA PUBLIC UTILITIES Consolidated Electric Division DOCKET NO.: 20240099-EI	EXPLANATION: Provide a summary of the specific tax effects (in dollars) of filing a consolidated return for the test year. Identify the nature and amount of benefits to the company and to the ratepayers.	Type of Data Shown: ___ Projected Test Year Ended 12/31/25 ___ Prior Year Ended12/31/24 _x_ Historical Test Year Ended 12/31/23 Witness: Galtman

Florida Public Utilities Company ("FPUC") files a consolidated federal income tax return with its parent and other affiliates. FPUC files a separate a separate state income tax return in the state of Florida.
FPU-Electric is a business unit within FPUC.

Tax is allocated to each of the consolidated entities, divisions and operations based on its respective taxable income and tax credit as if it is computed on a separate return. It is not anticipated that there will be any significant benefit or detriment to the rate payers, FPUC or its parent in the way the tax returns are prepared and tax is allocated.

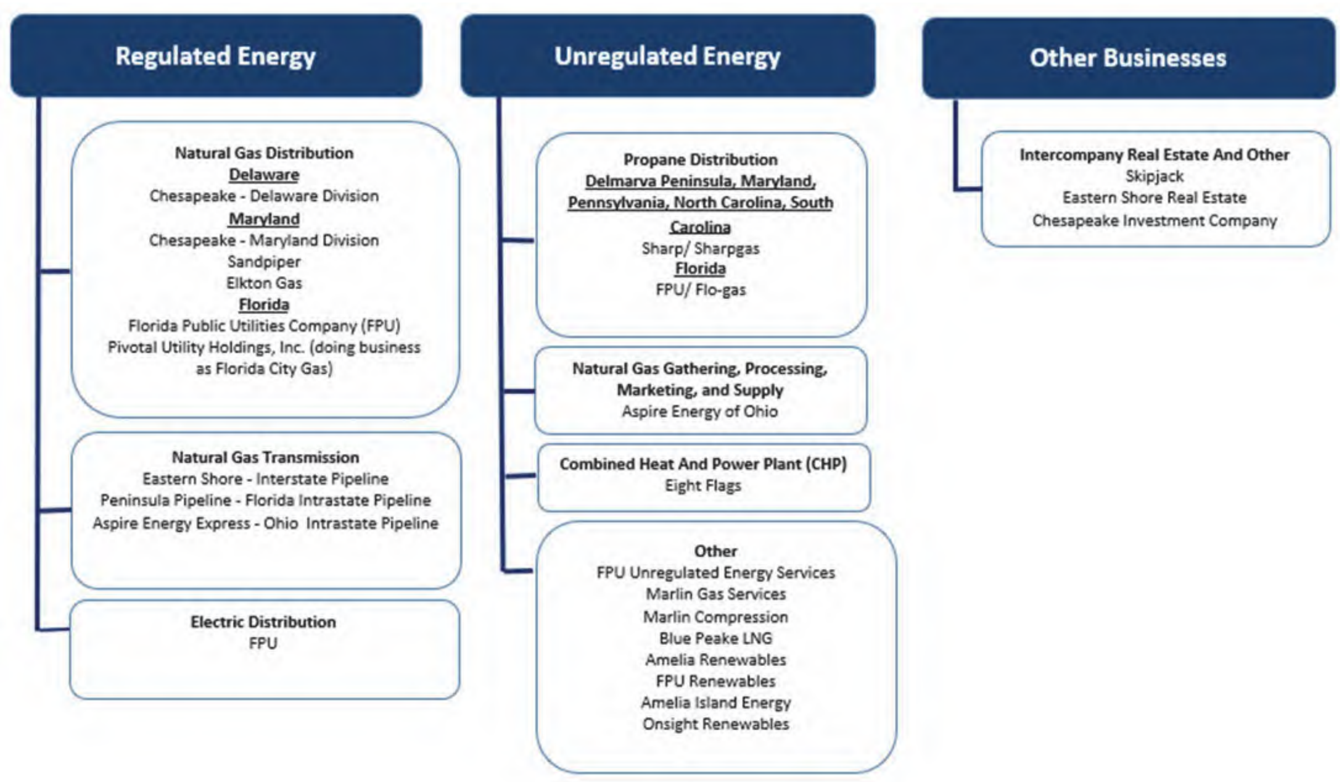
Provide an updated organizational chart showing all affiliated companies, partnerships, etc.



Analysis of Diversification Activity

New or Amended Contracts with Affiliated Companies

COMPANY: Florida Public Utilities Company - Electric Division
For The Year Ended December 31, 2023

Provide a synopsis of each new or amended contract, agreement, or arrangement with affiliated companies for the purchase, lease, or sale of land, goods, or services (excluding tariffed items). The synopsis shall include, at a minimum, the terms, price, quantity, amount, and duration of the contracts.

Name of Affiliated Company (a)	Synopsis of Contract (b)
None	

Analysis of Diversification Activity
Individual Affiliated Transactions in Excess of $500,000

COMPANY: Florida Public Utilities Company - Electric Division
For The Year Ended December 31, 2023

Provide information regarding individual affiliated transactions in excess of $500,000. Recurring monthly affiliated transactions which exceed $500,000 per month should be reported annually in the aggregate. However, each land or property sales transaction even though similar sales recur, should be reported as a "non-recurring" item for the period in which it occurs.

Name of Affiliate (a)	Description of Transaction (b)	Dollar Amount (c)
Eight Flags Energy LLC	Purchased Power	$ 17,901,184

Analysis of Diversification Activity

Summary of Affiliated Transfers and Cost Allocations

Company: Florida Public Utilities Company - Electric Division

For The Year Ended December 31, 2023

Grouped by affiliate, list each contract, agreement, or other business transaction exceeding a cumulative amount of $300 in any one year, entered into between the Respondent and an affiliated business or financial organization, firm, or partnership identifying parties, amounts, dates, and product, asset, or service involved.

(a) Enter name of affiliate.

(b) Give description of type of service, or name the product involved.

(c) Enter contract or agreement effective dates.

(d) Enter the letter "p" if the service or product is a purchased by the Respondent: "s" if the service or product is sold by the Respondent.

(e) Enter utility account number in which charges are recorded.

(f) Enter total amount paid, received, or accrued during the year for each type of service or product listed in column (c). Do not net amounts when services are both received and provided.

Name of Affiliate	Type of Service and/or Name of Product	Relevant Contract or Agreement and Effective Date	"p" or "s"	Total Charge for Year	
				Account Number	Dollar Amount
(a)	(b)	(c)	(d)	(e)	(f)

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: FLORIDA PUBLIC UTILITIES
Consolidated Electric Division
DOCKET NO.: 20240099-EI

EXPLANATION: Provide a schedule of operation and maintenance expense by function for the test year, the benchmark year and the variance. For each functional benchmark variance, provide the reason(s) for the difference.

Type of Data Shown:
__x_ Projected Test Year Ended 12/31/25
____ Prior Year Ended 12/31/24
____ Historical Test Year Ended 12/31/23
Witness: Galtman, Haffecke

	BENCHMARK VARIANCE	
Transmission	(40,683)	(1)
Distribution	(1,037,558)	(1)
Customer Accounts	293,557	(2)
Sales Expenses	(220,755)	(3)
Administrative and General	1,046,326	(4)

(1) These costs were less than benchmark primarily due to improved effectiveness of systems due to reliability improvements and centralization of certain operating functions.

(2) Projected costs have increased due to new customer service initiatives including more customer service personnel, and better customer systems. The new platform provides flexibility thru easy updates to call flow options and messaging for inbound contacts. We've implemented a workforce management system and performance dashboards. The new customer information system which will be going live in August, 2024. The new system streamlines interactions and improves the customer experience.
Another benefit of the system will be the increased security for our customer data along with robust data management capabilities.
We are also implementing a modern field service management system to enhance the customer experience.
In addition, costs increased due to hiring a new meter reader.

(3) These costs were less than benchmark primarily due to decreased advertising.

(4) The increase is due to:
a. Increased cloud fees for the new customer information system discussed above.
b. Increase in IT and Cyber-security costs which are necessary to protect both the customers and the company from data theft. Please refer to testimony of Witness Gadgil. Customer expectations related to technology have increased since our last case and cyber attacks have made data security essential.
c. Increase in the accrual for storm reserve to increase fund to $1.5M level as approved in Order PSC-2019-0114-ROF-EI.
d. Increase in property insurance based on latest estimates from our carrier.
e. Increased corporate costs due to the increase in regulatory staff due to increases in the complexity and the filings, audits, and data requests, additional legal staff to better understand the laws and regulations impacting the Company and develop risk mitigation strategies. There have also been reorganizations of the Human Resource department department in order to adequately meet the employees needs and continue to improve employee safety.

Schedule D-3 | SHORT-TERM DEBT | Page 1 of 1

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: Florida Public Utilities Company
Consolidated Electric Division

DOCKET NO.: 20240099-EI

EXPLANATION: 1.) Provide the specified data on short-term debt issues on a 13-month average basis for the test year, prior year, and historical base year

2.) Provide a narrative description of the Company's policies regarding short-term financing. The following topics should be covered: ratio of short-term debt to total capital, plant expansion, working capital, timing of long-term financing, method of short-term financing (bank loans, commercial paper, etc.), and other uses of short-term financing.

Type of Data Shown:
x Projected Test Year Ended 12/31/2025
x Prior Year Ended 12/31/2024
x Historic Year Ended 12/31/2023
Witness: Noah Russell

	Maturity Date	Interest Rate	Interest Expense	13-month Average Amount Outstanding During the Year	Weighted Average Cost of Short-term Debt
			For Historical Year 2023		
2023	2024	5.35%	$7,114,255	$ 132,960,125	5.35%
			For Prior Year 2024		
2024	2025	6.42%	14,670,384	$ 228,599,377	6.42%
			For Projected Test Year 2025		
2025	2026	5.81%	$ 9,875,457	$ 169,856,296	5.81%

Florida Public Utilities Company ("FPU") is a wholly-owned subsidiary of Chesapeake Utilities Corporation ("Chesapeake"). The Company targets an equity/debt capitalization ratio of 55/45 and adjusts its capitalization among the various components (short-term debt, long-term debt and equity) to achieve this target over the long-term.

Chesapeake currently maintains a multi-tranche short-term borrowing facility ("Revolver") with a total capacity of $375,000,000. The two tranches of the facility consist of a $175,000,000 364-day short-term debt tranche and a $200,000,000 five-year tranche. Chesapeake uses its short-term credit lines to finance working capital, plant expansions, retirement of long-term debt and seasonal cash requirements as necessary.

In terms of determining when short-term borrowing is refinanced as long-term debt or equity, the Company considers many factors, including the availability of capital, the current economic environment, and forecasted costs of capital. The balance of short-term borrowing has historically ranged between $90 million and $225 million. As new growth captial projects come online we issue additional long-term debt and equity to maintian a strng balance sheet and contined access to capital.

36 Note 1: A majority of Chesapeake Utilities Corporation's long-term debt have annual amortization payments beginning in the sixth year after the issuance and the amortization of debt issuance costs involves systematically allocating the costs
37 over the life of the underlying debt instrument. This is typically done using the effective interest method, which results in a constant rate of interest over the period. The amortization amount is calculated by applying the effective interest rate to
38 the book value of the debt at the beginning of each period, subtracting the actual interest paid and then attributing the remainder to the amortization of the issuance costs. This process continues until the debt matures or is extinguished.
39 The effective interest method provides a more accurate reflection of the costs of borrowing over time compared to the straight-line method, which allocates the same amount of expenses to each period regardless of the declining balance of the
40 debt. The straight line method would result in fluctuations in the overall cost of debt over its term. Columns 10 and 11 have been adjusted to reflect the actual interest and amortization expense that has been or will be recorded for the
41 Chesapeake notes with annual principle payments.

36 Note 1: A majority of Chesapeake Utilities Corporation's long-term debt have annual amortization payments beginning in the sixth year after the issuance and the amortization of debt issuance costs involves systematically allocating the costs
37 over the life of the underlying debt instrument. This is typically done using the effective interest method, which results in a constant rate of interest over the period. The amortization amount is calculated by applying the effective interest rate to
38 the book value of the debt at the beginning of each period, subtracting the actual interest paid and then attributing the remainder to the amortization of the issuance costs. This process continues until the debt matures or is extinguished.
39 The effective interest method provides a more accurate reflection of the costs of borrowing over time compared to the straight-line method, which allocates the same amount of expenses to each period regardless of the declining balance of the
40 debt. The straight line method would result in fluctuations in the overall cost of debt over its term. Columns 10 and 11 have been adjusted to reflect the actual interest and amortization expense that has been or will be recorded for the
41 Chesapeake notes with annual principle payments.

36 Note 1: A majority of Chesapeake Utilities Corporation's long-term debt have annual amortization payments beginning in the sixth year after the issuance and the amortization of debt issuance costs involves systematically allocating the costs
37 over the life of the underlying debt instrument. This is typically done using the effective interest method, which results in a constant rate of interest over the period. The amortization amount is calculated by applying the effective interest rate to
38 the book value of the debt at the beginning of each period, subtracting the actual interest paid and then attributing the remainder to the amortization of the issuance costs. This process continues until the debt matures or is extinguished.
39 The effective interest method provides a more accurate reflection of the costs of borrowing over time compared to the straight-line method, which allocates the same amount of expenses to each period regardless of the declining balance of the
40 debt. The straight line method would result in fluctuations in the overall cost of debt over its term. Columns 10 and 11 have been adjusted to reflect the actual interest and amortization expense that has been or will be recorded for the
41 Chesapeake notes with annual principle payments.
42 Note 2: To reflect that the 11/23 debt issuances were obtained mainly for the City Gas acquisition and, therefore at a cost that was higher than may have been obtained in the Company's normal financing, only the portion of the debt obtained that was
43 not used for the City Gas purchase is included in this calculation of debt costs. This lower cost of debt has been included to benefit the customers of the business units owned prior to City Gas.

36 Note 1: A majority of Chesapeake Utilities Corporation's long-term debt have annual amortization payments beginning in the sixth year after the issuance and the amortization of debt issuance costs involves systematically allocating the costs
37 over the life of the underlying debt instrument. This is typically done using the effective interest method, which results in a constant rate of interest over the period. The amortization amount is calculated by applying the effective interest rate to
38 the book value of the debt at the beginning of each period, subtracting the actual interest paid and then attributing the remainder to the amortization of the issuance costs. This process continues until the debt matures or is extinguished.
39 The effective interest method provides a more accurate reflection of the costs of borrowing over time compared to the straight-line method, which allocates the same amount of expenses to each period regardless of the declining balance of the
40 debt. The straight line method would result in fluctuations in the overall cost of debt over its term. Columns 10 and 11 have been adjusted to reflect the actual interest and amortization expense that has been or will be recorded for the
41 Chesapeake notes with annual principle payments.
42 Note 2: To reflect that the 11/23 debt issuances were obtained mainly for the City Gas acquisition and, therefore at a cost that was higher than may have been obtained in the Company's normal financing, only the portion of the debt obtained that w
43 not used for the City Gas purchase is included in this calculation of debt costs. This lower cost of debt has been included to benefit the customers of the business units owned prior to City Gas.

FLORIDA PUBLIC SERVICE COMMISSION

COMPANY: Florida Public Utilities Company
Consolidated Electric Division
DOCKET NO.: 20240099-EI

EXPLANATION:
1.) If the test year is projected, provide a summary of financing plans and assumptions.

2.) Provide the company's capital structure objectives, the basis for assumptions (such as those for issue cost and interest rates), and any other significant assumptions.
Provide a statement of the Company's policy on the timing of the entrance into capital markets.

Type of Data Shown:
x Projected Test Year Ended 12/31/2025
Prior Year Ended 12/31/2024
Historic Year Ended 12/31/2023

7	Company Stock Programs								
8									
9	Capital Structure Objectives:				Percent of Total				
10									
11									
12	Debt				40-50%				
13	Preferred Stock				0%				
14	Common Equity				50-60%				
15									
16									

17 Interest Rate Assumptions: Short-term interest rates (Secured Overnight Financing Rate ("SOFR")) are expected to begin gradually declining from historical levels in the projected test year.
18 Long-term interest rates (10 Year Treasuries) are expected to remain elevated during the projected test year.
19
20 Company's Policy on the Timing of Entrance into Capital Markets:
21
22 Chesapeake's target capital structure is 40%-60% equity as a percentage of total capitalization (including short-term debt). This target capital structure has been approved by the Board of Directors. Over time,
23 we strive to approximate the midpoint of 55% equity to total capitalization. Earnings retained and reinvested in the business partially help the Corporation fund our growth capital construction program. Any
24 capital spend that is in excess of earnings retained is initially funded with short-term debt. As projects come online, we issue additional long-term debt and equity to stay within the target capital range and,
25 accordingly, reduce our short-term debt balances. As the time for completing larger projects has extended, that has resulted, from time to time, in our capital structure falling below the target capital structure for a brief
26 period before resuming within the target range. Cash requirements are forecasted to increase significantly over the forecasted period due to plant expansions and infrastructure reliability improvements.

MINIMUM FILING REQUIREMENTS

TABLE OF CONTENTS

J219

COMPANY: FLORIDA PUBLIC UTILITIES
Consolidated Electric Division
DOCKET NO.: 20240099-EI

Explanation: Provide under separate cover a cost of service study that allocates production and transmission plant using the average of the twelve monthly coincident peaks and 1/13 weighted average demand (12 CP and 1/13th) method. In addition, if the company is proposing a different cost allocation method, or if a different method was adopted in its last rate case, provide cost of service studies using these methods as well. All studies filed must be at both present and proposed rates. The cost of service analysis must be done separately for each rate class. If it is not possible to separate the costs of the lighting classes, the lighting classes can be combined.

Each cost study must include a schedule showing total revenues, total expenses, NOI, rate base, rate of return, rate of return index, revenue requirements at an equalized rate of return, revenue excess/deficiency, and revenue requirements index, for each rate class and for the total retail jurisdiction for the test year.

In all cost of service studies filed, the average of the 12 monthly peaks method must be used for the jurisdictional separation of the production and transmission plant and expenses unless the FERC has approved another method in the utility's latest wholesale rate case. The minimum distribution system concept must not be used. The jurisdictional rate base and net operating income in the studies must equal the fully adjusted rate base in Schedule B-1 and the fully adjusted net operating income in Schedule C-1.

Costs and revenues for recovery clauses, franchise fees, and other items not recovered through base rates must be excluded from the cost of service study. Costs for service charges must be allocated consistently with the allocation of the collection of the revenues from these charges. Any other miscellaneous revenues must be allocated consistent with the allocation of the expense associated with the facilities used or services purchased.

If an historic test year is used, the twelve monthly peaks must be the hour of each month having the highest FIRM load, (i.e., exclude the load of non-firm customers in determining the peak hours).

Type of Data Shown:
X Projected Test Year Ended 12/31/2025
___ Prior Year Ended 12/31/2024
___ Historical Test Year Ended 12/31/2023

Schedule E-2 | Explanation of Variations From Cost of Service Study Approved In Company's Last Rate Case |

Florida Public Service Commission

COMPANY: FLORIDA PUBLIC UTILITIES
Consolidated Electric Division
DOCKET NO.: 20240099-EI

Explanation: Explain the differences between the cost of service study approved in the company's last rate case and that same study filed as part of Schedule E-1 in this rate case (e.g., classification of plant, allocation factor used for certain plant or expenses, etc.)

Type of Data Shown:
X__ Projected Test Year Ended 12/31/2025
___ Prior Year Ended 12/31/2024
___ Historical Test Year Ended 12/31/2023
Witness: Taylor

The cost of service study prepared for this rate case uses a model based in Microsoft Excel that employs the same allocation methods utilized in the last rate case.

Schedule E-6a Cost of Service Study - Unit Costs, Present Rates

Florida Public Service Commission

COMPANY: FLORIDA PUBLIC UTILITIES
Consolidated Electric Division
DOCKET NO.: 20240099-EI

Explanation: For each cost of service study filed by the company, calculate the unit costs for demand, energy and customer for each rate schedule at present rates, based on the revenue requirements from sales of electricity only, excluding other operating revenues. The demand unit costs must be separated into production, transmission and distribution. Unit costs under present rates must be calculated at both the system and class rates of return. Unit costs must be provided separately for each existing rate class, except for the lighting classes. If the company is proposing to combine two or more classes, it must also provide unit costs for the classes combined. Customer unit costs for the lighting classes must include only customer-related costs, excluding costs for fixtures and poles. The lighting fixtures and poles must be shown on a separate line. Billing units must match Schedule E-5.

Type of Data Shown:

Derivation of Hourly Costs

1. Labor Rates

Actual hourly rates as of December 31, 2023 were used as a basis of determining the cost of the required activities. These Rates were adjusted for non-productive time (vacation and sick time) and further adjusted for overhead costs (payroll taxes, retiree benefits, workman's comp insurance and employee medical insurance).

2. Category Labor Rates

Administrative Labor

The average hourly wage of the Electric Operations Managers and the Customer Service Managers:

Average Hourly Rate			=	57.69
Non-Productive Time Adjustment	57.69	10.51%	=	6.06
Overhead Cost Adjustment (includes non-productive time adj.)	63.75	30.84%	=	19.66
Total Administrative Hourly Labor Cost				83.41

Clerical Labor

The hourly wage of the staff handling these services:

Average Hourly Rate			=	21.00
Non-Productive Time Adjustment	21.00	10.51%	=	2.21
Overhead Cost Adjustment (includes non-productive time adj.)	23.21	30.84%	=	7.16
Total Administrative Hourly Labor Cost				30.36

Derivation of Costs for Proposed Service Charges

It is proposed to have six (6) different categories of service charges as described below. This will modify two (2) service charges, eliminate one (1) existing service charge and retain four (4) service charges.

The Administrative, Clerical, Service Construction, and Transportation time in hours for each activity was determined by the Director, Northwest Florida

A description of each type of activity along with the derivation of their respective costs of labor and transportation follows:

1) Initial Establishment of Services

At the customer's request, an order is created by the Customer Service Representative to have power connected. Once we receive notification that the customer's premise is ready to have power , the order is routed to construction personnel who go to the location and connect the service or change from temporary to permanent and set a meter. The order is returned to the office for input into the billing system.

	Time		Hourly Cost	Cost	
Administrative Labor	0.17	hours @	83.41	14.18	
Clerical Labor	0.35	hours @	30.36	10.63	
Construction Labor	1.00	hours @	62.41	62.41	
Transportation (Bucket)	1.00	hours @	37.34	37.34	
					Service Charge
			Total Cost	124.55	**$125.00**

J240

Florida Public Service Commission

COMPANY: FLORIDA PUBLIC UTILITIES
Consolidated Electric Division
DOCKET NO.: 20240099-EI

Explanation: Provide the calculation of the current cost of providing the services listed in Schedule E-13b. At a minimum, the schedule must include an estimate of all labor, transportation, customer accounting and overhead costs incurred in providing the service, and a short narrative describing the tasks performed.

Witness: Haffecke

Supporting Schedules: Recap Schedules: E-13b

2) Re-Establish Service or Make Changes to an existing Account

At the customer's request, an order is created by the Customer Service Representative to have power turned on. The order is routed to service personnel who go to the location and set or read a meter. The order is returned to the office for input into the billing system.

	Time		Hourly Cost	Cost	
Administrative Labor	0.00	hours @	83.41	0.00	
Clerical Labor	0.35	hours @	30.36	10.63	
Service Labor	0.75	hours @	40.86	30.65	
Transportation (Pickup)	0.75	hours @	3.98	2.99	
					Service Charge
			Total Cost	44.26	**$45.00**

3) Temporary Disconnect Then Reconnect Service

At the customer's request, an order is created by the Customer Service Representative to have the service temporarily disconnected and then reconnected at customer's request. The order is then routed to construction personnel who go to the site and disconnect and then return to the site to reconnect when requested by customer. Order is returned to office for input into the billing system.

	Time		Hourly Cost	Cost	
Administrative Labor	0.00	hours @	83.41	0.00	
Clerical Labor	0.05	hours @	30.36	1.52	
Construction Labor	0.80	hours @	62.41	49.92	
Transportation (Bucket)	0.80	hours @	37.34	29.87	
					Service Charge
			Total Cost	81.31	**$81.00**

4) Reconnect After Disconnect for Violation of rules shown in Section - 13 Discontinuance of Service (Normal Hours)

After the disconnected customer has corrected the rule violation a service order is created to by a Customer Service representative and routed to a service personnel who goes back to the customer's location and reconnects the service. The order is returned to the office so that a service charge can be put into the billing system.

	Time		Hourly Cost	Cost	
Administrative Labor	0.20	hours @	83.41	16.68	
Clerical Labor	0.25	hours @	30.36	7.59	
Service Labor	1.00	hours @	40.86	40.86	
Transportation (Pickup)	1.00	hours @	3.98	3.98	
					Service Charge
			Total Cost	69.12	**$70.00**

5) Reconnect After Disconnect for Violation of rules shown in Section - 13 Discontinuance of Service (After Hours)

After the disconnected customer has corrected the rule violation, the customer calls the after hour call center and a standby construction person is dispatched to the customer's location to reconnect service. The order is returned to the office so that a service charge can be put into the billing system.

	Time		Hourly Cost	Cost	
Administrative Labor	0.20	hours @	83.41	16.68

Transportation (Bucket)	1.00	hours @	37.34	37.34	
					Service Charge
			Total Cost	128.57	**$135.00**

7) Collection Charge

Should a customer not pay their monthly electric bill by the due date, a collection notice is issued. The notice is mailed to the customer and routed to service personnel. After the collection date is reached, service personnel are dispatched to the location to disconnect electricity. If a customer is at the location and elects to make payment, communication with office personnel is established, the customer makes payment and the electricity is not disconnected by the service personnel. The order is returned to the office for processing in the billing system.

___ Historical Test Year Ended 12/31/2023
Witness: Taylor

Coincident demands were developed by rate class for the test year by use of load factor ratios calculated by using Gulf Power Company's (Now part of FPL) load research results from the years 2003, 2006, 2010-11, and 2021. Gulf Power's load factors have been stable over this period. The load factors are taken from the 2021 study filed in Schedule E-17, Gulf Stand Alonf E Schedules in Docket No 20210015-IL

Noncoincident class maximum demands were developed by application of coincident factor ratios to the class coincident demands. Gulf Power Company's load research data was used to calculate the coincidence factors. The coincidence factors used are also taken from the 2021 study filed in Schedule E-17, Gulf Stand Alonf E Schedules in Docket No 20210015-IL

Both coincident and noncoincident demands were derived at the customer meter level and expanded to the supply level by use of estimated loss factors. Schedule E-17 discusses the derivation of the loss factors.

Details of the development of the demand factors are provided in the Cost Study Report attached to Schedule E-1.

Schedule E-13c Base Revenue By Rate Schedule - Calculations

Florida Public Service Commission

COMPANY: FLORIDA PUBLIC UTILITIES
Consolidated Electric Division
DOCKET NO.: 20240099-EI

Explanation: By rate schedule, calculate revenues under present and proposed rates for the test year. If any customers are to be transferred from one schedule to another, show revenues separately for the transfer group. Correction factors are used for historic test years only. The total base revenue by class must equal that shown in Schedule E-13a. The billing units must equal those shown in Schedule E-15.

PROVIDE TOTAL NUMBER OF BILLS, MWH's, AND BILLING kWh FOR EACH RATE SCHEDULE (INCLUDING STANDARD AND TIME OF USE CUSTOMERS) AND TRANSFER GROUP.

Schedule E-14 Proposed Tariff Sheets and Support For Charges

COMPANY: FLORIDA PUBLIC UTILITIES Consolidated Electric Division DOCKET NO.: 20240099-EI	Explanation: Provide proposed tariff sheets highlighting changes in legislative format from existing tariff provisions. For each charge, reference by footnote unit costs as shown on Schedules E-6b and E-7, if applicable. Indicate whether unit costs are calculated at the class or system rate of return. On separate attachment explain any differences between unit costs and proposed charges. Provide the derivation (calculation and assumptions) of all charges and credits other than those for which unit costs are calculated in these MFR schedules, including those charges and credits the company proposes to continue at the present level. Work papers for street and outdoor lighting rates, T-O-U rates and standard energy charges shall be furnished under separate cover to staff, Commissioners, and the Commission Clerk and upon request to other parties to the docket.	Type of Data Shown: X__ Projected Test Year Ended 12/31/2025 ___ Prior Year Ended 12/31/2024 ___ Historical Test Year Ended 12/31/2023 Witness: Grimard

Please refer to Schedule E-14a-Proposed Tariff and E-14b Legislative Version attached.

FIRST REVISED VOLUME NO. II

OF

FLORIDA PUBLIC UTILITIES COMPANY

FILED WITH

FLORIDA PUBLIC SERVICE COMMISSION

Communications concerning this Tariff should be addressed to:

Florida Public Utilities Company
208 Wildlight Avenue
Yulee, Florida 32097

Attn: Director of Regulatory Affairs

TABLE OF CONTENTS

MISCELLANEOUS GENERAL INFORMATION

Florida Public Utilities Company was incorporated under the Laws of Florida in 1924 and adopted its present corporate name in 1927.

It is principally engaged in the distribution and sale of natural gas and electricity. Its operations are entirely within the State of Florida.

The internet link to this Tariff is www.fpuc.com

General Florida office is located at:

208 Wildlight Avenue
Yulee, Florida 32097

Division offices are located at:

2825 Pennsylvania Avenue
Marianna, Florida 32446-4004

And

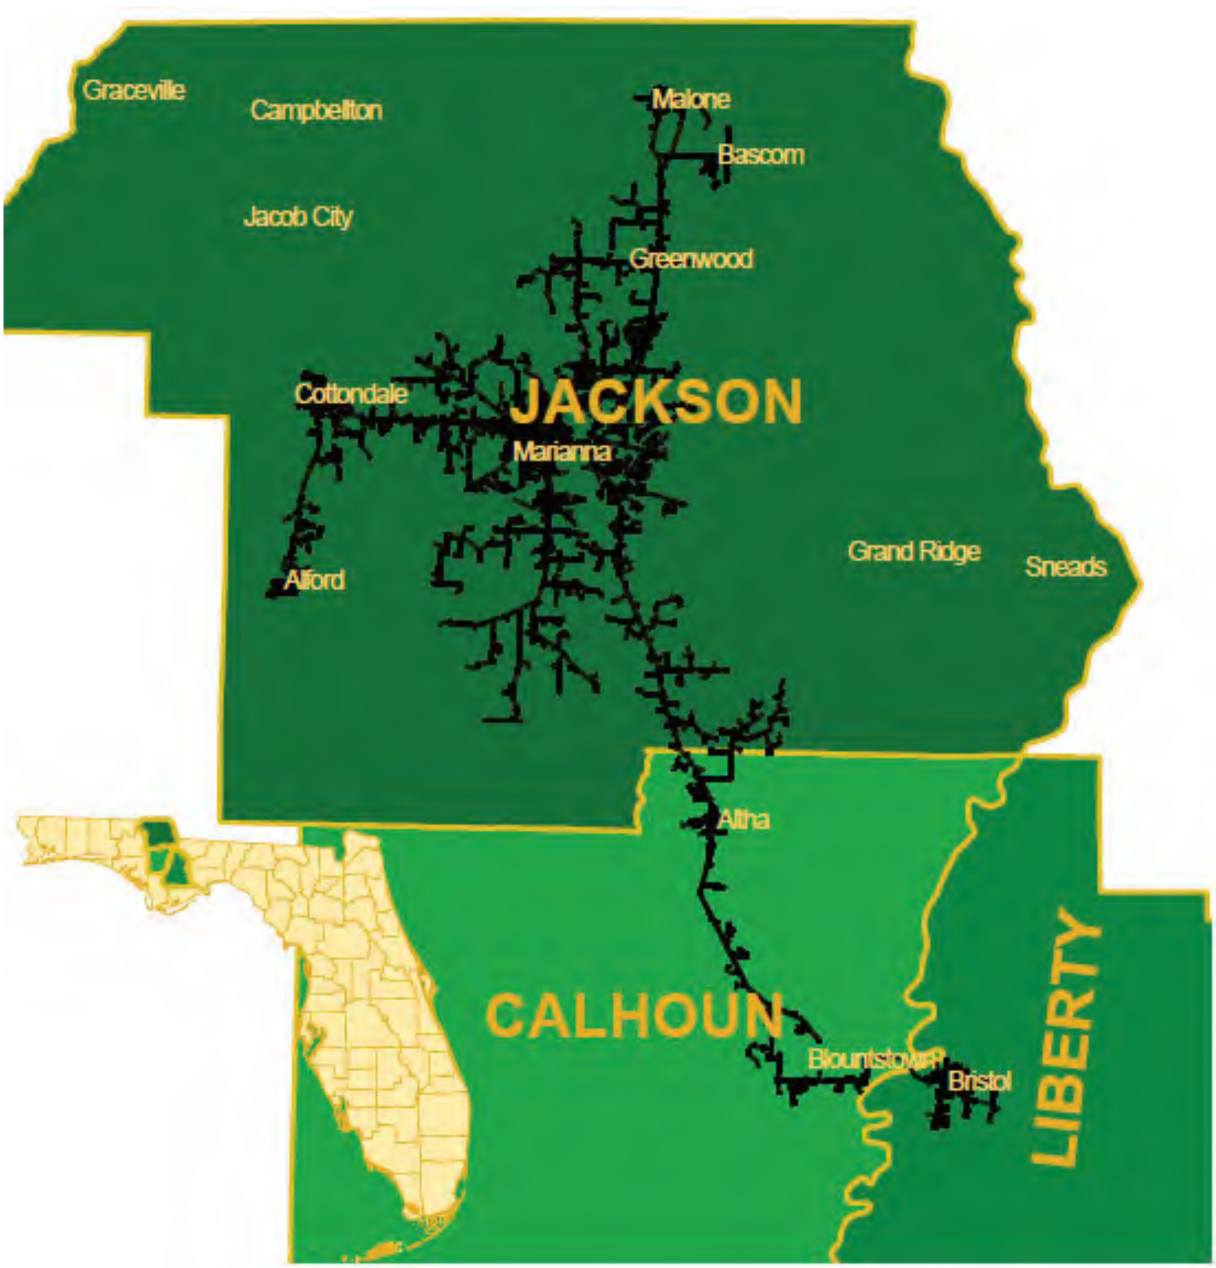
780 Amelia Island Parkway
Fernandina Beach, Florida 32034

Communications covering rates should be addressed to:

Florida Public Utilities Company
208 Wildlight Avenue
Yulee, Florida 32097

SYSTEM MAP

Northwest Florida Division System Map
Parts of Jackson, Calhoun County and Liberty Counties



SYSTEM MAP

Northeast Florida Division Service Map
Amelia Island located in Nassau County

TERRITORY SERVED

As indicated on the System Maps, two areas are served with electricity, both of which are located in the northern part of Florida.

The Northwest Florida Division serves various communities in Jackson, Calhoun and Liberty Counties.

The Northeast Florida Division serves Amelia Island, located in Nassau County.

TECHNICAL TERMS AND ABBREVIATIONS

When used in the rules and regulations or the rate schedules contained in this volume, the following terms shall have the meanings defined below:

A. Company – Florida Public Utilities Company acting through its duly authorized officers or employees within the scope of their respective duties.

B. Applicant – any person, firm, or corporation applying for electric service from the Company at one location.

C. Customer – any person, firm, or corporation purchasing electric service at one location from the Company under Rules and Regulations of the Company.

D. Service Classification

(1) Residential Service – service to Customer supplied for residential purposes in a single family dwelling unit or household. Residential service shall also apply to energy used in commonly owned facilities in condominium and cooperative apartment buildings subject to the following criteria:

1. 100% of the energy is used exclusively for the co-owners' benefit.

2. None of the energy is used in any endeavor which sells or rents a commodity or provided service for a fee.

3. Each point of delivery will be separately metered and billed.

4. A responsible legal entity is established as the Customer to whom the Company can render its bills for said service.

(2) Commercial Service – service to Customers engaged in selling, servicing, warehousing, or distributing a commodity, in some business activity or in a profession, or in some form of economic or social activity (offices, stores, clubs, hotels, etc.) and for purposes that do not come directly under another classification of service. A premise which might otherwise, except for business activity conducted thereon, be entitled to Residential Service shall be classified as Commercial unless that portion of said premise use solely for residential purposes is metered separately.

(3) Industrial Service – service to Customers engaged in a process which creates or changes raw or unfinished material into another form or product. (Factories, mills, machine shops, mines, oil plants, refineries, creameries, canning, and packing plants, shipyards, etc., i.e., in extractive, fabricating, or processing activities.)

TECHNICAL TERMS AND ABBREVIATIONS (Continued)

E. Service Line – all wiring between the Company's main line or substation transformer terminals and the point of connection to Customers service entrance.

F. Single Service – one set of facilities over which Customer may receive electric power.

G. KW or Kilowatt – one thousand (1,000) watts.

H. KWh or Kilowatt-hour – one thousand (1,000) watt-hours.

I. Energy – current consumed, expressed in kilowatt-hours.

J. BTU or British Thermal Unit – the amount of heat required to raise the temperature of one (1) pound of water one degree Fahrenheit (1°F) at sixty degrees Fahrenheit (60°F).

K. Horsepower - the nameplate rating of motors or its equivalent in other apparatus. For conversion purposes on horsepower shall be considered as equivalent to 0.75 kilowatts.

L. Candlepower – one-tenth of the manufacturer's rating in lumens.

M. Connected Load – sum of the ratings of the electric power consuming apparatus connected to the installation or system, or part of either, under consideration.

N. Demand – the load at the terminals of an installation or system averaged over a specified period of time. Demand is expressed in kilowatts, kilovolt-amperes, or other suitable units.

O. Power Factor – ratio of kilowatts to kilovolt-amperes.

P. Month – the period between any two (2) regular readings of Company's meters at approximately thirty (30) day intervals.

RESERVED FOR FUTURE USE

INDEX OF RULES AND REGULATIONS

RULES AND REGULATIONS

Applicable to Electric Service and Electric Rate Schedules

1. General

Company shall furnish service under its rate schedules and these Rules and Regulations as approved from time to time by the Florida Public Service Commission and in effect at this time. These Rules and Regulations shall govern all service except as specifically modified by the terms and conditions of the rate schedules or written contracts. Copies of currently effective Rules and Regulations are available at the office of Company.

Unless otherwise specifically provided in any applicable rate schedule or in a contract by or with Company, the term of any agreement shall become operative on the day the Customer's installation is connected to Company's facilities for the purpose of taking electric energy and shall continue for a period of one (1) year and continuously thereafter until cancelled by three (3) or more days' notice by either party.

2. Application for Service

An application for service will be required by Company from each Applicant. Such application shall contain the information necessary to determine the type of service desired and the conditions under which service will be rendered. If necessary, the application or contract for service shall be in writing.

The application or depositing of any sum of money by the Applicant shall not require company to render service until the expiration of such time as may be reasonable required by Company to determine if Applicant has complied with the provisions of these Rules and Regulations and as may reasonably be required by Company to install the required facilities.

3. Election of Rate Schedules

Optional rates are available for certain classes of Customers. These optional rates and the conditions under which they are applicable are set forth in Company's rate schedules.

Upon application for service or upon request, Applicant or Customer shall elect the applicable rate schedule best suited to his requirements. Company will assist in making such election but does not guarantee that Customers will be served under the most favorable rate schedule at all times. Company shall not be held

3. Election of Rate Schedules (Continued)

responsible to notify Customers of the most favorable rates schedule and will not refund the difference in charge under different rate schedules to the same class of service.

Upon notification of any material changes in Customer's installation or load conditions, Company will assist in determining if a change in rates is desirable, but unless required by substantial changes in the Customer's installation, not more than (1) such change in rates will be made within any twelve (12) month period.

Company will require a written contract with special guarantee from Applicants whose characteristics of load would require excessive investment in facilities of whose requirements for service are of a special nature.

4. Customer Deposits

A. Deposit Required

Unless credit is established in accordance with Section 4B, the Customer shall make a deposit. The amount of the deposit shall be calculated in conformity with the requirements of Section 366.05(1)(c), Florida Statutes, as follows:

(1) For an existing account or premise, the total deposit may not exceed two (2) months of average actual charges, calculated by adding the monthly charges from the 12-month period immediately before the date any change in the deposit is sought, dividing this total by 12, and multiplying the result by 2. If the account or premise has less than 12 months of actual charges, the deposit shall be calculated by adding the available monthly charges, dividing this total by the number of months available, and multiplying the result by 2.

(2) For a new service or premise request, the total deposit may not exceed two (2) months of projected charges, calculated by adding the 12 months of projected charges, dividing this total by 12, and multiplying the result by 2. Once the new Customer has had continuous service for a 12-month period, the amount of the deposit shall be recalculated using actual data. Any difference between the projected and actual amounts must be resolved by the Customer paying any additional amount that may by billed by the utility or the utility returning any overcharge.

(3) A residential Customer may request the amount of the initial deposit be billed and paid in even installments over a period of two (2) month's for deposit amounts between $50 and $150 and three (3) month's for deposits over $150, which may be granted at the Company's discretion.

4. Customer Deposits (Continued)

B. Establishment of Credit

In lieu of a deposit, the Company may allow a prospective Customer to satisfactorily establish credit prior to the commencement of service by one of the following methods:

Residential:

(1) Furnish a satisfactory guarantor to secure payment of bills for the service requested; such guarantor must be a Customer of the Company with a satisfactory payment record. A guarantor's liability shall be terminated when a residential Customer, whose payment of bills is secured by the guarantor, meets the requirements of Section 4C-Refund of Deposit. Guarantors providing security for payment of residential Customer's bills shall only be liable for bills contracted at the service address contained in the contract of guaranty; or

(2) Furnish an irrevocable letter of credit from a bank equal to two (2) months' average bills; or

(3) Furnish a surety bond equal to two (2) months' average bills; or

(4) Pay a cash deposit.

Non-Residential:

(1) Furnish a satisfactory guarantor to secure payment of bills for the service requested, such a guarantor need not be a Customer of the Company; or

(2) Furnish an irrevocable letter of credit from a bank equal to two (2) months' average bills; or

(3) Furnish a surety bond equal to two (2) months' average bills; or

(4) Pay a cash deposit.

RULES AND REGULATIONS (Continued)

4. Customer Deposits (Continued)

C. Refund of Deposits

After a Customer has established a satisfactory payment record and has had continuous service for a period of 23 months, the utility shall refund the residential Customer's deposits and shall, at its option either refund or pay the higher rate of interest specified below for nonresidential deposits, providing the Customer has not, in the preceding 12 months, (a) made more than one late payment of a bill (after the expiration of 20 days from the date of mailing or delivery by the utility), (b) paid with a check refused by a bank, (c) been disconnected for non-payment, or at any time, (d) tampered with the meter, or (e) used service in a fraudulent or unauthorized manner. Company may, at its option, refund a deposit in less than 23 months.

D. Interest on Deposits

Two percent (2%) per annum interest will be credited to a Consumer's account annually in accordance with the current effective rules and regulations of the Commission. Three percent (3%) per annum will be credited annually on deposits of Residential Consumers qualifying under section (c) above when the company elects not to refund such a deposit after twenty-three (23) months. The Company shall credit annually three percent (3%) per annum on deposits of non-Residential Consumers qualifying for refund under Section (c) until the Commission sets a new interest rate applicable to the Company. No Customer shall be entitled to receive interest on their deposit until and unless a Customer relationship and the deposit have been in existence for a continuous period of six months, then Customer shall be entitled to receive interest for the day of the commencement of the Customer relationship and the placement of deposit. Deposits shall cease to bear interest upon discontinuance of service.

E. New or Additional Deposits

Company may require, upon written notice to an existing Customer of not less than 30 days, a deposit (including guaranty, letter of credit or surety bond) where previously waived or returned, or an additional deposit, in order to secure payment of current bills. Such notice for a deposit shall be separate and apart from any bill for service and shall explain the reason for the deposit; provided, however, that the total amount of the required deposit shall not exceed an amount equal to the average actual charges for service for two billing periods for the 12-month period immediately prior to the date of notice. The thirty (30) day notice shall not apply when service is being reestablished after discontinuance of service for non-payment. In the event the Customer has had service for less than 12 months, then the Company shall base its new or additional deposit upon the average actual monthly billing available.

4. Customer Deposits (Continued)

F. Retention of Deposits

Retention by Company, prior to final settlement, of said deposit shall not be considered as a payment or part payment of any bill for service. Company shall, however, apply said deposit against unpaid bills for service. In such case, Customer shall be required to restore deposit to original amount.

G. Refund of Deposit When Service is Discontinued

Upon discontinuance of service, the deposit and accrued interest shall be credited against the final account and the balance, if any, shall be returned promptly to the Customer, but in no event later than fifteen (15) days after service is discontinued.

5. Customer Facilities

Customer shall make or procure satisfactory conveyance to Company of all necessary easement and rights-of-way, including right of convenient access to Company's property, for furnishing adequate and continuous service or the removal of Company's property upon termination of service.

Customer should furnish Company a description of the load to be connected prior to wiring Customer's premises or purchasing any electric equipment. Company will then furnish Customer such information as characteristics of service which is or will be available at the point of delivery.

All wiring and equipment beyond Company's meter and accessories thereto, necessary to utilize service furnished by Company, shall be installed by and belong to the Customer and be maintained at Customer's expense. Customer shall bring their wiring to a point of connection to Company's service lines at a location satisfactory to Company.

All wiring and electric equipment shall conform to the requirements of the National Electrical Code as adopted by Company and local ordinances, if any.

Company reserves the right to inspect and approve the installation of all wiring and equipment to utilize Company's service; but such inspection or failure to make inspection or the fact that Company may connect to such installation shall not make Company liable for any loss or damage which may be occasioned by the use of such installation or equipment used therefrom or of Company's service.

Customer shall install only such motors or other apparatus or appliances as are suitable for operation with the character of the service supplied by Company, and electric energy must not be used in such a manner as to cause detrimental voltage fluctuations or disturbances in Company's distribution system.

All apparatus used by Customer shall be of such type as to secure the highest practicable commercial efficiency, power factor and proper balancing of phases. Motors which are frequently started or motors arranged for automatic control must be equipped with controlling devices, approved by Company, to give maximum starting torque with minimum current flow.

6. Service Connections

A. General

Company reserves the right to designate the location of the point of connection, transformers and meters and to determine the amount of space which must be left unobstructed for the installation and maintenance thereof. Applicant may request an alternation of such a designation but, if consented to by Company, the excess cost of such revised designation over and above the cost of the original Company design shall be borne by Applicant.

Company reserves the right to postpone to a more favorable season the extension of lines and connection of services during seasons of the year when climatic conditions would cause abnormally high construction costs.

B. Overhead Service in Overhead Zone

Customer's wiring must be brought outside the building wall nearest Company's service wires so as to be readily accessible thereto or to transformer terminals if located close to the wall. All connections between the service entrance and meter location shall comply with local ordinances and shall be in rigid conduit or cable approved by Company. Company will furnish, install and maintain the service conductors to the point of connection to Customer's facilities.

C. Underground Service in Overhead Zone

Customers desiring an underground service in an overhead zone may make application for service with the Company. The Company will install and own the underground service from the meter location to the pole from which connection is to be made, including the necessary run of cable or conduit up the side of the pole. The Customer will pay in advance to the Company the estimated difference in the cost of the underground service and or equivalent overhead service. Underground service will be provided pursuant to F.A.C. 25-6115, Facility Charges for Conversion of Existing Overhead Investor Owned Distribution Facilities.

D. Underground Service in Underground Residential Distribution Systems

The service connection to the building normally will be at the point of the building nearest the point at which the underground system enters the property to be served. If such service connection point on any building is more than seventy-five (75) feet, measured at right angles, from the serving property line, the Customer will pay the difference between an underground service and an equivalent overhead service for all service line in excess of seventy five (75) feet.

E. Underground Service in Underground Zone (Other Than Residential Areas)

Where service is supplied from an underground distribution system, at Company's choice, Company will provide and install the cable conduit or ducts from its manhole or street connection box or main feed lines in street to the property line adjoining the property to be served.

The Customer shall supply and install the cable conduit or ducts from the property line into the building, terminating said conduit or ducts inside the building wall at a point located by the Company inspector. The Customer shall make arrangements with the Company for Company to supply and install continuous run of cable conductors from the manhole or street connection box to the inside of the building wall. Customer shall be charged for materials, labor, and other expenses incurred from the portion of cable installed inside the building.

Where Company is required by governmental or other valid authority to install underground distribution, and abandon overhead distribution, Company shall not be required to bear any of the cost of making the necessary changes on Customer's premises. If, however, Company elects to change an existing Customer's service from overhead to underground, Company shall bear the cost of disconnecting the Customer's service from the overhead system and reconnecting it to the underground system unless such change is necessitated by a change in the Customer's requirements.

7. Line Extensions

A. Overhead Extensions

(1) Free Extensions

(a) Company shall make extensions to or alterations in its facilities in accordance with Rule 25-6.064 of Florida Public Service Commission, these Rules and Regulations and free of charge to provide service to an applicant or group of applicants located within the Company's service area when the estimated total non-fuel revenue for the first four (4) years from the Applicant or Applicants equals or exceeds the estimated cost of the necessary includable construction; provided, however, that the patronage or demand will be of such permanency as to warrant the expenditure involved.

RULES AND REGULATIONS (Continued)

(b) The formula used to calculate the maximum amount of no-charge extension or alteration will be as follows:

(1) for Customers in rate classes that pay only energy charges, i.e., do not pay demand charges:

maximum amount = 4 X (non-fuel energy charge KWH)
(estimated annual KWH usage)

(2) for Customers in classes that pay both energy charges and demand charges:

maximum amount = 4 X (non-fuel energy charge KWH)
(estimated annual KWH usage)
+ 4 X (estimated annual demand
charge revenue from sales
over new line)

(2) <u>Other Extensions</u>

When the line extension or alteration required in order to furnish service within Company's service area is a reasonable extension of the Company's facilities but greater than the free construction specified above, and the Applicant or Applicants shall contract to use service for at least four (4) years, such extension or alteration shall be made subject to the following condition;

(a) Applicant or Applicants shall make a non-refundable contribution in aid of construction $(CIAC)_{OH}$ prior to commencement of construction, in an amount equal to the amount that the estimated cost to provide the extension or alteration exceeds the maximum amount of the no-charge extension or alteration as determined in A (b) (1) or A (b) (2) above.

B. <u>Underground Extension</u>

(1) <u>New residential subdivisions and multiple-occupancy buildings</u>.

(a) Company shall make underground extension of its facilities to serve new residential subdivisions or new multiple-occupancy buildings, in accordance with the provisions of the "Rules for Residential Electric Underground Service" of the Florida Public Service Commission; provided that the Applicant or Applicants, in accordance with the Rules of the Florida Public Service Commission, will pay to the Company in an amount equal to the difference in cost between an underground system (exclusive of supply system feeders) and an equivalent overhead system.

(2) Residential, commercial, industrial extensions

(a) Company shall make underground extensions or alterations in its facilities in accordance with Rule 25-6.115 of Florida Public Service Commission and these Rules and Regulations to provide underground service to an applicant or group of applicants, within the Company's service area provided that the applicant, or group of applicants, pay the Company a contribution in aid of underground construction $(CIAC)_{UG}$ in an amount equal to the estimated difference in cost to provide underground service instead of overhead service to the Applicant(s) plus the amount, if any, by which the estimated cost to provide an overhead service exceeds the maximum amount of no-charge construction $(CIAC)_{OH}$ as determined in A(2) above.

(b) The following formula shall be used to determine the contribution in aid of underground construction with all cost based on Rule 25-6.115, FAC, Facility Charges for Conversion of Existing Overhead Investor-owned Distribution Facilities :

$(CIAC)_{UG}$ = (estimated cost to provide underground service facilities including distribution line, transformer, service drop and other necessary fixtures) minus (the estimated cost to provide service using overhead facilities) plus $(CIAC)_{OH}$.

8. Underground Electric Distribution Facility Charges

A. Definitions

The following words and terms used under this Part shall have the meaning indicated:

(1) Applicant: The Applicant is the person or entity seeking the undergrounding of existing or newly planned electric distribution facilities by the Company. When a developer requests local government development approval, the local government shall not be deemed the applicant for purposes of this rule.

(2) Commission: Florida Public Service Commission.

(3) Cost Estimate: A non-refundable deposit charged an Applicant by the Company for the purpose of preparing a binding cost estimate of the amount required for the Company to construct or convert particular distribution facilities as underground.

(4) Company: Florida Public Utilities Company.

(5) Distribution Facilities: All electrical equipment of the Company required to deliver electricity to homes and businesses.

(6) Facility Charge: That charge required to be paid by an Applicant for the Company to construct or convert particular distribution facilities as underground.

(7) High Density Subdivision: A subdivision having a density of six (6) or more dwelling units per acre.

(8) Low Density Subdivision: A subdivision having a density of at least 1.5 dwelling units per acre but less than six (6) dwelling units per acre.

(9) Overhead: Pertains to distribution facilities consisting of conductors, switches, transformers, etc. which are installed above ground on supporting poles.

(10) Underground: Pertains to distribution facilities consisting of conductors, switches, transformers, etc. which are installed below or on the ground.

B. General

(1) Application

This tariff section applies to request for underground electric distribution facilities offered in lieu of overhead facilities. The installation of underground distribution lines in new residential subdivisions is not covered in this section of the tariff. These installations are covered under "Rules of the Florida Public Service Commission", Chapter 25-6115, "Facility Charges for Conversion of Existing Overhead Investor Owned Distribution Facilities", and the Company's "Rules and Regulations", Item 7.

(2) Application Request

An applicant shall submit a request in writing for the Company to develop a cost estimate to accomplish the undergrounding of particular electric facilities. The request shall be accompanied by an appropriate deposit and shall specify the following information:

a. the area(s) being sought to be undergrounded
b. a list of all electric Customers affected
c. an estimated time frame for undergrounding to be accomplished
d. details of any construction by the Applicant
e. any other pertinent information which the Applicant possesses that may assist the

C. Cost Estimate Deposits

(1) Non-Binding Cost Estimates

The Company will provide a non-binding cost estimate related to the request at no cost to the Applicant. The non-binding cost estimate shall be an order of magnitude estimate to assist the requestor in determining whether to go forward with a binding cost estimate.

(2) Binding Cost Estimates

Upon the payment of a non-refundable deposit, as specified below, the Company shall provide an applicant with a binding cost estimate specifying the facility charge required for the installation. The facility charge to be collected pursuant to a binding cost estimate from an applicant shall not be subject to increase or refund unless the project scope is enlarged or reduced, or the project is not completed at the request of the applicant.

The deposit shall be forfeited, and the binding cost estimate provided to an Applicant shall be considered expired, if the Applicant does not enter into a contract for the installation of the requested underground electric distribution within 180 days of delivery of the binding cost estimate by the Company. For good cause the Company may extend the 180 day time limit.

The deposit for a binding cost estimate, which approximates the engineering costs for underground facilities associated with preparing the requested estimate, shall be calculated as follows:

I. New Construction (Excluding New Residential Subdivisions)

Facilities Classification	Deposit Amount
Urban Commercial	$4,540 per overhead primary mile
Urban Residential	$3,555 per overhead primary mile
Rural Residential	$3,263 per overhead primary mile

II. Conversions

Facilities Classification	Deposit Amount
Urban Commercial	$6,815 per overhead primary mile
Urban Residential	$5,330 per overhead primary mile
Rural Residential	$4,895 per overhead primary mile
Low Density Subdivision	$64.00 per lot
High Density Subdivision	$42.00 per lot

The deposit must be paid to the Company to initiate the estimating process. The deposit will be applied in the calculation of the facility charge to be required for the installation of underground distribution facilities.

RULES AND REGULATIONS (Continued)

D. Construction Contract

(1) General
Upon acceptance by the Applicant of a binding cost estimate, the Applicant shall execute a contract with the Company to perform the construction of the underground distribution facilities. The contract shall specify the type and character of system to be provided; establish the facility charge to be paid by Applicant prior to commencement of construction; specify details of construction to be performed by Applicant, if any; and address those other terms and conditions described below.

(2) Facilities Charge
The charge shall be calculated in accordance with the appropriate formula described below with all costs based on Rule 25-6.115, FAC, Facility Charges for Conversion of Existing Overhead Investor-owned Distribution Facilities:

a. New Construction
Charge =
Estimated cost of construction of underground facilities including underground service laterals to Customers' meters;
Minus, estimated construction cost of overhead facilities including overhead service drops to Customers' meters;
Minus, qualifying cost estimate deposit.

b. Conversion
Charge =
Remaining book value of existing overhead facilities to be removed;
Plus, removal cost of existing overhead facilities;
Minus, salvage value of existing overhead facilities;
Plus, estimated cost of construction of underground facilities including underground service laterals to Customers' meters;
Minus, estimated construction cost of overhead facilities including overhead service drops to Customers' meters;
Minus, qualifying cost estimated deposit.

E. Construction By Applicant

If agreed upon by the Applicant and the Company, the Applicant may construct or install portions of the underground system as long as such work meets the Company's engineering and construction standards. The Company will own and maintain the completed distribution facilities upon accepting the system as operational. The type of system provided will be determined by the Company's standards.

Any facilities provided by the Applicant will be inspected by Company inspectors prior to acceptance. Any deficiencies discovered as a result of these inspections will be corrected by the applicant at his sole expense, including the costs incurred by performing the inspections. Corrections must be made in a timely manner by the Applicant; otherwise the Company will undertake the correction and bill the Applicant for all costs of such correction. These costs shall be additional to the original binding cost estimate.

F. Other Terms And Conditions

(1) Easements: Easements satisfactory to both the Company and the Customer must be provided for by the Applicant prior to commencement of construction at no expense to the Company. Additional easements are not required when facilities are to be located on private property wholly within an area covered by a recorded subdivision utility easement, namely a reservation and recorded plat of an easement for public utility purposes and where underground electrical facilities are not prohibited. Where underground distribution facilities for serving more than one Customer are located on private property, easements are required.

Secondary voltage underground facilities wholly within one property for the purpose of serving only one Customer do not require easements. All primary voltage underground facilities require easements. Easements are not required for facilities in public rights-of-way.

RULES AND REGULATIONS (Continued)

(2) Scheduling, Clearing, and Grading: Rights-of-way and easements suitable to the Company must be furnished by the Applicant in a reasonable time to meet service requirements and must be cleared of trees, tree stumps, paving and other obstruction, staked to show property lines and final grade and must be graded to within six (6) inches of final grade by the Applicant before the Company will commence construction, all at no charge to the Company. Such clearing and grading must be maintained by the Applicant during construction by the Company. Grade stakes must be provided at transformer, pull box, and switch locations.

(3) Restoration: All removal and restoration of buildings, roads, driveways, sidewalks, patios, fences, ditches, landscaping, sprinkler systems, other utilities, etc. shall be the full responsibility of the Applicant and shall cause no cost to the Company. Removal of all construction debris not belonging to the Company shall be the responsibility of the Applicant or other.

(4) Other Joint Users on the Company Poles: Applicant must make arrangements with all other overhead utilities and third parties to remove their overhead facilities from the Company's poles prior to construction or to concurrently convert their facilities to underground or remove them at no cost to the Company. The Applicant shall produce, if requested by the Company, executed agreements with all joint users guaranteeing this requirement.

(5) Affected Electric Customers: Applicant must make arrangements with all affected Company Customers to, in a timely fashion, prepare their premises and service entrance for underground electrical service from the new underground distribution system. All Customers affected by the undergrounding request must agree to accept underground service. This Customer conversion will be at no cost to the Company.

(6) Damage to Company's Underground Facilities: The Applicant shall be responsible to ensure the Company's distribution system, once installed, is not damaged, destroyed, or otherwise disturbed during the construction of the project. This responsibility shall extend not only to those in his employ, but also to his subcontractors, and he shall be responsible for the full cost of repairing such damage.

RULES AND REGULATIONS (Continued)

9. <u>Metering</u>

Company will provide each Customer with a meter or meters for each applicable rate schedule.

Customer, acting jointly with Company, may install, maintain and operate at Customer's expense such check measuring equipment as desired provided that such equipment shall be so installed as not to interfere with operation of Company's equipment and that no electric energy shall be re-metered for resale to another or others.

Before installation and periodically thereafter, each meter shall be tested and adjusted using methods and accuracy limits prescribed or approved by the Florida Public Service Commission. Periodic test and inspection intervals shall not exceed the maximum period allowed by the Florida Public Service Commission.

If upon testing the meter is found to be in error in excess of prescribed accuracy limits, fast or slow, the amount of refund or charge to the Customer shall be determined by methods prescribed or approved by the Florida Public Service Commission.

In the event of stoppage or failure of any meter to register, Customer may be billed for such period on an estimated consumption based upon Customer's use of electric energy in a similar period of like use or on the basis of check meter readings, if available and accurate.

Meters in use shall be tested at the request of Customer and in his presence, if desired, provided only one (1) such test shall be made free of charge within a twelve (12) month period, and provided Customer shall pay the cost of any additional test within this period unless meter is shown to be inaccurate in excess of the tolerances set forth by the Florida Public Service Commission. If the Customer requests a test more frequently, the Company may require a deposit, not to exceed $50.00, to defray the cost of testing.

. 10. <u>Billing and Collecting</u>

Each Customer's meter will be read at regular intervals and bills will be rendered on a monthly basis or periodically in accordance with the terms of the applicable rate schedule. Bills will be rendered as soon as practical after determination of their amount and shall be due and payable at the office of Company within twenty (20) days after date of bill. Failure to receive a bill will not entitle Customer to any discount or to the omission of any charge for nonpayment within the time specified.

<u>Partial Month:</u>
Upon commencement of service less than fifteen (15) days prior to a regular monthly read date and when the service continues thereafter to the same Customer at the same address where the Customer is receiving service on monthly rate schedules, no bill will be rendered for service covering such period, but the charge for such period will be included in the bill rendered for the next succeeding monthly billing period.

10. Billing and Collecting (continued)

A separate bill will be rendered for each meter used by Customer unless, for the convenience of Company, multiple meters are used for measurement of the same class of service, in which case a bill will be rendered for the total amount registered by all meters. If Company, (as it may under unusual circumstances), permits more than one Customer to be served through one meter, the minimum bill and the first billing block kilowatt-hours of the applicable rate schedule shall be multiplied by the number of Customer so served and the number of kilowatt-hours in each succeeding block of the rate schedule shall be increased in the same proportion.

Billings in general will be based on meter readings but bills will be adjusted to compensate for errors in meter registration, in the reading thereof, or in the application of meter reading schedules to intervals five (5) days greater or lesser than a month. If the billing period is extended more than five (5) days, the Company will not apply the higher tiered rate if the Customer's higher usage is attributable to the extended billing period.

In case of tampering or unauthorized use, probable consumption will be billed as determined by the maximum quantity of electric energy estimated to have been consumed by the various appliances of Customer and a bill will be rendered for a period encompassing six (6) months prior to the detection of such abuse and /or disconnection for cause.

11. Customer's Liabilities

Company shall have the right to enter the premises of Customer at all reasonable hours for the purpose of making such inspection of Customer's installation as may be necessary for the proper application of Company's rate schedules and Rules and Regulations; for installing, removing, testing, or replacing its apparatus or property; for reading meters; and for the entire removal of Company's property in event of termination of service to Customer for any reason.

All property of Company installed in or upon Customer's premises used and useful in supplying service is placed there under Customer's protection. All reasonable care shall be exercised to prevent loss of or damage to such property and, ordinary wear and tear excepted, Customer will be held liable for any such loss of property or damage thereto and shall pay to Company the cost of necessary repairs or replacements.

No one except employees of Company will be allowed to make any repairs or adjustments to any meter or other piece of apparatus belonging to Company except in case of emergency.

Unauthorized connections to, or tampering with the Company's meters, meter seals, or metering equipment or indications or evidence thereof , subjects the Customer to immediate discontinuance of service, prosecution under the laws of Florida, adjustment of prior bills for services rendered, a tampering penalty pf $500 for residential and non-demand general service customers and $2,500 for all other customers, and liability for reimbursement to the Company for all extra expenses incurred on this account as a result thereof. The reimbursement for extra expenses incurred as a result of the investigation or as a result thereof shall be the actual amount of such extra expenses and shall be in addition to any charges for service rendered or charges for restoration of service as provided elsewhere in these rules.

RULES AND REGULATIONS (Continued)

11. Customers Liabilities (continued)

Customer shall not materially increase load without first notifying Company and obtaining consent.

Company shall have the right, if necessary, to construct its poles, lines and circuits on Customer's property, and to place its transformers and other apparatus on the property or within the buildings of Customer, at a point or points convenient for such purpose and Customer shall provide suitable space for such installation.

12. Company's Liabilities

Company will use reasonable diligence in furnishing as uniform a supply of electric energy as practicable, except where rate schedules provide otherwise. Company may interrupt its service hereunder, however, for the purpose of making necessary alterations and repairs, but only for such time as may be reasonable or unavoidable, and Company shall give to those Customers it knows may be seriously affected, except in case of emergency, reasonable notice of its intention so to do, and shall endeavor to arrange such interruption so as to inconvenience Customer as little as possible.

Whenever Company deems an emergency warrants interruption or limitation in the service being rendered, such interruption or limitation shall not constitute a breach of contract and shall not render Company liable for damages suffered thereby or excuse Customer from further fulfillment of the contract.

In the event that the supply of electric energy shall be interrupted from causes other than the foregoing or force majeure and such interruption is due to the negligence of Company and Company is liable because thereof, that liability shall be limited to twice the amount which Customer would have paid for electric energy during the period of such interruption. However, Company shall not be liable to Customer for any loss, injury or damage resulting from use of Customer's equipment or from the use of electric service furnished by Company or from the connection of Company's facilities with Customer's wiring and appliances.

RULES AND REGULATIONS (Continued)

13. Force Majeure

Except for payment of bills due, neither the Company nor the Customer shall be liable in damage to the other for any act, omission or circumstances occasioned by or in consequence of any acts of God, strikes, lockouts, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides, lightning, earthquakes, fires, storms, floods, unforeseeable or unusual weather conditions, washouts, arrests and restraint of rules and peoples, civil disturbances, explosions, breakage or accident to machinery or electric lines, temporary failure of electric supply, the binding order of any court or governmental authority which has been resisted in good faith by all reasonable legal means, and any other cause, whether of the kind herein enumerated, or otherwise, and whether caused or occasioned by or happening on account of the act or omission of Company or Customer or any other person or concern not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. A failure to settle or prevent any strike or other controversy with employees or with anyone purporting or seeking to represent employees shall not be considered to be a matter within the control of the party claiming suspension.

14. Discontinuance of Service

The Company reserves the right, but assumes no liability for failure so to do, to discontinue service to any Customer for cause as follows:

A. Without notice,

(1) if a dangerous condition exists on Customer's premises in wiring or energy-consuming devices.

(2) because of fraudulent use of the service or tampering with Company's equipment.

(3) upon request by Customer, subject to any existing agreement between Customer and Company as to unexpired term of service.

B. After five (5) working days' (any day on which the utility's business office is open and the U.S. Mail is delivered) notice in writing,

(1) for nonpayment of bill for electric service.

(2) when Company has reasonable evidence that Customer has been previously disconnected for nonpayment at present or other location and is receiving service for his own use under a different name in order to avoid past due payments to Company.

(3) for refusal or failure to make a deposit or increase a deposit, when requested, to assure payment of bills.

(4) for a violation of these Rules and Regulations which Customer refuses or neglects to correct.

C. <u>Discontinuance of Service When That Service is Medically Essential:</u>

For purposes of this section, a Medically Essential Service Customer is a residential Customer whose electric service is medically essential, as affirmed through the certificate of a medical doctor licensed to practice in the State of Florida. Service is “medically essential” if the Customer has continuously operating electric-powered medical equipment necessary to sustain the life of or avoid serious medical complications requiring immediate hospitalization of the Customer or another permanent resident at the service address. The physician’s certificate shall explain briefly and clearly, in non-medical terms, why continuance of electric service is medically essential, and shall be consistent with the requirements of the Company’s tariff. A Customer who is certified as a Medically Essential Service Customer must renew such certification periodically through the procedures outlined above. The Company may require certification no more frequently than 12 months.

The Company shall provide Medically Essential Service Customers with a limited extension of time, not to exceed thirty (30) days, beyond the date service would normally be subject to disconnection for non-payment of bills (following the requisite notice pursuant to Rule 25-6.105(5) of the Florida Administrative Code). The Company shall provide the Medically Essential Service Customer with written notice specifying the date of disconnection based on the limited extension. The Medically Essential Service Customer shall be responsible for making mutually satisfactory arrangements to ensure payment within this additional extension of time for service provided by the Company and for which payment is past due, or to make other arrangements for meeting medically essential needs.

RULES AND REGULATIONS (Continued)

No later than 12 noon one day prior to the scheduled disconnection of service of a Medically Essential Service Customer, the Company shall attempt to contact such Customer by telephone in order to provide notice of the scheduled disconnect date. If the Medically Essential Service Customer does not have a telephone number listed on the account, or if the utility cannot reach such Customer or other adult resident of the premises by telephone by the specified time, a field representative will be sent to the residence to attempt to contact the Medically Essential Service Customer, no later than 4 PM of the day prior to scheduled disconnection. If contact is not made, however, the company may leave written notification at the residence advising the Medically Essential Service Customer of the scheduled disconnect date; thereafter, the Company may disconnect service on the specified date. The Company will grant special consideration to a Medically Essential Service Customer in the application of Rule 26-6.097(3) of the Florida Administrative Code.

In the event that a Customer is certified as a Medically Essential Customer, the Customer shall remain solely responsible for any backup equipment and/or power supply and a planned course of action in the event of a power outage. The Company does not assume, and expressly disclaims, any obligation or duty; to monitor the health or condition of the person requiring medically essential service; to insure continuous service; to call, contact, or otherwise advise of service interruptions; or, except expressly provided by this section, to take any other action (or refrain from any action) that differs from the normal operation of the Company.

15. Reconnection of Service

When service shall have been discontinued for any of the reasons set forth in these Rules and Regulations, Company shall not be required to restore service until the following conditions have been met by the Customer:

A. Where service was discontinued without notice,

(1) The dangerous condition shall be removed and, if the Customer had been warned of the condition a reasonable time before the discontinuance and had failed to remove the dangerous condition, a reconnection fee shall be paid.

(2) all bills for service due Company by reason of fraudulent use or tampering shall be paid, a deposit to guarantee the payment of future bills shall be made, and a reconnection fee shall be paid.

(3) if reconnection is requested on the same premises after discontinuance, a reconnection fee shall be paid.

RULES AND REGULATIONS (Continued)

B. Where service was discontinued with notice,

(1) satisfactory arrangements for payment of all bills for service then due shall be made and a reconnection fee shall be paid.

(2) a satisfactory arrangement for the payment of bills then due under a different name shall be made and a reconnection fee shall be paid.

(3) a satisfactory guarantee of payment for all future bills shall be furnished and a reconnection fee shall be paid.

(4) the violation of these Rules and Regulations shall be corrected and a reconnection fee shall be paid.

The reconnection fee as required under items A and B above shall be as follows:

During Normal Business Hours	$ 70.00
After Normal Business Hours	$325.00

16. Termination of Service

Subject to any existing agreement between Customer and Company, if Customer wishes the electric service to be terminated, he shall give notice to the Company at least three (3) days prior to the time that such termination shall become effective. Customer will be held liable both for any electric energy that may pass through the meter and safe custody of the Company's property until three (3) days after such notice shall have been given, provided that the meter and/or other movable equipment shall not have been removed within that time by the Company.

If Customer wishes Company's property to be removed, he shall give notice to the Company at least ten (10) days prior to the time that such removal must be made.

17. Limitations of Supply

Company reserves the right, subject to regulatory authority having jurisdiction, to limit, restrict or refuse service that will result in additions to its distribution system and/or production capacity and/or alterations in its contractual requirements of supply from non-affiliated companies that may jeopardize service to existing Customers.

18. Temporary Service

The Company upon request will supply temporary service when the Company's distribution system is near the requested location.

When the temporary service is to be replaced later with a permanent service, the Company will install a service drop, meter and other facilities as may be necessary to the Customer's temporary service pole and remove same at the termination of temporary service. To recover the cost of installing and removing such temporary service, an advance of $415.00 per service to the applicant will be applied. For underground temporary service using Customer provided wire, an advance of $250.00 per service will be required. Should the Company be required to install an additional pole, additional charges will apply. A pole with an overhead service will be an additional $835.00, and a pole with an underground service will be an additional $1,000.00.

When the temporary service will not be replaced by a permanent service or when the location is such that multiple temporary poles and/or extensive facilities are required, the Company will estimate the cost of installing and removing the temporary facilities and the advance charge to the applicant will be that cost estimate.

The rate schedule for temporary service shall be that which is applicable to the class of service for that Customer.

19. Fees for Initial Connections

In addition to the deposit or suitable guarantee to cover the payment of bills as required by the Rules and Regulations, each Applicant or Customer shall pay an initial turn-on connection fee of $125.00.

20. Re-establish or Make Change to Account

There shall be a charge to re-establish or change any account to which service is currently rendered under any of the Company' rate schedules in the amount of $45.00. Should it be necessary, at the Customer's request, to disconnect and then reconnect the service to the account, the Customer shall pay a temporary disconnect then reconnect fee in the amount of $81.00.

21. Returned Check Charge

The service charge for each worthless check shall be determined in accordance with Section 68.065, Florida Statues. As of October 1, 1996, Section 68.065, F.S., provided for a service charge of $25.00, if the face value does not exceed $50.00, $30.00, if the face value exceeds $50.00 but does not exceed $300.00 and $40.00, or 5 percent of the face amount of the check, whichever is greater if the face value exceeds $300.00. Such service charge shall be added to the Customer's bill for electric service for each check dishonored by the bank upon which it is drawn. Termination of service shall not be made for failure to pay the returned check charge.

22. Late Payment Charge

A bill shall be considered past due upon expiration of twenty (20) days from the date of mailing or other delivery thereof by the Company. The balance of all past due charges for services rendered are subject to a Late Payment charge of 1.5% or $5.00, whichever is greater, except the accounts of federal, state, and local governmental entities, agencies, and instrumentalities. A Late Payment Charge shall be applied to the accounts of federal, state, and local governmental entities, agencies and instrumentalities at a rate no greater than allowed, and in a manner permitted by applicable law.

23. Measuring Customer Service

A. All energy sold to Customers, except that sold under flat rate schedule, shall be measured by commercially acceptable measuring devices owned and maintained by the Company, except where it is impractical to meter loads, such as street lighting, temporary or special installations, in which case the consumption may be calculated, or billed on demand or connected load rate or as provided in Company's filed tariff.

B. When there is more than one meter at a location the metering equipment shall be so tagged or plainly marked as to indicate the circuit metered. Where similar types of meters record different quantities, (kilowatt hours and relative power, for example), metering equipment shall be tagged or plainly marked to indicate what the meters are recording.

C. Meters which are not direct reading shall have the multiplier plainly marked on the meter. All charts taken from recording meters shall be marked with the date of the record, the meter number, Customer, and chart multiplier. The register ratio shall be marked on all meter registers. The watt-hour constant for the meter itself shall be placed on all watt-hour meters.

D. Metering equipment shall not be set "fast" or "slow" to compensate for supply transformer or line losses.

E. Individual electric metering by Company shall be required for each separate occupancy unit of new commercial establishments, residential buildings, condominiums, cooperatives, marinas, and trailer, mobile home and recreational vehicle parks for which construction is commenced after January 1, 1981. Individual electric meters shall not, however, be required:

RULES AND REGULATIONS (Continued)

1. In those portions of a commercial establishment where the floor space dimensions or physical configuration of the units are subject to alteration, as evidenced by non-structural element partition walls, unless the utility determines that adequate provisions can be made to modify the metering to accurately reflect such alterations;

2. For electricity used in central heating, ventilating and air conditioning systems, or electric back up service to storage heating and cooling systems;

3. For electricity used in specialized-use housing accommodations such as hospitals, nursing homes, living in facilities located on the same premises as, and operated in conjunction with, a nursing home or other health care facility providing at least the same level and types of services as a nursing home, convalescent homes, facilities certified under chapter 651, Florida Statutes, college dormitories, convents, sorority houses, fraternity houses, motels, hotels, and similar facilities.

4. For separate, specially designated areas for overnight occupancy at trailer, mobile home and recreational vehicle parks where permanent residency is not established and for marinas were living aboard is prohibited by ordinance, deed restriction, or other permanent means.

5. For new and existing time-share plans, provided that all of the occupancy units which are served by the master meter or meters are committed to a timeshare plan as defined in Section 721, Florida Statutes, and none of the occupancy units are used for permanent occupancy. When a time-share plan is converted from individual metering to master metering, the Customer must reimburse the utility for the costs incurred by the utility for the conversion. These costs shall include, but not be limited to, the undepreciated cost of any existing distribution equipment which is removed or transferred to the ownership of the Customer, plus the cost of removal or relocation of any distribution equipment, less the salvage value of any removed equipment.

For purpose of this rule:

1. “Occupancy unit” means that portion of any commercial establishment, single and multi-unit residential building, or trailer, mobile home or recreational vehicle park, or marina which is set apart from the rest of such facility by clearly determinable boundaries as described in the rental, lease, or ownership agreement for such unit.

   “Time-sharing plan” means any arrangement, plan, scheme or similar device, whether by membership, agreement, tenancy in common, sale, lease, deed, rental agreement, license, or right-to-use agreement or by any other means, whereby a purchaser, in exchange for a consideration, receives a right to use accommodations or facilities, or both, for a specific period of times less than a full year during any given year, but not necessarily for consecutive years, and which extends for a period of more than three years.

RULES AND REGULATIONS (Continued)

3. The construction of a new commercial establishment, residential building, marina, or trailer, mobile home or recreational vehicle park shall be deemed to commence on the date when the building structure permit is issued.

4. The individual metering requirement is waived for any time sharing facility for which construction was commenced before December 23, 1982, in which separate occupancy units were not metered in accordance with subsection (5) (a).

5. "Overnight Occupancy" means use of an occupancy unit for a short term such as per day or per week where permanent residency is not established.

6. The term "cost" as used herein means only those charges specifically authorized by the electric utility's tariff, including but not limited to the Customer, energy, demand, fuel, and conservation charges made by the Company plus applicable taxes and fees to Customer of record responsible for the master meter payments. The term does not include late payment charges, returned check charges, the cost of distribution system behind the master meter, the cost of billing, and other such costs.

F. Where individual metering is not required under Subsection (E) and master metering is used in lieu thereof, reasonable apportionment methods, including sub-metering, may be used by Customer of record or the owner of such facility solely for the purpose of allocating the cost of the electricity billed by the Company.

G. Any fees or charges allocated by Customer of record for electricity billed to Customer's account by Company, whether based on the use of sub-metering or any other allocation method, shall be determined in a manner which reimburses the Customer of record for no more than the Customer's actual cost of electricity.

RULES AND REGULATIONS (Continued)

24. Miscellaneous Service Charges

A. Initial establishment of service	$ 125.00
B. Re-establish or Change Account	$ 45.00
C. Temporary disconnect then reconnect Service	$ 81.00
D. Re-connect service after being disconnected for rule violation	
Normal Business Hours	$ 70.00
After Normal Business Hours	$325.00
E. Connect and then disconnect temporary Service	$ 135.00
F. Collection Charge	$ 50.00

INDEX OF RATE SCHEDULES

RATE SCHEDULE RS
RESIDENTIAL SERVICE

Availability

Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties and on Amelia Island in Nassau County.

Applicability

Applicable for service to a single family dwelling unit occupied by one family or household and for energy used in commonly-owned facilities in condominium and cooperative apartment buildings.

Character of Service

Single-phase service at nominal secondary voltage of 115/230 volts; three-phase service if available.

Limitations of Service

The maximum size of any individual single-phase motor hereunder shall not exceed five (5) horsepower.

The Company shall not be required to construct any additional facilities for the purpose of supplying three-phase service unless the revenue to be derived therefrom shall be sufficient to yield the Company a fair return on the value of such additional facilities.

Monthly Rate

Customer Facilities Charge:

$24.40 per Customer per month

Base Energy Charge:

3.419¢/KWH for usage up to 1000 KWH's/month

5.60¢/KWH for usage above 1000 KWH's/month

Purchased Power Charges

Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January. For current purchased power costs included in the tariff, see Sheet Nos. 7.021 & 7.022.

Minimum Bill

The minimum monthly bill shall consist of the above Customer Facilities Charge.

RATE SCHEDULE RS
RESIDENTIAL SERVICE

Purchased Power Costs

See Sheet Nos. 7.021 & 7.022.

Conservation Costs

See Sheet Nos. 7.021 & 7.022.

Franchise Fee Adjustment

Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the Customer is located.

Budget Billing Program (optional)

An electing Customer's participation in the budgeted payment plan will be continuous unless the Customer requests that participation in the plan be terminated or that Electric Service be terminated, or the Customer is delinquent in paying the budgeted payment amount and becomes subject to the collection action on the service account. At that time, the Customer's participation in the program will be terminated and the Customer shall settle their account with the Company in full. If a Customer requests to terminate participation in the program, but remains a Customer of the Company, the Customer shall pay any deferred debit balance with their next regular monthly bill, and any deferred credit balance shall be used to reduce the amount due for the next regular monthly bill. An electing Customer may request that participation be terminated at any time, but once terminated by Customer request or due to collection action, will be limited to a six (6) month waiting period before Customer may rejoin the Budget Billing Program.

Terms and Conditions

Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

RESERVED FOR FUTURE USE

RATE SCHEDULE GS
GENERAL SERVICE – NON DEMAND

Availability

Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties And on Amelia Island in Nassau County.

Applicability

Applicable to commercial and industrial lighting, heating, cooking and small power loads aggregating 25 KW or less.

Character of Service

Single or three-phase service at available standard voltage.

Limitations of Service

Service shall be at a single metering point.

Monthly Rate

Customer Facilities Charge:

$40.00 per Customer per month

Base Energy Charge:

All KWH 5.433¢/KWH

Purchased Power Charges

Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January. For current purchased power costs included in the tariff, see Sheet Nos. 7.021 & 7.022.

Minimum Bill

The minimum monthly bill shall consist of the above Customer Facilities Charge.

Terms of Payment

Bills are rendered net and are due and payable within twenty (20) days from date of bill.

RATE SCHEDULE GS
GENERAL SERVICE – NON-DEMAND

See Sheet No. 7.021 & 7.022.

Franchise Fee Adjustment
Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the Customer is located.

Terms and Conditions
Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

RATE SCHEDULE GSD
GENERAL SERVICE – DEMAND

Availability

Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties and on Amelia Island in Nassau County.

Applicability

Applicable to commercial, industrial and municipal service with a measured demand of 25 KW but less than 500 KW for three or more months out of the twelve consecutive months ending with the current billing period. Also available, at the option of the Customer, to any Customer with demands of less than 25 KW who agrees to pay for service under this rate schedule for a minimum initial term of twelve months.

Character of Service

Single or three-phase service at available standard voltage.

Limitations of Service

Service shall be at a single metering point at one voltage.

Monthly Rate

Customer Facilities Charge:

$138.99 per Customer per month

Demand Charge:

Each KW of Billing Demand $7.58/KW

Base Energy Charge

All KWH 0.923¢/KWH

Purchased Power Charges

Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January.

Minimum Bill

The minimum monthly bill shall consist of the above Customer Facilities Charge plus the Demand Charge for the currently effective billing demand.

Terms of Payment

Bills are rendered net and are due and payable within twenty (20) days from date of bill.

Purchased Power Costs

See Sheet Nos. 7.021 & 7.022.

RATE SCHEDULE GSD
GENERAL SERVICE - DEMAND

Conservation Costs
See Sheet Nos. 7.021 & 7.022.

Franchise Fee Adjustment
Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the Customer's pro rata share of the amount the company is required to pay under the franchise agreement with the specific governmental body in which the Customer is located.

Billing Demand
The billing demand in any month shall be the greatest of the following:

(a) The highest fifteen-minute average load for the current month, as registered by a demand meter or indicator.

(b) The highest fifteen-minute average load for the current month after adjustment for power factor, in accordance with the Power Factor Clause of this schedule.

(c) For those Customers electing to take service under this rate schedule in lieu of the otherwise applicable rate schedule the billing demand shall be as in either (a) or (b) above, but not less than 20 KW.

Terms of Service
Not less than one year.

Power Factor of Clause
The Company reserves the right to measure power factor and if it is less than 90%, adjust the maximum demand for any month by multiplying the measured demand by 90% and dividing by the actual power factor.

Transformer Ownership Discount
If the customer elects to take service at the available primary voltage and furnish and maintain any transformers required, the monthly demand charge will be reduced by fifty five (55) cents per kilowatt. Such customers will be metered at primary voltage and in recognition of estimated average transformation losses of 1% the KW and KWH measured units shall be multiplied by a factor of 0.99 for billing purposes.

Terms and Conditions

Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

RATE SCHEDULE GSLD
GENERAL SERVICE-LARGE DEMAND

Availability

Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties and on Amelia Island in Nassau County.

Applicability

Applicable to commercial, industrial and municipal service with a measured demand of 500 KW but less than 5000 KW for three or more months out of the twelve consecutive months ending with the current billing period. Also available, at the option of the Customer, to any Customer with demands of less than 500 KW who agrees to pay for service under this rate schedule for a minimum initial term of twelve months.

Character of Service

Three-phase service at available standard voltage.

Limitations of Service

Service shall be at a single metering point at one voltage.

Monthly Rate

Customer Facilities Charge:

$265.69 per Customer per month

Demand Charge:

Each KW of Billing Demand	$10.84/KW

Base Energy Charge

All KWH	0.429¢/KWH

Purchased Power Charges

Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January.

Minimum Bill

The minimum monthly bill shall consist of the above Customer Facilities Charge plus the Demand Charge for the currently effective billing demand.

Terms of Payment

Bills are rendered net and are due and payable within twenty (20) days from date of bill.

Purchased Power Costs

See Sheet No. 7.021 & 7.022.

RATE SCHEDULE GSLD
GENERAL SERVICE-LARGE DEMAND

Conservation Costs

See Sheet Nos. 7.021 & 7.022.

Franchise Fee Adjustment

Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the Customer is located.

Billing Demand

The billing demand in any month shall be the greatest of the following:

(d) The highest fifteen-minute average load for the current month, as registered by a demand meter or indicator.

(e) The highest fifteen-minute average load for the current month after adjustment for power factor, in accordance with the Power Factor Clause of this schedule.

(f) For those Customers electing to take service under this rate schedule in lieu of the otherwise applicable rate schedule the billing demand shall be as in either (a) or (b) above, but not less than 400 KW.

Terms of Service

Not less than one year.

Power Factor of Clause

The Company reserves the right to measure power factor and if it is less than 90%, adjust the maximum demand for any month by multiplying the measured demand by 90% and dividing by the actual power factor.

Transformer Ownership Discount

If the customer elects to take service at the available primary voltage and furnish and maintain any transformers required, the monthly demand charge will be reduced by fifty five (55) cents per kilowatt. Such customers will be metered at primary voltage and in recognition of estimated average transformation losses of 1% the KW and KWH measured units shall be multiplied by a factor of 0.99 for billing purposes.

Terms and Conditions

Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

RATE SCHEDULE GSLD 1
GENERAL SERVICE - LARGE DEMAND 1

Availability
Available within the territory served by the Company in Jackson, Calhoun, and Liberty Counties and on Amelia Island in Nassau County.

Applicability
Applicable to commercial and industrial services of Customers contracting for at least 5,000 kilowatts of electric service.

Character of Service
Three-phase, 60 hertz, electric service delivered and metered at a single point at the available transmission voltage, nominally 69,000 volts or higher.

Monthly Base Rates

Customer Facilities Charge:	$1,242.99
Base Transmission Demand Charge:	$2.88/KW of Maximum/NCP Billing Demand
Excess Reactive Demand Charge:	$0.56/kVar of Excess Reactive Demand

Purchased Power Charges
Purchased power charges are adjusted by the FPSC annually. Current purchased power rates are listed on Sheet Nos. 7.021 and 7.022. The Purchased Power Charges recover Energy and Demand Charges billed to FPUC by FPUC's Wholesale Energy Provider and Wholesale Cogeneration Provider including applicable line losses and taxes. See Sheet Nos. 7.010 and 7.011 for the methodology used to determine purchased power rate and calculation to develop annual true-up calculations.

Minimum Bill
The minimum monthly bill is the sum of the Transmission Demand Charge and the Customer Charge plus any Purchased Power Charges attributed to Transmission Demand Fuel Charge.

Terms of Payment
Bills are rendered net and due and payable within twenty (20) days from date of bill.

Conservation Costs
Not applicable.

Franchise Fee Adjustment
Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the Customer is located.

RATE SCHEDULE GSLD 1
GENERAL SERVICE-LARGE DEMAND 1

Coincident Peak (CP) Billing Demand

The CP Billing Demand in any month shall be the Customer's greatest one hour average load as registered by FPUC's demand meter coincident with the FPUC System Peak or the Wholesale Energy Providers System Peak for the purposes as described below:

1) FPUC System Peak for the purpose of determining the Generation Demand Fuel Charge. The demand may be adjusted to correct to 90% power factor based on billing from Wholesale Energy Provider.

2) FPUC System Peak for the purpose of determining the Excess Reactive Demand Charge.

3) Wholesale Energy Providers System Peak for the purpose of determining the Transmission Demand Charge. The demand may be adjusted to correct to 95% power factor based on billing from Wholesale Energy Provider.

Maximum Demand (Non-Coincident Peak (NCP) Billing Demand)

The Maximum Demand (NCP Billing Demand) (Transmission Demand Charge) in any month shall be the Customer's greatest one hour average load as registered by FPUC's demand meter, but not less than 5,000 KW. This will be used as the purchased power value for billing purposed during the year and will be trued-up annually.

Excess Reactive Demand

The Excess Reactive Demand in any month shall be any lagging kVar in excess of one-half of the CP Billing Demand in that month. For the purpose of determining the Excess Reactive Demand charge, the CP Billing Demand will be coincident with the FPUC System Peak.

Coincident Peak (CP) Generation Demand Fuel Charge (Purchased Power Charge)

The Generation Demand Fuel Charge recovers the Wholesale Energy Providers Demand Charge for Generation Services billed to FPUC including system line losses and applicable taxes. The charge is applied to the Customer's CP Billing Demand coincident with the FPUC System Peak.

Transmission Contract Demand Fuel Charge (Purchased Power Charge)

The Transmission Demand Fuel Charge recovers the Wholesale Energy Providers Demand Charge for Transmission Services billed to FPUC including system line losses and applicable taxes. The charge is applied to the Customer's CP Billing Demand or cogeneration output coincident with the Wholesale Providers system Peak, whichever is higher.

Energy Charge (Purchased Power Charge)

The Energy Charge recovers the Energy Charge from the Wholesale Energy Provider and Wholesale Cogeneration Energy Provider including system line losses and applicable taxes.

Term of Service

Contract for service hereunder shall be for a period of not less than one year.

Terms and Conditions

Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

RESERVED FOR FUTURE USE

RATE SCHEDULE LS
LIGHTING SERVICE

Availability

Available within the territory served by the Company in Calhoun, Jackson and Liberty Counties and on Amelia Island in Nassau County.

Applicability

Applicable to any Customer for non-metered outdoor lighting service.

Character of Service

Lighting service from dusk to dawn as described herein.

Limitations of Service

Service is limited to lighting by high-pressure sodium vapor, metal halide, or light emitting diode lamps mounted on Company-owned poles as described herein. Company-owned facilities will be installed only on Company-owned poles.

Monthly Rate

When lighting fixtures are mounted on existing poles and served directly from existing overhead secondary distribution lines:

Type Facility	Lamp Lumens	Size Watts	KWH/Mo. Estimate	Facilities Charge	Maintenance* Charge	Energy Charge	Total Charge
High Pressure Sodium Lights ***(CLOSED TO NEW CUSTOMERS)***							
Acorn	16,000	150	61	$25.18	$3.18	$4.08	$32.44

6)	35’ Concrete Square	$20.25
7)	10’ Deco Base Aluminum	$23.74
8)	30’ Wood Pole Std	$6.86

For the poles shown above that are served from an underground system, the Company will provide up to one hundred (100) feet of conductor to service each fixture. The Customer will provide and install the necessary conduit system to Company specifications.

Purchased Power Charges

Purchased power charges are adjusted annually by the Florida Public Service Commission. For current purchased power costs included in the tariff, see Sheet No. 7.021 & 7.022.

Minimum Bill

The above rates times the number of lamps connected.

RATE SCHEDULE LS
LIGHTING SERVICE

Terms of Payment

Bills are rendered net and are due and payable within twenty (20) days from date of bill.

Purchased Power Costs

See Sheet No. 7.021 & 7.022.

Conservation Costs

See Sheet No. 7.021 & 7.022.

Franchise Fee Adjustment

Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the Customer is located.

Term of Service

Service under this rate schedule shall be by written contract for a period of five or more years.

Terms and Conditions

1. Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

2. The charges set forth above cover the initial installation of overhead lines, poles and fixture assembly including bracket, and the maintenance duty as limited to lamp renewals due to burn outs only, or the repair or replacement of equipment causing lamps not to be illuminated.

The Company will repair or replace malfunctioning lighting fixtures maintained by the company in accordance with Section 768.1382, Florida Statues (2005). Maintenance duty to be undertaken by Florida Public Utilities Company is limited to lamp renewal due to burn outs only, or the repair or replacement of equipment causing lamps not to be illuminated. Such burnt out lamp replacements or repairs causing non-illumination of lamps will be performed only during regular daytime working hours as soon as practical after notification of the burn out or non-illumination conditions of the lamp by the Customer. The maintenance duties undertaken herein are expressly limited to our paying Customer and are not to be deemed to create a duty to the general public at large.

RATE SCHEDULE OSL
MERCURY VAPOR LIGHTING SERVICE
(Closed To New Installations)

Availability

Available within the territory served by the Company in Calhoun, Jackson and Liberty Counties and on Amelia Island in Nassau County.

Applicability

Applicable to any Customer for mercury vapor lighting service.

Character of Service

Lighting service from dusk to dawn as described herein.

Limitations of Service

Service is limited to lighting by mercury vapor lamps of 7,000 or 20,000 initial level of lumens mounted on wood poles, as described herein.

Monthly Rate

When lighting fixtures are mounted on existing poles and served directly from existing overhead secondary distribution lines:

Lamp Size Lumens	KWH/Mo. Estimate	Facilities Charge	Maintenance* Charge	Energy Charge	Total Charge
7,000	72	$1.78	$1.59	$4.73	$8.10
20,000	154	$1.96	$1.69	$10.17	$13.82

For concrete or fiberglass poles and/or underground conductors, etcetera, the Customer shall pay a lump sum amount equal to the estimated differential cost between the special system and the equivalent overhead-wood pole system.

Purchased Power

Charges

Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January. For current purchased power costs included in the tariff, see Sheet Nos. 7.021 & 7.022.

Minimum Bill

The above rates times the number of lamps connected.

Terms of Payment

Bills are rendered net and are due and payable within twenty (20) days from date of bill.

RATE SCHEDULE OSL

Franchise Fee Adjustment

Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the Customer is located.

Terms of Service

Service under this rate schedule shall be by written contract for a period of two or more years.

Terms and Conditions

1. Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

2. The charges set forth above cover the initial installation of overhead lines, poles and fixture assembly including bracket, and maintenance duty as limited including lamp renewals due to burn outs only, or the repair or replacement of equipment causing lamps not to be illuminated. Such burnt out lamp replacements or repairs causing non-illumination of lamps will be performed as soon as practical after notification of the burnt out lamp or non-illumination by patrols made by company personnel or the Customer. However, Company shall not be required to replace existing street lighting fixtures for Customers receiving service under this rate.

* The Company will repair or replace malfunctioning lighting fixtures maintained by the company in accordance with Section 768.1382, Florida Statues (2005). Maintenance duty to be undertaken by Florida Public Utilities Company is limited to lamp renewal due to burn outs only, or the repair or replacement of equipment causing lamps not to be illuminated. Such burnt out lamp replacements or repairs causing non-illumination of lamps will be performed during regular daytime working hours as soon as practical after notification of the burn out or non-illumination conditions of the lamp by the Customer. The maintenance duties undertaken herein are expressly limited to our paying Customer and are not to be deemed to create a duty to the general public at large.

ECONOMIC DEVELOPMENT RIDER PROGRAM-EDRP

Availability:

This Economic Development Rate Program (the "Program") is available throughout the entire territory served by Florida Public Utilities Company. The Qualifying load and employment requirements under this Rider must be achieved at the same delivery point. Additional metering equipment may be required for service under this Rider.

Application:

This Program is applicable to new electric load associated with:

(1) Initial permanent service to new commercial and industrial establishments.

(2) Commercial or industrial space that has been vacant for more than six months prior to the application for service under the Program. Verification of vacancy will be established by evidence of no or minimal electric load during the time period in question.

(3) The expansion of existing establishments. For existing establishments, new load is the net incremental load above that which existed prior to approval for service under this Program.

The new load applicable under this Program for new and vacant establishments must be a minimum of 200 kW at a single delivery point. In the case of the expansion of existing facilities, the added new load must be a minimum of 100 kW, however, in order to qualify, the total load after the addition of the new load must be a minimum of 200 kW at a single delivery point. To qualify for service under this Program, the Customer must employ an additional work force of at least 10 full-time employees at the delivery point to which the load is added.

In order to take service under the Program, the Customer must provide sufficient evidence to Florida Public Utilities Company to establish that the availability of the Program is a significant factor in the Customer's location or expansion decision.

Initial application for this Program is not available to existing load. However, if a change in ownership occurs after the Customer contracts for service under this Program, the successor Customer may be allowed to fulfill the balance of the contract under the Program and continue the schedule of credits outlined below.

This Program is not available for load shifted from one establishment or delivery point on the Florida Public Utilities system to another on the Florida Public Utilities system.

ECONOMIC DEVELOPMENT RIDER PROGRAM-EDRP (Continued)

Monthly Rate:

The rates and all other terms and conditions of the Customer's otherwise applicable rate schedule shall be applicable under this Program. A credit based on the percentages below will be applied to the demand charges and non-fuel (base) energy charges of the Customer's otherwise applicable rate schedule associated with the Customer's new load:

Year 1 - 20% reduction
Year 2 - 15% reduction
Year 3 - 10% reduction
Year 4 - 5% reduction
Year 5 - 0% reduction

The above credit will be deducted from the monthly electric bill as computed in accordance with the provisions of the Monthly Rate section of the Customer's applicable rate schedule before application of any discounts or adjustments. All other charges including the Customer charge and energy conservation charge will be based on the Customer's otherwise applicable rate. The otherwise applicable rates may be any of the following: GSD, GSLD, or GSLD1.

Term of service:

The Customer agrees to a five-year contract term. Service under this Program will terminate at the end of the fifth year. Florida Public Utilities Company may terminate service under this Program at any time if the Customer fails to comply with the terms and conditions of this Program. Failure to: 1) maintain the level of employment specified in the Customer's Service Agreement and/or 2) purchase from Florida Public Utilities the amount of load specified in the Customer's Service Agreement will be considered grounds for termination.

If Florida Public Utilities Company terminates service under the Program for the Customer's failure to comply with its provisions, or if the Customer opts to terminate service under the Program, the Customer will be placed on their applicable rate schedule with no future discounts or rate reductions.

Service under this Rider is subject to the Rules and Regulations of the Company and the Florida Public Service Commission.

ECONOMIC DEVELOPMENT RIDE PROGRAM-EDRP

ECONOMIC DEVELOPMENT RIDER PROGRAM- EDRP

Service Agreement

The Customer is applying for service under the Economic Development Rate Program based upon new or expanded load as indicated below (Check one):

☐ New Load associated with a new commercial or industrial establishment

☐ New Load established in commercial or industrial space that has been vacant for more than six months

☐ Expanded Load associated with an existing establishment

CUSTOMER NAME____

SERVICE ADDRESS____

TYPE OF BUSINESS____

The Customer hereto agrees as follows:

1. For new and vacant establishments, a minimum of 200 kW of measured demand must be added at a single delivery point.
2. For existing establishments that are expanding, a minimum of 100 kW of measured demand must be added at a single delivery point, and the total measured demand after the addition of the new load must be a minimum of 200 kW.
3. In all cases, the Customer must employ an additional work force of at least 10 full-time employees at the delivery point to which the load is added.
4. That the quantity of new or expanded load shall be 200KW of Demand.
5. The nature of this new or expanded load is____
6. That in the case of a new Customer adding load to vacant facilities, the commercial/industrial space associated with the new load has been vacant for more than six months.
7. In case of early termination, the Customer shall repay Florida Public Utilities all of the credits provided under the Program to date.
8. To initiate service under this Program on ______________________,________ and terminate service under this Program on ______________________,__________. This shall constitute a period of five years.
9. To provide verification that the availability for this Program is a significant factor in the Customer's location/expansion decision.
10. If a change in ownership occurs after the Customer contracts for service under this Program, the successor Customer may be allowed to fulfill the balance of the contract under the Program and continue the schedule of credits.
11. That in the case of new load established in a vacant facility to provide verification that there is no affiliation with any prior occupant.

RATE ADJUSTMENT RIDER – NORTHWEST FLORIDA DIVISION

Applicability
Electric service under all rate schedules for the Northwest Florida Division, which specify that rates are subject to adjustment in accordance with the provisions of the Company's Rate Adjustment Rider.

Total Purchased Power Cost Recovery Clause
The total purchased power cost adjustment shall be applied to each kilowatt hour delivered and shall be computed in accordance with the formula prescribed by the Florida Public Service commission. The total purchased power cost adjustment for the period January 1, 2024 through December 31, 2024 is as follows:

Rate Class	Rate Schedule	Levelized Adjustment
Residential (1st 1000 KWH's)	RS	10.259¢ / KWH
Residential (above 1000 KWH's)	RS	11.509¢ / KWH
General Service	GS	10.637¢ / KWH
General Service-Demand	GSD	10.035¢ / KWH
Lighting Service	LS	8.180¢ / KWH
General Service-Large Demand	GSLD	9.772¢ / KWH
General Service-Large Demand 1	GSLD 1	Not Applicable At This Time

Time of Use Rate Class	Rate Schedule	Levelized Adjustment On-Peak	Off Peak
Residential TOU	RST - EXP	18.659¢ / KWH	6.359¢ / KWH
General Service TOU	GST - EXP	14.637¢ / KWH	5.637¢ / KWH
General Service-Demand TOU	GSDT – EXP	14.035¢ / KWH	6.785¢ / KWH
General Service-Large Demand TOU	GSLDT – EXP	15.772¢ / KWH	6.772¢ / KWH

Energy Conservation Cost Recovery Clause
Each base energy rate per KWH of the above rate schedules for the period January 1, 2024 through December 31, 2024 shall be increased by 0 .144 ¢/KWH of sales to recover conservation related expenditures by the Company. This adjustment is determined in accordance with the formula and procedures specified by the Florida Public Service Commission.

The Energy Conservation Cost Recovery Clause will not apply to the GSLD-1 rate class.

Tax Cost Recovery
There will be added to all bills rendered for electric service a proportionate share of all license fees and taxes imposed by any governmental authorities after November 1, 1946, to an extent sufficient to cover excess increased taxes or license fees.

RATE ADJUSTMENT RIDER – NORTHEAST FLORIDA DIVISION

Applicability

Electric service under all rate schedules for the Northeast Florida Division which specify that rates are subject to adjustment in accordance with the provisions of the Company's Rate Adjustment Rider.

Total Purchased Power Cost Recovery Clause

The total purchased power cost adjustment shall be applied to each kilowatt hour delivered and shall be computed in accordance with the formula prescribed by the Florida Public Service Commission. The total purchased power cost adjustment for the period January 1, 2024 through December 31, 2024 is as follows:

Rate Class	Rate Schedule	Levelized Adjustment
Residential (1st 1000 KWH's)	RS	10.259¢ / KWH
Residential (above 1000 KWH's)	RS	11.509¢ / KWH
General Service	GS	10.637¢ / KWH
General Service –Demand	GSD	10.035¢ / KWH
General Service –Large Demand	GSLD	9.772¢ / KWH
Lighting Service	LS	8.180¢ / KWH
General Service Large Demand 1	GSLD 1	Generation Demand $ 5.41/ KW* Transmission Demand $ 2.91/ KW* Energy 7.12 ¢ / KWH*

*Estimated for informational purposes only,
Monthly rate will be billed at actual cost.

Energy Conservation Cost Recovery Clause

Each base energy rate per KWH of the above rate schedules for the period January 1, 2024 through December 31, 2024 shall be increased by 0.144 ¢ / KWH of sales to recover conservation related expenditures by the Company. This adjustment is determined in accordance with the formula and procedures specified by the Florida Public Service Commission.

The Energy Conservation Cost Recovery Clause will not apply to the GSLD-1 rate class.

Tax Recovery

There will be added to all bills rendered for electric service a proportionate share of all license fees and taxes imposed by any governmental authorities after January 1, 1945, to an extent sufficient to cover excess increased taxes or license fee.

NON-FIRM ENERGY PROGRAM NFEP-EXP (EXPERIMENTAL) - CLOSED

Availability

Available within the territory served by the Company in Jackson, Calhoun, and Liberty Counties and on Amelia Island in Nassau County. This service is limited to Customers in the GSLD1 or Standby rate class. The Rate Schedule is closed to new Customers and shall expire within 90 days written notice by the Company to participating Customers and will expire in its entirety by September 1, 2025.

Applicability

Applicable to Customers which are self-generators with dispatchable generation and are eligible for Rate Schedule GSLD1 or Standby, or who have executed a Special Contract approved by the Commission. Eligible Customers would nominate, in accordance with the procedures outlined below, an amount of electric load they commit to purchase that is above and in addition to the Customer's established baseline. Non-Firm (NF) Energy nominations must be made in 1,000 KW increments and is currently limited to a minimum of 1,000 kW and maximum of 15,000 kW. The Customer is not obligated to nominate NF Energy for any specific period but must nominate a minimum of 1,500 MWh per year.

The default period for NF Energy nominations will be 7 days. Nominations for longer periods, e.g. monthly, will be made available when market conditions warrant. The same procedure for nominations and acceptance will apply to all periods. Customer may nominate NF Energy for on-peak hours, off-peak hours, or all hours. On-peak hours are Hour Ending (H.E.) 08:00 to H.E 23:00 weekdays and off-peak hours are H.E. 24:00 to HE 07:00 and all hours on weekends and established holidays. Times shown are Eastern Standard or Daylight Savings time. On-peak and off-peak hours are subject to change.

Once the Company confirms the Customer's nomination, the Customer is obligated to pay for all NF Energy nominated at the offered rate regardless of whether the Customer takes all NF Energy nominated for the month, unless recalled in accordance with NF Recall provisions.

Monthly Rate

The rates and all other terms and conditions of the Customer's otherwise applicable rate schedule shall be applicable under this program.

All NF Energy shall be charged at the hourly price, in $/MWh, as offered by the Company. Once nominated by the Customer and accepted by the Company, the Customer is responsible to pay the full NF Energy Charge for the nomination period regardless of whether the Customer takes all NF Energy nominated for the month. Any purchases that exceed the combined total of the Customer's baseline and NF Energy nominations will be billed based on the Customer's otherwise applicable rate. The NF Energy charges are in addition to the charges based on the Customers otherwise applicable rate.

Monthly NF Administrative Charge:
$0.00 per Customer per month

NON-FIRM ENERGY PROGRAM NFEP-EXP (EXPERIMENTAL) - CLOSED

Monthly NF Demand Charge:
$0.00 per kW of NF demand

Monthly Rate

NF Energy Charge:
Amount as offered and accepted for each nomination

Monthly NF Demand

The Monthly NF Demand shall equal the maximum hour of NF Energy nominated by the Customer for the calendar month.

Minimum Monthly Bill

The Minimum Monthly Bill shall consist of the Monthly NF Administrative Charge plus applicable taxes and fees.

Term of Service

The Customer agrees to a minimum of 12 months of service under the Program. Service will continue thereafter until the Customer submits to the Company a written notice of termination. Service will discontinue at the end of the calendar month that notice of termination is received.

Nomination and Acceptance Procedure

1. By 10:00 AM each Friday, or when NF Energy is available, the Company will provide the Customer with NF Energy price quotations for the following period beginning 0:00 (midnight) the following Sunday (time period is Monday 00:00 – Sunday 24:00).
2. The Customer will submit a NF Energy nomination schedule to the Company by 2:00 PM of the same day that the offer is submitted.
3. NF Energy nominations are accepted once the Company confirms receipt of the nomination. The Company will then schedule delivery of the NF Energy, if any, beginning 0:00 (midnight) the following Sunday.

Nomination Recall Provisions:

Once accepted, nominations by Customer may only be withdrawn if a Force Majeure is declared. A Force Majeure may be declared by the Customer if the Customer's equipment suffers major failure such that the Customer is prevented from taking the NF Energy. In such case, the Customer will notify the Company's designated contact by approved method as soon as condition is known and the Company will attempt to withdraw the scheduled delivery of NF Energy. If possible, the Customer will no longer be responsible for purchasing the balance of NF Energy nominated during the event. Customer may declare Force Majeure a maximum of once per month.

Company may terminate NF Energy delivery at any time due to system emergencies or unusual pricing by notifying Customer of such termination, and Company has no obligation to deliver NF Energy.

STORM PROTECTION PLAN COST RECOVERY CLAUSE

Applicability

Electric service under all rate schedules.

Storm Protection Plan Cost Recovery Clause

The Storm Protection Plan Cost Recovery (SPPCRC) Factors shall be applied to the Customer's total kilowatt hour billed. This factor is designed to recover expenditures incurred by the Company related to the protection and hardening of the grid from storms and other extreme weather events. This adjustment is determined in accordance with the formula and procedures prescribed by the Florida Public Service Commission as set forth in Rule 25-6.031, F.A.C.

The total Storm Protection Plan Cost Recovery factors for the period January 1, 2024 through December 31, 2024 are as follows:

Rate Schedule	SPP Factors per KWH
Residential	0 .4320¢ / KWH
General Service	0 .4980¢ / KWH
General Service Demand	0 .2730¢ / KWH
General Service Large Demand	0 .1740¢ / KWH
Industrial/Standby	0 .2930¢ / KWH
Lighting Service	2.6520¢ / KWH

STORM RECOVERY SURCHARGE

Hurricanes Michael Surcharge:

Applicability:
Electric service under all rate schedules.

Description:
This surcharge is for recovery of storm costs and will be recovered from November 2020 through December 2025.

Rate Class – GSLD-1 - $190,208 total, annually to be allocated across the GSLD-1 rate class.

All other Rate Schedules - The surcharge of 1.280¢/ KWH will be applied to each kilowatt hour billed from November 2020 through December 2025.

TECHNOLOGY COST RECOVERY RIDER - (TCRR)

Purpose:
The Technology Cost Recovery Rider ("TCRR") is a fixed monthly charge per Customer premise for the purpose of recovering the cost of the Company's new and updated technology costs. The Company shall record both projected and actual expenses and revenues associated with the purchase and implementation of the Company's technology implementation plan.

Applicability:
Applies to all Residential and Commercial rate schedules. Except as otherwise provided herein, each rate schedule listed below shall be increased or decreased to the nearest .01 dollar.

The TCRR cost recovery mechanism will be based on a projected twelve (12) month recovery period of January 1 to December 31. The Company will file the first TCRR rates with the Commission at least sixty (60) days before it goes into service and refile on an annual basis at least sixty (60) days prior to the January 1 effective date.

Methodology for Cost Recovery for Technological Improvements:
The costs used in the determination of the TCCR shall include the pre and post implementation capitalized expenses for the Company's improvement. Specifically the rate(s) will include a) the capitalized cost of the system. b) less accumulated depreciation of the system. c) plus the unamortized regulatory asset and d) less accumulated deferred income tax (ADIT) for the Florida business unit, e) less the net retirement of the Company's former system (including any other costs already recovered in current base rates. The total of these capitalized costs would then be multiplied by the most recently approved authorized rate of return with the equity portion grossed up for income taxes to determine the return on investment. This return would be added to a) the depreciation expense related to the asset, b) amortization of the regulatory asset over twenty (20) years, c) less any discontinued depreciation expenses associated with the former asset existing at retirement, this amount shall be based on that depreciation expense included in the Company's base rates, d) plus any new expenses associated with the new system, e) less expenses that were discontinued and associated with the former system (and any other expenses already recovered in current base rates). The total of the return on investment and the costs outlined in (a) through (e) above, will be divided by the number of Customers (excluding any special contracts) in the projected recovery period to determine an annualized cost per Customer premise. This cost will be divided by the 12 months to get the monthly rate. The chart below outlines the methodology that will be used.

TECHNOLOGY COST RECOVERY RIDER – (TCCR)

Methodology Continued

1	Capitalized Costs	
2	Less Accumulated Depreciation	
3	Company Technology Asset	
4	Less Retirement of Former System including any other costs already recovered in current base rates	
5	Less ADIT	
6	Total Balance Sheet Account Related to Technological Improvement	= (Line 1 - Line 2 + Line 3 - Line 4 - Line 5)
7	Multiply by the Most recent Approved Authorized Rate of Return with the Equity Portion Grossed Up for Taxes	
8	Return on Capital Investment	= (Line 6 x Line 7)
9	Depreciation Expense	
10	Amortization of the Regulatory Asset over 20 Years	
11	Less Reduction in Depreciation Expense Related to the Retirement	
12	Expenses related to the new system that are incremental to those in current base rates	
13	Less Expenses discontinued from the former system and any other expenses already recovered in current base rates	
14	Total Cost of the System	= (Line 8 + Line 9 + Line 10 - Line 11 + Line 12 - Line 13)
15	Customers projected for 1 year recovery period excluding special contracts	
16	Rate per Customer per Year	= (Line 14 / Line 15)
17	Rate per Customer per Month	= (Line 16 / Line 12)

The cost recovery factors for the period from the first billing cycle for the period of January 1 through the last billing cycle for December 31 as follows:

Rate Schedule:	Monthly Charge/Customer
RS	To be determined
GS-ND	To be determined
GS-D	To be determined
GSLD	To be determined

STANDARD FORMS
EXTENSION OF FACILITIES AGREEMENT

FLORIDA PUBLIC UTILITIES COMPANY

EXTENSION OF FACILITIES AGREEMENT

This Agreement, executed in duplicate as of the _ day of_______________ , 20__, by and between Florida Public Utilities Company, a Florida Corporation, hereinafter referred to as the "Company", party of the first part, and ________________ hereinafter referred to as the "Customer", party of the second part, witnesseth:

Whereas, the Customer is desirous of securing an extension or increase of the facilities of the Company as hereinafter described; and whereas, the Company is willing to make such extension or increase;

Now, therefore, in consideration of the respective and mutual covenants and agreements contained herein and hereinafter set forth, the parties hereto agree with each other as follows:

1. The Company will extend or increase its facilities as follows:

The Company will commence the extension or increase of its facilities forthwith after the execution of this Agreement and use its best efforts to complete the extension or increase of its facilities as soon as reasonably possible; provided, however, that the parties expressly agree that the Company shall not be liable or responsible for any delay caused by or resulting from shortages or unavailability of material or labor, or from any other hindrance or delay beyond the control of the Company.

2. To compensate the Company for the cost and expense of the aforesaid extension or increase of its facilities, the Customer simultaneously with the execution of this Agreement has paid to the Company the sum of $_____, the receipt of which hereby is acknowledged by the Company. The parties agree that said sum was paid by the Customer to and received by the Company without the right of any rebate, credit, reduction or adjustment in favor of either party.

3. The parties agree that the Company shall at all times have title to and keep ownership and control in and over the aforesaid extended or increased facilities, including but not limited to all new materials and equipment installed therein; and the parties agree further that the Company shall have the sole and exclusive right to use the extended or increased facilities for the purpose of serving other Customers of the Company.

STANDARD FORMS
EXTENSION OF FACILITIES AGREEMENT (Continued)

4. After the extension or increase of the facilities described above, the Customer agrees that subject to all applicable terms, provisions, rights, duties and penalties, the Customer will in the usual manner and at the usual times pay for the utilities and services delivered to the Customer by means of the extended or increased facilities at the regular franchise or at special contract rates, whichever is applicable.

5. The parties agree that no representation, warranty, conditions or agreement of any kind or nature whatsoever shall be binding upon either of the parties hereto unless incorporated in this Agreement; and the parties agree further that this Agreement covers and includes the entire agreement between the parties. The parties agree that all covenants and agreements contained herein shall extend to, be obligatory upon and inure to the benefit of the parties hereto and their respective heirs, legal representatives, successors and assigns; provided, however, that the Customer may not transfer or assign all or any part of this Agreement or any right which he may obtain hereunder without first obtaining the written consent of the Company.

In witness whereof, the parties hereto have executed this Agreement as of the day and year hereinbefore first written.

DEPOSIT OF FACILITIES AGREEMENT

This Agreement, executed in duplicate as of the ____ day of_________________ , 20__, by and between Florida Public Utilities Company, a Florida Corporation, hereinafter referred to as the "Company", party of the first part, and _______________ hereinafter referred to as the "Customer", party of the second part, witnesseth:

Whereas, the Customer is desirous of securing an extension or increase of the facilities of the Company as hereinafter described; and whereas, the Company is willing to make such extension or increase;

Now, therefore, in consideration of the respective and mutual covenants and agreements contained herein and hereinafter set forth, the parties hereto agree with each other as follows:

1. The Company will extend or increase its facilities as follows:

The Company will commence the extension or increase of its facilities forthwith after the execution of this Agreement and use its best efforts to complete the extension or increase of its facilities as soon as reasonably possible; provided, however, that the parties expressly agree that the Company shall not be liable or responsible for any delay caused by or resulting from shortages or unavailability of material or labor, or from any other hindrance or delay beyond the control of the Company.

2. To compensate the Company for the cost and expense of the aforesaid extension or increase of its facilities in accordance with the Company's Rules and Regulations for extensions, the Customer simultaneously with the execution of this Agreement has paid to the Company the sum of $____, the receipt of which hereby is acknowledged by the Company. The parties agree that said sum was paid by the Customer to and received by the Company in accordance with the Company's Rules and Regulations for service requiring extension of facilities within the service area of the Company in __________________ County, Florida. The Company's Rules and Regulations as filed with and approved by the Florida Public Service Commission are made a part of this Agreement.

3. The parties agree that the Company shall at all times have title to and keep ownership and control in and over the aforesaid extended or increased

facilities, including but not limited to all new materials and equipment installed therein; and the parties agree further that the Company shall have the sole and exclusive right to use the extended or increased facilities for the purpose of serving other Customers of the Company.

4. After the extension or increase of the facilities described above, the Customer agrees that subject to all applicable terms, provisions, rights, duties and penalties, the Customer will in the usual manner and at the usual times pay for the utilities and services delivered to the Customer by means of the extended or increased facilities in accordance with the Company's tariffs filed with and approved by the Florida Public Service Commission.

5. The parties agree that no representation, warranty, conditions or agreement of any kind or nature whatsoever shall be binding upon either of the parties hereto unless incorporated in this Agreement; and the parties agree further that this Agreement covers and includes the entire agreement between the parties. The parties agree that all covenants and agreements contained herein shall extend to, be obligatory upon and inure to the benefit of the parties hereto and their respective heirs, legal representatives, successors and assigns; provided, however, that the Customer may not transfer or assign all or any part of this Agreement or any right which he may obtain hereunder without first obtaining the written consent of the Company.

In witness whereof, the parties hereto have executed this Agreement as of the day and year hereinbefore first written.

STANDARD FORMS / APPLICATION
INTERCONNECTION OF CUSTOMER-OWNED

RENEWABLE GENERATION SYSTEMS APPLICATION
INTERCONNECTION OF CUSTOMER OWNED RENEWABLE
GENERATION SYSTEMS

TIER 1 – 10 KW or Less
TIER 2 – Greater than 10 KW and Less Than or Equal to 100 KW
TIER 3 – Greater than 100 KW and Less Than or Equal to 2 MW

Florida Public Utilities Company Customers who install Customer-owned renewable generation systems and desire to interconnect those facilities with the FPUC electrical system are required to complete this application. This application can be obtained from the local FPU office or can be downloaded from the FPUC website (www.fpuc.com). When the completed application and fees are returned to FPUC, the process of completing the appropriate Tier 1, Tier 2 or Tier 3 Interconnection Agreement can begin. The Interconnection Agreements may be obtained at the local FPUC office. Details for interconnection agreements may be found as defined in Rule 25-6.065, Florida Administrative Code or within the Florida Public Utilities Company Interconnection Agreement.

1. Customer Information

Name: ____

Mailing Address: ____

City: ____________________ State: ________ Zip Code: ______________

Phone Number: ______________ Alternate Phone Number: ________________

Email Address: __________________ Fax Number: ____________________

2. Facility Information

Facility Location: ____

____

FPUC Account Number (if available): ______________________________

Manufacturers Name/Address: ______________________________

____

Reference or Model Number: ______________________________

Serial Number: ____

INTERCONNECTION OF CUSTOMER-OWNED
RENEWABLE GENERATION SYSTEMS APPLICATION (Continued)

3. Facility Rating Information

Gross Power Rating: ______________________ ("Gross power rating" means the total manufacturer's AC nameplate generating capacity of an on-site Customer-owned renewable generation system that will be interconnected to and operate in parallel with the investor-owned utility's distribution facilities. For inverter-based systems, the AC nameplate generating capacity shall be calculated by multiplying the total installed DC nameplate generating capacity by .85 in order to account for losses during the conversion from DC to AC.
Fuel or Energy Source: ______________________

Anticipated In- Service Date: _________________

4. Application Fee

The application fee is based on the Gross Power Rating and must be submitted with this application. There is no application fee for Tier 1 installations. The non-refundable application fee is $350 for Tier 2 and Tier 3 installations.

5. Interconnection Study Fee

For Tier 3 installations that require an interconnection study, as determined by the Company, the Customer will pay $2,000 prior to the initiation of the interconnection study. The total cost to the Customer will not exceed this amount. Should the actual interconnection study cost be less than $2,000 the Customer will be refunded the difference.

6. Required Documentation

Before the Interconnection Agreement may become effective, the Documentation listed in this Section must be provided to the Company by the Customer. The Documentation listed does not need to accompany the Application but must be received before the Interconnection Agreement will be executed by the Company.

A. Documentation that the installation complies with:

   1. IEEE 1547 (2003) Standard for Interconnecting Distributed Resources with Electric Power Systems.
   2. IEEE 1547.1 (2005) Standard Conformance Test Procedures for Equipment Interconnecting Distributed Resources with Electric Power Systems.
   3. UL 1741 (2005) Inverters, Converters, Controllers and Interconnection System Equipment for Use with Distributed Energy Resources.

B. Documentation that the Customer-owned renewable generation has been inspected and approved by local code officials prior to its operation in parallel with the Company system to ensure compliance with applicable local codes.

C. Proof of general liability insurance for Tier 2 generators ($1,000,000) or Tier 3 generators ($2,000,000). Not required for Tier 1 generators.

D. Copy of any lease agreements if the Customer is leasing facility from third party.

RESERVED FOR FUTURE USE

STANDARD FORMS
STANDARD INTERCONNECTION AGREEMENT - TIER 1

STANDARD INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)

This agreement made and entered into as of this __ day of ________________________________,

____________ by and between _____________________ hereinafter known at the "Customer" and Florida Public Utilities Company hereinafter know as the "Company". This agreement is made in accordance with Florida Public Commission Rule 25-6.065 F.A.C., Interconnection and Net Metering of Customer-Owned Renewable Generation and under the terms and conditions as approved by the Florida Public Service Commission pursuant to Rule 25-6.065(3), F.A.C.

1. The Customer's renewable generation system is within the Company service territory and is located at:

   ____

   ____

   and should be installed and operational by:

   __________________________, ____________.

2. Customer will ensure the installation will meet or exceed all requirements noted below, will provide the Company with reasonable notification prior to the operation of the system and will assist the Company in verifying that the installation complies with the agreement prior to operating in parallel with the Company's electric system.

3. The Customer's renewable generation system is described as follows:

   a. Equipment Manufacturers Name and Address:

   ____

   ____

   ____

   b. Manufacturers Reference Number, Serial Number, Type, Style, Model, Etc.

   ____

   ____

   ____

   c. Name Plate Rating (KW and Voltage):

   ____

   ____

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

4. Standard Interconnection Agreement Requirements – To qualify for expedited interconnection as a Tier 1 generator pursuant to Rule 25-6.065, F.A.C., the Facility must:

   (a) Comply with IEEE 1547 (2003) Standard for Interconnecting Distributed Resources with Electric Power Systems.
   (b) Comply with IEEE 1547.1 (2005) Standard Conformance Test Procedures for Equipment Interconnecting Distributed Resources with Electric Power Systems.
   (c) Comply with UL 1741 (2005) Inverters, Converters, Controllers and Interconnection System Equipment for Use With Distributed Energy Resources.
   (d) Have a Gross Power Rating that does not exceed 90% of the Customer's utility distribution service rating.
   (e) Have a Gross Power Rating of 10 KW or less.

5. Customer Qualifications and Fees – The Customer shall comply with the following to qualify as a Tier 1 generator pursuant to Rule 25-6.065, F.A.C.:

   (a) Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards listed in Section (4).
   (b) Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to Section (5) (a) that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid in the event the electric grid loses power.
   (c) Provided the Customer-owned renewable generation equipment complies with Sections (4) and (5) (a), (b), the Company shall not require further design review, testing, or additional equipment other than that provided for in Section (9).
   (d) Tier 1 Customers who request interconnection of Customer-owned renewable generation shall not be charged fees in addition to those charged to other retail Customers without self-generation, including application fees.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

6. Inspection Requirements – Prior to operating the Customer system in parallel with Company's electric system, the Customer will:

   (a) Have the Customer-owned renewable generation inspected and approved by local code officials prior to its operation in parallel with the Company system to ensure compliance with applicable local codes.

   (b) Make provisions that permit the Company to inspect Customer-owned renewable generation and its component equipment, and the documents necessary to ensure compliance with Sections (4) and (5). The Customer shall notify the Company at least 10 days prior to initially placing Customer equipment and protective apparatus in service, and the Company shall have the right to have personnel present on the in-service date. If the Customer-owned renewable generation system is subsequently modified in order to increase its gross power rating, the Customer must notify the Company by submitting a new application specifying the modifications at least 30 days prior to making the modifications.

   (c) Provide for protection of the renewable generating equipment, inverters, protective devices, and other system components from damage from the normal and abnormal conditions and operations that occur on the Company system in delivering and restoring power; and is responsible for ensuring that Customer-owned renewable generation equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to ensure that it is operating correctly and safely.

7. Indemnity for Loss to Third Parties - The Customer shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the Customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

8. Customer Insurance Requirements – The Customer owning a Tier 1 generator is not required by rule to obtain general liability insurance for damage to persons or property as a result of the operation of the generator. However, the Company strongly recommends that a Tier 1 Customer carry an appropriate level of liability insurance.

9. Manual Disconnect Switch - Inverter-based Tier 1 Customer-owned renewable generation systems shall be exempt from this requirement. However, the Company recommends that the Customer install, at the Customer's expense, a manual disconnect switch of the visible load break type to provide a separation point between the AC power output of the Customer-owned renewable generation and any Customer wiring connected to the Company's system. The manual disconnect switch shall be mounted separate from, but adjacent to, the meter socket and shall be readily accessible to the Company and capable of being locked in the open position with a single Company padlock. Should a main disconnect switch not be installed, removal of the electric meter and disconnection of electric service may be used to isolate the Customer owned generation for the electric grid.

10. Disconnection From Customer System - The Company may open the manual disconnect switch pursuant to the conditions set forth below in (10) (a) – (10) (d), isolating the Customer-owned renewable generation, without prior notice to the Customer. To the extent practicable, however, prior notice shall be given. If prior notice is not given, the Company shall at the time of disconnection leave a door hanger notifying the Customer that their Customer-owned renewable generation has been disconnected, including an explanation of the condition necessitating such action. The Company shall reconnect the Customer-owned renewable generation as soon as the condition necessitating disconnection is remedied.
    a. Emergencies or maintenance requirements on the Company's electric system;
    b. Hazardous conditions existing on the Company system due to the operation of the Customer's generating or protective equipment as determined by the Company;
    c. Adverse electrical effects, such as power quality problems, on the electrical equipment of the Company's other electric consumers caused by the Customer-owned renewable generation as determined by the Company;
    d. Failure of the Customer to maintain the required insurance coverage (if required).

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS) (Continued)

11. Administrative Requirements

(a) The Company shall maintain on its website a downloadable application for interconnection of Customer-owned renewable generation, detailing the information necessary to execute the Standard Interconnection Agreement. Upon request the Company shall provide a hard copy of the application within 5 business days.

(b) Within 10 business days of receipt of the Customer's application, the Company shall provide written notice that it has received all documents required by the Standard Interconnection Agreement or indicate how the application is deficient. Within 10 business days of receipt of a completed application, the Company shall provide written notice verifying receipt of the completed application. The written notice shall also include dates for any physical inspection of the Customer-owned renewable generation necessary for the Company to confirm compliance with Sections (4) through (10).

(c) The Standard Interconnection Agreement shall be executed by the Company within 30 calendar days of receipt of a completed application.

(d) The Customer must execute the Standard Interconnection Agreement and return it to the Company at least 30 calendar days prior to beginning parallel operations and within one year after the utility executes the Agreement. All physical inspections must be completed by the Company within 30 calendar days of receipt of the Customer's executed Standard Interconnection Agreement. If the inspection is delayed at the Customer's request, the Customer shall contact the utility to reschedule an inspection. The Company shall reschedule the inspection within 10 business days of the Customer's request.

12. Net Metering

(a) The Company shall enable each Customer-owned renewable generation facility interconnected to the investor-owned utility's electrical grid pursuant to this rule to net meter.

(b) The Company shall install, at no additional cost to the Customer, metering equipment at the point of delivery capable of measuring the difference between the electricity supplied to the Customer from the investor-owned utility and the electricity generated by the Customer and delivered to the investor-owned utility's electric grid.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS) (Continued)

12. Net Metering (continued)

(c) Meter readings shall be taken monthly on the same cycle as required under the otherwise applicable rate schedule.

(d) The Company shall charge for electricity used by the Customer in excess of the generation supplied by Customer-owned renewable generation in accordance with normal billing practices.

(e) During any billing cycle, excess Customer-owned renewable generation delivered to the Company's electric grid shall be credited to the Customer's energy consumption for the next month's billing cycle.

(f) Energy credits produced pursuant to Section (12) (e) shall accumulate and be used to offset the Customer's energy usage in subsequent months for a period of not more than twelve months. At the end of each calendar year, the Company shall pay the Customer for any unused energy credits at an average annual rate based on the Company's COG-1, as-available energy tariff.

(g) When a Customer leaves the system, that Customer's unused credits for excess kWh generated shall be paid to the Customer at an average annual rate based on the Company's COG-1, as-available energy tariff.

(h) Regardless of whether excess energy is delivered to the Company's electric grid, the Customer shall continue to pay the applicable Customer charge and applicable demand charge (if applicable) for the maximum measured demand during the billing period. The Company shall charge for electricity used by the Customer in excess of the generation supplied by Customer-owned renewable generation at the Company's otherwise applicable rate schedule. The Customer may at their sole discretion choose to take service under the Company's standby or supplemental service rate, if available.

13. Renewable Energy Certificates - Customers shall retain any Renewable Energy Certificates associated with the electricity produced by their Customer-owned renewable generation equipment. Any additional meters necessary for measuring the total renewable electricity generated for the purposes of receiving Renewable Energy Certificates shall be installed at the Customer's expense, unless otherwise determined during negotiations for the sale of the Customer's Renewable Energy Certificates to the Company.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

14. Change of Ownership – This agreement shall not be assigned or transferred without prior written consent of the Company. Should there be a change in ownership; the Customer shall provide the Company with 30 day notice prior to the change. The Company will contact the new owner prior to the end of the 30 days in order to execute a new agreement. The new owner will not be entitled to operate the generator in parallel with the Company system or be net metered until a new agreement is executed by both parties. However, this agreement shall inure to the benefit of and binding upon the respective heirs, legal representatives, successors and assigns of the parties involved until a new agreement is executed.

15. No Extension of Credit – In executing this agreement, the Company does not, nor should it be construed to extend credit or financial support for the benefit of any third parties lending money to or having other transactions with the Customer or any assignee of this agreement.

16. Applicability of Tariff – The Company's tariff and associated technical terms and abbreviations, general rules, regulations and standard electric service requirements are incorporated herein by reference. In the event that this tariff and the Interconnection Agreement is revised due to rule changes approved by the Florida Public Service Commission, the Company and the Customer agree to replace this agreement with an amended agreement that complies with the amended Florida Public Service Commission rules.

17. Entire Agreement – This agreement supersedes all previous agreements or representations, either written or oral, heretofore in effect between the Company and the Customer, made in respect to matters herein contained, and when duly executed, this agreement constitutes the entire agreement between the parties.

18. Termination – Upon termination of this agreement, the Company shall open and padlock the manual disconnect switch, if applicable, and remove any additional kilowatt-hour meter and associated Company equipment. At the Customer's expense, the Customer agrees to permanently isolate the Facility from the Company's electric service grid. The Customer shall notify the Company in writing within ten (10) business days that the isolation procedure has been completed.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW or Less) (Continued)

19. Retail Purchase of Electricity - "Customer-owned renewable generation" means an electric generating system located on a Customer's premise that is primarily intended to offset part or all of the Customer's electricity requirements with renewable energy. The term "Customer-owned renewable generation" does not preclude the Customer of record from contracting for the purchase, lease, operation, or maintenance of an on-site renewable generation system with a third-party under terms and conditions does not include the retail purchase of electricity from the third party.

20. The Customer agrees to indemnify and hold harmless the Company, its subsidiaries or affiliates, and their respective employees, officers and directors, against any and all liability, loss, damage, cost or expense which the Company, it subsidiaries, affiliates, and their respective employees, officers and directors may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Customer under the obligations of this agreement. The Company agrees to indemnify and hold harmless the Customer, against any and all liability, loss, damage, cost or expense which the Customer may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Company under the obligations of this agreement.

21. Communications, either emergency or routine, related to this agreement or operation of the installation shall be made to the following parties:

Company:
____
____
____
____
____

Customer:
____
____
____
____
____

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW or Less)
(Continued)

22. Dispute Resolution – The Company and Customer may seek resolution of disputes arising out of this interpretation of this agreement pursuant to Rule 25-22.032, F.A.C., Customer Complaints, or Rule 25-22.036, F.A.C., Initiation of Formal Proceedings.

IN WITNESS WHEREOF, the Customer and the Company execute this Agreement this _________ day of _________________________, ________.

STANDARD FORMS
STANDARD INTERCONNECTION AGREEMENT – TIER 2

STANDARD INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2
RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)

This agreement made and entered into as of this _____ day of _______________________, ____________ by and between ___________________________________ hereinafter known at the "Customer" and Florida Public Utilities Company hereinafter know as the "Company". This agreement is made in accordance with Florida Public Commission Rule 25-6.065 F.A.C., Interconnection and Net Metering of Customer-Owned Renewable Generation and under the terms and conditions as approved by the Florida Public Service Commission pursuant to Rule 25-6.065(3), F.A.C.

1. The Customer's renewable generation system is within the Company service territory and is located at:

   ____

   ____

   and should be installed and operational by:

   __________________________, ____________.

2. Customer will ensure the installation will meet or exceed all requirements noted below, will provide the Company with reasonable notification prior to the operation of the system and will assist the Company in verifying that the installation complies with the agreement prior to operating in parallel with the Company's electric system.

3. The Customer's renewable generation system is described as follows:

   a. Equipment Manufacturers Name and Address:

   ____

   ____

   ____

   b. Manufacturers Reference Number, Serial Number, Type, Style, Model, Etc.

   ____

   ____

   ____

   c. Name Plate Rating (KW and Voltage):

   ____

   ____

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2 RENEWABLE GENERATION SYSTEMS (Greater than 10 KW and Less than or Equal to 100 KW) (Continued)

4. Standard Interconnection Agreement Requirements – To qualify for expedited interconnection as a Tier 2 generator pursuant to Rule 25-6.065, F.A.C., the Facility must:
   (a) Comply with IEEE 1547 (2003) Standard for Interconnecting Distributed Resources with Electric Power Systems.
   (b) Comply with IEEE 1547.1 (2005) Standard Conformance Test Procedures for Equipment Interconnecting Distributed Resources with Electric Power Systems.
   (c) Comply with UL 1741 (2005) Inverters, Converters, Controllers and Interconnection System Equipment for Use With Distributed Energy Resources.
   (d) Have a Gross Power Rating that does not exceed 90% of the Customer's utility distribution service rating.
   (e) Have a Gross Power Rating greater than 10 KW and less than or equal to 100 KW.

5. Customer Qualifications and Fees – The Customer shall comply with the following to qualify as a Tier 2 generator pursuant to Rule 25-6.065, F.A.C.:
   (a) Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards listed in Section (4).
   (b) Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to Section (5) (a) that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid in the event the electric grid loses power.
   (c) Provided the Customer-owned renewable generation equipment complies with Sections (4) and (5) (a), (b), the Company shall not require further design review, testing, or additional equipment other than that provided for in Section (9).
   (d) Tier 2 Customers who request interconnection of Customer-owned renewable generation shall be charged a one-time non-refundable application fee of $350.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

6. Inspection Requirements – Prior to operating the Customer system in parallel with Company's electric system, the Customer will:

   (a) Have the Customer-owned renewable generation inspected and approved by local code officials prior to its operation in parallel with the Company system to ensure compliance with applicable local codes.

   (b) Make provisions that permit the Company to inspect Customer-owned renewable generation and its component equipment, and the documents necessary to ensure compliance with Sections (4) and (5). The Customer shall notify the Company at least 10 days prior to initially placing Customer equipment and protective apparatus in service and the Company shall have the right to have personnel present on the in-service date. If the Customer-owned renewable generation system is subsequently modified in order to increase its gross power rating, the Customer must notify the Company by submitting a new application specifying the modifications at least 30 days prior to making the modifications.

   (c) Provide for protection of the renewable generating equipment, inverters, protective devices, and other system components from damage from the normal and abnormal conditions and operations that occur on the Company system in delivering and restoring power; and is responsible for ensuring that Customer-owned renewable generation equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to ensure that it is operating correctly and safely.

7. Indemnity for Loss to Third Parties - The Customer shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the Customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

8. Customer Insurance Requirements – The Customer owning a Tier 2 generator is required by rule to obtain general liability insurance for personal and property damage in the amount of no less than one million dollars ($1,000,000) as a result of the operation of the generator. Prior to parallel operation, the Customer shall provide initial proof of insurance or sufficient guarantee and proof of self insurance, evidencing the generator. The Customer shall continue to provide proof of continuing insurance within 30 days of any policy renewal.

9. Manual Disconnect Switch – Customer's operating a Tier 2 generator shall install, at the Customer's expense, a manual disconnect switch of the visible load break type to provide a separation point between the AC power output of the Customer-owned renewable generation and any Customer wiring connected to the Company's system. The manual disconnect switch shall be mounted separate from, but adjacent to, the meter socket and shall be readily accessible to the Company and capable of being locked in the open position with a single Company padlock.

10. Disconnection From Customer System - The Company may open the manual disconnect switch pursuant to the conditions set forth below in Sections (10) (a) – (10) (d), isolating the Customer-owned renewable generation, without prior notice to the Customer. To the extent practicable, however, prior notice shall be given. If prior notice is not given, the Company shall at the time of disconnection leave a door hanger notifying the Customer that their Customer-owned renewable generation has been disconnected, including an explanation of the condition necessitating such action. The Company shall reconnect the Customer-owned renewable generation as soon as the condition necessitating disconnection is remedied.

    a. Emergencies or maintenance requirements on the Company's electric system;

    b. Hazardous conditions existing on the Company system due to the operation of the Customer's generating or protective equipment as determined by the Company;

    c. Adverse electrical effects, such as power quality problems, on the electrical equipment of the Company's other electric consumers caused by the Customer-owned renewable generation as determined by the Company;

    d. Failure of the Customer to maintain the required insurance coverage.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

11. Administrative Requirements

(a) The Company shall maintain on its website a downloadable application for interconnection of Customer-owned renewable generation, detailing the information necessary to execute the Standard Interconnection Agreement. Upon request the Company shall provide a hard copy of the application within 5 business days.

(b) Within 10 business days of receipt of the Customer's application, the Company shall provide written notice that it has received all documents required by the Standard Interconnection Agreement or indicate how the application is deficient. Within 10 business days of receipt of a completed application, the Company shall provide written notice verifying receipt of the completed application. The written notice shall also include dates for any physical inspection of the Customer-owned renewable generation necessary for the Company to confirm compliance with Sections (4) through (10).

(c) The Standard Interconnection Agreement shall be executed by the Company within 30 calendar days of receipt of a completed application.

(d) The Customer must execute the Standard Interconnection Agreement and return it to the Company at least 30 calendar days prior to beginning parallel operations and within one year after the utility executes the Agreement. All physical inspections must be completed by the Company within 30 calendar days of receipt of the Customer's executed Standard Interconnection Agreement. If the inspection is delayed at the Customer's request, the Customer shall contact the utility to reschedule an inspection. The Company shall reschedule the inspection within 10 business days of the Customer's request.

12. Net Metering

(a) The Company shall enable each Customer-owned renewable generation facility interconnected to the investor-owned utility's electrical grid pursuant to this rule to net meter.

(b) The Company shall install, at no additional cost to the Customer, metering equipment at the point of delivery capable of measuring the difference between the electricity supplied to the Customer from the investor-owned utility and the electricity generated by the Customer and delivered to the investor-owned utilities electric grid.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

12. Net Metering (continued)

(c) Meter readings shall be taken monthly on the same cycle as required under the otherwise applicable rate schedule.

(d) The Company shall charge for electricity used by the Customer in excess of the generation supplied by Customer-owned renewable generation in accordance with normal billing practices.

(e) During any billing cycle, excess Customer-owned renewable generation delivered to the Company's electric grid shall be credited to the Customer's energy consumption for the next month's billing cycle.

(f) Energy credits produced pursuant to Section (12) (e) shall accumulate and be used to offset the Customer's energy usage in subsequent months for a period of not more than twelve months. At the end of each calendar year, the Company shall pay the Customer for any unused energy credits at an average annual rate based on the Company's COG-1, as-available energy tariff.

(g) When a Customer leaves the system, that Customer's unused credits for excess kWh generated shall be paid to the Customer at an average annual rate based on the Company's COG-1, as-available energy tariff.

(h) Regardless of whether excess energy is delivered to the Company's electric grid, the Customer shall continue to pay the applicable Customer charge and applicable demand charge (if applicable) for the maximum measured demand during the billing period. The Company shall charge for electricity used by the Customer in excess of the generation supplied by Customer-owned renewable generation at the Company's otherwise applicable rate schedule. The Customer may at their sole discretion choose to take service under the Company's standby or supplemental service rate, if available.

13. Renewable Energy Certificates - Customers shall retain any Renewable Energy Certificates associated with the electricity produced by their Customer-owned renewable generation equipment. Any additional meters necessary for measuring the total renewable electricity generated for the purposes of receiving Renewable Energy Certificates shall be installed at the Customer's expense, unless otherwise determined during negotiations for the sale of the Customer's Renewable Energy Certificates to the Company.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

14. Change of Ownership – This agreement shall not be assigned or transferred without prior written consent of the Company. Should there be a change in ownership; the Customer shall provide the Company with 30 day notice prior to the change. The Company will contact the new owner prior to the end of the 30 days in order to execute a new agreement. The new owner will not be entitled to operate the generator in parallel with the Company system or be net metered until a new agreement is executed by both parties. However, this agreement shall inure to the benefit of and binding upon the respective heirs, legal representatives, successors and assigns of the parties involved until a new agreement is executed.

15. No Extension of Credit – In executing this agreement, the Company does not, nor should it be construed to extend credit or financial support for the benefit of any third parties lending money to or having other transactions with the Customer or any assignee of this agreement.

16. Applicability of Tariff – The Company's tariff and associated technical terms and abbreviations, general rules, regulations and standard electric service requirements are incorporated herein by reference. In the event that this tariff and the Interconnection Agreement is revised due to rule changes approved by the Florida Public Service Commission, the Company and the Customer agree to replace this agreement with an amended agreement that complies with the amended Florida Public Service Commission rules.

17. Entire Agreement – This agreement supersedes all previous agreements or representations, either written or oral, heretofore in effect between the Company and the Customer, made in respect to matters herein contained, and when duly executed, this agreement constitutes the entire agreement between the parties.

18. Termination – Upon termination of this agreement, the Company shall open and padlock the manual disconnect switch, if applicable, and remove any additional kilowatt-hour meter and associated Company equipment. At the Customer's expense, the Customer agrees to permanently isolate the Facility from the Company's electric service grid. The Customer shall notify the Company in writing within ten (10) business days that the isolation procedure has been completed.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED
TIER 2 RENEWABLE GENERATION SYSTEM
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

19. Retail Purchase of Electricity - “Customer-owned renewable generation” means an electric generating system located on a Customer’s premise that is primarily intended to offset part or all of the Customer’s electricity requirements with renewable energy. The term “Customer-owned renewable generation” does not preclude the Customer of record from contracting for the purchase, lease, operation, or maintenance of an on-site renewable generation system with a third-party under terms and conditions but does not include the retail purchase of electricity from the third party.

20. The Customer agrees to indemnify and hold harmless the Company, its subsidiaries or affiliates, and their respective employees, officers and directors, against any and all liability, loss, damage, cost or expense which the Company, it subsidiaries, affiliates, and their respective employees, officers and directors may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Customer under the obligations of this agreement. The Company agrees to indemnify and hold harmless the Customer, against any and all liability, loss, damage, cost or expense which the Customer may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Company under the obligations of this agreement.

21. Communications, either emergency or routine, related to this agreement or operation of the installation shall be made to the following parties:

STANDARD FORMS
STANDARD INTERCONNECTION AGREEMENT - TIER 3

STANDARD INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS (Greater than 100 KW and Less than or Equal to 2 MW)

This agreement made and entered into as of this ____ day of ________________________________, ______________by and between ________________________________ hereinafter known at the "Customer" and Florida Public Utilities Company hereinafter know as the "Company". This agreement is made in accordance with Florida Public Commission Rule 25-6.065 F.A.C., Interconnection and Net Metering of Customer-Owned Renewable Generation and under the terms and conditions as approved by the Florida Public Service Commission pursuant to Rule 25-6.065(3), F.A.C.

1. The Customer's renewable generation system is within the Company service territory and is located at:
____
____
and should be installed and operational by:
___________________________, ____________.

2. Customer will ensure the installation will meet or exceed all requirements noted below, will provide the Company with reasonable notification prior to the operation of the system and will assist the Company in verifying that the installation complies with the agreement prior to operating in parallel with the Company's electric system.

3. The Customer's renewable generation system is described as follows:
   a. Equipment Manufacturers Name and Address:
   ____
   ____
   ____
   b. Manufacturers Reference Number, Serial Number, Type, Style, Model, Etc.
   ____
   ____
   ____
   c. Name Plate Rating (KW and Voltage):
   ____
   ____

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS
(Greater than 100 KW and Less than or Equal to 2 MW)
(Continued)

4. Standard Interconnection Agreement Requirements – To qualify for expedited interconnection as a Tier 3 generator pursuant to Rule 25-6.065, F.A.C., the Facility must:

   (a) Comply with IEEE 1547 (2003) Standard for Interconnecting Distributed Resources with Electric Power Systems.

   (b) Comply with IEEE 1547.1 (2005) Standard Conformance Test Procedures for Equipment Interconnecting Distributed Resources with Electric Power Systems.

   (c) Comply with UL 1741 (2005) Inverters, Converters, Controllers and Interconnection System Equipment for Use With Distributed Energy Resources.

   (d) Have a Gross Power Rating that does not exceed 90% of the Customer's utility distribution service rating.

   (e) Have a Gross Power Rating of greater than 100 KW and less than or equal to 2 MW.

5. Customer Qualifications and Fees – The Customer shall comply with the following to qualify as a Tier 3 generator pursuant to Rule 25-6.065, F.A.C.:

   (a) Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards listed in Section (4).

   (b) Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to Section (5) (a) that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid in the event the electric grid loses power.

   (c) Should the Company determine that an interconnection study is necessary; a charge based on actual costs of the study will be the responsibility of the Customer. Prior to initiation of the study, $2,000 (cost not to exceed $2,000) will be paid by the Customer. Should actual study cost be less than $2,000, the difference will be refunded to the Customer. Additionally, the Customer will be responsible for cost associated with any modifications to the Company's system that is identified in the interconnection study.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS
(Greater than 100 KW and Less than or Equal to 2 MW)
(Continued)

Any such charges shall not be assessed on the Customer without prior approval of the FPSC as per Rule 25-6.065(4) (h). This agreement will not be executed until the expansion or other work identified in the study has been completed and payment received.

(d) Tier 3 Customers who request interconnection of Customer-owned renewable generation shall be charged a one-time non-refundable application fee of $350.

6. Inspection Requirements – Prior to operating the Customer system in parallel with Company's electric system, the Customer will:

(a) Have the Customer-owned renewable generation inspected and approved by local code officials prior to its operation in parallel with the Company system to ensure compliance with applicable local codes.

(b) Make provisions that permit the Company to inspect Customer-owned renewable generation and its component equipment, and the documents necessary to ensure compliance with Sections (4) and (5). The Customer shall notify the Company at least 10 days prior to initially placing Customer equipment and protective apparatus in service and the Company shall have the right to have personnel present on the in-service date. If the Customer-owned renewable generation system is subsequently modified in order to increase its gross power rating, the Customer must notify the Company by submitting a new application specifying the modifications at least 30 days prior to making the modifications.

(c) Provide for protection of the renewable generating equipment, inverters, protective devices, and other system components from damage from the normal and abnormal conditions and operations that occur on the Company system in delivering and restoring power; and is responsible for ensuring that Customer-owned renewable generation equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to ensure that it is operating correctly and safely.

7. Indemnity for Loss to Third Parties - The Customer shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the Customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS (Greater than 100 KW and Less than or Equal to 2 MW) (Continued)

8. Customer Insurance Requirements – The Customer owning a Tier 3 generator is required by rule to obtain general liability insurance for personal and property damage in the amount of no less than two million dollars ($2,000,000) as a result of the operation of the generator. Prior to parallel operation, the Customer shall provide initial proof of insurance or sufficient guarantee and proof of self-insurance, evidencing the generator. The Customer shall continue to provide proof of continuing insurance within 30 days of any policy renewal.

9. Manual Disconnect Switch – Customer's operating a Tier 3 generator shall install, at the Customer's expense, a manual disconnect switch of the visible load break type to provide a separation point between the AC power output of the Customer-owned renewable generation and any Customer wiring connected to the Company's system. The manual disconnect switch shall be mounted separate from, but adjacent to, the meter socket and shall be readily accessible to the Company and capable of being locked in the open position with a single Company padlock.

10. Disconnection From Customer System - The Company may open the manual disconnect switch pursuant to the conditions set forth below in (10) (a) – (10) (d), isolating the Customer-owned renewable generation, without prior notice to the Customer. To the extent practicable, however, prior notice shall be given. If prior notice is not given, the Company shall at the time of disconnection leave a door hanger notifying the Customer that their Customer-owned renewable generation has been disconnected, including an explanation of the condition necessitating such action. The Company shall reconnect the Customer-owned renewable generation as soon as the condition necessitating disconnection is remedied.

    a. Emergencies or maintenance requirements on the Company's electric system;

    b. Hazardous conditions existing on the Company system due to the operation of the Customer's generating or protective equipment as determined by the Company;

    c. Adverse electrical effects, such as power quality problems, on the electrical equipment of the Company's other electric consumers caused by the Customer-owned renewable generation as determined by the Company;

    d. Failure of the Customer to maintain the required insurance coverage.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS
(Greater than 100 KW and Less than or Equal to 2 MW)
(Continued)

11. Administrative Requirements

(a) The Company shall maintain on its website a downloadable application for interconnection of Customer-owned renewable generation, detailing the information necessary to execute the Standard Interconnection Agreement. Upon request the Company shall provide a hard copy of the application within 5 business days.

(b) Within 10 business days of receipt of the Customer's application, the Company shall provide written notice that it has received all documents required by the Standard Interconnection Agreement or indicate how the application is deficient. Within 10 business days of receipt of a completed application, the Company shall provide written notice verifying receipt of the completed application. The written notice shall also include dates for any physical inspection of the Customer-owned renewable generation necessary for the Company to confirm compliance with Sections (4) through (10) and confirmation regarding the requirement of a Tier 3 interconnection study.

(c) The Standard Interconnection Agreement shall be executed by the Company within 30 calendar days of receipt of a completed application. This will be extended to 90 calendar days if the Company determines that an interconnection study is required.

(d) The Customer must execute the Standard Interconnection Agreement and return it to the Company at least 30 calendar days prior to beginning parallel operations and within one year after the utility executes the Agreement. All physical inspections must be completed by the Company within 30 calendar days of receipt of the Customer's executed Standard Interconnection Agreement. If the inspection is delayed at the Customer's request, the Customer shall contact the utility to reschedule an inspection. The Company shall reschedule the inspection within 10 business days of the Customer's request.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS (Greater than 100 KW and Less or Equal to 2 MN) (Continued)

12. Net Metering

(a) The Company shall enable each Customer-owned renewable generation facility interconnected to the investor-owned utility's electrical grid pursuant to this rule to net meter.

(b) The Company shall install, at no additional cost to the Customer, metering equipment at the point of delivery capable of measuring the difference between the electricity supplied to the Customer from the investor-owned utility and the electricity generated by the Customer and delivered to the investor-owned utility's electric grid.

(c) Meter readings shall be taken monthly on the same cycle as required under the otherwise applicable rate schedule.

(d) The Company shall charge for electricity used by the Customer in excess of the generation supplied by Customer-owned renewable generation in accordance with normal billing practices.

(e) During any billing cycle, excess Customer-owned renewable generation delivered to the Company's electric grid shall be credited to the Customer's energy consumption for the next month's billing cycle.

(f) Energy credits produced pursuant to Section (12) (e) shall accumulate and be used to offset the Customer's energy usage in subsequent months for a period of not more than twelve months. At the end of each calendar year, the Company shall pay the Customer for any unused energy credits at an average annual rate based on the Company's COG-1, as-available energy tariff.

(g) When a Customer leaves the system, that Customer's unused credits for excess kWh generated shall be paid to the Customer at an average annual rate based on the Company's COG-1, as-available energy tariff.

(h) Regardless of whether excess energy is delivered to the Company's electric grid, the Customer shall continue to pay the applicable Customer charge and applicable demand charge (if applicable) for the maximum measured demand during the billing period. The Company shall charge for electricity used by the Customer in excess of the generation supplied by Customer-owned renewable generation at the Company's otherwise applicable rate schedule. The Customer may at their sole discretion choose to take service under the Company's standby or supplemental service rate, if available.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS
(Greater than 100 KW and Less than or Equal to 2 MW)
(Continued)

13. Renewable Energy Certificates - Customers shall retain any Renewable Energy Certificates associated with the electricity produced by their Customer-owned renewable generation equipment. Any additional meters necessary for measuring the total renewable electricity generated for the purposes of receiving Renewable Energy Certificates shall be installed at the Customer's expense, unless otherwise determined during negotiations for the sale of the Customer's Renewable Energy Certificates to the Company.

14. Change of Ownership – This agreement shall not be assigned or transferred without prior written consent of the Company. Should there be a change in ownership; the Customer shall provide the Company with 30 day notice prior to the change. The Company will contact the new owner prior to the end of the 30 days in order to execute a new agreement. The new owner will not be entitled to operate the generator in parallel with the Company system or be net metered until a new agreement is executed by both parties. However, this agreement shall inure to the benefit of and binding upon the respective heirs, legal representatives, successors and assigns of the parties involved until a new agreement is executed.

15. No Extension of Credit – In executing this agreement, the Company does not, nor should it be construed to extend credit or financial support for the benefit of any third parties lending money to or having other transactions with the Customer or any assignee of this agreement.

16. Applicability of Tariff – The Company's tariff and associated technical terms and abbreviations, general rules, regulations and standard electric service requirements are incorporated herein by reference. In the event that this tariff and the Interconnection Agreement is revised due to rule changes approved by the Florida Public Service Commission, the Company and the Customer agree to replace this agreement with an amended agreement that complies with the amended Florida Public Service Commission rules.

17. Entire Agreement – This agreement supersedes all previous agreements or representations, either written or oral, heretofore in effect between the Company and the Customer, made in respect to matters herein contained, and when duly executed, this agreement constitutes the entire agreement between the parties.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS
(Greater than 100 KW and less than or Equal to 2 MW)
(Continued)

18. Termination – Upon termination of this agreement, the Company shall open and padlock the manual disconnect switch, if applicable, and remove any additional kilowatt-hour meter and associated Company equipment. At the Customer's expense, the Customer agrees to permanently isolate the Facility from the Company's electric service grid. The Customer shall notify the Company within ten (10) business days that the isolation procedure has been completed.

19. Retail Purchase of Electricity - "Customer-owned renewable generation" means an electric generating system located on a Customer's premise that is primarily intended to offset part or all of the Customer's electricity requirements with renewable energy. The term "Customer-owned renewable generation" does not preclude the Customer of record from contracting for the purchase, lease, operation, or maintenance of an on-site renewable generation system with a third-party under terms and conditions but does not include the retail purchase of electricity from the third party.

20. The Customer agrees to indemnify and hold harmless the Company, its subsidiaries or affiliates, and their respective employees, officers and directors, against any and all liability, loss, damage, cost or expense which the Company, it subsidiaries, affiliates, and their respective employees, officers and directors may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Customer under the obligations of this agreement. The Company agrees to indemnify and hold harmless the Customer, against any and all liability, loss, damage, cost or expense which the Customer may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Company under the obligations of this agreement.

The Northwest Florida Division serves various communities in Jackson, Calhoun and Liberty Counties.

The Northeast Florida Division serves Amelia Island, located in Nassau County.

TECHNICAL TERMS AND ABBREVIATIONS

When used in the rules and regulations or the rate schedules contained in this volume, the following terms shall have the meanings defined below:

A. Company – Florida Public Utilities Company acting through its duly authorized officers or employees within the scope of their respective duties.

B. Applicant – any person, firm, or corporation applying for electric service from the Company at one location.

C. Customer – any person, firm, or corporation purchasing electric service at one location from the Company under Rules and Regulations of the Company.

D. Service Classification

(1) Residential Service – service to Customer supplied for residential purposes in a single family dwelling unit or household. Residential service shall also apply to energy used in ~~commonly owned~~commonly owned facilities in condominium and cooperative apartment buildings subject to the following criteria:

1. 100% of the energy is used exclusively for the co-owners' benefit.

2. None of the energy is used in any endeavor which sells or rents a commodity or provided service for a fee.

3. Each point of delivery will be separately metered and billed.

4. A responsible legal entity is established as the Customer to whom the Company can render its bills for said service.

(2) Commercial Service – service to Customers engaged in selling, servicing, warehousing, or distributing a commodity, in some business activity or in a profession, or in some form of economic or social activity (offices, stores, clubs, hotels, etc.) and for purposes that do not come directly under another classification of service. A premise which might otherwise, except for business activity conducted thereon, be entitled to Residential Service shall be classified as Commercial unless that portion of said premise use solely for residential purposes is metered separately.

(3) Industrial Service – service to Customers engaged in a process which creates or changes raw or unfinished material into another form or product. (Factories, mills, machine shops, mines, oil plants, refineries, creameries, canning, and packing plants, shipyards, etc., i.e., in extractive, fabricating, or processing activities.)

TECHNICAL TERMS AND ABBREVIATIONS (Continued)

E. Service Line – all wiring between the Company's main line or substation transformer terminals and the point of connection to Customers service entrance.

F. Single Service – one set of facilities over which Customer may receive electric power.

G. KW or Kilowatt – one thousand (1,000) watts.

H. KWh or Kilowatt-hour – one thousand (1,000) watt-hours.

I. Energy – current consumed, expressed in kilowatt-hours.

J. BTU or British Thermal Unit – the amount of heat required to raise the temperature of one (1) pound of water one degree Fahrenheit (1°F) at sixty degrees Fahrenheit (60°F).

K. Horsepower - the nameplate rating of motors or its equivalent in other apparatus. For conversion purposes~~,~~ on horsepower shall be considered as equivalent to 0.75 kilowatts.

L. Candlepower – one-tenth of the manufacturer's rating in lumens.

M. Connected Load – sum of the ratings of the electric power consuming apparatus connected to the installation or system, or part of either, under consideration.

N. Demand – the load at the terminals of an installation or system averaged over a specified period of time. Demand is expressed in kilowatts, kilovolt-amperes, or other suitable units.

O. Power Factor – ratio of kilowatts to kilovolt-amperes.

P. Month – the period between any two (2) regular readings of Company's meters at approximately thirty (30) day intervals.

RESERVED FOR FUTURE USE

INDEX OF RULES AND REGULATIONS

RULES AND REGULATIONS

Applicable to Electric Service and Electric Rate Schedules

1. General

Company shall furnish service under its rate schedules and these Rules and Regulations as approved from time to time by the Florida Public Service Commission and in effect at this time. These Rules and Regulations shall govern all service except as specifically modified by the terms and conditions of the rate schedules or written contracts. Copies of currently effective Rules and Regulations are available at the office of Company.

Unless otherwise specifically provided in any applicable rate schedule or in a contract by or with Company, the term of any agreement shall become operative on the day the Customer's installation is connected to Company's facilities for the purpose of taking electric energy and shall continue for a period of one (1) year and continuously thereafter until cancelled by three (3) or more days' notice by either party.

2. Application for Service

An application for service will be required by Company from each Applicant. Such application shall contain the information necessary to determine the type of service desired and the conditions under which service will be rendered. If necessary, the application or contract for service shall be in writing.

The application or depositing of any sum of money by the Applicant shall not require company to render service until the expiration of such time as may be reasonable required by Company to determine if Applicant has complied with the provisions of these Rules and Regulations and as may reasonably be required by Company to install the required facilities.

3. Election of Rate Schedules

Optional rates are available for certain classes of ~~customers~~Customers. These optional rates and the conditions under which they are applicable are set forth in Company's rate schedules.

Upon application for service or upon request, Applicant or Customer shall elect the applicable rate schedule best suited to his requirements. Company will assist in making such election but does not guarantee that Customers will be served under the most favorable rate schedule at all times. Company shall not be held

RULES AND REGULATIONS (Continued)

3. Election of Rate Schedules (Continued)

responsible to notify Customers of the most favorable rates schedule and will not refund the difference in charge under different rate schedules to the same class of service.

Upon notification of any material changes in Customer's installation or load conditions, Company will assist in determining if a change in rates is desirable, but unless required by substantial changes in the Customer's installation, not more than (1) such change in rates will be made within any twelve (12) month period.

Company will require a written contract with special guarantee from Applicants whose characteristics of load would require excessive investment in facilities of whose requirements for service are of a special nature.

4. Customer Deposits

A. Deposit Required

Unless credit is ~~otherwise~~ established in accordance with Section 4B, the ~~customer~~Customer shall make a deposit. The amount of the deposit shall be calculated in conformity with the requirements of Section 366.05(1)(c), Florida Statutes, as follows:

(1) For an existing account or premise, the total deposit may not exceed two (2) months of average actual charges, calculated by adding the monthly charges from the 12-month period immediately before the date any change in the deposit is sought, dividing this total by 12, and multiplying the result by 2. If the account or premise has less than 12 months of actual charges, the deposit shall be calculated by adding the available monthly charges, dividing this total by the number of months available, and multiplying the result by 2.

(2) For a new service or premise request, the total deposit may not exceed two (2) months of projected charges, calculated by adding the 12 months of projected charges, dividing this total by 12, and multiplying the result by 2. Once the new ~~customer~~Customer has had continuous service for a 12-month period, the amount of the deposit shall be recalculated using actual data. Any difference between the projected and actual amounts must be resolved by the ~~customer~~Customer paying any additional amount that may by billed by the utility or the utility returning any overcharge.

(3) A residential ~~customer~~Customer may request the amount of the initial deposit be billed and paid in even installments over a period of two (2) month's for deposit amounts between $50 and $150 and three (3) month's for deposits over $150, which may be granted at the Company's discretion.

RULES AND REGULATIONS (Continued)

4. Customer Deposits (Continued)

B. Establishment of Credit

In lieu of a deposit, the Company may allow a prospective Customer to satisfactorily establish credit prior to the commencement of service by one of the following methods:

Residential:

(1) Furnish a satisfactory guarantor to secure payment of bills for the service requested; such guarantor must be a ~~customer~~Customer of the Company with a satisfactory payment record. A guarantor's liability shall be terminated when a residential ~~customer~~Customer, whose payment of bills is secured by the guarantor, meets the requirements of Section 4C-Refund of Deposit. Guarantors providing security for payment of residential ~~customer's~~Customer's bills shall only be liable for bills contracted at the service address contained in the contract of guaranty; or

(2) Furnish an irrevocable letter of credit from a bank equal to two (2) ~~month's~~months' average bills; or

(3) Furnish a surety bond equal to two (2) ~~month's~~months' average bills; or

(4) Pay a cash deposit.

Non-Residential:

(1) Furnish a satisfactory guarantor to secure payment of bills for the service requested, such a guarantor need not be a ~~customer~~Customer of the Company; or

(2) Furnish an irrevocable letter of credit from a bank equal to two (2) ~~month's~~months' average bills; or

(3) Furnish a surety bond equal to two (2) ~~month's~~months' average bills; or

(4) Pay a cash deposit.

RULES AND REGULATIONS (Continued)

4. Customer Deposits (Continued)

~~4. Customer Deposits (Continued)~~

C. Refund of Deposits

After a ~~customer~~Customer has established a satisfactory payment record and has had continuous service for a period of 23 months, the utility shall refund the residential ~~customer's~~Customer's deposits and shall, at its option either refund or pay the higher rate of interest specified below for nonresidential deposits, providing the ~~customer~~Customer has not, in the preceding 12 months, (a) made more than one late payment of a bill (after the expiration of 20 days from the date of mailing or delivery by the utility), (b) paid with a check refused by a bank, (c) been disconnected for non-payment, or at any time, (d) tampered with the meter, or (e) used service in a fraudulent or unauthorized manner. Company may, at its option, refund a deposit in less than 23 months.

D. Interest on Deposits

Two percent (2%) per annum interest will be credited to a Consumer's account annually in accordance with the current effective rules and regulations of the Commission. Three percent (3%) per annum will be credited annually on deposits of Residential Consumers qualifying under section (c) above when the company elects not to refund such a deposit after twenty-three (23) months. The Company shall credit annually three percent (3%) per annum on deposits of non-Residential Consumers qualifying for refund under Section (c) until the Commission sets a new interest rate applicable to the Company. No ~~customer~~Customer shall be entitled to receive interest on ~~his~~their deposit until and unless a ~~customer~~Customer relationship and the deposit have been in existence for a continuous period of six months, then ~~he~~Customer shall be entitled to receive interest for the day of the commencement of the ~~customer~~Customer relationship and the placement of deposit. Deposits shall cease to bear interest upon discontinuance of service.

E. New or Additional Deposits

Company may require, upon written notice to an existing ~~customer~~Customer of not less than 30 days, a deposit (including guaranty, letter of credit or surety bond) where previously waived or returned, or an additional deposit, in order to secure payment of current bills. Such notice for a deposit shall be separate and apart from any bill for service and shall explain the reason for the deposit; provided, however, that the total amount of the required deposit shall not exceed an amount equal to the average actual charges for service for two billing periods for the 12-month period immediately prior to the date of notice. The thirty (30) day notice shall not apply when service is being reestablished after discontinuance of service for non-payment. In the event the ~~customer~~Customer has had service for less than 12 months, then the Company shall base its new or additional deposit upon the average actual monthly billing available.

RULES AND REGULATIONS (Continued)

4. Customer Deposits (Continued)

F. Retention of Deposits

Retention by Company, prior to final settlement, of said deposit shall not be considered as a payment or part payment of any bill for service. Company shall, however, apply said deposit against unpaid bills for service. In such case, Customer shall be required to restore deposit to original amount.

G. Refund of Deposit When Service is Discontinued

Upon discontinuance of service, the deposit and accrued interest shall be credited against the final account and the balance, if any, shall be returned promptly to the ~~customer~~Customer, but in no event later than fifteen (15) days after service is discontinued.

~~*RULES AND REGULATIONS (Continued)*~~

5. Customer Facilities

Customer shall make or procure satisfactory conveyance to Company of all necessary easement and rights-of-way, including right of convenient access to Company's property, for furnishing adequate and continuous service or the removal of Company's property upon termination of service.

Customer should furnish Company a description of the load to be connected prior to wiring ~~his~~Customer's premises or purchasing any electric equipment. Company will then furnish ~~customer~~Customer such information as characteristics of service which is or will be available at the point of delivery.

All wiring and equipment beyond Company's meter and accessories thereto, necessary to utilize service furnished by Company, shall be installed by and belong to the Customer and be maintained at ~~his~~Customer's expense. Customer shall bring ~~his~~their wiring to a point of connection to Company's service lines at a location satisfactory to Company.

All wiring and electric equipment shall conform to the requirements of the National Electrical Code as adopted by Company and local ordinances, if any.

Company reserves the right to inspect and approve the installation of all wiring and equipment to utilize Company's service; but such inspection or failure to make inspection or the fact that Company may connect to such installation shall not make Company liable for any loss or damage which may be occasioned by the use of such installation or equipment used therefrom or of Company's service.

Customer shall install only such motors or other apparatus or appliances as are suitable for operation with the character of the service supplied by Company, and electric energy must not be used in such a manner as to cause detrimental voltage fluctuations or disturbances in Company's distribution system.

All apparatus used by Customer shall be of such type as to secure the highest practicable commercial efficiency, power factor and proper balancing of phases. Motors which are frequently started or motors arranged for automatic control must be equipped with controlling devices, approved by Company, to give maximum starting torque with minimum current flow.

RULES AND REGULATIONS (Continued)

6. Service Connections

A. General

Company reserves the right to designate the location of the point of connection, transformers and meters and to determine the amount of space which must be left unobstructed for the installation and maintenance thereof. Applicant may request an alternation of such a designation but, if consented to by Company, the excess cost of such revised designation over and above the cost of the original Company design shall be borne by Applicant.

Company reserves the right to postpone to a more favorable season the extension of lines and connection of services during seasons of the year when climatic conditions would cause abnormally high construction costs.

B. Overhead Service in Overhead Zone

Customer's wiring must be brought outside the building wall nearest Company's service wires so as to be readily accessible thereto or to transformer terminals if located close to the wall. All connections between the service entrance and meter location shall comply with local ordinances and shall be in rigid conduit or cable approved by Company. Company will furnish, install and maintain the service conductors to the point of connection to Customer's facilities.

C. Underground Service in Overhead Zone

Customers desiring an underground service in an overhead zone may make application for service with the Company. The Company will install and own the underground service from the meter location to the pole from which connection is to be made, including the necessary run of cable or conduit up the side of the pole. The Customer will pay in advance to the Company the estimated difference in the cost of the underground service and or equivalent overhead service. Underground service will be provided pursuant to F.A.C. 25-6115, Facility Charges for Conversion of Existing Overhead Investor Owned Distribution Facilities.

D. Underground Service in Underground Residential Distribution Systems

The service connection to the building normally will be at the point of the building nearest the point at which the underground system enters the property to be served. If such service connection point on any building is more than seventy-five (75) feet, measured at right angles, from the serving property line, the Customer will pay the difference between an underground service and an equivalent overhead service for all service line in excess of seventy five (75) feet.

E. Underground Service in Underground Zone (Other Than Residential Areas)

Where service is supplied from an underground distribution system, at Company's choice, Company will provide and install the cable conduit or ducts from its manhole or street connection box or main feed lines in street to the property line adjoining the property to be served.

The Customer shall supply and install the cable conduit or ducts from the property line into the building, terminating said conduit or ducts inside the building wall at a point located by the Company inspector. The Customer shall make arrangements with the Company for Company to supply and install continuous run of cable conductors from the manhole or street connection box to the inside of the building wall. Customer shall be charged for materials, labor, and other expenses incurred from the portion of cable installed inside the building.

Where Company is required by governmental or other valid authority to install underground distribution, and abandon overhead distribution, Company shall not be required to bear any of the cost of making the necessary changes on Customer's premises. If, however, Company elects to change an existing Customer's service from overhead to underground, Company shall bear the cost of disconnecting the Customer's service from the overhead system and reconnecting it to the underground system unless such change is necessitated by a change in the Customer's requirements.

7. Line Extensions

A. Overhead Extensions

(1) Free Extensions

(a) Company shall make extensions to or alterations in its facilities in accordance with Rule ~~25-6.115~~25-6.064 of Florida Public Service Commission, these Rules and Regulations and free of charge to provide service to an applicant or group of applicants located within the Company's service area when the estimated total non-fuel revenue for the first four (4) years from the Applicant or Applicants equals or exceeds the estimated cost of the necessary includable construction; provided, however, that the patronage or demand will be of such permanency as to warrant the expenditure involved.

RULES AND REGULATIONS (Continued)

(b) The formula used to calculate the maximum amount of no-charge extension or alteration will be as follows:

(1) for ~~customers~~Customers in rate classes that pay only energy charges, i.e., do not pay demand charges:

maximum amount = 4 X (non-fuel energy charge KWH)
(estimated annual KWH usage)

(2) for ~~customers~~Customers in classes that pay both energy charges and demand charges:

maximum amount = 4 X (non-fuel energy charge KWH)
(estimated annual KWH usage)
+ 4 X (estimated annual demand
charge revenue from sales
over new line)

(2) Other Extensions

When the line extension or alteration required in order to furnish service within Company's service area is a reasonable extension of the Company's facilities but greater than the free construction specified above, and the Applicant or Applicants shall contract to use service for at least four (4) years, such extension or alteration shall be made subject to the following condition;

(a) Applicant or Applicants shall make a non-refundable contribution in aid of construction $(CIAC)_{OH}$ prior to commencement of construction, in an amount equal to the amount that the estimated cost to provide the extension or alteration exceeds the maximum amount of the no-charge extension or alteration as determined in A (b) (1) or A (b) (2) above.

B. Underground Extension

(1) New residential subdivisions and multiple-occupancy buildings.

(a) Company shall make underground extension of its facilities to serve new residential subdivisions or new multiple-occupancy buildings, in accordance with the provisions of the "Rules for Residential Electric Underground Service" of the Florida Public Service Commission; provided that the Applicant or Applicants, in accordance with the Rules of the Florida Public Service Commission, will pay to the Company in an amount equal to the difference in cost between an underground system (exclusive of supply system feeders) and an equivalent overhead system.

RULES AND REGULATIONS (Continued)

(2) Residential, commercial, industrial extensions

(a) Company shall make underground extensions or alterations in its facilities in accordance with Rule 25-6.115 of Florida Public Service Commission and these Rules and Regulations to provide underground service to an applicant or group of applicants, within the Company's service area provided that the applicant, or group of applicants, pay the Company a contribution in aid of underground construction $(CIAC)_{UG}$ in an amount equal to the estimated difference in cost to provide underground service instead of overhead service to the Applicant(s) plus the amount, if any, by which the estimated cost to provide an overhead service exceeds the maximum amount of no-charge construction $(CIAC)_{OH}$ as determined in A(2) above.

(b) The following formula shall be used to determine the contribution in aid of underground construction with all cost based on Rule ~~25-6.0342, FAC, Electric Infrastructure Storm Hardening~~25-6.115, FAC, Facility Charges for Conversion of Existing Overhead Investor-owned Distribution Facilities :

$(CIAC)_{UG}$ = (estimated cost to provide underground service facilities including distribution line, transformer, service drop and other necessary fixtures) minus (the estimated cost to provide service using overhead facilities) plus $(CIAC)_{OH}$.

RULES AND REGULATIONS (Continued)

8. Underground Electric Distribution Facility Charges

A. Definitions

The following words and terms used under this Part shall have the meaning indicated:

(1) Applicant: The Applicant is the person or entity seeking the undergrounding of existing or newly planned electric distribution facilities by the Company. When a developer requests local government development approval, the local government shall not be deemed the applicant for purposes of this rule.

(2) Commission: Florida Public Service Commission.

(3) Cost Estimate: A non-refundable deposit charged an Applicant by the Company for the purpose of preparing a binding cost estimate of the amount required for the Company to construct or convert particular distribution facilities as underground.

(4) Company: Florida Public Utilities Company.

(5) Distribution Facilities: All electrical equipment of the Company required to deliver electricity to homes and businesses.

(6) Facility Charge: That charge required to be paid by an Applicant for the Company to construct or convert particular distribution facilities as underground.

(7) High Density Subdivision: A subdivision having a density of six (6) or more dwelling units per acre.

(8) Low Density Subdivision: A subdivision having a density of at least 1.5 dwelling units per acre but less than six (6) dwelling units per acre.

(9) Overhead: Pertains to distribution facilities consisting of conductors, switches, transformers, etc. which are installed above ground on supporting poles.

(10) Underground: Pertains to distribution facilities consisting of conductors, switches, transformers, etc. which are installed below or on the ground.

RULES AND REGULATIONS (Continued)

B. General

(1) Application

This tariff section applies to request for underground electric distribution facilities offered in lieu of overhead facilities. The installation of underground distribution lines in new residential subdivisions is not covered in this section of the tariff. These installations are covered under "Rules of the Florida Public Service Commission", Chapter ~~25-6, Part V, "Rules for Residential Electric Underground Extensions~~25-6115, "Facility Charges for Conversion of Existing Overhead Investor Owned Distribution Facilities", and the Company's "Rules and Regulations", Item 7.

(2) Application Request

An applicant shall submit a request in writing for the Company to develop a cost estimate to accomplish the undergrounding of particular electric facilities. The request shall be accompanied by an appropriate deposit and shall specify the following information:

a. the area(s) being sought to be undergrounded
b. a list of all electric ~~customers~~Customers affected
c. an estimated time frame for undergrounding to be accomplished
d. details of any construction by the Applicant
e. any other pertinent information which the Applicant possesses that may assist the

RULES AND REGULATIONS (Continued)

C. Cost Estimate Deposits

(1) Non-Binding Cost Estimates

The Company will provide a non-binding cost estimate related to the request at no cost to the Applicant. The non-binding cost estimate shall be an order of magnitude estimate to assist the requestor in determining whether to go forward with a binding cost estimate.

(2) Binding Cost Estimates

Upon the payment of a non-refundable deposit, as specified below, the Company shall provide an applicant with a binding cost estimate specifying the facility charge required for the installation. The facility charge to be collected pursuant to a binding cost estimate from an applicant shall not be subject to increase or refund unless the project scope is enlarged or reduced, or the project is not completed at the request of the applicant.

The deposit shall be forfeited, and the binding cost estimate provided to an Applicant shall be considered expired, if the Applicant does not enter into a contract for the installation of the requested underground electric distribution within 180 days of delivery of the binding cost estimate by the Company. For good cause the Company may extend the 180 day time limit.

The deposit for a binding cost estimate, which approximates the engineering costs for underground facilities associated with preparing the requested estimate, shall be calculated as follows:

I. New Construction (Excluding New Residential Subdivisions)

Facilities Classification	Deposit Amount
Urban Commercial	$~~3,715~~4,540 per overhead primary mile
Urban Residential	$~~2,565~~3,555 per overhead primary mile
Rural Residential	$~~1,946~~3,263 per overhead primary mile

II. Conversions

Facilities Classification	Deposit Amount
Urban Commercial	$~~5,750~~6,815 per overhead primary mile
Urban Residential	$~~4,511~~5,330 per overhead primary mile
Rural Residential	$~~3,273~~4,895 per overhead primary mile
Low Density Subdivision	$~~18.00~~64.00 per lot
High Density Subdivision	$~~17.00~~42.00 per lot

The deposit must be paid to the Company to initiate the estimating process. The deposit will be applied in the calculation of the facility charge to be required for the installation of underground distribution facilities.

RULES AND REGULATIONS (Continued)

D. Construction Contract

(1) General

Upon acceptance by the Applicant of a binding cost estimate, the Applicant shall execute a contract with the Company to perform the construction of the underground distribution facilities. The contract shall specify the type and character of system to be provided; establish the facility charge to be paid by Applicant prior to commencement of construction; specify details of construction to be performed by Applicant, if any; and address those other terms and conditions described ~~in Part (4)~~ below.

(2) Facilities Charge

The charge shall be calculated in accordance with the appropriate formula described below with all ~~cost~~costs based on Rule ~~25-6.0342, FAC, Electric Infrastructure Storm Hardening~~25-6.115, FAC, Facility Charges for Conversion of Existing Overhead Investor-owned Distribution Facilities:

a. New Construction

Charge =

Estimated cost of construction of underground facilities including underground service laterals to ~~customers~~Customers' meters;

Minus, estimated construction cost of overhead facilities including overhead service drops to ~~customers~~Customers' meters;

Minus, qualifying cost estimate deposit.

b. Conversion

Charge =

Remaining book value of existing overhead facilities to be removed;

Plus, removal cost of existing overhead facilities;

Minus, salvage value of existing overhead facilities;

Plus, estimated cost of construction of underground facilities including underground service laterals to ~~customers~~Customers' meters;

Minus, estimated construction cost of overhead facilities including overhead service drops to ~~customers~~Customers' meters;

Minus, qualifying cost estimated deposit.

RULES AND REGULATIONS (Continued)

E. Construction By Applicant

If agreed upon by the Applicant and the Company, the Applicant may construct or install portions of the underground system as long as such work meets the Company's engineering and construction standards. The Company will own and maintain the completed distribution facilities upon accepting the system as operational. The type of system provided will be determined by the Company's standards.

Any facilities provided by the Applicant will be inspected by Company inspectors prior to acceptance. Any deficiencies discovered as a result of these inspections will be corrected by the applicant at his sole expense, including the costs incurred by performing the inspections. Corrections must be made in a timely manner by the Applicant; otherwise the Company will undertake the correction and bill the Applicant for all costs of such correction. These costs shall be additional to the original binding cost estimate.

F. Other Terms And Conditions

(1) Easements: Easements satisfactory to both the Company and the Customer must be provided for by the Applicant prior to commencement of construction at no expense to the Company. Additional easements are not required when facilities are to be located on private property wholly within an area covered by a recorded subdivision utility easement, namely a reservation and recorded plat of an easement for public utility purposes and where underground electrical facilities are not prohibited. Where underground distribution facilities for serving more than one ~~customer~~Customer are located on private property, easements are required.

Secondary voltage underground facilities wholly within one property for the purpose of serving only one ~~customer~~Customer do not require easements. All primary voltage underground facilities require easements. Easements are not required for facilities in public rights-of-way.

RULES AND REGULATIONS (Continued)

(2) Scheduling, Clearing, and Grading: Rights-of-way and easements suitable to the Company must be furnished by the Applicant in a reasonable time to meet service requirements and must be cleared of trees, tree stumps, paving and other obstruction, staked to show property lines and final grade and must be graded to within six (6) inches of final grade by the Applicant before the Company will commence construction, all at no charge to the Company. Such clearing and grading must be maintained by the Applicant during construction by the Company. Grade stakes must be provided at transformer, ~~pullbox~~pull box, and switch locations.

(3) Restoration: All removal and restoration of buildings, roads, driveways, sidewalks, patios, fences, ditches, landscaping, sprinkler systems, other utilities, etc. shall be the full responsibility of the Applicant and shall cause no cost to the Company. Removal of all construction debris not belonging to the Company shall be the responsibility of the Applicant or other.

(4) Other Joint Users on the Company Poles: Applicant must make arrangements with all other overhead utilities and third parties to remove their overhead facilities from the Company's poles prior to construction or to concurrently convert their facilities to underground or remove them at no cost to the Company. The Applicant shall produce, if requested by the Company, executed agreements with all joint users guaranteeing this requirement.

(5) Affected Electric Customers: Applicant must make arrangements with all affected Company ~~customers~~Customers to, in a timely fashion, prepare their premises and service entrance for underground electrical service from the new underground distribution system. All ~~customers~~Customers affected by the underground request must agree to accept underground service. This ~~customer~~Customer conversion will be at no cost to the Company.

(6) Damage to Company's Underground Facilities: The Applicant shall be responsible to ensure the Company's distribution system, once installed, is not damaged, destroyed, or otherwise disturbed during the construction of the project. This responsibility shall extend not only to those in his employ, but also to his subcontractors, and he shall be responsible for the full cost of repairing such damage.

RULES AND REGULATIONS *(Continued)*

9. Metering

Company will provide each Customer with a meter or meters for each applicable rate schedule.

Customer, acting jointly with Company, may install, maintain and operate at ~~his~~Customer's expense such check measuring equipment as desired provided that such equipment shall be so installed as not to interfere with operation of Company's equipment and that no electric energy shall be re-metered for resale to another or others.

Before installation and periodically thereafter, each meter shall be tested and adjusted using methods and accuracy limits prescribed or approved by the Florida Public Service Commission. Periodic test and inspection intervals shall not exceed the maximum period allowed by the Florida Public Service Commission.

If ~~on test~~upon testing the meter is found to be in error in excess of prescribed accuracy limits, fast or slow, the amount of refund or charge to the Customer shall be determined by methods prescribed or approved by the Florida Public Service Commission.

In the event of stoppage or failure of any meter to register, ~~customer~~Customer may be billed for such period on an estimated consumption based upon ~~his~~Customer's use of electric energy in a similar period of like use or on the basis of check meter readings, if available and accurate.

Meters in use shall be tested at the request of Customer and in his presence, if desired, provided only one (1) such test shall be made free of charge within a twelve (12) month period, and provided Customer shall pay the cost of any additional test within this period unless meter is shown to be inaccurate in excess of the tolerances set forth by the Florida Public Service Commission. If the ~~customer~~Customer requests a test more frequently, the ~~company~~Company may require a deposit, not to exceed $50.00, to defray the cost of testing.

. 10. Billing and Collecting

Each Customer's meter will be read at regular intervals and bills will be rendered on a monthly basis or periodically in accordance with the terms of the applicable rate schedule. Bills will be rendered as soon as practical after determination of their amount and shall be due and payable at the office of Company within twenty (20) days after date of bill. Failure to receive a bill will not entitle Customer to any discount or to the omission of any charge for nonpayment within the time specified.

Partial Month:
Upon commencement of service less than fifteen (15) days prior to a regular monthly read date and when the service continues thereafter to the same Customer at the same address where the Customer is receiving service on monthly rate schedules, no bill will be rendered for service covering such period, but the charge for such period will be included in the bill rendered for the next succeeding monthly billing period.

RULES AND REGULATIONS (Continued)

10. Billing and Collecting (continued)

A separate bill will be rendered for each meter used by Customer unless, for the convenience of Company, multiple meters are used for measurement of the same class of service, in which case a bill will be rendered for the total amount registered by all meters. If Company, (as it may under unusual circumstances), permits more than one Customer to be served through one meter, the minimum bill and the first billing block kilowatt-hours of the applicable rate schedule shall be multiplied by the number of Customer so served and the number of kilowatt-hours in each succeeding block of the rate schedule shall be increased in the same proportion.

Billings in general will be based on meter readings but bills will be adjusted to compensate for errors in meter registration, in the reading thereof, or in the application of meter reading schedules to intervals five (5) days greater or lesser than a month. If the billing period is extended more than five (5) days, the Company will not apply the higher tiered rate if the Customer's higher usage is attributable to the extended billing period.

In case of tampering or unauthorized use, probable consumption will be billed as determined by the maximum quantity of electric energy estimated to have been consumed by the various appliances of Customer and a bill will be rendered for a period encompassing six (6) months prior to the detection of such abuse and /or disconnection for cause.

11. Customer's Liabilities

Company shall have the right to enter the premises of Customer at all reasonable hours for the purpose of making such inspection of Customer's installation as may be necessary for the proper application of Company's rate schedules and Rules and Regulations; for installing, removing, testing, or replacing its apparatus or property; for reading meters; and for the entire removal of Company's property in event of termination of service to Customer for any reason.

All property of Company installed in or upon Customer's premises used and useful in supplying service is placed there under Customer's protection. All reasonable care shall be exercised to prevent loss of or damage to such property and, ordinary wear and tear excepted, Customer will be held liable for any such loss of property or damage thereto and shall pay to Company the cost of necessary repairs or replacements.

~~Customer will be held responsible for breaking the seals, tampering or interfering with Company's meter or meters or other equipment of Company installed on customer's premises, and no~~No one except employees of Company will be allowed to make any repairs or adjustments to any meter or other piece of apparatus belonging to Company except in case of emergency.

Unauthorized connections to, or tampering with the Company's meters, meter seals, or metering equipment or indications or evidence thereof , subjects the Customer to immediate discontinuance of service, prosecution under the laws of Florida, adjustment of prior bills for services rendered, a tampering penalty pf $500 for residential and non-demand general service customers and $2,500 for all other customers, and liability for reimbursement to the Company for all extra expenses incurred on this account as a result thereof. The reimbursement for extra expenses incurred as a result of the investigation or as a result thereof shall be the actual amount of such extra expenses and shall be in addition to any charges for service rendered or charges for restoration of service as provided elsewhere in these rules.

RULES AND REGULATIONS (Continued)

11. Customers Liabilities (continued)

Customer shall not materially increase load without first notifying Company and obtaining consent.

Company shall have the right, if necessary, to construct its poles, lines and circuits on Customer's property, and to place its transformers and other apparatus on the property or within the buildings of Customer, at a point or points convenient for such purpose and Customer shall provide suitable space for such installation.

12. Company's Liabilities

Company will use reasonable diligence in furnishing as uniform a supply of electric energy as practicable, except where rate schedules provide otherwise. Company may interrupt its service hereunder, however, for the purpose of making necessary alterations and repairs, but only for such time as may be reasonable or unavoidable, and Company shall give to those Customers it knows may be seriously affected, except in case of emergency, reasonable notice of its intention so to do, and shall endeavor to arrange such interruption so as to inconvenience Customer as little as possible.

Whenever Company deems an emergency warrants interruption or limitation in the service being rendered, such interruption or limitation shall not constitute a breach of contract and shall not render Company liable for damages suffered thereby or excuse Customer from further fulfillment of the contract.

In the event that the supply of electric energy shall be interrupted from causes other than the foregoing or force majeure and such interruption is due to the negligence of Company and Company is liable because thereof, that liability shall be limited to twice the amount which Customer would have paid for electric energy during the period of such interruption. However, Company shall not be liable to Customer for any loss, injury or damage resulting from use of Customer's equipment or from the use of electric service furnished by Company or from the connection of Company's facilities with Customer's wiring and appliances.

RULES AND REGULATIONS (Continued)

13. Force Majeure

Except for payment of bills due, neither the Company nor the Customer shall be liable in damage to the other for any act, omission or circumstances occasioned by or in consequence of any acts of God, strikes, lockouts, acts of the public enemy, wars, blockades, insurrections, riots, epidemics, landslides, lightning, earthquakes, fires, storms, floods, unforeseeable or unusual weather conditions, washouts, arrests and restraint of rules and peoples, civil disturbances, explosions, breakage or accident to machinery or electric lines, temporary failure of electric supply, the binding order of any court or governmental authority which has been resisted in good faith by all reasonable legal means, and any other cause, whether of the kind herein enumerated, or otherwise, and whether caused or occasioned by or happening on account of the act or omission of Company or Customer or any other person or concern not reasonably within the control of the party claiming suspension and which by the exercise of due diligence such party is unable to prevent or overcome. A failure to settle or prevent any strike or other controversy with employees or with anyone purporting or seeking to represent employees shall not be considered to be a matter within the control of the party claiming suspension.

14. Discontinuance of Service

The Company reserves the right, but assumes no liability for failure so to do, to discontinue service to any Customer for cause as follows:

A. Without notice,

(1) if a dangerous condition exists on Customer's premises in wiring or energy-consuming devices.

(2) because of ~~a~~ fraudulent use of the service or tampering with Company's equipment.

(3) upon request by Customer, subject to any existing agreement between Customer and Company as to unexpired term of service.

B. After five (5) working days' (any day on which the utility's business office is open and the U.S. Mail is delivered) notice in writing,

(1) for nonpayment of bill for electric service.

(2) when Company has reasonable evidence that Customer has been previously disconnected for nonpayment at present or other location and is receiving service for his own use under a different name in order to avoid past due payments to Company.

RULES AND REGULATIONS (Continued)

(3) for refusal or failure to make a deposit or increase a deposit, when requested, to assure payment of bills.

(4) for a violation of these Rules and Regulations which Customer refuses or neglects to correct.

C. Discontinuance of Service When That Service is Medically Essential:

For purposes of this section, a Medically Essential Service Customer is a residential ~~customer~~Customer whose electric service is medically essential, as affirmed through the certificate of a medical doctor ~~of medicine~~ licensed to practice in the State of Florida. Service is "medically essential" if the ~~customer~~Customer has continuously operating electric-powered medical equipment necessary to sustain the life of or avoid serious medical complications requiring immediate hospitalization of the ~~customer~~Customer or another permanent resident at the service address. The physician's certificate shall explain briefly and clearly, in non-medical terms, why continuance of electric service is medically essential, and shall be consistent with the requirements of the Company's tariff. A ~~customer~~Customer who is certified as a Medically Essential Service Customer must renew such certification periodically through the procedures outlined above. The Company may require certification no more frequently than 12 months.

The Company shall provide Medically Essential Service Customers with a limited extension of time, not to exceed thirty (30) days, beyond the date service would normally be subject to disconnection for non-payment of bills (following the requisite notice pursuant to Rule 25-6.105(5) of the Florida Administrative Code). The Company shall provide the Medically Essential Service Customer with written notice specifying the date of disconnection based on the limited extension. The Medically Essential Service Customer shall be responsible for making mutually satisfactory arrangements to ensure payment within this additional extension of time for service provided by the Company and for which payment is past due, or to make other arrangements for meeting medically essential needs.

RULES AND REGULATIONS (Continued)

No later than 12 noon one day prior to the scheduled disconnection of service of a Medically Essential Service Customer, the Company shall attempt to contact such ~~customer~~Customer by telephone in order to provide notice of the scheduled disconnect date. If the Medically Essential Service Customer does not have a telephone number listed on the account, or if the utility cannot reach such ~~customer~~Customer or other adult resident of the premises by telephone by the specified time, a field representative will be sent to the residence to attempt to contact the Medically Essential Service Customer, no later than 4 PM of the day prior to scheduled disconnection. If contact is not made, however, the company may leave written notification at the residence advising the Medically Essential Service Customer of the scheduled disconnect date; thereafter, the Company may disconnect service on the specified date. The Company will grant special consideration to a Medically Essential Service Customer in the application of Rule 26-6.097(3) of the Florida Administrative Code.

In the event that a ~~customer~~Customer is certified as a Medically Essential ~~customer~~Customer, the ~~customer~~Customer shall remain solely responsible for any backup equipment and/or power supply and a planned course of action in the event of a power outage. The Company does not assume, and expressly disclaims, any obligation or duty; to monitor the health or condition of the person requiring medically essential service; to insure continuous service; to call, contact, or otherwise advise of service interruptions; or, except expressly provided by this section, to take any other action (or refrain from any action) that differs from the normal operation of the Company.

15. Reconnection of Service

When service shall have been discontinued for any of the reasons set forth in these Rules and Regulations, Company shall not be required to restore service until the following conditions have been met by the Customer:

A. Where service was discontinued without notice,

(1) The dangerous condition shall be removed and, if the Customer had been warned of the condition a reasonable time before the discontinuance and had failed to remove the dangerous condition, a reconnection fee shall be paid.

(2) all bills for service due Company by reason of fraudulent use or tampering shall be paid, a deposit to guarantee the payment of future bills shall be made, and a reconnection fee shall be paid.

(3) if reconnection is requested on the same premises after discontinuance, a reconnection fee shall be paid.

RULES AND REGULATIONS (Continued)

B. Where service was discontinued with notice,

(1) satisfactory arrangements for payment of all bills for service then due shall be made and a reconnection fee shall be paid.

(2) a satisfactory arrangement for the payment of bills then due under a different name shall be made and a reconnection fee shall be paid.

(3) a satisfactory guarantee of payment for all future bills shall be furnished and a reconnection fee shall be paid.

(4) the violation of these Rules and Regulations shall be corrected and a reconnection fee shall be paid.

The reconnection fee as required under items A and B above shall be as follows:

During Normal Business Hours	$ ~~52.00~~70.00
After Normal Business Hours	$~~178.00~~325.00

16. Termination of Service

Subject to any existing agreement between Customer and Company, if Customer wishes the electric service to be terminated, he shall give notice ~~at~~to the ~~office of the~~ Company at least three (3) days prior to the time that such termination shall become effective. Customer will be held liable both for any electric energy that may pass through the meter and safe custody of the Company's property until three (3) days after such notice shall have been given, provided that the meter and/or other movable equipment shall not have been removed within that time by the Company.

If Customer wishes Company's property to be removed, he shall give notice ~~at the office of~~to the Company at least ten (10) days prior to the time that such removal must be made.

RULES AND REGULATIONS (Continued)

17. Limitations of Supply

Company reserves the right, subject to regulatory authority having jurisdiction, to limit, restrict or refuse service that will result in additions to its distribution system and/or production capacity and/or alterations in its contractual requirements of supply from non-affiliated companies that may jeopardize service to existing Customers.

18. Temporary Service

The Company upon request will supply temporary service when ~~company's~~the Company's distribution system is ~~nearby~~near the requested location.

When the temporary service is to be ~~later~~ replaced later with a permanent service, the Company will install a service drop, meter and other facilities as may be necessary to the ~~customer's~~Customer's temporary service pole and remove same at the termination of temporary service. To recover the cost of installing and removing such temporary service, an advance of $~~230.00~~415.00 per service to the applicant will be applied. For underground temporary service using ~~customer~~Customer provided wire, an advance of $~~200.00~~250.00 per service will be required. Should the Company be required to install an additional pole, additional charges will apply. A pole with an overhead service will be an additional $~~395.00~~835.00, and a pole with an underground service will be an additional $~~560.00~~1,000.00.

When the temporary service will not be replaced by a permanent service or when the location is such that multiple temporary poles and/or extensive facilities are required, the Company will estimate the cost of installing and removing the temporary facilities and the advance charge to the applicant will be that cost estimate.

The rate schedule for temporary service shall be that which is applicable to the class of service for that ~~customer~~Customer.

19. Fees for Initial Connections

In addition to the deposit or suitable guarantee to cover the payment of bills as required by the Rules and Regulations, each Applicant or Customer shall pay an initial turn-on connection fee of $~~61.00~~125.00.

20. Re-establish or Make Change to Account

There shall be a charge to re-establish or change any account to which service is currently rendered under any of the Company' rate schedules in the amount of $~~26.00~~45.00. Should it be necessary, at the ~~customer's~~Customer's request, to disconnect and then reconnect the service to the account, the ~~customer~~Customer shall pay a temporary disconnect then reconnect fee in the amount of $~~65.00~~81.00.

RULES AND REGULATIONS (Continued)

21. Returned Check Charge

The service charge for each worthless check shall be determined in accordance with Section 68.065, Florida Statues. As of October 1, 1996, Section 68.065, F.S., provided for a service charge of $25.00, if the face value does not exceed $50.00, $30.00, if the face value exceeds $50.00 but does not exceed $300.00 and $40.00, or 5 percent of the face amount of the check, whichever is greater if the face value exceeds $300.00. Such service charge shall be added to the ~~customer's~~Customer's bill for electric service for each check dishonored by the bank upon which it is drawn. Termination of service shall not be made for failure to pay the returned check charge.

22. Late Payment Charge

A bill shall be considered past due upon ~~the~~ expiration of twenty (20) days from the date of mailing or other delivery thereof by the Company. The balance of all past due charges for services rendered are subject to a Late Payment charge of 1.5% or $5.00, whichever is greater, except the accounts of federal, state, and local governmental entities, agencies, and instrumentalities. A Late Payment Charge shall be applied to the accounts of federal, state, and local governmental entities, agencies and instrumentalities at a rate no greater than allowed, and in a manner permitted by applicable law.

23. Measuring Customer Service

A. All energy sold to ~~customer~~Customers, except that sold under flat rate schedule, shall be measured by commercially acceptable measuring devices owned and maintained by the Company, except where it is impractical to meter loads, such as street lighting, temporary or special installations, in which case the consumption may be calculated, or billed on demand or connected load rate or as provided in Company's filed tariff.

B. When there is more than one meter at a location the metering equipment shall be so tagged or plainly marked as to indicate the circuit metered. Where similar types of meters record ~~difference~~different quantities, (kilowatt hours and relative power, for example), metering equipment shall be tagged or plainly marked to indicate what the meters are recording.

C. Meters which are not direct reading shall have the multiplier plainly marked on the meter. All charts taken from recording meters shall be marked with the date of the record, the meter number, ~~customer~~Customer, and chart multiplier. The register ratio shall be marked on all meter registers. The watt-hour constant for the meter itself shall be placed on all watt-hour meters.

D. Metering equipment shall not be set "fast" or "slow" to compensate for supply transformer or line losses.

E. Individual electric metering by Company shall be required for each separate occupancy unit of new commercial establishments, residential buildings, condominiums, cooperatives, marinas, and trailer, mobile home and recreational vehicle parks for which construction is commenced after January 1, 1981. Individual electric meters shall not, however, be required:

~~(Continued on Sheet No. 36)~~

RULES AND REGULATIONS (Continued)

1. In those portions of a commercial establishment where the floor space dimensions or physical configuration of the units are subject to alteration, as evidenced by non-structural element partition walls, unless the utility determines that adequate provisions can be made to modify the metering to accurately reflect such alterations;

2. For electricity used in central heating, ventilating and air conditioning systems, or electric back up service to storage heating and cooling systems;

3. For electricity used in specialized-use housing accommodations such as hospitals, nursing homes, living in facilities located on the same premises as, and operated in conjunction with, a nursing home or other health care facility providing at least the same level and types of services as a nursing home, convalescent homes, facilities certified under chapter 651, Florida Statutes, college dormitories, convents, sorority houses, fraternity houses, motels, hotels, and similar facilities.

4. For separate, ~~specially designated~~specially designated areas for overnight occupancy at trailer, mobile home and recreational vehicle parks where permanent residency is not established and for marinas were living aboard is prohibited by ordinance, deed restriction, or other permanent means.

5. For new and existing time-share plans, provided that all of the occupancy units which are served by the master meter or meters are committed to a timeshare plan as defined in Section 721, Florida Statutes, and none of the occupancy units are used for permanent occupancy. When a time-share plan is converted from individual metering to master metering, the ~~customer~~Customer must reimburse the utility for the costs incurred by the utility for the conversion. These costs shall include, but not be limited to, the undepreciated cost of any existing distribution equipment which is removed or transferred to the ownership of the ~~customer~~Customer, plus the cost of removal or relocation of any distribution equipment, less the salvage value of any removed equipment.

For purpose of this rule:

1. "Occupancy unit" means that portion of any commercial establishment, single and multi-unit residential building, or trailer, mobile home or recreational vehicle park, or marina which is set apart from the rest of such facility by clearly determinable boundaries as described in the rental, lease, or ownership agreement for such unit.

~~2.~~ "Time-sharing plan" means any arrangement, plan, scheme or similar device, whether by membership, agreement, tenancy in common, sale, lease, deed, rental agreement, license, or right-to-use agreement or by any other means,

~~*RULES AND REGULATIONS (Continued)*~~

whereby a purchaser, in exchange for a consideration, receives a right to use accommodations or facilities, or both, for a specific period of times less than a full year during any given year, but not necessarily for consecutive years, and which extends for a period of more than three years.

RULES AND REGULATIONS (Continued)

3. The construction of a new commercial establishment, residential building, marina, or trailer, mobile home or recreational vehicle park shall be deemed to commence on the date when the building structure permit is issued.

4. The individual metering requirement is waived for any time sharing facility for which construction was commenced before December 23, 1982, in which separate occupancy units were not metered in accordance with subsection (5) (a).

5. "Overnight Occupancy" means use of an occupancy unit for a short term such as per day or per week where permanent residency is not established.

6. The term "cost" as used herein means only those charges specifically authorized by the electric utility's tariff, including but not limited to the ~~customer~~Customer, energy, demand, fuel, and conservation charges made by the Company plus applicable taxes and fees to ~~customer~~Customer of record responsible for the master meter payments. The term does not include late payment charges, returned check charges, the cost of distribution system behind the master meter, the cost of billing, and other such costs.

F. Where individual metering is not required under Subsection (E) and master metering is used in lieu thereof, reasonable apportionment methods, including sub-metering, may be used by ~~customer~~Customer of record or the owner of such facility solely for the purpose of allocating the cost of the electricity billed by the Company.

G. Any fees or charges allocated by ~~customer~~Customer of record for electricity billed to ~~customer's~~Customer's account by Company, whether based on the use of sub-metering or any other allocation method, shall be determined in a manner which reimburses the ~~customer~~Customer of record for no more than the ~~customer's~~Customer's actual cost of electricity.

~~(Continued on Sheet No. 38)~~

RULES AND REGULATIONS (Continued)

24. Miscellaneous Service Charges

A. Initial establishment of service $ ~~61.00~~125.00

B. Re-establish or Change Account $ ~~26.00~~45.00

C. Temporary disconnect then reconnect Service $ ~~65.00~~81.00

D. Re-connect service after being disconnected for rule violation

Normal Business Hours $ ~~52.00~~70.00
After Normal Business Hours $~~178.00~~325.00

E. Connect and then disconnect temporary Service $ ~~85.00~~135.00

F. Collection Charge $ ~~16.00~~
50.00

INDEX OF RATE SCHEDULES

RATE SCHEDULE RS
RESIDENTIAL SERVICE

Availability

Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties and on Amelia Island in Nassau County.

Applicability

Applicable for service to a single family dwelling unit occupied by one family or household and for energy used in commonly-owned facilities in condominium and cooperative apartment buildings.

Character of Service

Single-phase service at nominal secondary voltage of 115/230 volts; three-phase service if available.

Limitations of Service

The maximum size of any individual single-phase motor hereunder shall not exceed five (5) horsepower.

The Company shall not be required to construct any additional facilities for the purpose of supplying three-phase service unless the revenue to be derived therefrom shall be sufficient to yield the Company a fair return on the value of such additional facilities.

Monthly Rate

Customer Facilities Charge:

$~~16.95~~24.40 per ~~customer~~Customer per month

Base Energy Charge:

~~2.373~~3.419¢/KWH for usage up to 1000 KWH's/month

~~3.887¢~~5.60¢/KWH for usage above 1000 KWH's/month

Purchased Power Charges

Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January. For current purchased power costs included in the tariff, see Sheet Nos. ~~65~~7.021 & ~~66~~7.022.

Minimum Bill

The minimum monthly bill shall consist of the above Customer Facilities Charge.

~~(Continued on Sheet No. 41)~~

RATE SCHEDULE RS
RESIDENTIAL SERVICE

~~(Continued from Sheet No. 40)~~

Purchased Power Costs

See Sheet Nos. ~~65~~7.021 & ~~66~~7.022.

Conservation Costs

See Sheet Nos. ~~65~~7.021 & ~~66~~7.022.

Franchise Fee Adjustment

Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the ~~customer's~~Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the ~~customer~~Customer is located.

Budget Billing Program (optional)

An electing Customer's participation in the budgeted payment plan will be continuous unless the ~~customer~~Customer requests that participation in the plan be terminated or that Electric Service be terminated, or the Customer is delinquent in paying the budgeted payment amount and becomes subject to the collection action on the service account. At that time, the Customer's participation in the program will be terminated and the Customer shall settle their account with the Company in full. If a Customer requests to terminate participation in the program, but remains a Customer of the Company, the Customer shall pay any deferred debit balance with their next regular monthly bill, and any deferred credit balance shall be used to reduce the amount due for the next regular monthly bill. An electing ~~customer~~Customer may request that participation be terminated at any time, but once terminated by ~~customer~~Customer request or due to collection action, will be limited to a six (6) month waiting period before Customer may rejoin the Budget Billing Program.

Terms and Conditions

Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

RESERVED FOR FUTURE USE

RATE SCHEDULE GS
GENERAL SERVICE – NON DEMAND

Availability

Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties And on Amelia Island in Nassau County.

Applicability

Applicable to commercial and industrial lighting, heating, cooking and small power loads aggregating 25 KW or less.

Character of Service

Single or three-phase service at available standard voltage.

Limitations of Service

Service shall be at a single metering point.

Monthly Rate

Customer Facilities Charge:

$~~27.85~~40.00 per ~~customer~~Customer per month

Base Energy Charge:

All KWH ~~2.903~~5.433¢/KWH

Purchased Power Charges

Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January. For current purchased power costs included in the tariff, see Sheet Nos. ~~65~~7.021 & ~~66~~7.022.

Minimum Bill

The minimum monthly bill shall consist of the above Customer Facilities Charge.

Terms of Payment

Bills are rendered net and are due and payable within twenty (20) days from date of bill.

Franchise Fee Adjustment
Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the ~~customer's~~Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the ~~customer~~Customer is located.

Terms and Conditions
Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

RATE SCHEDULE GSD
GENERAL SERVICE – DEMAND

Availability
Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties and on Amelia Island in Nassau County.

Applicability
Applicable to commercial, industrial and municipal service with a measured demand of 25 KW but less than 500 KW for three or more months out of the twelve consecutive months ending with the current billing period. Also available, at the option of the ~~customer~~Customer, to any ~~customer~~Customer with demands of less than 25 KW who agrees to pay for service under this rate schedule for a minimum initial term of twelve months.

Character of Service
Single or three-phase service at available standard voltage.

Limitations of Service
Service shall be at a single metering point at one voltage.

Monthly Rate
Customer Facilities Charge:
$~~82.35~~138.99 per ~~customer~~Customer per month

Demand Charge:
Each KW of Billing Demand $~~4.49~~7.58/KW

Base Energy Charge
All KWH ~~0.547~~0.923¢/KWH

Purchased Power Charges
Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January. ~~For current purchased power costs included in the tariff, see Sheet Nos. 65 & 66.~~

Minimum Bill
The minimum monthly bill shall consist of the above Customer Facilities Charge plus the Demand Charge for the currently effective billing demand.

Terms of Payment
Bills are rendered net and are due and payable within twenty (20) days from date of bill.

Purchased Power Costs
See Sheet Nos. ~~65~~7.021 & ~~66~~7.022.

Conservation Costs

See Sheet Nos. ~~65~~7.021 & ~~66~~7.022.

Franchise Fee Adjustment

Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the ~~customer's~~Customer's pro rata share of the amount the company is required to pay under the franchise agreement with the specific governmental body in which the ~~customer~~Customer is located.

Billing Demand

The billing demand in any month shall be the greatest of the following:

(a) The highest fifteen-minute average load for the current month, as registered by a demand meter or indicator.

(b) The highest fifteen-minute average load for the current month after adjustment for power factor, in accordance with the Power Factor Clause of this schedule.

(c) For those ~~customers~~Customers electing to take service under this rate schedule in lieu of the otherwise applicable rate schedule the billing demand shall be as in either (a) or (b) above, but not less than 20 KW.

Terms of Service

Not less than one year.

Power Factor of Clause

The Company reserves the right to measure power factor and if it is less than ~~85~~90%, adjust the maximum demand for any month by multiplying the measured demand by ~~85~~90% and dividing by the actual power factor.

Transformer Ownership Discount

If the customer elects to take service at the available primary voltage and furnish and maintain any transformers required, the monthly demand charge will be reduced by ~~fifty-five~~fifty five (55) cents per kilowatt. Such customers will be metered at primary voltage and in recognition of estimated average transformation losses of 1% the KW and KWH measured units shall be multiplied by a factor of 0.99 for billing purposes.

Terms and Conditions

Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

RATE SCHEDULE GSLD
GENERAL SERVICE-LARGE DEMAND

Availability

Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties and on Amelia Island in Nassau County.

Applicability

Applicable to commercial, industrial and municipal service with a measured demand of 500 KW but less than 5000 KW for three or more months out of the twelve consecutive months ending with the current billing period. Also available, at the option of the ~~customer~~Customer, to any ~~customer~~Customer with demands of less than 500 KW who agrees to pay for service under this rate schedule for a minimum initial term of twelve months.

Character of Service

Three-phase service at available standard voltage.

Limitations of Service

Service shall be at a single metering point at one voltage.

Monthly Rate

Customer Facilities Charge:

$~~157.42~~265.69 per ~~customer~~Customer per month

Demand Charge:

Each KW of Billing Demand $~~6.42~~10.84/KW

Base Energy Charge

RATE SCHEDULE GSLD 1
GENERAL SERVICE - LARGE DEMAND 1

Availability

Available within the territory served by the Company in Jackson, Calhoun, and Liberty Counties and on Amelia Island in Nassau County.

Applicability

Applicable to commercial and industrial services of ~~customers~~Customers contracting for at least 5,000 kilowatts of electric service.

Character of Service

Three-phase, 60 hertz, electric service delivered and metered at a single point at the available transmission voltage, nominally 69,000 volts or higher.

Monthly Base Rates

Customer Facilities Charge:	$~~974.80~~1,242.99
Base Transmission Demand Charge:	$~~1.82~~2.88/KW of Maximum/NCP Billing Demand
Excess Reactive Demand Charge:	$~~0.44~~0.56/kVar of Excess Reactive Demand

Purchased Power Charges ~~(See Sheet 52 for descriptions)~~

Purchased power charges are adjusted by the FPSC annually. Current purchased power rates are listed on Sheet Nos. 7.021 and 7.022. The Purchased Power Charges recover Energy and Demand Charges billed to FPUC by FPUC's Wholesale Energy Provider and Wholesale Cogeneration Provider including applicable line losses and taxes. ~~Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January. For correct purchased power charges included in the tariff, see Sheet No. 70 & 71.~~See Sheet Nos. 7.010 and 7.011 for the methodology used to determine purchased power rate and calculation to develop annual true-up calculations.

Minimum Bill

The minimum monthly bill is the sum of the Transmission Demand Charge and the Customer Charge plus any Purchased Power Charges attributed to Transmission Demand Fuel Charge.

Terms of Payment

Bills are rendered net and due and payable within twenty (20) days from date of bill.

Conservation Costs

~~See Sheet Nos. 65 & 66~~ Not applicable.

Franchise Fee Adjustment

Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the ~~customer's~~Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the ~~customer~~Customer is located.

~~(Continued on Sheet No. 51)~~

~~Issued by: John T. English, President~~ ~~Effective: November 1, 2008~~

RATE SCHEDULE GSLD 1
GENERAL SERVICE-LARGE DEMAND 1

~~(Continued from Sheet No. 50)~~

Coincident Peak (CP) Billing Demand

The CP Billing Demand in any month shall be the ~~customer's~~Customer's greatest ~~fifteen minute~~one hour average load as registered by FPUC's demand meter coincident with the FPUC System Peak or the Wholesale Energy Providers System Peak for the purposes as described below:

1) FPUC System Peak for the purpose of determining the Generation Demand Fuel Charge. The demand may be adjusted to correct to 90% power factor based on billing from Wholesale Energy Provider.

2) FPUC System Peak for the purpose of determining the Excess Reactive Demand Charge.

3) Wholesale Energy Providers System Peak for the purpose of determining the Transmission Demand ~~Fuel~~ Charge. The demand may be adjusted to correct to 95% power factor based on billing from Wholesale Energy Provider.

Maximum Demand (Non-Coincident Peak (NCP) Billing Demand)

The Maximum Demand (NCP Billing Demand) (Transmission Demand Charge) in any month shall be the ~~customer's~~Customer's greatest ~~fifteen minute~~one hour average load as registered by FPUC's demand meter, but not less than 5,000 KW. This will be used as the purchased power value for billing purposed during the year and will be trued-up annually.

Excess Reactive Demand

The Excess Reactive Demand in any month shall be any lagging kVar in excess of one-half of the CP Billing Demand in that month. For the purpose of determining the Excess Reactive Demand charge, the CP Billing Demand will be coincident with the FPUC System Peak.

Coincident Peak (CP) Generation Demand Fuel Charge (Purchased Power Charge)

The Generation Demand Fuel Charge recovers the Wholesale Energy Providers Demand Charge for Generation Services billed to FPUC including system line losses and applicable taxes. The charge is applied to the ~~customer's~~Customer's CP Billing Demand coincident with the FPUC System Peak.

Transmission Contract Demand Fuel Charge (Purchased Power Charge)

The Transmission Demand Fuel Charge recovers the Wholesale Energy Providers Demand Charge for Transmission Services billed to FPUC including system line losses and applicable taxes. The charge is applied to the ~~customer's contracted capacity or the customer's~~Customer's CP Billing Demand or cogeneration output coincident with the Wholesale Providers system Peak, whichever is higher.

Energy Charge (Purchased Power Charge)

The Energy Charge recovers the Energy Charge from the Wholesale Energy Provider and Wholesale Cogeneration Energy Provider including system line losses and applicable taxes.

Term of Service

Contract for service hereunder shall be for a period of not less than one year.

Terms and Conditions

Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

~~*RATE SCHEDULE SB*~~
~~*STANDBY SERVICE*~~

~~Availability~~

~~Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties and on Amelia Island in Nassau County.~~

~~Applicability~~

~~Applicable only to customers which are self generators with capabilities of serving the customer's full electronic power requirements and that require backup and/or maintenance service on a firm basis. This rate schedule is not applicable to self-generating customers for supplemental service.~~

~~Character of Service~~

~~Single or three phase service at available standard voltage.~~

~~Limitations of Service~~

~~Service shall be at a single metering point at one voltage. The contract demand shall not exceed the KW capacity of customer's generator.~~

~~Monthly Rate~~

~~Customer Facilities Charge:~~

~~(a) For those customers who have contracted for standby service capacity of less than 500 KW - $121.09.~~
~~(b) For those customers who have contracted for standby service of 500 KW or greater - $974.80.~~

~~Local Facilities Charge:~~

~~(a) For those customers who have contracted for standby service capacity of less than 500 KW - $3.15/KW.~~
~~(b) For those customers who have contracted for standby service of 500 KW or greater - $0.79/KW.~~

~~Purchased Power Charges~~

~~Demand and energy used by the customer in any month shall be charged at the then currently effective rates of the Company's wholesale supplier adjusted for estimated line losses and applicable taxes. Such charges will consist of Coincident Peak (CP) Demand charge and an energy charge. The CP Demand shall be the customer's measured KW coincident in time with that of the Company's maximum monthly demand at the substation serving the system to which the customer is connected. The energy charge shall be applied to the measured KWH during the billing period and shall be based on the actual energy charge (including fuel charges) of the Company's wholesale supplier during the billing period.~~

~~The currently effective rates of the Company's wholesale supplier would result in the following demand and energy charges for purchased power after adjustment for estimated line losses and applicable taxes. These are shown for illustrative purposes only. Actual purchased power rates in effect at the time of use shall be used for determining the monthly unit charges.~~

~~CP Demand Charge - Each KW of CP Demand~~	~~$5.62/KW~~
~~Energy Charge - All~~	~~3.583¢~~

~~(Continued on Sheet No. 53)~~

~~*RATE SCHEDULE SB*~~
~~*STANDBY SERVICE*~~

~~(Continued from Sheet No. 52)~~

~~Minimum Bill~~

~~The minimum monthly bill shall consist of the above Customer Charge plus the Local Facilities charge for the currently effective Contract Demand.~~

~~Terms of Payment~~

~~Bills are rendered net and are due and payable within twenty (20) days from date of bill.~~

~~Conservation Costs~~

~~See Sheet Nos. 65 & 66.~~

~~Franchise Fee Adjustment~~

~~Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the customer's pro rate share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the customer is located.~~

~~Contract Demand~~

~~The Contract Demand shall be that KW demand as specified in the contract for service with the customer and shall represent the maximum demand that customer requires for backup and maintenance service. The specified Contract Demand shall not exceed the KW capacity of customer's generator. The Contract Demand level may be periodically renegotiated if required, but not more than once a year. In the event that customer's maximum measured 15-minute average load in any month exceeds the specified Contract Demand by an amount greater than five (5) percent, that maximum demand shall be used as the Contract Demand for billing of the Local Facilities Charge in the current month and the succeeding eleven (11) months.~~

~~CP Demand~~

~~The CP billing demand shall be the greater of the following:~~

~~(b) The 15-minute average load for the current month, as measured by a demand meter, at the time of the Company's maximum demand for the current month at the substation serving the system to which the customer is connected.~~

~~(c) Seventy-five (75) percent of the maximum CP demand established in the preceding eleven (11) months.~~

~~(Continued on Sheet No. 54)~~

~~*RATE SCHEDULE SB*~~
~~*STANDBY SERVICE*~~

~~(Continued from Sheet No. 53)~~

~~Terms of Service~~

~~By written contract for an initial period of not less than five (5) years.~~

~~Power Factor Clause~~

~~The Company reserves the right to take service at the available primary voltage and furnish and maintain any transformers required, the local facilities charge will be reduced by the following amounts:~~

~~(a) For those customers who have contracted for standby service capacity of less than 500 KW – the GSD transformer ownership discount divided by the ratio of the 100% ratcheted KW to billing KW.~~

~~(b) For those customers who have contracted for standby service capacity of 500 KW or greater – the GSLD transformer ownership discount divided by the ratio of the 100 percent ratcheted KW to billing KW.~~

~~Such customers will be metered at primary voltage and in recognition of estimated average transformation losses of 1%, the KW and KWH measured units shall be multiplied by a factor of 0.99 for billing purposes.~~

~~Special Metering Requirements~~

~~Service under this rate schedule requires the use of time of day metering. Customer will be required to pay a one time Contribution in Aid of Construction prior to the initiation of service equal to the difference in cost between that of the time of day meter and that of the otherwise standard meter. Company will notify customer of the amount of Contribution required prior to the execution of the contract for service. No Contribution will be required in the event customer has previously paid for the cost of time of day metering under the Company's cogeneration tariff and that same meter can be utilized without modification for metering under this Standby Service Rate Schedule.~~

~~Transfer to Full Requirements Service~~

~~In the event of changed circumstances in customer's operations or generating capabilities, customer may, on twelve (12) advance written notice to Company, transfer to the applicable full requirements rate schedule, provided however, that no such transfers shall be accepted as long as continued backup and maintenance service is required. Company may waive the 12 months notice requirement when the Company has in place facilities that will allow serving customer's full requirements.~~

~~Terms and Conditions~~

~~Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.~~

RESERVED FOR FUTURE USE

RATE SCHEDULE LS
LIGHTING SERVICE

Availability

Available within the territory served by the Company in Calhoun, Jackson and Liberty Counties and on Amelia Island in Nassau County.

Applicability

Applicable to any ~~customer~~Customer for non-metered outdoor lighting service.

Character of Service

Lighting service from dusk to dawn as described herein.

Limitations of Service

Service is limited to lighting by high-pressure sodium vapor, metal halide, or light emitting diode lamps mounted on ~~company~~Company-owned poles as described herein. Company-owned facilities will be installed only on Company-owned poles.

Monthly Rate

When lighting fixtures are mounted on existing poles and served directly from existing overhead secondary distribution lines:

8)	30' Wood Pole Std	$~~5.36~~6.86

For the poles shown above that are served from an underground system, the Company will provide up to one hundred (100) feet of conductor to service each fixture. The ~~customer~~Customer will provide and install the necessary conduit system to Company specifications.

Purchased Power Charges

Purchased power charges are adjusted annually by the Florida Public Service Commission. For current purchased power costs included in the tariff, see Sheet No. ~~65~~7.021 & ~~66~~7.022.

Minimum Bill

The above rates times the number of lamps connected.

~~(Continued on Sheet No. 58)~~

RATE SCHEDULE LS
LIGHTING SERVICE

~~(Continued from Sheet No. 57)~~

Terms of Payment

Bills are rendered net and are due and payable within twenty (20) days from date of bill.

Purchased Power Costs

See Sheet No. ~~65~~7.021 & ~~66~~7.022.

Conservation Costs

See Sheet No. ~~65~~7.021 & ~~66~~7.022.

Franchise Fee Adjustment

Customers taking service within franchise areas shall pay a franchise fee adjustment in the form of a percentage to be added to their bills prior to the application of any appropriate taxes. This percentage shall reflect the ~~customer's~~Customer's pro rata share of the amount the Company is required to pay under the franchise agreement with the specific governmental body in which the ~~customer~~Customer is located.

Term of Service

Service under this rate schedule shall be by written contract for a period of five or more years.

Terms and Conditions

1. Service under this rate schedule is subject to the Company's Rules and Regulations applicable to electric service.

2. The charges set forth above cover the initial installation of overhead lines, poles and fixture assembly including bracket, and the maintenance duty as limited to lamp renewals due to burn outs only, or the repair or replacement of equipment causing lamps not to be illuminated.

~~*~~ The Company will repair or replace malfunctioning lighting fixtures maintained by the company in accordance with Section 768.1382, Florida Statues (2005). Maintenance duty to be undertaken by Florida Public Utilities Company is limited to lamp renewal due to burn outs only, or the repair or replacement of equipment causing lamps not to be illuminated. Such burnt out lamp replacements or repairs causing non-illumination of lamps will be performed only during regular daytime working hours as soon as practical after notification of the burn out or non-illumination conditions of the lamp by the ~~customer~~Customer. The maintenance duties undertaken herein are expressly limited to our paying ~~customer,~~Customer and are not to be deemed to create a duty to the general public at large.

RATE SCHEDULE OSL
MERCURY VAPOR LIGHTING SERVICE
(Closed To New Installations)

~~(Continued from Sheet No. 58)~~

Availability
Available within the territory served by the Company in Calhoun, Jackson and Liberty Counties and on Amelia Island in Nassau County.

Applicability
Applicable to ~~customer~~any Customer for mercury vapor lighting service.

Character of Service
Lighting service from dusk to dawn as described herein.

Limitations of Service
Service is limited to lighting by mercury vapor lamps of 7,000 or 20,000 initial level of lumens mounted on wood poles, as described herein.

Monthly Rate
When lighting fixtures are mounted on existing poles and served directly from existing overhead secondary distribution lines:

Lamp Size Lumens	KWH/Mo. Estimate	Facilities Charge	Maintenance* Charge	Energy Charge	Total Charge
7,000	72	$~~1.39~~1.78	$~~1.24~~1.59	$~~3.70~~4.73	$~~6.33~~8.10
20,000	154	$~~1.53~~1.96	$~~1.32~~1.69	$~~7.95~~10.17	$~~10.80~~13.82

For concrete or fiberglass poles and/or underground conductors, etcetera, the ~~customer~~Customer shall pay a lump sum amount equal to the estimated differential cost between the special system and the equivalent overhead-wood pole system.

Purchased Power

Charges
Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January. For current purchased power costs included in the tariff, see Sheet Nos. ~~65~~7.021 & ~~66~~7.022.

Minimum Bill
The above rates times the number of lamps connected.

Terms of Payment
Bills are rendered net and are due and payable within twenty (20) days from date of bill.

~~*RATE SCHEDULE IS-EXP*~~
~~*INTERRUPTIBLE (EXPERIMENTAL)*~~

~~Availability~~

~~Available within the territory served by the Company in Jackson, Calhoun and Liberty Counties. This service is limited to a maximum of 4 customers. This Rate Schedule shall expire on February 8, 2015.~~

~~Applicability~~

~~Applicable to customers eligible for Rate Schedule GSLD with a load factor equal to or exceeding 35% and who have executed a Special Contract approved by the Commission. The company reserves the right to limit the total load and type customer served under this rate. Accounts established under this rate will be limited to premises where the interruption will primarily affect the customer, its employees, agents, lessees, tenants and guests and will not significantly affect members of the general public nor interfere with functions performed for the protection of public health or safety.~~

~~Character of Service~~

~~Three phase service at available standard voltage.~~

~~Limitations of Service~~

~~Service shall be at a single metering point at one voltage. Interruptible service under this rate is subject to interruption during any On Peak time period that the Company elects to notify customer, with a minimum of two (2) hours notice, that the customer must fully interrupt taking electric power from the Company. The Company is limited to an On Peak period maximum of 200 hours of required interruption per year per customer.~~

~~Monthly Rate~~

~~Customer Facilities Charge:~~

~~$157.42 per customer per month~~

~~Demand Charge:~~

~~Each KW of Billing Demand~~ ~~$ 6.42/KW~~

~~Base Energy Charge:~~

~~All KWH~~ ~~0.254¢/KWH~~

~~Purchased Power Charges~~

~~Purchased power charges are adjusted by the Florida Public Service Commission, normally each year in January. For current purchased power costs included in the tariff, see Sheet Nos. 65 & 66.~~

~~Minimum Bill~~

~~The minimum monthly bill shall consist of the above Customer Facilities Charge plus the Demand Charge for the currently effective billing demand.~~

~~Terms of Payment~~

~~Bills are rendered net and are due and payable within twenty (20) days from date of bill.~~

ECONOMIC DEVELOPMENT RIDER PROGRAM-EDRP

Availability:

This Economic Development Rate Program (the "Program") is available throughout the entire territory served by Florida Public Utilities Company. The Qualifying load and employment requirements under this Rider must be achieved at the same delivery point. Additional metering equipment may be required for service under this Rider.

Application:

This Program is applicable to new electric load associated with:

(1) ~~(1)~~ Initial permanent service to new commercial and industrial establishments.

(2) ~~(2)~~ Commercial or industrial space that has been vacant for more than six months prior to the application for service under the Program. Verification of vacancy will be established by evidence of no or minimal electric load during the time period in question.

(3) ~~(3)~~ The expansion of existing establishments. For existing establishments, new load is the net incremental load above that which existed prior to approval for service under this Program.

The new load applicable under this Program for new and vacant establishments must be a minimum of 200 kW at a single delivery point. In the case of the expansion of existing facilities, the added new load must be a minimum of 100 kW, however, in order to qualify, the total load after the addition of the new load must be a minimum of 200 kW at a single delivery point. To qualify for service under this Program, the Customer must employ an additional work force of at least 10 full-time employees at the delivery point to which the load is added.

In order to take service under the Program, the Customer must provide sufficient evidence to Florida Public Utilities Company to establish that the availability of the Program is a significant factor in the Customer's location or expansion decision.

Initial application for this Program is not available to existing load. However, if a change in ownership occurs after the Customer contracts for service under this Program, the successor Customer may be allowed to fulfill the balance of the contract under the Program and continue the schedule of credits outlined below.

This Program is not available for load shifted from one establishment or delivery point on the Florida Public Utilities system to another on the Florida Public Utilities system.

~~(Continued on Sheet No. 63)~~

ECONOMIC DEVELOPMENT RIDER PROGRAM-EDRP (Continued)

Monthly Rate:

The rates and all other terms and conditions of the ~~customer's~~Customer's otherwise applicable rate schedule shall be applicable under this Program. A credit based on the percentages below will be applied to the demand charges and non-fuel (base) energy charges of the Customer's otherwise applicable rate schedule associated with the Customer's new load:

Year 1 - 20% reduction
Year 2 - 15% reduction
Year 3 - 10% reduction
Year 4 - 5% reduction
Year 5 - 0% reduction

The above credit will be deducted from the monthly electric bill as computed in accordance with the provisions of the Monthly Rate section of the ~~customer's~~Customer's applicable rate schedule before application of any discounts or adjustments. All other charges including the ~~customer~~Customer charge and energy conservation charge will be based on the Customer's otherwise applicable rate. The otherwise applicable rates may be any of the following: GSD, GSLD, or GSLD1.

Term of service:

The Customer agrees to a five-year contract term. Service under this Program will terminate at the end of the fifth year. Florida Public Utilities Company may terminate service under this Program at any time if the Customer fails to comply with the terms and conditions of this Program. Failure to: 1) maintain the level of employment specified in the Customer's Service Agreement and/or 2) purchase from Florida Public Utilities the amount of load specified in the Customer's Service Agreement will be considered grounds for termination.

If Florida Public Utilities Company terminates service under the Program for the Customer's failure to comply with its provisions, or if the Customer opts to terminate service under the Program, the Customer will be placed on their applicable rate schedule with no future discounts or rate reductions.

Service under this Rider is subject to the Rules and Regulations of the Company and the Florida Public Service Commission.

~~(Continued on Sheet No. 64)~~

ECONOMIC DEVELOPMENT RIDE PROGRAM-EDRP

ECONOMIC DEVELOPMENT RIDER PROGRAM- EDRP

Service Agreement

The ~~customer~~Customer is applying for service under the Economic Development Rate Program based upon new or expanded load as indicated below (Check one):

☐ New Load associated with a new commercial or industrial establishment

☐ New Load established in commercial or industrial space that has been vacant for more than six months

☐ Expanded Load associated with an existing establishment

CUSTOMER NAME____

SERVICE ADDRESS____

TYPE OF BUSINESS____

The Customer hereto agrees as follows:

1. For new and vacant establishments, a minimum of 200 kW of measured demand must be added at a single delivery point.
2. For existing establishments that are expanding, a minimum of 100 kW of measured demand must be added at a single delivery point, and the total measured demand after the addition of the new load must be a minimum of 200 kW.
3. In all cases, the ~~customer~~Customer must employ an additional work force of at least 10 full-time employees at the delivery point to which the load is added.
4. That the quantity of new or expanded load shall be 200KW of Demand.
5. The nature of this new or expanded load is____
6. That in the case of a new ~~customer~~Customer adding load to vacant facilities, the commercial/industrial space associated with the new load has been vacant for more than six months.
7. In case of early termination, the Customer shall repay Florida Public Utilities all of the credits provided under the Program to date.
8. To initiate service under this Program on ______________________,________ and terminate service under this Program on ______________________,__________. This shall constitute a period of five years.
9. To provide verification that the availability for this Program is a significant factor in the Customer's location/expansion decision.
10. If a change in ownership occurs after the Customer contracts for service under this Program, the successor Customer may be allowed to fulfill the balance of the contract under the Program and continue the schedule of credits.
11. That in the case of new load established in a vacant facility to provide verification that there is no affiliation with any prior occupant.

RATE ADJUSTMENT RIDER – NORTHWEST FLORIDA DIVISION

Applicability
Electric service under all rate schedules for the Northwest Florida Division, which specify that rates are subject to adjustment in accordance with the provisions of the Company's Rate Adjustment Rider.

Total Purchased Power Cost Recovery Clause
The total purchased power cost adjustment shall be applied to each kilowatt hour delivered and shall be computed in accordance with the formula prescribed by the Florida Public Service commission. The total purchased power cost adjustment for the period January 1, 2024 through December 31, 2024 is as follows:

Rate Class	Rate Schedule	Levelized Adjustment
Residential (1st 1000 KWH's)	RS	10.259¢ / KWH
Residential (above 1000 KWH's)	RS	11.509¢ / KWH
General Service	GS	10.637¢ / KWH
General Service-Demand	GSD	10.035¢ / KWH
Lighting Service	LS	8.180¢ / KWH
General Service-Large Demand	GSLD	9.772¢ / KWH
General Service-Large Demand 1	GSLD 1	Not Applicable At This Time

Time of Use Rate Class	Rate Schedule	Levelized Adjustment On-Peak	Off Peak
Residential TOU	RST - EXP	18.659¢ / KWH	6.359¢ / KWH
General Service TOU	GST - EXP	14.637¢ / KWH	5.637¢ / KWH
General Service-Demand TOU	GSDT – EXP	14.035¢ / KWH	6.785¢ / KWH
General Service-Large Demand TOU	GSLDT – EXP	15.772¢ / KWH	6.772¢ / KWH
~~Interruptible – TOU~~	~~IS – EXP~~	~~8.272¢ / KWH~~	~~9.772¢ / KWH~~

Energy Conservation Cost Recovery Clause
Each base energy rate per KWH of the above rate schedules for the period January 1, 2024 through December 31, 2024 shall be increased by 0 .144 ¢/KWH of sales to recover conservation related expenditures by the Company. This adjustment is determined in accordance with the formula and procedures specified by the Florida Public Service Commission.

The Energy Conservation Cost Recovery Clause will not apply to the GSLD-1 rate class.

Tax Cost Recovery
There will be added to all bills rendered for electric service a proportionate share of all license fees and taxes imposed by any governmental authorities after November 1, 1946, to an extent sufficient to cover excess increased taxes or license fees.

RATE ADJUSTMENT RIDER – NORTHEAST FLORIDA DIVISION

Applicability

Electric service under all rate schedules for the Northeast Florida Division which specify that rates are subject to adjustment in accordance with the provisions of the Company's Rate Adjustment Rider.

Total Purchased Power Cost Recovery Clause

The total purchased power cost adjustment shall be applied to each kilowatt hour delivered and shall be computed in accordance with the formula prescribed by the Florida Public Service Commission. The total purchased power cost adjustment for the period January 1, 2024 through December 31, 2024 is as follows:

Rate Class	Rate Schedule	Levelized Adjustment
Residential (1st 1000 KWH's)	RS	10.259¢ / KWH
Residential (above 1000 KWH's)	RS	11.509¢ / KWH
General Service	GS	10.637¢ / KWH
General Service –Demand	GSD	10.035¢ / KWH
General Service –Large Demand	GSLD	9.772¢ / KWH
Lighting Service	LS	8.180¢ / KWH
General Service Large Demand 1	GSLD 1	Generation Demand $ 5.41/ KW*
		Transmission Demand $ 2.91/ KW*
		Energy 7.12 ¢ / KWH*

*Estimated for informational purposes only,
Monthly rate will be billed at actual cost.

Energy Conservation Cost Recovery Clause

Each base energy rate per KWH of the above rate schedules for the period January 1, 2024 through December 31, 2024 shall be increased by 0.144 ¢ / KWH of sales to recover conservation related expenditures by the Company. This adjustment is determined in accordance with the formula and procedures specified by the Florida Public Service Commission.

The Energy Conservation Cost Recovery Clause will not apply to the GSLD-1 rate class.

Tax Recovery

There will be added to all bills rendered for electric service a proportionate share of all license fees and taxes imposed by any governmental authorities after January 1, 1945, to an extent sufficient to cover excess increased taxes or license fee.

NON-FIRM ENERGY PROGRAM NFEP-EXP (EXPERIMENTAL) - CLOSED

Availability

Available within the territory served by the Company in Jackson, Calhoun, and Liberty Counties and on Amelia Island in Nassau County. This service is limited to ~~customers~~Customers in the GSLD1 or Standby rate class. The Rate Schedule is closed to new Customers and shall expire ~~with one year~~within 90 days written notice by the Company to participating Customers and will expire in its entirety by September 1, 2025.

Applicability

Applicable to Customers which are self-generators with dispatchable generation and are eligible for Rate Schedule GSLD1 or Standby, or who have executed a Special Contract approved by the Commission. Eligible Customers would nominate, in accordance with the procedures outlined below, an amount of electric load they commit to purchase that is above and in addition to the Customer's established baseline. Non-Firm (NF) Energy nominations must be made in 1,000 KW increments and is currently limited to a minimum of 1,000 kW and maximum of 15,000 kW. The Customer is not obligated to nominate NF Energy for any specific period but must nominate a minimum of 1,500 MWh per year.

The default period for NF Energy nominations will be 7 days. Nominations for longer periods, e.g. monthly, will be made available when market conditions warrant. The same procedure for nominations and acceptance will apply to all periods. Customer may nominate NF Energy for on-peak hours, off-peak hours, or all hours. On-peak hours are Hour Ending (H.E.) 08:00 to H.E 23:00 weekdays and off-peak hours are H.E. 24:00 to HE 07:00 and all hours on weekends and established holidays. Times shown are Eastern Standard or Daylight Savings time. On-peak and off-peak hours are subject to change.

Once the Company confirms the Customer's nomination, the Customer is obligated to pay for all NF Energy nominated at the offered rate regardless of whether the Customer takes all NF Energy nominated for the month, unless recalled in accordance with NF Recall provisions.

Monthly Rate

The rates and all other terms and conditions of the Customer's otherwise applicable rate schedule shall be applicable under this program.

All NF Energy shall be charged at the hourly price, in $/MWh, as offered by the Company. Once nominated by the Customer and accepted by the Company, the Customer is responsible to pay the full NF Energy Charge for the nomination period regardless of whether the Customer takes all NF Energy nominated for the month. Any purchases that exceed the combined total of the Customer's baseline and NF Energy nominations will be billed based on the Customer's otherwise applicable rate. The NF Energy charges are in addition to the charges based on the Customers otherwise applicable rate.

Monthly NF Administrative Charge:
$0.00 per Customer per month

~~(Continued on Sheet No. 66.2)~~

NON-FIRM ENERGY PROGRAM NFEP-EXP (EXPERIMENTAL) - CLOSED

~~(Continued From Sheet No. 66.1)~~

Monthly NF Demand Charge:
$0.00 per kW of NF demand

Monthly Rate

NF Energy Charge:
Amount as offered and accepted for each nomination

Monthly NF Demand

The Monthly NF Demand shall equal the maximum hour of NF Energy nominated by the Customer for the calendar month.

Minimum Monthly Bill

The Minimum Monthly Bill shall consist of the Monthly NF Administrative Charge plus applicable taxes and fees.

Term of Service

The Customer agrees to a minimum of 12 months of service under the Program. Service will continue thereafter until the Customer submits to the Company a written notice of termination. Service will discontinue at the end of the calendar month that notice of termination is received.

Nomination and Acceptance Procedure

1. By 10:00 AM each Friday, or when NF Energy is available, the Company will provide the Customer with NF Energy price quotations for the following period beginning 0:00 (midnight) the following Sunday (time period is Monday 00:00 – Sunday 24:00).
2. The Customer will submit a NF Energy nomination schedule to the Company by 2:00 PM of the same day that the offer is submitted.
3. NF Energy nominations are accepted once the Company confirms receipt of the nomination. The Company will then schedule delivery of the NF Energy, if any, beginning 0:00 (midnight) the following Sunday.

Nomination Recall Provisions:

Once accepted, nominations by Customer may only be withdrawn if a Force Majeure is declared. A Force Majeure may be declared by the Customer if the Customer's equipment suffers major failure such that the Customer is prevented from taking the NF Energy. In such case, the Customer will notify the Company's designated contact by approved method as soon as condition is known and the Company will attempt to withdraw the scheduled delivery of NF Energy. If possible ~~to do so~~, the Customer will no longer be responsible for purchasing the balance of NF Energy nominated during the event. Customer may declare Force Majeure a maximum of once per month.

Company may terminate NF Energy delivery at any time due to system emergencies or unusual pricing by notifying Customer of such termination, and Company has no obligation to deliver NF Energy.

STORM PROTECTION PLAN COST RECOVERY CLAUSE

Applicability

Electric service under all rate schedules.

Storm Protection Plan Cost Recovery Clause

The Storm Protection Plan Cost Recovery (SPPCRC) Factors shall be applied to the ~~customer's~~Customer's total kilowatt hour billed. This factor is designed to recover expenditures incurred by the Company related to the protection and hardening of the grid from storms and other extreme weather events. This adjustment is determined in accordance with the formula and procedures prescribed by the Florida Public Service Commission as set forth in Rule 25-6.031, F.A.C.

The total Storm Protection Plan Cost Recovery factors for the period January 1, 2024 through December 31, 2024 are as follows:

Rate Schedule	SPP Factors per KWH
Residential	0 .4320¢ / KWH
General Service	0 .4980¢ / KWH
General Service Demand	0 .2730¢ / KWH
General Service Large Demand	0 .1740¢ / KWH
Industrial/Standby	0 .2930¢ / KWH
Lighting Service	2.6520¢ / KWH

STORM RECOVERY SURCHARGE

Hurricanes ~~Matthew and Irma~~Michael Surcharge:

Applicability:
Electric service under all rate schedules.

Description:
This surcharge is for recovery of storm costs and will be recovered ~~for the two years beginning April 2019~~from November 2020 through ~~March 2021~~December 2025.

Rate Class – GSLD-1 - $190,208 total, annually to be allocated across the GSLD-1 rate class.

All other Rate Schedules - The surcharge of ~~.1535~~1.280¢/ KWH will be applied to each kilowatt hour billed from ~~April 2019~~November 2020 through ~~March 2021~~December 2025.

TECHNOLOGY COST RECOVERY RIDER - (TCRR)

~~**Hurricanes Michael Surcharge**~~Purpose:
The Technology Cost Recovery Rider ("TCRR") is a fixed monthly charge per Customer premise for the purpose of recovering the cost of the Company's new and updated technology costs. The Company shall record both projected and actual expenses and revenues associated with the purchase and implementation of the Company's technology implementation plan.

Applicability:
~~Electric service under all~~Applies to all Residential and Commercial rate schedules. Except as otherwise provided herein, each rate schedule listed below shall be increased or decreased to the nearest .01 dollar.

The TCRR cost recovery mechanism will be based on a projected twelve (12) month recovery period of January 1 to December 31. The Company will file the first TCRR rates with the Commission at least sixty (60) days before it goes into service and refile on an annual basis at least sixty (60) days prior to the January 1 effective date.

~~Description~~Methodology for Cost Recovery for Technological Improvements:
~~This surcharge is for recovery of storm costs and will be recovered from November 2020 thru December 2025.~~
The costs used in the determination of the TCCR shall include the pre and post implementation capitalized expenses for the Company's improvement. Specifically the rate(s) will include a) the capitalized cost of the system, b) less accumulated depreciation of the system, c) plus the unamortized regulatory asset and d) less accumulated deferred income tax (ADIT) for the Florida business unit, e) less the net retirement of the Company's former system (including any other costs already recovered in current base rates. The total of these capitalized costs would then be multiplied by the most recently approved authorized rate of return with the equity portion grossed up for income taxes to determine the return on investment. This return would be added to a) the depreciation expense related to the asset, b) amortization of the regulatory asset over twenty (20) years, c) less any discontinued depreciation expenses associated with the former asset existing at retirement, this amount shall be based on that depreciation expense included in the Company's base rates, d) plus any new expenses associated with the new system, e) less expenses that were discontinued and associated with the former system (and any other expenses already recovered in current base rates). The total of the return on investment and the costs outlined in (a) through (e) above, will be divided by the number of Customers (excluding any special contracts) in the projected recovery period to determine an annualized cost per Customer premise. This cost will be divided by the 12 months to get the monthly rate. The chart below outlines the methodology that will be used.

~~The surcharge of 1.280¢/ KWH will be applied to each kilowatt hour billed from November 2020 through December 2025.~~

STANDARD FORMS
EXTENSION OF FACILITIES AGREEMENT

FLORIDA PUBLIC UTILITIES COMPANY

EXTENSION OF FACILITIES AGREEMENT

This Agreement, executed in duplicate as of the _ day of_______________ , 20__, by and between Florida Public Utilities Company, a Florida Corporation, hereinafter referred to as the "Company", party of the first part, and ________________ hereinafter referred to as the "Customer", party of the second part, witnesseth:

Whereas, the ~~customer~~Customer is desirous of securing an extension or increase of the facilities of the Company as hereinafter described; and whereas, the Company is willing to make such extension or increase;

Now, therefore, in consideration of the respective and mutual covenants and agreements contained herein and hereinafter set forth, the parties hereto agree with each other as follows:

1. The Company will extend or increase its facilities as follows:

The Company will commence the extension or increase of its facilities forthwith after the execution of this Agreement and use its best efforts to complete the extension or increase of its facilities as soon as reasonably possible; provided, however, that the parties expressly agree that the Company shall not be liable or responsible for any delay caused by or resulting from shortages or unavailability of material or labor, or from any other hindrance or delay beyond the control of the Company.

2. To compensate the Company for the cost and expense of the aforesaid extension or increase of its facilities, the Customer simultaneously with the execution of this Agreement has paid to the Company the sum of $_____, the receipt of which hereby is acknowledged by the Company. The parties agree that said sum was paid by the Customer to and received by the Company without the right of any rebate, credit, reduction or adjustment in favor of either party.

3. The parties agree that the Company shall at all times have title to and keep ownership and control in and over the aforesaid extended or increased facilities, including but not limited to all new materials and equipment installed therein; and the parties agree further that the Company shall have the sole and exclusive right to use the extended or increased facilities for the purpose of serving other ~~customers~~Customers of the Company.

STANDARD FORMS
EXTENSION OF FACILITIES AGREEMENT (Continued)

4. After the extension or increase of the facilities described above, the Customer agrees that subject to all applicable terms, provisions, rights, duties and penalties, the Customer will in the usual manner and at the usual times pay for the utilities and services delivered to the Customer by means of the extended or increased facilities at the regular franchise or at special contract rates, whichever is applicable.

5. The parties agree that no representation, warranty, conditions or agreement of any kind or nature whatsoever shall be binding upon either of the parties hereto unless incorporated in this Agreement; and the parties agree further that this Agreement covers and includes the entire agreement between the parties. The parties agree that all covenants and agreements contained herein shall extend to, be obligatory upon and inure to the benefit of the parties hereto and their respective heirs, legal representatives, successors and assigns; provided, however, that the Customer may not transfer or assign all or any part of this Agreement or any right which he may obtain hereunder without first obtaining the written consent of the Company.

In witness whereof, the parties hereto have executed this Agreement as of the day and year hereinbefore first written.

INTERCONNECTION OF CUSTOMER-OWNED

RENEWABLE GENERATION SYSTEMS APPLICATION
INTERCONNECTION OF CUSTOMER OWNED RENEWABLE
GENERATION SYSTEMS

TIER 1 – 10 KW or Less
TIER 2 – Greater than 10 KW and Less Than or Equal to 100 KW
TIER 3 – Greater than 100 KW and Less Than or Equal to 2 MW

Florida Public Utilities Company ~~customers~~Customers who install ~~customer-owned~~Customer-owned renewable generation systems and desire to interconnect those facilities with the FPUC electrical system are required to complete this application. This application can be obtained from the local FPU office or can be downloaded from the FPUC website (www.fpuc.com). When the completed application and fees are returned to FPUC, the process of completing the appropriate Tier 1, Tier 2 or Tier 3 Interconnection Agreement can begin. The Interconnection Agreements may be obtained at the local FPUC office. Details for interconnection agreements may be found as defined in Rule 25-6.065, Florida Administrative Code or within the Florida Public Utilities Company Interconnection Agreement.

1. Customer Information

INTERCONNECTION OF CUSTOMER-OWNED
RENEWABLE GENERATION SYSTEMS APPLICATION (Continued)

3. Facility Rating Information

Gross Power Rating: ______________________ ("Gross power rating" means the total manufacturer's AC nameplate generating capacity of an on-site ~~customer-owned~~Customer-owned renewable generation system that will be interconnected to and operate in parallel with the investor-owned utility's distribution facilities. For inverter-based systems, the AC nameplate generating capacity shall be calculated by multiplying the total installed DC nameplate generating capacity by .85 in order to account for losses during the conversion from DC to AC.
Fuel or Energy Source: ______________________

Anticipated In- Service Date: _________________

4. Application Fee

The application fee is based on the Gross Power Rating and must be submitted with this application. There is no application fee for Tier 1 installations. The non-refundable application fee is $350 for Tier 2 and Tier 3 installations.

5. Interconnection Study Fee

For Tier 3 installations that require an interconnection study, as determined by the Company, the Customer will pay $2,000 prior to the initiation of the interconnection study. The total cost to the Customer will not exceed this amount. Should the actual interconnection study cost be less than $2,000 the ~~customer~~Customer will be refunded the difference.

6. Required Documentation

Before the Interconnection Agreement may become effective, the Documentation listed in this Section must be provided to the Company by the Customer. The Documentation listed does not need to accompany the Application but must be received before the Interconnection Agreement will be executed by the Company.

A. Documentation that the installation complies with:

   1. IEEE 1547 (2003) Standard for Interconnecting Distributed Resources with Electric Power Systems.
   2. IEEE 1547.1 (2005) Standard Conformance Test Procedures for Equipment Interconnecting Distributed Resources with Electric Power Systems.
   3. UL 1741 (2005) Inverters, Converters, Controllers and Interconnection System Equipment for Use with Distributed Energy Resources.

B. Documentation that the ~~customer-owned~~Customer-owned renewable generation has been inspected and approved by local code officials prior to its operation in parallel with the Company system to ensure compliance with applicable local codes.

C. Proof of general liability insurance for Tier 2 generators ($1,000,000) or Tier 3 generators ($2,000,000). Not required for Tier 1 generators.

D. Copy of any lease agreements if the Customer is leasing facility from third party.

RESERVED FOR FUTURE USE

STANDARD FORMS
STANDARD INTERCONNECTION AGREEMENT - TIER 1

STANDARD INTERCONNECTION AGREEMENT FOR ~~CUSTOMER~~CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)

This agreement made and entered into as of this __ day of ________________________________,

_____________ by and between ______________________ hereinafter known at the "Customer" and Florida Public Utilities Company hereinafter know as the "Company". This agreement is made in accordance with Florida Public Commission Rule 25-6.065 F.A.C., Interconnection and Net Metering of Customer-Owned Renewable Generation and under the terms and conditions as approved by the Florida Public Service Commission pursuant to Rule 25-6.065(3), F.A.C.

1. The Customer's renewable generation system is within the Company service territory and is located at:

   ____

   ____

   and should be installed and operational by:

   ____________________________, _____________.

2. Customer will ensure the installation will meet or exceed all requirements noted below, will provide the Company with reasonable notification prior to the operation of the system and will assist the Company in verifying that the installation complies with the agreement prior to operating in parallel with the Company's electric system.

3. The Customer's renewable generation system is described as follows:

   a. Equipment Manufacturers Name and Address:

   ____

   ____

   ____

   b. Manufacturers Reference Number, Serial Number, Type, Style, Model, Etc.

   ____

   ____

   ____

   c. Name Plate Rating (KW and Voltage):

   ____

   ____

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

4. Standard Interconnection Agreement Requirements – To qualify for expedited interconnection as a Tier 1 generator pursuant to Rule 25-6.065, F.A.C., the Facility must:

(a) Comply with IEEE 1547 (2003) Standard for Interconnecting Distributed Resources with Electric Power Systems.
(b) Comply with IEEE 1547.1 (2005) Standard Conformance Test Procedures for Equipment Interconnecting Distributed Resources with Electric Power Systems.
(c) Comply with UL 1741 (2005) Inverters, Converters, Controllers and Interconnection System Equipment for Use With Distributed Energy Resources.
(d) Have a Gross Power Rating that does not exceed 90% of the ~~customer's~~Customer's utility distribution service rating.
(e) Have a Gross Power Rating of 10 KW or less.

5. Customer Qualifications and Fees – The ~~customer~~Customer shall comply with the following to qualify as a Tier 1 generator pursuant to Rule 25-6.065, F.A.C.:

(a) Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards listed in Section (4).
(b) Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to Section (5) (a) that performs the function of automatically isolating the ~~customer-owned~~Customer-owned generation equipment from the electric grid in the event the electric grid loses power.
(c) Provided the ~~customer-owned~~Customer-owned renewable generation equipment complies with Sections (4) and (5) (a), (b), the Company shall not require further design review, testing, or additional equipment other than that provided for in Section (9).
(d) Tier 1 ~~customers~~Customers who request interconnection of ~~customer-owned~~Customer-owned renewable generation shall not be charged fees in addition to those charged to other retail ~~customers~~Customers without self-generation, including application fees.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

6. Inspection Requirements – Prior to operating the Customer system in parallel with Company's electric system, the Customer will:

(a) Have the ~~customer-owned~~Customer-owned renewable generation inspected and approved by local code officials prior to its operation in parallel with the Company system to ensure compliance with applicable local codes.

(b) Make provisions that permit the Company to inspect ~~customer owned~~Customer-owned renewable generation and its component equipment, and the documents necessary to ensure compliance with Sections (4) and (5). The Customer shall notify the Company at least 10 days prior to initially placing ~~customer~~Customer equipment and protective apparatus in service, and the Company shall have the right to have personnel present on the in-service date. If the ~~customer owned~~Customer-owned renewable generation system is subsequently modified in order to increase its gross power rating, the Customer must notify the Company by submitting a new application specifying the modifications at least 30 days prior to making the modifications.

(c) Provide for protection of the renewable generating equipment, inverters, protective devices, and other system components from damage from the normal and abnormal conditions and operations that occur on the Company system in delivering and restoring power; and is responsible for ensuring that ~~customer owned~~Customer-owned renewable generation equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to ensure that it is operating correctly and safely.

7. Indemnity for Loss to Third Parties - The Customer shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the ~~customer owned~~Customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

8. Customer Insurance Requirements – The Customer owning a Tier 1 generator is not required by rule to obtain general liability insurance for damage to persons or property as a result of the operation of the generator. However, the Company strongly recommends that a Tier 1 ~~customer~~Customer carry an appropriate level of liability insurance.

9. Manual Disconnect Switch - Inverter-based Tier 1 ~~customer owned~~Customer-owned renewable generation systems shall be exempt from this requirement. However, the Company recommends that the Customer install, at the ~~customer's~~Customer's expense, a manual disconnect switch of the visible load break type to provide a separation point between the AC power output of the ~~customer-owned~~Customer-owned renewable generation and any Customer wiring connected to the Company's system. The manual disconnect switch shall be mounted separate from, but adjacent to, the meter socket and shall be readily accessible to the Company and capable of being locked in the open position with a single Company padlock. Should a main disconnect switch not be installed, removal of the electric meter and disconnection of electric service may be used to isolate the ~~customer~~Customer owned generation for the electric grid.

10. Disconnection From Customer System - The Company may open the manual disconnect switch pursuant to the conditions set forth below in (10) (a) – (10) (d), isolating the ~~customer owned~~Customer-owned renewable generation, without prior notice to the Customer. To the extent practicable, however, prior notice shall be given. If prior notice is not given, the Company shall at the time of disconnection leave a door hanger notifying the Customer that their ~~customer owned~~Customer-owned renewable generation has been disconnected, including an explanation of the condition necessitating such action. The Company shall reconnect the ~~customer owned~~Customer-owned renewable generation as soon as the condition necessitating disconnection is remedied.

    a. Emergencies or maintenance requirements on the Company's electric system;

    b. Hazardous conditions existing on the Company system due to the operation of the Customer's generating or protective equipment as determined by the Company;

    c. Adverse electrical effects, such as power quality problems, on the electrical equipment of the Company's other electric consumers caused by the ~~customer owned~~Customer-owned renewable generation as determined by the Company;

    d. Failure of the Customer to maintain the required insurance coverage (if required).

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

11. Administrative Requirements

(a) The Company shall maintain on its website a downloadable application for interconnection of ~~customer owned~~Customer-owned renewable generation, detailing the information necessary to execute the Standard Interconnection Agreement. Upon request the Company shall provide a hard copy of the application within 5 business days.

(b) Within 10 business days of receipt of the Customer's application, the Company shall provide written notice that it has received all documents required by the Standard Interconnection Agreement or indicate how the application is deficient. Within 10 business days of receipt of a completed application, the Company shall provide written notice verifying receipt of the completed application. The written notice shall also include dates for any physical inspection of the ~~customer owned~~Customer-owned renewable generation necessary for the Company to confirm compliance with Sections (4) through (10).

(c) The Standard Interconnection Agreement shall be executed by the Company within 30 calendar days of receipt of a completed application.

(d) The Customer must execute the Standard Interconnection Agreement and return it to the Company at least 30 calendar days prior to beginning parallel operations and within one year after the utility executes the Agreement. All physical inspections must be completed by the Company within 30 calendar days of receipt of the Customer's executed Standard Interconnection Agreement. If the inspection is delayed at the Customer's request, the Customer shall contact the utility to reschedule an inspection. The Company shall reschedule the inspection within 10 business days of the Customer's request.

12. Net Metering

(a) The Company shall enable each ~~customer owned~~Customer-owned renewable generation facility interconnected to the investor-owned utility's electrical grid pursuant to this rule to net meter.

(b) The Company shall install, at no additional cost to the ~~customer~~Customer, metering equipment at the point of delivery capable of measuring the difference between the electricity supplied to the ~~customer~~Customer from the investor-owned utility and the electricity generated by the ~~customer~~Customer and delivered to the investor-owned utility's electric grid.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

12. Net Metering (continued)

(c) Meter readings shall be taken monthly on the same cycle as required under the otherwise applicable rate schedule.

(d) The Company shall charge for electricity used by the ~~customer~~Customer in excess of the generation supplied by ~~customer owned~~Customer-owned renewable generation in accordance with normal billing practices.

(e) During any billing cycle, excess ~~customer owned~~Customer-owned renewable generation delivered to the Company's electric grid shall be credited to the Customer's energy consumption for the next month's billing cycle.

(f) Energy credits produced pursuant to Section (12) (e) shall accumulate and be used to offset the ~~customer's~~Customer's energy usage in subsequent months for a period of not more than twelve months. At the end of each calendar year, the Company shall pay the Customer for any unused energy credits at an average annual rate based on the Company's COG-1, as-available energy tariff.

(g) When a Customer leaves the system, that Customer's unused credits for excess kWh generated shall be paid to the Customer at an average annual rate based on the Company's COG-1, as-available energy tariff.

(h) Regardless of whether excess energy is delivered to the Company's electric grid, the ~~customer~~Customer shall continue to pay the applicable ~~customer~~Customer charge and applicable demand charge (if applicable) for the maximum measured demand during the billing period. The Company shall charge for electricity used by the Customer in excess of the generation supplied by ~~customer owned~~Customer-owned renewable generation at the Company's otherwise applicable rate schedule. The Customer may at their sole discretion choose to take service under the Company's standby or supplemental service rate, if available.

13. Renewable Energy Certificates - Customers shall retain any Renewable Energy Certificates associated with the electricity produced by their ~~customer owned~~Customer-owned renewable generation equipment. Any additional meters necessary for measuring the total renewable electricity generated for the purposes of receiving Renewable Energy Certificates shall be installed at the Customer's expense, unless otherwise determined during negotiations for the sale of the Customer's Renewable Energy Certificates to the Company.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW OR LESS)
(Continued)

14. Change of Ownership – This agreement shall not be assigned or transferred without prior written consent of the Company. Should there be a change in ownership; the Customer shall provide the Company with 30 day notice prior to the change. The Company will contact the new owner prior to the end of the 30 days in order to execute a new agreement. The new owner will not be entitled to operate the generator in parallel with the Company system or be net metered until a new agreement is executed by both parties. However, this agreement shall inure to the benefit of and binding upon the respective heirs, legal representatives, successors and assigns of the parties involved until a new agreement is executed.

15. No Extension of Credit – In executing this agreement, the Company does not, nor should it be construed to extend credit or financial support for the benefit of any third parties lending money to or having other transactions with the Customer or any assignee of this agreement.

16. Applicability of Tariff – The Company's tariff and associated technical terms and abbreviations, general rules, regulations and standard electric service requirements are incorporated herein by reference. In the event that this tariff and the Interconnection Agreement is revised due to rule changes approved by the Florida Public Service Commission, the Company and the Customer agree to replace this agreement with an amended agreement that complies with the amended Florida Public Service Commission rules.

17. Entire Agreement – This agreement supersedes all previous agreements or representations, either written or oral, heretofore in effect between the Company and the Customer, made in respect to matters herein contained, and when duly executed, this agreement constitutes the entire agreement between the parties.

18. Termination – Upon termination of this agreement, the Company shall open and padlock the manual disconnect switch, if applicable, and remove any additional kilowatt-hour meter and associated Company equipment. At the Customer's expense, the Customer agrees to permanently isolate the Facility from the Company's electric service grid. The Customer shall notify the Company in writing within ten (10) business days that the isolation procedure has been completed.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 1 RENEWABLE GENERATION SYSTEMS (10 KW or Less)
(Continued)

19. Retail Purchase of Electricity - "Customer-owned renewable generation" means an electric generating system located on a ~~customer's~~Customer's premise that is primarily intended to offset part or all of the ~~customer's~~Customer's electricity requirements with renewable energy. The term "~~customer owned~~Customer-owned renewable generation" does not preclude the ~~customer~~Customer of record from contracting for the purchase, lease, operation, or maintenance of an on-site renewable generation system with a third-party under terms and conditions does not include the retail purchase of electricity from the third party.

20. The Customer agrees to indemnify and hold harmless the Company, its subsidiaries or affiliates, and their respective employees, officers and directors, against any and all liability, loss, damage, cost or expense which the Company, it subsidiaries, affiliates, and their respective employees, officers and directors may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Customer under the obligations of this agreement. The Company agrees to indemnify and hold harmless the Customer, against any and all liability, loss, damage, cost or expense which the Customer may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Company under the obligations of this agreement.

21. Communications, either emergency or routine, related to this agreement or operation of the installation shall be made to the following parties:

STANDARD INTERCONNECTION AGREEMENT – TIER 2

STANDARD INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2
RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)

This agreement made and entered into as of this _____ day of _______________________, ____________ by and between __________________________________ hereinafter known at the "Customer" and Florida Public Utilities Company hereinafter know as the "Company". This agreement is made in accordance with Florida Public Commission Rule 25-6.065 F.A.C., Interconnection and Net Metering of Customer-Owned Renewable Generation and under the terms and conditions as approved by the Florida Public Service Commission pursuant to Rule 25-6.065(3), F.A.C.

1. The Customer's renewable generation system is within the Company service territory and is located at:

____

____

and should be installed and operational by:

_________________________, ____________.

2. Customer will ensure the installation will meet or exceed all requirements noted below, will provide the Company with reasonable notification prior to the operation of the system and will assist the Company in verifying that the installation complies with the agreement prior to operating in parallel with the Company's electric system.

3. The Customer's renewable generation system is described as follows:

a. Equipment Manufacturers Name and Address:

____

____

____

b. Manufacturers Reference Number, Serial Number, Type, Style, Model, Etc.

____

____

____

c. Name Plate Rating (KW and Voltage):

____

____

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED
TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

4. Standard Interconnection Agreement Requirements – To qualify for expedited interconnection as a Tier 2 generator pursuant to Rule 25-6.065, F.A.C., the Facility must:

(a) Comply with IEEE 1547 (2003) Standard for Interconnecting Distributed Resources with Electric Power Systems.

(b) Comply with IEEE 1547.1 (2005) Standard Conformance Test Procedures for Equipment Interconnecting Distributed Resources with Electric Power Systems.

(c) Comply with UL 1741 (2005) Inverters, Converters, Controllers and Interconnection System Equipment for Use With Distributed Energy Resources.

(d) Have a Gross Power Rating that does not exceed 90% of the ~~customer's~~Customer's utility distribution service rating.

(e) Have a Gross Power Rating ~~of~~ greater than 10 KW and less than or equal to 100 KW.

5. Customer Qualifications and Fees – The ~~customer~~Customer shall comply with the following to qualify as a Tier 2 generator pursuant to Rule 25-6.065, F.A.C.:

(a) Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards listed in Section (4).

(b) Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to Section (5) (a) that performs the function of automatically isolating the ~~customer-owned~~Customer-owned generation equipment from the electric grid in the event the electric grid loses power.

(c) Provided the ~~customer-owned~~Customer-owned renewable generation equipment complies with Sections (4) and (5) (a), (b), the Company shall not require further design review, testing, or additional equipment other than that provided for in Section (9).

(d) Tier 2 ~~customers~~Customers who request interconnection of ~~customer-owned~~Customer-owned renewable generation shall be charged a one-time non-refundable application fee of $350.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED
TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

6. Inspection Requirements – Prior to operating the Customer system in parallel with Company's electric system, the Customer will:

(a) Have the ~~customer owned~~Customer-owned renewable generation inspected and approved by local code officials prior to its operation in parallel with the Company system to ensure compliance with applicable local codes.

(b) Make provisions that permit the Company to inspect ~~customer owned~~Customer-owned renewable generation and its component equipment, and the documents necessary to ensure compliance with Sections (4) and (5). The Customer shall notify the Company at least 10 days prior to initially placing ~~customer~~Customer equipment and protective apparatus in service and the Company shall have the right to have personnel present on the in-service date. If the ~~customer owned~~Customer-owned renewable generation system is subsequently modified in order to increase its gross power rating, the Customer must notify the Company by submitting a new application specifying the modifications at least 30 days prior to making the modifications.

(c) Provide for protection of the renewable generating equipment, inverters, protective devices, and other system components from damage from the normal and abnormal conditions and operations that occur on the Company system in delivering and restoring power; and is responsible for ensuring that ~~customer owned~~Customer-owned renewable generation equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to ensure that it is operating correctly and safely.

7. Indemnity for Loss to Third Parties - The Customer shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the ~~customer~~Customer- owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED
TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

8. Customer Insurance Requirements – The Customer owning a Tier 2 generator is required by rule to obtain general liability insurance for personal and property damage in the amount of no less than one million dollars ($1,000,000) as a result of the operation of the generator. Prior to parallel operation, the Customer shall provide initial proof of insurance or sufficient guarantee and proof of self insurance, evidencing the generator. The Customer shall continue to provide proof of continuing insurance within 30 days of any policy renewal.

9. Manual Disconnect Switch – Customer's operating a Tier 2 generator shall install, at the ~~customer's~~Customer's expense, a manual disconnect switch of the visible load break type to provide a separation point between the AC power output of the ~~customer owned~~Customer-owned renewable generation and any Customer wiring connected to the Company's system. The manual disconnect switch shall be mounted separate from, but adjacent to, the meter socket and shall be readily accessible to the Company and capable of being locked in the open position with a single Company padlock.

10. Disconnection From Customer System - The Company may open the manual disconnect switch pursuant to the conditions set forth below in Sections (10) (a) – (10) (d), isolating the ~~customer~~Customer-owned renewable generation, without prior notice to the Customer. To the extent practicable, however, prior notice shall be given. If prior notice is not given, the Company shall at the time of disconnection leave a door hanger notifying the Customer that their ~~customer owned~~Customer-owned renewable generation has been disconnected, including an explanation of the condition necessitating such action. The Company shall reconnect the ~~customer-owned~~Customer-owned renewable generation as soon as the condition necessitating disconnection is remedied.

a. Emergencies or maintenance requirements on the Company's electric system;

b. Hazardous conditions existing on the Company system due to the operation of the Customer's generating or protective equipment as determined by the Company;

c. Adverse electrical effects, such as power quality problems, on the electrical equipment of the Company's other electric consumers caused by the ~~customer owned~~Customer-owned renewable generation as determined by the Company;

d. Failure of the Customer to maintain the required insurance coverage.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2 RENEWABLE GENERATION SYSTEMS (Greater than 10 KW and Less than or Equal to 100 KW) (Continued)

11. Administrative Requirements

(a) The Company shall maintain on its website a downloadable application for interconnection of ~~customer owned~~Customer-owned renewable generation, detailing the information necessary to execute the Standard Interconnection Agreement. Upon request the Company shall provide a hard copy of the application within 5 business days.

(b) Within 10 business days of receipt of the Customer's application, the Company shall provide written notice that it has received all documents required by the Standard Interconnection Agreement or indicate how the application is deficient. Within 10 business days of receipt of a completed application, the Company shall provide written notice verifying receipt of the completed application. The written notice shall also include dates for any physical inspection of the ~~customer owned~~Customer-owned renewable generation necessary for the Company to confirm compliance with Sections (4) through (10).

(c) The Standard Interconnection Agreement shall be executed by the Company within 30 calendar days of receipt of a completed application.

(d) The Customer must execute the Standard Interconnection Agreement and return it to the Company at least 30 calendar days prior to beginning parallel operations and within one year after the utility executes the Agreement. All physical inspections must be completed by the Company within 30 calendar days of receipt of the Customer's executed Standard Interconnection Agreement. If the inspection is delayed at the Customer's request, the Customer shall contact the utility to reschedule an inspection. The Company shall reschedule the inspection within 10 business days of the Customer's request.

12. Net Metering

(a) The Company shall enable each ~~customer owned~~Customer-owned renewable generation facility interconnected to the investor-owned utility's electrical grid pursuant to this rule to net meter.

(b) The Company shall install, at no additional cost to the ~~customer~~Customer, metering equipment at the point of delivery capable of measuring the difference between the electricity supplied to the ~~customer~~Customer from the investor-owned utility and the electricity generated by the ~~customer~~Customer and delivered to the investor-owned utilities electric grid.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED
TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

12. Net Metering (continued)

(c) Meter readings shall be taken monthly on the same cycle as required under the otherwise applicable rate schedule.

(d) The Company shall charge for electricity used by the ~~customer~~Customer in excess of the generation supplied by ~~customer owned~~Customer-owned renewable generation in accordance with normal billing practices.

(e) During any billing cycle, excess ~~customer owned~~Customer-owned renewable generation delivered to the Company's electric grid shall be credited to the Customer's energy consumption for the next month's billing cycle.

(f) Energy credits produced pursuant to Section (12) (e) shall accumulate and be used to offset the ~~customer's~~Customer's energy usage in subsequent months for a period of not more than twelve months. At the end of each calendar year, the Company shall pay the Customer for any unused energy credits at an average annual rate based on the Company's COG-1, as-available energy tariff.

(g) When a Customer leaves the system, that Customer's unused credits for excess kWh generated shall be paid to the Customer at an average annual rate based on the Company's COG-1, as-available energy tariff.

(h) Regardless of whether excess energy is delivered to the Company's electric grid, the ~~customer~~Customer shall continue to pay the applicable ~~customer~~Customer charge and applicable demand charge (if applicable) for the maximum measured demand during the billing period. The Company shall charge for electricity used by the Customer in excess of the generation supplied by ~~customer owned~~Customer-owned renewable generation at the Company's otherwise applicable rate schedule. The Customer may at their sole discretion choose to take service under the Company's standby or supplemental service rate, if available.

13. Renewable Energy Certificates - Customers shall retain any Renewable Energy Certificates associated with the electricity produced by their ~~customer owned~~Customer-owned renewable generation equipment. Any additional meters necessary for measuring the total renewable electricity generated for the purposes of receiving Renewable Energy Certificates shall be installed at the Customer's expense, unless otherwise determined during negotiations for the sale of the Customer's Renewable Energy Certificates to the Company.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 2 RENEWABLE GENERATION SYSTEMS
(Greater than 10 KW and Less than or Equal to 100 KW)
(Continued)

14. Change of Ownership – This agreement shall not be assigned or transferred without prior written consent of the Company. Should there be a change in ownership; the Customer shall provide the Company with 30 day notice prior to the change. The Company will contact the new owner prior to the end of the 30 days in order to execute a new agreement. The new owner will not be entitled to operate the generator in parallel with the Company system or be net metered until a new agreement is executed by both parties. However, this agreement shall inure to the benefit of and binding upon the respective heirs, legal representatives, successors and assigns of the parties involved until a new agreement is executed.

15. No Extension of Credit – In executing this agreement, the Company does not, nor should it be construed to extend credit or financial support for the benefit of any third parties lending money to or having other transactions with the Customer or any assignee of this agreement.

16. Applicability of Tariff – The Company's tariff and associated technical terms and abbreviations, general rules, regulations and standard electric service requirements are incorporated herein by reference. In the event that this tariff and the Interconnection Agreement is revised due to rule changes approved by the Florida Public Service Commission, the Company and the Customer agree to replace this agreement with an amended agreement that complies with the amended Florida Public Service Commission rules.

17. Entire Agreement – This agreement supersedes all previous agreements or representations, either written or oral, heretofore in effect between the Company and the Customer, made in respect to matters herein contained, and when duly executed, this agreement constitutes the entire agreement between the parties.

18. Termination – Upon termination of this agreement, the Company shall open and padlock the manual disconnect switch, if applicable, and remove any additional kilowatt-hour meter and associated Company equipment. At the Customer's expense, the Customer agrees to permanently isolate the Facility from the Company's electric service grid. The Customer shall notify the Company in writing within ten (10) business days that the isolation procedure has been completed.

STANDARD INTERCONNECTION AGREEMENT - TIER 3

STANDARD INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS (Greater than 100 KW and Less than or Equal to 2 MW)

This agreement made and entered into as of this ____ day of ________________________________, ______________by and between ________________________________ hereinafter known at the "Customer" and Florida Public Utilities Company hereinafter know as the "Company". This agreement is made in accordance with Florida Public Commission Rule 25-6.065 F.A.C., Interconnection and Net Metering of Customer-Owned Renewable Generation and under the terms and conditions as approved by the Florida Public Service Commission pursuant to Rule 25-6.065(3), F.A.C.

1. The Customer's renewable generation system is within the Company service territory and is located at:

____

____

and should be installed and operational by:

___________________________, _____________.

2. Customer will ensure the installation will meet or exceed all requirements noted below, will provide the Company with reasonable notification prior to the operation of the system and will assist the Company in verifying that the installation complies with the agreement prior to operating in parallel with the Company's electric system.

3. The Customer's renewable generation system is described as follows:

a. Equipment Manufacturers Name and Address:

____

____

____

b. Manufacturers Reference Number, Serial Number, Type, Style, Model, Etc.

____

____

____

c. Name Plate Rating (KW and Voltage):

____

____

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED
TIER 3 RENEWABLE GENERATION SYSTEMS
(Greater than 100 KW and Less than or Equal to 2 MW)
(Continued)

4. Standard Interconnection Agreement Requirements – To qualify for expedited interconnection as a Tier 3 generator pursuant to Rule 25-6.065, F.A.C., the Facility must:

   (a) Comply with IEEE 1547 (2003) Standard for Interconnecting Distributed Resources with Electric Power Systems.

   (b) Comply with IEEE 1547.1 (2005) Standard Conformance Test Procedures for Equipment Interconnecting Distributed Resources with Electric Power Systems.

   (c) Comply with UL 1741 (2005) Inverters, Converters, Controllers and Interconnection System Equipment for Use With Distributed Energy Resources.

   (d) Have a Gross Power Rating that does not exceed 90% of the ~~customer's~~Customer's utility distribution service rating.

   (e) Have a Gross Power Rating of greater than 100 KW and less than or equal to 2 MW.

5. Customer Qualifications and Fees – The ~~customer~~Customer shall comply with the following to qualify as a Tier 3 generator pursuant to Rule 25-6.065, F.A.C.:

   (a) Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interactive operation with an electric distribution system in compliance with the applicable codes and standards listed in Section (4).

   (b) Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to Section (5) (a) that performs the function of automatically isolating the ~~customer owned~~Customer-owned generation equipment from the electric grid in the event the electric grid loses power.

   (c) Should the Company determine that an interconnection study is necessary; a charge based on actual costs of the study will be the responsibility of the ~~customer~~Customer. Prior to initiation of the study, $2,000 (cost not to exceed $2,000) will be paid by the ~~customer~~Customer. Should actual study cost be less than $2,000, the difference will be refunded to the ~~customer~~Customer. Additionally, the ~~customer~~Customer will be responsible for cost associated with any modifications to the Company's system that is identified in the interconnection study.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS (Greater than 100 KW and Less than or Equal to 2 MW) (Continued)

Any such charges shall not be assessed on the Customer without prior approval of the FPSC as per Rule 25-6.065(4) (h). This agreement will not be executed until the expansion or other work identified in the study has been completed and payment received.

(d) Tier 3 ~~customers~~Customers who request interconnection of ~~customer owned~~Customer-owned renewable generation shall be charged a one-time non-refundable application fee of $350.

6. Inspection Requirements – Prior to operating the Customer system in parallel with Company's electric system, the Customer will:

(a) Have the ~~customer owned~~Customer-owned renewable generation inspected and approved by local code officials prior to its operation in parallel with the Company system to ensure compliance with applicable local codes.

(b) Make provisions that permit the Company to inspect ~~customer owned~~Customer-owned renewable generation and its component equipment, and the documents necessary to ensure compliance with Sections (4) and (5). The Customer shall notify the Company at least 10 days prior to initially placing ~~customer~~Customer equipment and protective apparatus in service and the Company shall have the right to have personnel present on the in-service date. If the ~~customer owned~~Customer-owned renewable generation system is subsequently modified in order to increase its gross power rating, the Customer must notify the Company by submitting a new application specifying the modifications at least 30 days prior to making the modifications.

(c) Provide for protection of the renewable generating equipment, inverters, protective devices, and other system components from damage from the normal and abnormal conditions and operations that occur on the Company system in delivering and restoring power; and is responsible for ensuring that ~~customer owned~~Customer-owned renewable generation equipment is inspected, maintained, and tested in accordance with the manufacturer's instructions to ensure that it is operating correctly and safely.

7. Indemnity for Loss to Third Parties - The Customer shall hold harmless and indemnify the Company for all loss to third parties resulting from the operation of the ~~customer owned~~Customer-owned renewable generation, except when the loss occurs due to the negligent actions of the Company. The Company shall hold harmless and indemnify the ~~customer~~Customer for all loss to third parties resulting from the operation of the Company's system, except when the loss occurs due to the negligent actions of the Customer.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED
TIER 3 RENEWABLE GENERATION SYSTEMS
(Greater than 100 KW and Less than or Equal to 2 MW)
(Continued)

8. Customer Insurance Requirements – The Customer owning a Tier 3 generator is required by rule to obtain general liability insurance for personal and property damage in the amount of no less than two million dollars ($2,000,000) as a result of the operation of the generator. Prior to parallel operation, the Customer shall provide initial proof of insurance or sufficient guarantee and proof of ~~self insurance~~self-insurance, evidencing the generator. The Customer shall continue to provide proof of continuing insurance within 30 days of any policy renewal.

9. Manual Disconnect Switch – Customer's operating a Tier 3 generator shall install, at the ~~customer's~~Customer's expense, a manual disconnect switch of the visible load break type to provide a separation point between the AC power output of the ~~customer-owned~~Customer-owned renewable generation and any Customer wiring connected to the Company's system. The manual disconnect switch shall be mounted separate from, but adjacent to, the meter socket and shall be readily accessible to the Company and capable of being locked in the open position with a single Company padlock.

10. Disconnection From Customer System - The Company may open the manual disconnect switch pursuant to the conditions set forth below in (10) (a) – (10) (d), isolating the ~~customer-owned~~Customer-owned renewable generation, without prior notice to the Customer. To the extent practicable, however, prior notice shall be given. If prior notice is not given, the Company shall at the time of disconnection leave a door hanger notifying the Customer that their ~~customer-owned~~Customer-owned renewable generation has been disconnected, including an explanation of the condition necessitating such action. The Company shall reconnect the ~~customer-owned~~Customer-owned renewable generation as soon as the condition necessitating disconnection is remedied.

a. Emergencies or maintenance requirements on the Company's electric system;

b. Hazardous conditions existing on the Company system due to the operation of the Customer's generating or protective equipment as determined by the Company;

c. Adverse electrical effects, such as power quality problems, on the electrical equipment of the Company's other electric consumers caused by the ~~customer-owned~~Customer-owned renewable generation as determined by the Company;

d. Failure of the Customer to maintain the required insurance coverage.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS (Greater than 100 KW and Less than or Equal to 2 MW) (Continued)

11. Administrative Requirements

(a) The Company shall maintain on its website a downloadable application for interconnection of ~~customer owned~~Customer-owned renewable generation, detailing the information necessary to execute the Standard Interconnection Agreement. Upon request the Company shall provide a hard copy of the application within 5 business days.

(b) Within 10 business days of receipt of the Customer's application, the Company shall provide written notice that it has received all documents required by the Standard Interconnection Agreement or indicate how the application is deficient. Within 10 business days of receipt of a completed application, the Company shall provide written notice verifying receipt of the completed application. The written notice shall also include dates for any physical inspection of the ~~customer owned~~Customer-owned renewable generation necessary for the Company to confirm compliance with Sections (4) through (10) and confirmation regarding the requirement of a Tier 3 interconnection study.

(c) The Standard Interconnection Agreement shall be executed by the Company within 30 calendar days of receipt of a completed application. This will be extended to 90 calendar days if the Company determines that an interconnection study is required.

(d) The Customer must execute the Standard Interconnection Agreement and return it to the Company at least 30 calendar days prior to beginning parallel operations and within one year after the utility executes the Agreement. All physical inspections must be completed by the Company within 30 calendar days of receipt of the Customer's executed Standard Interconnection Agreement. If the inspection is delayed at the Customer's request, the Customer shall contact the utility to reschedule an inspection. The Company shall reschedule the inspection within 10 business days of the Customer's request.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS
(Greater than 100 KW and Less or Equal to 2 MN)
(Continued)

12. Net Metering

(a) The Company shall enable each ~~customer owned~~Customer-owned renewable generation facility interconnected to the investor-owned utility's electrical grid pursuant to this rule to net meter.

(b) The Company shall install, at no additional cost to the ~~customer~~Customer, metering equipment at the point of delivery capable of measuring the difference between the electricity supplied to the ~~customer~~Customer from the investor-owned utility and the electricity generated by the ~~customer~~Customer and delivered to the investor-owned utility's electric grid.

(c) Meter readings shall be taken monthly on the same cycle as required under the otherwise applicable rate schedule.

(d) The Company shall charge for electricity used by the ~~customer~~Customer in excess of the generation supplied by ~~customer owned~~Customer-owned renewable generation in accordance with normal billing practices.

(e) During any billing cycle, excess ~~customer owned~~Customer-owned renewable generation delivered to the Company's electric grid shall be credited to the Customer's energy consumption for the next month's billing cycle.

(f) Energy credits produced pursuant to Section (12) (e) shall accumulate and be used to offset the ~~customer's~~Customer's energy usage in subsequent months for a period of not more than twelve months. At the end of each calendar year, the Company shall pay the Customer for any unused energy credits at an average annual rate based on the Company's COG-1, as-available energy tariff.

(g) When a Customer leaves the system, that Customer's unused credits for excess kWh generated shall be paid to the Customer at an average annual rate based on the Company's COG-1, as-available energy tariff.

(h) Regardless of whether excess energy is delivered to the Company's electric grid, the ~~customer~~Customer shall continue to pay the applicable ~~customer~~Customer charge and applicable demand charge (if applicable) for the maximum measured demand during the billing period. The Company shall charge for electricity used by the Customer in excess of the generation supplied by ~~customer owned~~Customer-owned renewable generation at the Company's otherwise applicable rate schedule. The Customer may at their sole discretion choose to take service under the Company's standby or supplemental service rate, if available.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED TIER 3 RENEWABLE GENERATION SYSTEMS (Greater than 100 KW and Less than or Equal to 2 MW) (Continued)

13. Renewable Energy Certificates - Customers shall retain any Renewable Energy Certificates associated with the electricity produced by their ~~customer-owned~~Customer-owned renewable generation equipment. Any additional meters necessary for measuring the total renewable electricity generated for the purposes of receiving Renewable Energy Certificates shall be installed at the Customer's expense, unless otherwise determined during negotiations for the sale of the Customer's Renewable Energy Certificates to the Company.

14. Change of Ownership – This agreement shall not be assigned or transferred without prior written consent of the Company. Should there be a change in ownership; the Customer shall provide the Company with 30 day notice prior to the change. The Company will contact the new owner prior to the end of the 30 days in order to execute a new agreement. The new owner will not be entitled to operate the generator in parallel with the Company system or be net metered until a new agreement is executed by both parties. However, this agreement shall inure to the benefit of and binding upon the respective heirs, legal representatives, successors and assigns of the parties involved until a new agreement is executed.

15. No Extension of Credit – In executing this agreement, the Company does not, nor should it be construed to extend credit or financial support for the benefit of any third parties lending money to or having other transactions with the Customer or any assignee of this agreement.

16. Applicability of Tariff – The Company's tariff and associated technical terms and abbreviations, general rules, regulations and standard electric service requirements are incorporated herein by reference. In the event that this tariff and the Interconnection Agreement is revised due to rule changes approved by the Florida Public Service Commission, the Company and the Customer agree to replace this agreement with an amended agreement that complies with the amended Florida Public Service Commission rules.

17. Entire Agreement – This agreement supersedes all previous agreements or representations, either written or oral, heretofore in effect between the Company and the Customer, made in respect to matters herein contained, and when duly executed, this agreement constitutes the entire agreement between the parties.

INTERCONNECTION AGREEMENT FOR CUSTOMER OWNED
TIER 3 RENEWABLE GENERATION SYSTEMS
(Greater than 100 KW and less than or Equal to 2 MW)
(Continued)

18. Termination – Upon termination of this agreement, the Company shall open and padlock the manual disconnect switch, if applicable, and remove any additional kilowatt-hour meter and associated Company equipment. At the Customer's expense, the Customer agrees to permanently isolate the Facility from the Company's electric service grid. The Customer shall notify the Company within ten (10) business days that the isolation procedure has been completed.

19. Retail Purchase of Electricity - "Customer-owned renewable generation" means an electric generating system located on a ~~customer's~~Customer's premise that is primarily intended to offset part or all of the ~~customer's~~Customer's electricity requirements with renewable energy. The term "~~customer owned~~Customer-owned renewable generation" does not preclude the ~~customer~~Customer of record from contracting for the purchase, lease, operation, or maintenance of an on-site renewable generation system with a third-party under terms and conditions but does not include the retail purchase of electricity from the third party.

20. The Customer agrees to indemnify and hold harmless the Company, its subsidiaries or affiliates, and their respective employees, officers and directors, against any and all liability, loss, damage, cost or expense which the Company, it subsidiaries, affiliates, and their respective employees, officers and directors may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Customer under the obligations of this agreement. The Company agrees to indemnify and hold harmless the Customer, against any and all liability, loss, damage, cost or expense which the Customer may hereafter incur, suffer or be required to pay by reason of negligence on the part of the Company under the obligations of this agreement.

21. Communications, either emergency or routine, related to this agreement or operation of the installation shall be made to the following parties:

Company:	Customer:

Distribution Secondary Line }	2.5%	3.1%	3.1%	
Distribution Secondary Drops }				

*Provide only if over 1% of total line losses

Metholdology and Assumption:

For the 2025 test year, overall energy losses were assumed to be the same as those experienced in the previous rate proceeding. Of this, 2.5% were estimated to be from the secondary system. Demand losses are estimated to be 25% greater overall than the energy losses. Secondary demand losses were thus computed to be 3.1% and the balance primary.

CHESAPEAKE UTILITIES CORPORATION

2023 ANNUAL REPORT

UNLOCKING OPPORTUNITIES
WITH STRATEGIC INTENTION

CHESAPEAKE UTILITIES CORPORATION

SAFETY FIRST:
Introducing Innovative Lone Worker Personal Monitors

Safety is our priority. In 2023, we introduced a comprehensive safety initiative incorporating lone worker personal monitors. These devices serve as a crucial lifeline, utilizing wearable technology to connect workers to immediate assistance, if necessary. The monitors continuously track gas concentrations in the surrounding environment and trigger notifications, including direct communication with the employee through a dedicated call center.

Key features of these devices include:

- GPS functionality enabled with satellite technology
- No-motion and fall detection capabilities
- Missed check-in notifications
- SOS latch with visible/audible alarm

"This device can be a true lifeline for our employees, ensuring constant communication, and is just one of the many ways in which we are committed to protecting our team."

KYLE MOORE, GENERAL MANAGER, OHIO, AND DIRECTOR OF OPERATIONS SAFETY AND DAMAGE PREVENTION

Dear Fellow Shareholders,

2023 was an extraordinary year of challenges and opportunities for Chesapeake Utilities. The year began with one of the mildest winters on record, resulting in several million dollars of reduced energy delivery margins. The unfavorable weather, in combination with rising interest rates, could have resulted in a negative impact of over $0.75 per share for the year. But, by the end of summer, we had effectively managed through a significant portion of the potential EPS impact and were working toward a 17th consecutive year of record earnings.*

17th consecutive year of record earnings*

Our regulated natural gas distribution businesses continued to gain customers at more than twice the national average, and we executed on several opportunities to expand our natural gas transmission systems. Even with unusually warm weather, our propane business was on target to, as usual, make its meaningful contribution to the Company's earnings, with returns well above authorized regulated levels. Capital investment for growth across the Company was tracking to exceed $200 million for the year. Looking to the future, we launched the largest technology improvement project in our history, with the first phase aimed at the conversion of two legacy customer information systems to a consolidated SAP platform. We also continued to make solid progress in our other business transformation initiatives focused on safety, employee engagement and the customer experience.

By any measure, 2023 was shaping up to be another successful and profitable year. However, as has been typical of Chesapeake Utilities over many years, we pushed ourselves to take advantage of additional opportunities as they arose. Late in the summer, we evaluated the opportunity to acquire Florida City Gas (FCG) from NextEra Energy. We announced a definitive Stock Purchase Agreement toward the end of September. In what had to be near record time, we were able to complete the financing, including a significant equity offering, and close a transformational $923 million transaction on Nov. 30, 2023. The acquisition more than doubled our regulated operations in Florida, a growing state with a constructive business climate where we have operated successfully for nearly 40 years.

JEFF HOUSEHOLDER, CHAIR OF THE BOARD, PRESIDENT AND CEO

"The acquisition of Florida City Gas, along with continued customer demand in our legacy businesses, puts us in position to achieve transformational growth over the next several years. Unlocking opportunities that make us a top performer has been a hallmark of the Chesapeake Utilities story."

In adjusted diluted EPS

LETTER FROM THE PRESIDENT

Strategically, the FCG acquisition meshes well with our legacy businesses. It also provides an opportunity to drive incremental earnings growth by enlarging our total investment platform. In combination with growth opportunities in our traditional regulated and non-regulated businesses, the addition of FCG gives us confidence that we can sustain our history of top-quartile financial performance. We expect strong organic growth to meet growing customer demand for service at FCG, similar to that of our other regulated gas distribution utilities. Additionally, we see numerous opportunities to leverage our Peninsula Pipeline Company (PPC) intrastate transmission and Marlin compressed natural gas (CNG) transport businesses to support FCG customer growth and meet the increasing demand for gas in South Florida. We are projecting $500 million of capital investment associated with the FCG transaction over the next five years. The incremental FCG-related investment opportunity propels our total capital deployment forecast to $1.5 billion to $1.8 billion over the next five years.

Strategic Intent

At Chesapeake Utilities, we speak frequently about strategic intent, disciplined investment and an unwavering focus on the operational fundamentals that support long-term growth. We have a clear vision of who we are, what we are good at and where we are headed. Our ability to consistently deliver both internal expansion projects and select targeted acquisitions speaks to our robust strategic planning process and ability to successfully execute on opportunities aligned with our strategic objectives, financial discipline and operational capabilities.

When I became president five years ago, there were two things that were top of mind. First, I wanted to expand and refine our long-standing strategic planning process. If Chesapeake Utilities was going to continue to produce top-quartile financial performance, we needed to understand the growth trajectory inherent in our existing businesses and plan accordingly. That led to many interesting conversations. After all, our existing businesses were booming (and they still are). Over the past five years, we have invested approximately $1 billion in those businesses. The Company has produced a five-year EPS growth compound annual growth rate (CAGR) of 8.9% (based upon 2023 Adjusted Diluted EPS of $5.31).*

> *Our Total Shareholder Return over the same period was at the 100th percentile among our peer group.*

Of course, the fundamental growth question was straightforward. In a business designed to deploy capital to serve customers and generate earnings, could our existing businesses indefinitely sustain a level of capital investment that supported top-quartile earnings growth?

Our strategic planning projections indicated excellent growth prospects in our existing businesses. As mentioned above, those projections proved to be accurate over the past five years. In fact, given continued increases in customer demand, in 2023 we increased the investment projections for our legacy Chesapeake Utilities business units through 2028. However, when we looked out over a longer-term planning horizon, it became clear that to sustain our historic earnings performance we would eventually need to add another significant platform for growth.

The second thing on my mind back in 2019 was the need to evolve our business practices to keep pace with a rapidly growing company. Chesapeake Utilities had doubled in size twice in the 10 years since the 2009 acquisition of Florida Public Utilities (FPU). Our projections in 2019 indicated that we could double again by the end of 2023; and we did exactly that. Today, with the acquisition of FCG and the significant growth we continue to achieve in our legacy businesses, there is a distinct possibility of once again repeating that level of growth over the next several years.

*Amount excludes transaction-related expenses associated with the FCG acquisition

Major Growth Initiatives

Many opportunities for expansion exist within our established core distribution and transmission businesses. Below are several projects aimed at fostering growth in the years ahead:

120K+ customers added with FCG acquisition

- **Organic Natural Gas Growth:** Organic growth in our territories outpaced the national average. In 2023, we experienced residential customer growth of 5.4% in our Delmarva service territories and a 3.9% increase in our Florida service territories. Through the FCG acquisition, we added more than 120,000 customers.
- **Largest-Ever Technology-Based Capital Improvement Project:** 1CX, with an expected total investment of more than $50 million, launched in 2023 to improve billing service platforms for our regulated utility customers and employees. Go-live is expected by the end of 2024.
- **Florida Rate Cases:** FCG and FPU both completed rate cases in 2023. The anticipated collective impact is a $31.3 million increase in adjusted gross margin. 2024 is the first full year rates are in effect.
- **Infrastructure Safety and Reliability Programs:** FPU's GUARD program, coupled with FCG's SAFE program, are projected to reach $410 million in capital investment over the next decade. Eastern Shore Natural Gas' (ESNG) capital surcharge program provides a rate recovery mechanism for certain pipeline replacement expenditures and does not include a specific limit on capital investment or time frame. Additionally, our electric storm protection plan and associated cost recovery mechanisms, approved by the Florida Public Service Commission (FPSC) in Q4 2022, resulted in approximately $8 million in capital investment in 2023.

TRANSMISSION PROJECTS

- **Liquefied Natural Gas (LNG) Storage and Peaking Facility:** ESNG filed an application with the Federal Energy Regulatory Commission (FERC) for its $80 million Worcester Resiliency Upgrade in Bishopville, Maryland, to enhance capacity for delivering essential energy services during peak winter heating seasons.
- **PPC Wildlight Community Expansion, Yulee, Florida:** Various phases of this projected $13.4 million capital investment commenced in Q1 2023 and will continue through 2025, with a projected adjusted gross margin of $2.6 million in 2025.
- **ESNG Southern Expansion, Bridgeville, Delaware:** This $14 million capital investment will generate adjusted gross margin of $2.3 million in 2024 and thereafter.
- **PPC Newberry Pipeline Expansion, Newberry, Florida:** This $18.1 million expansion project will bring gas service to the city of Newberry with a projected adjusted gross margin of $0.9 million in 2024 and $2.6 million in 2025.
- **PPC St. Cloud/Twin Lakes Expansion:** This $3.5 million project will expand service in Osceola County, Florida, and support the existing distribution system. Projected adjusted gross margin is $0.6 million in 2024 and beyond.
- **PPC Winter Haven Expansion:** This $3.5 million expansion project is anticipated to generate $0.6 million adjusted gross margin in 2024 and beyond.

OUR REGULATED NATURAL GAS DISTRIBUTION BUSINESSES CONTINUED TO GAIN CUSTOMERS AT MORE THAN TWICE THE NATIONAL AVERAGE, CONTINUALLY EXPANDING OUR SERVICE TERRITORIES.

LETTER FROM THE PRESIDENT

Transformational growth requires transformational capabilities. Successfully managing and operating a company with the dramatic growth we have experienced at Chesapeake Utilities requires an investment in people, processes and technology, along with realignments in organizational structure. At the end of the day, in any organization, it's all about people. If you have a great team, you can do great things. Our growth over the years, and certainly our accomplishments in 2023, reflect a commitment to excellence and the demonstrated capability of Chesapeake Utilities team members throughout our Company. 2023 wasn't an easy year. Coming off two-plus years of COVID pandemic impacts, we were focused on overcoming a warm winter, solving lingering supply chain issues, working through regulatory and commodity pricing uncertainty that impacted the timing of growth projects, navigating a tumultuous economic environment and implementing substantive technology initiatives. When we asked the team to add on the FCG acquisition, it was an opportunity met with enthusiasm and purpose.

We've been intentional about building a strong team. Our focus has been on developing an increasingly engaged group of employees committed to Chesapeake Utilities' strategic objectives and willing to take the actions necessary to drive success. We have worked to eliminate operational silos by simplifying our organizational structure, moving toward greater standardization of our processes, improving technology and increasing collaboration across our businesses. We've brought additional talent and skill sets into the Company, enhanced operational controls and rallied around issues such as safety, inclusion and a customer-centric view of our energy delivery mission.

We also significantly strengthened our balance sheet over the past five years, anticipating that future growth would likely involve financing a substantial acquisition or other major investment. Our equity ratio (equity/total capitalization including short-term debt) moved from 45% at the end of 2018 to 53% at the time we committed to the FCG acquisition. Our performance track record and balance sheet positioned us to take advantage of the FCG opportunity when it became available. The timing wasn't perfect. Interest rates went up and valuations in the utility market were resetting.

Sustainability in Action

Our renewable natural gas (RNG) projects have led to pioneering advancements. Here are some of our RNG projects that demonstrate ingenuity and financial viability:

- **Full Circle Dairy RNG Facility, Lee, Florida,** is a $29.6 million capital investment, which includes a 1MW solar array and a 1.5-mile pipeline for gas distribution. Construction of the facility involved pioneering the creation and deployment of a CNG/RNG-fueled, self-contained irrigation and waste pump directly on the farm. Powered by RNG derived from dairy waste generated on-site, the groundbreaking system not only marks a significant advancement in sustainable agriculture, but also lays the groundwork for future conversions of irrigation and waste pump machinery to RNG/CNG fuel sources. The first injection of RNG from this facility is projected to occur in the first half of 2024.
- **Peninsula Pipeline Company (PPC) Injection Point, Yulee, Florida,** accepts RNG, CNG and liquefied natural gas (LNG) and is our first enhancement of a gate system in Florida that allows for alternative fuels to be injected into the pipeline delivery system. This helps FPU expand service to meet the growing demand in the Wildlight community and surrounding areas.
- **Planet Found Energy Development, LLC (PFED),** purchased in 2022, is undergoing improvements to manufacture RNG that aligns with market standards.
- **ESNG Injection Points** - In December 2023, ESNG received FERC approval for a tariff service enabling the expansion of facilities to inject RNG and/or CNG into specific injection points and create a market for RNG produced at the PFED facility.

THE NEW FACILITY AT FULL CIRCLE DAIRY IN LEE, FLORIDA, IS A $29.6 MILLION CAPITAL INVESTMENT AND A SIGNIFICANT ADVANCEMENT IN SUSTAINABLE AGRICULTURE.

But we have evolved into an organization strong enough to overcome the margin deficits from an abnormally warm 2023 winter, rising interest rates, a significant downturn in utility industry stock prices and the initiation of a large technology project to successfully conclude a transformational acquisition. Excluding the one-time costs related to the FCG acquisition, our 2023 adjusted diluted EPS was $5.31, another record year of earnings.

Through all the growth, the changes in the work environment and our internal business transformation efforts, we have been able to retain the special culture that has marked Chesapeake Utilities' success over the years. Our employee engagement metrics have continued to reach higher levels. We've focused on the things our team has identified as most important: recognition for great work, communication about strategy and the connection of individual jobs to Company objectives and developing employees to succeed in a changing work environment. I'll say it again:

"We have a great team. We all embrace and foster the unique Chesapeake Utilities culture. Our culture is grounded in a solid foundation of regulated businesses, but enhanced by an entrepreneurial, innovative and competitive market mindset applied to everything we do. It's been a successful combination – an intentional strategy."

FLORIDA CITY GAS

Unlocking Opportunities

Going into the FCG acquisition, we clearly understood the economics of the deal. We knew that overcoming the premium paid to acquire this business was going to require a combination of prudent capital investment, operational synergies, cost management across our entire enterprise and proactive regulatory initiatives. We were prepared to manage the Company to achieve 2024 EPS above our 2023 adjusted earnings. We were also targeting to achieve our previously issued EPS guidance level of $6.15 to $6.35 per share for 2025.

The market shift for utilities that occurred at the end of September 2023 posed additional challenges to reaching our guidance range in 2025. Utility stock prices declined at exactly the wrong time for us, although it was great timing for investors who acquired Chesapeake Utilities shares at what turned out to be a significant discount. However, that event did not shake our belief that the FCG transaction continued to be the right set of assets in the right place to help us sustain our top-quartile performance record into the future. The acquisition was consistent with our long-term capital deployment growth strategy. We were confident that the incremental investment opportunities associated with FCG would make a significant contribution to achieving our long-term earnings objectives.

So, we did what we always do at Chesapeake Utilities when things don't go quite according to plan: figure out what it takes to make it work and get on with it.

DORAL OFFICE, FLORIDA CITY GAS; WITH THE ACQUISITION OF FCG, CHESAPEAKE UTILITIES MORE THAN DOUBLED ITS CUSTOMER BASE AND NATURAL GAS INFRASTRUCTURE IN THE STATE OF FLORIDA.

We recalculated our operating income targets and reset the measures needed to meet our guidance commitments. It won't be easy, but there is a clear path to achieving 2024 earnings above our adjusted 2023 earnings and achieving our guidance in 2025. Our entire organization is focused on making this happen. The other thing we are focused on is ensuring our actions over the next two years, especially our capital investments, continue to drive earnings growth in 2026, and the years to follow. Our legacy businesses are strong and growing. The FCG assets are poised to contribute to the incremental growth that will provide top-quartile earnings potential for years to come.

The interesting thing for me is that we've done all this before, more than once. We've doubled the size of our Company three times over the past 15 years, including integrating and subsequently growing another transformational acquisition, the Florida Public Utilities Company in 2009. The work we have ahead of us is nothing new. None of it has been easy, but we always found a way to succeed. As we grew, we never sacrificed performance. We maintained our place among the leading companies in the industry.

Now, we have the opportunity in front of us to transform the Company again. We'll use the same time-tested playbook. Focus on the fundamentals. Provide safe and reliable service to customers. Continue a disciplined approach to investing capital for growth. Proactively work with regulators. Pay attention to our people, processes and technology. Drive value for our shareholders.

It has been an exciting year. The team did a wonderful job overcoming the potential earnings impacts of unfavorable weather and tough economic conditions. The acquisition of Florida City Gas, along with continued customer demand in our legacy businesses, puts us in a position to achieve transformational growth over the next several years. Unlocking opportunities that make us a top performer has been a hallmark of the Chesapeake Utilities story. We've had a great run thus far, with almost unprecedented growth. I think we are just getting started.

Thank you for your interest and trust in Chesapeake Utilities Corporation.

Sincerely,

Jeff Householder
Chair of the Board, President and CEO

STRENGTHENING SHAREHOLDER RETURNS

$5.31
adjusted diluted EPS for 2023, reflecting 5% growth over 2022, and marking the 17th consecutive year of record earnings for the Company.*

$33.9M
adjusted gross margin increase in 2023, representing an 8.1% growth compared to 2022 and marking one of the highest annual increases in our history.

50.2%
operating expenses as a percentage of adjusted gross margin in 2023, a lower percentage than the five-year average (2018-2022), despite the FCG acquisition.

65%
increase in capital expenditure guidance, from $900 million to $1.1 billion (2021-2025) to $1.5 billion to $1.8 billion for the five years ended 2028.

$211M
invested in capital expenditures in 2023, with the Company investing $1.9 billion in new capital investments over the last five years.

$3.3B
in total assets at December 31, 2023, an increase of approximately 50% over 2022.

In 2019, our Company launched a multiyear business transformation initiative aimed at boosting growth and operational efficiency through simplification, standardization, collaboration and automation. As we pursue our growth goals, we prioritize fostering a cohesive one-Company culture based on these principles.

We have undertaken a comprehensive approach to eliminate operational barriers by streamlining our organizational structure, advancing process standardization, enhancing technological capabilities and fostering increased collaboration across our business segments. We have enhanced our talent pool, bringing in additional expertise to strengthen our operational controls while rallying around pivotal issues such as safety, diversity and service excellence.

Our Business Transformation Journey Begins with Safety

Safety has always been a top priority for our Company. We are proud of our long record of safe operations and have consistently earned national safety awards. They represent our commitment to protecting our employees, customers and communities.

With standardization in mind, our senior leadership team reorganized our safety teams and formed an Enterprise Health and Safety (EHS) Team in 2022, under the leadership of risk management. Additionally, our operations safety and damage prevention teams were consolidated under one director.

"Our concern for the safety of employees extends beyond the workplace. We encourage our employees to demonstrate their leadership and excellence in health and safety practices for the benefit of their families, friends and community. An engaged workforce is a key building block for a strong safety culture."

JEFF HOUSEHOLDER, CHAIR OF THE BOARD, PRESIDENT AND CEO

Together, EHS and the operations safety teams have worked to implement an Enterprise Safety Program aligned with ANSI/API Recommended Practice 1173, Pipeline Safety Management Systems.

While Recommended Practice 1173 is geared toward organizations that operate hazardous liquids and gas pipelines, we found this risk-based approach to be applicable across our entire enterprise.

The Enterprise Safety Program is a dynamic strategy driven by data, aligned with the plan-do-check-act cycle and the 10 essential elements of Recommended Practice 1173.

Safety Strategy Key Elements:

- **Leadership and Management Commitment:** A Safety Handbook, including a letter from the CEO, has been introduced to convey the organization's dedication to safety.
- **Stakeholder Engagement:** Initiatives have been launched to improve internal and external communication about safety concerns, welcoming feedback and suggestions.
- **Incident Investigation, Evaluation and Lessons Learned:** A safety data management system (SDMS) has been implemented to streamline incident tracking, provide essential data for safety action plans and facilitate continuous improvement.
- **Safety Assurance:** The SDMS offers robust reporting metrics, including key performance indicators, used to demonstrate risk reduction efforts and guide corrective actions. Monthly safety metric dashboards are shared with employees.
- **Competence Awareness and Training:** Monthly virtual and in-person safety meetings are assigned to all employees, covering various safety topics to enhance safety competence and awareness across the organization. In 2023, 89% of team members attended monthly safety meetings in The Grove Learning Management System.

As part of our transformation strategy, Company culture plays a crucial role, ensuring that our commitment to safety is embraced across the organization.

"We have built an Enterprise Safety Program that focuses on prevention and anticipates hazards before they arise. We approach safety proactively rather than reactively. Our commitment to ensure safety and compliance in our operations and everyday processes has consistently led to industry recognition for our efforts to improve service, reliability and safety."

JEFFREY SYLVESTER, SENIOR VICE PRESIDENT AND CHIEF OPERATING OFFICER

"As part of our commitment, we invest in our workplace health and safety programs. The return on our investment is much more than avoiding workers' compensation costs and regulatory fines. It's about keeping our employees and stakeholders safe."

BETH COOPER, EXECUTIVE VICE PRESIDENT, CHIEF FINANCIAL OFFICER, TREASURER AND ASSISTANT CORPORATE SECRETARY

"At Chesapeake Utilities Corporation, our mission goes beyond simply delivering energy; it's about enhancing the lives of the people and communities we serve. Our mission is achieved by putting people first, doing the right thing even when no one is watching and by holding each other accountable to do the work that makes us better every day."

JAMES MORIARTY, EXECUTIVE VICE PRESIDENT, GENERAL COUNSEL, CORPORATE SECRETARY AND CHIEF POLICY AND RISK OFFICER

SAFETY TOWN IN DOVER, DELAWARE, PROVIDES A STATE-OF-THE-ART TRAINING OPPORTUNITY FOR EMPLOYEES AND FIRST RESPONDERS. A SECOND SAFETY TOWN WILL OPEN IN DEBARY, FLORIDA, IN 2024.

Enriching Our Company Culture

Fostering a culture that attracts, nurtures and retains highly engaged employees is the driving force behind our continued success. It is critical to our mission that every individual understands how their role contributes to Chesapeake Utilities' strategic objectives. We have taken several steps to assess engagement levels and enhance the employee experience.

CREATING A SENSE OF BELONGING AT WORK

Our ongoing commitment to equity, diversity and inclusion (EDI) contributes to enhanced engagement. In 2023, two new employee resource groups (ERGs) were established to expand our diversity and inclusion efforts. One of these groups, Pride, is focused on supporting LGBTQIA+ individuals and allies, while the other group, Green, is dedicated to environmental initiatives. Our 10 ERGs serve as platforms for employees to connect with team members, collaborate on meaningful projects and give back as a collective force to the communities we serve.

Our employees participate in training and education aimed at enhancing awareness and knowledge, nurturing empathy and encouraging understanding among individuals with diverse backgrounds and experiences.

These programs play a vital role in creating and strengthening a diverse and inclusive workforce while ensuring that EDI principles are an integral part of our Company culture.

TURNING EMPLOYEE FEEDBACK INTO AN ACTION PLAN

Assessing employee engagement levels helps us retain a highly engaged team. In October 2023, we conducted our third Chesapeake Speaks Gallup engagement survey and continue to see improvement in participation (93%) and survey results.

CHESAPEAKE CONNECTIONS
CONNECTING US FORWARD

Launched in 2023, the Chesapeake Connections Program pairs every new employee with a "connector," someone from a different department who fosters a welcoming environment from their first day of employment with the Company. Connectors help new employees understand our one-Company culture and build relationships outside of their immediate work groups.

THE 1CX TEAM BRINGS TOGETHER PEOPLE FROM CHESAPEAKE UTILITIES, IBM AND SAP TO LAUNCH OUR MOST COMPREHENSIVE TECHNOLOGY-DRIVEN BUSINESS TRANSFORMATION PROJECT TO DATE.

In previous years, our employees indicated they wanted to see enhancements in three key areas: employee recognition, training and development and clear and consistent communications at all levels of the organization. In response to these findings, we implemented several successful initiatives that led to increased engagement scores:

- **Management Pods:** To enhance strategic thinking and improve collaboration between our operations and support teams, we established a series of management pods dedicated to our primary business segments: regulated north, regulated south, propane, Aspire Energy and Marlin Gas Services. By establishing these cross-functional teams, we encourage strategic thinking, facilitate robust communication and foster collaboration that drives innovation and efficiency across the organization.
- **Gratitude:** This virtual employee recognition platform enables team members to give kudos and show appreciation for one another in a digital forum. Since its launch in early 2023, employees have shared over 19,000 notes of appreciation, encouragement and recognition for outstanding job performance.
- **The Grove Learning Management System:** As part of our efforts to provide more opportunities for training and career path development, we launched this one-stop online course management tool. The Grove offers a wide range of courses that cover all aspects of Chesapeake Utilities' operations. In 2023, team members completed nearly 24,000 hours of training on various topics of interest.
- **Connect Every Employee Initiative:** As part of our commitment to improving communication across the organization, we launched an initiative to assess every frontline and office employee's ability to access critical information. We conducted surveys, held individual and group meetings with leaders and organized interdepartmental focus groups to gather feedback on the accessibility of Company messaging and technology.

Enhancing the Customer Experience Through Technology

We have improved customer service levels through process improvements and technology upgrades.

Some examples include:

- Fewer steps are needed to start new energy service for a customer
- Customer communications were improved using Americans with Disabilities Act (ADA) recommendations to ensure accessibility for all individuals
- Consolidation of multiple legacy phone systems into a new simplified system

These process enhancements and upgrades have resulted in measurable improvements, as evidenced by customer feedback and satisfaction scores.

1CX SIMPLIFY • ENGAGE • TRANSFORM

As the energy industry continues its rapid evolution, we firmly believe that companies dedicated to delivering exceptional customer service will be best poised for success. In 2023, we initiated our most ambitious technology-driven business transformation project to date – 1CX.

This project is geared toward enhancing Chesapeake Utilities' service platforms for both our regulated utility customers and employees. By implementing an SAP customer information system (CIS) in collaboration with IBM, a leading integrator, we aim to streamline processes, enhance data accuracy and elevate the overall customer experience. We are scheduled to go live with this system by the end of 2024 and be ready to deliver exceptional customer service while transforming our business to meet our growing customer base.

LOOKING TO THE FUTURE

THE 11.5-ACRE FCG LNG STORAGE FACILITY IN HOMESTEAD, FLORIDA, DELIVERS RELIABLE NATURAL GAS TO CUSTOMERS DURING WEATHER EMERGENCIES AND PEAK DEMAND PERIODS.

$1.9B
invested
in capital expenditures

Over the last five years, we've invested $1.9 billion in capital expenditures, encompassing both organic growth and acquisitions. We do not expect to slow down any time soon. We anticipate substantial capital investment associated with our latest acquisition, FCG, over the next five years — approximately $500 million. Our capital expenditure guidance for 2024-2028 stands at $1.5 billion to $1.8 billion, marking a 65% increase from our previous guidance updated in February 2023.

KEY DRIVERS OF OUR INVESTMENT PLAN INCLUDE:

- Enhance distribution systems to accommodate our growing customer base and ensure safety and reliability, spanning both legacy distribution systems and opportunities stemming from the FCG acquisition.
- Expand gas transmission pipelines to support utility systems, cater to large users and uphold safety and reliability, with a focus on pipeline opportunities arising from the FCG acquisition.
- Invest in technology beyond our 1CX project to streamline processes, support enterprise resource planning and drive other software enhancements necessary to foster growth and build capacity.
- Nurture our unregulated operating businesses to facilitate sustained growth and generate continued higher than regulated, allowed returns.
- Make sustainable energy investments, such as pipelines and interconnects, to create a pathway to market for sustainable fuels.

We are well underway. We've launched a significant technology improvement project, commenced business transformation initiatives (focused on safety, employee engagement and customer experience), and strategically incorporated the FCG acquisition into our portfolio. This acquisition aligns seamlessly with our legacy businesses, all of which offer opportunities for incremental earnings growth, expanding our investment platform.

We consistently emphasize our strategic intent and disciplined investment while focusing on operational fundamentals. Our clear vision and execution capabilities underpin our skill in delivering major growth projects and targeted acquisitions in alignment with our objectives, financial discipline and operational proficiency. Our new FCG unit, combined with growth prospects in our regulated and non-regulated businesses, position us well to continue to maintain top-quartile financial performance and generate increased shareholder value.

CHESAPEAKE UTILITIES CORPORATION

FORM 10-K

YEAR ENDED DECEMBER 31, 2023

TABLE OF CONTENTS

GLOSSARY OF DEFINITIONS

ASC: Accounting Standards Codification issued by the FASB

Adjusted Gross Margin: a non-GAAP measure calculated by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements

Aspire Energy: Aspire Energy of Ohio, LLC, a wholly-owned subsidiary of Chesapeake Utilities

Aspire Energy Express: Aspire Energy Express, LLC, a wholly-owned subsidiary of Chesapeake Utilities

ASU: Accounting Standards Update issued by the FASB

ATM: At-the-market

CDC: U.S. Centers for Disease Control and Prevention

CDD: Cooling Degree-Day

CFG: Central Florida Gas Company, a division of Chesapeake Utilities

Chesapeake or Chesapeake Utilities: Chesapeake Utilities Corporation, its divisions and subsidiaries, as appropriate in the context of the disclosure

CHP: Combined Heat and Power Plant

Company: Chesapeake Utilities Corporation, its divisions and subsidiaries, as appropriate in the context of the disclosure

CNG: Compressed natural gas

Degree-day: Measure of the variation in the weather based on the extent to which the average daily temperature (from 10:00 am to 10:00 am) falls above (CDD) or below (HDD) 65 degrees Fahrenheit

Delmarva Peninsula: A peninsula on the east coast of the U.S. occupied by Delaware and portions of Maryland and Virginia

Diversified Energy: an entity from whom we acquired certain propane operating assets in North Carolina, South Carolina, Virginia, and Pennsylvania

DRIP: Dividend Reinvestment and Direct Stock Purchase Plan

Dt(s): Dekatherm(s), which is a natural gas unit of measurement that includes a standard measure for heating value

Dts/d: Dekatherms per day

Eastern Shore: Eastern Shore Natural Gas Company, a wholly-owned subsidiary of Chesapeake Utilities

Eight Flags: Eight Flags Energy, LLC, a wholly-owned subsidiary of Chesapeake Utilities

Elkton Gas: Elkton Gas Company, a wholly-owned subsidiary of Chesapeake Utilities

ESG: Environmental, Social and Governance

FASB: Financial Accounting Standards Board

FCG or Florida City Gas: Pivotal Utility Holdings, Inc., doing business as Florida City Gas, a wholly-owned subsidiary of Chesapeake Utilities that was acquired from Florida Power & Light Company on November 30, 2023

FERC: Federal Energy Regulatory Commission

FGT: Florida Gas Transmission Company

Florida Natural Gas: Refers to the Company's legacy Florida natural gas distribution operations (excluding FCG) that were consolidated under FPU, for both rate-making and operations purposes

Florida OPC: The Office of Public Counsel, an agency established by the Florida legislature who advocates on behalf of Florida's utility consumers prior to actions or rule changes

FPU: Florida Public Utilities Company, a wholly-owned subsidiary of Chesapeake Utilities

GAAP: Generally Accepted Accounting Principles

GRIP: Gas Reliability Infrastructure Program

Gross Margin: a term under U.S. GAAP which is the excess of sales over costs of goods sold

GUARD: Gas Utility Access and Replacement Directive, a program to enhance the safety, reliability and accessibility of portions of the Company's natural gas distribution system in Florida

Guernsey Power Station: Guernsey Power Station, LLC, a power generation facility in Guernsey County Ohio

Gulfstream: Gulfstream Natural Gas System, LLC, an unaffiliated pipeline network that supplies natural gas to FPU

HDD: Heating Degree-Day

LNG: Liquefied Natural Gas

Marlin Gas Services: Marlin Gas Services, LLC, a wholly-owned subsidiary of Chesapeake Utilities

MetLife: MetLife Investment Advisors, an institutional debt investment management firm, with which we have previously issued Senior Notes and which is a party to the current MetLife Shelf Agreement, as amended

MGP: Manufactured gas plant, which is a site where coal was previously used to manufacture gaseous fuel for industrial, commercial and residential use

MW: Megawatt, which is a unit of measurement for electric power or capacity

NOL: Net operating loss(es)

Peninsula Pipeline: Peninsula Pipeline Company, Inc., a wholly-owned subsidiary of Chesapeake Utilities

Peoples Gas: Peoples Gas System, an Emera Incorporated subsidiary

PHMSA: United States Department of Transportation Pipeline and Hazardous Materials Safety Administration

Prudential: Prudential Investment Management Inc., an institutional investment management firm, with which we have previously issued Senior Notes and which is a party to the current Prudential Shelf Agreement, as amended

PSC: Public Service Commission, which is the state agency that regulates utility rates and/or services in certain of our jurisdictions

Revolver: Our $375.0 million unsecured revolving credit facility with certain lenders

RNG: Renewable natural gas

Sandpiper Energy: Sandpiper Energy, Inc., a wholly-owned subsidiary of Chesapeake Utilities

SAFE: Safety, Access, and Facility Enhancement, a program to enhance the safety, reliability and accessibility of portions of the FCG's natural gas distribution system

SEC: Securities and Exchange Commission

Senior Notes: Our unsecured long-term debt issued primarily to insurance companies on various dates

Sharp: Sharp Energy, Inc., a wholly-owned subsidiary of Chesapeake Utilities

Shelf Agreement: An agreement entered into by Chesapeake Utilities and a counterparty pursuant to which Chesapeake Utilities may request that the counterparty purchase our unsecured senior debt with a fixed interest rate and a maturity date not to exceed 20 years from the date of issuance

Shelf Notes: Unsecured senior promissory notes issuable under the Shelf Agreement executed with various counterparties

SICP: Stock and Incentive Compensation Plan, which as used herein covers stock-based compensation awards issued under the current 2023 plan and the previous 2013 plan

SOFR: Secured Overnight Financing Rate, a secured interbank overnight interest rate established as an alternative to LIBOR

TCJA: Tax Cuts and Jobs Act enacted on December 22, 2017

TETLP: Texas Eastern Transmission, LP, an interstate pipeline interconnected with Eastern Shore's pipeline

Transco: Transcontinental Gas Pipe Line Company, LLC

U.S.: The United States of America

PART I

References in this document to "Chesapeake," "Chesapeake Utilities," the "Company," "we," "us" and "our" mean Chesapeake Utilities Corporation, its divisions and/or its subsidiaries, as appropriate in the context of the disclosure.

Safe Harbor for Forward-Looking Statements

We make statements in this Annual Report on Form 10-K (this "Annual Report") that do not directly or exclusively relate to historical facts. Such statements are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. One can typically identify forward-looking statements by the use of forward-looking words, such as "project," "believe," "expect," "anticipate," "intend," "plan," "estimate," "continue," "potential," "forecast" or other similar words, or future or conditional verbs such as "may," "will," "should," "would" or "could." These statements represent our intentions, plans, expectations, assumptions and beliefs about future financial performance, business strategy, projected plans and objectives of the Company. Forward-looking statements speak only as of the date they are made or as of the date indicated and we do not undertake any obligation to update forward-looking statements as a result of new information, future events or otherwise. These statements are subject to many risks and uncertainties. In addition to the risk factors described under *Item 1A, Risk Factors*, the following important factors, among others, could cause actual future results to differ materially from those expressed in the forward-looking statements:

- state and federal legislative and regulatory initiatives that affect cost and investment recovery, have an impact on rate structures, and affect the speed and the degree to which competition enters the electric and natural gas industries;
- the outcomes of regulatory, environmental and legal matters, including whether pending matters are resolved within current estimates and whether the related costs are adequately covered by insurance or recoverable in rates;
- the impact of climate change, including the impact of greenhouse gas emissions or other legislation or regulations intended to address climate change;
- the impact of significant changes to current tax regulations and rates;
- the timing of certification authorizations associated with new capital projects and the ability to construct facilities at or below estimated costs, and within estimated timeframes;
- changes in environmental and other laws and regulations to which we are subject and environmental conditions of property that we now, or may in the future, own or operate;
- possible increased federal, state and local regulation of the safety of our operations;
- the availability and reliability of adequate technology, including our ability to adapt to technological advances, effectively implement new technologies and manage the related costs;
- the inherent hazards and risks involved in transporting and distributing natural gas, electricity and propane;
- the economy in our service territories or markets, the nation, and worldwide, including the impact of economic conditions (which we do not control) on demand for natural gas, electricity, propane or other fuels;
- risks related to cyber-attacks or cyber-terrorism that could disrupt our business operations or result in failure of information technology systems or result in the loss or exposure of confidential or sensitive customer, employee or Company information;
- issues relating to the responsible use of our technologies, including artificial intelligence;
- adverse weather conditions, including the effects of hurricanes, ice storms and other damaging weather events;
- customers' preferred energy sources;
- industrial, commercial and residential growth or contraction in our markets or service territories;
- the effect of competition on our businesses from other energy suppliers and alternative forms of energy;
- the timing and extent of changes in commodity prices and interest rates;
- the effect of spot, forward and future market prices on our various energy businesses;
- the extent of our success in connecting natural gas and electric supplies to our transmission systems, establishing and maintaining key supply sources, and expanding natural gas and electric markets;
- the creditworthiness of counterparties with which we are engaged in transactions;
- the capital-intensive nature of our regulated energy businesses;
- our ability to access the credit and capital markets to execute our business strategy, including our ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings and general economic conditions;
- the ability to successfully execute, manage and integrate a merger, acquisition or divestiture of assets or businesses and the related regulatory or other conditions associated with the merger, acquisition or divestiture;
- the impact on our costs and funding obligations, under our pension and other post-retirement benefit plans, of potential downturns in the financial markets, lower discount rates, and costs associated with health care legislation and regulation;
- the ability to continue to hire, train and retain appropriately qualified personnel;

- the availability of, and competition for, qualified personnel supporting our natural gas, electricity and propane businesses;
- the effect of accounting pronouncements issued periodically by accounting standard-setting bodies; and
- the impacts associated with a pandemic, including the duration and scope of the pandemic, the corresponding impact on our supply chains, our personnel, our contract counterparties, general economic conditions and growth, the financial markets and any costs to comply with governmental mandates.

ITEM 1. Business.

Corporate Overview and Strategy

Chesapeake Utilities Corporation is a Delaware corporation formed in 1947 with operations primarily in the Mid-Atlantic region, North Carolina, South Carolina, Florida and Ohio. We are an energy delivery company engaged in the distribution of natural gas, electricity and propane, the transmission of natural gas, the generation of electricity and steam, and in providing related services to our customers. Our strategy is focused on growing earnings from a stable regulated energy delivery foundation and investing in related businesses and services that provide opportunities for returns greater than traditional utility returns. We seek to identify and develop opportunities across the energy value chain, with emphasis on midstream and downstream investments that are accretive to earnings per share, consistent with our long-term growth strategy and create opportunities to continue our record of higher-than-authorized regulated returns. The Company's growth strategy includes the continued investment and expansion of the Company's regulated operations that provide a stable base of earnings, as well as investments in other related non-regulated businesses and services including sustainable investments, such as renewable natural gas. By investing in these related businesses and services, the Company creates opportunities to sustain its track record of higher returns, as compared to a traditional utility.

Currently, the Company's growth strategy is focused on the following platforms, including:

- Optimizing the earnings growth in our existing businesses, which includes organic growth, strategic and complimentary acquisitions, territory expansions, and new products and services as well as increased opportunities to transform the Company with a focus on people, process, technology and organizational structure.
- Identification and pursuit of additional pipeline expansions, including new interstate and intrastate transmission projects.
- Growth of Marlin Gas Services' CNG transport business and expansion into LNG and RNG transport services as well as methane capture.
- Identifying and undertaking additional strategic propane acquisitions that provide a larger foundation in current markets and expand our brand and presence into new strategic growth markets.
- Pursuit of growth opportunities that enable us to utilize our integrated set of energy delivery businesses to participate in sustainable energy investments.

Operating Segments

We conduct operations within two reportable segments: Regulated Energy and Unregulated Energy. The remainder of our operations is presented as "Other businesses and eliminations." These segments are described below in detail.

Regulated Energy

Overview

Our regulated energy businesses are comprised of natural gas and electric distribution, as well as natural gas transmission services.

On November 30, 2023, we completed the acquisition of FCG for $923.4 million in cash, including working capital adjustments as defined in the agreement, pursuant to the previously disclosed stock purchase agreement with Florida Power & Light Company. Upon completion of the acquisition, FCG became a wholly-owned subsidiary of the Company and is included within our Regulated Energy segment. FCG serves approximately 120,000 residential and commercial natural gas customers across eight counties in Florida, including Miami-Dade, Broward, Brevard, Palm Beach, Hendry, Martin, St. Lucie and Indian River. Its natural gas system includes approximately 3,800 miles of distribution main and 80 miles of transmission pipe. Results for FCG are included within our consolidated results from the acquisition date.

The following table presents net income for the year ended December 31, 2023 and total assets as of December 31, 2023, by operation and area served:

Operation *(in thousands)*	Areas Served	Net Income (Loss)	Total Assets
Natural Gas Distribution			
Delmarva Natural Gas [(1)]	Delaware/Maryland	$ 9,256	$ 407,089
Florida Natural Gas [(2)]	Florida	23,840	545,952
Florida City Gas [(3)]	Florida	(3,256)	1,010,998
Natural Gas Transmission			
Eastern Shore	Delaware/Maryland/ Pennsylvania	23,284	480,147
Peninsula Pipeline	Florida	12,195	154,301
Aspire Energy Express	Ohio	417	6,746
Electric Distribution			
FPU	Florida	3,727	176,348
Total Regulated Energy		$ 69,463	$ 2,781,581

[(1)] Delmarva Natural Gas consists of Delaware division, Maryland division, Sandpiper Energy and Elkton Gas

[(2)] In accordance with the Florida PSC approval of our natural gas base rate proceeding, effective March 1, 2023, our natural gas distribution business in Florida (FPU, FPU-Indiantown division, FPU-Fort Meade division and Chesapeake Utilities' CFG division) have been consolidated and amounts are now being presented on a consolidated basis consistent with the final rate order

[(3)] FCG net income (loss) includes results from the acquisition date, including transaction-related expenses attributable to the acquisition For additional information on FCG's results, see discussion under *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations.*

Revenues in the Regulated Energy segment are based on rates regulated by the PSC in the states in which we operate or, in the case of Eastern Shore, which is an interstate business, by the FERC. The rates are designed to generate revenues to recover all prudent operating and financing costs and provide a reasonable return for our stockholders. Each of our distribution and transmission operations has a rate base, which generally consists of the original cost of the operation's plant (less accumulated depreciation), working capital and other assets. For Delmarva Natural Gas and Eastern Shore, rate base also includes deferred income tax liabilities and other additions or deductions. The Florida Natural Gas regulated energy operations do not include deferred income tax liabilities in their rate base.

Our natural gas and electric distribution operations bill customers at standard rates approved by their respective state PSC. Each state PSC allows us to negotiate rates, based on approved methodologies, for large customers that can switch to other fuels. Some of our customers in Maryland receive propane through underground distribution systems in Worcester County. We bill these customers under PSC-approved rates and include them in the natural gas distribution results and customer statistics.

Our natural gas and electric distribution operations earn profits on the delivery of natural gas or electricity to customers. The cost of natural gas or electricity that we deliver is passed through to customers under PSC-approved fuel cost recovery mechanisms. The mechanisms allow us to adjust our rates on an ongoing basis without filing a rate case to recover changes in the cost of the natural gas and electricity that we purchase for customers. Therefore, while our distribution operating revenues fluctuate with the cost of natural gas or electricity we purchase, our distribution adjusted gross margin is generally not impacted by fluctuations in the cost of natural gas or electricity.

Our natural gas transmission operations bill customers under rate schedules approved by the FERC or at rates negotiated with customers.

Operational Highlights

The following table presents operating revenues, volumes and the average number of customers by customer class for our natural gas and electric distribution operations for the year ended December 31, 2023:

	Delmarva Natural Gas Distribution		Florida Natural Gas Distribution [1]		Florida City Gas Distribution [2]		FPU Electric Distribution	
Operating Revenues ***(in thousands)***								
Residential	$ 87,709	62 %	$ 50,792	30 %	$ 5,042	42 %	$ 49,542	50 %
Commercial and Industrial	54,261	38 %	108,913	65 %	5,872	49 %	52,047	52 %
Other [3]	(997)	<(1)%	8,655	5 %	1,159	9 %	(2,115)	(2)%
Total Operating Revenues	$ 140,973	100 %	$ 168,360	100 %	$ 12,073	100 %	$ 99,474	100 %
Volumes ***(in Dts for natural gas/MW Hours for electric)***								
Residential	4,389,934	29 %	2,081,045	5 %	157,884	10 %	300,118	44 %
Commercial and Industrial	10,230,662	69 %	41,498,921	94 %	940,028	57 %	384,306	56 %
Other	293,186	2 %	627,934	1 %	549,132	33 %	—	— %
Total Volumes	14,913,782	100 %	44,207,900	100 %	1,647,044	100 %	684,424	100 %
Average Number of Customers [4]								
Residential	97,666	92 %	88,384	91 %	112,585	93%	25,719	78 %
Commercial and Industrial	8,246	8 %	8,415	9 %	8,587	7%	7,372	22 %
Other	23	<1%	6	<1%	6	<1%	—	— %
Total Average Number of Customers	105,935	100 %	96,805	100 %	121,178	100 %	33,091	100 %

(1) In accordance with the Florida PSC approval of our natural gas base rate proceeding, effective March 1, 2023, our natural gas distribution business in Florida (FPU, FPU-Indiantown division, FPU-Fort Meade division and Chesapeake Utilities' CFG division) have been consolidated and amounts are now being presented on a consolidated basis consistent with the final rate order.
(2) Operating revenues and volumes for FCG include amounts from the acquisition date. Customer totals for FCG reflect actual amounts at December 31, 2023 since the period from the acquisition covered only one month. For additional information on FCG's results, see discussion under *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations.*
(3) Operating Revenues from "Other" sources include revenue, unbilled revenue, under (over) recoveries of fuel cost, conservation revenue, other miscellaneous charges, fees for billing services provided to third parties, and adjustments for pass-through taxes.
(4) Average number of customers is based on the twelve-month average for the year ended December 31, 2023.

The following table presents operating revenues, by customer type, for Eastern Shore and Peninsula Pipeline for the year ended December 31, 2023, as well as contracted firm transportation capacity by customer type, and design day capacity at December 31, 2023. Aspire Energy Express has been excluded from the table below and had operating revenue of $1.5 million and firm transportation capacity of 300,000 Dts/d for the year ended December 31, 2023:

	Eastern Shore		Peninsula Pipeline	
Operating Revenues ***(in thousands)***				
Local distribution companies - affiliated [1]	$ 34,050	43 %	$ 24,324	80 %
Local distribution companies - non-affiliated	22,163	28 %	2,449	8 %
Commercial and industrial - affiliated	—	— %	1,651	5 %
Commercial and industrial - non-affiliated	23,439	29 %	534	2 %
Other [2]	271	<1%	1,442	5 %
Total Operating Revenues	$ 79,923	100 %	$ 30,400	100 %
Contracted firm transportation capacity ***(in Dts/d)***				
Local distribution companies - affiliated	160,595	51 %	351,976	39 %
Local distribution companies - non-affiliated	56,576	18 %	534,825	59 %
Commercial and industrial - affiliated	—	— %	8,300	1 %
Commercial and industrial - non-affiliated	98,540	31 %	5,100	1 %
Total Contracted firm transportation capacity	315,711	100 %	900,201	100 %
Design day capacity ***(in Dts/d)***	315,711	100 %	900,201	100 %

(1) Eastern Shore's and Peninsula Pipeline's service to our local distribution affiliates is based on the respective regulator's approved rates and is an integral component of the cost associated with providing natural gas supplies to the end users of those affiliates. We eliminate operating revenues of these entities against the natural gas costs of those affiliates in our consolidated financial information; however, our local distribution affiliates include this amount in their purchased fuel cost and recover it through fuel cost recovery mechanisms.
(2) Operating revenues from "Other" sources are from the rental of gas properties.

Regulatory Overview

The following table highlights key regulatory information for each of our principal Regulated Energy operations. Peninsula Pipeline and Aspire Energy Express are not regulated with regard to cost of service by either the Florida PSC or Ohio PUC respectively, or the FERC and are therefore excluded from the table. See Item 8, *Financial Statements and Supplementary Data* (Note 18, *Rates and Other Regulatory Activities*, in the consolidated financial statements) for further discussion on the impact of this legislation on our regulated businesses.

	Natural Gas Distribution							
	Delmarva				Florida		Electric Distribution	Natural Gas Transmission

(1) In January 2024, our natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. The outcome of the application is subject to review and approval by the Maryland PSC.

(2) The rate increase and allowed return on equity for Elkton Gas were approved by the Maryland PSC before we acquired the company.

(3) The Maryland PSC approved a declining return on equity.

(4) Other components of capital structure include customer deposits, deferred income taxes and tax credits.

(5) Allowed after-tax return on equity.

(6) The terms of the agreement include revenue neutral rates for the first year (December 1, 2016 through November 30, 2017), followed by a schedule of rate reductions in subsequent years based upon the projected rate of propane to natural gas conversions.

(7) The terms of the settlement agreement for the FPU electric division limited proceeding with the Florida PSC prescribed an authorized return on equity range of 9.25 to 11.25 percent, with a mid-point of 10.25 percent.

* LTD-Long-term debt, STD-Short-term debt.

In May 2022, our legacy natural gas distribution businesses filed a consolidated natural gas rate case with the Florida PSC. The application included a request for the following: (i) permanent rate relief of approximately $24.1 million, effective January 1, 2023; (ii) a depreciation study also submitted with the filing; (iii) authorization to make certain changes to tariffs to include the consolidation of rates and rate structure across the businesses and to unify the Florida natural gas distribution businesses under FPU; (iv) authorization to retain the acquisition adjustment recorded at the time of the FPU merger in our revenue requirement; and (v) authorization to establish an environmental remediation surcharge for the purposes of addressing future expected remediation costs for FPU MGP sites. In August 2022, interim rates were approved by the Florida PSC in the amount of approximately $7.7 million on an annualized basis, effective for all meter readings in September 2022. The discovery process and subsequent hearings were concluded during the fourth quarter of 2022 and briefs were submitted in the same quarter of 2022. In January 2023, the Florida PSC approved the application for consolidation and permanent rate relief of approximately $17.2 million on an annual basis. Actual rates in connection with the rate relief were approved by the Florida PSC in February 2023 with an effective date of March 1, 2023.

In May 2022, FCG filed a general base rate increase with the Florida PSC based on a projected 2023 test year. In June 2023, the Florida PSC issued an order approving a single total base revenue increase of $23.3 million (which included an incremental increase of $14.1 million, a previously approved increase of $3.8 million for a liquefied natural gas facility, and $5.3 million to transfer the SAFE investments from a rider clause to base rates), with new rates becoming effective as of May 1, 2023. The Commission also approved FCG's proposed reserve surplus amortization mechanism ("RSAM") with a $25.0 million reserve amount, continuation and expansion of the capital SAFE program, implementation of an automated metering infrastructure pilot, and continuation of the storm damage reserve with a target reserve of $0.8 million. On June 23, 2023, the Florida OPC filed a motion for reconsideration of the PSC's approval of RSAM, which was denied on September 12, 2023. On July 7, 2023, the Florida OPC filed a notice of appeal with the Florida Supreme Court, which is pending.

The following table presents surcharge and other mechanisms that have been approved by the respective PSC for our regulated energy distribution businesses. These include: Delaware surcharges to expand natural gas service in its service territory as well as for the conversion of propane distribution systems to natural gas; Maryland's surcharges to fund natural gas conversions and system improvements in Worcester County; Elkton's Strategic Infrastructure Development and Enhanced (STRIDE) plan for accelerated pipeline replacement for older portions of the natural gas distribution system; Florida's GRIP surcharge which provides accelerated recovery of the costs of replacing older portions of the natural gas distribution system to improve safety and reliability; FCG's SAFE surcharge which provides accelerated recovery of the costs of replacing older portions of that natural gas distribution system to improve safety and reliability; and the Florida electric distribution operation's limited proceeding which allowed recovery of storm-related costs.

Operation(s)/Division(s)	Jurisdiction	Infrastructure mechanism	Revenue normalization
Delaware division	Delaware	Yes	No
Maryland division	Maryland	No	Yes
Sandpiper Energy	Maryland	Yes	Yes
Elkton Gas	Maryland	Yes	Yes
Florida Natural Gas	Florida	Yes	No
Florida City Gas [(1)]	Florida	Yes	No
FPU electric division	Florida	Yes	No

[(1)] See Item 8, *Financial Statements and Supplementary Data*, Note 18, *Rates and Other Regulatory Activities*, for additional information related to FCG's RSAM that was approved as part of its rate case effective as of May 1, 2023.

Weather

Weather variations directly influence the volume of natural gas and electricity sold and delivered to residential and commercial customers for heating and cooling and changes in volumes delivered impact the revenue generated from these customers. Natural gas volumes are highest during the winter months, when residential and commercial customers use more natural gas for heating. Demand for electricity is highest during the summer months, when more electricity is used for cooling. We measure the relative impact of weather using degree-days. A degree-day is the measure of the variation in the weather based on the extent to which the average daily temperature falls above or below 65 degrees Fahrenheit. Each degree of temperature below 65 degrees Fahrenheit is counted as one heating degree-day, and each degree of temperature above 65 degrees Fahrenheit is counted as one cooling degree-day. Normal heating and cooling degree-days are based on the most recent 10-year average.

Competition

Natural Gas Distribution

While our natural gas distribution operations do not compete directly with other distributors of natural gas for residential and commercial customers in our service areas, we do compete with other natural gas suppliers and alternative fuel providers for sales to industrial customers. Large customers could bypass our natural gas distribution systems and connect directly to intrastate or interstate transmission pipelines, and we compete in all aspects of our natural gas business with alternative energy sources, including electricity, oil, propane and renewables. The most effective means to compete against alternative fuels are lower prices, superior reliability and flexibility of service. Natural gas historically has maintained a price advantage in the residential, commercial and industrial markets, and reliability of natural gas supply and service has been excellent. In addition, we provide flexible pricing to our large customers to minimize fuel switching and protect these volumes and their contributions to the profitability of our natural gas distribution operations.

Natural Gas Transmission

Our natural gas transmission business competes with other interstate and intrastate pipeline companies to provide service to large industrial, generation and distribution customers, primarily in the northern portion of the Delmarva Peninsula and in Florida. Our transmission business in Ohio, Aspire Energy Express, services one customer, Guernsey Power Station, to which it is the sole supplier.

Electric Distribution

While our electric distribution operations do not compete directly with other distributors of electricity for residential and commercial customers in our service areas, we do compete with other electricity suppliers and alternative fuel providers for sales to industrial customers. Some of our large industrial customers may be capable of generating their own electricity, and we structure rates, service offerings and flexibility to retain these customers in order to retain their business and contributions to the profitability of our electric distribution operations.

Supplies, Transmission and Storage

Natural Gas Distribution

Our natural gas distribution operations purchase natural gas from marketers and producers and maintain contracts for transportation and storage with several interstate pipeline companies to meet projected customer demand requirements. We believe that our supply and capacity strategy will adequately meet our customers' needs over the next several years and we will continue to adapt our supply strategy to meet projected growth in customer demand within our service territories.

The Delmarva natural gas distribution systems are directly connected to Eastern Shore's pipeline, which has connections to other pipelines that provide us with transportation and storage. These operations can also use propane-air and liquefied natural gas peak-shaving equipment to serve customers. Our Delmarva Peninsula natural gas distribution operations maintain asset management agreements with a third party to manage their natural gas transportation and storage capacity. The current agreements were effective as of April 1, 2023 and expire in March 2026. Our Delmarva operations receive a fee, which we share with our customers, from the asset manager, who optimizes the transportation, storage and natural gas supply for these operations.

Our Florida Natural Gas distribution business uses Peninsula Pipeline and Peoples Gas to transport natural gas where there is no direct connection with FGT. FPU natural gas distribution and Eight Flags entered into separate 10-year asset management agreements with Emera Energy Services, Inc. to manage their natural gas transportation capacity, each of which expires in November 2030. An agreement with Florida Southeast Connection LLC for additional service to Palm Beach County is also in place for an initial term through December 2044. FCG utilizes FGT and Peninsula Pipeline to transport natural gas.

A summary of our pipeline capacity contracts follows:

Division	Pipeline	Maximum Daily Firm Transportation Capacity (Dts)	Contract Expiration Date
Delmarva Natural Gas Distribution	Eastern Shore	160,595	2024-2035
	Columbia Gas [(1)]	5,246	2024-2026
	Transco [(1)]	30,419	2024-2028
	TETLP [(1)]	50,000	2027
Florida Natural Gas	Gulfstream [(2)]	10,000	2032
	FGT	47,409 - 78,817	2025-2041
	Peninsula Pipeline	346,200	2033-2048
	Peoples Gas	12,160	2024
	Florida Southeast Connection LLC	5,000	2044
	Southern Natural Gas Company	1,500	2029
Florida City Gas	FGT	32,235 - 68,955	2030
	Peninsula Pipeline	15,000	2033 - 2043

(1) Transco, Columbia Gas and TETLP are interstate pipelines interconnected with Eastern Shore's pipeline.
(2) Pursuant to a capacity release program approved by the Florida PSC, all of the capacity under this agreement has been released to various third parties. Under the terms of these capacity release agreements, Chesapeake Utilities is contingently liable to Gulfstream should any party, that acquired the capacity through release, fail to pay the capacity charge.

Eastern Shore has three agreements with Transco for a total of 7,292 Dts/d of firm daily storage injection and withdrawal entitlements and total storage capacity of 288,003 Dts. These agreements expire in March 2028. Eastern Shore retains these firm storage services in order to provide swing transportation service and firm storage service to customers requesting such services.

Aspire Energy Express, our Ohio intrastate pipeline subsidiary, entered into a precedent agreement to provide natural gas transportation capacity to Guernsey Power Station, who completed construction of its power generation facility in Guernsey County, Ohio in January 2023. Aspire Energy Express completed construction of the gas transmission facilities in the fourth quarter of 2021 and began billing for transportation services in the first quarter of 2022.

Electric Distribution

Our Florida electric distribution operation purchases wholesale electricity under the power supply contracts summarized below:

Area Served by Contract	Counterparty	Contracted Amount (MW)	Contract Expiration Date
Northwest Florida	Gulf Power Company	Full Requirement*	2026
Northeast Florida	Florida Power & Light Company	Full Requirement*	2026
Northeast Florida	Eight Flags	21	2036
Northeast Florida	Rayonier	1.7 to 3.0	2036
Northeast Florida	WestRock Company	As-available	N/A

*The counter party is obligated to provide us with the electricity to meet our customers' demand, which may vary.

Unregulated Energy

Overview

The following table presents net income for the year ended December 31, 2023 and total assets as of December 31, 2023, for our Unregulated Energy segment by operation and area served:

Operations	Area Served	Net Income (Loss)	Total Assets
(in thousands)			
Propane Operations (Sharp, Diversified Energy, FPU and Flo-gas)	Delaware, Maryland, Virginia, Pennsylvania, North Carolina, South Carolina, Florida	$ 13,587	$ 191,164
Energy Transmission (Aspire Energy)	Ohio	3,080	145,183
Energy Generation (Eight Flags)	Florida	2,235	37,805
Marlin Gas Services	The Entire U.S.	432	54,256
Sustainable investments and other [1]	Various	(1,697)	48,994
Total		$ 17,637	$ 477,402

[1] Includes our renewable natural gas projects that are in various stages of development

Propane Operations

Our propane operations sell propane to residential, commercial/industrial, wholesale and AutoGas customers, in the Mid-Atlantic region, North Carolina, South Carolina and Florida, through Sharp Energy, Inc., Sharpgas, Inc., Diversified Energy, FPU and Flo-gas. We deliver to and bill our propane customers based on two primary customer types: bulk delivery customers and metered customers. Bulk delivery customers receive deliveries into tanks at their location. We invoice and record revenues for these customers at the time of delivery. Metered customers are either part of an underground propane distribution system or have a meter installed on the tank at their location. We invoice and recognize revenue for these customers based on their consumption as dictated by scheduled meter reads. As a member of AutoGas Alliance, we install and support propane vehicle conversion systems for vehicle fleets and provide on-site fueling infrastructure.

Propane Operations - Operational Highlights

For the year ended December 31, 2023, operating revenues, volumes sold and average number of customers by customer class for our propane operations were as follows:

	Operating Revenues (in thousands)		Volumes (in thousands of gallons)		Average Number of Customers [1]	
Residential bulk	$ 46,913	30 %	15,187	21 %	59,483	70 %
Residential metered	13,931	9 %	4,457	6 %	17,387	21 %
Commercial bulk	37,541	24 %	21,242	30 %	7,703	9 %
Commercial metered	1,809	1 %	574	1 %	202	<1%
Wholesale	25,073	16 %	24,876	35 %	35	<1%
AutoGas	7,045	5 %	4,949	7 %	76	<1%
Other [2]	22,436	15 %	—	— %	—	— %
Total	$ 154,748	100 %	71,285	100 %	84,886	100 %

[1] Average number of customers is based on a twelve-month average for the year ended December 31, 2023. Excludes customers from the propane acquisition that closed in December 2023. See Note 4 under Item 8, Financial Statements and Supplementary Data, for additional information on this acquisition.

[2] Operating revenues from "Other" sources include revenues from customer loyalty programs, delivery, service and appliance fees, and unbilled revenues

Competition

Our propane operations compete with national and local independent companies primarily on the basis of price and service. Propane is generally a cheaper fuel for home heating than oil and electricity but more expensive than natural gas. Our propane operations are largely concentrated in areas that are not currently served by natural gas distribution systems.

Supplies, Transportation and Storage

We purchase propane from major oil companies and independent natural gas liquids producers. Propane is transported by truck and rail to our bulk storage facilities in Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina and Florida which have a total storage capacity of 8.9 million gallons. Deliveries are made from these facilities by truck to tanks located on customers' premises or to central storage tanks that feed our underground propane distribution systems. While propane supply has traditionally been adequate, significant fluctuations in weather, closing of refineries and disruption in supply chains, could cause temporary reductions in available supplies.

Weather

Propane revenues are affected by seasonal variations in temperature and weather conditions, which directly influence the volume of propane used by our customers. Our propane revenues are typically highest during the winter months when propane is used for heating. Sustained warmer-than-normal temperatures will tend to reduce propane use, while sustained colder-than-normal temperatures will tend to increase consumption.

Unregulated Energy Transmission and Supply (Aspire Energy)

Aspire Energy owns approximately 2,800 miles of natural gas pipeline systems in 40 counties in Ohio. The majority of Aspire Energy's revenues are derived from long-term supply agreements with Columbia Gas of Ohio and Consumers Gas Cooperative ("CGC"), which together serve more than 22,000 end-use customers. Aspire Energy purchases natural gas to serve these customers from conventional producers in the Marcellus and Utica natural gas production areas. In October 2021, Aspire Energy completed construction of its Noble Road Landfill RNG pipeline project, which began transporting RNG generated from the landfill to Aspire Energy's pipeline system in January of 2022, displacing conventionally produced natural gas. In 2023, the RNG volumes represented approximately 10 percent of Aspire Energy's gas gathering volumes and are anticipated to continue at such rate in 2024 and beyond. In addition, Aspire Energy earns revenue by gathering and processing natural gas for customers.

For the twelve-month period ended December 31, 2023, Aspire Energy's operating revenues and deliveries by customer type were as follows:

	Operating revenues		**Deliveries**	
	(in thousands)	% of Total	*(in thousands Dts)*	% of Total
Supply to Columbia Gas of Ohio	$ 11,694	32 %	2,351	31 %
Supply to CGC	16,844	45 %	2,025	27 %
Supply to Marketers	6,287	17 %	3,141	41 %
Other (including natural gas gathering and processing)	2,314	6 %	64	1 %
Total	$ 37,139	100 %	7,581	100 %

Energy Generation (Eight Flags)

Eight Flags generates electricity and steam at its CHP plant located on Amelia Island, Florida. The plant is powered by natural gas transported by Peninsula Pipeline and our Florida Natural Gas distribution business and produces approximately 21 MW of electricity and 75,000 pounds per hour of steam. Eight Flags sells the electricity generated from the plant to our Florida electric distribution operation and sells the steam to the customer who owns the site on which the plant is located, both under separate 20-year contracts.

Marlin Gas Services

Marlin Gas Services is a supplier of mobile CNG and virtual pipeline solutions, primarily to utilities and pipelines. Marlin Gas Services provides temporary hold services, pipeline integrity services, emergency services for damaged pipelines and specialized gas services for customers who have unique requirements. These services are provided by a highly trained staff of drivers and maintenance technicians who safely perform these functions throughout the United States. Marlin Gas Services maintains a fleet of CNG trailers, mobile compression equipment, LNG tankers and vaporizers, and an internally developed

patented regulator system which allows for delivery of over 7,000 Dts/d of natural gas. Marlin Gas Services continues to actively expand the territories it serves, as well as leveraging its fleet of equipment and patented technologies to serve LNG and RNG market needs.

Sustainable Investments

Our sustainable investments are comprised primarily of our renewable natural gas projects that are in various stages of development. Included in these are the assets and intellectual property of Planet Found that we acquired during the fourth quarter of 2022, whose farm scale anaerobic digestion pilot system and technology produces biogas from poultry litter. In addition, we are constructing a dairy manure RNG facility that we will own and operate at Full Circle Dairy in Madison County, Florida. The project consists of a facility converting dairy manure to RNG and transportation assets to bring the gas to market, with capital expenditures totaling $19.3 million through December 31, 2023. The first injection of RNG is projected to occur in the first half of 2024.

Environmental Matters

See *Item 8, Financial Statements and Supplementary Data* (see Note 19*, Environmental Commitments and Contingencies,* in the consolidated financial statements).

Human Capital Initiatives

Our success is the direct result of our employees and our strong culture that fully engages our team and promotes equity, diversity, inclusion, integrity, accountability and reliability. We believe that a combination of diverse team members and an inclusive culture contributes to the success of our Company and to enhanced societal advancement. Each employee is a valued member of our team bringing a diverse perspective to help grow our business and achieve our goals.

Our tradition of serving employees, customers, investors, partners and communities is at the core of our special culture. Our unique culture is grounded in a solid foundation of regulated businesses, but enhanced by an entrepreneurial, innovative and competitive market mindset. Among the ongoing initiatives across our enterprise, we highlight below the importance of our team, our culture of safety, and our commitment to supporting a more sustainable future.

Our Team Drives Our Performance

Our employees are the key to our success. Our leadership and human resources teams are responsible for attracting and retaining top talent and as an equal opportunity employer committed to creating a diverse workforce, we consider all qualified applicants without regard to race, religion, color, sex, national origin, age, sexual orientation, gender identity, disability or veteran status, among other factors. Our senior management team includes a Chief Human Resources Officer, with expertise in diverse candidate recruitment, to ensure that we continue to expand our candidate pools to better reflect the diverse demographics of the communities we serve.

Throughout our organization, we seek to promote from within, reviewing strategic positions regularly and identifying potential internal candidates to fill those positions, evaluating critical job skill sets to identify competency gaps and creating developmental plans to facilitate employee professional growth. We provide training and development programs, including many forms of training on our internal learning platform, as well as tuition reimbursement to promote continued professional growth.

Subsequent to the acquisition of FCG, we had a total of 1,281 employees at December 31, 2023, 196 of whom are union employees represented by two labor unions: the International Brotherhood of Electrical Workers ("IBEW") and the United Food and Commercial Workers Union. The collective bargaining agreements covering our legacy employees with these labor unions expire in 2025. Negotiations began in January 2024 with IBEW for those union employees that joined our Company as part of our acquisition of FCG. We consider our relationships with employees, including those covered by collective bargaining agreements, to be in good standing. We provide a competitive Total Rewards package for our employees including health insurance coverage, wellness initiatives, retirement savings benefits, paid time off, employee assistance programs, educational and tuition reimbursement, competitive pay, career growth opportunities, paid volunteer time, and a culture of recognition.

We listen to our employees and actively seek their input and feedback. Many of the initiatives we have in place are driven by feedback from our employees during an annual survey process or through regular employee engagement. We have also been purposeful in wanting to provide adequate recognition of our employees and their many efforts. Our internal recognition platform was unveiled in 2023 and enables employees to be recognized in real-time for their contributions. Our employees are the backbone of our continued growth and success.

We have an established an equity, diversity and inclusion ("EDI") Council which recommends and promotes our EDI strategy, advises our employee resource groups ("ERGs") and works with our operating units and support teams on EDI initiatives. The EDI Council's charter includes the following objectives:

- Build a more diverse and inclusive workforce
- Promote a culture of understanding, equality and inclusion
- Educate employees about the benefits of diversity at Chesapeake Utilities
- Support community programs and organizations that are diverse and inclusive
- Provide guidance on EDI matters for the Company

The EDI Council includes members of our leadership team, the chairs of each of our ERGs and other individuals in key support roles. The CEO receives a regular report on the achievements of the EDI Council, strategic direction of initiatives, resource needs and issues that require policy decisions or other actions.

Our first ERG was established in 2019, and as of December 31, 2023, there were ten active ERGs meeting throughout the Company. ERGs are voluntary, employee-led groups that focus on shared identities, affinities and experiences and seek to apply those perspectives to initiatives that create value throughout the Company. The ERGs support their members' personal growth and professional development, and help develop learning programs and community service opportunities throughout the Company. ERGs also help foster a sense of belonging by creating a deep and intentional community that extends beyond an employee's day-to-day team and colleagues into a companywide network.

Workplace Health and Safety

We believe that there is nothing more important than the safety of our team, our customers and our communities. We are committed to ensuring safety is at the center of our culture and the way we do business. The importance of safety is exhibited throughout the entire organization, with the direction and tone set by both the Board of Directors and our President and CEO, and evidenced through required attendance at monthly safety meetings, routine safety training and the inclusion of safety moments at key team meetings. Additionally, we remain committed to providing products and services to our customers in a safe and reliable manner.

To maintain safety as a priority, our employees remain committed and work together to ensure that our plans, programs, policies and behaviors are aligned with our aspirations as a Company. The achievement of superior safety performance is both an important short-term and long-term strategic initiative in managing our operations. Our state-of-the art training facility, Safety Town, located in Dover, Delaware, now serves as a resource for training our employees who build, maintain and operate our natural gas infrastructure, offering hands-on training and fully immersive, on-the-job field experiences. First responders and other community partners also benefit from the simulated environment and conditions they could encounter as they enter homes in the community. Construction is underway for our second Safety Town facility in Florida, and we are excited to begin utilizing this facility in 2024.

Driving Sustainability across the Company

Consistent with our culture of teamwork, the focus on sustainability is supported and shared across our organization by the dedication and efforts of our Board of Directors and its Committees, as well as the entrepreneurship and dedication of our team. As stewards of long-term enterprise value, the Board of Directors is committed to overseeing the sustainability of the Company, its environmental stewardship initiatives, its safety and operational compliance practices, and to promoting equity, diversity and inclusion that reflects the diverse communities we serve. Our ESG Committee brings together a cross-functional team of leaders across the organization responsible for identifying, assessing, executing and advancing the Company's strategic sustainability initiatives. Our Environmental Sustainability Office identifies and manages emission-reducing projects both internally as well as those that support our customers' sustainability goals. Throughout the year, Chesapeake Utilities drove numerous initiatives in support of its sustainability focus, including but not limited to:

- Constructed an RNG injection point in Yulee, Florida, providing a pathway to market for produced RNG, and progressed on construction of our first RNG production facility in Lee, Florida;
- Completed an expansion of our intrastate transmission pipeline to Vero Beach, Florida, increasing the availability of natural gas to the area;
- Served as an industry anchor partner in the Mid-Atlantic Clean Hydrogen Hub (MACH2™), which was awarded federal funding of up to $750 million in October 2023; MACH2™ is a collaboration between Delaware, southern New Jersey and southeastern Pennsylvania;

- In Delaware, filed a first-of-its-kind energy efficiency program focused on natural gas; pending approval from the Delaware PSC the program will be implemented in 2024;
- Our Florida Natural Gas distribution business received approval for its 10-year GUARD program to remove accessibility challenges and replace older problematic distribution lines and services, increasing employee, customer, and community safety; FCG received approval to extend its similar program, SAFE, for 10 more years;
- Provided Healthy Pantry Naming Sponsor-level support and donated several recycled benches from our Pipe Recycling Project for the new 70,000 square foot Food Bank of Delaware facility located in Milford, Delaware;
- Rolled out our "Chesapeake Connections Program," connecting new team members with a "connection buddy" outside of their department for the first few months of employment;
- Introduced two new ERGs in 2023 – "PRIDE," which is focused on providing a sense of acceptance and belonging for everyone in the Chesapeake Utilities family, and "GREEN," which is passionate about the environment and committed to reducing societal impacts on the planet; and
- Named a 2023 Champion of Board Diversity by The Forum of Executive Women.

Information About Executive Officers

Set forth below are the names, ages, and positions of our executive officers with their recent business experience. The age of each officer is as of the filing date of this Annual Report.

Name	Age	Executive Officer Since	Offices Held During the Past Five Years
Jeffry M. Householder	66	2010	Chairman of the Board of Directors (May 2023 - present) President (January 2019 - present) Chief Executive Officer (January 2019 - present) Director (January 2019 - present) President of FPU (June 2010 - February 2019)
Beth W. Cooper	57	2005	Executive Vice President (February 2019 - present) Chief Financial Officer (September 2008 - present) Senior Vice President (September 2008 - February 2019) Treasurer (January 2022 - present) Assistant Corporate Secretary (March 2015 - present)
James F. Moriarty	66	2015	Executive Vice President (February 2019 - present) General Counsel & Corporate Secretary (March 2015 - present) Chief Policy and Risk Officer (February 2019 - present) Senior Vice President (February 2017 - February 2019) Vice President (March 2015 - February 2017)
Kevin J. Webber	65	2010	Chief Development Officer (January 2022 - present) Senior Vice President (February 2019 - present) President FPU (February 2019 - December 2019) Vice President Gas Operations and Business Development Florida Business Units (July 2010 - February 2019)
Jeffrey S. Sylvester	54	2019	Chief Operating Officer (January 2022 - present) Senior Vice President (December 2019 - present) Vice President Black Hills Energy (October 2012 - December 2019)

Available Information on Corporate Governance Documents

Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and other reports and amendments to these reports that we file with or furnish to the SEC at their website, *www.sec.gov,* are also available free of charge at our website, *www.chpk.com,* as soon as reasonably practicable after we electronically file these reports with, or furnish these reports to the SEC. The content of this website is not part of this Annual Report.

In addition, the following documents are available free of charge on our website, *www.chpk.com*:

- Business Code of Ethics and Conduct applicable to all employees, officers and directors;
- Code of Ethics for Financial Officers;
- Corporate Governance Guidelines; and
- Charters for the Audit Committee, Compensation Committee, Investment Committee, and Corporate Governance Committee of the Board of Directors.

Any of these reports or documents may also be obtained by writing to: Corporate Secretary; c/o Chesapeake Utilities Corporation, 500 Energy Lane Suite 100, Dover, DE 19901.

ITEM 1A. RISK FACTORS

The risks described below fall into three broad categories related to (1) financial risks, (2) operational risks, and (3) regulatory, legal and environmental risks, all of which may affect our operations and/or the financial performance of our regulated and unregulated energy businesses. These are not the only risks we face but are considered to be the most material. There may be other unknown or unpredictable risks or other factors that could have material adverse effects on our future results. Refer to the section entitled *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations* of this Annual Report for an additional discussion of these and other related factors that affect our operations and/or financial performance.

FINANCIAL RISKS

Our financial results may fluctuate significantly and may not fully reflect the underlying performance of our business.

Our operating results, including our revenues, operating margin, profitability, and cash flow, may vary significantly in the future and period-to-period comparisons of our operating results may not be meaningful. Accordingly, the results of any one quarter or year should not be relied upon as an indication of future performance. Our financial results may fluctuate as a result of a variety of factors, many of which are outside of our control, and such fluctuations and related impacts to any capital or earnings guidance we may issue from time to time, or any modification or withdrawal thereof, may negatively impact the value of our securities.

Instability and volatility in the financial markets could negatively impact access to capital at competitive rates, which could affect our ability to implement our strategic plan, undertake improvements and make other investments required for our future growth.

Our business strategy includes the continued pursuit of growth and requires capital investment in excess of cash flow from operations. As a result, the successful execution of our strategy is dependent upon access to equity and debt at reasonable costs. Our ability to issue new debt and equity capital and the cost of equity and debt are greatly affected by our financial performance and the conditions of the financial markets. In addition, our ability to obtain adequate and cost-effective debt depends on our credit ratings. A downgrade in our current credit ratings could negatively impact our access to and cost of debt. If we are not able to access capital at competitive rates, our ability to implement our strategic plan, undertake improvements and make other investments required for our future growth may be limited.

Fluctuations in propane gas prices could negatively affect results of operations.

The combination of high demand and lower-than-average inventory is always a common driver for higher propane gas prices. We adjust the price of the propane we sell based on changes in our cost of purchasing propane. However, if the market does not allow us to increase propane sales prices to compensate fully for fluctuations in purchased propane costs, our results of operations and cash flows could be negatively affected.

If we fail to comply with our debt covenant obligations, we could experience adverse financial consequences that could affect our liquidity and ability to borrow funds.

Our long-term debt obligations and our Revolver contain financial covenants related to debt-to-capital ratios and interest-coverage ratios. Failure to comply with any of these covenants could result in an event of default which, if not cured or waived, could result in the acceleration of outstanding debt obligations, the inability to borrow under certain credit agreements and terms, or the inability to access capital from other sources. Any such default could cause a material adverse change in our financial condition, results of operations and cash flows. As of December 31, 2023, we were in compliance with all of our debt covenants.

Increases in interest rates may adversely affect our results of operations and cash flows.

Increases in interest rates could increase the cost of future debt issuances. To the extent we are not able to fully recover higher debt costs in the rates we charge our utility customers, or the timing of such recovery is not certain, our earnings could be adversely affected. Increases in short-term interest rates could negatively affect our results of operations, which depend on short-term debt to finance accounts receivable and storage gas inventories and to temporarily finance capital expenditures. Reference should be made to *Item 7A, Quantitative and Qualitative Disclosures about Market Risk* for additional information.

Continuing or worsening inflationary and/or supply chain issues may adversely impact our financial condition and results of operations.

Our business is dependent on the supply chain to ensure that equipment, materials and other resources are available to both expand and maintain our services in a safe and reliable manner. Pricing of equipment, materials and other resources have increased recently and may continue to do so in the future. Failure to secure equipment, materials and other resources on economically acceptable terms, including failure to eliminate or manage the constraints in the supply chain, may impact the availability of items that are necessary to support normal operations as well as materials that are required for continued infrastructure growth, and as a result, may adversely impact our financial condition and results of operations.

In addition, it may become more costly for us to recruit and retain key employees, particularly specialized/technical personnel, in the face of competitive market conditions and increased competition for specialized and experienced workers in our industry.

Disruptions, uncertainty or volatility in the credit and capital markets may exert downward pressure on the market price of the Company's common stock.

The market price and trading volume of the Company's common stock is subject to fluctuations as a result of, among other factors, general credit and capital market conditions and changes in market sentiment regarding the operations, business and financing strategies of the Company and its subsidiaries. As a result, disruptions, uncertainty or volatility in the credit and capital markets may, amongst other things, have a material adverse effect on the market price of the Company's common stock.

Current market conditions could adversely impact the return on plan assets for our Company sponsored defined benefit plans, which may require significant additional funding.

The Company's primary defined benefit pension plan, the FPU pension plan, is a funded plan that is closed to new employees and the future benefits are frozen. At December 31, 2023, the FPU pension plan benefit obligation was $49.4 million and was funded at approximately 100 percent. The costs of providing benefits and related funding requirements of the FPU plan is subject to changes in the market value of the assets that fund the plan and the discount rates used to estimate the pension benefit obligations. The funded status of the plans and the related costs reflected in our financial statements are affected by various factors that are subject to an inherent degree of uncertainty, particularly in the current economic environment. Future losses of asset values and further declines in discount rates may necessitate accelerated funding of the plans to meet minimum federal government requirements and may result in higher pension expense in future years. Adverse changes in the benefit obligation of the FPU pension plan may require us to record higher pension expense and fund obligations earlier than originally planned, which would have an adverse impact on our cash flows from operations, decrease borrowing capacity and increase interest expense.

OPERATIONAL RISKS

We are dependent upon construction of new facilities to support future growth in earnings in our natural gas and electric distribution and natural gas transmission operations.

Construction of new facilities required to support future growth is subject to various regulatory and developmental risks, including but not limited to: (i) our ability to obtain timely certificate authorizations, necessary approvals and permits from regulatory agencies and on terms that are acceptable to us; (ii) potential changes in federal, state and local statutes and regulations, including environmental requirements, that prevent a project from proceeding or increase the anticipated cost of the project; (iii) our inability to acquire rights-of-way or land rights on a timely basis on terms that are acceptable to us; (iv) lack of anticipated future growth in available natural gas and electricity supply and demand; (v) insufficient customer throughput commitments; and (vi) lack of available and qualified third-party contractors which could impact the timely construction of new facilities. Adverse outcomes and/or changes in these risks could limit the future growth of our business and cause a material adverse change in our financial condition, results of operations and cash flows.

We do not own all of the land on which our pipelines and facilities are located, which could result in disruptions to our operations.

Because we do not own all of the land on which our pipelines and facilities have been constructed, we are subject to the possibility of more onerous terms or increased costs to retain necessary land use if we do not have valid rights-of-way or if such rights-of-way lapse or terminate. We obtain the rights to construct and operate our pipelines on land owned by third parties and governmental agencies for a specific period of time. Our loss of these rights, through our inability to renew right-of-way contracts or otherwise, could have a material adverse effect on our business, financial condition and results of operations.

We operate in a competitive environment, and we may lose customers to competitors.

Natural Gas. Our natural gas transmission and distribution operations compete with interstate pipelines when our customers are located close enough to a competing pipeline to make direct connections economically feasible. Customers also have the option to switch to alternative fuels, including renewable energy sources. Failure to retain and grow our natural gas customer base would have an adverse effect on our financial condition, results of operations and cash flows.

Electric. Our Florida electric distribution business has remained substantially free from direct competition from other electric service providers but does face competition from other energy sources. Changes in the competitive environment caused by legislation, regulation, market conditions, or initiatives of other electric power providers, particularly with respect to retail electric competition, would adversely affect our financial condition, results of operations and cash flows.

Propane. Our propane operations compete with other propane distributors, primarily on the basis of service and price. Our ability to grow the propane operations business is contingent upon capturing additional market share, expanding into new markets, and successfully utilizing pricing programs that retain and grow our customer base. Failure to retain and grow our customer base in our propane operations would have an adverse effect on our financial condition, results of operations and cash flows.

Fluctuations in weather may cause a significant variance in our earnings.

Our natural gas distribution, propane operations and natural gas transmission operations, are sensitive to fluctuations in weather conditions, which directly influence the volume of natural gas and propane we transport, sell and deliver to our customers. A significant portion of our natural gas distribution, propane operations and natural gas transmission revenue is derived from the sales and deliveries to residential, commercial and industrial heating customers during the five-month peak heating season (November through March). Other than our Maryland natural gas distribution businesses (Maryland division, Sandpiper Energy and Elkton Gas) which have revenue normalization mechanisms, if the weather is warmer than normal, we generally sell and deliver less natural gas and propane to customers, and earn less revenue, which could adversely affect our results of operations, cash flows and financial condition. Conversely, if the weather is colder than normal, we generally sell and deliver more natural gas and propane to customers, and earn more revenue, which could positively affect our results of operations, cash flows and financial condition. Variations in weather from year to year can cause our results of operations, cash flows and financial condition to vary accordingly.

Our electric distribution operation is also affected by variations in weather conditions and unusually severe weather conditions. However, electricity consumption is generally less seasonal than natural gas and propane because it is used for both heating and cooling in our service areas.

Severe weather events (such as a major hurricane, flood or tornado), natural disasters and acts of terrorism could adversely impact earnings and access to insurance coverage.

Inherent in energy transmission and distribution activities are a variety of hazards and operational risks, such as leaks, ruptures, fires, uncontrollable flows of natural gas, explosions, release of contaminants into the environment, sabotage and mechanical problems. Severe weather events and natural disasters may damage our assets, cause operational interruptions and result in the loss of human life, all of which could negatively affect our earnings, financial condition and results of operations.

Acts of terrorism and the impact of retaliatory military and other action by the U.S. and its allies may lead to increased political, economic and financial market instability and volatility in the price of natural gas, electricity and propane that could negatively affect our operations. Companies in the energy industry may face a heightened risk of exposure to acts of terrorism, which could affect our financial condition, results of operations and cash flows.

The insurance industry may also be affected by severe weather events, natural disasters and acts of terrorism. As a result, the availability of insurance covering risks against which we and our competitors typically insure may be limited. In addition, the insurance we are able to obtain may have higher deductibles, higher premiums and more restrictive policy terms, which could adversely affect our financial condition, results of operations and cash flows.

Operating events affecting public safety and the reliability of our natural gas and electric distribution and transmission systems could adversely affect our operations and increase our costs.

Our natural gas and electric operations are exposed to operational events and risks, such as major leaks, outages, mechanical failures and breakdown, operations below the expected level of performance or efficiency, and accidents that could affect public safety and the reliability of our distribution and transmission systems, significantly increase costs and cause loss of customer confidence. If we are unable to recover all or some of these costs from insurance and/or customers through the regulatory process, our financial condition, results of operations and cash flows could be adversely affected.

A security breach disrupting our operating systems and facilities or exposing confidential information may adversely affect our reputation, disrupt our operations and increase our costs.

The cybersecurity risks associated with the protection of our infrastructure and facilities is evolving and increasingly complex. We continue to heavily rely on technological tools that support our business operations and corporate functions while enhancing our security. There are various risks associated with our information technology infrastructure, including hardware and software failure, communications failure, data distortion or destruction, unauthorized access to data, misuse of proprietary or confidential data, unauthorized control through electronic means, cyber-attacks, cyber-terrorism, data breaches, programming mistakes, and other inadvertent errors or deliberate human acts. Further, the U.S. government has issued public warnings that indicate energy assets might be specific targets of cybersecurity threats and/or attacks.

Many of our employees, service providers, and vendors have been working, and continue to work, from remote locations, where cybersecurity protections could be limited and cybersecurity procedures and safeguards could be less effective. As such, we could be subject to a higher risk of cybersecurity breaches than ever before. Therefore, we could be required to expend significant resources to continue to modify or enhance our procedures and controls or to upgrade our digital and operational systems, related infrastructure, technologies and network security.

Any such failure, attack, or security breach could adversely impact our ability to safely and reliably deliver services to our customers through our transmission, distribution, and generation systems, subjecting us to reputational and other harm, and subject us to legal and regulatory proceedings and claims and demands from third parties, any of which could adversely affect our business, our earnings, results of operation and financial condition. In addition, the protection of customer, employee and Company data is crucial to our operational security. A breach or breakdown of our systems that results in the unauthorized release of individually identifiable customer information or other sensitive data could have an adverse effect on our reputation, results of operations and financial condition and could also materially increase our costs of maintaining our system and protecting it against future breakdowns or breaches. We take reasonable precautions to safeguard our information systems from cyber-attacks and security breaches; however, there is no guarantee that the procedures implemented to protect against unauthorized access to our information systems are adequate to safeguard against all attacks and breaches. We also cannot assure that any redundancies built into our networks and technology, or the procedures we have implemented to protect against cyber-attacks and other unauthorized access to secured data, are adequate to safeguard against all failures of technology or security breaches.

The Company's business, results of operations, financial condition and cash flows could be adversely affected by interruption of the Company's information technology or network systems as well as the Company's implementation of its technology roadmap.

Currently, we rely on centralized and local information technology networks and systems, some of which are managed or accessible by third parties, to process, transmit and store electronic information, and to otherwise manage or support our business. Additionally, the Company collects and stores certain data, including proprietary business information, and has access to confidential or personal information that is subject to privacy and security laws, regulations and customer-imposed controls. The processing and storage of personal information is increasingly subject to privacy and data security regulations. The interpretation and application of data protection laws in the U.S. are continuing to evolve and may be different across jurisdictions. Violations of these laws could result in criminal or civil sanctions and even the mere allegation of such violations, could harm the Company's reputation.

Information technology system and/or network disruptions, whether caused by acts of sabotage, employee error, malfeasance or otherwise, could have an adverse impact on the Company's operations as well as the operations of the Company's customers and suppliers. As a result, the Company may be subject to legal claims or regulatory proceedings which could result in liability or penalties under privacy laws, disruption in the Company's operations, and damage to the Company's reputation, adversely affecting the Company's business, results of operations, financial condition and cash flows.

The Company is also implementing a technology roadmap that will significantly advance our technological capabilities. The implementation of new software in multiple phases is a complex process that involves several risks. Some of the common risks include:

- Expectations of what the software can do is not achieved and requires additional spending, resources and time;
- Inadequate planning, including changes in implementation plans, can lead to delays, cost overruns, and poor outcomes;
- Ensuring continued team engagement is critical as technology and systems projects are significant and involve many resources within the Company as well as the use of various third parties;
- Implementing new software can expose the organization to new security risks; and

- Integrating new software with existing systems can be challenging, as a result of compatibility issues, data migration and system downtime.

Concerns relating to the responsible use of new and evolving technologies, such as artificial intelligence (AI), may result in reputational or financial harm and liability.

While providing significant benefits, AI poses emerging legal, social, and ethical issues and presents risks and challenges. If we utilize AI solutions that have unintended consequences or may be deemed controversial, or if we are unable to develop effective internal policies and frameworks relating to the responsible use of AI, we may experience brand or reputational harm, competitive harm or legal liability. Complying with regulations related to AI could increase our cost of doing business, may change the way that we operate in certain jurisdictions, or may impede our ability to offer services in certain jurisdictions if we are unable to comply with regulations.

Failure to attract and retain an appropriately qualified employee workforce could adversely affect operations.

Our ability to implement our business strategy and serve our customers depends upon our continuing ability to attract, develop and retain talented professionals and a technically skilled workforce in a manner competitive with current market conditions, and transfer the knowledge and expertise of our workforce to new employees as our existing employees retire. Failure to hire and adequately train replacement employees, including the transfer of significant internal historical knowledge and expertise to new employees, or the future availability and cost of contract labor could adversely affect our ability to manage and operate our business. If we were unable to hire, train and retain appropriately qualified personnel, our results of operations could be adversely affected.

A strike, work stoppage or a labor dispute could adversely affect our operations.

We are party to collective bargaining agreements with labor unions at some of our Florida operations. A strike, work stoppage or a labor dispute with a union or employees represented by a union could cause interruption to our operations and our results could be adversely affected.

Our businesses are capital-intensive, and the increased costs and/or delays of capital projects may adversely affect our future earnings.

Our businesses are capital-intensive and require significant investments in ongoing infrastructure projects. These projects are subject to state and federal regulatory oversight and require certain property rights, such as easements and rights-of-way from public and private owners, as well as regulatory approvals, including environmental and other permits and licenses. There is no assurance that we will be able to obtain the necessary property rights, permits and licenses and approvals in a timely and cost-efficient manner, or at all, which may result in the delay or failure to complete a project. In addition, the availability of the necessary materials and qualified vendors could also impact our ability to complete such projects on a timely basis and manage the overall costs. Failure to complete any pending or future infrastructure projects could have a material adverse impact on our financial condition, results of operations and cash flows. Where we are able to successfully complete pending or future infrastructure projects, our revenues may not increase immediately upon the expenditure of funds on a particular project or as anticipated over the life of the project. As a result, there is the risk that new and expanded infrastructure may not achieve our expected investment returns, which could have a material adverse effect on our business, financial condition and results of operations.

Our regulated energy business may be at risk if franchise agreements are not renewed, or new franchise agreements are not obtained, which could adversely affect our future results or operating cash flows and financial condition.

Our regulated natural gas and electric distribution operations hold franchises in each of the incorporated municipalities that require franchise agreements in order to provide natural gas and electricity. Ongoing financial results would be adversely impacted in the event that franchise agreements were not renewed. If we are unable to obtain franchise agreements for new service areas, growth in our future earnings could be negatively impacted.

Slowdowns in customer growth may adversely affect earnings and cash flows.

Our ability to increase revenues in our natural gas, propane and electric distribution businesses is dependent upon growth in the residential construction market, adding new commercial and industrial customers and conversion of customers to natural gas, electricity or propane from other energy sources. Slowdowns in growth may adversely affect our financial condition, results of operations and cash flows.

Energy conservation could lower energy consumption, which would adversely affect our earnings.

Federal and state legislative and regulatory initiatives to promote energy efficiency, conservation and the use of alternative energy sources could lower consumption of natural gas and propane by our customers. For example, on August 16, 2022, the Inflation Reduction Act of 2022 was signed into law, with hundreds of billions of dollars in incentives for the development of renewable energy, clean hydrogen, and clean fuels, amongst other provisions. These incentives could further accelerate the transition of the U.S. economy away from the use of fossil fuels towards lower- or zero-carbon emissions alternatives and impact demand for our products and services. In addition, increasing attention to climate change, societal expectations on companies to address climate change, investor and societal expectations including mandatory climate related disclosures, and the aforementioned demand for alternative forms of energy, may result in increased costs and reduced demand for our products and services. While we cannot predict the ultimate effect that the development of alternative energy sources and related laws might have on our operations, we may be subject to reduced profits, increased investigations and litigation against us, and negative impacts on our stock price and access to capital markets.

In addition, higher costs of natural gas, propane and electricity may cause customers to conserve fuel. To the extent recovery through customer rates of higher costs or lower consumption from energy efficiency or conservation is not allowed, and our propane retail prices cannot be increased due to market conditions, our financial condition, results of operations and cash flows could be adversely affected.

Commodity price increases may adversely affect the operating costs and competitive positions of our natural gas, electric and propane operations, which may adversely affect our results of operations, cash flows and financial condition.

Natural Gas and Electricity. Higher natural gas prices can significantly increase the cost of gas billed to our natural gas customers. Increases in the cost of natural gas and other fuels used to generate electricity can significantly increase the cost of electricity billed to our electric customers. Damage to the production or transportation facilities of our suppliers, which decreases their supply of natural gas and electricity, could result in increased supply costs and higher prices for our customers. Such cost increases generally have no immediate effect on our revenues and net income because of our regulated fuel cost recovery mechanisms. However, our net income may be reduced by higher expenses that we may incur for uncollectible customer accounts and by lower volumes of natural gas and electricity deliveries when customers reduce their consumption. Therefore, increases in the price of natural gas and other fuels can adversely affect our financial condition, results of operations and cash flows, as well as the competitiveness of natural gas and electricity as energy sources.

Propane. Propane costs are subject to changes as a result of product supply or other market conditions, including weather, economic and political factors affecting crude oil and natural gas supply or pricing. For example, weather conditions could damage production or transportation facilities, which could result in decreased supplies of propane, increased supply costs and higher prices for customers. Such increases in costs can occur rapidly and can negatively affect profitability. There is no assurance that we will be able to pass on propane cost increases fully or immediately, particularly when propane costs increase rapidly. Therefore, average retail sales prices can vary significantly from year-to-year as product costs fluctuate in response to propane, fuel oil, crude oil and natural gas commodity market conditions. In addition, in periods of sustained higher commodity prices, declines in retail sales volumes due to reduced consumption and increased amounts of uncollectible accounts may adversely affect net income.

Refer to *Item 7A*, *Quantitative and Qualitative Disclosures about Market Risk* for additional information.

Our use of derivative instruments may adversely affect our results of operations.

Fluctuating commodity prices may affect our earnings and financing costs because our propane operations use derivative instruments, including forwards, futures, swaps, puts, and calls, to hedge price risk. While we have risk management policies and operating procedures in place to control our exposure to risk, if we purchase derivative instruments that are not properly matched to our exposure, our results of operations, cash flows, and financial condition may be adversely affected. In addition, fluctuations in market prices could result in significant unrealized gains or losses, which could require margins to be posted on unsettled positions and impact our financial position, results of operations and cash flows.

A substantial disruption or lack of growth in interstate natural gas pipeline transmission and storage capacity or electric transmission capacity may impair our ability to meet customers' existing and future requirements.

In order to meet existing and future customer demands for natural gas and electricity, we must acquire sufficient supplies of natural gas and electricity, interstate pipeline transmission and storage capacity, and electric transmission capacity to serve such requirements. We must contract for reliable and adequate upstream transmission capacity for our distribution systems while considering the dynamics of the interstate pipeline and storage and electric transmission markets, our own on-system resources, as well as the characteristics of our markets. Our financial condition and results of operations would be materially and adversely affected if the future availability of these capacities were insufficient to meet future customer demands for natural gas and electricity. Currently, our natural gas operations in Florida rely primarily on two pipeline systems, FGT and Peninsula Pipeline (our intrastate pipeline subsidiary), for most of their natural gas supply and transmission. Our Florida electric operation secures electricity from external parties. Any continued interruption of service from these suppliers could adversely affect our ability to meet the demands of our customers, which could negatively impact our financial condition, results of operations and cash flows.

Our ability to grow our businesses could be adversely affected if we are not successful in making acquisitions or integrating the acquisitions we have completed.

One of our strategies is to grow through acquisitions of complementary businesses. On November 30, 2023, we completed the acquisition of FCG, a regulated natural gas distribution utility serving approximately 120,000 residential and commercial natural gas customers in Florida, for $923.4 million in cash, pursuant to the previously disclosed stock purchase agreement with Florida Power & Light Company. Our acquisitions, including FCG as well as future acquisitions, involve a number of risks including, but not limited to, the following:

- We may fail to realize the benefits and growth prospects anticipated as a result of the acquisition;
- We may not identify all material facts, issues and/or liabilities in due diligence; accurately anticipate required capital expenditures; or design and implement an effective internal control environment with respect to acquired businesses;
- We may experience difficulty in integrating the technology, systems, policies, processes or operations and retaining the employees, including key personnel of the acquired business;
- The historical financial results of acquisitions may not be representative of our future financial condition, results of operations and cash flows, and may not deliver the expected strategic and operational benefits;
- An acquisition may divert management's attention to integration activities or disrupt ongoing operations; and
- We may overpay for assets, which could result in the recording of excess goodwill and other intangible assets at values that ultimately may be subject to impairment charges.

These factors, amongst others, could impact our ability to successfully grow our business which could have a material adverse effect on our financial condition, results of operations and cash flows.

An impairment of our assets including long-lived assets, goodwill and other intangible assets, could negatively impact our financial condition and results of operations.

In accordance with GAAP, goodwill, intangibles, and other long-lived assets are tested for impairment annually or whenever events or changes in circumstances indicate impairment may have occurred. The testing of assets for impairment requires us to make significant estimates about our future performance and cash flows, as well as other assumptions. These values may be impacted by significant negative industry or economic trends, changes in technology, regulatory or industry conditions, disruptions to our business, inability to effectively integrate acquired businesses, unexpected significant change or planned changes in use of our assets, changes in the structure of our business, divestitures, market capitalization declines or changes in economic conditions or interest rates. If the testing performed indicates that impairment has occurred, we are required to record an impairment charge for the difference between the carrying value of the applicable asset and the implied fair value in the period the determination is made. Any changes in key assumptions, or actual performance compared with key assumptions, about our business and its future prospects could affect the fair value of one or more of our assets, which may result in an impairment charge and could negatively affect our financial condition and results of operations.

REGULATORY, LEGAL AND ENVIRONMENTAL RISKS

Regulation of our businesses, including changes in the regulatory environment, may adversely affect our financial condition, results of operations and cash flows.

The Delaware, Maryland, Ohio and Florida PSCs regulate our utility operations in those states. Eastern Shore is regulated by the FERC. The PSCs and the FERC set the rates that we can charge customers for services subject to their regulatory jurisdiction. Our ability to obtain timely rate increases and rate supplements to maintain current rates of return depends on regulatory approvals, and there can be no assurance that our regulated operations will be able to obtain such approvals or maintain currently authorized rates of return. When earnings from our regulated utilities exceed the authorized rate of return, the respective regulatory authority may require us to reduce our rates charged to customers in the future.

We may face certain regulatory and financial risks related to pipeline safety legislation.

We are subject to a number of legislative proposals at the federal and state level to implement increased oversight over natural gas pipeline operations and facilities to inspect pipeline facilities, upgrade pipeline facilities, or control the impact of a breach of such facilities. Additional operating expenses and capital expenditures may be necessary to remain in compliance.

If new legislation is adopted and we incur additional expenses and expenditures, our financial condition, results of operations and cash flows could be adversely affected, particularly if we are not authorized through the regulatory process to recover from customers some or all of these costs and earn at an authorized rate of return.

Pipeline integrity programs and repairs may impose significant costs and liabilities on the Company.

The PHMSA requires pipeline operators to develop integrity management programs to comprehensively evaluate their pipelines and to take additional measures to protect pipeline segments located in areas where a leak or rupture could potentially do the most harm. The PHMSA constantly updates its regulations to ensure the highest levels of pipeline safety. As the operator of pipelines, we are required to: perform ongoing assessments of pipeline integrity; identify and characterize applicable threats to pipelines; improve data collection, integration and analysis; repair and remediate the pipelines as necessary; and implement preventative and mitigating actions. These new and any future regulations adopted by the PHMSA may impose more stringent requirements applicable to integrity management programs and other pipeline safety aspects of our operations, which could cause us to incur increased capital and operating costs and operational delays. Moreover, should we fail to comply with the PHMSA rules and regulations, we could be subject to significant penalties and fines which may adversely affect our financial condition, results of operations and cash flows.

We are subject to operating and litigation risks that may not be fully covered by insurance.

Our operations are subject to the operating hazards and risks normally incidental to handling, storing, transporting, transmitting and delivering natural gas, electricity and propane to end users. From time to time, we are a defendant in legal proceedings arising in the ordinary course of business. We maintain insurance coverage for our general liabilities in the amount of $52 million, which we believe is reasonable and prudent. However, there can be no assurance that such insurance will be adequate to protect us from all material expenses related to potential future claims for personal injury and property damage or that such levels of insurance will be available in the future at economical prices.

Costs of compliance with environmental laws may be significant.

We are subject to federal, state and local laws and regulations governing environmental quality and pollution control. These evolving laws and regulations may require expenditures over a long period of time to control environmental effects at our current and former operating sites, especially former MGP sites. To date, we have been able to recover, through regulatory rate mechanisms, the costs associated with the remediation of former MGP sites. However, there is no guarantee that we will be able to recover future remediation costs in the same manner or at all. A change in our approved rate mechanisms for recovery of environmental remediation costs at former MGP sites could adversely affect our financial condition, results of operations and cash flows.

Further, existing environmental laws and regulations may be revised, or new laws and regulations seeking to protect the environment may be adopted and be applicable to us. Revised or additional laws and regulations could result in additional operating restrictions on our facilities or increased compliance costs, which may not be fully recoverable. Any such increase in compliance costs could adversely affect our financial condition, results of operations and cash flows. Compliance with these legal obligations requires us to commit capital. If we fail to comply with environmental laws and regulations, even if such failure is caused by factors beyond our control, we may be assessed administrative, civil, or criminal penalties and fines, imposed with investigatory and remedial obligations, or issued injunctions all of which could impact our financial condition, results of operations and cash flows. See *Item 8, Financial Statements and Supplementary Data* (see Note 19*, Environmental Commitments and Contingencies,* in the consolidated financial statements).

Unanticipated changes in our tax provisions or exposure to additional tax liabilities could affect our profitability and cash flow.

We are subject to income and other taxes in the U.S. and the states in which we operate. Changes in applicable state or U.S. tax laws and regulations, or their interpretation and application, including the possibility of retroactive effect, could affect our tax expense and profitability. In addition, the final determination of any tax audits or related litigation could be materially different from our historical income tax provisions and accruals. Changes in our tax provision or an increase in our tax liabilities, due to changes in applicable law and regulations, the interpretation or application thereof, future changes in the tax rate or a final determination of tax audits or litigation, could have a material adverse effect on our financial position, results of operations and cash flows.

Our business may be subject in the future to additional regulatory and financial risks associated with global warming and climate change.

There have been a number of federal and state legislative and regulatory initiatives proposed in recent years in an attempt to control or limit the effects of global warming and overall climate change, including greenhouse gas emissions. The direction of future U.S. climate change regulation is difficult to predict given the potential for policy changes under different Presidential administrations and Congressional leadership. The Environmental Protection Agency, or other Federal agencies, may or may not continue developing regulations to reduce greenhouse gas emissions. Even if federal efforts in this area slow, states, cities and local jurisdictions may continue pursuing climate regulations. Any laws or regulations that may be adopted to restrict or reduce emissions of greenhouse gases could require us to incur additional operating costs, such as costs to purchase and operate emissions controls, to obtain emission allowances or to pay emission taxes, and could reduce demand for our energy delivery services. Federal, state and local legislative initiatives to implement renewable portfolio standards or to further subsidize the cost of solar, wind and other renewable power sources may change the demand for natural gas. We cannot predict the potential impact that such laws or regulations, if adopted, may have on our future business, financial condition or financial results.

Climate changes may impact the demand for our services in the future and could result in more frequent and more severe weather events, which ultimately could adversely affect our financial results.

Significant climate change creates physical and financial risks for us. Our customers' energy needs vary with weather conditions, primarily temperature and humidity. For residential customers, heating and cooling represent their largest energy use. To the extent weather conditions may be affected by climate change, customers' energy use could increase or decrease depending on the duration and magnitude of any changes. To the extent that climate change adversely impacts the economic health or weather conditions of our service territories directly, it could adversely impact customer demand or our customers' ability to pay. Changes in energy use due to weather variations may affect our financial condition through volatility and/or decreased revenues and cash flows. Extreme weather conditions require more system backups and can increase costs and system stresses, including service interruptions. Severe weather impacts our operating territories primarily through thunderstorms, tornadoes, hurricanes, and snow or ice storms. Weather conditions outside of our operating territories could also have an impact on our revenues and cash flows by affecting natural gas prices. To the extent the frequency of extreme weather events increases, this could increase our costs of providing services. We may not be able to pass on the higher costs to our customers or recover all the costs related to mitigating these physical risks. To the extent financial markets view climate change and emissions of greenhouse gases as a financial risk, this could adversely affect our ability to access capital markets or cause us to receive less favorable terms and conditions in future financings. Our business could be affected by the potential for investigations and lawsuits related to or against greenhouse gas emitters based on the claimed connection between greenhouse gas emissions and climate change, which could impact adversely our business, results of operations and cash flows.

Our certificate of incorporation and bylaws may delay or prevent a transaction that stockholders would view as favorable.

Our certificate of incorporation and bylaws, as well as Delaware law, contain provisions that could delay, defer or prevent an unsolicited change in control of Chesapeake Utilities, which may negatively affect the market price of our common stock or the ability of stockholders to participate in a transaction in which they might otherwise receive a premium for their shares over the then current market price. These provisions may also prevent changes in management. In addition, our Board of Directors is authorized to issue preferred stock without stockholder approval on such terms as our Board of Directors may determine. Our common stockholders will be subject to, and may be negatively affected by, the rights of any preferred stock that may be issued in the future.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 1C. CYBERSECURITY

We recognize the importance of assessing, identifying, and managing material risks associated with cybersecurity threats, as such term is defined in Item 106(a) of Regulation S-K. We face a multitude of increasing cybersecurity threats, including those that target the Nation's critical infrastructure sectors. Reliable service and operational continuity are critical to our success and the welfare of those we serve, including our ability to safely and reliably deliver energy to our customers through our transmission, distribution, and generation systems. We are committed to maintaining robust governance and oversight of these risks and to investing in the implementation of mechanisms, controls, technologies, and processes designed to help us assess, identify, and manage these risks in an everchanging landscape.

To mitigate the threat to our business, we take a comprehensive, cross-functional approach to cybersecurity risk management. Our management team is actively involved in the oversight and implementation of our risk management program, of which cybersecurity represents an important component. At least annually, we conduct a cybersecurity risk assessment that evaluates information from internal stakeholders and external sources. The results of the assessment inform our alignment and prioritization of initiatives to enhance our security controls. As described in more detail below, we have established policies, standards, processes and practices for assessing, identifying, and managing material risks from cybersecurity threats which follow frameworks established by the National Institute of Standards and Technology (NIST). These include, among other things: security awareness training for employees; mechanisms to detect and monitor unusual network activity; services that identify cybersecurity threats; conducting scans of the threat environment; evaluating our industry's risk profile; utilizing internal and external audits; conducting threat and vulnerability assessments; and containment and incident response tools. We also actively engage with industry groups for benchmarking and awareness of best practices. We maintain controls and procedures that are designed to ensure prompt escalation of certain cybersecurity incidents so that decisions regarding public disclosure and reporting of such incidents can be made in a timely manner.

Our approach to cybersecurity risk management includes the following key elements:

- Multi-Layered Defense and Continuous Monitoring: We work to protect our business from cybersecurity threats through multi-layered defenses and apply lessons learned from our defense and monitoring efforts to help prevent future attacks. We utilize data analytics to detect anomalies and review trends in the data. We regularly assess and deploy technical safeguards designed to protect our information systems from cybersecurity threats. Such safeguards are regularly evaluated and enhanced based on vulnerability assessments, cybersecurity threat intelligence and incident response experience.

- Information Sharing and Collaboration: We share and receive threat intelligence and best practices with industry peers, government agencies, information sharing and analysis centers, industry trade organizations, and cybersecurity forums. These relationships enable the rapid sharing of information around threat and vulnerability mitigation.

- Third-Party Risk Assessments: We engage third-party services to conduct assessments of our security controls, whether through penetration testing, independent audits or consulting on best practices to address new challenges. These assessments include testing both the design and operational effectiveness of security controls.

- Companywide Policies and Procedures: We have companywide cybersecurity policies and procedures, such as encryption standards, antivirus protection, remote access protocols, multi-factor authentication, protection of confidential information, and the use of the internet, social media, email, and wireless devices. These policies go through an internal review process and are approved by the appropriate members of management.

- Training and Awareness: We provide awareness training to our employees to help identify, avoid and mitigate cybersecurity threats. Our employees routinely participate in phishing campaigns, education that reinforces compliance with our policies, standards and practices, and other awareness training. We also periodically perform simulations and other exercises with management and incorporate external resources and advisors as needed. Our team of cybersecurity professionals collaborate with stakeholders across our business units to further analyze the risk to the Company, and form detection, mitigation and remediation strategies.

- Supplier Engagement: We work collectively with our suppliers to support cybersecurity resiliency in our supply chain. The Company uses a variety of processes to address third-party cybersecurity threats, including reviewing the cybersecurity practices of such provider(s), contractually imposing obligations on the provider(s), notifications in the event of any known or suspected cyber incident, conducting security assessments, and periodic reassessments during the course of the Company's engagement with such provider(s).

As of the date of this Form 10-K, there have not been any cybersecurity incidents that have materially affected our business strategy, results of operations or financial condition. There can be no guarantee that our policies and procedures will be followed or, if followed, will be effective. For more information regarding the risks we face from cybersecurity threats, please see *Item 1A*, *Risk Factors*, which should be read in conjunction with this Item 1C.

Cybersecurity Risk Governance and Oversight

The Company's Board, in conjunction with its Audit Committee, oversees management's approach to cybersecurity risk and its alignment with the Company's risk management program. The Board and Audit Committee receive reports from management about the prevention, detection, mitigation, and remediation of cybersecurity incidents, including material security risks and vulnerabilities. Additionally, management provides the Audit Committee with updates on cybersecurity risk assessments, risk mitigation strategies, and relevant internal and industry cybersecurity matters. The Company's Chief Information Officer ("CIO") is responsible for developing and implementing our information security program and reporting on cybersecurity matters to the Board and Audit Committee. The Company's CIO has 25 years of experience in the information technology industry. The CIO reports to the Chief Executive Officer and is supported by a dedicated cybersecurity team within our information systems department, as well as a multidisciplinary incident response team. Employees across the organization also have a role in our cybersecurity defenses, which we believe improves our cybersecurity posture.

In addition, the Company's Risk Management Committee ("RMC") evaluates risks relating to cybersecurity, among other significant risks, and applicable mitigation plans to address such risks. The RMC is comprised of members of the executive leadership team. The RMC meets monthly and receives updates from the CIO or a member of our cybersecurity team. The RMC reviews security performance metrics, global security risks, security enhancements, and updates on our security posture.

ITEM 2. Properties.

Offices and other operational facilities

We own or lease offices and other operational facilities in our service territories located in Delaware, Maryland, Virginia, North Carolina, South Carolina, Florida, Pennsylvania and Ohio.

Regulated Energy Segment

The following table presents a summary of miles of assets operated by our natural gas distribution, natural gas transmission and electric business units as of December 31, 2023:

Operations	Miles
Natural Gas Distribution	
Delmarva Natural Gas (Natural gas pipelines)	2,075
Delmarva Natural Gas (Underground propane pipelines)	17
FPU (Natural gas pipelines)	3,154
Florida City Gas (Natural gas pipelines)	3,860
Natural Gas Transmission	
Eastern Shore	517
Florida City Gas	79
Peninsula Pipeline	177
Aspire Energy Express [1]	—
Electric Distribution	
FPU	906
Total	10,785

[1] Aspire Energy Express had less than 1 mile of natural gas pipeline at December 31, 2023.

Peninsula Pipeline also has a 50 percent jointly owned intrastate transmission pipeline with Seacoast Gas Transmission, LLC ("Seacoast Gas Transmission") in Nassau County, Florida. The 26-mile pipeline serves demand in both Nassau and Duval Counties.

Unregulated Energy Segment

The following table presents propane storage capacity, miles of underground distribution mains and transmission for our Unregulated Energy Segment operations as of December 31, 2023:

Operations	Gallons or miles
Propane distribution	
Propane storage capacity (gallons in millions)	8.9
Underground propane distribution mains (miles)	153
Unregulated Energy Transmission and gathering (Aspire Energy)	
Natural gas pipelines (miles)	2,800

ITEM 3. Legal Proceedings.

See Note 20, *Other Commitments and Contingencies* in the Consolidated Financial Statements, which is incorporated into Item 3 by reference.

ITEM 4. Mine Safety Disclosures.

Not applicable.

PART II

ITEM 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Common Stock Dividends and Stockholder Information:

Chesapeake Utilities common stock is traded on the New York Stock Exchange ("NYSE") under the ticker symbol CPK. As of February 16, 2024, we had 1,974 holders of record of our common stock. We declared quarterly cash dividends on our common stock totaling $2.305 per share in 2023 and $2.085 per share in 2022, and have paid a cash dividend to holders of our common stock for 63 consecutive years. Future dividend payments and amounts are at the discretion of the Board of Directors and will depend on our financial condition, results of operations, capital requirements, and other factors.

Indentures to our long-term debt contain various restrictions which limit our ability to pay dividends. Refer to *Item 8, Financial Statements and Supplementary Data* (see Note 12, *Long-Term Debt*, in the consolidated financial statements) for additional information.

Purchases of Equity Securities by the Issuer

The following table sets forth information on purchases by us or on our behalf of shares of our common stock during the quarter ended December 31, 2023:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs [2]	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs [2]
October 1, 2023 through October 31, 2023 [1]	663	$ 95.19	—	—
November 1, 2023 through November 30, 2023	—	—	—	—
December 1, 2023 through December 31, 2023	—	—	—	—
Total	663	$ 95.19	—	—

[1] In October 2023, we purchased 663 shares of common stock on the open market for the purpose of reinvesting the dividend on shares held in the Rabbi Trust accounts under the Non-Qualified Deferred Compensation Plan. The Non-Qualified Deferred Compensation Plan is discussed in detail in Item 8, Financial Statements and Supplementary Data (see Note 16, Employee Benefit Plans, in the consolidated financial statements).
[2] Except for the purpose described in footnote [1], we have no publicly announced plans or programs to repurchase our shares.

Information on certain of our equity compensation plans, for which shares of our common stock are authorized for issuance, is included in the section of our Proxy Statement captioned “Equity Compensation Plan Information” and is incorporated herein by reference.

Common Stock Performance Graph

The stock performance graph and table below compares cumulative total stockholder return on our common stock during the five fiscal years ended December 31, 2023, with the cumulative total stockholder return of the Standard & Poor's 500 Index and the cumulative total stockholder return of select peers, which include the following companies: Atmos Energy Corporation; Black Hills Corporation; New Jersey Resources Corporation; NiSource; Northwest Natural Gas Company; Northwestern Corporation; ONE Gas, Inc.; RGC Resources, Inc.; Spire, Inc.; and Unitil Corporation.

The comparison assumes $100 was invested on December 31, 2018 in our common stock and in each of the foregoing indices and assumes reinvested dividends. The comparisons in the graph below are based on historical data and are not intended to forecast the possible future performance of our common stock.

	2018	2019	2020	2021	2022	2023
Chesapeake Utilities	$ 100	$ 120	$ 138	$ 189	$ 156	$ 142
Industry Index	$ 100	$ 119	$ 99	$ 114	$ 122	$ 121
S&P 500 Index	$ 100	$ 131	$ 156	$ 200	$ 164	$ 207

ITEM 6. RESERVED

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This section provides management's discussion of Chesapeake Utilities and its consolidated subsidiaries, with specific information on results of operations, liquidity and capital resources, as well as discussion of how certain accounting principles affect our financial statements. It includes management's interpretation of our financial results and our operating segments, the factors affecting these results, the major factors expected to affect future operating results as well as investment and financing plans. This discussion should be read in conjunction with our consolidated financial statements and notes thereto in *Item 8, Financial Statements and Supplementary Data*.

Several factors exist that could influence our future financial performance, some of which are described in Item 1A*, Risk Factors*. They should be considered in connection with forward-looking statements contained in this Annual Report, or otherwise made by or on behalf of us, since these factors could cause actual results and conditions to differ materially from those set out in such forward-looking statements.

Earnings per share information is presented on a diluted basis, unless otherwise noted.

Acquisition of FCG

On November 30, 2023, we completed the acquisition of FCG for $923.4 million in cash, including working capital adjustments as defined in the agreement, pursuant to the previously disclosed stock purchase agreement with Florida Power & Light Company. Upon completion of the acquisition, FCG became a wholly-owned subsidiary of the Company and is included within our Regulated Energy segment. FCG serves approximately 120,000 residential and commercial natural gas customers across eight counties in Florida, including Miami-Dade, Broward, Brevard, Palm Beach, Hendry, Martin, St. Lucie and Indian River. Its natural gas system includes approximately 3,800 miles of distribution main and 80 miles of transmission pipe. Results for FCG are included within our consolidated results from the acquisition date.

In June 2023, FCG received approval from the Florida PSC for a $23.3 million total increase in base revenue in connection with its May 2022 rate case filing. The new rates, which became effective as of May 1, 2023, included the transfer of its SAFE program provisions from a rider clause to base rates, an increase in rates associated with a liquefied natural gas facility, and approval of FCG's proposed reserve surplus amortization mechanism ("RSAM") with a $25.0 million reserve amount. The RSAM is recorded as either an increase or decrease to accrued removal costs on the balance sheet, with a corresponding increase or decrease to depreciation and amortization expense.

The impact of FCG's results from the acquisition date and effects on our liquidity are discussed further below and throughout Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

Non-GAAP Financial Measures

This document, including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

We calculate Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. We calculate Adjusted Net Income and Adjusted EPS by deducting non-recurring costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. We believe that these non-GAAP financial measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit's and the overall Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP financial measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for the years ended December 31, 2023, 2022 and 2021:

Adjusted Gross Margin

(in thousands)	For the Year Ended December 31, 2023			
	Regulated Energy	**Unregulated Energy**	**Other and Eliminations**	**Total**
Operating Revenues	**$ 473,595**	**$ 223,148**	**$ (26,139)**	**$ 670,604**
Cost of Sales:				
Natural gas, propane and electric costs	(140,008)	(102,492)	26,019	(216,481)
Depreciation & amortization	(48,162)	(17,347)	8	(65,501)
Operations & maintenance expenses (1)	(27,485)	(31,507)	343	(58,649)
Gross Margin (GAAP)	**257,940**	**71,802**	**231**	**329,973**
Operations & maintenance expenses (1)	27,485	31,507	(343)	58,649
Depreciation & amortization	48,162	17,347	(8)	65,501
Adjusted Gross Margin (Non-GAAP)	**$ 333,587**	**$ 120,656**	**$ (120)**	**$ 454,123**

(in thousands)	For the Year Ended December 31, 2022			
	Regulated Energy	**Unregulated Energy**	**Other and Eliminations**	**Total**
Operating Revenues	**$ 429,424**	**$ 280,750**	**$ (29,470)**	**$ 680,704**
Cost of Sales:				
Natural gas, propane and electric costs	(127,172)	(162,683)	29,349	(260,506)
Depreciation & amortization	(52,707)	(16,257)	(9)	(68,973)
Operations & maintenance expenses (1)	(35,472)	(29,825)	9	(65,288)
Gross Margin (GAAP)	**214,073**	**71,985**	**(121)**	**285,937**
Operations & maintenance expenses (1)	35,472	29,825	(9)	65,288
Depreciation & amortization	52,707	16,257	9	68,973
Adjusted Gross Margin (Non-GAAP)	**$ 302,252**	**$ 118,067**	**$ (121)**	**$ 420,198**

(in thousands)	For the Year Ended December 31, 2021 Regulated Energy	Unregulated Energy	Other and Eliminations	Total
Operating Revenues	**$ 383,920**	**$ 206,869**	**$ (20,821)**	**$ 569,968**
Cost of Sales:				
Natural gas, propane and electric costs	(100,737)	(106,900)	20,687	(186,950)
Depreciation & amortization	(48,748)	(13,869)	(44)	(62,661)
Operations & maintenance expenses [(1)]	(32,780)	(24,123)	179	(56,724)
Gross Margin (GAAP)	**201,655**	**61,977**	**1**	**263,633**
Operations & maintenance expenses [(1)]	32,780	24,123	(179)	56,724
Depreciation & amortization	48,748	13,869	44	62,661
Adjusted Gross Margin (Non-GAAP)	**$ 283,183**	**$ 99,969**	**$ (134)**	**$ 383,018**

[(1)] Operations & maintenance expenses within the Consolidated Statements of Income are presented in accordance with regulatory requirements and to provide comparability within the industry. Operations & maintenance expenses which are deemed to be directly attributable to revenue producing activities have been separately presented above in order to calculate Gross Margin as defined under U.S. GAAP.

2023 to 2022 Gross Margin (GAAP) Variance – Regulated Energy

Gross Margin (GAAP) for the Regulated Energy segment for 2023 was $257.9 million, an increase of $43.9 million, or 20.5 percent, compared to 2022. Higher gross margin reflects contributions from the Company's Florida Natural Gas base rate proceeding, organic growth in the Company's natural gas distribution businesses and continued pipeline expansion projects, and contributions attributable to the acquisition of FCG. These increases were partially offset by reduced customer consumption resulting from the significantly warmer temperatures in our northern service territories throughout the year and increased employee costs related to growth initiatives, the ongoing competitive labor market and higher benefits costs.

2022 to 2021 Gross Margin (GAAP) Variance – Regulated Energy

Gross Margin (GAAP) for the Regulated Energy segment for the year ended December 31, 2022 compared to 2021 is described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated herein by reference.

2023 to 2022 Gross Margin (GAAP) Variance – Unregulated Energy

Gross Margin (GAAP) for the Unregulated Energy segment for 2023 was $71.8 million, which was largely consistent with gross margin for the prior year. The effects of changes in customer consumption due primarily to significantly warmer weather in our Mid-Atlantic and North Carolina service areas throughout the year and increased operating expenses and depreciation were largely offset by increased propane margins and fees and increased gathering charges and consumption for Aspire Energy.

2022 to 2021 Gross Margin (GAAP) Variance – Unregulated Energy

Gross Margin (GAAP) for the Unregulated Energy segment for the year ended December 31, 2022 compared to 2021 is described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated herein by reference.

Adjusted Net Income and Adjusted EPS

(in thousands, except shares and per share data)	Year Ended December 31, 2023	2022	2021
Net Income (GAAP)	**$ 87,212**	$ 89,796	$ 83,466
FCG transaction-related expenses, net [1]	**10,625**	—	—
Adjusted Net Income (Non-GAAP)	**$ 97,837**	$ 89,796	$ 83,466
Weighted average common shares outstanding - diluted	**18,434,857**	17,804,294	17,633,029
Earnings Per Share - Diluted (GAAP)	**$ 4.73**	$ 5.04	$ 4.73
FCG transaction-related expenses, net [1]	**0.58**	—	—
Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 5.31**	$ 5.04	$ 4.73

[1] Transaction-related expenses for the year ended December 31, 2023 represent costs incurred attributable to the acquisition of FCG, including pretax operating expenses of $10.4 million associated with legal, consulting and audit fees and $4.1 million of interest charges related to pretax fees and expenses associated with the Bridge Facility.

2023 to 2022 Net Income (GAAP) Variance

Net income (GAAP) for the year ended December 31, 2023 was $87.2 million, or $4.73 per share, compared to $89.8 million, or $5.04 per share in 2022. Net income for the year ended December 31, 2023 included $10.6 million of transaction-related expenses in connection with the FCG acquisition. Excluding these costs, net income increased by $8.0 million or 9 percent compared to the prior year.

2022 to 2021 Net Income (GAAP) Variance

Net income (GAAP) for the year ended December 31, 2022 compared to 2021 is described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated herein by reference.

Overview and Highlights

(in thousands except shares and per share data)

For the Year Ended December 31,	2023	2022	Increase (Decrease)	2022	2021	Increase (Decrease)
Operating Income						
Regulated Energy	**$ 126,199**	$ 115,317	$ 10,882	$ 115,317	$ 106,174	$ 9,143

FCG transaction-related expenses, net [(1)]	**0.58**	—	0.58	**—**	—	—
Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 5.31**	$ 5.04	$ 0.27	**$ 5.04**	$ 4.73	$ 0.31

[(1)] Transaction-related expenses for the year ended December 31, 2023 represent costs incurred attributable to the acquisition of FCG, including pretax operating expenses of $10.4 million associated with legal, consulting and audit fees and $4.1 million of interest charges related to pretax fees and expenses associated with the Bridge Facility.

2023 compared to 2022

Key variances in operations between 2023 and 2022 included:

(in thousands, except per share data)	Pre-tax Income	Net Income	Earnings Per Share
Year ended December 31, 2022 Adjusted Results**	$ 123,628	$ 89,796	$ 5.04
Non-recurring Items:			
One-time benefit associated with reduction in state tax rate	—	2,469	0.13
Absence of interest income from federal income tax refund	(826)	(600)	(0.03)
Absence of gain from sales of assets	(1,902)	(1,382)	(0.07)
	(2,728)	487	0.03
Increased (Decreased) Adjusted Gross Margins:			
Contribution from rate changes associated with Florida Natural Gas base rate proceeding*	13,361	9,820	0.53
Increased propane margins per gallon and fees	8,821	6,483	0.34
Contribution from the acquisition of FCG	8,687	6,385	0.35
Natural gas growth (excluding service expansions)	6,214	4,567	0.25
Natural gas transmission service expansions*	4,812	3,537	0.19
Contributions from regulated infrastructure programs*	2,597	1,909	0.10
Increased margins from Aspire Energy	1,141	839	0.05
Increased adjusted gross margin from off-system natural gas capacity sales	960	706	0.04
Customer consumption primarily resulting from weather	(13,627)	(10,016)	(0.54)
	32,966	24,230	1.31
(Increased) Decreased Other Operating Expenses (Excluding Natural Gas, Electricity and Propane Costs):			
Payroll, benefits and other employee-related expenses	(9,013)	(6,625)	(0.36)
FCG operating expenses	(4,190)	(3,080)	(0.17)
Facilities expenses, maintenance costs and outside services	(1,756)	(1,290)	(0.07)
Customer service related costs	(820)	(603)	(0.03)
Regulatory expenses	(658)	(484)	(0.03)
Depreciation, amortization and property tax costs	615	452	0.02
Decreased vehicle expenses	577	424	0.02
	(15,245)	(11,206)	(0.62)
Interest charges	(8,494)	(6,243)	(0.34)
Change in pension expense	(1,453)	(1,068)	(0.06)
Increase in shares outstanding due to 2023 and 2022 equity offerings	—	—	(0.17)
Net other changes	1,070	1,841	0.12
Year ended December 31, 2023 Adjusted Results**	$ 129,744	$ 97,837	$ 5.31

* See the Major Projects and Initiatives table

** Transaction-related expenses attributable to the acquisition of FCG have been excluded from the Company's non-GAAP measures of adjusted net income and adjusted EPS See previous tables for a reconciliation of these items against the related GAAP measures

Summary of Key Factors

Recently Completed and Ongoing Major Projects and Initiatives

We constantly pursue and develop additional projects and initiatives to serve existing and new customers, further grow our businesses and earnings, and increase shareholder value. The following table includes the major projects and initiatives recently completed and currently underway. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year. Our practice is to add new projects and initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated.

	Adjusted Gross Margin				
	Year Ended December 31,			Estimate for Calendar Year	
(in thousands)	2021	2022	2023	2024	2025

[1] Includes adjusted gross margin generated from interim services through the project in-service date in September 2023.
[2] Includes adjusted gross margin during 2023 comprised of both interim rates and permanent base rates which became effective in March 2023.
[3] Rate case application filed with the Maryland PSC in January 2024. See additional information provided below.

Discussion of Major Projects and Initiatives

Pipeline Expansions

Guernsey Power Station

Guernsey Power Station and our affiliate, Aspire Energy Express, are engaged in a firm transportation capacity agreement whereby Guernsey Power Station has constructed a power generation facility and Aspire Energy Express provides firm natural gas transportation service to this facility. Guernsey Power Station commenced construction of the project in October 2019, Aspire Energy Express completed construction of the gas transmission facilities in the fourth quarter of 2021, and the facility went into service during the first quarter of 2023. The project generated additional adjusted gross margin of $0.1 million for the year ended December 31, 2023, and is expected to produce adjusted gross margin of approximately $1.5 million in 2024 and beyond.

Southern Expansion

Eastern Shore installed a new natural gas driven compressor skid unit at its existing Bridgeville, Delaware compressor station that provides 7,300 Dts of incremental firm transportation pipeline capacity. The project was placed in service in the fourth quarter of 2023 and generated adjusted gross margin of $0.6 million for the year ended December 31, 2023 and is expected to produce adjusted gross margin of approximately $2.3 million in 2024 and beyond.

Winter Haven Expansion

In May 2021, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with Florida Natural Gas for an incremental 6,800 Dts/d of firm service in the Winter Haven, Florida area. As part of this agreement, Peninsula Pipeline constructed a new interconnect with FGT and a new regulator station for Florida Natural Gas. Florida Natural Gas is using the additional firm service to support new incremental load due to growth in the area, including providing service, most immediately, to a new can manufacturing facility, as well as reliability and operational benefits to Florida Natural Gas's existing distribution system in the area. In connection with Peninsula Pipeline's new regulator station, Florida Natural Gas also extended its distribution system to connect to the new station. This expansion was placed in service in the third quarter of 2022. The project generated additional adjusted gross margin of $0.4 million for the year ended December 31, 2023, and is expected to produce adjusted gross margin of approximately $0.6 million in 2024 and beyond.

Beachside Pipeline Expansion

In June 2021, Peninsula Pipeline and FCG entered into a Transportation Service Agreement for an incremental 10,176 Dts/d of firm service in Indian River County, Florida, to support Florida City Gas' growth along the Indian River's barrier island. As part of this agreement, Peninsula Pipeline constructed approximately 11.3 miles of pipeline from its existing pipeline in the Sebastian, Florida, area east under the Intercoastal Waterway and southward on the barrier island. Construction was completed and the project went into service in April 2023. Subsequent to the acquisition of FCG, the agreement is now an affiliate agreement. The project generated additional adjusted gross margin of $1.8 million for the year ended December 31, 2023, and is expected to produce adjusted gross margin of approximately $2.5 million in 2024 and $2.4 million in 2025 and beyond.

North Ocean City Connector

During the second quarter of 2022, we began construction of an extension of service into North Ocean City, Maryland. Our Delaware natural gas division and Sandpiper installed approximately 5.4 miles of pipeline across southern Sussex County, Delaware to Fenwick Island, Delaware and Worcester County, Maryland. The project reinforces our existing system in Ocean City, Maryland and enables incremental growth along the pipeline. Construction of this project was completed in the second quarter of 2023. The Company filed a natural gas rate case application with the PSC for the state of Maryland in January 2024 as discussed below. Adjusted gross margin in connection with this project is contingent upon the completion of the rate case and inclusion of the project in rate base. As a result, we expect this expansion to generate annual adjusted gross margin of approximately $0.5 million beginning in 2025, with additional margin opportunities from incremental growth.

St. Cloud / Twin Lakes Expansion

In July 2022, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 2,400 Dt/day of firm service in the St. Cloud, Florida area. As part of this agreement, Peninsula Pipeline constructed a pipeline extension and regulator station for FPU. The extension supports new incremental load due to growth in the area, including providing service, most immediately, to the residential development, Twin Lakes. The expansion also improves reliability and provides operational benefits to FPU's existing distribution system in the area, supporting future growth. This project was placed into service in July 2023 and generated additional adjusted gross margin of $0.3 million for the year ended December 31, 2023. We expect this extension to generate additional annual adjusted gross margin of approximately $0.6 million in 2024 and beyond.

Clean Energy Expansion

During the fourth quarter of 2022, Clean Energy Fuels ("Clean Energy") and Florida Natural Gas entered into a precedent agreement for firm transportation services associated with a CNG fueling station Clean Energy is constructing. We installed approximately 2.2 miles of main extension in Davenport, Florida to support the filling station which was placed into service during September 2023. Our subsidiary, Marlin Gas Services, provided interim services to Clean Energy during the construction phase of the project. The project generated additional adjusted gross margin of $0.9 million for the year ended December 31, 2023, and is expected to contribute adjusted gross margin of approximately $1.0 million in 2024 and $1.1 million in 2025 and beyond.

Wildlight Expansion

In August 2022, Peninsula Pipeline and FPU filed a joint petition with the Florida PSC for approval of its Transportation Service Agreement associated with the Wildlight planned community located in Nassau County, Florida. The project enables us to meet the significant growing demand for service in Yulee, Florida. The agreement will enable us to build the project during the construction and build-out of the community, and charge the reservation rate as each phase of the project goes into service. Construction of the pipeline facilities will occur in two separate phases. Phase one consists of three extensions with associated facilities, and a gas injection interconnect with associated facilities. Phase two will consist of two additional pipeline extensions. Various phases of the project commenced in the first quarter of 2023, with construction on the overall project continuing through 2025. The project generated additional adjusted gross margin of $0.5 million for the year ended December 31, 2023, and is expected to contribute adjusted gross margin of approximately $2.0 million in 2024 and beyond.

Lake Wales Expansion

In February 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with our Florida Natural Gas distribution business, FPU, for an additional 9,000 Dt/d of firm service in the Lake Wales, Florida area. The PSC approved the petition in April 2023. Approval of the agreement enabled Peninsula Pipeline to complete the acquisition of an existing pipeline in May 2023 that is being utilized to serve both current and new natural gas customers. The project generated additional adjusted gross margin of $0.3 million for the year ended December 31, 2023, and is expected to contribute adjusted gross margin of approximately $0.5 million in 2024 and beyond.

Newberry Expansion

In April 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 8,000 Dt/d of firm service in the Newberry, Florida area. The petition was approved by the Florida PSC in the third quarter of 2023. Peninsula Pipeline will construct a pipeline extension, which will be used by FPU to support the development of a natural gas distribution system to provide gas service to the City of Newberry. A filing to address the acquisition and conversion of propane community gas systems in Newberry was made in November 2023, and the Florida PSC is scheduled to vote on this in March 2024. The project is expected to contribute adjusted gross margin of approximately $0.9 million in 2024 and $2.6 million in 2025 and beyond.

Worcester Resiliency Upgrade

In August 2023, Eastern Shore filed an application with the FERC requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, DE and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. Eastern Shore has requested certificate authorization by December 2024, with a target in-service date by the third quarter of 2025.

East Coast Reinforcement Projects

In December 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC is scheduled to vote on the projects in March 2024.

Central Florida Reinforcement Projects

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida. The projects are driven by the need for increased supply to communities in central Florida that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Plant City and Lake Mattie with an additional 5,000 Dts/day and 8,700 Dts/day, respectively.

CNG/RNG/LNG Transportation and Infrastructure

We have made a commitment to meet customer demand for CNG, RNG and LNG in the markets we serve. This has included making investments within Marlin Gas Services to be able to transport these products through its virtual pipeline fleet to customers. To date, we have also made an infrastructure investment in Ohio, enabling RNG to fuel a third-party landfill fleet and to transport RNG to end use customers off our pipeline system. Similarly, we announced in March 2022, the opening of a high-capacity CNG truck and tube trailer fueling station in Port Wentworth, Georgia. As one of the largest public access CNG stations on the East Coast, it will offer a RNG option to customers in the near future. We constructed the station in partnership with Atlanta Gas Light, a subsidiary of Southern Company Gas.

We are also involved in various other projects, all at various stages and all with different opportunities to participate across the energy value chain. In many of these projects, Marlin will play a key role in ensuring the RNG is transported to one of our many pipeline systems where it will be injected. We include our RNG transportation service and infrastructure related adjusted gross margin from across the organization in combination with our CNG and LNG projects.

For the year ended December 31, 2023, we generated $0.1 million in additional adjusted gross margin associated with the transportation of CNG and RNG by Marlin's virtual pipeline and Aspire Energy's Noble Road RNG pipeline. We estimate annual adjusted gross margin of approximately $12.5 million in 2024, and $14.0 million in 2025 for these transportation related services, with potential for additional growth in future years.

Full Circle Dairy

In February 2023, we announced plans to construct, own and operate a dairy manure RNG facility at Full Circle Dairy in Madison County, Florida. The project consists of a facility converting dairy manure to RNG and transportation assets to bring the gas to market. The first injection of RNG is projected to occur in the first half of 2024.

Noble Road Landfill RNG Project

In October 2021, Aspire Energy completed construction of its Noble Road Landfill RNG pipeline project, a 33.1-mile pipeline, which transports RNG generated from the Noble Road landfill to Aspire Energy's pipeline system, displacing conventionally produced natural gas. In conjunction with this expansion, Aspire Energy also upgraded an existing compressor station and installed two new metering and regulation sites. The RNG volume is expected to represent nearly 10 percent of Aspire Energy's gas gathering volumes.

Regulatory Initiatives

Florida GUARD Program

In February 2023, FPU filed a petition with the Florida PSC for approval of the GUARD program. GUARD is a ten-year program to enhance the safety, reliability, and accessibility of portions of our natural gas distribution system. We identified various categories of projects to be included in GUARD, which include the relocation of mains and service lines located in rear easements and other difficult to access areas to the front of the street, the replacement of problematic distribution mains, service lines, and maintenance and repair equipment and system reliability projects. In August 2023, the Florida PSC approved the GUARD program, which included $205 million of capital expenditures projected to be spent over a 10-year period. For the year ended December 31, 2023, there was $0.4 million of incremental adjusted gross margin generated pursuant to the program. The program is expected to generate $2.4 million of adjusted gross margin in 2024 and $5.1 million in 2025.

FCG SAFE Program

In June 2023, the Florida PSC issued the approval order for the continuation of the SAFE program beyond its 2025 expiration date and inclusion of 150 miles of additional mains and services located in rear property easements. The SAFE program is designed to relocate certain mains and facilities associated with rear lot easements to street front locations to improve FCG's ability to inspect and maintain the facilities and reduce opportunities for damage and theft. In the same order, the Commission approved a replacement of 160 miles of pipe that was used in the 1970s and 1980s and shown through industry research to exhibit premature failure in the form of cracking. The program includes projected capital expenditures of $205 million over a 10-year period. The program is expected to generate $2.7 million of adjusted gross margin in 2024 and $5.3 million in 2025.

Capital Cost Surcharge Programs

In December 2019, the FERC approved Eastern Shore's capital cost surcharge to become effective January 1, 2020. The surcharge, an approved item in the settlement of Eastern Shore's last general rate case, allows Eastern Shore to recover capital costs associated with mandated highway or railroad relocation projects that required the replacement of existing Eastern Shore facilities. In 2023, there was $0.8 million of incremental adjusted gross margin generated pursuant to the program. Eastern Shore expects to produce adjusted gross margin of approximately $4.0 million in 2024 and $4.4 million in 2025 from relocation projects, which is ultimately dependent upon the timing of filings and the completion of construction.

Florida Natural Gas Rate Case Proceeding

In May 2022, our legacy natural gas distribution businesses in Florida filed a consolidated natural gas rate case with the Florida PSC. The application included a request for the following: (i) permanent rate relief of approximately $24.1 million, effective January 1, 2023; (ii) a depreciation study also submitted with the filing; (iii) authorization to make certain changes to tariffs to include the consolidation of rates and rate structure across the businesses and to unify the Florida Natural Gas distribution business under FPU; (iv) authorization to retain the acquisition adjustment recorded at the time of the FPU merger in our revenue requirement; and (v) authorization to establish an environmental remediation surcharge for the purposes of addressing future expected remediation costs for FPU MGP sites. In August 2022, interim rates were approved by the Florida PSC in the amount of approximately $7.7 million on an annualized basis, effective for all meter readings in September 2022. The discovery process and related hearings were concluded during the fourth quarter of 2022 and briefs were submitted in the same quarter of 2022. In January 2023, the Florida PSC approved the application for consolidation and permanent rate relief of approximately $17.2 million on an annual basis. Actual rates in connection with the rate relief were approved by the Florida PSC in February 2023 with an effective date of March 1, 2023. For the year ended December 31, 2023, there was $15.8 million of adjusted gross margin generated pursuant to this proceeding, and it is expected to generate $17.2 million of total adjusted gross margin in 2024 and 2025.

Maryland Natural Gas Rate Case

In January 2024, our natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, “Maryland natural gas distribution businesses”) filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, we are seeking approval of the following: (i) permanent rate relief of approximately $6.9 million; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses under the new corporate entity which we anticipate will be called Chesapeake Utilities of Maryland, Inc.; and (iii) authorization to establish a rider for recovery of the costs associated with our new technology systems. The outcome of the application is subject to review and approval by the Maryland PSC.

Storm Protection Plan

In 2020, the Florida PSC implemented the Storm Protection Plan ("SPP") and Storm Protection Plan Cost Recovery Clause ("SPPCRC"), which require electric utilities to petition the Florida PSC for approval of a Transmission and Distribution Storm Protection Plan that covers the utility’s immediate 10-year planning period with updates to the plan at least every 3 years. The SPPCRC rules allow the utility to file for recovery of associated costs related to its SPP. Our Florida electric distribution operation's SPP and SPPCRC were filed during the first quarter of 2022 and approved in the fourth quarter of 2022, with modifications, by the Florida PSC. For the year ended December 31, 2023, this initiative generated incremental adjusted gross margin of $0.8 million, and is expected to generate $2.4 million in 2024 and $4.0 million in 2025. We expect continued investment under the SPP going forward.

COVID-19 Regulatory Proceeding

In October 2020, the Florida PSC approved a joint petition of our natural gas and electric distribution utilities in Florida to establish a regulatory asset to record incremental expenses incurred due to COVID-19. The regulatory asset allows us to obtain recovery of these costs in the next base rate proceedings. Our Florida regulated business units reached a settlement with the Florida OPC in June 2021, enabling the business units to establish a regulatory asset of $2.1 million. This amount includes COVID-19 related incremental expenses for bad debt write-offs, personnel protective equipment, cleaning and business information services for remote work. Our Florida regulated business units are currently amortizing the amount over two years effective January 1, 2022 and recovering the regulatory asset through the Purchased Gas Adjustment and Swing Service mechanisms for the natural gas business units and through the Fuel Purchased Power Cost Recovery clause for the electric division. This resulted in additional adjusted gross margin of $1.0 million annually for both 2022 and 2023, which was offset by a corresponding amortization of regulatory asset expense in each year.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption

Weather had a significant impact on customer consumption during 2023, resulting in adjusted gross margin being negatively impacted by approximately $13.6 million compared to 2022 driven largely by significantly warmer weather in some of the Company's service territories resulting in reduced consumption. The following table summarizes heating degree day ("HDD") and cooling degree day ("CDD") variances from the 10-year average HDD/CDD ("Normal") for the years ended 2023 compared to 2022, and 2022 compared to 2021.

HDD and CDD Information

	For the Years Ended December 31,					
	2023	2022	Variance	2022	2021	Variance
Delmarva						
Actual HDD	**3,416**	4,088	(672)	4,088	3,849	239
10-Year Average HDD ("Normal")	**4,161**	4,147	14	4,147	4,182	(35)
Variance from Normal	**(745)**	(59)		(59)	(333)	
Florida						
Actual HDD	**664**	836	(172)	836	829	7
10-Year Average HDD ("Normal")	**826**	828	(2)	828	839	(11)

Variance from Normal	**167**	(103)		(103)	(265)	

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula and our legacy Florida Natural Gas distribution business increased by approximately 5.4 percent and 3.9 percent, respectively, during 2023.

On the Delmarva Peninsula, a larger percentage of the adjusted gross margin growth was generated from residential growth given the expansion of gas into new housing communities and conversions to natural gas as our distribution infrastructure continues to build out. In Florida, as new communities continue to build out due to population growth and the additional infrastructure to support the growth. there is increased load from both residential customers as well as new commercial and industrial customers. The details are provided in the following table:

	Adjusted Gross Margin Increase	
	For the Year Ended December 31, 2023	
(in thousands)	Delmarva Peninsula	Florida
Customer growth:		
Residential	$ 1,895	$ 1,599
Commercial and industrial	589	2,131
Total customer growth [(1)]	$ 2,484	$ 3,730

[(1)] Customer growth amounts for our legacy Florida operations include the effects of revised rates associated with the Company's natural gas base rate proceeding, but exclude the effects of the FCG acquisition

For the Year Ended December	2023	2022	Increase (Decrease)	2022	2021	Increase (Decrease)
(in thousands)						
Revenue	**$ 473,595**	$ 429,424	$ 44,171	$ 429,424	$ 383,920	$ 45,504
Natural gas and electric costs	**140,008**	127,172	12,836	127,172	100,737	26,435
Adjusted gross margin [(1)]	**333,587**	302,252	31,335	302,252	283,183	19,069
Operations & maintenance	**125,310**	112,963	12,347	112,963	108,190	4,773
Depreciation & amortization	**48,162**	52,707	(4,545)	52,707	48,748	3,959
FCG transaction-related expenses [(2)]	**10,355**	—	10,355	—	—	—
Other taxes	**23,561**	21,265	2,296	21,265	20,071	1,194
Other operating expenses	**207,388**	186,935	20,453	186,935	177,009	9,926
Operating Income	**$ 126,199**	$ 115,317	$ 10,882	$ 115,317	$ 106,174	$ 9,143

[(1)] Adjusted Gross Margin is a non-GAAP measure utilized by Management to review business unit performance. For a more detailed discussion on the differences between Gross Margin (GAAP) and Adjusted Gross Margin, see the Reconciliation of GAAP to Non-GAAP Measures presented above.
[(2)] Transaction-related expenses referred to in this table represent pretax operating expenses of $10.4 million associated with legal, consulting and audit fees incurred in connection with the acquisition of FCG.

2023 compared to 2022

Operating income for the Regulated Energy segment for 2023 was $126.2 million, an increase of $10.9 million, or 9.4 percent, compared to 2022. Excluding transaction-related expenses associated with the acquisition of FCG, operating income increased $21.2 million or 18.4 percent compared to the prior year. Higher operating income reflects contributions from our regulatory initiatives, organic growth in our natural gas distribution businesses and continued pipeline expansion projects, and contributions from the acquisition of FCG. These increases were partially offset by changes in customer consumption resulting from the significantly warmer temperatures in our northern service territories throughout the year. Excluding the transaction-related expenses described above, operating expenses increased by $10.1 million compared to the prior year primarily attributable to increased employee costs driven by growth initiatives, the ongoing competitive labor market and higher benefits costs and higher property taxes compared to the prior year. Increases in depreciation and amortization expense attributable to growth projects that were placed into service during the current year were offset by reductions related to revised depreciation rates approved in the Company's Florida Natural Gas rate case and electric depreciation study filing, and a $5.1 million RSAM adjustment from FCG.

Items contributing to the year-over-year adjusted gross margin increase are listed in the following table:

(in thousands)	
Rate changes associated with the Florida Natural Gas base rate proceeding [(1)]	$ 13,361
Contribution from the acquisition of FCG	8,687
Natural gas growth including conversions (excluding service expansions)	6,214
Natural gas transmission service expansions	4,812
Contributions from regulated infrastructure programs	2,597
Changes in customer consumption, driven by significantly warmer temperatures	(5,096)
Other variances	760
Year-over-year increase in adjusted gross margin	$ 31,335

[(1)] Includes adjusted gross margin contributions from interim rates and permanent base rates that became effective in March 2023.

The following narrative discussion provides further detail and analysis of the significant variances in adjusted gross margin detailed above.

Rate Changes Associated with the Florida Natural Gas Base Rate Proceeding
In August 2022, the Florida PSC approved interim rates starting in September 2022. In February 2023, we obtained a final rate order in connection with the Florida Natural Gas base rate proceeding with permanent rates effective on March 1, 2023. These interim and permanent rates contributed additional adjusted gross margin of $13.4 million. Refer to Note 18, *Rates and Other Regulatory Activities*, in the consolidated financial statements for additional information.

Contribution from Acquisition of FCG
FCG contributed adjusted gross margin of $8.7 million from the acquisition date.

Natural Gas Distribution Customer Growth
We generated additional adjusted gross margin of $6.2 million from natural gas customer growth. Adjusted gross margin increased by $3.7 million for our Florida Natural Gas distribution business and $2.5 million on the Delmarva Peninsula compared to 2022, due primarily to residential customer growth of 3.9 percent and 5.4 percent in Florida and on the Delmarva Peninsula, respectively.

Natural Gas Transmission Service Expansions
We generated increased adjusted gross margin of $4.8 million from natural gas transmission service expansions of Peninsula Pipeline, Eastern Shore and Aspire Energy Express.

Contributions from Regulated Infrastructure Programs
Contributions from regulated infrastructure programs generated incremental adjusted gross margin of $2.6 million for the year. The increase in adjusted gross margin was primarily related to FPU Electric's storm protection plan, Eastern Shore's capital surcharge program and Florida's GUARD program. Refer to Note 18, *Rates and Other Regulatory Activities*, in the consolidated financial statements for additional information.

Customer Consumption - Inclusive of Weather
We experienced reduced customer consumption for the year ended December 31, 2023, largely the result of significantly warmer weather experienced in the Delmarva service territory throughout the year resulting in reduced adjusted gross margin of $5.1 million compared to 2022.

The major components of the increase in other operating expenses are as follows:

(in thousands)		
FCG transaction-related expenses [1]	$	10,355
Payroll, benefits and other employee-related expenses		5,054
FCG operating expenses		4,190
Facilities expenses, maintenance costs and outside services		1,416
Customer service related costs		764
Regulatory expenses		658
Depreciation, amortization and property tax costs		(2,308)
Other variances		324
Year-over-year increase in other operating expenses	$	20,453

[1] Transaction-related expenses referred to in this table represent pretax operating expenses of $10.4 million associated with legal, consulting and audit fees incurred in connection with the acquisition of FCG.

2022 compared to 2021

The results for the Regulated Energy segment for the year ended December 31, 2022 compared to 2021 are described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated herein by reference.

UNREGULATED ENERGY

For the Year Ended December 31,	2023	2022	Increase (Decrease)	2022	2021	Increase (Decrease)
(in thousands)						
Revenue	**$ 223,148**	$ 280,750	$ (57,602)	$ 280,750	$ 206,869	$ 73,881
Propane and natural gas costs	**102,492**	162,683	(60,191)	162,683	106,900	55,783
Adjusted gross margin [1]	**120,656**	118,067	2,589	118,067	99,969	18,098
Operations & maintenance	**74,168**	70,489	3,679	70,489	57,905	12,584
Depreciation & amortization	**17,347**	16,257	1,090	16,257	13,869	2,388
Other taxes	**4,715**	3,971	744	3,971	3,768	203
Other operating expenses	**96,230**	90,717	5,513	90,717	75,542	15,175
Operating Income	**$ 24,426**	$ 27,350	$ (2,924)	$ 27,350	$ 24,427	$ 2,923

[1] Adjusted Gross Margin is a non-GAAP measure utilized by Management to review business unit performance. For a more detailed discussion on the differences between Gross Margin (GAAP) and Adjusted Gross Margin, see the Reconciliation of GAAP to Non-GAAP Measures presented above.

2023 Compared to 2022

Operating income for the Unregulated Energy segment for 2023 decreased by $2.9 million compared to 2022. Operating results were impacted by changes in customer consumption due to significantly warmer weather in our Mid-Atlantic and North Carolina service areas throughout the year as well as conversion of propane customers to our natural gas distribution service. Additionally, we experienced increased operating expenses associated with increased payroll, benefits and employee related expenses driven by competition in the current labor market, depreciation, amortization and property taxes, as well as increased costs for facilities, maintenance and outside services. These factors were partially offset by increased propane margins and fees and increased gathering charges and customer consumption for Aspire.

Adjusted Gross Margin

Items contributing to the year-over-year increase in adjusted gross margin are listed in the following table:

(in thousands)	
Propane Operations	
Increased propane margins and fees	$ 8,821
Propane customer consumption - primarily weather related	(8,235)
Decreased customer consumption due to conversion of customers to our natural gas system	(793)
Aspire Energy	
Increase in gathering margin	1,141
Increased customer consumption	496
Eight Flags	
Increased electric generation margin	1,018
Other variances	141
Year-over-year increase in adjusted gross margin	**$ 2,589**

The following narrative discussion provides further detail and analysis of the significant items in the foregoing table.

Propane Operations

- *Increased propane margins and fees* - Adjusted gross margin increased by $8.8 million, mainly due to increased margins and customer service fees. These market conditions, which include market pricing and competition with other propane suppliers, as well as the availability and price of alternative energy sources, may fluctuate based on changes in demand, supply and other energy commodity prices.
- *Propane customer consumption* - Adjusted gross margin was negatively impacted by $8.2 million as a result of reduced customer consumption driven by significantly warmer weather that our Mid-Atlantic and North Carolina service areas experienced throughout 2023.
- *Reduced customer consumption due to conversion of customers to natural gas* - Adjusted gross margin was reduced by $0.8 million as more customers converted from propane to our natural gas distribution service.

Aspire Energy

- *Increase in gathering charges* - Adjusted gross margin increased by $1.1 million primarily due to increased gathering charges associated with a large commercial customer.

- *Increased customer consumption* - Adjusted gross margin increased by $0.5 million despite warmer temperatures due to increased customer consumption from agricultural customers compared to the prior year.

Eight Flags

- *Increased electric generation margin* - Adjusted gross margin increased by $1.0 million due to increased electric generation compared to the prior year.

Other Operating Expenses

Items contributing to the period-over-period increase in other operating expenses are listed in the following table:

(in thousands)		
Increased payroll, benefits and other employee-related expenses	$	3,959
Increased depreciation, amortization and property tax costs		1,717
Other variances		(163)
Period-over-period increase in other operating expenses	**$**	**5,513**

2022 compared to 2021

The results for the Unregulated Energy segment for the year ended December 31, 2022 compared to 2021 are described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated by reference.

OTHER INCOME, NET

Other income, net was $1.4 million and $5.1 million for 2023 and 2022, respectively. Other income, net includes non-operating investment income (expense), interest income, late fees charged to customers, gains or losses from the sale of assets for our unregulated businesses and pension and other benefits expense. The decrease was primarily attributable to the absence of a one-time gain related to a building sale during 2022, the absence of interest income received in connection with a Federal Income Tax refund during 2022, and higher pension related expenses compared to the prior-year period.

INTEREST CHARGES

2023 Compared to 2022

Interest charges for 2023 increased by $12.6 million compared to the same period in 2022. This increase is primarily attributable to $6.2 million in interest expense as a result of long-term debt placements in 2023, including the November 2023 placement in connection with the FCG acquisition as well as $4.1 million related to bridge financing costs also attributable to the FCG acquisition. Higher interest expense on Revolver borrowings of $3.1 million driven by higher average interest rates compared to the prior year also contributed to the increase. The weighted-average interest rate on our Revolver borrowings was 5.4 percent for the year ended December 31, 2023 compared to 2.5 percent during the prior year as a result of the Federal Reserve actions in 2022 and 2023. These factors were partially offset by higher capitalized interest of $1.7 million during the current year associated with capital projects.

INCOME TAXES

2023 Compared to 2022

Income tax expense was $28.1 million for 2023 compared to $33.8 million for 2022. Our effective income tax rates were 24.4 percent and 27.4 percent for the years ended December 31, 2023 and 2022, respectively. Income tax expense for the year ended December 31, 2023 includes a $2.5 million benefit resulting from a reduction in the Pennsylvania state income tax rate. Excluding this change, our effective income tax rate was 26.5 percent in 2023.

Liquidity and Capital Resources

Our capital requirements reflect the capital-intensive and seasonal nature of our business and are principally attributable to investment in new plant and equipment, retirement of outstanding debt and seasonal variability in working capital. We rely on cash generated from operations, short-term borrowings, and other sources to meet normal working capital requirements and to temporarily finance capital expenditures. We may also issue long-term debt and equity to fund capital expenditures and to maintain our capital structure within our target capital structure range. We maintain effective shelf registration statements with the SEC, as applicable, for the issuance of shares of common stock under various types of equity offerings, including the DRIP and previously, shares of common stock under an ATM equity program. Depending on our capital needs and subject to market conditions, in addition to other possible debt and equity offerings, we may consider issuing additional shares under the direct share purchase component of the DRIP and/or under an ATM equity program.

Our energy businesses are weather-sensitive and seasonal. We normally generate a large portion of our annual net income and subsequent increases in our accounts receivable in the first and fourth quarters of each year due to significant volumes of natural gas, electricity, and propane delivered by our distribution operations, and our natural gas transmission operations to customers during the peak heating season. In addition, our natural gas and propane inventories, which usually peak in the fall months, are largely drawn down in the heating season and provide a source of cash as the inventory is used to satisfy winter sales demand.

Capital expenditures for investments in new or acquired plant and equipment are our largest capital requirements. Our capital expenditures were $1.1 billion in 2023, which includes $923.4 million attributable to the purchase of FCG and $3.9 million related to an acquisition in the propane distribution business.

The following table shows total capital expenditures for the year ended December 31, 2023 by segment and by business line:

(in thousands)	**For the Year Ended December 31, 2023**
Regulated Energy:	
Natural gas distribution	$ 109,245
Natural gas transmission	40,179
Electric distribution	19,745
Total Regulated Energy	169,169
Unregulated Energy:	
Propane distribution	14,287
Energy transmission	5,469
Other unregulated energy	20,508
Total Unregulated Energy	40,264
Other:	
Corporate and other businesses	1,762
Total Other	1,762
Legacy capital expenditures	**211,195**
FCG Acquisition [1]	**926,702**
Total 2023 Capital Expenditures	**$ 1,137,897**

(1) Includes amounts for the acquisition of FCG net of cash acquired and their capital expenditures from the date of the acquisition through December 31, 2023. For additional information on the FCG acquisition, refer to Note 4, *Acquisitions*, in the consolidated financial statements.

In the table below, we have provided a range of our forecasted capital expenditures by segment and business line for 2024:

	Estimate for Fiscal 2024	
(in thousands)	Low	High
Regulated Energy:		
Natural gas distribution	$ 150,000	$ 170,000
Natural gas transmission	90,000	120,000
Electric distribution	25,000	28,000
Total Regulated Energy	265,000	318,000
Unregulated Energy:		
Propane distribution	13,000	15,000
Energy transmission	5,000	6,000
Other unregulated energy	13,000	15,000
Total Unregulated Energy	31,000	36,000
Other:		
Corporate and other businesses	4,000	6,000
Total 2024 Forecasted Capital Expenditures	**$ 300,000**	**$ 360,000**

The 2024 forecast excludes potential acquisitions due to their opportunistic nature.

As a result of the Company's most recent 5-year strategic plan review where we revisited growth projections over the next five years for our legacy businesses and with the increased scale and investment opportunities related to FCG, the Company previously announced new capital expenditure guidance for the five-year period ended 2028 that will range from $1.5 billion to $1.8 billion.

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth or acquisition opportunities and availability of capital and other factors discussed in Item 1A, *Risk Factors*. Historically, actual capital expenditures have typically lagged behind the budgeted amounts. The timing of capital expenditures can vary based on delays in regulatory approvals, securing environmental approvals and other permits. The regulatory application and approval process has lengthened in the past few years, and we expect this trend to continue.

Capital Structure

We are committed to maintaining a sound capital structure and strong credit ratings. This commitment, along with adequate and timely rate relief for our regulated energy operations, is intended to ensure our ability to attract capital from outside sources at a reasonable cost, which will benefit our customers, creditors, employees and stockholders.

The following tables present our capitalization as of December 31, 2023 and 2022 and includes the impacts associated with financing the FCG acquisition:

	December 31, 2023		December 31, 2022	
(dollars in thousands)				
Long-term debt, net of current maturities	**$ 1,187,075**	**49 %**	$ 578,388	41 %
Stockholders' equity	**1,246,104**	**51 %**	832,801	59 %
Total capitalization, excluding short-term borrowings	**$ 2,433,179**	**100 %**	$ 1,411,189	100 %

	December 31, 2023		December 31, 2022	
(dollars in thousands)				
Short-term debt	**$ 179,853**	**7 %**	$ 202,157	12 %
Long-term debt, including current maturities	**1,205,580**	**46 %**	599,871	37 %
Stockholders' equity	**1,246,104**	**47 %**	832,801	51 %
Total capitalization, including short-term borrowings	**$ 2,631,537**	**100 %**	$ 1,634,829	100 %

Our target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. We seek to align permanent financing with the in-service dates of our capital projects. We may utilize more temporary short-term debt when the financing cost is attractive as a bridge to the permanent long-term financing or if the equity markets are volatile. We expect to move closer to our target capital structure over the next couple of years.

In November 2023, in connection with our acquisition of FCG, we completed an overnight offering resulting in the issuance of 4.4 million shares of our common stock at a price per share of $82.72 (net of underwriter discounts and commissions). We received net proceeds of $366.4 million which were used to partially finance the acquisition.

During 2023, there were no issuances under the DRIP. In 2022, we issued less than 0.1 million shares at an average price per share of $136.26 and received net proceeds of $4.5 million under the DRIP.

Shelf Agreements

We have entered into Shelf Agreements with Prudential and MetLife, whom are under no obligation to purchase any unsecured debt. In February 2023, we amended these Shelf Agreements, which expanded the total borrowing capacity and extended the term of the agreements for an additional three years from the effective dates to 2026. The following table summarizes our Shelf Agreements at December 31, 2023:

Shelf Agreement [1]	Total Borrowing Capacity	Less: Amount of Debt Issued	Less: Unfunded Commitments	Remaining Borrowing Capacity
(in thousands)				
Prudential Shelf Agreement	$ 405,000	$ (300,000)	—	$ 105,000
MetLife Shelf Agreement	200,000	(50,000)	—	150,000
Total	$ 605,000	$ (350,000)	$ —	$ 255,000

[1] The amended Prudential and MetLife Shelf Agreements both expire in February 2026.

Long-Term Debt

All of our outstanding Senior Notes set forth certain business covenants to which we are subject when any note is outstanding, including covenants that limit or restrict our ability, and the ability of our subsidiaries, to incur indebtedness, or place or permit liens and encumbrances on any of our property or the property of our subsidiaries.

In November 2023, we issued Senior Notes in the aggregate principal amount of $550.0 million at an average interest rate of 6.54 percent that were used to partially finance our acquisition of FCG which closed during the fourth quarter of 2023. These notes have varying maturity dates of between three and 15 years, and the outstanding principal balance of the notes will be due on their respective maturity dates with interest payments payable semiannually until the principal has been paid in full. These Senior Notes have similar covenants and default provisions as our other Senior Notes.

In March 2023, we issued 5.43 percent Senior Notes due March 14, 2038 in the aggregate principal amount of $80.0 million and used the proceeds received from the issuances of the Senior Notes to reduce short-term borrowings under our Revolver and to fund capital expenditures. These Senior Notes have similar covenants and default provisions as our other Senior Notes, and have an annual principal amortization payment beginning in the sixth year after the issuance.

Short-Term Borrowings

We are authorized by our Board of Directors to borrow up to $375.0 million of short-term debt, as required. At December 31, 2023 and 2022, we had $179.9 million and $202.2 million, respectively, of short-term borrowings outstanding at a weighted average interest rate of 5.83 percent and 5.04 percent, respectively. There were no borrowings outstanding under the sustainable investment sublimit of the 364-day tranche at December 31, 2023.

We have entered into several amendments to our Revolver which resulted in modifications to both tranches of the facility. The most recent amendment in October 2023 allowed for a change in our funded indebtedness ratio from 65 percent to 70 percent during the quarter in which the acquisition of FCG is consummated and the quarter subsequent to the closing of the acquisition. The amendment in August 2023 served to renew the 364-day tranche of the Revolver, providing for $175.0 million of short-term debt capacity. Additionally, the amendment for borrowings under the 364-day tranche shall now bear interest (i) based upon the SOFR, plus a 10-basis point credit spread adjustment, and an applicable margin of 1.05 percent or less, with such margin based on total indebtedness as a percentage of total capitalization or (ii) the base rate, solely at our discretion. Further, the amendment provided that borrowings under the 364-day green loan sublimit shall now bear interest at (i) the SOFR rate plus a 10-basis point credit spread adjustment and an applicable margin of 1.00 percent or less, with such margin based on total indebtedness as a percentage of total capitalization or (ii) the base rate plus 0.05 percent or less, solely at our discretion. The amendment entered into in 2022 served to reset the benchmark interest rate to SOFR and to eliminate a previous covenant which capped our investment limit to $150.0 million for investments where we maintain less than 50 percent ownership.

The 364-day tranche of the Revolver expires in August 2024 and the five-year tranche expires in August 2026. Borrowings under both tranches of the Revolver are subject to a pricing grid, including the commitment fee and the interest rate charged based upon our total indebtedness to total capitalization ratio for the prior quarter. As of December 31, 2023, the pricing under the 364-day tranche of the Revolver included a commitment fee of 9-basis points on undrawn amounts and an interest rate of 75-basis points over SOFR plus a 10-basis point SOFR adjustment on outstanding balances. As of December 31, 2023, the pricing under the five-year tranche of the Revolver included a commitment fee of 9-basis points on undrawn amounts and an interest rate of 95-basis points over SOFR plus a 10-basis point SOFR adjustment on outstanding balances.

The availability of funds under the Revolver is subject to conditions specified in the credit agreement, all of which we currently satisfy. These conditions include our compliance with financial covenants and the continued accuracy of representations and warranties contained in the Revolver's loan documents. We are required by the financial covenants in the Revolver to maintain, at the end of each fiscal year, a funded indebtedness ratio as described above. As of December 31, 2023, we are in compliance with this covenant.

Our total available credit under the Revolver at December 31, 2023 was $188.1 million. As of December 31, 2023, we had issued $7.0 million in letters of credit to various counterparties under the Revolver. These letters of credit are not included in the outstanding short-term borrowings and we do not anticipate that they will be drawn upon by the counterparties. The letters of credit reduce the available borrowings under the Revolver.

In connection with our acquisition of FCG, we entered into a 364-day Bridge Facility commitment with Barclays Bank PLC for up to $965.0 million. Upon closing of the FCG acquisition in November 2023, and with the completion of other financing activities as defined in the lending agreement, this facility was terminated without any funds drawn to finance the transaction.

Key statistics regarding our unsecured short-term credit facilities (our Revolver and previous bilateral lines of credit and revolving credit facility) for the years ended December 31, 2023, 2022 and 2021 are as follows:

(in thousands)	**2023**	2022	2021
Average borrowings during the year	**$ 130,246**	$ 170,434	$ 182,305
Weighted average interest rate for the year	**5.41 %**	2.49 %	1.03 %
Maximum month-end borrowings	**$ 206,460**	$ 225,050	$ 226,097

Cash Flows

The following table provides a summary of our operating, investing and financing cash flows for the years ended December 31, 2023, 2022 and 2021:

	For the Year Ended December 31,		
	2023	**2022**	**2021**
(in thousands)			
Net cash provided by (used in):			
Operating activities	**$ 203,482**	$ 158,882	$ 150,504
Investing activities	**(1,111,391)**	(136,448)	(223,023)
Financing activities	**906,609**	(21,206)	73,996
Net (decrease) increase in cash and cash equivalents	**(1,300)**	1,228	1,477
Cash and cash equivalents—beginning of period	**6,204**	4,976	3,499
Cash and cash equivalents—end of period	**$ 4,904**	$ 6,204	$ 4,976

<u>*Cash Flows Provided by Operating Activities*</u>

Changes in our cash flows from operating activities are attributable primarily to changes in net income, adjusted for non-cash items, such as depreciation and changes in deferred income taxes, and changes in working capital. Working capital requirements are determined by a variety of factors, including weather, the prices of natural gas, electricity and propane, the timing of customer collections, payments for purchases of natural gas, electricity and propane, and deferred fuel cost recoveries.

We normally generate a large portion of our annual net income and related increases in our accounts receivable in the first and fourth quarters of each year due to significant volumes of natural gas and propane delivered to customers during the peak heating season by our natural gas and propane operations and our natural gas supply, gathering and processing operation. In addition, our natural gas and propane inventories, which usually peak in the fall months, are largely drawn down in the heating season and provide a source of cash as the inventory is used to satisfy winter sales demand.

During 2023, net cash provided by operating activities was $203.5 million. Operating cash flows were primarily impacted by the following:

- Net income, adjusted for non-cash adjustments, provided a $170.0 million source of cash;
- Changes in net regulatory assets and liabilities due primarily to the change in fuel costs collected through the various cost recovery mechanisms resulted in a $20.1 million source of cash; and
- Other working capital changes, as well as propane inventory and the related hedging activity, resulted in a $9.8 million source of cash.

Cash Flows Used in Investing Activities

Net cash used in investing activities totaled $1.1 billion during the year ended December 31, 2023. Key investing activities contributing to the cash flow change included:

- Net cash of $925.0 million was used in 2023 to acquire FCG and a propane distribution business; and
- Cash used to pay for capital expenditures amounted to $188.6 million for 2023.

Cash Flows Provided by Financing Activities

Net cash provided by financing activities totaled $906.6 million for the year ended December 31, 2023. This source of cash was largely related to financing activities in connection with the FCG acquisition and included:

- A net increase in long-term debt borrowings resulting in a net source of cash of $605.5 million, including $627.0 million from issuances, offset by long-term repayments of $21.5 million;
- Net proceeds of $366.4 million from the issuance of common stock; partially offset by
- A $40.0 million use of cash for dividend payments in 2023; and
- Net repayments under lines of credit resulting in a use of cash of $22.5 million.

Contractual Obligations

We have the following contractual obligations and other commercial commitments as of December 31, 2023:

Contractual Obligations (in thousands)	Payments Due by Period 2024	2025-2026	2027-2028	After 2028	Total
Long-term debt (1)	$ 18,505	$ 160,079	$ 268,373	$ 762,376	$ 1,209,333
Operating leases (2)	2,771	4,062	2,788	5,243	14,864
Purchase obligations (3)					
Transmission capacity	45,314	87,627	70,030	128,326	331,297
Storage capacity	3,312	4,519	860	—	8,691
Commodities	30,983	—	—	—	30,983
Electric supply	6,431	12,936	12,961	12,961	45,289
Unfunded benefits (4)	228	485	474	1,131	2,318
Funded benefits (5)	2,018	4,035	4,035	2,172	12,260
Total Contractual Obligations	**$ 109,562**	**$ 273,743**	**$ 359,521**	**$ 912,209**	**$ 1,655,035**

(1) This represents principal payments on long-term debt. See *Item 8, Financial Statements and Supplementary Data,* Note 12*, Long-Term Debt*, for additional information. The expected interest payments on long-term debt are $62.4 million, $116.4 million, $92.8 million and $160.6 million, respectively, for the periods indicated above. Expected interest payments for all periods total $432.2 million.

(2) See *Item 8, Financial Statements and Supplementary Data,* Note 14*, Leases*, for additional information.

(3) See *Item 8, Financial Statements and Supplementary Data,* Note 20*, Other Commitments and Contingencies*, for additional information.

(4) These amounts associated with our unfunded post-employment and post-retirement benefit plans are based on expected payments to current retirees and assume a retirement age of 62 for currently active employees. There are many factors that would cause actual payments to differ from these amounts, including early retirement, future health care costs that differ from past experience and discount rates implicit in calculations. See *Item 8, Financial Statements and Supplementary Data,* Note 16*, Employee Benefit Plan*s, for additional information on the plans.

(5) We have recorded long-term liabilities of $0.2 million at December 31, 2023 for the FPU qualified, defined benefit pension plan. The assets funding this plan are in a separate trust and are not considered assets of ours or included in our balance sheets. We do not expect to make payments to the trust funds in 2024. Additional contributions may be required in future years based on the actual return earned by the plan assets and other actuarial assumptions, such as the discount rate and long-term expected rate of return on plan assets. See *Item 8, Financial Statements and Supplementary Data,* Note 16*, Employee Benefit Plan*s, for further information on the plans. Additionally, the Contractual Obligations table above includes deferred compensation obligations totaling $12.3 million, funded with Rabbi Trust assets in the same amount. The Rabbi Trust assets are recorded under Investments on the consolidated balance sheets. We assume a retirement age of 65 for purposes of distribution from this trust.

Off-Balance Sheet Arrangements

Our Board of Directors has authorized us to issue corporate guarantees securing obligations of our subsidiaries and to obtain letters of credit securing our subsidiaries' obligations. The maximum authorized liability under such guarantees and letters of credit as of December 31, 2023 was $35.0 million. The aggregate amount guaranteed at December 31, 2023 was approximately $24.3 million with the guarantees expiring on various dates through December 2024. In addition, the Board has authorized us to issue specific purpose corporate guarantees. The amount of specific purpose guarantees outstanding at December 31, 2023 was $4.0 million.

As of December 31, 2023, we have issued letters of credit totaling approximately $7.0 million related to the electric transmission services for FPU's electric division, the firm transportation service agreement between TETLP and our Delaware and Maryland divisions, the capacity agreement between NEXUS and Aspire, and our current and previous primary insurance carriers. These letters of credit have various expiration dates through October 2024. There have been no draws on these letters of credit as of December 31, 2023. We do not anticipate that the counterparties will draw upon these letters of credit, and we expect that they will be renewed to the extent necessary in the future. Additional information is presented in *Item 8, Financial Statements and Supplementary Data,* Note 20*, Other Commitments and Contingencies* in the consolidated financial statements.

Critical Accounting Estimates

We prepare our financial statements in accordance with GAAP. Application of these accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingencies during the reporting period. We base our estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Since a significant portion of our businesses are regulated and the accounting methods used by these businesses must comply with the requirements of the regulatory bodies, the choices available are limited by these regulatory requirements. In the normal course of business, estimated amounts are subsequently adjusted to actual results that may differ from the estimates.

Regulatory Assets and Liabilities

As a result of the ratemaking process, we record certain assets and liabilities in accordance with ASC Topic 980, *Regulated Operations*, and consequently, the accounting principles applied by our regulated energy businesses differ in certain respects from those applied by the unregulated businesses. Amounts are deferred as regulatory assets and liabilities when there is a probable expectation that they will be recovered in future revenues or refunded to customers as a result of the regulatory process. This is more fully described in Item 8, *Financial Statements and Supplementary Data,* Note 2, *Summary of Significant Accounting Policies,* in the consolidated financial statements. If we were required to terminate the application of ASC Topic 980, we would be required to recognize all such deferred amounts as a charge or a credit to earnings, net of applicable income taxes. Such an adjustment could have a material effect on our results of operations.

Financial Instruments

We utilize financial instruments to mitigate commodity price risk associated with fluctuations of natural gas, electricity and propane and to mitigate interest rate risk. We continually monitor the use of these instruments to ensure compliance with our risk management policies and account for them in accordance with GAAP, such that every derivative instrument is recorded as either an asset or a liability measured at its fair value. It also requires that changes in the derivatives' fair value are recognized in the current period earnings unless specific hedge accounting criteria are met. If these instruments do not meet the definition of derivatives or are considered "normal purchases and normal sales," they are accounted for on an accrual basis of accounting.

Additionally, GAAP also requires us to classify the derivative assets and liabilities based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the fair value of the assets and liabilities and their placement within the fair value hierarchy.

We determined that certain propane put options, call options, swap agreements and interest rate swap agreements met the specific hedge accounting criteria. We also determined that most of our contracts for the purchase or sale of natural gas, electricity and propane either: (i) did not meet the definition of derivatives because they did not have a minimum purchase/sell requirement, or (ii) were considered "normal purchases and normal sales" because the contracts provided for the purchase or sale of natural gas, electricity or propane to be delivered in quantities that we expect to use or sell over a reasonable period of time in the normal course of business. Accordingly, these contracts were accounted for on an accrual basis of accounting.

Additional information about our derivative instruments is disclosed in Item 8, *Financial Statements and Supplementary Data,* Note 8, *Derivative Instruments,* in the consolidated financial statements.

Goodwill and Other Intangible Assets

We test goodwill for impairment at least annually in December, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. We generally use a present value technique based on discounted cash flows to estimate the fair value of our reporting units. An impairment charge is recognized if the carrying value of a reporting unit's goodwill exceeds its fair value. The annual impairment testing for 2023 indicated no impairment of goodwill. At December 31, 2023, our goodwill balance totaled $508.2 million including $461.2 million attributable to the acquisition of FCG. Additional information is presented in Item 8*, Financial Statements and Supplementary Data,* Note 4, *Acquisitions,* and Note 10*, Goodwill and Other Intangible Assets,* in the consolidated financial statements.

Other Assets Impairment Evaluations

We periodically evaluate whether events or circumstances have occurred which indicate that long-lived assets may not be recoverable. When events or circumstances indicate that an impairment is present, we record an impairment loss equal to the excess of the asset's carrying value over its fair value, if any.

Pension and Other Postretirement Benefits

Pension and other postretirement plan costs and liabilities are determined on an actuarial basis and are affected by numerous assumptions and estimates including the market value of plan assets, estimates of the expected returns on plan assets, assumed discount rates, the level of contributions made to the plans, and current demographic and actuarial mortality data. The assumed discount rates and the expected returns on plan assets are the assumptions that generally have the most significant impact on the pension costs and liabilities. The assumed discount rates, the assumed health care cost trend rates and the assumed rates of retirement generally have the most significant impact on our postretirement plan costs and liabilities. Additional information is presented in Item 8, *Financial Statements and Supplementary Data,* Note 16*, Employee Benefit Plans,* in the consolidated financial statements, including plan asset investment allocation, estimated future benefit payments, general descriptions of the plans, significant assumptions, the impact of certain changes in assumptions, and significant changes in estimates.

At December 31, 2023, actuarial assumptions include expected long-term rates of return on plan assets for FPU's pension plan of 6.00 percent and a discount rate of 5.00 percent. The discount rate was determined by management considering high-quality corporate bond rates, such as the Empower curve index and the FTSE Index. changes in those rates from the prior year and other pertinent factors, including the expected lives of the plans and the availability of the lump-sum payment option. A 0.25 percent increase or decrease in the discount rate would not have a material impact on our pension and postretirement liabilities and related costs.

Actual changes in the fair value of plan assets and the differences between the actual return on plan assets and the expected return on plan assets could have a material effect on the amount of pension benefit costs that we ultimately recognize for our funded pension plan. A 0.25 percent change in the rate of return would not have a material impact on our annual pension cost for the FPU pension plan.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

INTEREST RATE RISK

The fluctuation in interest rates expose us to potential increased cost we could incur when we issue debt instruments or to provide financing and liquidity for our business activities. We evaluate whether to refinance existing debt or permanently refinance existing short-term borrowings based in part on the fluctuation in interest rates. We utilize interest rate swap agreements to mitigate short-term borrowing rate risk. Additional information about our long-term debt and short-term borrowing is disclosed in Note 12, *Long-Term Debt,* and Note 13, *Short-Term Borrowings*, respectively, in the consolidated financial statements.

COMMODITY PRICE RISK

Regulated Energy Segment

We have entered into agreements with various wholesale suppliers to purchase natural gas and electricity for resale to our customers. Our regulated energy distribution businesses that sell natural gas or electricity to end-use customers have fuel cost recovery mechanisms authorized by the PSCs that allow us to recover all of the costs prudently incurred in purchasing natural gas and electricity for our customers. Therefore, our regulated energy distribution operations have limited commodity price risk exposure.

Unregulated Energy Segment

Our propane operations are exposed to commodity price risk as a result of the competitive nature of retail pricing offered to our customers. In order to mitigate this risk, we utilize propane storage activities and forward contracts for supply and sales activities.

We can store up to approximately 8.9 million gallons of propane (including leased storage and rail cars) during the winter season to meet our customers' peak requirements and to serve metered customers. Decreases in the wholesale price of propane may cause the value of stored propane to decline, particularly if we utilize fixed price forward contracts for supply. To mitigate the risk of propane commodity price fluctuations on the inventory valuation, we have adopted a Risk Management Policy that allows our propane distribution operation to enter into fair value hedges, cash flow hedges or other economic hedges of our inventory.

Aspire Energy is exposed to commodity price risk, primarily during the winter season. to the extent we are not successful in balancing our natural gas purchases and sales and have to secure natural gas from alternative sources at higher spot prices. In order to mitigate this risk. we procure firm capacity that meets our estimated volume requirements and we continue to seek out new producers in order to fulfill our natural gas purchase requirements.

The following table reflects the changes in the fair market value of financial derivatives contracts related to propane purchases and sales from December 31, 2022 to December 31, 2023:

(in thousands)	Balance at December 31, 2022	Increase (Decrease) in Fair Market Value	Less Amounts Settled	Balance at December 31, 2023
Sharp	$ 1,507	$ (1,822)	$ (61)	$ (376)

There were no changes in the methods of valuations during the year ended December 31, 2023.

The following is a summary of fair market value of financial derivatives as of December 31, 2023, by method of valuation and by maturity for each fiscal year period.

(in thousands)	**2024**	**2025**	**2026**	**Total Fair Value**
Price based on Mont Belvieu - Sharp	$ (264)	$ (75)	$ (37)	$ (376)

WHOLESALE CREDIT RISK

The Risk Management Committee reviews credit risks associated with counterparties to commodity derivative contracts prior to such contracts being approved.

Additional information about our derivative instruments is disclosed in Item 8, *Financial Statements and Supplementary Data,* Note 8, *Derivative Instruments,* in the consolidated financial statements.

INFLATION

Inflation affects the cost of supply, labor, products and services required for operations, maintenance and capital improvements. To help cope with the effects of inflation on our capital investments and returns, we periodically seek rate increases from regulatory commissions for our regulated operations and closely monitor the returns of our unregulated energy business operations. To compensate for fluctuations in propane gas prices, we adjust propane sales prices to the extent allowed by the market.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Chesapeake Utilities Corporation

Opinions on the Consolidated Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Chesapeake Utilities Corporation and Subsidiaries (the "Company") as of December 31, 2023 and 2022, the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows, for each of the years in the three-year period ended December 31, 2023, and the related notes and financial statement schedule listed in Item 15(a)2 (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control – Integrated Framework: (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control – Integrated Framework: (2013)* issued by COSO.

Basis for Opinion

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for their assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances.

As indicated in the accompanying Management's Report on Internal Control Over Financial Reporting, management has excluded Florida City Gas ("FCG") from its assessment of internal control over financial reporting as of December 31, 2023, because it was acquired by the Company in a business combination during 2023. We have also excluded FCG from our audit of internal control over financial reporting. FCG is a wholly-owned subsidiary whose total assets and loss before taxes represented 31 percent and 4 percent, respectively, of the Company's consolidated total assets and earnings before taxes as of December 31, 2023 and for the year then ended.

We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Goodwill Impairment Assessment - Energy Transmission and Supply Services (Aspire Energy) - Unregulated Energy Segment - Refer to Notes 2 and 10 to the consolidated financial statements

Critical Audit Matter Description

As described in Notes 2 and 10 to the consolidated financial statements, the Company has recorded goodwill associated with the Aspire Energy reporting unit within its Unregulated Energy reportable segment as of December 31, 2023. To test goodwill for impairment, the Company uses a present value technique based on discounted cash flows to estimate the fair value of its reporting units. Management's testing of goodwill as of December 31, 2023 indicated no impairment.

We identified the goodwill impairment assessment of Aspire Energy as a critical audit matter because the fair value estimate requires significant estimates and assumptions by management, including those relating to future revenue and operating margin forecasts and discount rates. Testing these estimates involved especially challenging, subjective, or complex judgments and effort.

How the Critical Audit Matter was Addressed in the Audit

The primary procedures we performed to address this critical audit matter included:

- We obtained an understanding, evaluated the design, and tested the operating effectiveness of controls over management's goodwill impairment evaluation, including those over the determination of the fair value of the Aspire Energy reporting unit.
- We evaluated the appropriateness of management's valuation methodology, including testing the mathematical accuracy of the calculation.
- We assessed the historical accuracy of management's revenue and operating margin forecasts.
- We compared the significant assumptions used by management to current industry and economic trends, current and historical performance of the reporting unit, and other relevant factors.
- We performed sensitivity analyses of the significant assumptions to evaluate the changes in the fair value of the reporting units that would result from changes in the assumptions.
- We evaluated whether the assumptions were consistent with evidence obtained in other areas of the audit, including testing the Company's fair value of all reporting units within the Company's Regulated and Unregulated Energy segments, in relation to the market capitalization of the Company and assessed the results.

/s/ Baker Tilly US, LLP

We have served as the Company's auditor since 2007.

1. Organization and Basis of Presentation

Chesapeake Utilities, incorporated in 1947 in Delaware, is a diversified energy company engaged in regulated and unregulated energy businesses.

Our regulated energy businesses consist of: (a) regulated natural gas distribution operations in central and southern Delaware, Maryland's eastern shore and Florida; (b) regulated natural gas transmission operations on the Delmarva Peninsula, in Pennsylvania, Florida and in Ohio; and (c) regulated electric distribution operations serving customers in northeast and northwest Florida.

Our unregulated energy businesses primarily include: (a) propane operations in the Mid-Atlantic region, North Carolina, South Carolina, and Florida; (b) our unregulated natural gas transmission/supply operation in central and eastern Ohio; (c) our CHP plant in Florida that generates electricity and steam; (d) our subsidiary, based in Florida, that provides CNG, LNG and RNG transportation and pipeline solutions, primarily to utilities and pipelines throughout the United States; and (e) sustainable energy investments including renewable natural gas.

Our consolidated financial statements include the accounts of Chesapeake Utilities and its wholly-owned subsidiaries. We do not have any ownership interest in investments accounted for using the equity method or any interest in a variable interest entity. All intercompany accounts and transactions have been eliminated in consolidation. We have assessed and, if applicable, reported on subsequent events through the date of issuance of these consolidated financial statements. Where necessary to improve comparability, prior period amounts have been reclassified to conform to current period presentation.

2. Summary of Significant Accounting Policies

Use of Estimates

Preparing the consolidated financial statements to conform with GAAP requires management to make estimates in measuring assets and liabilities and related revenues and expenses. These estimates involve judgments about various future economic factors that are difficult to predict and are beyond our control; therefore, actual results could differ from these estimates. As additional information becomes available, or actual amounts are determined, recorded estimates are revised. Consequently, operating results can be affected by revisions to prior accounting estimates.

Property, Plant and Equipment

Property, plant and equipment are stated at original cost less accumulated depreciation or fair value, if impaired. Costs include direct labor, materials and third-party construction contractor costs, allowance for funds used during construction ("AFUDC"), and certain indirect costs related to equipment and employees engaged in construction. The costs of repairs and minor replacements are charged to expense as incurred, and the costs of major renewals and improvements are capitalized. Upon retirement or disposition of property within the regulated businesses, the gain or loss, net of salvage value, is charged to accumulated depreciation. Upon retirement or disposition of property owned by the unregulated businesses, the gain or loss, net of salvage value, is charged to income. A summary of property, plant and equipment by classification as of December 31, 2023 and 2022 is provided in the following table:

(in thousands)	As of December 31, 2023	2022
Property, plant and equipment		
Regulated Energy		
Natural gas distribution - Delmarva Peninsula and Florida [1]	**$ 1,486,796**	$ 925,501
Natural gas transmission - Delmarva Peninsula, Pennsylvania, Ohio and Florida	**788,185**	741,865
Electric distribution	**143,513**	135,633
Unregulated Energy		
Propane operations – Mid-Atlantic, North Carolina, South Carolina and Florida	**194,918**	185,090
Natural gas transmission and supply – Ohio	**134,192**	128,620
Electricity and steam generation	**37,064**	36,886
Mobile CNG and pipeline solutions	**40,558**	38,543
Sustainable energy investments, including renewable natural gas	**4,076**	4,076
Other	**30,309**	29,890
Total property, plant and equipment	**2,859,611**	2,226,104
Less: Accumulated depreciation and amortization	**(516,429)**	(462,926)
Plus: Construction work in progress	**113,192**	47,295
Net property, plant and equipment	**$ 2,456,374**	$ 1,810,473

[1] Includes amounts attributable to the acquisition of FCG. See Note 4 for additional details on the acquisition.

Contributions or Advances in Aid of Construction

Customer contributions or advances in aid of construction reduce property, plant and equipment, unless the amounts are refundable to customers. Contributions or advances may be refundable to customers after a number of years based on the amount of revenues generated from the customers or the duration of the service provided to the customers. Refundable contributions or advances are recorded initially as liabilities. Non-refundable contributions reduce property, plant and equipment at the time of such determination. As of December 31, 2023 and 2022, the non-refundable contributions totaled $4.2 million and $7.6 million, respectively.

AFUDC

Some of the additions to our regulated property, plant and equipment include AFUDC, which represents the estimated cost of funds, from both debt and equity sources, used to finance the construction of major projects. AFUDC is capitalized in the applicable rate base for rate-making purposes when the completed projects are placed in service. During the years ended December 31, 2023, 2022 and 2021, AFUDC was immaterial and was reflected as a reduction of interest charges.

Leases

We have entered into lease arrangements for office space, land, equipment, pipeline facilities and warehouses. These leases enable us to conduct our business operations in the regions in which we operate. Our operating leases are included in operating lease right-of-use assets, other accrued liabilities, and operating lease - liabilities in our consolidated balance sheets.

Right-of-use assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Operating lease right-of-use assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. Leases with an initial term of 12 months or less are not recorded on our balance sheet; we recognize lease expense for these leases on a straight-line basis over the lease term. Our leases do not provide an implicit lease rate, therefore, we utilize our incremental borrowing rate, as the basis to calculate the present value of future lease payments, at lease commencement. Our incremental borrowing rate represents the rate that we would have to pay to borrow funds on a collateralized basis over a similar term and in a similar economic environment.

We have lease agreements with lease and non-lease components. At the adoption of ASC 842, we elected not to separate non-lease components from all classes of our existing leases. The non-lease components have been accounted for as part of the single lease component to which they are related. See Note 14, *Leases,* for additional information.

Jointly-owned Pipelines

Property, plant and equipment for our Florida natural gas transmission operation included $28.4 million of jointly owned assets at December 31, 2023, primarily comprised of the 26-mile Callahan intrastate transmission pipeline in Nassau County, Florida jointly-owned with Seacoast Gas Transmission. Peninsula Pipeline's ownership is 50 percent. Direct expenses for the jointly-owned pipeline are included in operating expenses within our consolidated statements of income. Accumulated depreciation for this pipeline totaled $2.2 million and $1.5 million at December 31, 2023 and 2022, respectively.

Impairment of Long-lived Assets

We periodically evaluate whether events or circumstances have occurred, which indicate that long-lived assets may not be fully recoverable. The determination of whether an impairment has occurred is based on an estimate of undiscounted future cash flows attributable to the asset, compared to the carrying value of the asset. When such events or circumstances are present, we record an impairment loss equal to the excess of the asset's carrying value over its fair value, if any.

Depreciation and Accretion Included in Operations Expenses

We compute depreciation expense for our regulated operations by applying composite, annual rates, as approved by the respective regulatory bodies. Certain components of depreciation and accretion are reported in operations expenses, rather than as depreciation and amortization expense, in the accompanying consolidated statements of income in accordance with industry practice and regulatory requirements. Depreciation and accretion included in operations expenses consists of the accretion of the costs of removal for future retirements of utility assets, vehicle depreciation, computer software and hardware depreciation, and other minor amounts of depreciation expense. For the years ended December 31, 2023, 2022 and 2021, we reported $11.9 million, $11.0 million and $10.2 million, respectively, of depreciation and accretion in operations expenses.

The following table shows the average depreciation rates used for regulated operations during the years ended December 31, 2023, 2022 and 2021:

	2023	**2022**	**2021**
Natural gas distribution – Delmarva Peninsula	**2.5%**	2.5%	2.5%
Natural gas distribution – Florida [(1) (2)]	**2.2%**	2.5%	2.5%
Natural gas transmission – Delmarva Peninsula	**2.7%**	2.7%	2.7%
Natural gas transmission – Florida	**2.4%**	2.4%	2.3%
Natural gas transmission – Ohio	**5.0%**	5.0%	N/A
Electric distribution	**2.4%**	2.8%	2.8%

[(1)] Excludes the acquisition of FCG which was completed on November 30, 2023.
[(2)] Average for 2023 includes the impact of the depreciation study that was approved by the Florida PSC in connection with the natural gas base rate proceeding.

For our unregulated operations, we compute depreciation expense on a straight-line basis over the following estimated useful lives of the assets:

Asset Description	Useful Life
Propane distribution mains	10-37 years
Propane bulk plants and tanks	10-40 years
Propane equipment, meters and meter installations	5-33 years
Measuring and regulating station equipment	5-37 years
Natural gas pipelines	45 years
Natural gas right of ways	Perpetual
CHP plant	30 years
Natural gas processing equipment	20-25 years
Office furniture and equipment	3-10 years
Transportation equipment	4-20 years
Structures and improvements	5-45 years
Other	Various

Regulated Operations

We account for our regulated operations in accordance with ASC Topic 980, *Regulated Operations,* which includes accounting principles for companies whose rates are determined by independent third-party regulators. When setting rates, regulators often make decisions, the economics of which require companies to defer costs or revenues in different periods than may be appropriate for unregulated enterprises. When this situation occurs, a regulated company defers the associated costs as regulatory assets on the balance sheet and records them as expense on the income statement as it collects revenues. Further, regulators can also impose liabilities upon a regulated company, for amounts previously collected from customers and for recovery of costs that are expected to be incurred in the future, as regulatory liabilities. If we were required to terminate the application of these regulatory provisions to our regulated operations, all such deferred amounts would be recognized in our consolidated statement of income at that time, which could have a material impact on our financial position, results of operations and cash flows.

We monitor our regulatory and competitive environments to determine whether the recovery of our regulatory assets continues to be probable. If we determined that recovery of these assets is no longer probable, we would write off the assets against earnings. We believe that the provisions of ASC Topic 980 continue to apply to our regulated operations and that the recovery of our regulatory assets is probable.

Revenue Recognition

Revenues for our natural gas and electric distribution operations are based on rates approved by the PSC in each state in which they operate. Customers' base rates may not be changed without formal approval by these commissions. The PSCs, however, have authorized our regulated operations to negotiate rates, based on approved methodologies, with customers that have competitive alternatives. Eastern Shore's revenues are based on rates approved by the FERC. The FERC has also authorized Eastern Shore to negotiate rates above or below the FERC-approved maximum rates, which customers can elect as an alternative to FERC-approved maximum rates.

For regulated deliveries of natural gas and electricity, we read meters and bill customers on monthly cycles that do not coincide with the accounting periods used for financial reporting purposes. We accrue unbilled revenues for natural gas and electricity delivered, but not yet billed, at the end of an accounting period to the extent that they do not coincide. We estimate the amount of the unbilled revenue by jurisdiction and customer class.

All of our regulated natural gas and electric distribution operations have fuel cost recovery mechanisms. These mechanisms allow us to adjust billing rates, without further regulatory approvals, to reflect changes in the cost of purchased fuel. Differences between the cost of fuel purchased and delivered are deferred and accounted for as either unrecovered fuel cost or amounts payable to customers. Generally, these deferred amounts are recovered or refunded within one year.

We charge flexible rates to our natural gas distribution industrial interruptible customers who can use alternative fuels. Interruptible service imposes no contractual obligation to deliver or receive natural gas on a firm service basis.

Our unregulated propane distribution businesses record revenue in the period the products are delivered and/or services are rendered for their bulk delivery customers. For propane customers with meters whose billing cycles do not coincide with our accounting periods, we accrue unbilled revenue for product delivered but not yet billed and bill customers at the end of an accounting period, as we do in our regulated energy businesses.

Our Ohio natural gas transmission/supply operation recognizes revenues based on actual volumes of natural gas shipped using contractual rates based upon index prices that are published monthly.

Eight Flags records revenues based on the amount of electricity and steam generated and sold to its customers.

Our mobile compressed natural gas operation recognizes revenue for CNG services at the end of each calendar month for services provided during the month based on agreed upon rates for labor, equipment utilized, costs incurred for natural gas compression, miles driven, mobilization and demobilization fees.

We report revenue taxes, such as gross receipts taxes, franchise taxes, and sales taxes, on a net basis.

For our businesses with agreements that contain variable consideration, we use the invoice practical expedient method. We determined that the amounts invoiced to customers correspond directly with the value to our customers and our performance to date.

Natural Gas, Electric and Propane Costs

Natural gas, electric and propane costs include the direct costs attributable to the products sold or services provided to our customers. These costs include primarily the variable commodity cost of natural gas, electricity and propane, costs of pipeline capacity needed to transport and store natural gas, transmission costs for electricity, costs to gather and process natural gas, costs to transport propane to/from our storage facilities or our mobile CNG equipment to customer locations, and steam and electricity generation costs. Depreciation expense is not included in natural gas, electric and propane costs.

Operations and Maintenance Expenses

Operations and maintenance expenses include operations and maintenance salaries and benefits, materials and supplies, usage of vehicles, tools and equipment, payments to contractors, utility plant maintenance, customer service, professional fees and other outside services, insurance expense, minor amounts of depreciation, accretion of removal costs for future retirements of utility assets and other administrative expenses.

Cash and Cash Equivalents

Our policy is to invest cash in excess of operating requirements in overnight income-producing accounts. Such amounts are stated at cost, which approximates fair value. Investments with an original maturity of three months or less when purchased are considered cash equivalents.

Accounts Receivable and Allowance for Credit Losses

Accounts receivable consist primarily of amounts due for sales of natural gas, electricity and propane and transportation and distribution services to customers. An allowance for doubtful accounts is recorded against amounts due based upon our collections experiences and an assessment of our customers' inability or reluctance to pay. If circumstances change, our estimates of recoverable accounts receivable may also change. Circumstances which could affect such estimates include, but are not limited to, customer credit issues, natural gas, electricity and propane prices and impacts from general economic conditions. Accounts receivable are written off when they are deemed to be uncollectible.

Our estimate for expected credit losses has been developed by analyzing our portfolio of financial assets that present potential credit exposure risk. These assets consist solely of our trade receivables from customers and contract assets. The estimate is based on five years of historical collections experience, a review of current economic and operating conditions in our service territories, and an examination of economic indicators which provide a reasonable and supportable basis of potential future activity. Those indicators include metrics which we believe provide insight into the future collectability of our trade receivables such as unemployment rates and economic growth statistics in our service territories.

When determining estimated credit losses, we analyze the balance of our trade receivables based on the underlying line of business. This includes an examination of trade receivables from our energy distribution, energy transmission, energy delivery services and propane operations businesses. Our energy distribution business consists of all our regulated distribution utility (natural gas and electric) operations on the Delmarva Peninsula and in Florida. These business units have the ability to recover their costs through the rate-making process, which can include consideration for amounts historically written off to be included in rate base. Therefore, they possess a mechanism to recover credit losses which we believe reduces their exposure to credit risk. Our energy transmission and energy delivery services business units consist of our natural gas pipelines and our mobile CNG delivery operations. The majority of customers served by these business units are regulated distribution utilities who also have the ability to recover their costs. We believe this cost recovery mechanism significantly reduces the amount of credit risk associated with these customers. Our propane operations are unregulated and do not have the same ability to recover their costs as our regulated operations. However, historically our propane operations have not had material write offs relative to the amount of revenues generated.

Our estimate of expected credit losses reflects our anticipated losses associated with our trade receivables as a result of non-payment from our customers beginning the day the trade receivable is established. We believe the risk of loss associated with trade receivables classified as current presents the least amount of credit exposure risk and therefore, we assign a lower estimate to our current trade receivables. As our trade receivables age outside of their expected due date, our estimate increases. Our allowance for credit losses relative to the balance of our trade receivables has historically been immaterial as a result of on time payment activity from our customers.

The table below illustrates the changes in the balance of our allowance for expected credit losses for the year ended December 31, 2023:

(in thousands)

Balance at December 31, 2022	**$**	**2,877**
Additions:		
Provision for credit losses		**2,340**
Recoveries		**166**
Deductions:		
Write offs		**(2,684)**
Balance at December 31, 2023	**$**	**2,699**

Inventories

We use the average cost method to value propane, materials and supplies, and other merchandise inventory. If market prices drop below cost, inventory balances that are subject to price risk are adjusted to their net realizable value. There were no lower-of-cost-or-net realizable value adjustment for the years ended December 31, 2023, 2022 or 2021.

Goodwill and Other Intangible Assets

Goodwill is not amortized but is tested for impairment at least annually, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. We generally use a present value technique based on discounted cash flows to estimate the fair value of our reporting units. An impairment charge is recognized if the carrying value of a reporting unit's goodwill exceeds its fair value. There were no goodwill impairments recognized during the years ended December 31, 2023, 2022 and 2021. Other intangible assets are amortized on a straight-line basis over their estimated economic useful lives.

Other Deferred Charges

Other deferred charges include issuance costs associated with short-term borrowings. These charges are amortized over the life of the related short-term debt borrowings.

Asset Removal Cost

As authorized by the appropriate regulatory body (state PSC or FERC), we accrue future asset removal costs associated with utility property, plant and equipment even if a legal obligation does not exist. Such accruals are provided for through depreciation expense and are recorded with corresponding credits to regulatory liabilities or assets. When we retire depreciable utility plant and equipment, we charge the associated original costs to accumulated depreciation and amortization, and any related removal costs incurred are charged to regulatory liabilities or assets. The difference between removal costs recognized in depreciation rates and the accretion and depreciation expense recognized for financial reporting purposes is a timing difference between recovery of these costs in rates and their recognition for financial reporting purposes. Accordingly, these differences are deferred as regulatory liabilities or assets. In the rate setting process, the regulatory liability or asset is excluded from the rate base upon which those utilities have the opportunity to earn their allowed rates of return. The costs associated with our asset retirement obligations are either currently being recovered in rates or are probable of recovery in future rates.

See Note 18, *Rates and Other Regulatory Activities*, for information related to FCG's reserve surplus amortization mechanism ("RSAM") that was approved as part of its rate case effective as of May 1, 2023.

Pension and Other Postretirement Plans

Pension and other postretirement plan costs and liabilities are determined on an actuarial basis and are affected by numerous assumptions and estimates, including the fair value of plan assets, estimates of the expected returns on plan assets, assumed discount rates, the level of contributions made to the plans, and current demographic and actuarial mortality data. We review annually the estimates and assumptions underlying our pension and other postretirement plan costs and liabilities with the assistance of third-party actuarial firms. The assumed discount rates, expected returns on plan assets and the mortality assumption are the factors that generally have the most significant impact on our pension costs and liabilities. The assumed discount rates, health care cost trend rates and rates of retirement generally have the most significant impact on our postretirement plan costs and liabilities.

The discount rates are utilized principally in calculating the actuarial present value of our pension and postretirement obligations and net pension and postretirement costs. When estimating our discount rates, we consider high-quality corporate bond rates, such as the Empower curve index and the FTSE Index, changes in those rates from the prior year and other pertinent factors, including the expected life of each of our plans and their respective payment options.

The expected long-term rates of return on assets are utilized in calculating the expected returns on the plan assets component of our annual pension plan costs. We estimate the expected returns on plan assets by evaluating expected bond returns, asset allocations, the effects of active plan management, the impact of periodic plan asset rebalancing and historical performance. We also consider the guidance from our investment advisors in making a final determination of our expected rates of return on plan assets.

We estimate the health care cost trend rates used in determining our postretirement expense based upon actual health care cost experience, the effects of recently enacted legislation and general economic conditions. Our assumed rate of retirement is estimated based upon our annual reviews of participant census information as of the measurement date.

The mortality assumption used for our pension and postretirement plans is reviewed periodically and is based on the actuarial table that best reflects the expected mortality of the plan participants.

Income Taxes, Investment Tax Credit Adjustments and Tax-Related Contingency

Deferred tax assets and liabilities are recorded for the income tax effect of temporary differences between the financial statement basis and tax basis of assets and liabilities and are measured using the enacted income tax rates in effect in the years in which the differences are expected to reverse. Deferred tax assets are recorded net of any valuation allowance when it is more likely than not that such income tax benefits will be realized. Investment tax credits on utility property have been deferred and are allocated to income ratably over the lives of the subject property.

We account for uncertainty in income taxes in our consolidated financial statements only if it is more likely than not that an uncertain tax position is sustainable based on technical merits. Recognizable tax positions are then measured to determine the amount of benefit recognized in the consolidated financial statements. We recognize penalties and interest related to unrecognized tax benefits as a component of other income.

We account for contingencies associated with taxes other than income when the likelihood of a loss is both probable and estimable. In assessing the likelihood of a loss, we do not consider the existence of current inquiries, or the likelihood of future inquiries, by tax authorities as a factor. Our assessment is based solely on our application of the appropriate statutes and the likelihood of a loss, assuming the proper inquiries are made by tax authorities.

Financial Instruments

We utilize financial instruments to mitigate commodity price risk associated with fluctuations of natural gas, electricity and propane and to mitigate interest rate risk. Our propane operations enter into derivative transactions, such as swaps, put options and call options in order to mitigate the impact of wholesale price fluctuations on inventory valuation and future purchase commitments. These transactions may be designated as fair value hedges or cash flow hedges, if they meet all of the accounting requirements pursuant to ASC Topic 815, *Derivatives and Hedging,* and we elect to designate the instruments as hedges. If designated as a fair value hedge, the value of the hedging instrument, such as a swap, future, or put option, is recorded at fair value, with the effective portion of the gain or loss of the hedging instrument effectively reducing or increasing the value of the hedged item. If designated as a cash flow hedge, the value of the hedging instrument, such as a swap or call option, is recorded at fair value with the effective portion of the gain or loss of the hedging instrument being initially recorded in accumulated other comprehensive income (loss) and reclassified to earnings when the associated hedged transaction settles. The ineffective portion of the gain or loss of a hedge is immediately recorded in earnings. If the instrument is not designated as a fair value or cash flow hedge, or it does not meet the accounting requirements of a hedge under ASC Topic 815, *Derivatives and Hedging*, it is recorded at fair value with all gains or losses being recorded directly in earnings.

Our natural gas, electric and propane operations enter into agreements with suppliers to purchase natural gas, electricity, and propane for resale to our respective customers. Purchases under these contracts, as well as distribution and sales agreements with counterparties or customers, either do not meet the definition of a derivative, or qualify for "normal purchases and normal sales" treatment under ASC Topic 815 and are accounted for on an accrual basis.

We manage interest rate risk by entering into derivative contracts to hedge the variability in cash flows attributable to changes in the short-term borrowing rates. We designate and account for the interest rate swaps as cash flows hedges. Accordingly, unrealized gains and losses associated with the interest rate swaps are recorded as a component of accumulated other comprehensive income (loss). When the interest rate swaps settle, the realized gain or loss will be recorded in the income statement and recognized as a component of interest charges.

Recent Accounting Standards Yet to be Adopted

Segment Reporting (ASC 280) - In November 2023, the FASB issued ASU 2023-07, *Improvements to Reportable Segments Disclosures*, which modifies required disclosures about a public entity's reportable segments and addresses requests from investors for more detailed information about a reportable segment's expenses and a more comprehensive reconciliation of each segment's reported profit or loss. ASU 2023-07 will be effective for our annual financial statements beginning January 1, 2024 and our interim financial statements beginning January 1, 2025. ASU 2023-07 only impacts disclosures, and as a result, will not have a material impact on our financial position or results of operations.

Income Taxes (ASC 740) - In December 2023, the FASB issued ASU 2023-09, *Improvements to Income Tax Disclosures,* which modifies required income tax disclosures primarily related to an entity's rate reconciliation and information pertaining to income taxes paid. These enhancements have been made to address requests from investors related to transparency and usefulness of income tax disclosures. ASU 2023-09 will be effective for our annual financial statements beginning January 1, 2024. ASU 2023-09 only impacts disclosures, and as a result, will not have a material impact on our financial position or results of operations.

3. Earnings Per Share

The following table presents the calculation of our basic and diluted earnings per share:

	For the Year Ended December 31,		
	2023	**2022**	**2021**
(in thousands, except shares and per share data)			
Calculation of Basic Earnings Per Share:			
Net Income	**$ 87,212**	$ 89,796	$ 83,466
Weighted average shares outstanding [1]	**18,370,758**	17,722,227	17,558,078
Basic Earnings Per Share	**$ 4.75**	$ 5.07	$ 4.75
Calculation of Diluted Earnings Per Share:			
Reconciliation of Denominator:			
Weighted average shares outstanding — Basic [1]	**18,370,758**	17,722,227	17,558,078
Effect of dilutive securities — Share-based compensation	**64,099**	82,067	74,951
Adjusted denominator — Diluted [1]	**18,434,857**	17,804,294	17,633,029
Diluted Earnings Per Share	**$ 4.73**	$ 5.04	$ 4.73

[1] 2023 weighted average shares reflect the impact of 4.4 million common shares issued in November 2023 in connection with the acquisition of FCG. See Notes 4 and 15 for additional details on the acquisition and related equity offering.

4. Acquisitions

Acquisition of Florida City Gas

On November 30, 2023, we completed the acquisition of FCG for $923.4 million in cash, including working capital adjustments as defined in the agreement, pursuant to the previously disclosed stock purchase agreement with Florida Power & Light Company. Upon completion of the acquisition, FCG became a wholly-owned subsidiary of the Company and is included within our Regulated Energy segment.

FCG, a regulated utility, serves approximately 120,000 residential and commercial natural gas customers across eight counties in Florida, including Miami-Dade, Broward, Brevard, Palm Beach, Hendry, Martin, St. Lucie and Indian River. Its natural gas system includes approximately 3,800 miles of distribution main and 80 miles of transmission pipe.

The purchase price of the acquisition was funded with $366.4 million of net proceeds from the issuance of 4.4 million shares of our common stock, the issuance of approximately $550.0 million principal amount of uncollateralized senior notes, and borrowings under the Company's Revolver. See Note 12, *Long-Term Debt*, and Note 15, *Stockholders' Equity,* for additional details on these financing activities.

We accounted for the acquisition of FCG using the acquisition method. At December 31, 2023, the allocation of the purchase price remains preliminary pending finalizing of certain working capital balances. As such, the fair value measurements presented below are subject to change within the measurement period not to exceed one year from the date of the acquisition. As FCG is a regulated utility, the measurement of the fair value of most of the assets acquired and liabilities assumed were determined using the predecessor's carrying value. In certain other instances where assets and liabilities are not subject to regulation, we determined the fair value in accordance with the principles of ASC Topic 820, *Fair Value Measurements.*

The excess of the purchase price for FCG over the fair value of the assets acquired and liabilities assumed has been reflected as goodwill within the Regulated Energy segment. Goodwill resulting from the acquisition is largely attributable to expansion opportunities provided within our existing regulated operations in Florida, including planned customer growth and growth in rate base through continued investment in our utility infrastructure, as well as natural gas transmission infrastructure supporting the distribution operations. The goodwill recognized in connection with the acquisition of FCG will be deductible for income tax purposes.

The components of the preliminary purchase price allocation are as follows:

(in thousands)

Assets acquired:	**Acquisition Date Fair Value**
Cash	$ 2,270
Accounts receivable, net	14,396
Regulatory assets - current	2,983
Other current assets	2,707
Property, plant and equipment	453,845
Goodwill	461,193
Regulatory assets - non-current	3,381
Other deferred charges and other assets,	18,309
Total assets acquired	**959,084**
Liabilities assumed:	
Current liabilities	(20,954)
Regulatory liabilities	(14,137)
Other deferred credits and other liabilities	(548)
Total liabilities assumed	**(35,639)**
Net purchase price	**$ 923,445**

Direct transaction costs of $10.4 million associated with the FCG acquisition are reflected in "FCG transaction-related expenses" on our consolidated statement of income for the year ended December 31, 2023. In addition, interest charges include $4.1 million related to fees and expenses associated with the Bridge Facility, which was terminated without any funds drawn, for the year ended December 31, 2023. Other transaction costs of $15.9 million related primarily to the debt and equity financings executed in connection with the acquisition have been deferred on the consolidated balance sheet or recorded in equity as an offset to proceeds received, as appropriate.

For the period from the acquisition date through December 31, 2023, the Company's consolidated results include $12.1 million of operating revenue and a $3.3 million net loss attributable to FCG which includes $7.5 million of the transaction-related expenses described above. For additional information on FCG's results, see discussion under Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*. The following unaudited financial information reflects our pro forma operating revenues and net income assuming the FCG acquisition had occurred on January 1, 2022. The unaudited pro forma financial information has been presented for illustrative purposes only and is not necessarily indicative of the results of operations that would have been achieved or the future results of operations of FCG.

	For the Year Ended December 31,	
	2023	**2022**
(in thousands)		
Operating Revenue	**$ 786,473**	$ 798,355
Net Income	**$ 85,398**	$ 81,508

Acquisition of J.T. Lee and Son's

In December 2023, Sharp acquired the propane operating assets of J.T. Lee and Son's in Cape Fear, North Carolina for $3.9 million. In connection with this acquisition, we recorded a $0.3 million liability which is subject to the seller's adherence to various provisions contained in the purchase agreement through the first anniversary of the transaction closing. Through this acquisition, we expanded our operating footprint further in North Carolina, where customers are served by Sharp Energy's Diversified Energy division. Sharp added approximately 3,000 customers and distribution of approximately 800,000 gallons of propane annually. The transaction also includes a bulk plant with 60,000 gallons of propane storage, enabling the Company to realize efficiencies with additional storage capacity and overlapping delivery territories.

In connection with this acquisition, we recorded $2.7 million in property plant and equipment, $0.9 million in goodwill, $0.2 million in working capital, and less than $0.1 million in intangible assets associated primarily with non-compete agreements, all of which are deductible for income tax purposes. The amounts recorded in conjunction with the acquisition are preliminary, and subject to adjustment based on contractual provisions and finalization prior to the first anniversary of the transaction closing. The financial results associated with this acquisition are included within our propane distribution operations within our Unregulated Energy segment. The operating revenues and net income of this acquisition were not material to our consolidated results for the year ended December 31, 2023.

Acquisition of Planet Found Energy Development

In October 2022, we acquired Planet Found Energy Development, LLC ("Planet Found") for $9.5 million. In connection with this acquisition, we recorded a $0.9 million liability which was released after the first anniversary of the transaction closing. We accounted for this acquisition as a business combination within our Unregulated Energy segment beginning in the fourth quarter of 2022. Planet Found's farm scale anaerobic digestion pilot system and technology produces biogas from 1200 tons of poultry litter annually. The transaction accelerated our efforts in converting poultry waste to renewable, sustainable energy while simultaneously improving the local environments in our service territories.

In connection with this acquisition, we recorded $4.4 million in intangible assets associated primarily with intellectual property and non-compete agreements, $4.0 million in property plant and equipment, $1.1 million in goodwill, and less than $0.1 million in working capital, all of which are deductible for income tax purposes. The operating revenues and net income of Planet Found were not material to our consolidated results for the years ended December 31, 2023 and 2022.

Acquisition of Davenport Energy

In June 2022, Sharp acquired the propane operating assets of Davenport Energy's Siler City, North Carolina propane division for approximately $2.0 million. Through this acquisition, the Company expanded its operating footprint further into North Carolina, where customers are served by Sharp Energy's Diversified Energy division. Sharp added approximately 850 customers, and expected distribution of approximately 0.4 million gallons of propane annually. We recorded $1.5 million in property plant and equipment, $0.5 million in goodwill, and immaterial amounts associated with customer relationships and non-compete agreements, all of which are deductible for income tax purposes. The financial results associated with this acquisition are included within the Company's propane distribution operations within its Unregulated Energy segment. The operating revenues and net income of Davenport Energy were not material to our consolidated results for the years ended December 31, 2023 and 2022.

5. REVENUE RECOGNITION

We recognize revenue when our performance obligations under contracts with customers have been satisfied, which generally occurs when our businesses have delivered or transported natural gas, electricity or propane to customers. We exclude sales taxes and other similar taxes from the transaction price. Typically, our customers pay for the goods and/or services we provide in the month following the satisfaction of our performance obligation. The following tables display revenue by major source based on product and service type for the years ended December 31, 2023, 2022 and 2021:

(in thousands)	For the Year Ended December 31, 2023 Regulated Energy	Unregulated Energy	Other and Eliminations	Total
Energy distribution				
Delaware natural gas division	$ 83,882	$ —	$ —	$ 83,882

Total operating revenues [(2)]	**$ 383,920**	**$ 206,869**	**$ (20,821)**	**$ 569,968**

(1) In accordance with the Florida PSC approval of our natural gas base rate proceeding, effective March 1, 2023, our natural gas distribution businesses in Florida (FPU, FPU-Indiantown division, FPU-Fort Meade division and Chesapeake Utilities' CFG division) have been consolidated and amounts above are now being presented on a consolidated basis consistent with the final rate order.

(2) Total operating revenues for the year ended December 31, 2021, include other revenue (revenues from sources other than contracts with customers) of $0.2 million and $0.4 million for our Regulated and Unregulated Energy segments, respectively. The sources of other revenues include revenue from alternative revenue programs related to revenue normalization for Maryland division and Sandpiper and late fees.

Regulated Energy Segment

The businesses within our Regulated Energy segment are regulated utilities whose operations and customer contracts are subject to rates approved by the respective state PSC or the FERC.

Our energy distribution operations deliver natural gas or electricity to customers, and we bill the customers for both the delivery of natural gas or electricity and the related commodity, where applicable. In most jurisdictions, our customers are also required to purchase the commodity from us, although certain customers in some jurisdictions may purchase the commodity from a third-party retailer (in which case we provide delivery service only). We consider the delivery of natural gas or electricity and/ or the related commodity sale as one performance obligation because the commodity and its delivery are highly interrelated with two-way dependency on one another. Our performance obligation is satisfied over time as natural gas or electricity is delivered and consumed by the customer. We recognize revenues based on monthly meter readings, which are based on the quantity of natural gas or electricity used and the approved rates. We accrue unbilled revenues for natural gas and electricity that have been delivered, but not yet billed, at the end of an accounting period, to the extent that billing and delivery do not coincide.

Revenues for Eastern Shore are based on rates approved by the FERC. The FERC has also authorized Eastern Shore to negotiate rates above or below the FERC-approved maximum rates, which customers can elect as an alternative to the FERC-approved maximum rates. Eastern Shore's services can be firm or interruptible. Firm services are offered on a guaranteed basis and are available at all times unless prevented by force majeure or other permitted curtailments. Interruptible customers receive service only when there is available capacity or supply. Our performance obligation is satisfied over time as we deliver natural gas to the customers' locations. We recognize revenues based on capacity used or reserved and the fixed monthly charge.

Peninsula Pipeline is engaged in natural gas intrastate transmission to third-party customers and certain affiliates in the State of Florida. Our performance obligation is satisfied over time as the natural gas is transported to customers. We recognize revenue based on rates approved by the Florida PSC and the capacity used or reserved. We accrue unbilled revenues for transportation services provided and not yet billed at the end of an accounting period.

Aspire Energy Express is engaged in natural gas intrastate transmission in the State of Ohio. We currently serve the Guernsey power plant and our performance obligation is satisfied over time as the natural gas is transported to the plant. We recognize revenue based on rates approved by the Ohio PSC and the capacity used or reserved. We accrue unbilled revenues for transportation services provided and not yet billed at the end of an accounting period.

Unregulated Energy Segment

Revenues generated from the Unregulated Energy segment are not subject to any federal, state, or local pricing regulations. Aspire Energy primarily sources gas from hundreds of conventional producers and performs gathering and processing functions to maintain the quality and reliability of its gas for its wholesale customers. Aspire Energy's performance obligation is satisfied over time as natural gas is delivered to its customers. Aspire Energy recognizes revenue based on the deliveries of natural gas at contractually agreed upon rates (which are based upon an established monthly index price and a monthly operating fee, as applicable). For natural gas customers, we accrue unbilled revenues for natural gas that has been delivered, but not yet billed, at the end of an accounting period, to the extent that billing and delivery do not coincide with the end of the accounting period.

Eight Flags' CHP plant, which is located on land leased from a customer, produces three sources of energy: electricity, steam and heated water. This customer purchases the steam (unfired and fired) and heated water, which are used in the customer's production facility. Our electric distribution operation purchases the electricity generated by the CHP plant for distribution to its customers. Eight Flags' performance obligation is satisfied over time as deliveries of heated water, steam and electricity occur. Eight Flags recognizes revenues over time based on the amount of heated water, steam and electricity generated and delivered to its customers.

For our propane distribution operations, we recognize revenue based upon customer type and service offered. Generally, for propane bulk delivery customers (customers without meters) and wholesale sales, our performance obligation is satisfied when we deliver propane to the customers' locations (point-in-time basis). We recognize revenue from these customers based on the number of gallons delivered and the price per gallon at the point-in-time of delivery. For our propane distribution customers with meters, we satisfy our performance obligation over time. We recognize revenue over time based on the amount of propane consumed and the applicable price per unit. For propane distribution metered customers, we accrue unbilled revenues for propane that is estimated to have been consumed, but not yet billed, at the end of an accounting period, to the extent that billing and delivery do not coincide with the end of the accounting period.

Marlin Gas Services provides mobile CNG and pipeline solutions primarily to utilities and pipelines. Marlin Gas Services provides temporary hold services, pipeline integrity services, emergency services for damaged pipelines and specialized gas services for customers who have unique requirements. Marlin Gas Services' performance obligations are comprised of the compression of natural gas, mobilization of CNG equipment, utilization of equipment and on-site CNG support. Our performance obligations for the compression of natural gas, utilization of mobile CNG equipment and for the on-site CNG staff support are satisfied over time when the natural gas is compressed, equipment is utilized or as our staff provide support services to our customers. Our performance obligation for the mobilization of CNG equipment is satisfied at a point-in-time when the equipment is delivered to the customer project location. We recognize revenue for CNG services at the end of each calendar month for services provided during the month based on agreed upon rates for equipment utilized, costs incurred for natural gas compression, miles driven, mobilization and demobilization fees.

Contract balances

The timing of revenue recognition, customer billings and cash collections results in trade receivables, unbilled receivables (contract assets), and customer advances (contract liabilities) in our consolidated balance sheets. The balances of our trade receivables, contract assets, and contract liabilities as of December 31, 2023 and 2022 were as follows:

	Trade Receivables	Contract Assets (Current)	Contract Assets (Noncurrent)	Contract Liabilities (Current)
(in thousands)				
Balance at 12/31/2022	$ 61,687	$ 18	$ 4,321	$ 983
Balance at 12/31/2023	**67,741**	**18**	**3,524**	**1,022**
Increase (decrease)	$ 6,054	$ —	$ (797)	$ 39

Our trade receivables are included in trade and other receivables in the consolidated balance sheets. Our non-current contract assets are included in receivables and other deferred charges in the consolidated balance sheet and relate to operations and maintenance costs incurred by Eight Flags that have not yet been recovered through rates for the sale of electricity to our electric distribution operation pursuant to a long-term service agreement.

At times, we receive advances or deposits from our customers before we satisfy our performance obligation, resulting in contract liabilities. Contract liabilities are included in other accrued liabilities in the consolidated balance sheets and relate to non-refundable prepaid fixed fees for our propane distribution operation's retail offerings. Our performance obligation is satisfied over the term of the respective retail offering plan on a ratable basis. For the years ended December 31, 2023 and 2022, the amounts recognized in revenue were not material.

Remaining performance obligations

Our businesses have long-term fixed fee contracts with customers in which revenues are recognized when performance obligations are satisfied over the contract term. Revenue for these businesses for the remaining performance obligations at December 31, 2023 are expected to be recognized as follows:

(in thousands)	2024	2025	2026	2027	2028	2029 and thereafter
Eastern Shore and Peninsula Pipeline	$ 36,657	$ 30,330	$ 26,547	$23,433	$22,559	$ 149,124
Natural gas distribution operations	9,680	9,216	8,501	6,472	5,252	28,428
FPU electric distribution	652	275	275	275	275	—
Total revenue contracts with remaining performance obligations	$ 46,989	$ 39,821	$ 35,323	$30,180	$28,086	$ 177,552

6. SEGMENT INFORMATION

We use the management approach to identify operating segments. We organize our business around differences in regulatory environment and/or products or services, and the operating results of each segment are regularly reviewed by the chief decision maker (our Chief Executive Officer, or "CEO") in order to make decisions about resources and to assess performance.

Our operations are entirely domestic and are comprised of two reportable segments:

- *Regulated Energy*. Includes energy distribution and transmission services (natural gas distribution, natural gas transmission and electric distribution operations). All operations in this segment are regulated, as to their rates and services, by the PSC having jurisdiction in each operating territory or by the FERC in the case of Eastern Shore.
- *Unregulated Energy.* Includes energy transmission, energy generation (the operations of our Eight Flags' CHP plant), propane distribution operations, mobile compressed natural gas distribution and pipeline solutions operations, and sustainable energy investments including renewable natural gas. Also included in this segment are other unregulated energy services, such as energy-related merchandise sales and heating, ventilation and air conditioning, plumbing and electrical services. These operations are unregulated as to their rates and services.

The remainder of our operations are presented as "Other businesses and eliminations," which consists of unregulated subsidiaries that own real estate leased to Chesapeake Utilities, as well as certain corporate costs not allocated to other operations.

The following tables present information about our reportable segments:

	For the Year Ended December 31,		
(in thousands)	**2023**	**2022**	**2021**
Operating Revenues, Unaffiliated Customers			
Regulated Energy	**$ 471,591**	$ 422,894	$ 381,879
Unregulated Energy	**199,013**	257,810	188,089
Total operating revenues, unaffiliated customers	**$ 670,604**	$ 680,704	$ 569,968
Intersegment Revenues [1]			
Regulated Energy	**$ 2,004**	$ 6,530	$ 2,041
Unregulated Energy	**24,135**	22,940	18,780
Other businesses	**182**	308	527
Total intersegment revenues	**$ 26,321**	$ 29,778	$ 21,348
Operating Income			
Regulated Energy	**$ 126,199**	$ 115,317	$ 106,174
Unregulated Energy	**24,426**	27,350	24,427
Other businesses and eliminations	**178**	266	511
Operating Income	**150,803**	142,933	131,112
Other income, net	**1,438**	5,051	1,720
Interest charges	**36,951**	24,356	20,135
Income before Income Taxes	**115,290**	123,628	112,697
Income Taxes	**28,078**	33,832	29,231
Net Income	**$ 87,212**	$ 89,796	$ 83,466
Depreciation and Amortization			
Regulated Energy [2]	**$ 48,162**	$ 52,707	$ 48,748
Unregulated Energy	**17,347**	16,257	13,869
Other businesses and eliminations	**(8)**	9	44
Total depreciation and amortization	**$ 65,501**	$ 68,973	$ 62,661
Capital Expenditures			
Regulated Energy [3]	**$ 1,095,871**	$ 97,554	$ 139,733
Unregulated Energy	**40,264**	40,773	81,651
Other businesses	**1,762**	2,355	6,425
Total capital expenditures	**$ 1,137,897**	$ 140,682	$ 227,809

(1) All significant intersegment revenues are billed at market rates and have been eliminated from consolidated revenues.
(2) Depreciation and amortization in 2023 includes a $5.1 million RSAM adjustment. See Note 18 for additional details.
(3) Capital expenditures in 2023 include our acquisition of FCG for $923.4 million. See Note 4 for additional details.

	As of December 31,	
(in thousands)	**2023**	**2022**
Identifiable Assets		
Regulated Energy segment	**$ 2,781,581**	$ 1,716,255
Unregulated Energy segment	**477,402**	463,239
Other businesses and eliminations	**45,721**	35,543
Total identifiable assets	**$ 3,304,704**	$ 2,215,037

7. SUPPLEMENTAL CASH FLOW DISCLOSURES

Cash paid for interest and income taxes during the years ended December 31, 2023, 2022 and 2021 were as follows:

	For the Year Ended December 31,		
(in thousands)	**2023**	**2022**	**2021**
Cash paid for interest	**$ 30,525**	$ 24,267	$ 20,809
Cash (received) paid for income taxes, net of refunds	**$ 21,920**	$ (4,963)	$ 8,395

Non-cash investing and financing activities during the years ended December 31, 2023, 2022, and 2021 were as follows:

	For the Year Ended December 31,		
(in thousands)	**2023**	**2022**	**2021**
Capital property and equipment acquired on account, but not paid for as of December 31,	**$ 33,334**	$ 13,211	$ 16,164
Common stock issued for the Retirement Savings Plan	**$ —**	$ —	$ 1,712
Common stock issued under the SICP	**$ 3,740**	$ 2,868	$ 2,834

8. DERIVATIVE INSTRUMENTS

We use derivative and non-derivative contracts to manage risks related to obtaining adequate supplies and the price fluctuations of natural gas, electricity and propane and to mitigate interest rate risk. Our natural gas, electric and propane distribution operations have entered into agreements with suppliers to purchase natural gas, electricity and propane for resale to our customers. Our natural gas gathering and transmission company has entered into contracts with producers to secure natural gas to meet its obligations. Purchases under these contracts typically either do not meet the definition of derivatives or are considered “normal purchases and normal sales” and are accounted for on an accrual basis. Our propane distribution operations may also enter into fair value hedges of their inventory or cash flow hedges of their future purchase commitments in order to mitigate the impact of wholesale price fluctuations. Occasionally, we may enter into interest rate swap agreements to mitigate risk associated with changes in short-term borrowing rates. As of December 31, 2023 and 2022, our natural gas and electric distribution operations did not have any outstanding derivative contracts.

Volume of Derivative Activity

As of December 31, 2023, the volume of our open commodity derivative contracts were as follows:

Business unit	Commodity	Contract Type	Quantity hedged (in millions)	Designation	Longest expiration date of hedge
Sharp	Propane (gallons)	Purchases	18.1	Cash flow hedges	June 2026
Sharp	Propane (gallons)	Sales	3.2	Cash flow hedges	March 2024

Sharp entered into futures and swap agreements to mitigate the risk of fluctuations in wholesale propane index prices associated with the propane volumes expected to be purchased and/or sold during the heating season. Under the futures and swap agreements, Sharp will receive or pay the difference between (i) the index prices (Mont Belvieu prices in December 2023 through June 2026) and (ii) the per gallon propane contracted prices, to the extent the index prices deviate from the contracted prices. We designated and accounted for the propane swaps as cash flows hedges. The change in the fair value of the swap agreements is initially recorded as a component of accumulated other comprehensive income (loss) and later recognized in our consolidated statement of income in the same period and in the same line item as the hedged transaction. We expect to reclassify approximately $0.3 million of unrealized losses from accumulated other comprehensive income (loss) to earnings during the next 12-month period.

Interest Rate Swap Activities

We manage interest rate risk by entering into derivative contracts to hedge the variability in cash flows attributable to changes in the short-term borrowing rates. In September 2022, we entered into an interest rate swap with a notional amount of $50.0 million through September 2025, with pricing of 3.98 percent.

In February 2021, we entered into an interest rate swap with a notional amount of $40.0 million through December 2021 with pricing of 0.17 percent. In the fourth quarter of 2020, we entered into interest rate swaps with notional amounts totaling $60.0 million through December 2021 with pricing of approximately 0.20 percent for the period associated with our outstanding borrowing under the Revolver.

In August 2022, we amended and restated the Revolver and transitioned the benchmark interest rate to the 30-day SOFR as a result of the expiration of LIBOR. Accordingly, our current interest rate swap is cash settled monthly as the counter-party pays us the 30-day SOFR rate less the fixed rate. Prior to August 2022, our short-term borrowing interest rate was based on the 30-day LIBOR rate. Our pre-2022 interest rate swaps were cash settled monthly as the counter-party paid us the 30-day LIBOR rate less the fixed rate.

We designate and account for interest rate swaps as cash flows hedges. Accordingly, unrealized gains and losses associated with the interest rate swaps are initially recorded as a component of accumulated other comprehensive income (loss). As the interest rate swap settles each month, the realized gain or loss is recorded in the income statement and is recognized as a component of interest charges.

Broker Margin

Futures exchanges have contract specific margin requirements that require the posting of cash or cash equivalents relating to traded contracts. Margin requirements consist of initial margin that is posted upon the initiation of a position. maintenance margin that is usually expressed as a percent of initial margin, and variation margin that fluctuates based on the daily mark-to-market relative to maintenance margin requirements. We currently maintain a broker margin account for Sharp included within other current assets on the consolidated balance sheet with a balance of $2.1 million as of December 31, 2023 compared to a current liability of $0.1 million at December 31, 2022.

Financial Statements Presentation

The following tables present information about the fair value and related gains and losses of our derivative contracts. We did not have any derivative contracts with a credit-risk-related contingency. Fair values of the derivative contracts recorded in the consolidated balance sheets as of December 31, 2023 and 2022 are as follows:

	Derivative Assets		
		Fair Value as of	
(in thousands)	**Balance Sheet Location**	**December 31, 2023**	**December 31, 2022**
Derivatives designated as cash flow hedges			
Propane swap agreements	Derivative assets, at fair value [(1)]	$ 702	$ 3,317
Interest rate swap agreements	Derivative assets, at fair value [(1)]	365	452
Total Derivative Assets		$ 1,067	$ 3,769

[(1)] Derivative assets, at fair value include $1.0 million and $2.8 million in current assets in the consolidated balance sheet at December 31, 2023 and 2022, respectively, with the remainder of the balance classified as long-term.

	Derivative Liabilities		
		Fair Value as of	
(in thousands)	**Balance Sheet Location**	**December 31, 2023**	**December 31, 2022**
Derivatives designated as cash flow hedges			
Propane swap agreements	Derivative liabilities, at fair value [(1)]	$ 1,078	$ 1,810
Interest rate swap agreements	Derivative liabilities, at fair value [(1)]	203	405
Total Derivative Liabilities		$ 1,281	$ 2,215

[(1)] Derivative liabilities, at fair value include $0.4 million and $0.6 million in current liabilities in the consolidated balance sheet at December 31, 2023 and 2022, respectively, with the remainder of the balance classified as long-term.

The effects of gains and losses from derivative instruments and their location in the consolidated statements of income are as follows:

(in thousands)	Location of Gain (Loss) on Derivatives	Amount of Gain (Loss) on Derivatives: For the Year Ended December 31, 2023	2022	2021
Derivatives not designated as hedging instruments				
Propane swap agreements	Propane and natural gas costs	$ —	$ 56	$ (1)
Derivatives designated as fair value hedges				
Put/Call option	Propane and natural gas costs	—	—	(24)
Derivatives designated as cash flow hedges				
Propane swap agreements	Revenues	**1,221**	(373)	(536)
Propane swap agreements	Propane and natural gas costs	**(1,160)**	3,881	7,187
Interest rate swap agreements	Interest expense	**523**	(47)	(40)
Total		**$ 584**	$ 3,517	$ 6,586

9. Fair Value of Financial Instruments

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The three levels of the fair value hierarchy are as follows:

Fair Value Hierarchy	Description of Fair Value Level	Fair Value Technique Utilized
Level 1	Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities	*Investments - equity securities* - The fair values of these trading securities are recorded at fair value based on unadjusted quoted prices in active markets for identical securities. *Investments - mutual funds and other* - The fair values of these investments, comprised of money market and mutual funds, are recorded at fair value based on quoted net asset values of the shares.
Level 2	Quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability	*Derivative assets and liabilities* - The fair value of the propane put/call options, propane and interest rate swap agreements are measured using market transactions for similar assets and liabilities in either the listed or over-the-counter markets.
Level 3	Prices or valuation techniques requiring inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity)	*Investments - guaranteed income fund* - The fair values of these investments are recorded at the contract value, which approximates their fair value.

Financial Assets and Liabilities Measured at Fair Value

The following tables summarize our financial assets and liabilities that are measured at fair value on a recurring basis and the fair value measurements, by level, within the fair value hierarchy as of December 31, 2023 and 2022, respectively:

		Fair Value Measurements Using:		
As of December 31, 2023	**Fair Value**	**Quoted Prices in Active Markets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
(in thousands)				
Assets:				
Investments—equity securities	$ 21	$ 21	$ —	$ —
Investments—guaranteed income fund	1,489	—	—	1,489
Investments—mutual funds and other	10,772	10,772	—	—
Total investments	12,282	10,793	—	1,489
Derivative assets	1,067	—	1,067	—
Total assets	$ 13,349	$ 10,793	$ 1,067	$ 1,489
Liabilities:				
Derivative liabilities	$ 1,281	$ —	$ 1,281	$ —

		Fair Value Measurements Using:		
As of December 31, 2022	**Fair Value**	**Quoted Prices in Active Markets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
(in thousands)				
Assets:				
Investments—equity securities	$ 24	$ 24	$ —	$ —
Investments—guaranteed income fund	1,853	—	—	1,853
Investments—mutual funds and other	8,699	8,699	—	—
Total investments	10,576	8,723	—	1,853
Derivative assets	3,769	—	3,769	—
Total assets	$ 14,345	$ 8,723	$ 3,769	$ 1,853
Liabilities:				
Derivative liabilities	$ 2,215	$ —	$ 2,215	$ —

The changes in the fair value of our Level 3 investments for the years ended December 31, 2023 and 2022 were immaterial. Investment income from our Level 3 investments is reflected in other income (expense), net in the consolidated statements of income.

At December 31, 2023 and 2022, there were no non-financial assets or liabilities required to be reported at fair value. We review our non-financial assets for impairment at least on an annual basis, as required.

Other Financial Assets and Liabilities

Financial assets with carrying values approximating fair value include cash and cash equivalents and accounts receivable. Financial liabilities with carrying values approximating fair value include accounts payable, other accrued liabilities and short-term debt. The fair value of cash and cash equivalents is measured using the comparable value in the active market (Level 1 measurement). The fair value of short-term debt approximates the carrying value due to its near-term maturities and because interest rates approximate current market rates (Level 2 measurement).

At December 31, 2023, long-term debt, which includes the current maturities but excludes debt issuance cost, had a carrying value of [illegible] billion compared to the estimated fair value of $1.2 billion. At December 31, 2022, long-term debt, which includes the current maturities and excludes debt issuance costs, had a carrying value of $600.8 million, compared to a fair value of [illegible] million. The fair value was calculated using a discounted cash flow methodology that incorporates a market interest rate based on published corporate borrowing rates for debt instruments with similar terms and average maturities, and with adjustments for duration. optionality, and risk profile. The valuation technique used to estimate the fair value of long-term debt would be considered a Level 2 measurement.

See Note 16, *Employee Benefit Plans,* for fair value measurement information related to our pension plan assets.

10. Goodwill and Other Intangible Assets

The carrying value of goodwill as of December 31, 2023 and 2022 was as follows:

(in thousands)	Regulated Energy	Unregulated Energy	Total Goodwill
Balance at December 31, 2022	$ 7,689	$ 38,524	$ 46,213
Additions [(1)]	461,025	936	461,961
Balance at December 31, 2023	**$ 468,714**	**$ 39,460**	**$ 508,174**

[(1)] 2023 additions primarily attributable to goodwill from the November 2023 acquisition of FCG See Note 4 for additional details

There were no goodwill impairments recognized during the three-year period ended December 31, 2023.

The carrying value and accumulated amortization of intangible assets subject to amortization as of December 31, 2023 and 2022 was as follows:

	As of December 31,			
	2023		2022	
(in thousands)	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Customer relationships	**$ 17,004**	**$ 7,146**	$ 16,965	$ 6,131
Non-Compete agreements	**3,125**	**1,855**	3,105	1,411
Patents [(1)]	**6,558**	**859**	5,819	533
Other	**270**	**232**	270	225
Total	**$ 26,957**	**$ 10,092**	$ 26,159	$ 8,300

[(1)] Includes amounts related to patented technology developed by Marlin Gas Services and the acquisition of Planet Found

The customer relationships, non-compete agreements, patents and other intangible assets acquired in the purchases of the operating assets of several companies are being amortized over a weighted average of 14 years. Amortization expense of intangible assets for the year ended December 31, 2023, 2022 and 2021 was $1.8 million. $1.5 million and $1.3 million, respectively. Amortization expense of intangible assets is expected to be $1.8 million for the years 2024 through 2025, $1.6 million for 2026, $1.5 million for 2027 and $1.3 million for 2028.

11. Income Taxes

We file a consolidated federal income tax return. Income tax expense allocated to our subsidiaries is based upon their respective taxable incomes and tax credits. State income tax returns are filed on a separate company basis in most states where we have operations and/or are required to file. Our state returns for tax years after 2017 are subject to examination. At December 31, 2023, the 2015 through 2019 federal income tax returns are no longer under examination.

For state income tax purposes, we had NOL in various states of $72.9 million and $67.7 million as of December 31, 2023 and 2022, respectively, almost all of which will expire in 2040. Excluding NOLs from discontinued operations, we have recorded deferred tax assets of $1.8 million and $1.5 million related to state NOL carry-forwards at December 31, 2023 and 2022, respectively. We have not recorded a valuation allowance to reduce the future benefit of the tax NOL because we believe they will be fully utilized.

Tax Law Changes

In March 2020, the CARES Act was signed into law and included several significant changes to the Internal Revenue Code. The CARES Act includes certain tax relief provisions including the ability to carryback five years net operating losses arising in a tax year beginning in 2018, 2019, or 2020. This provision allows a taxpayer to recover taxes previously paid at a 35 percent federal income tax rate during tax years prior to 2018. In addition, the CARES Act removed the taxable income limitation to allow a tax NOL to fully offset taxable income for tax years beginning before January 1, 2021. As a result, our income tax expense for the year ended December 31, 2021 included a tax benefit $0.9 million, attributable to the tax NOL carryback provided under the CARES Act for losses generated in 2018 and 2019 and then applied back to our 2013 and 2015 tax years in which we paid federal income taxes at a 35 percent tax rate. Tax benefits associated with this legislation were not available for the year ended December 31, 2023.

On December 22, 2017, the TCJA was signed into law. Substantially all of the provisions of the TCJA were effective for taxable years beginning on or after January 1, 2018. The provisions that significantly impacted us include the reduction of the corporate federal income tax rate from 35 percent to 21 percent. Our federal income tax expense for periods beginning on January 1, 2018 are based on the new federal corporate income tax rate. The TCJA included changes to the Internal Revenue Code, which materially impacted our 2017 financial statements. ASC 740, *Income Taxes,* requires recognition of the effects of changes in tax laws in the period in which the law is enacted. ASC 740 requires deferred tax assets and liabilities to be measured at the enacted tax rate expected to apply when temporary differences are to be realized or settled. During 2018, we completed the assessment of the impact of accounting for certain effects of the TCJA. At the date of enactment in 2017, we re-measured deferred income taxes based upon the new corporate tax rate. See Note 18, *Rates and Other Regulatory Activities,* for further discussion of the TCJA's impact on our regulated businesses.

The following tables provide: (a) the components of income tax expense in 2023, 2022, and 2021; (b) the reconciliation between the statutory federal income tax rate and the effective income tax rate for 2023, 2022, and 2021; and (c) the components of accumulated deferred income tax assets and liabilities at December 31, 2023 and 2022.

	For the Year Ended December 31,		
	2023	**2022**	**2021**
(in thousands)

Total long-term debt	**1,205,580**	599,871
Less: current maturities	**(18,505)**	(21,483)
Total long-term debt, net of current maturities	**$ 1,187,075**	$ 578,388

Terms of the Senior Notes

All of our outstanding Senior Notes set forth certain business covenants to which we are subject when any note is outstanding, including covenants that limit or restrict our ability, and the ability of our subsidiaries, to incur indebtedness, or place or permit liens and encumbrances on any of our property or the property of our subsidiaries.

Senior Notes

On November 20, 2023, we issued Senior Notes in the aggregate principal amount of $550.0 million at an average interest rate of 6.54 percent that were used to partially finance our acquisition of FCG which closed during the fourth quarter of 2023. These notes have varying maturity dates of between three and 15 years, and the outstanding principal balance of the notes will be due on their respective maturity dates with interest payments payable semiannually until the principal has been paid in full. These Senior Notes have similar covenants and default provisions as our other Senior Notes.

On March 14, 2023 we issued 5.43 percent Senior Notes due March 14, 2038 in the aggregate principal amount of $80.0 million and used the proceeds received from the issuances of the Senior Notes to reduce short-term borrowings under our Revolver and to fund capital expenditures. These Senior Notes have similar covenants and default provisions as our other Senior Notes, and have an annual principal amortization payment beginning in the sixth year after the issuance.

Annual Maturities

Annual maturities and principal repayments of long-term debt are as follows:

Year	2024	2025	2026	2027	2028	Thereafter	Total
(in thousands)							
Payments	$ 18,505	$ 25,528	$ 134,551	$ 131,674	$ 136,699	$ 762,376	$1,209,333

Shelf Agreements

We have entered into Shelf Agreements with Prudential and MetLife, whom are under no obligation to purchase any unsecured debt. In February 2023, we amended these Shelf Agreements, which expanded the total borrowing capacity and extended the term of the agreements for an additional three years to 2026. The following table summarizes the current available capacity under our Shelf Agreements at December 31, 2023:

(in thousands)	Total Borrowing Capacity	Less Amount of Debt Issued	Less Unfunded Commitments	Remaining Borrowing Capacity
Shelf Agreements [1]				
Prudential Shelf Agreement	$ 405,000	$ (300,000)	$ —	$ 105,000
MetLife Shelf Agreement	200,000	(50,000)	—	150,000
Total	$ 605,000	$ (350,000)	$ —	$ 255,000

13. SHORT-TERM BORROWINGS

We are authorized by our Board of Directors to borrow up to $375.0 million of short-term debt, as required. At December 31, 2023 and 2022, we had $179.9 million and $202.2 million, respectively, of short-term borrowings outstanding at a weighted average interest rate of 5.83 percent and 5.04 percent, respectively. There were no borrowings outstanding under the sustainable investment sublimit of the 364-day tranche at December 31, 2023.

We have entered into several amendments to our Revolver which resulted in modifications to both tranches of the facility. The most recent amendment in October 2023 allowed for a change in our funded indebtedness ratio from 65 percent to 70 percent during the quarter in which the acquisition of FCG is consummated and the quarter subsequent to the closing of the acquisition. The amendment in August 2023 served to renew the 364-day tranche of the Revolver, providing for $175.0 million of short-term debt capacity. Additionally, the amendment for borrowings under the 364-day tranche shall now bear interest (i) based upon the SOFR, plus a 10-basis point credit spread adjustment, and an applicable margin of 1.05 percent or less, with such margin based on total indebtedness as a percentage of total capitalization or (ii) the base rate, solely at our discretion. Further, the amendment provided that borrowings under the 364-day green loan sublimit shall now bear interest at (i) the SOFR rate plus a 10-basis point credit spread adjustment and an applicable margin of 1.00 percent or less, with such margin based on total indebtedness as a percentage of total capitalization or (ii) the base rate plus 0.05 percent or less, solely at our discretion. The amendment entered into in 2022 served to reset the benchmark interest rate to SOFR and to eliminate a previous covenant which capped our investment limit to $150.0 million for investments where we maintain less than 50 percent ownership.

The 364-day tranche of the Revolver expires in August 2024 and the five-year tranche expires in August 2026. Borrowings under both tranches of the Revolver are subject to a pricing grid, including the commitment fee and the interest rate charged based upon our total indebtedness to total capitalization ratio for the prior quarter. As of December 31, 2023, the pricing under the 364-day tranche of the Revolver included a commitment fee of 9-basis points on undrawn amounts and an interest rate of 75-basis points over SOFR plus a 10-basis point SOFR adjustment on outstanding balances. As of December 31, 2023, the pricing under the five-year tranche of the Revolver included a commitment fee of 9-basis points on undrawn amounts and an interest rate of 95-basis points over SOFR plus a 10-basis point SOFR adjustment on outstanding balances.

The availability of funds under the Revolver is subject to conditions specified in the credit agreement, all of which we currently satisfy. These conditions include our compliance with financial covenants and the continued accuracy of representations and warranties contained in the Revolver's loan documents. We are required by the financial covenants in the Revolver to maintain, at the end of each fiscal year, a funded indebtedness ratio as described above. As of December 31, 2023, we are in compliance with this covenant.

Our total available credit under the Revolver at December 31, 2023 was $188.1 million. As of December 31, 2023, we had issued $[illegible] million in letters of credit to various counterparties under the Revolver. These letters of credit are not included in the outstanding short-term borrowings and we do not anticipate that they will be drawn upon by the counterparties. The letters of credit reduce the available borrowings under the Revolver.

In connection with our acquisition of FCG, we entered into a 364-day Bridge Facility commitment with Barclays Bank PLC and other lending parties for up to $965.0 million. Upon closing of the FCG acquisition in November 2023, and with the completion of other financing activities as defined in the lending agreement, this facility was terminated with no funds drawn to finance the transaction. For additional information regarding the acquisition and related financing, see Note 4, *Acquisitions*, Note 12, *Long-Term Debt* and Note 15, *Stockholders Equity*.

For additional information on interest rate swaps related to our short-term borrowings, see Note 8, *Derivative Instruments*.

14. Leases

We have entered into lease arrangements for office space, land. equipment, pipeline facilities and warehouses. These lease arrangements enable us to better conduct business operations in the regions in which we operate. Office space is leased to provide adequate workspace for our employees in several locations throughout our service territories. We lease land at various locations throughout our service territories to enable us to inject natural gas into underground storage and distribution systems, for bulk storage capacity, for our propane operations and for storage of equipment used in repairs and maintenance of our infrastructure. We lease natural gas compressors to ensure timely and reliable transportation of natural gas to our customers. We also lease warehouses to store equipment and materials used in repairs and maintenance for our businesses.

Some of our leases are subject to annual changes in the Consumer Price Index ("CPI"). While lease liabilities are not re-measured as a result of changes to the CPI, changes to the CPI are treated as variable lease payments and recognized in the period in which the obligation for those payments was incurred. A 100-basis-point increase in CPI would not have resulted in material additional annual lease costs. Most of our leases include options to renew, with renewal terms that can extend the lease term from one to 25 years or more. The exercise of lease renewal options is at our sole discretion. The amounts disclosed in our consolidated balance sheet at December 31, 2023, pertaining to the right-of-use assets and lease liabilities, are measured based on our current expectations of exercising our available renewal options. Our existing leases are not subject to any restrictions or covenants that would preclude our ability to pay dividends, obtain financing or enter into additional leases. As of December 31, 2023, we have not entered into any leases, which have not yet commenced, that would entitle us to significant rights or create additional obligations. The following table presents information related to our total lease cost included in our consolidated statements of income:

		Year Ended December 31,	
(in thousands)	**Classification**	**2023**	**2022**
Operating lease cost [1]	Operations expense	**$ 3,040**	$ 2,883

[1] Includes short-term leases and variable lease costs, which are immaterial

The following table presents the balance and classifications of our right of use assets and lease liabilities included in our consolidated balance sheets at December 31, 2023 and 2022:

(in thousands)	**Balance sheet classification**	**December 31, 2023**	**December 31, 2022**
Assets			
Operating lease assets	Operating lease right-of-use assets	**$ 12,426**	$ 14,421
Liabilities			
Current			
Operating lease liabilities	Other accrued liabilities	**$ 2,454**	$ 2,552
Noncurrent			
Operating lease liabilities	Operating lease - liabilities	**10,550**	12,392
Total lease liabilities		**$ 13,004**	$ 14,944

The following table presents our weighted-average remaining lease term and weighted-average discount rate for our operating leases at December 31, 2023 and 2022:

	December 31, 2023	December 31, 2022
Weighted-average remaining lease term (*in years*)		
Operating leases	**8.1**	8.5
Weighted-average discount rate		
Operating leases	**3.5 %**	3.4 %

The following table presents additional information related to cash paid for amounts included in the measurement of lease liabilities included in our consolidated statements of cash flows at December 31, 2023 and 2022:

	Year Ended December 31,	
(in thousands)	2023	2022
Operating cash flows from operating leases	**$ 2,906**	$ 2,931

The following table presents the future undiscounted maturities of our operating and financing leases at December 31, 2023 and for each of the next five years and thereafter:

(in thousands)	Operating Leases [(1)]
2024	**$ 2,771**
2025	**2,288**
2026	**1,774**
2027	**1,583**
2028	**1,205**
Thereafter	**5,243**
Total lease payments	**14,864**
Less: Interest	**(1,860)**
Present value of lease liabilities	**$ 13,004**

[(1)] Operating lease payments include $2.1 million related to options to extend lease terms that are reasonably certain of being exercised.

15. STOCKHOLDERS' EQUITY

Common Stock Issuances

In November 2023, in connection with our acquisition of FCG, we completed an overnight offering resulting in the issuance of 4.4 million shares of our common stock at a price per share of $82.72 (net of underwriter discounts and commissions). We received net proceeds of $366.4 million which were used to partially finance the acquisition.

We maintain an effective shelf registration statement with the SEC for the issuance of shares under our DRIP and our previous ATM programs. Depending on our capital needs and subject to market conditions, in addition to other possible debt and equity offerings, we may issue additional shares under the direct stock purchase component of the DRIP. There were no issuances under the DRIP in 2023. In 2022, we issued less than 0.1 million shares at an average price per share of $136.26 and received net proceeds of $4.5 million under the DRIP. Our most recent ATM equity program, which allowed us to issue and sell shares of our common stock up to an aggregate offering price of $75 million, expired in June 2023.

Net proceeds from share issuances under our DRIP and ATM programs are used for general corporate purposes including, but not limited to, financing of capital expenditures, repayment of short-term debt, financing acquisitions, investing in subsidiaries, and general working capital purposes.

Accumulated Other Comprehensive Income (Loss)

Defined benefit pension and postretirement plan items, unrealized gains (losses) of our propane swap agreements designated as commodity contract cash flow hedges, and the unrealized gains (losses) of our interest rate swap agreements designated as cash flow hedges are the components of our accumulated other comprehensive income (loss). The following tables present the changes in the balances of accumulated other comprehensive income (loss) components for the years ended December 31, 2023 and 2022. All amounts in the following tables are presented net of tax.

(in thousands)	Defined Benefit Pension and Postretirement Plan Items	Commodity Contract Cash Flow Hedges	Interest Rate Swap Cash Flow Hedges	Total
As of December 31, 2021	**$ (3,268)**	**$ 4,571**	**$ —**	**$ 1,303**
Other comprehensive income (loss) before reclassifications	705	(934)	—	(229)
Amounts reclassified from accumulated other comprehensive income (loss)	57	(2,545)	35	(2,453)
Net current-period other comprehensive income (loss)	762	(3,479)	35	(2,682)
As of December 31, 2022	**(2,506)**	**1,092**	**35**	**(1,379)**
Other comprehensive income (loss) before reclassifications	(110)	(1,322)	473	(959)
Amounts reclassified from accumulated other comprehensive income (loss)	32	(44)	(388)	(400)
Net current-period other comprehensive income (loss)	(78)	(1,366)	85	(1,359)
As of December 31, 2023	**$ (2,584)**	**$ (274)**	**$ 120**	**$ (2,738)**

Deferred gains or losses for our commodity contract and interest rate swap cash flow hedges are recognized in earnings upon settlement and are included in the effects of gains and losses from derivative instruments. See Note 8, *Derivative Instruments*, for additional details. Amortization of the net loss related to the defined benefit pension plan and postretirement plans is included in the computation of net periodic costs (benefits). See Note 16, *Employee Benefit Plans*, for additional details.

16. Employee Benefit Plans

We measure the assets and obligations of the defined benefit pension plans and other postretirement benefits plans to determine the plans' funded status as of the end of the year. The changes in funded status that occurred during the year that are not recognized as part of net periodic benefit costs are recorded as a component of other comprehensive income (loss) or a regulatory asset.

Defined Benefit Pension Plans

At December 31, 2023 we sponsored two defined benefit pension plans: the FPU Pension Plan and the Chesapeake Supplemental Executive Retirement Plan ("SERP").

The FPU Pension Plan, a qualified plan, covers eligible FPU non-union employees hired before January 1, 2005 and union employees hired before the respective union contract expiration dates in 2005 and 2006. Prior to the FPU merger, the FPU Pension Plan was frozen with respect to additional years of service and compensation, effective December 31, 2009.

The Chesapeake SERP, a nonqualified plan, is comprised of two sub-plans. The first sub-plan was frozen with respect to additional years of service and additional compensation as of December 31, 2004. The second sub-plan provides fixed payments for several executives who joined the Company as a result of an acquisition and whose agreements with the Company provided for this benefit.

The unfunded liability for all plans at both December 31, 2023 and 2022, is included in the other pension and benefit costs liability in our consolidated balance sheets.

The following schedules set forth the funded status at December 31, 2023 and 2022 and the net periodic cost (benefit) for the years ended December 31, 2023, 2022 and 2021 for the FPU Pension Plan and the Chesapeake SERP:

At December 31,	FPU Pension Plan 2023	FPU Pension Plan 2022	Chesapeake SERP 2023	Chesapeake SERP 2022
(in thousands)				
Change in benefit obligation:				
Benefit obligation — beginning of year	**$ 49,941**	$ 67,030	**$ 1,659**	$ 2,096

Benefit obligation — end of year	**49,657**	49,941	**1,636**	1,659
Change in plan assets:				
Fair value of plan assets — beginning of year	**46,203**	58,712	**—**	—
Actual return on plan assets	**6,462**	(9,552)	**—**	—
Employer contributions	**—**	200	**152**	152
Benefits paid	**(3,233)**	(3,157)	**(152)**	(152)
Fair value of plan assets — end of year	**49,432**	46,203	**—**	—
Accrued pension cost / funded status	**$ (225)**	$ (3,738)	**$ (1,636)**	$ (1,659)
Assumptions:				
Discount rate	**5.00 %**	5.25 %	**4.88 %**	5.00 %
Expected return on plan assets	**6.00 %**	6.00 %	**— %**	— %

For the Years Ended December 31,	FPU Pension Plan 2023	FPU Pension Plan 2022	FPU Pension Plan 2021	Chesapeake SERP 2023	Chesapeake SERP 2022	Chesapeake SERP 2021
(in thousands)						
Components of net periodic pension cost:						
Interest cost	**$2,495**	$ 1,781	$1,714	**$ 81**	$ 50	$ 48
Expected return on assets	**(2,670)**	(3,430)	(3,306)	**—**	—	—
Amortization of actuarial loss	**407**	466	612	**8**	28	28
Total periodic cost	**$ 232**	$ (1,183)	$ (980)	**$ 89**	$ 78	$ 76
Assumptions:						
Discount rate	**5.25 %**	2.75 %	2.50 %	**5.00 %**	2.50 %	2.25 %
Expected return on plan assets	**6.00 %**	6.00 %	6.00 %	**— %**	— %	— %

During the fourth quarter of 2021, we formally terminated the Chesapeake Pension Plan. Total periodic cost for the plan during that year was $2.0 million attributable to a settlement charge.

Our funding policy provides that payments to the trust of each qualified plan shall be equal to at least the minimum funding requirements of the Employee Retirement Income Security Act of 1974. The following schedule summarizes the assets of the FPU Pension Plan, by investment type, at December 31, 2023, 2022 and 2021:

	FPU Pension Plan		
At December 31,	2023	2022	2021
Asset Category			
Equity securities	**50 %**	53 %	52 %
Debt securities	**49 %**	38 %	38 %
Other	**1 %**	9 %	10 %
Total	**100 %**	100 %	100 %

The investment policy of the FPU Pension Plan is designed to provide the capital assets necessary to meet the financial obligations of the plan. The investment goals and objectives are to achieve investment returns that, together with contributions, will provide funds adequate to pay promised benefits to present and future beneficiaries of the plan, earn a competitive return to increasingly fund a large portion of the plan's retirement liabilities, minimize pension expense and cumulative contributions resulting from liability measurement and asset performance, and maintain the appropriate mix of investments to reduce the risk of large losses over the expected remaining life of the plan.

The following allocation range of asset classes is intended to produce a rate of return sufficient to meet the FPU Pension Plan's goals and objectives:

Asset Allocation Strategy

Asset Class	Minimum Allocation Percentage	Maximum Allocation Percentage
Domestic Equities (Large Cap, Mid Cap and Small Cap)	33 %	57 %
Fixed Income (Inflation Bond and Taxable Fixed)	38 %	58 %
Foreign Equities (Developed and Emerging Markets)	3 %	7 %
Cash	0 %	5 %

Due to periodic contributions and different asset classes producing varying returns, the actual asset values may temporarily move outside of the intended ranges. The investments are monitored on a quarterly basis, at a minimum, for asset allocation and performance.

At December 31, 2023 and 2022, the assets of the FPU Pension Plan were comprised of the following investments:

	Fair Value Measurement Hierarchy	
	For Year Ended December 31,	
Asset Category	2023	2022
(in thousands)		
Mutual Funds - Equity securities		
U.S. Large Cap [(1)]	**$ 15,360**	$ 3,413
U.S. Mid Cap [(1)]	**4,271**	1,425
U.S. Small Cap [(1)]	**2,518**	692
International [(2)]	**2,499**	9,352
Alternative Strategies [(3)]	**—**	4,824
	24,648	19,706
Mutual Funds - Debt securities		
Fixed income [(4)]	**24,228**	15,343
High Yield [(4)]	**—**	2,269
	24,228	17,612
Mutual Funds - Other		
Commodities [(5)]	**—**	1,832
Real Estate [(6)]	**—**	1,709
Guaranteed deposit [(7)]	**556**	398
	556	3,939
Total Pension Plan Assets in fair value hierarchy [(8)]	**49,432**	41,257
Investments measured at net asset value [(9)]	**—**	4,946
Total Pension Plan Assets	**$ 49,432**	$ 46,203

(1) Includes funds that invest primarily in United States common stocks.
(2) Includes funds that invest primarily in foreign equities and emerging markets equities.
(3) Includes funds that actively invest in both equity and debt securities, funds that sell short securities and funds that provide long-term capital appreciation. The funds may invest in debt securities below investment grade.
(4) Includes funds that invest in investment grade and fixed income securities.
(5) Includes funds that invest primarily in commodity-linked derivative instruments and fixed income securities.
(6) Includes funds that invest primarily in real estate.
(7) Includes investment in a group annuity product issued by an insurance company.
(8) All investments in the FPU Pension Plan are classified as Level 1 within the Fair Value hierarchy exclusive of the Guaranteed Deposit Account which is classified as Level 3.
(9) Certain investments that were measured at net asset value per share have not been classified in the fair value hierarchy. These amounts are presented to reconcile to total pension plan assets.

At December 31, 2023 and 2022, our pension plan investments were classified under the same fair value measurement hierarchy (Level 1 through Level 3) described under Note 9, *Fair Value of Financial Instruments.* The Level 3 investments were recorded at fair value based on the contract value of annuity products underlying guaranteed deposit accounts, which was calculated using discounted cash flow models. The contract value of these products represented deposits made to the contract, plus earnings at guaranteed crediting rates, less withdrawals and fees. Certain investments that were measured at net asset value per share have not been classified in the fair value hierarchy and are presented in the table above to reconcile to total pension plan assets.

The changes in the fair value within our pension assets for Level 3 investments for the years ended December 31, 2023 and 2022 were immaterial.

Other Postretirement Benefits Plans

We sponsor two defined benefit postretirement health plans: the Chesapeake Utilities Postretirement Plan ("Chesapeake Postretirement Plan") and the FPU Medical Plan. At December 31, 2023 and 2022, the funded status of the Chesapeake Postretirement Plan was $1.1 million and $0.6 million, respectively. The funded status of the FPU Medical Plan was $0.4 million and $0.7 million as of December 31, 2023 and 2022, respectively.

Net periodic postretirement benefit costs for the Chesapeake Postretirement Plan and the FPU Medical Plan were not material for the years ended December 31, 2023, 2022, and 2021.

As of December 31, 2023, there was $12.8 million not yet reflected in net periodic postretirement benefit costs and included in accumulated other comprehensive income (loss) or as a regulatory asset. Net losses of $10.8 million and $1.2 million attributable to the FPU Pension Plan and Chesapeake Postretirement Plan, respectively, comprised most of this amount with $3.2 million recorded in accumulated other comprehensive income (loss) and $8.7 million recorded as a regulatory asset at December 31, 2023.

Pursuant to a Florida PSC order, FPU continues to record as a regulatory asset the portion of the unrecognized pension and postretirement benefit costs after the merger with Chesapeake Utilities related to its regulated operations.

Assumptions

The assumptions used for the discount rate to calculate the benefit obligations were based on the interest rates of high-quality bonds in 2023, considering the expected lives of each of the plans. In determining the average expected return on plan assets for the FPU Pension Plan, various factors, such as historical long-term return experience, investment policy and current and expected allocation, were considered. Since the FPU Pension Plan is frozen with respect to additional years of service and compensation, the rate of assumed compensation increases is not applicable.

The health care inflation rate for 2023 used to calculate the benefit obligation is 5 percent for medical and 6 percent for prescription drugs for the Chesapeake Postretirement Plan; and 5 percent for both medical and prescription drugs for the FPU Medical Plan.

Estimated Future Benefit Payments

In 2024, we do not expect to contribute to the FPU Pension Plan, and total payments of $0.2 million are expected for the Chesapeake SERP, Chesapeake Postretirement Plan and FPU Medical Plan combined.

The schedule below shows the estimated future benefit payments for each of the plans previously described:

(in thousands)	FPU Pension Plan [1]	Chesapeake SERP [2]	Chesapeake Postretirement Plan [2]	FPU Medical Plan [2]
2024	$ 3,528	$ 151	$ 42	$ 35
2025	$ 3,603	$ 164	$ 46	$ 35
2026	$ 3,617	$ 161	$ 45	$ 34
2027	$ 3,616	$ 158	$ 48	$ 33
2028	$ 3,651	$ 154	$ 49	$ 32
Years 2029 through 2033	$ 17,951	$ 689	$ 299	$ 143

[1] The pension plan is funded; therefore, benefit payments are expected to be paid out of the plan assets.
[2] Benefit payments are expected to be paid out of our general funds.

Retirement Savings Plan

We sponsor a 401(k) Retirement Savings Plan which is offered to all eligible employees who have completed three months of service. We match 100 percent of eligible participants' pre-tax contributions to the Retirement Savings Plan up to a maximum of six percent of eligible compensation. The employer matching contribution is made in cash and is invested based on a participant's investment directions. In addition, we may make a discretionary supplemental contribution to participants in the plan, without regard to whether or not they make pre-tax contributions. Any supplemental employer contribution is generally made in our common stock. With respect to the employer match and supplemental employer contribution, employees are 100 percent vested after two years of service or upon reaching 55 years of age while still employed by us. New employees who do not make an election to contribute and do not opt out of the Retirement Savings Plan will be automatically enrolled at a deferral rate of three percent, and the automatic deferral rate will increase by one percent per year up to a maximum of ten percent. All contributions and matched funds can be invested among the mutual funds available for investment.

Employer contributions to our Retirement Savings Plan totaled $6.6 million, $6.2 million, and $5.9 million for the years ended December 31, 2023, 2022 and 2021, respectively. As of December 31, 2023, there were 798,586 shares of our common stock reserved to fund future contributions to the Retirement Savings Plan.

Non-Qualified Deferred Compensation Plan

Members of our Board of Directors and officers of the Company are eligible to participate in the Non-Qualified Deferred Compensation Plan. Directors can elect to defer any portion of their cash or stock compensation and officers can defer up to 80 percent of their base compensation, cash bonuses or any amount of their stock bonuses (net of required withholdings). Officers may receive a matching contribution on their cash compensation deferrals up to six percent of their compensation, provided it does not duplicate a match they receive in the Retirement Savings Plan. Stock bonuses are not eligible for matching contributions. Participants are able to elect the payment of deferred compensation to begin on a specified future date or upon separation from service. Additionally, participants can elect to receive payments upon the earlier or later of a fixed date or separation from service. The payments can be made in one lump sum or annual installments for up to 15 years.

All obligations arising under the Non-Qualified Deferred Compensation Plan are payable from our general assets, although we have established a Rabbi Trust to informally fund the plan. Deferrals of cash compensation may be invested by the participants in various mutual funds (the same options that are available in the Retirement Savings Plan). The participants are credited with gains or losses on those investments. Deferred stock compensation may not be diversified. The participants are credited with dividends on their deferred common stock units in the same amount that is received by all other stockholders. Such dividends are reinvested into additional deferred common stock units. Assets held in the Rabbi Trust, recorded as Investments on the consolidated balance sheet, had a fair value of $12.3 million and $10.6 million at December 31, 2023 and 2022, respectively. The assets of the Rabbi Trust are at all times subject to the claims of our general creditors.

Deferrals of officer base compensation and cash bonuses and directors' cash retainers are paid in cash. All deferrals of executive performance shares and directors' stock retainers are made in the form of deferred common stock units and are paid out in shares of our common stock, on a one-for-one basis, except that cash is paid in lieu of fractional shares. The value of our stock held in the Rabbi Trust is classified within the stockholders' equity section of the consolidated balance sheets and has been accounted for in a manner similar to treasury stock. The amounts recorded under the Non-Qualified Deferred Compensation Plan totaled $9.1 million and $7.1 million at December 31, 2023 and 2022, respectively, which are also shown as a deduction against stockholders' equity in the consolidated balance sheet.

17. SHARE-BASED COMPENSATION PLANS

Our key employees and non-employee directors have been granted share-based awards through our SICP. We record these share-based awards as compensation costs over the respective service period for which services are received in exchange for an award of equity or equity-based compensation. The compensation cost is based primarily on the fair value of the shares awarded, using the estimated fair value of each share on the date it was granted, and the number of shares to be issued at the end of the service period. We have 561,115 shares of common stock reserved for issuance under the SICP.

The table below presents the amounts included in net income related to share-based compensation expense for the awards granted under the SICP for the years ended December 31, 2023, 2022 and 2021:

	For the Year Ended December 31,		
(in thousands)	**2023**	**2022**	**2021**
Awards to key employees	**$ 6,716**	$ 5,479	$ 5,163
Awards to non-employee directors	**906**	959	782
Total compensation expense	**7,622**	6,438	5,945
Less: tax benefit	**(1,947)**	(1,663)	(1,535)
Share-based compensation amounts included in net income	**$ 5,675**	$ 4,775	$ 4,410

Officers and Key Employees

Our Compensation Committee is authorized to grant our key employees the right to receive awards of shares of our common stock, contingent upon the achievement of established performance goals and subject to SEC transfer restrictions once awarded. Our President and CEO has the right to issue awards of shares of our common stock, to other officers and key employees of the Company, contingent upon various performance goals and subject to SEC transfer restrictions.

We currently have several outstanding multi-year performance plans, which are based upon the successful achievement of long-term goals, growth and financial results and comprise both market-based and performance-based conditions and targets. The fair value per share, tied to a performance-based condition or target, is equal to the market price per share on the grant date. For the market-based conditions, we used a Monte Carlo valuation to estimate the fair value of each share granted.

The table below presents the summary of the stock activity for awards to all officers:

	Number of Shares	Weighted Average Fair Value
Outstanding — December 31, 2021	**197,398**	**$ 94.15**
Granted	69,620	117.61
Vested	(60,191)	90.60
Expired	(2,678)	91.42
Outstanding — December 31, 2022	**204,149**	**103.17**
Granted	80,820	126.06
Vested	(68,302)	91.59
Expired	(2,053)	94.64
Forfeited	(1,490)	113.44
Outstanding — December 31, 2023	**213,124**	**$ 117.74**

During the year ended December 31, 2023, we granted awards of 80,820 shares of common stock to officers and key employees under the SICP, including awards granted in February 2023 and to key employees appointed to officer positions. The shares granted are multi-year awards that will vest no later than the three-year service period ending December 31, 2025.

The aggregate intrinsic value of the SICP awards granted was $22.5 million, $24.1 million, and $28.8 million at December 31, 2023, 2022 and 2021, respectively. At December 31, 2023, there was $6.6 million of unrecognized compensation cost related to these awards, which is expected to be recognized through 2025.

In March 2023, 2022 and 2021, upon the election by certain of our executive officers, we withheld shares with a value at least equivalent to each such executive officer's minimum statutory obligation for applicable income and other employment taxes related to shares that vested and were paid in March 2023, 2022 and 2021 for the performance periods ended December 31, 2022, 2021, and 2020. We paid the balance of such awarded shares to each such executive officer and remitted the cash equivalent of the withheld shares to the appropriate taxing authorities. The below table presents the number of shares withheld and amounts remitted:

	For the Year Ended December 31,		
(amounts in thousands, except shares)	2023	2022	2021
Shares withheld to satisfy tax obligations	**19,859**	21,832	14,020
Amounts remitted to tax authorities to satisfy obligations	**$ 2,455**	$ 2,838	$ 1,478

Non-employee Directors

Shares granted to non-employee directors are issued in advance of the directors' service periods and are fully vested as of the grant date. We record a deferred expense equal to the fair value of the shares issued and amortize the expense equally over a service period of one year or less.

Our directors receive an annual retainer of shares of common stock under the SICP for services rendered through the subsequent Annual Meeting of Shareholders. Accordingly, our directors that served on the Board as of May 2023 and 2022 each received 765 and 652 shares of common stock, respectively, with a weighted average fair value of $124.12 and $130.36 per share, respectively.

At December 31, 2023, there was $0.3 million of unrecognized compensation expense related to shares granted to non-employee directors. This expense will be recognized over the remaining service period ending in May 2024.

18. RATES AND OTHER REGULATORY ACTIVITIES

Our natural gas and electric distribution operations in Delaware, Maryland and Florida are subject to regulation by their respective PSC; Eastern Shore, our natural gas transmission subsidiary, is subject to regulation by the FERC; and Peninsula Pipeline and Aspire Energy Express, our intrastate pipeline subsidiaries, are subject to regulation (excluding cost of service) by the Florida PSC and Public Utilities Commission of Ohio, respectively.

Refer to the additional details below pertaining to the Customer Information System Regulatory Asset Petition and COVID-19 impact.

Delaware

The October 2, 2023, application for the issuance of common stock and long-term debt was unanimously approved on October 25, 2023, by the Delaware PSC.

In September 2023, the Delaware Division submitted the Energy Efficiency Rider application for natural gas with the Delaware PSC after obtaining an affirmative recommendation from the Delaware Energy Efficiency Advisory Council ("EEAC"). The application is the first in the state and applies to a portfolio of four programs including, Home Energy Counseling, Home Performance with Energy Star, Assisted Home Performance with Energy Star, and standard Offer Program in which customers can participate and allow for recovery. The evidentiary hearing on this matter is set for April 2024. If approved as filed, rates will be effective May 1, 2024.

Maryland

On October 2, 2023, Chesapeake filed a notification of the financing plans associated with the FCG acquisition with the Maryland PSC. The filing was successfully noted during the November 1, 2023, Maryland PSC administrative meeting.

Maryland Natural Gas Rate Case: In January 2024, our natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, we are seeking approval of the following: (i) permanent rate relief of approximately $6.9 million; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses under the new corporate entity which we anticipate will be called Chesapeake Utilities of Maryland, Inc.; and (iii) authorization to establish a rider for recovery of the costs associated with our new technology systems. The outcome of the application is subject to review and approval by the Maryland PSC.

Maryland Natural Gas Depreciation Study: In January 2024, our Maryland natural gas distribution businesses filed a joint petition for approval of their proposed unified depreciation rates with the Maryland PSC. If approved, new rates will become effective retroactively on January 1, 2023.

Ocean City Maryland Reinforcement: During the second quarter of 2022, we began construction of an extension of service into North Ocean City, Maryland. Our Delaware natural gas division and Sandpiper installed approximately 5.4 miles of pipeline across southern Sussex County, Delaware to Fenwick Island, Delaware and Worcester County, Maryland. The project reinforces our existing system in Ocean City, Maryland and enables incremental growth along the pipeline. Construction of this project was completed in the second quarter of 2023. The Company filed a natural gas rate case application with the PSC for the state of Maryland in January 2024 as discussed above.

Florida

Wildlight Expansion: In August 2022, Peninsula Pipeline and FPU filed a joint petition with the Florida PSC for approval of its Transportation Service Agreement associated with the Wildlight planned community located in Nassau County, Florida. The project enables us to meet the significant growing demand for service in Yulee, Florida. The agreement will enable us to construct the project during the build-out of the community, and charge the reservation rate as each phase of the project goes into service. Construction of the pipeline facilities will occur in two separate phases. Phase one consists of three extensions with associated facilities, and a gas injection interconnect with associated facilities. Phase two will consist of two additional pipeline extensions. The various phases of the project commenced in the first quarter of 2023, with construction on the overall project continuing through 2025. The petition was approved by the Florida PSC in November 2022.

Florida Natural Gas Rate Case: In May 2022, our legacy natural gas distribution businesses in Florida filed a consolidated natural gas rate case with the Florida PSC. The application included a request for the following: (i) permanent rate relief of approximately $24.1 million, effective January 1, 2023, (ii) a depreciation study also submitted with the filing; (iii) authorization to make certain changes to tariffs to include the consolidation of rates and rate structure across the businesses and to unify the Florida Natural Gas distribution businesses under FPU; (iv) authorization to retain the acquisition adjustment recorded at the time of the FPU merger in our revenue requirement; and (v) authorization to establish an environmental remediation surcharge for the purposes of addressing future expected remediation costs for FPU MGP sites. In August 2022, interim rates were approved by the Florida PSC in the amount of approximately $7.7 million on an annualized basis, effective for all meter readings in September 2022. The discovery process and subsequent hearings were concluded during the fourth quarter of 2022 and briefs were submitted during the same quarter of 2022. In January 2023, the Florida PSC approved the application for consolidation and permanent rate relief of approximately $17.2 million on an annual basis. Actual rates in connection with the rate relief were approved by the Florida PSC in February 2023 with an effective date of March 1, 2023.

FCG Natural Gas Rate Case: In May 2022, FCG filed a general base rate increase with the Florida PSC based on a projected 2023 test year. In June 2023, the Florida PSC issued an order approving a single total base revenue increase of $23.3 million (which included an incremental increase of $14.1 million, a previously approved increase of $3.8 million for a liquefied natural gas facility, and $5.3 million to transfer the SAFE investments from a rider clause to base rates), with new rates becoming effective as of May 1, 2023. The Commission also approved FCG's proposed RSAM with a $25.0 million reserve amount, continuation and expansion of the capital SAFE program, implementation of an automated metering infrastructure pilot, and continuation of the storm damage reserve with a target reserve of $0.8 million. On June 23, 2023, the Florida OPC filed a motion for reconsideration of the PSC's approval of RSAM, which was denied on September 12, 2023. On July 7, 2023, the Florida OPC filed a notice of appeal with the Florida Supreme Court, which is pending. The Florida OPC filed their initial brief on January 31, 2024.

The RSAM is recorded as either an increase or decrease to accrued removal costs which is reflected on the Company's balance sheets and a corresponding increase or decrease to depreciation and amortization expense. In order to earn the targeted regulatory ROE in each reporting period subject to the conditions of the effective rate agreement, RSAM is calculated using a trailing thirteen-month average of rate base and capital structure in conjunction with the trailing twelve months regulatory base net operating income, which primarily includes the base portion of rates and other revenues, net of operations and maintenance expenses, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items is adjusted, in part, by RSAM or its reversal to earn the targeted regulatory ROE. For the year ended December 31, 2023, the Company recorded decreases to asset removal costs and depreciation expense of $5.1 million as a result of the RSAM adjustment.

Beachside Pipeline Extension: In June 2021, Peninsula Pipeline and FCG entered into a Transportation Service Agreement for an incremental 10,176 Dts/d of firm service in Indian River County, Florida, to support FCG's growth along the Indian River's barrier island. As part of this agreement, Peninsula Pipeline constructed 11.3 miles of pipeline from its existing pipeline in the Sebastian, Florida area, traveling east under the Intercoastal Waterway and southward on the barrier island. The project was placed in-service during April 2023.

St. Cloud / Twin Lakes Expansion: In July 2022, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 2,400 Dt/d of firm service in the St. Cloud, Florida area. As part of this agreement, Peninsula Pipeline constructed a pipeline extension and regulator station for FPU. The extension supports new incremental load due to growth in the area, including providing service, most immediately, to the residential development, Twin Lakes. The expansion also improves reliability and provides operational benefits to FPU's existing distribution system in the area, supporting future growth. The petition was approved by the Florida PSC in October 2022, and the expansion was placed into service during the third quarter of 2023.

Storm Protection Plan: In 2020, the Florida PSC implemented the Storm Protection Plan ("SPP") and Storm Protection Plan Cost Recovery Clause ("SPPCRC") rules, which require electric utilities to petition the Florida PSC for approval of a Transmission and Distribution Storm Protection Plan that covers the utility's immediate 10-year planning period with updates to the plan at least every 3 years. The SPPCRC rules allow the utility to file for recovery of associated costs for the SPP. Our Florida electric distribution operations' SPP was filed during the first quarter of 2022 and approved in the fourth quarter of 2022, with modifications, by the Florida PSC. Rates associated with this initiative were effective in January 2023. The Company filed 2024 SPPCRC projections on May 1, 2023. A hearing was held on September 12, 2023. The Commission voted to approve the projections on November 9, 2023. FPU projects to spend $13.6 million on the program in 2024.

Lake Wales Pipeline Acquisition: In February 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 9,000 Dt/d of firm service in the Lake Wales, Florida area. The Commission approved the petition in April 2023. Approval of the agreement allowed Peninsula Pipeline to complete the acquisition of the existing pipeline in May 2023 which is being utilized to serve both current and new natural gas customers.

GUARD: In February 2023, FPU filed a petition with the Florida PSC for approval of the GUARD program. GUARD is a ten-year program to enhance the safety, reliability, and accessibility of portions of our natural gas distribution system. We identified various categories of projects to be included in GUARD, which include the relocation of mains and service lines located in rear easements and other difficult to access areas to the front of the street, the replacement of problematic distribution mains, service lines, and maintenance and repair equipment and system reliability projects. In August 2023, the Florida PSC approved the GUARD program, which included $205.0 million of capital expenditures projected to be spent over a 10-year period.

Newberry Expansion: In April 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 8,000 Dt/d of firm service in the Newberry, Florida area. The petition was approved by the Florida PSC in the third quarter of 2023. Peninsula Pipeline will construct a pipeline extension, which will be used by FPU to support the development of a natural gas distribution system to provide gas service to the City of Newberry. A filing to address the acquisition and conversion of propane community gas systems in Newberry was made in November 2023, and the Florida PSC is scheduled to vote on this in March 2024. The Company anticipates beginning the conversions of the community gas systems in the second quarter of 2024.

Amendment to Escambia County Agreement: In April of 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of an amendment to an existing contract with FPU. This amendment will allow Peninsula Pipeline to construct an additional delivery point on a pipeline located in Escambia County. The additional delivery point comes at the request of an FPU customer and will be used to enhance natural gas service in the area. The amendment was approved by the Florida PSC in the third quarter of 2023.

Florida Electric Depreciation Study: The Florida PSC requires electric utilities to file a depreciation study every four years to reevaluate and set depreciation rates for the utility's plant assets. In June 2023, FPU filed a petition with the Florida PSC for approval of its proposed depreciation rates, which was approved in December 2023.

East Coast Reinforcement Projects: In December 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively.

Eastern Shore

Southern Expansion Project: In January 2022, Eastern Shore submitted a prior notice filing with the FERC pursuant to blanket certificate procedures, regarding its proposal to install an additional compressor unit and related facilities at Eastern Shore's compressor station in Bridgeville, Sussex County, Delaware. The project enables Eastern Shore to provide additional firm natural gas transportation service to an existing shipper on its pipeline system. The project obtained FERC approval in December 2022 and went into service in October 2023.

Capital Cost Surcharge: In December 2022, Eastern Shore submitted a filing with the FERC regarding a capital cost surcharge to recover capital costs associated with the replacement of existing Eastern Shore facilities as a result of mandated highway relocation projects as well as compliance with the PHMSA regulation. The capital cost surcharge mechanism was approved in Eastern Shore's last rate case. In conjunction with the filing of this surcharge, a cumulative adjustment to the existing surcharge to reflect additional depreciation was included. The FERC issued an order approving the surcharge as filed on December 19, 2022. The combined revised surcharge became effective January 1, 2023.

Worcester Resiliency Upgrade: In August 2023, Eastern Shore filed an application with the FERC requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, DE and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. Eastern Shore has requested certificate authorization by December 2024, with a target in-service date by the third quarter of 2025.

Various Jurisdictional Activity Related to the Joint Customer Information System Project

In July 2022, we filed a joint petition for our natural gas divisions in Maryland (Maryland Division, Sandpiper, and Elkton Gas) for the approval to establish a regulatory asset for non-capitalizable expenses related to the initial development and implementation of our new Customer Information System ("CIS") system. The petition was approved by the Maryland PSC in August 2022. A similar petition for our Florida Regulated Energy businesses was filed during the same time frame, however, the Florida PSC approved capitalization of these expenses in lieu of establishment of regulatory assets. Additionally, our Delaware Division has the ability to defer these costs as a regulatory asset. We have completed the system selection process and the CIS implementation began during the first quarter of 2023.

COVID-19 Impact

In March 2020, the CDC declared a national emergency due to the rapidly growing outbreak of COVID-19. In response to this declaration and the rapid spread of COVID-19 within the United States, federal, state and local governments throughout the country imposed varying degrees of restrictions on social and commercial activity to promote social distancing in an effort to slow the spread of the illness. These restrictions significantly impacted economic conditions in the United States in 2020 and continued to impact economic conditions, to a lesser extent, through 2021 and 2022. Chesapeake Utilities is considered an "essential business," which allowed us to continue operational activities and construction projects with appropriate safety precautions and personal protective equipment, while being mindful of the social distancing restrictions that were in place.

In response to the COVID-19 pandemic and related restrictions, we experienced reduced consumption of energy largely in the commercial and industrial sectors, higher bad debt expenses and incremental expenses associated with COVID-19, including expenditures associated with personal protective equipment and premium pay for field personnel. The additional operating expenses we incurred support the ongoing delivery of our essential services during the height of the pandemic. In April and May 2020, we were authorized by the Maryland and Delaware PSCs, respectively, to record regulatory assets for COVID-19 related costs which offered us the ability to seek recovery of those costs. In July 2021, the Florida PSC issued an order that approved incremental expenses we incurred due to COVID-19. The order allowed us to establish a regulatory asset in a total amount of $2.1 million as of June 30, 2021 for natural gas and electric distribution operations. The regulatory asset is being amortized over two years and is recovered through the Purchased Gas Adjustment and Swing Service mechanisms for our natural gas distribution businesses and through the Fuel Purchased Power Cost Recovery clause for our electric division. As of December 31, 2023 and 2022, our total COVID-19 regulatory asset balance was $0.2 million and $1.2 million, respectively.

Summary TCJA Table

Customer rates for our regulated business were adjusted, as approved by the regulators, prior to 2020 except for Elkton Gas, which implemented a one-time bill credit in May 2020. The following table summarized the regulatory liabilities related to accumulated deferred taxes ("ADIT") associated with TCJA for our regulated businesses as of December 31, 2023 and 2022:

	Amount (in thousands)		
Operation and Regulatory Jurisdiction	**December 31, 2023**	**December 31, 2022**	**Status**
Eastern Shore (FERC)	$34,190	$34,190	Will be addressed in Eastern Shore's next rate case filing.
Chesapeake Delaware natural gas division (Delaware PSC)	$12,038	$12,230	PSC approved amortization of ADIT in January 2019.
Chesapeake Maryland natural gas division (Maryland PSC)	$3,585	$3,703	PSC approved amortization of ADIT in May 2018.
Sandpiper Energy (Maryland PSC)	$3,487	$3,597	PSC approved amortization of ADIT in May 2018.
Florida Natural Gas distribution (Florida PSC) (1)	$26,757	$27,179	PSC issued order authorizing amortization and retention of net ADIT liability by the Company in February 2019.
FPU electric division (Florida PSC)	$4,760	$4,993	In January 2019, PSC issued order approving amortization of ADIT through purchased power cost recovery, storm reserve and rates.
Elkton Gas (Maryland PSC)	$1,027	$1,059	PSC approved amortization of ADIT in March 2018.

(1) In accordance with the Florida PSC approval of our natural gas base rate proceeding, effective March 1, 2023, our natural gas distribution businesses in Florida have been consolidated and amounts above are now being presented on a consolidated basis consistent with the final rate order

Regulatory Assets and Liabilities

At December 31, 2023 and 2022, our regulated utility operations recorded the following regulatory assets and liabilities included in our consolidated balance sheets, including amounts attributable to FCG. These assets and liabilities will be recognized as revenues and expenses in future periods as they are reflected in customers' rates.

	As of December 31,	
(in thousands)	**2023**	**2022**
Regulatory Assets		
Under-recovered purchased fuel, gas and conservation cost recovery [1] [2]	**$ 13,696**	$ 43,583
Under-recovered GRIP revenue [3]	**1,777**	1,705
Deferred postretirement benefits [4]	**10,802**	13,927
Deferred conversion and development costs [1]	**21,466**	23,653
Acquisition adjustment [5]	**31,857**	25,609
Deferred costs associated with COVID-19 [6]	**190**	1,233
Deferred storm costs [7]	**19,370**	27,687
Deferred rate case expenses - current	**1,171**	—
Other	**15,573**	12,256
Total Regulatory Assets	**$ 115,902**	$ 149,653
Regulatory Liabilities		
Self-insurance [8]	**$ 521**	$ 339
Over-recovered purchased fuel and conservation cost recovery [1]	**12,340**	3,827
Over-recovered GRIP revenue [3]	**501**	—
Storm reserve [8]	**1,900**	2,845
Accrued asset removal cost [9]	**86,534**	50,261
Deferred income taxes due to rate change [10]	**105,055**	87,690
Interest related to storm recovery [7]	**536**	1,207
Other	**1,611**	1,851
Total Regulatory Liabilities	**$ 208,998**	$ 148,020

(1) We are allowed to recover the asset or are required to pay the liability in rates. We do not earn an overall rate of return on these assets.
(2) At December 31, 2022, includes $21.2 million being recovered over a three year period primarily concentrated in our electric division. Per Florida PSC approval, our electric division was allowed to recover these amounts over an extended period of time in an effort to reduce the impact of increased commodity prices to our customers. Recovery of these costs began in January 2023.
(3) The Florida PSC allowed us to recover through a surcharge, capital and other program-related-costs, inclusive of an appropriate return on investment, associated with accelerating the replacement of qualifying distribution mains and services (defined as any material other than coated steel or plastic) in FPU's natural gas distribution, Fort Meade division and Chesapeake Utilities' CFG division. We are allowed to recover the asset or are required to pay the liability in rates related to GRIP.
(4) The Florida PSC allowed FPU to treat as a regulatory asset the portion of the unrecognized costs pursuant to ASC Topic 715, Compensation - Retirement Benefits, related to its regulated operations. This balance also includes the portion of pension settlement expense associated with the termination of the Chesapeake Pension Plan pursuant to an order from the FERC and the respective PSCs that allowed us to defer Eastern Shore, Delaware and Maryland Divisions' portion. See Note 16, Employee Benefit Plans, for additional information.
(5) We are allowed to include the premiums paid in various natural gas utility acquisitions in Florida in our rate bases and recover them over a specific time period pursuant to the Florida PSC approvals. We paid $34.2 million of the premium in 2009, including a gross up for income tax, because it is not tax deductible, and $0.7 million of the premium paid by FPU in 2010. For additional information, see Florida Natural Gas Rate Case discussion above.
(6) We deferred as regulatory assets the net incremental expense impact associated with the net expense impact of COVID-19 as authorized by the stated PSCs.
(7) The Florida PSC authorized us to recover regulatory assets (including interest) associated with the recovery of Hurricanes Michael and Dorian storm costs which will be amortized between 6 and 10 years. Recovery of these costs includes a component of an overall return on capital additions and regulatory assets.
(8) We have storm reserves in our Florida regulated energy operations and self-insurance for our regulated energy operations that allow us to collect through rates amounts to be used against general claims, storm restoration costs and other losses as they are incurred.
(9) See Note 2, Summary of Significant Accounting Policies, for additional information on our asset removal cost policies.
(10) We recorded a regulatory liability for our regulated businesses related to the revaluation of accumulated deferred tax assets/liabilities as a result of the TCJA. The liability will be amortized over a period between 5 to 80 years based on the remaining life of the associated property. Based upon the regulatory proceedings, we will pass back the respective portion of the excess accumulated deferred taxes to rate payers. See Note 11, Income Taxes, for additional information.

19. Environmental Commitments and Contingencies

We are subject to federal, state and local laws and regulations governing environmental quality and pollution control. These laws and regulations require us to remove or remediate, at current and former operating sites, the effect on the environment of the disposal or release of specified substances.

MGP Sites

We have participated in the investigation, assessment or remediation of, and have exposures at, seven former MGP sites. We have received approval for recovery of clean-up costs in rates for sites located in Salisbury, Maryland; Seaford, Delaware; and Winter Haven, Key West, Pensacola, Sanford and West Palm Beach, Florida.

As of December 31, 2023 and 2022, we had approximately $3.6 million and $4.3 million, respectively, in environmental liabilities, related to the former MGP sites. As of December 31, 2023 and 2022, we have cumulative regulatory assets of $0.5 million and $0.8 million, respectively, for future recovery of environmental costs from customers. Specific to FPU's four MGP sites in Key West, Pensacola, Sanford and West Palm Beach, FPU has approval for and has recovered, through a combination of insurance and customer rates, $14.0 million of its environmental costs related to its MGP sites as of December 31, 2023.

Environmental liabilities for our MGP sites are recorded on an undiscounted basis based on the estimate of future costs provided by independent consultants. We continue to expect that all costs related to environmental remediation and related activities, including any potential future remediation costs for which we do not currently have approval for regulatory recovery, will be recoverable from customers through rates.

Remediation is ongoing for the MGP's in Winter Haven and Key West in Florida and in Seaford, Delaware and the remaining clean-up costs are estimated to be between $0.3 million to $0.9 million for these three sites. The Environmental Protection Agency has approved a "site-wide ready for anticipated use" status for the Sanford, Florida MGP site, which is the final step before delisting a site. The remaining remediation expenses for the Sanford MGP site are immaterial.

The remedial actions approved by the Florida Department of Environmental Protection have been implemented on the east parcel of our West Palm Beach Florida site. Similar remedial actions have been initiated on the site's west parcel, and construction of active remedial systems are expected to be completed in 2024. Remaining remedial costs for West Palm Beach, including completion of the construction of the system on the West Parcel, five to ten years of operation, maintenance and monitoring, and final site work for closeout of the property, is estimated to be between $1.9 million and $3.2 million.

20. Other Commitments and Contingencies

Natural Gas, Electric and Propane Supply

In March 2023, our Delmarva Peninsula natural gas distribution operations entered into asset management agreements with a third party to manage their natural gas transportation and storage capacity. The agreements were effective as of April 1, 2023 and expire in March 2026.

FPU natural gas distribution operations and Eight Flags have separate asset management agreements with Emera Energy Services, Inc. to manage their natural gas transportation capacity. These agreements commenced in November 2020 and expire in October 2030.

Florida Natural Gas has firm transportation service contracts with FGT and Gulfstream. Pursuant to a capacity release program approved by the Florida PSC, all of the capacity under these agreements has been released to various third parties. Under the terms of these capacity release agreements, Chesapeake Utilities is contingently liable to FGT and Gulfstream should any party, that acquired the capacity through release, fail to pay the capacity charge. To date, Chesapeake Utilities has not been required to make a payment resulting from this contingency.

FPU's electric supply contracts require FPU to maintain an acceptable standard of creditworthiness based on specific financial ratios. FPU's agreement with Florida Power & Light Company requires FPU to meet or exceed a debt service coverage ratio of 1.25 times based on the results of the prior 12 months. If FPU fails to meet this ratio, it must provide an irrevocable letter of credit or pay all amounts outstanding under the agreement within five business days. FPU's electric supply agreement with Gulf Power requires FPU to meet the following ratios based on the average of the prior six quarters: (a) funds from operations interest coverage ratio (minimum of 2 times), and (b) total debt to total capital (maximum of 65 percent). If FPU fails to meet the requirements, it has to provide the supplier a written explanation of actions taken, or proposed to be taken, to become compliant. Failure to comply with the ratios specified in the Gulf Power agreement could also result in FPU having to provide an irrevocable letter of credit. As of December 31, 2023, FPU was in compliance with all of the requirements of its supply contracts.

Eight Flags provides electricity and steam generation services through its CHP plant located on Amelia Island, Florida. In June 2016, Eight Flags began selling power generated from the CHP plant to FPU pursuant to a 20-year power purchase agreement for distribution to our electric customers. In July 2016, Eight Flags also started selling steam pursuant to a separate 20-year contract, to the landowner on which the CHP plant is located. The CHP plant is powered by natural gas transported by FPU through its distribution system and Peninsula Pipeline through its intrastate pipeline.

The total purchase obligations for natural gas, electric and propane supplies are as follows:

Year	2024	2025-2026	2027-2028	Beyond 2028	Total
(in thousands)					
Purchase Obligations	$ 86,040	$ 105,082	$ 83,851	$ 141,287	$ 416,260

Corporate Guarantees

The Board of Directors has authorized us to issue corporate guarantees securing obligations of our subsidiaries and to obtain letters of credit securing our subsidiaries' obligations. The maximum authorized liability under such guarantees and letters of credit as of December 31, 2023 was $35.0 million. The aggregate amount guaranteed related to our subsidiaries at December 31, 2023 was approximately $24.3 million with the guarantees expiring on various dates through December 2024. In addition, the Board has authorized us to issue specific purpose corporate guarantees. The amount of specific purpose guarantees outstanding at December 31, 2023 was $4.0 million.

As of December 31, 2023, we have issued letters of credit totaling approximately $7.0 million related to the electric transmission services for FPU's electric division, the firm transportation service agreement between TETLP and our Delaware and Maryland divisions, the capacity agreement between NEXUS and Aspire, and our current and previous primary insurance carriers. These letters of credit have various expiration dates through October 2024 and to date, none have been used. We do not anticipate that the counterparties will draw upon these letters of credit, and we expect that they will be renewed to the extent necessary in the future.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Our Chief Executive Officer and Chief Financial Officer, with the participation of other Company officials, have evaluated our "disclosure controls and procedures" (as such term is defined under Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended) as of December 31, 2023. Based upon their evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2023.

CHANGE IN INTERNAL CONTROLS

During the quarter ended December 31, 2023, other than the ongoing changes resulting from the FCG acquisition discussed below, there have been no changes in internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)) that have materially affected, or are reasonably likely to materially affect, internal controls over financial reporting.

On November 30, 2023, we completed the acquisition of FCG. We are currently integrating processes, procedures, and internal controls related to the acquisition. See Note 4, *Acquisitions,* to the consolidated financial statements and Management's Report on Internal Control Over Financial Reporting for additional information related to the acquisition of FCG. The scope of that assessment excluded FCG, which we acquired on November 30, 2023. FCG's total assets and loss before taxes represented approximately 31 percent and 4 percent, respectively, of the Company's consolidated total assets and earnings before taxes as of December 31, 2023 and for the year then ended. This exclusion is permitted based upon current guidance of the U.S. Securities & Exchange Commission.

CEO AND CFO CERTIFICATIONS

Our Chief Executive Officer and Chief Financial Officer have filed with the SEC the certifications required by Section 302 of the Sarbanes-Oxley Act of 2002 as Exhibits 31.1 and 31.2 to our Annual Report on Form 10-K for the fiscal year ended December 31, 2023. In addition, on May 31, 2023 our Chief Executive Officer certified to the NYSE that he was not aware of any violation by us of the NYSE corporate governance listing standards.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act. A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. A company's internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records which in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, our management conducted an evaluation of the effectiveness of its internal control over financial reporting based on the criteria established in an updated report entitled "Internal Control - Integrated Framework," issued in May 2013 by the Committee of Sponsoring Organizations of the Treadway Commission. The scope of that assessment excluded FCG, which we acquired on November 30, 2023. FCG's total assets and loss before taxes represented approximately 31 percent and 4 percent, respectively, of the Company's consolidated total assets and earnings before taxes as of December 31, 2023 and for the year then ended. This exclusion is permitted based upon current guidance of the U.S. Securities & Exchange Commission.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management has evaluated and concluded that our internal control over financial reporting was effective as of December 31, 2023.

Our independent registered public accounting firm, Baker Tilly US, LLP, has audited the effectiveness of our internal control over financial reporting as of December 31, 2023, as stated in its attestation report which appears under Part II, *Item 8. Financial Statements and Supplementary Data*.

ITEM 9B. OTHER INFORMATION.

None.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS OF THE REGISTRANT AND CORPORATE GOVERNANCE.

We have adopted a Code of Ethics that applies to our Principal Executive Officer, President, Principal Financial Officer, Principal Accounting Officer, Treasurer, Assistant Treasurer, Corporate Controller and persons performing similar functions, which is a “code of ethics” as defined by applicable rules of the SEC. This Code of Ethics is publicly available on our website at https://www.chpk.com. If we make any amendments to this code other than technical, administrative or other non-substantive amendments, or grant any waivers, including implicit waivers, from a provision of this code to the individuals and roles noted above, or persons performing similar functions, we intend to disclose the nature of the amendment or waiver, its effective date and to whom it applies by posting such information on our website at the address and location specified above.

The remaining information required by this Item is incorporated herein by reference to the sections of our Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Election of Directors (Proposal 1),” “Governance Trends and Director Education," "Corporate Governance Practices,” “Board of Directors and its Committees” and “Delinquent Section 16(a) Reports.”

ITEM 11. EXECUTIVE COMPENSATION.

The information required by this Item is incorporated herein by reference to the sections of our Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Director Compensation,” “Executive Compensation” and “Compensation Discussion and Analysis".

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

The information required by this Item is incorporated herein by reference to the sections of our Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Security Ownership of Certain Beneficial Owners and Management” and "Equity Compensation Plan Information."

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE.

The information required by this Item is incorporated herein by reference to the section of our Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Corporate Governance Practices” and "Director Independence."

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES.

The information required by this Item is incorporated herein by reference to the portion of the Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Fees and Services of Independent Registered Public Accounting Firm." The Company's independent registered public accounting firm is Baker Tilly US, LLP, PCAOB ID: (23)

PART IV

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U S C 7262(b)) by the registered public accounting firm that prepared or issued its audit report ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by a check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of the common shares held by non-affiliates of Chesapeake Utilities Corporation as of June 30, 2023, the last business day of its most recently completed second fiscal quarter, based on the last sale price on that date, as reported by the New York Stock Exchange, was approximately $2.1 billion.

The number of shares of Chesapeake Utilities Corporation's common stock outstanding as of February 16, 2024 was 22,238,384

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Chesapeake Utilities Corporation Proxy Statement for the 2024 Annual Meeting of Shareholders are incorporated by reference in Part II and Part III hereof.

CHESAPEAKE UTILITIES CORPORATION

FORM 10-K

YEAR ENDED DECEMBER 31, 2023

TABLE OF CONTENTS

GLOSSARY OF DEFINITIONS

ASC: Accounting Standards Codification issued by the FASB

Adjusted Gross Margin: a non-GAAP measure calculated by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements

Aspire Energy: Aspire Energy of Ohio, LLC, a wholly-owned subsidiary of Chesapeake Utilities

Aspire Energy Express: Aspire Energy Express, LLC, a wholly-owned subsidiary of Chesapeake Utilities

ASU: Accounting Standards Update issued by the FASB

ATM: At-the-market

CDC: U.S. Centers for Disease Control and Prevention

CDD: Cooling Degree-Day

CFG: Central Florida Gas Company, a division of Chesapeake Utilities

Chesapeake or Chesapeake Utilities: Chesapeake Utilities Corporation, its divisions and subsidiaries, as appropriate in the context of the disclosure

CHP: Combined Heat and Power Plant

Company: Chesapeake Utilities Corporation, its divisions and subsidiaries, as appropriate in the context of the disclosure

CNG: Compressed natural gas

Degree-day: Measure of the variation in the weather based on the extent to which the average daily temperature (from 10:00 am to 10:00 am) falls above (CDD) or below (HDD) 65 degrees Fahrenheit

Delmarva Peninsula: A peninsula on the east coast of the U.S. occupied by Delaware and portions of Maryland and Virginia

Diversified Energy: an entity from whom we acquired certain propane operating assets in North Carolina, South Carolina, Virginia, and Pennsylvania

DRIP: Dividend Reinvestment and Direct Stock Purchase Plan

Dt(s): Dekatherm(s), which is a natural gas unit of measurement that includes a standard measure for heating value

Dts/d: Dekatherms per day

Eastern Shore: Eastern Shore Natural Gas Company, a wholly-owned subsidiary of Chesapeake Utilities

Eight Flags: Eight Flags Energy, LLC, a wholly-owned subsidiary of Chesapeake Utilities

Elkton Gas: Elkton Gas Company, a wholly-owned subsidiary of Chesapeake Utilities

ESG: Environmental, Social and Governance

FASB: Financial Accounting Standards Board

FCG or Florida City Gas: Pivotal Utility Holdings, Inc., doing business as Florida City Gas, a wholly-owned subsidiary of Chesapeake Utilities that was acquired from Florida Power & Light Company on November 30, 2023

FERC: Federal Energy Regulatory Commission

FGT: Florida Gas Transmission Company

Florida Natural Gas: Refers to the Company's legacy Florida natural gas distribution operations (excluding FCG) that were consolidated under FPU, for both rate-making and operations purposes

Florida OPC: The Office of Public Counsel, an agency established by the Florida legislature who advocates on behalf of Florida's utility consumers prior to actions or rule changes

FPU: Florida Public Utilities Company, a wholly-owned subsidiary of Chesapeake Utilities

GAAP: Generally Accepted Accounting Principles

GRIP: Gas Reliability Infrastructure Program

Gross Margin: a term under U.S. GAAP which is the excess of sales over costs of goods sold

GUARD: Gas Utility Access and Replacement Directive, a program to enhance the safety, reliability and accessibility of portions of the Company's natural gas distribution system in Florida

Guernsey Power Station: Guernsey Power Station, LLC, a power generation facility in Guernsey County Ohio

Gulfstream: Gulfstream Natural Gas System, LLC, an unaffiliated pipeline network that supplies natural gas to FPU

HDD: Heating Degree-Day

LNG: Liquefied Natural Gas

Marlin Gas Services: Marlin Gas Services, LLC, a wholly-owned subsidiary of Chesapeake Utilities

MetLife: MetLife Investment Advisors, an institutional debt investment management firm, with which we have previously issued Senior Notes and which is a party to the current MetLife Shelf Agreement, as amended

MGP: Manufactured gas plant, which is a site where coal was previously used to manufacture gaseous fuel for industrial, commercial and residential use

MW: Megawatt, which is a unit of measurement for electric power or capacity

NOL: Net operating loss(es)

Peninsula Pipeline: Peninsula Pipeline Company, Inc., a wholly-owned subsidiary of Chesapeake Utilities

Peoples Gas: Peoples Gas System, an Emera Incorporated subsidiary

PHMSA: United States Department of Transportation Pipeline and Hazardous Materials Safety Administration

Prudential: Prudential Investment Management Inc., an institutional investment management firm, with which we have previously issued Senior Notes and which is a party to the current Prudential Shelf Agreement, as amended

PSC: Public Service Commission, which is the state agency that regulates utility rates and/or services in certain of our jurisdictions

Revolver: Our $375.0 million unsecured revolving credit facility with certain lenders

RNG: Renewable natural gas

Sandpiper Energy: Sandpiper Energy, Inc., a wholly-owned subsidiary of Chesapeake Utilities

SAFE: Safety, Access, and Facility Enhancement, a program to enhance the safety, reliability and accessibility of portions of the FCG's natural gas distribution system

SEC: Securities and Exchange Commission

Senior Notes: Our unsecured long-term debt issued primarily to insurance companies on various dates

Sharp: Sharp Energy, Inc., a wholly-owned subsidiary of Chesapeake Utilities

Shelf Agreement: An agreement entered into by Chesapeake Utilities and a counterparty pursuant to which Chesapeake Utilities may request that the counterparty purchase our unsecured senior debt with a fixed interest rate and a maturity date not to exceed 20 years from the date of issuance

Shelf Notes: Unsecured senior promissory notes issuable under the Shelf Agreement executed with various counterparties

SICP: Stock and Incentive Compensation Plan, which as used herein covers stock-based compensation awards issued under the current 2023 plan and the previous 2013 plan

SOFR: Secured Overnight Financing Rate, a secured interbank overnight interest rate established as an alternative to LIBOR

TCJA: Tax Cuts and Jobs Act enacted on December 22, 2017

TETLP: Texas Eastern Transmission, LP, an interstate pipeline interconnected with Eastern Shore's pipeline

Transco: Transcontinental Gas Pipe Line Company, LLC

U.S.: The United States of America

References in this document to “Chesapeake,” “Chesapeake Utilities,” the “Company,” “we,” “us” and “our” mean Chesapeake Utilities Corporation, its divisions and/or its subsidiaries, as appropriate in the context of the disclosure.

Safe Harbor for Forward-Looking Statements

We make statements in this Annual Report on Form 10-K (this "Annual Report") that do not directly or exclusively relate to historical facts. Such statements are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. One can typically identify forward-looking statements by the use of forward-looking words, such as “project,” “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “continue,” “potential,” “forecast” or other similar words, or future or conditional verbs such as “may,” “will,” “should,” “would” or “could.” These statements represent our intentions, plans, expectations, assumptions and beliefs about future financial performance, business strategy, projected plans and objectives of the Company. Forward-looking statements speak only as of the date they are made or as of the date indicated and we do not undertake any obligation to update forward-looking statements as a result of new information, future events or otherwise. These statements are subject to many risks and uncertainties. In addition to the risk factors described under *Item 1A, Risk Factors*, the following important factors, among others, could cause actual future results to differ materially from those expressed in the forward-looking statements:

- state and federal legislative and regulatory initiatives that affect cost and investment recovery, have an impact on rate structures, and affect the speed and the degree to which competition enters the electric and natural gas industries;
- the outcomes of regulatory, environmental and legal matters, including whether pending matters are resolved within current estimates and whether the related costs are adequately covered by insurance or recoverable in rates;
- the impact of climate change, including the impact of greenhouse gas emissions or other legislation or regulations intended to address climate change;
- the impact of significant changes to current tax regulations and rates;
- the timing of certification authorizations associated with new capital projects and the ability to construct facilities at or below estimated costs, and within estimated timeframes;
- changes in environmental and other laws and regulations to which we are subject and environmental conditions of property that we now, or may in the future, own or operate;
- possible increased federal, state and local regulation of the safety of our operations;
- the availability and reliability of adequate technology, including our ability to adapt to technological advances, effectively implement new technologies and manage the related costs;
- the inherent hazards and risks involved in transporting and distributing natural gas, electricity and propane;
- the economy in our service territories or markets, the nation, and worldwide, including the impact of economic conditions (which we do not control) on demand for natural gas, electricity, propane or other fuels;
- risks related to cyber-attacks or cyber-terrorism that could disrupt our business operations or result in failure of information technology systems or result in the loss or exposure of confidential or sensitive customer, employee or Company information;
- issues relating to the responsible use of our technologies, including artificial intelligence;
- adverse weather conditions, including the effects of hurricanes, ice storms and other damaging weather events;
- customers' preferred energy sources;
- industrial, commercial and residential growth or contraction in our markets or service territories;
- the effect of competition on our businesses from other energy suppliers and alternative forms of energy;
- the timing and extent of changes in commodity prices and interest rates;
- the effect of spot, forward and future market prices on our various energy businesses;
- the extent of our success in connecting natural gas and electric supplies to our transmission systems, establishing and maintaining key supply sources, and expanding natural gas and electric markets;
- the creditworthiness of counterparties with which we are engaged in transactions;
- the capital-intensive nature of our regulated energy businesses;
- our ability to access the credit and capital markets to execute our business strategy, including our ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings and general economic conditions;
- the ability to successfully execute, manage and integrate a merger, acquisition or divestiture of assets or businesses and the related regulatory or other conditions associated with the merger, acquisition or divestiture;
- the impact on our costs and funding obligations, under our pension and other post-retirement benefit plans, of potential downturns in the financial markets, lower discount rates, and costs associated with health care legislation and regulation;
- the ability to continue to hire, train and retain appropriately qualified personnel;

- the availability of, and competition for, qualified personnel supporting our natural gas, electricity and propane businesses;
- the effect of accounting pronouncements issued periodically by accounting standard-setting bodies; and
- the impacts associated with a pandemic, including the duration and scope of the pandemic, the corresponding impact on our supply chains, our personnel, our contract counterparties, general economic conditions and growth, the financial markets and any costs to comply with governmental mandates.

Corporate Overview and Strategy

Chesapeake Utilities Corporation is a Delaware corporation formed in 1947 with operations primarily in the Mid-Atlantic region, North Carolina, South Carolina, Florida and Ohio. We are an energy delivery company engaged in the distribution of natural gas, electricity and propane, the transmission of natural gas, the generation of electricity and steam, and in providing related services to our customers. Our strategy is focused on growing earnings from a stable regulated energy delivery foundation and investing in related businesses and services that provide opportunities for returns greater than traditional utility returns. We seek to identify and develop opportunities across the energy value chain, with emphasis on midstream and downstream investments that are accretive to earnings per share, consistent with our long-term growth strategy and create opportunities to continue our record of higher-than-authorized regulated returns. The Company's growth strategy includes the continued investment and expansion of the Company's regulated operations that provide a stable base of earnings, as well as investments in other related non-regulated businesses and services including sustainable investments, such as renewable natural gas. By investing in these related businesses and services, the Company creates opportunities to sustain its track record of higher returns, as compared to a traditional utility.

Currently, the Company's growth strategy is focused on the following platforms, including:

- Optimizing the earnings growth in our existing businesses, which includes organic growth, strategic and complimentary acquisitions, territory expansions, and new products and services as well as increased opportunities to transform the Company with a focus on people, process, technology and organizational structure.
- Identification and pursuit of additional pipeline expansions, including new interstate and intrastate transmission projects.
- Growth of Marlin Gas Services' CNG transport business and expansion into LNG and RNG transport services as well as methane capture.
- Identifying and undertaking additional strategic propane acquisitions that provide a larger foundation in current markets and expand our brand and presence into new strategic growth markets.
- Pursuit of growth opportunities that enable us to utilize our integrated set of energy delivery businesses to participate in sustainable energy investments.

Operating Segments

We conduct operations within two reportable segments: Regulated Energy and Unregulated Energy. The remainder of our operations is presented as "Other businesses and eliminations." These segments are described below in detail.

Regulated Energy

Overview

Our regulated energy businesses are comprised of natural gas and electric distribution, as well as natural gas transmission services.

On November 30, 2023, we completed the acquisition of FCG for $923.4 million in cash, including working capital adjustments as defined in the agreement, pursuant to the previously disclosed stock purchase agreement with Florida Power & Light Company. Upon completion of the acquisition, FCG became a wholly-owned subsidiary of the Company and is included within our Regulated Energy segment. FCG serves approximately 120,000 residential and commercial natural gas customers across eight counties in Florida, including Miami-Dade, Broward, Brevard, Palm Beach, Hendry, Martin, St. Lucie and Indian River. Its natural gas system includes approximately 3,800 miles of distribution main and 80 miles of transmission pipe. Results for FCG are included within our consolidated results from the acquisition date.

The following table presents net income for the year ended December 31, 2023 and total assets as of December 31, 2023, by operation and area served:

Operations	Areas Served	Net Income (Loss)	Total Assets
(in thousands)			
Natural Gas Distribution			
Delmarva Natural Gas [1]	Delaware/Maryland	$ 9,256	$ 407,089
Florida Natural Gas [2]	Florida	23,840	545,952
Florida City Gas [3]	Florida	(3,256)	1,010,998
Natural Gas Transmission			
Eastern Shore	Delaware/Maryland/ Pennsylvania	23,284	480,147
Peninsula Pipeline	Florida	12,195	154,301
Aspire Energy Express	Ohio	417	6,746
Electric Distribution			
FPU	Florida	3,727	176,348
Total Regulated Energy		$ 69,463	$ 2,781,581

[1] Delmarva Natural Gas consists of Delaware division, Maryland division, Sandpiper Energy and Elkton Gas
[2] In accordance with the Florida PSC approval of our natural gas base rate proceeding, effective March 1, 2023, our natural gas distribution business in Florida (FPU, FPU-Indiantown division, FPU-Fort Meade division and Chesapeake Utilities' CFG division) have been consolidated and amounts are now being presented on a consolidated basis consistent with the final rate order
[3] FCG net income (loss) includes results from the acquisition date, including transaction-related expenses attributable to the acquisition. For additional information on FCG's results, see discussion under *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations*

Revenues in the Regulated Energy segment are based on rates regulated by the PSC in the states in which we operate or, in the case of Eastern Shore, which is an interstate business, by the FERC. The rates are designed to generate revenues to recover all prudent operating and financing costs and provide a reasonable return for our stockholders. Each of our distribution and transmission operations has a rate base, which generally consists of the original cost of the operation's plant (less accumulated depreciation), working capital and other assets. For Delmarva Natural Gas and Eastern Shore, rate base also includes deferred income tax liabilities and other additions or deductions. The Florida Natural Gas regulated energy operations do not include deferred income tax liabilities in their rate base.

Our natural gas and electric distribution operations bill customers at standard rates approved by their respective state PSC. Each state PSC allows us to negotiate rates, based on approved methodologies, for large customers that can switch to other fuels. Some of our customers in Maryland receive propane through underground distribution systems in Worcester County. We bill these customers under PSC-approved rates and include them in the natural gas distribution results and customer statistics.

Our natural gas and electric distribution operations earn profits on the delivery of natural gas or electricity to customers. The cost of natural gas or electricity that we deliver is passed through to customers under PSC-approved fuel cost recovery mechanisms. The mechanisms allow us to adjust our rates on an ongoing basis without filing a rate case to recover changes in the cost of the natural gas and electricity that we purchase for customers. Therefore, while our distribution operating revenues fluctuate with the cost of natural gas or electricity we purchase, our distribution adjusted gross margin is generally not impacted by fluctuations in the cost of natural gas or electricity.

Our natural gas transmission operations bill customers under rate schedules approved by the FERC or at rates negotiated with customers.

Operational Highlights

The following table presents operating revenues, volumes and the average number of customers by customer class for our natural gas and electric distribution operations for the year ended December 31, 2023:

	Delmarva Natural Gas Distribution			Florida Natural Gas Distribution (1)			Florida City Gas Distribution (2)			Florida Electric Distribution		
Operating Revenues *(in thousands)*												
Residential	$	87,709	62 %	$	50,792	30 %	$	5,042	42 %	$	49,542	50 %
Commercial and Industrial		54,261	38 %		108,913	65 %		5,872	49 %		52,047	52 %
Other (3)		(997)	<(1)%		8,655	5 %		1,159	9 %		(2,115)	(2)%
Total Operating Revenues	$	140,973	100 %	$	168,360	100 %	$	12,073	100 %	$	99,474	100 %
Volumes *(in Dts for natural gas/MW Hours for electric)*												
Residential		4,389,934	29 %		2,081,045	5 %		157,884	10 %		300,118	44 %
Commercial and Industrial		10,230,662	69 %		41,498,921	94 %		940,028	57 %		384,306	56 %
Other		293,186	2 %		627,934	1 %		549,132	33 %		—	— %
Total Volumes		14,913,782	100 %		44,207,900	100 %		1,647,044	00 %		684,424	100 %
Average Number of Customers (4)												
Residential		97,666	92 %		88,384	91 %		112,585	93%		25,719	78 %
Commercial and Industrial		8,246	8 %		8,415	9 %		8,587	7%		7,372	22 %
Other		23	<1%		6	<1%		6	<1%		—	— %
Total Average Number of Customers		105,935	100 %		96,805	100 %		121,178	100 %		33,091	100 %

(1) In accordance with the Florida PSC approval of our natural gas base rate proceeding, effective March 1, 2023, our natural gas distribution business in Florida (FPU, FPU-Indiantown division, FPU-Fort Meade division and Chesapeake Utilities' CFG division) have been consolidated and amounts are now being presented on a consolidated basis consistent with the final rate order

(2) Operating revenues and volumes for FCG include amounts from the acquisition date Customer totals for FCG reflect actual amounts at December 31, 2023 since the period from the acquisition covered only one month. For additional information on FCG's results, see discussion under *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations*

(3) Operating Revenues from "Other" sources include revenue, unbilled revenue, under (over) recoveries of fuel cost, conservation revenue, other miscellaneous charges, fees for billing services provided to third parties, and adjustments for pass-through taxes

(4) Average number of customers is based on the twelve-month average for the year ended December 31, 2023

The following table presents operating revenues, by customer type, for Eastern Shore and Peninsula Pipeline for the year ended December 31, 2023, as well as contracted firm transportation capacity by customer type, and design day capacity at December 31, 2023. Aspire Energy Express has been excluded from the table below and had operating revenue of $1.5 million and firm transportation capacity of 300,000 Dts/d for the year ended December 31, 2023:

	Eastern Shore			Peninsula Pipeline		
Operating Revenues *(in thousands)*						
Local distribution companies - affiliated (1)	$	34,050	43 %	$	24,324	80 %
Local distribution companies - non-affiliated		22,163	28 %		2,449	8 %
Commercial and industrial - affiliated		—	— %		1,651	5 %
Commercial and industrial - non-affiliated		23,439	29 %		534	2 %
Other (2)		271	<1%		1,442	5 %
Total Operating Revenues	$	79,923	100 %	$	30,400	100 %
Contracted firm transportation capacity *(in Dts/d)*						
Local distribution companies - affiliated		160,595	51 %		351,976	39 %
Local distribution companies - non-affiliated		56,576	18 %		534,825	59 %
Commercial and industrial - affiliated		—	— %		8,300	1 %
Commercial and industrial - non-affiliated		98,540	31 %		5,100	1 %
Total Contracted firm transportation capacity		315,711	100 %		900,201	100 %
Design day capacity *(in Dts/d)*		315,711	100 %		900,201	100 %

(1) Eastern Shore's and Peninsula Pipeline's service to our local distribution affiliates is based on the respective regulator's approved rates and is an integral component of the cost associated with providing natural gas supplies to the end users of those affiliates We eliminate operating revenues of these entities against the natural gas costs of those affiliates in our consolidated financial information, however, our local distribution affiliates include this amount in their purchased fuel cost and recover it through fuel cost recovery mechanisms

(2) Operating revenues from "Other" sources are from the rental of gas properties

Regulatory Overview

The following table highlights key regulatory information for each of our principal Regulated Energy operations. Peninsula Pipeline and Aspire Energy Express are not regulated with regard to cost of service by either the Florida PSC or Ohio PUC respectively, or the FERC and are therefore excluded from the table. See Item 8, *Financial Statements and Supplementary Data* (Note 18, *Rates and Other Regulatory Activities*, in the consolidated financial statements) for further discussion on the impact of this legislation on our regulated businesses.

[1] In January 2024, our natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. The outcome of the application is subject to review and approval by the Maryland PSC.
[2] The rate increase and allowed return on equity for Elkton Gas were approved by the Maryland PSC before we acquired the company.
[3] The Maryland PSC approved a declining return on equity.
[4] Other components of capital structure include customer deposits, deferred income taxes and tax credits.
[5] Allowed after-tax return on equity.
[6] The terms of the agreement include revenue neutral rates for the first year (December 1, 2016 through November 30, 2017), followed by a schedule of rate reductions in subsequent years based upon the projected rate of propane to natural gas conversions.
[7] The terms of the settlement agreement for the FPU electric division limited proceeding with the Florida PSC prescribed an authorized return on equity range of 9.25 to 11.25 percent, with a mid-point of 10.25 percent.
* LTD-Long-term debt, STD-Short-term debt

In May 2022, our legacy natural gas distribution businesses filed a consolidated natural gas rate case with the Florida PSC. The application included a request for the following: (i) permanent rate relief of approximately $24.1 million, effective January 1, 2023; (ii) a depreciation study also submitted with the filing; (iii) authorization to make certain changes to tariffs to include the consolidation of rates and rate structure across the businesses and to unify the Florida natural gas distribution businesses under FPU; (iv) authorization to retain the acquisition adjustment recorded at the time of the FPU merger in our revenue requirement; and (v) authorization to establish an environmental remediation surcharge for the purposes of addressing future expected remediation costs for FPU MGP sites. In August 2022, interim rates were approved by the Florida PSC in the amount of approximately $7.7 million on an annualized basis, effective for all meter readings in September 2022. The discovery process and subsequent hearings were concluded during the fourth quarter of 2022 and briefs were submitted in the same quarter of 2022. In January 2023, the Florida PSC approved the application for consolidation and permanent rate relief of approximately $17.2 million on an annual basis. Actual rates in connection with the rate relief were approved by the Florida PSC in February 2023 with an effective date of March 1, 2023.

In May 2022, FCG filed a general base rate increase with the Florida PSC based on a projected 2023 test year. In June 2023, the Florida PSC issued an order approving a single total base revenue increase of $23.3 million (which included an incremental increase of $14.1 million, a previously approved increase of $3.8 million for a liquefied natural gas facility, and $5.3 million to transfer the SAFE investments from a rider clause to base rates), with new rates becoming effective as of May 1, 2023. The Commission also approved FCG's proposed reserve surplus amortization mechanism ("RSAM") with a $25.0 million reserve amount, continuation and expansion of the capital SAFE program, implementation of an automated metering infrastructure pilot, and continuation of the storm damage reserve with a target reserve of $0.8 million. On June 23, 2023, the Florida OPC filed a motion for reconsideration of the PSC's approval of RSAM, which was denied on September 12, 2023. On July 7, 2023, the Florida OPC filed a notice of appeal with the Florida Supreme Court, which is pending.

The following table presents surcharge and other mechanisms that have been approved by the respective PSC for our regulated energy distribution businesses. These include: Delaware surcharges to expand natural gas service in its service territory as well as for the conversion of propane distribution systems to natural gas; Maryland's surcharges to fund natural gas conversions and system improvements in Worcester County; Elkton's Strategic Infrastructure Development and Enhanced (STRIDE) plan for accelerated pipeline replacement for older portions of the natural gas distribution system; Florida's GRIP surcharge which provides accelerated recovery of the costs of replacing older portions of the natural gas distribution system to improve safety and reliability; FCG's SAFE surcharge which provides accelerated recovery of the costs of replacing older portions of that natural gas distribution system to improve safety and reliability; and the Florida electric distribution operation's limited proceeding which allowed recovery of storm-related costs.

Operation(s)/Division(s)	Jurisdiction	Infrastructure mechanism	Revenue normalization
Delaware division	Delaware	Yes	No
Maryland division	Maryland	No	Yes
Sandpiper Energy	Maryland	Yes	Yes
Elkton Gas	Maryland	Yes	Yes
Florida Natural Gas	Florida	Yes	No
Florida City Gas [(1)]	Florida	Yes	No
FPU electric division	Florida	Yes	No

[(1)] See Item 8, *Financial Statements and Supplementary Data*, Note 18, *Rates and Other Regulatory Activities*, for additional information related to FCG's RSAM that was approved as part of its rate case effective as of May 1, 2023

Weather

Weather variations directly influence the volume of natural gas and electricity sold and delivered to residential and commercial customers for heating and cooling and changes in volumes delivered impact the revenue generated from these customers. Natural gas volumes are highest during the winter months, when residential and commercial customers use more natural gas for heating. Demand for electricity is highest during the summer months, when more electricity is used for cooling. We measure the relative impact of weather using degree-days. A degree-day is the measure of the variation in the weather based on the extent to which the average daily temperature falls above or below 65 degrees Fahrenheit. Each degree of temperature below 65 degrees Fahrenheit is counted as one heating degree-day, and each degree of temperature above 65 degrees Fahrenheit is counted as one cooling degree-day. Normal heating and cooling degree-days are based on the most recent 10-year average.

Competition

Natural Gas Distribution

While our natural gas distribution operations do not compete directly with other distributors of natural gas for residential and commercial customers in our service areas, we do compete with other natural gas suppliers and alternative fuel providers for sales to industrial customers. Large customers could bypass our natural gas distribution systems and connect directly to intrastate or interstate transmission pipelines, and we compete in all aspects of our natural gas business with alternative energy sources, including electricity, oil, propane and renewables. The most effective means to compete against alternative fuels are lower prices, superior reliability and flexibility of service. Natural gas historically has maintained a price advantage in the residential, commercial and industrial markets, and reliability of natural gas supply and service has been excellent. In addition, we provide flexible pricing to our large customers to minimize fuel switching and protect these volumes and their contributions to the profitability of our natural gas distribution operations.

Natural Gas Transmission

Our natural gas transmission business competes with other interstate and intrastate pipeline companies to provide service to large industrial, generation and distribution customers, primarily in the northern portion of the Delmarva Peninsula and in Florida. Our transmission business in Ohio, Aspire Energy Express, services one customer, Guernsey Power Station, to which it is the sole supplier.

Electric Distribution

While our electric distribution operations do not compete directly with other distributors of electricity for residential and commercial customers in our service areas, we do compete with other electricity suppliers and alternative fuel providers for sales to industrial customers. Some of our large industrial customers may be capable of generating their own electricity, and we structure rates, service offerings and flexibility to retain these customers in order to retain their business and contributions to the profitability of our electric distribution operations.

Supplies, Transmission and Storage

Natural Gas Distribution

Our natural gas distribution operations purchase natural gas from marketers and producers and maintain contracts for transportation and storage with several interstate pipeline companies to meet projected customer demand requirements. We believe that our supply and capacity strategy will adequately meet our customers' needs over the next several years and we will continue to adapt our supply strategy to meet projected growth in customer demand within our service territories.

The Delmarva natural gas distribution systems are directly connected to Eastern Shore's pipeline, which has connections to other pipelines that provide us with transportation and storage. These operations can also use propane-air and liquefied natural gas peak-shaving equipment to serve customers. Our Delmarva Peninsula natural gas distribution operations maintain asset management agreements with a third party to manage their natural gas transportation and storage capacity. The current agreements were effective as of April 1, 2023 and expire in March 2026. Our Delmarva operations receive a fee, which we share with our customers, from the asset manager, who optimizes the transportation, storage and natural gas supply for these operations.

Our Florida Natural Gas distribution business uses Peninsula Pipeline and Peoples Gas to transport natural gas where there is no direct connection with FGT. FPU natural gas distribution and Eight Flags entered into separate 10-year asset management agreements with Emera Energy Services, Inc. to manage their natural gas transportation capacity, each of which expires in November 2030. An agreement with Florida Southeast Connection LLC for additional service to Palm Beach County is also in place for an initial term through December 2044. FCG utilizes FGT and Peninsula Pipeline to transport natural gas.

A summary of our pipeline capacity contracts follows:

Division	Pipeline	Maximum Daily Firm Transportation Capacity (Dts)	Contract Expiration Date
Delmarva Natural Gas Distribution	Eastern Shore	160,595	2024-2035
	Columbia Gas [1]	5,246	2024-2026
	Transco [1]	30,419	2024-2028
	TETLP [1]	50,000	2027
Florida Natural Gas	Gulfstream [2]	10,000	2032
	FGT	47,409 - 78,817	2025-2041
	Peninsula Pipeline	346,200	2033-2048
	Peoples Gas	12,160	2024
	Florida Southeast Connection LLC	5,000	2044
	Southern Natural Gas Company	1,500	2029
Florida City Gas	FGT	32,235 - 68,955	2030
	Peninsula Pipeline	15,000	2033 - 2043

[1] Transco, Columbia Gas and TETLP are interstate pipelines interconnected with Eastern Shore's pipeline
[2] Pursuant to a capacity release program approved by the Florida PSC, all of the capacity under this agreement has been released to various third parties Under the terms of these capacity release agreements, Chesapeake Utilities is contingently liable to Gulfstream should any party, that acquired the capacity through release, fail to pay the capacity charge

Eastern Shore has three agreements with Transco for a total of 7,292 Dts/d of firm daily storage injection and withdrawal entitlements and total storage capacity of 288,003 Dts. These agreements expire in March 2028. Eastern Shore retains these firm storage services in order to provide swing transportation service and firm storage service to customers requesting such services.

Aspire Energy Express, our Ohio intrastate pipeline subsidiary, entered into a precedent agreement to provide natural gas transportation capacity to Guernsey Power Station, who completed construction of its power generation facility in Guernsey County, Ohio in January 2023. Aspire Energy Express completed construction of the gas transmission facilities in the fourth quarter of 2021 and began billing for transportation services in the first quarter of 2022.

Electric Distribution

Our Florida electric distribution operation purchases wholesale electricity under the power supply contracts summarized below:

Area Served by Contract	Counterparty	Contracted Amount (MW)	Contract Expiration Date
Northwest Florida	Gulf Power Company	Full Requirement*	2026
Northeast Florida	Florida Power & Light Company	Full Requirement*	2026
Northeast Florida	Eight Flags	21	2036
Northeast Florida	Rayonier	1.7 to 3.0	2036
Northeast Florida	WestRock Company	As-available	N/A

*The counter party is obligated to provide us with the electricity to meet our customers' demand, which may vary

Unregulated Energy

Overview

The following table presents net income for the year ended December 31, 2023 and total assets as of December 31, 2023, for our Unregulated Energy segment by operation and area served:

Operations	Area Served	Net Income (Loss)	Total Assets
(in thousands)			
Propane Operations (Sharp, Diversified Energy, FPU and Flo-gas)	Delaware, Maryland, Virginia, Pennsylvania, North Carolina, South Carolina, Florida	$ 13,587	$ 191,164
Energy Transmission (Aspire Energy)	Ohio	3,080	145,183
Energy Generation (Eight Flags)	Florida	2,235	37,805
Marlin Gas Services	The Entire U.S.	432	54,256
Sustainable investments and other [1]	Various	(1,697)	48,994
Total		$ 17,637	$ 477,402

[1] Includes our renewable natural gas projects that are in various stages of development

Propane Operations

Our propane operations sell propane to residential, commercial industrial, wholesale and AutoGas customers, in the Mid-Atlantic region, North Carolina, South Carolina and Florida, through Sharp Energy, Inc., Sharpgas, Inc., Diversified Energy, FPU and Flo-gas. We deliver to and bill our propane customers based on two primary customer types: bulk delivery customers and metered customers. Bulk delivery customers receive deliveries into tanks at their location. We invoice and record revenues for these customers at the time of delivery. Metered customers are either part of an underground propane distribution system or have a meter installed on the tank at their location. We invoice and recognize revenue for these customers based on their consumption as dictated by scheduled meter reads. As a member of AutoGas Alliance, we install and support propane vehicle conversion systems for vehicle fleets and provide on-site fueling infrastructure.

Propane Operations - Operational Highlights

For the year ended December 31, 2023, operating revenues, volumes sold and average number of customers by customer class for our propane operations were as follows:

	Operating Revenues (in thousands)		Volumes (in thousands of gallons)		Average Number of Customers [1]	
Residential bulk	$ 46,913	30 %	15,187	21 %	59,483	70 %
Residential metered	13,931	9 %	4,457	6 %	17,387	21 %
Commercial bulk	37,541	24 %	21,242	30 %	7,703	9 %
Commercial metered	1,809	%	574	1 %	202	<1%
Wholesale	25,073	16 %	24,876	35 %	35	<1%
AutoGas	7,045	5 %	4,949	7 %	76	<1%
Other [2]	22,436	15 %	—	— %	—	— %
Total	$ 154,748	100 %	71,285	100 %	84,886	100 %

[1] Average number of customers is based on a twelve-month average for the year ended December 31, 2023 Excludes customers from the propane acquisition that closed in December 2023 See Note 4 under *Item 8, Financial Statements and Supplementary Data*, for additional information on this acquisition
[2] Operating revenues from "Other" sources include revenues from customer loyalty programs, delivery, service and appliance fees, and unbilled revenues

Competition

Our propane operations compete with national and local independent companies primarily on the basis of price and service. Propane is generally a cheaper fuel for home heating than oil and electricity but more expensive than natural gas. Our propane operations are largely concentrated in areas that are not currently served by natural gas distribution systems.

Supplies, Transportation and Storage

We purchase propane from major oil companies and independent natural gas liquids producers. Propane is transported by truck and rail to our bulk storage facilities in Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina and Florida which have a total storage capacity of 8.9 million gallons. Deliveries are made from these facilities by truck to tanks located on customers' premises or to central storage tanks that feed our underground propane distribution systems. While propane supply has traditionally been adequate, significant fluctuations in weather, closing of refineries and disruption in supply chains, could cause temporary reductions in available supplies.

Weather

Propane revenues are affected by seasonal variations in temperature and weather conditions, which directly influence the volume of propane used by our customers. Our propane revenues are typically highest during the winter months when propane is used for heating. Sustained warmer-than-normal temperatures will tend to reduce propane use, while sustained colder-than-normal temperatures will tend to increase consumption.

Unregulated Energy Transmission and Supply (Aspire Energy)

Aspire Energy owns approximately 2,800 miles of natural gas pipeline systems in 40 counties in Ohio. The majority of Aspire Energy's revenues are derived from long-term supply agreements with Columbia Gas of Ohio and Consumers Gas Cooperative ("CGC"), which together serve more than 22,000 end-use customers. Aspire Energy purchases natural gas to serve these customers from conventional producers in the Marcellus and Utica natural gas production areas. In October 2021, Aspire Energy completed construction of its Noble Road Landfill RNG pipeline project, which began transporting RNG generated from the landfill to Aspire Energy's pipeline system in January of 2022, displacing conventionally produced natural gas. In 2023, the RNG volumes represented approximately 10 percent of Aspire Energy's gas gathering volumes and are anticipated to continue at such rate in 2024 and beyond. In addition, Aspire Energy earns revenue by gathering and processing natural gas for customers.

For the twelve-month period ended December 31, 2023, Aspire Energy's operating revenues and deliveries by customer type were as follows:

	Operating revenues		Deliveries	
	(in thousands)	% of Total	*(in thousands Dts)*	% of Total
Supply to Columbia Gas of Ohio	$ 11,694	32 %	2,351	31 %
Supply to CGC	16,844	45 %	2,025	27 %
Supply to Marketers	6,287	17 %	3,141	41 %
Other (including natural gas gathering and processing)	2,314	6 %	64	1 %
Total	$ 37,139	100 %	7,581	100 %

Energy Generation (Eight Flags)

Eight Flags generates electricity and steam at its CHP plant located on Amelia Island, Florida. The plant is powered by natural gas transported by Peninsula Pipeline and our Florida Natural Gas distribution business and produces approximately 21 MW of electricity and 75,000 pounds per hour of steam. Eight Flags sells the electricity generated from the plant to our Florida electric distribution operation and sells the steam to the customer who owns the site on which the plant is located, both under separate 20-year contracts.

Marlin Gas Services

Marlin Gas Services is a supplier of mobile CNG and virtual pipeline solutions, primarily to utilities and pipelines. Marlin Gas Services provides temporary hold services, pipeline integrity services, emergency services for damaged pipelines and specialized gas services for customers who have unique requirements. These services are provided by a highly trained staff of drivers and maintenance technicians who safely perform these functions throughout the United States. Marlin Gas Services maintains a fleet of CNG trailers, mobile compression equipment, LNG tankers and vaporizers, and an internally developed

patented regulator system which allows for delivery of over 7,000 Dts/d of natural gas. Marlin Gas Services continues to actively expand the territories it serves, as well as leveraging its fleet of equipment and patented technologies to serve LNG and RNG market needs.

Sustainable Investments

Our sustainable investments are comprised primarily of our renewable natural gas projects that are in various stages of development. Included in these are the assets and intellectual property of Planet Found that we acquired during the fourth quarter of 2022, whose farm scale anaerobic digestion pilot system and technology produces biogas from poultry litter. In addition, we are constructing a dairy manure RNG facility that we will own and operate at Full Circle Dairy in Madison County, Florida. The project consists of a facility converting dairy manure to RNG and transportation assets to bring the gas to market. with capital expenditures totaling $19.3 million through December 31, 2023. The first injection of RNG is projected to occur in the first half of 2024.

Environmental Matters

See *Item 8, Financial Statements and Supplementary Data* (see Note 19, *Environmental Commitments and Contingencies,* in the consolidated financial statements).

Human Capital Initiatives

Our success is the direct result of our employees and our strong culture that fully engages our team and promotes equity, diversity, inclusion, integrity, accountability and reliability. We believe that a combination of diverse team members and an inclusive culture contributes to the success of our Company and to enhanced societal advancement. Each employee is a valued member of our team bringing a diverse perspective to help grow our business and achieve our goals.

Our tradition of serving employees, customers, investors, partners and communities is at the core of our special culture. Our unique culture is grounded in a solid foundation of regulated businesses, but enhanced by an entrepreneurial, innovative and competitive market mindset. Among the ongoing initiatives across our enterprise, we highlight below the importance of our team, our culture of safety, and our commitment to supporting a more sustainable future.

Our Team Drives Our Performance

Our employees are the key to our success. Our leadership and human resources teams are responsible for attracting and retaining top talent and as an equal opportunity employer committed to creating a diverse workforce, we consider all qualified applicants without regard to race, religion, color, sex, national origin. age, sexual orientation, gender identity, disability or veteran status, among other factors. Our senior management team includes a Chief Human Resources Officer, with expertise in diverse candidate recruitment, to ensure that we continue to expand our candidate pools to better reflect the diverse demographics of the communities we serve.

Throughout our organization, we seek to promote from within. reviewing strategic positions regularly and identifying potential internal candidates to fill those positions, evaluating critical job skill sets to identify competency gaps and creating developmental plans to facilitate employee professional growth. We provide training and development programs, including many forms of training on our internal learning platform, as well as tuition reimbursement to promote continued professional growth.

Subsequent to the acquisition of FCG, we had a total of 1.281 employees at December 31, 2023, 196 of whom are union employees represented by two labor unions: the International Brotherhood of Electrical Workers ("IBEW") and the United Food and Commercial Workers Union. The collective bargaining agreements covering our legacy employees with these labor unions expire in 2025. Negotiations began in January 2024 with IBEW for those union employees that joined our Company as part of our acquisition of FCG. We consider our relationships with employees, including those covered by collective bargaining agreements, to be in good standing. We provide a competitive Total Rewards package for our employees including health insurance coverage, wellness initiatives, retirement savings benefits, paid time off. employee assistance programs, educational and tuition reimbursement. competitive pay, career growth opportunities, paid volunteer time, and a culture of recognition.

We listen to our employees and actively seek their input and feedback. Many of the initiatives we have in place are driven by feedback from our employees during an annual survey process or through regular employee engagement. We have also been purposeful in wanting to provide adequate recognition of our employees and their many efforts. Our internal recognition platform was unveiled in 2023 and enables employees to be recognized in real-time for their contributions. Our employees are the backbone of our continued growth and success.

We have an established an equity, diversity and inclusion ("EDI") Council which recommends and promotes our EDI strategy, advises our employee resource groups ("ERGs") and works with our operating units and support teams on EDI initiatives. The EDI Council’s charter includes the following objectives:

- Build a more diverse and inclusive workforce
- Promote a culture of understanding, equality and inclusion
- Educate employees about the benefits of diversity at Chesapeake Utilities
- Support community programs and organizations that are diverse and inclusive
- Provide guidance on EDI matters for the Company

The EDI Council includes members of our leadership team, the chairs of each of our ERGs and other individuals in key support roles. The CEO receives a regular report on the achievements of the EDI Council, strategic direction of initiatives, resource needs and issues that require policy decisions or other actions.

Our first ERG was established in 2019, and as of December 31, 2023, there were ten active ERGs meeting throughout the Company. ERGs are voluntary, employee-led groups that focus on shared identities, affinities and experiences and seek to apply those perspectives to initiatives that create value throughout the Company. The ERGs support their members' personal growth and professional development, and help develop learning programs and community service opportunities throughout the Company. ERGs also help foster a sense of belonging by creating a deep and intentional community that extends beyond an employee’s day-to-day team and colleagues into a companywide network.

Workplace Health and Safety

We believe that there is nothing more important than the safety of our team, our customers and our communities. We are committed to ensuring safety is at the center of our culture and the way we do business. The importance of safety is exhibited throughout the entire organization, with the direction and tone set by both the Board of Directors and our President and CEO, and evidenced through required attendance at monthly safety meetings, routine safety training and the inclusion of safety moments at key team meetings. Additionally, we remain committed to providing products and services to our customers in a safe and reliable manner.

To maintain safety as a priority, our employees remain committed and work together to ensure that our plans, programs, policies and behaviors are aligned with our aspirations as a Company. The achievement of superior safety performance is both an important short-term and long-term strategic initiative in managing our operations. Our state-of-the art training facility, Safety Town, located in Dover, Delaware, now serves as a resource for training our employees who build, maintain and operate our natural gas infrastructure, offering hands-on training and fully immersive, on-the-job field experiences. First responders and other community partners also benefit from the simulated environment and conditions they could encounter as they enter homes in the community. Construction is underway for our second Safety Town facility in Florida, and we are excited to begin utilizing this facility in 2024.

Driving Sustainability across the Company

Consistent with our culture of teamwork, the focus on sustainability is supported and shared across our organization by the dedication and efforts of our Board of Directors and its Committees, as well as the entrepreneurship and dedication of our team. As stewards of long-term enterprise value, the Board of Directors is committed to overseeing the sustainability of the Company, its environmental stewardship initiatives, its safety and operational compliance practices, and to promoting equity, diversity and inclusion that reflects the diverse communities we serve. Our ESG Committee brings together a cross-functional team of leaders across the organization responsible for identifying, assessing, executing and advancing the Company's strategic sustainability initiatives. Our Environmental Sustainability Office identifies and manages emission-reducing projects both internally as well as those that support our customers' sustainability goals. Throughout the year, Chesapeake Utilities drove numerous initiatives in support of its sustainability focus, including but not limited to:

- Constructed an RNG injection point in Yulee, Florida, providing a pathway to market for produced RNG, and progressed on construction of our first RNG production facility in Lee, Florida;

- Completed an expansion of our intrastate transmission pipeline to Vero Beach, Florida, increasing the availability of natural gas to the area;
- Served as an industry anchor partner in the Mid-Atlantic Clean Hydrogen Hub (MACH2™), which was awarded federal funding of up to $750 million in October 2023; MACH2™ is a collaboration between Delaware, southern New Jersey and southeastern Pennsylvania;
- In Delaware, filed a first-of-its-kind energy efficiency program focused on natural gas; pending approval from the Delaware PSC, the program will be implemented in 2024;
- Our Florida Natural Gas distribution business received approval for its 10-year GUARD program to remove accessibility challenges and replace older problematic distribution lines and services, increasing employee, customer, and community safety; FCG received approval to extend its similar program, SAFE, for 10 more years;
- Provided Healthy Pantry Naming Sponsor-level support and donated several recycled benches from our Pipe Recycling Project for the new 70,000 square foot Food Bank of Delaware facility located in Milford, Delaware;
- Rolled out our "Chesapeake Connections Program," connecting new team members with a "connection buddy" outside of their department for the first few months of employment;
- Introduced two new ERGs in 2023 – "PRIDE," which is focused on providing a sense of acceptance and belonging for everyone in the Chesapeake Utilities family, and "GREEN," which is passionate about the environment and committed to reducing societal impacts on the planet; and
- Named a 2023 Champion of Board Diversity by The Forum of Executive Women.

Information About Executive Officers

Set forth below are the names, ages, and positions of our executive officers with their recent business experience. The age of each officer is as of the filing date of this Annual Report.

Name	Age	Executive Officer Since	Offices Held During the Past Five Years
Jeffry M. Householder	66	2010	Chairman of the Board of Directors (May 2023 - present) President (January 2019 - present) Chief Executive Officer (January 2019 - present) Director (January 2019 - present) President of FPU (June 2010 - February 2019)
Beth W. Cooper	57	2005	Executive Vice President (February 2019 - present) Chief Financial Officer (September 2008 - present) Senior Vice President (September 2008 - February 2019) Treasurer (January 2022 - present) Assistant Corporate Secretary (March 2015 - present)
James F. Moriarty	66	2015	Executive Vice President (February 2019 - present) General Counsel & Corporate Secretary (March 2015 - present) Chief Policy and Risk Officer (February 2019 - present) Senior Vice President (February 2017 - February 2019) Vice President (March 2015 - February 2017)
Kevin J. Webber	65	2010	Chief Development Officer (January 2022 - present) Senior Vice President (February 2019 - present) President FPU (February 2019 - December 2019) Vice President Gas Operations and Business Development Florida Business Units (July 2010 - February 2019)
Jeffrey S. Sylvester	54	2019	Chief Operating Officer (January 2022 - present) Senior Vice President (December 2019 - present) Vice President Black Hills Energy (October 2012 - December 2019)

Available Information on Corporate Governance Documents

Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and other reports and amendments to these reports that we file with or furnish to the SEC at their website, *www.sec.gov,* are also available free of charge at our website, *www.chpk.com,* as soon as reasonably practicable after we electronically file these reports with, or furnish these reports to the SEC. The content of this website is not part of this Annual Report.

In addition, the following documents are available free of charge on our website, *www.chpk.com*:

- Code of Ethics for Financial Officers;
- Corporate Governance Guidelines; and
- Charters for the Audit Committee, Compensation Committee, Investment Committee, and Corporate Governance Committee of the Board of Directors.

Any of these reports or documents may also be obtained by writing to: Corporate Secretary; c/o Chesapeake Utilities Corporation, 500 Energy Lane Suite 100, Dover, DE 19901.

ITEM 1A. RISK FACTORS

The risks described below fall into three broad categories related to (1) financial risks, (2) operational risks, and (3) regulatory, legal and environmental risks, all of which may affect our operations and/or the financial performance of our regulated and unregulated energy businesses. These are not the only risks we face but are considered to be the most material. There may be other unknown or unpredictable risks or other factors that could have material adverse effects on our future results. Refer to the section entitled *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations* of this Annual Report for an additional discussion of these and other related factors that affect our operations and/or financial performance.

FINANCIAL RISKS

Our financial results may fluctuate significantly and may not fully reflect the underlying performance of our business.

Our operating results, including our revenues, operating margin, profitability, and cash flow, may vary significantly in the future and period-to-period comparisons of our operating results may not be meaningful. Accordingly, the results of any one quarter or year should not be relied upon as an indication of future performance. Our financial results may fluctuate as a result of a variety of factors, many of which are outside of our control, and such fluctuations and related impacts to any capital or earnings guidance we may issue from time to time, or any modification or withdrawal thereof, may negatively impact the value of our securities.

Instability and volatility in the financial markets could negatively impact access to capital at competitive rates, which could affect our ability to implement our strategic plan, undertake improvements and make other investments required for our future growth.

Our business strategy includes the continued pursuit of growth and requires capital investment in excess of cash flow from operations. As a result, the successful execution of our strategy is dependent upon access to equity and debt at reasonable costs. Our ability to issue new debt and equity capital and the cost of equity and debt are greatly affected by our financial performance and the conditions of the financial markets. In addition, our ability to obtain adequate and cost-effective debt depends on our credit ratings. A downgrade in our current credit ratings could negatively impact our access to and cost of debt. If we are not able to access capital at competitive rates, our ability to implement our strategic plan, undertake improvements and make other investments required for our future growth may be limited.

Fluctuations in propane gas prices could negatively affect results of operations.

The combination of high demand and lower-than-average inventory is always a common driver for higher propane gas prices. We adjust the price of the propane we sell based on changes in our cost of purchasing propane. However, if the market does not allow us to increase propane sales prices to compensate fully for fluctuations in purchased propane costs, our results of operations and cash flows could be negatively affected.

If we fail to comply with our debt covenant obligations, we could experience adverse financial consequences that could affect our liquidity and ability to borrow funds.

Our long-term debt obligations and our Revolver contain financial covenants related to debt-to-capital ratios and interest-coverage ratios. Failure to comply with any of these covenants could result in an event of default which, if not cured or waived, could result in the acceleration of outstanding debt obligations, the inability to borrow under certain credit agreements and terms, or the inability to access capital from other sources. Any such default could cause a material adverse change in our financial condition, results of operations and cash flows. As of December 31, 2023, we were in compliance with all of our debt covenants.

Increases in interest rates may adversely affect our results of operations and cash flows.

Increases in interest rates could increase the cost of future debt issuances. To the extent we are not able to fully recover higher debt costs in the rates we charge our utility customers, or the timing of such recovery is not certain, our earnings could be adversely affected. Increases in short-term interest rates could negatively affect our results of operations, which depend on short-term debt to finance accounts receivable and storage gas inventories and to temporarily finance capital expenditures. Reference should be made to *Item 7A, Quantitative and Qualitative Disclosures about Market Risk* for additional information.

Continuing or worsening inflationary and/or supply chain issues may adversely impact our financial condition and results of operations.

Our business is dependent on the supply chain to ensure that equipment, materials and other resources are available to both expand and maintain our services in a safe and reliable manner. Pricing of equipment, materials and other resources have increased recently and may continue to do so in the future. Failure to secure equipment, materials and other resources on economically acceptable terms, including failure to eliminate or manage the constraints in the supply chain, may impact the availability of items that are necessary to support normal operations as well as materials that are required for continued infrastructure growth, and as a result, may adversely impact our financial condition and results of operations.

In addition, it may become more costly for us to recruit and retain key employees, particularly specialized/technical personnel, in the face of competitive market conditions and increased competition for specialized and experienced workers in our industry.

Disruptions, uncertainty or volatility in the credit and capital markets may exert downward pressure on the market price of the Company's common stock.

The market price and trading volume of the Company's common stock is subject to fluctuations as a result of, among other factors, general credit and capital market conditions and changes in market sentiment regarding the operations, business and financing strategies of the Company and its subsidiaries. As a result, disruptions, uncertainty or volatility in the credit and capital markets may, amongst other things, have a material adverse effect on the market price of the Company's common stock.

Current market conditions could adversely impact the return on plan assets for our Company sponsored defined benefit plans, which may require significant additional funding.

The Company's primary defined benefit pension plan, the FPU pension plan, is a funded plan that is closed to new employees and the future benefits are frozen. At December 31, 2023, the FPU pension plan benefit obligation was $49.4 million and was funded at approximately 100 percent. The costs of providing benefits and related funding requirements of the FPU plan is subject to changes in the market value of the assets that fund the plan and the discount rates used to estimate the pension benefit obligations. The funded status of the plans and the related costs reflected in our financial statements are affected by various factors that are subject to an inherent degree of uncertainty, particularly in the current economic environment. Future losses of asset values and further declines in discount rates may necessitate accelerated funding of the plans to meet minimum federal government requirements and may result in higher pension expense in future years. Adverse changes in the benefit obligation of the FPU pension plan may require us to record higher pension expense and fund obligations earlier than originally planned, which would have an adverse impact on our cash flows from operations, decrease borrowing capacity and increase interest expense.

OPERATIONAL RISKS

We are dependent upon construction of new facilities to support future growth in earnings in our natural gas and electric distribution and natural gas transmission operations.

Construction of new facilities required to support future growth is subject to various regulatory and developmental risks, including but not limited to: (i) our ability to obtain timely certificate authorizations, necessary approvals and permits from regulatory agencies and on terms that are acceptable to us; (ii) potential changes in federal, state and local statutes and regulations, including environmental requirements, that prevent a project from proceeding or increase the anticipated cost of the project; (iii) our inability to acquire rights-of-way or land rights on a timely basis on terms that are acceptable to us; (iv) lack of anticipated future growth in available natural gas and electricity supply and demand; (v) insufficient customer throughput commitments; and (vi) lack of available and qualified third-party contractors which could impact the timely construction of new facilities. Adverse outcomes and/or changes in these risks could limit the future growth of our business and cause a material adverse change in our financial condition, results of operations and cash flows.

We do not own all of the land on which our pipelines and facilities are located, which could result in disruptions to our operations.

Because we do not own all of the land on which our pipelines and facilities have been constructed, we are subject to the possibility of more onerous terms or increased costs to retain necessary land use if we do not have valid rights-of-way or if such rights-of-way lapse or terminate. We obtain the rights to construct and operate our pipelines on land owned by third parties and governmental agencies for a specific period of time. Our loss of these rights, through our inability to renew right-of-way contracts or otherwise, could have a material adverse effect on our business, financial condition and results of operations.

We operate in a competitive environment, and we may lose customers to competitors.

Natural Gas. Our natural gas transmission and distribution operations compete with interstate pipelines when our customers are located close enough to a competing pipeline to make direct connections economically feasible. Customers also have the option to switch to alternative fuels, including renewable energy sources. Failure to retain and grow our natural gas customer base would have an adverse effect on our financial condition, results of operations and cash flows.

Electric. Our Florida electric distribution business has remained substantially free from direct competition from other electric service providers but does face competition from other energy sources. Changes in the competitive environment caused by legislation, regulation, market conditions, or initiatives of other electric power providers, particularly with respect to retail electric competition, would adversely affect our financial condition, results of operations and cash flows.

Propane. Our propane operations compete with other propane distributors, primarily on the basis of service and price. Our ability to grow the propane operations business is contingent upon capturing additional market share, expanding into new markets, and successfully utilizing pricing programs that retain and grow our customer base. Failure to retain and grow our customer base in our propane operations would have an adverse effect on our financial condition, results of operations and cash flows.

Fluctuations in weather may cause a significant variance in our earnings.

Our natural gas distribution, propane operations and natural gas transmission operations, are sensitive to fluctuations in weather conditions, which directly influence the volume of natural gas and propane we transport, sell and deliver to our customers. A significant portion of our natural gas distribution, propane operations and natural gas transmission revenue is derived from the sales and deliveries to residential, commercial and industrial heating customers during the five-month peak heating season (November through March). Other than our Maryland natural gas distribution businesses (Maryland division, Sandpiper Energy and Elkton Gas) which have revenue normalization mechanisms, if the weather is warmer than normal, we generally sell and deliver less natural gas and propane to customers, and earn less revenue, which could adversely affect our results of operations, cash flows and financial condition. Conversely, if the weather is colder than normal, we generally sell and deliver more natural gas and propane to customers, and earn more revenue, which could positively affect our results of operations, cash flows and financial condition. Variations in weather from year to year can cause our results of operations, cash flows and financial condition to vary accordingly.

Our electric distribution operation is also affected by variations in weather conditions and unusually severe weather conditions. However, electricity consumption is generally less seasonal than natural gas and propane because it is used for both heating and cooling in our service areas.

Severe weather events (such as a major hurricane, flood or tornado), natural disasters and acts of terrorism could adversely impact earnings and access to insurance coverage.

Inherent in energy transmission and distribution activities are a variety of hazards and operational risks, such as leaks, ruptures, fires, uncontrollable flows of natural gas, explosions, release of contaminants into the environment, sabotage and mechanical problems. Severe weather events and natural disasters may damage our assets, cause operational interruptions and result in the loss of human life, all of which could negatively affect our earnings, financial condition and results of operations.

Acts of terrorism and the impact of retaliatory military and other action by the U.S. and its allies may lead to increased political, economic and financial market instability and volatility in the price of natural gas, electricity and propane that could negatively affect our operations. Companies in the energy industry may face a heightened risk of exposure to acts of terrorism, which could affect our financial condition, results of operations and cash flows.

The insurance industry may also be affected by severe weather events, natural disasters and acts of terrorism. As a result, the availability of insurance covering risks against which we and our competitors typically insure may be limited. In addition, the insurance we are able to obtain may have higher deductibles, higher premiums and more restrictive policy terms, which could adversely affect our financial condition, results of operations and cash flows.

Operating events affecting public safety and the reliability of our natural gas and electric distribution and transmission systems could adversely affect our operations and increase our costs.

Our natural gas and electric operations are exposed to operational events and risks, such as major leaks, outages, mechanical failures and breakdown, operations below the expected level of performance or efficiency, and accidents that could affect public safety and the reliability of our distribution and transmission systems, significantly increase costs and cause loss of customer confidence. If we are unable to recover all or some of these costs from insurance and/or customers through the regulatory process, our financial condition, results of operations and cash flows could be adversely affected.

A security breach disrupting our operating systems and facilities or exposing confidential information may adversely affect our reputation, disrupt our operations and increase our costs.

The cybersecurity risks associated with the protection of our infrastructure and facilities is evolving and increasingly complex. We continue to heavily rely on technological tools that support our business operations and corporate functions while enhancing our security. There are various risks associated with our information technology infrastructure, including hardware and software failure, communications failure, data distortion or destruction, unauthorized access to data, misuse of proprietary or confidential data, unauthorized control through electronic means, cyber-attacks, cyber-terrorism, data breaches, programming mistakes, and other inadvertent errors or deliberate human acts. Further, the U.S. government has issued public warnings that indicate energy assets might be specific targets of cybersecurity threats and/or attacks.

Many of our employees, service providers, and vendors have been working, and continue to work, from remote locations, where cybersecurity protections could be limited and cybersecurity procedures and safeguards could be less effective. As such, we could be subject to a higher risk of cybersecurity breaches than ever before. Therefore, we could be required to expend significant resources to continue to modify or enhance our procedures and controls or to upgrade our digital and operational systems, related infrastructure, technologies and network security.

Any such failure, attack, or security breach could adversely impact our ability to safely and reliably deliver services to our customers through our transmission, distribution, and generation systems, subjecting us to reputational and other harm, and subject us to legal and regulatory proceedings and claims and demands from third parties, any of which could adversely affect our business, our earnings, results of operation and financial condition. In addition, the protection of customer, employee and Company data is crucial to our operational security. A breach or breakdown of our systems that results in the unauthorized release of individually identifiable customer information or other sensitive data could have an adverse effect on our reputation, results of operations and financial condition and could also materially increase our costs of maintaining our system and protecting it against future breakdowns or breaches. We take reasonable precautions to safeguard our information systems from cyber-attacks and security breaches; however, there is no guarantee that the procedures implemented to protect against unauthorized access to our information systems are adequate to safeguard against all attacks and breaches. We also cannot assure that any redundancies built into our networks and technology, or the procedures we have implemented to protect against cyber-attacks and other unauthorized access to secured data, are adequate to safeguard against all failures of technology or security breaches.

The Company's business, results of operations, financial condition and cash flows could be adversely affected by interruption of the Company's information technology or network systems as well as the Company's implementation of its technology roadmap.

Currently, we rely on centralized and local information technology networks and systems, some of which are managed or accessible by third parties, to process, transmit and store electronic information, and to otherwise manage or support our business. Additionally, the Company collects and stores certain data, including proprietary business information, and has access to confidential or personal information that is subject to privacy and security laws, regulations and customer-imposed controls. The processing and storage of personal information is increasingly subject to privacy and data security regulations. The interpretation and application of data protection laws in the U.S. are continuing to evolve and may be different across jurisdictions. Violations of these laws could result in criminal or civil sanctions and even the mere allegation of such violations, could harm the Company's reputation.

Information technology system and/or network disruptions, whether caused by acts of sabotage, employee error, malfeasance or otherwise, could have an adverse impact on the Company's operations as well as the operations of the Company's customers and suppliers. As a result, the Company may be subject to legal claims or regulatory proceedings which could result in liability or penalties under privacy laws, disruption in the Company's operations, and damage to the Company's reputation, adversely affecting the Company's business, results of operations, financial condition and cash flows.

The Company is also implementing a technology roadmap that will significantly advance our technological capabilities. The implementation of new software in multiple phases is a complex process that involves several risks. Some of the common risks include:

- Expectations of what the software can do is not achieved and requires additional spending, resources and time;
- Inadequate planning, including changes in implementation plans, can lead to delays, cost overruns, and poor outcomes;
- Ensuring continued team engagement is critical as technology and systems projects are significant and involve many resources within the Company as well as the use of various third parties;
- Implementing new software can expose the organization to new security risks; and
- Integrating new software with existing systems can be challenging, as a result of compatibility issues, data migration and system downtime.

Concerns relating to the responsible use of new and evolving technologies, such as artificial intelligence (AI), may result in reputational or financial harm and liability.

While providing significant benefits, AI poses emerging legal, social, and ethical issues and presents risks and challenges. If we utilize AI solutions that have unintended consequences or may be deemed controversial, or if we are unable to develop effective internal policies and frameworks relating to the responsible use of AI, we may experience brand or reputational harm, competitive harm or legal liability. Complying with regulations related to AI could increase our cost of doing business, may change the way that we operate in certain jurisdictions, or may impede our ability to offer services in certain jurisdictions if we are unable to comply with regulations.

Failure to attract and retain an appropriately qualified employee workforce could adversely affect operations.

Our ability to implement our business strategy and serve our customers depends upon our continuing ability to attract, develop and retain talented professionals and a technically skilled workforce in a manner competitive with current market conditions, and transfer the knowledge and expertise of our workforce to new employees as our existing employees retire. Failure to hire and adequately train replacement employees, including the transfer of significant internal historical knowledge and expertise to new employees, or the future availability and cost of contract labor could adversely affect our ability to manage and operate our business. If we were unable to hire, train and retain appropriately qualified personnel, our results of operations could be adversely affected.

A strike, work stoppage or a labor dispute could adversely affect our operations.

We are party to collective bargaining agreements with labor unions at some of our Florida operations. A strike, work stoppage or a labor dispute with a union or employees represented by a union could cause interruption to our operations and our results could be adversely affected.

Our businesses are capital-intensive, and the increased costs and/or delays of capital projects may adversely affect our future earnings.

Our businesses are capital-intensive and require significant investments in ongoing infrastructure projects. These projects are subject to state and federal regulatory oversight and require certain property rights, such as easements and rights-of-way from public and private owners, as well as regulatory approvals, including environmental and other permits and licenses. There is no assurance that we will be able to obtain the necessary property rights, permits and licenses and approvals in a timely and cost-efficient manner, or at all, which may result in the delay or failure to complete a project. In addition, the availability of the necessary materials and qualified vendors could also impact our ability to complete such projects on a timely basis and manage the overall costs. Failure to complete any pending or future infrastructure projects could have a material adverse impact on our financial condition, results of operations and cash flows. Where we are able to successfully complete pending or future infrastructure projects, our revenues may not increase immediately upon the expenditure of funds on a particular project or as anticipated over the life of the project. As a result, there is the risk that new and expanded infrastructure may not achieve our expected investment returns, which could have a material adverse effect on our business, financial condition and results of operations.

Our regulated energy business may be at risk if franchise agreements are not renewed, or new franchise agreements are not obtained, which could adversely affect our future results or operating cash flows and financial condition.

Our regulated natural gas and electric distribution operations hold franchises in each of the incorporated municipalities that require franchise agreements in order to provide natural gas and electricity. Ongoing financial results would be adversely impacted in the event that franchise agreements were not renewed. If we are unable to obtain franchise agreements for new service areas, growth in our future earnings could be negatively impacted.

Slowdowns in customer growth may adversely affect earnings and cash flows.

Our ability to increase revenues in our natural gas, propane and electric distribution businesses is dependent upon growth in the residential construction market, adding new commercial and industrial customers and conversion of customers to natural gas, electricity or propane from other energy sources. Slowdowns in growth may adversely affect our financial condition, results of operations and cash flows.

J654

Energy conservation could lower energy consumption, which would adversely affect our earnings.

Federal and state legislative and regulatory initiatives to promote energy efficiency, conservation and the use of alternative energy sources could lower consumption of natural gas and propane by our customers. For example, on August 16, 2022, the Inflation Reduction Act of 2022 was signed into law, with hundreds of billions of dollars in incentives for the development of renewable energy, clean hydrogen, and clean fuels, amongst other provisions. These incentives could further accelerate the transition of the U.S. economy away from the use of fossil fuels towards lower- or zero-carbon emissions alternatives and impact demand for our products and services. In addition, increasing attention to climate change, societal expectations on companies to address climate change, investor and societal expectations including mandatory climate related disclosures, and the aforementioned demand for alternative forms of energy, may result in increased costs and reduced demand for our products and services. While we cannot predict the ultimate effect that the development of alternative energy sources and related laws might have on our operations, we may be subject to reduced profits, increased investigations and litigation against us, and negative impacts on our stock price and access to capital markets.

In addition, higher costs of natural gas, propane and electricity may cause customers to conserve fuel. To the extent recovery through customer rates of higher costs or lower consumption from energy efficiency or conservation is not allowed, and our propane retail prices cannot be increased due to market conditions, our financial condition, results of operations and cash flows could be adversely affected.

Commodity price increases may adversely affect the operating costs and competitive positions of our natural gas, electric and propane operations, which may adversely affect our results of operations, cash flows and financial condition.

Natural Gas and Electricity. Higher natural gas prices can significantly increase the cost of gas billed to our natural gas customers. Increases in the cost of natural gas and other fuels used to generate electricity can significantly increase the cost of electricity billed to our electric customers. Damage to the production or transportation facilities of our suppliers, which decreases their supply of natural gas and electricity, could result in increased supply costs and higher prices for our customers. Such cost increases generally have no immediate effect on our revenues and net income because of our regulated fuel cost recovery mechanisms. However, our net income may be reduced by higher expenses that we may incur for uncollectible customer accounts and by lower volumes of natural gas and electricity deliveries when customers reduce their consumption. Therefore, increases in the price of natural gas and other fuels can adversely affect our financial condition, results of operations and cash flows, as well as the competitiveness of natural gas and electricity as energy sources.

Propane. Propane costs are subject to changes as a result of product supply or other market conditions, including weather, economic and political factors affecting crude oil and natural gas supply or pricing. For example, weather conditions could damage production or transportation facilities, which could result in decreased supplies of propane, increased supply costs and higher prices for customers. Such increases in costs can occur rapidly and can negatively affect profitability. There is no assurance that we will be able to pass on propane cost increases fully or immediately, particularly when propane costs increase rapidly. Therefore, average retail sales prices can vary significantly from year-to-year as product costs fluctuate in response to propane, fuel oil, crude oil and natural gas commodity market conditions. In addition, in periods of sustained higher commodity prices, declines in retail sales volumes due to reduced consumption and increased amounts of uncollectible accounts may adversely affect net income.

Refer to *Item 7A*, *Quantitative and Qualitative Disclosures about Market Risk* for additional information.

Our use of derivative instruments may adversely affect our results of operations.

Fluctuating commodity prices may affect our earnings and financing costs because our propane operations use derivative instruments, including forwards, futures, swaps, puts, and calls, to hedge price risk. While we have risk management policies and operating procedures in place to control our exposure to risk, if we purchase derivative instruments that are not properly matched to our exposure, our results of operations, cash flows, and financial condition may be adversely affected. In addition, fluctuations in market prices could result in significant unrealized gains or losses, which could require margins to be posted on unsettled positions and impact our financial position, results of operations and cash flows.

A substantial disruption or lack of growth in interstate natural gas pipeline transmission and storage capacity or electric transmission capacity may impair our ability to meet customers' existing and future requirements.

In order to meet existing and future customer demands for natural gas and electricity, we must acquire sufficient supplies of natural gas and electricity, interstate pipeline transmission and storage capacity, and electric transmission capacity to serve such requirements. We must contract for reliable and adequate upstream transmission capacity for our distribution systems while considering the dynamics of the interstate pipeline and storage and electric transmission markets, our own on-system resources, as well as the characteristics of our markets. Our financial condition and results of operations would be materially and adversely affected if the future availability of these capacities were insufficient to meet future customer demands for natural gas and electricity. Currently, our natural gas operations in Florida rely primarily on two pipeline systems, FGT and Peninsula Pipeline (our intrastate pipeline subsidiary), for most of their natural gas supply and transmission. Our Florida electric operation secures electricity from external parties. Any continued interruption of service from these suppliers could adversely affect our ability to meet the demands of our customers, which could negatively impact our financial condition, results of operations and cash flows.

Our ability to grow our businesses could be adversely affected if we are not successful in making acquisitions or integrating the acquisitions we have completed.

One of our strategies is to grow through acquisitions of complementary businesses. On November 30, 2023, we completed the acquisition of FCG, a regulated natural gas distribution utility serving approximately 120,000 residential and commercial natural gas customers in Florida, for $923.4 million in cash, pursuant to the previously disclosed stock purchase agreement with Florida Power & Light Company. Our acquisitions, including FCG as well as future acquisitions, involve a number of risks including, but not limited to, the following:

- We may fail to realize the benefits and growth prospects anticipated as a result of the acquisition;
- We may not identify all material facts, issues and/or liabilities in due diligence; accurately anticipate required capital expenditures; or design and implement an effective internal control environment with respect to acquired businesses;
- We may experience difficulty in integrating the technology, systems, policies, processes or operations and retaining the employees, including key personnel of the acquired business;
- The historical financial results of acquisitions may not be representative of our future financial condition, results of operations and cash flows, and may not deliver the expected strategic and operational benefits;
- An acquisition may divert management's attention to integration activities or disrupt ongoing operations; and
- We may overpay for assets, which could result in the recording of excess goodwill and other intangible assets at values that ultimately may be subject to impairment charges.

These factors, amongst others, could impact our ability to successfully grow our business which could have a material adverse effect on our financial condition, results of operations and cash flows.

An impairment of our assets including long-lived assets, goodwill and other intangible assets, could negatively impact our financial condition and results of operations.

In accordance with GAAP, goodwill, intangibles, and other long-lived assets are tested for impairment annually or whenever events or changes in circumstances indicate impairment may have occurred. The testing of assets for impairment requires us to make significant estimates about our future performance and cash flows, as well as other assumptions. These values may be impacted by significant negative industry or economic trends, changes in technology, regulatory or industry conditions, disruptions to our business, inability to effectively integrate acquired businesses, unexpected significant change or planned changes in use of our assets, changes in the structure of our business, divestitures, market capitalization declines or changes in economic conditions or interest rates. If the testing performed indicates that impairment has occurred, we are required to record an impairment charge for the difference between the carrying value of the applicable asset and the implied fair value in the period the determination is made. Any changes in key assumptions, or actual performance compared with key assumptions, about our business and its future prospects could affect the fair value of one or more of our assets, which may result in an impairment charge and could negatively affect our financial condition and results of operations.

REGULATORY, LEGAL AND ENVIRONMENTAL RISKS

Regulation of our businesses, including changes in the regulatory environment, may adversely affect our financial condition, results of operations and cash flows.

The Delaware, Maryland, Ohio and Florida PSCs regulate our utility operations in those states. Eastern Shore is regulated by the FERC. The PSCs and the FERC set the rates that we can charge customers for services subject to their regulatory jurisdiction. Our ability to obtain timely rate increases and rate supplements to maintain current rates of return depends on regulatory approvals, and there can be no assurance that our regulated operations will be able to obtain such approvals or maintain currently authorized rates of return. When earnings from our regulated utilities exceed the authorized rate of return, the respective regulatory authority may require us to reduce our rates charged to customers in the future.

We may face certain regulatory and financial risks related to pipeline safety legislation.

We are subject to a number of legislative proposals at the federal and state level to implement increased oversight over natural gas pipeline operations and facilities to inspect pipeline facilities, upgrade pipeline facilities, or control the impact of a breach of such facilities. Additional operating expenses and capital expenditures may be necessary to remain in compliance. If new legislation is adopted and we incur additional expenses and expenditures, our financial condition, results of operations and cash flows could be adversely affected, particularly if we are not authorized through the regulatory process to recover from customers some or all of these costs and earn at an authorized rate of return.

Pipeline integrity programs and repairs may impose significant costs and liabilities on the Company.

The PHMSA requires pipeline operators to develop integrity management programs to comprehensively evaluate their pipelines and to take additional measures to protect pipeline segments located in areas where a leak or rupture could potentially do the most harm. The PHMSA constantly updates its regulations to ensure the highest levels of pipeline safety. As the operator of pipelines, we are required to: perform ongoing assessments of pipeline integrity; identify and characterize applicable threats to pipelines; improve data collection, integration and analysis; repair and remediate the pipelines as necessary; and implement preventative and mitigating actions. These new and any future regulations adopted by the PHMSA may impose more stringent requirements applicable to integrity management programs and other pipeline safety aspects of our operations, which could cause us to incur increased capital and operating costs and operational delays. Moreover, should we fail to comply with the PHMSA rules and regulations, we could be subject to significant penalties and fines which may adversely affect our financial condition, results of operations and cash flows.

We are subject to operating and litigation risks that may not be fully covered by insurance.

Our operations are subject to the operating hazards and risks normally incidental to handling, storing, transporting, transmitting and delivering natural gas, electricity and propane to end users. From time to time, we are a defendant in legal proceedings arising in the ordinary course of business. We maintain insurance coverage for our general liabilities in the amount of $52 million, which we believe is reasonable and prudent. However, there can be no assurance that such insurance will be adequate to protect us from all material expenses related to potential future claims for personal injury and property damage or that such levels of insurance will be available in the future at economical prices.

Costs of compliance with environmental laws may be significant.

We are subject to federal, state and local laws and regulations governing environmental quality and pollution control. These evolving laws and regulations may require expenditures over a long period of time to control environmental effects at our current and former operating sites, especially former MGP sites. To date, we have been able to recover, through regulatory rate mechanisms, the costs associated with the remediation of former MGP sites. However, there is no guarantee that we will be able to recover future remediation costs in the same manner or at all. A change in our approved rate mechanisms for recovery of environmental remediation costs at former MGP sites could adversely affect our financial condition, results of operations and cash flows.

Further, existing environmental laws and regulations may be revised, or new laws and regulations seeking to protect the environment may be adopted and be applicable to us. Revised or additional laws and regulations could result in additional operating restrictions on our facilities or increased compliance costs, which may not be fully recoverable. Any such increase in compliance costs could adversely affect our financial condition, results of operations and cash flows. Compliance with these legal obligations requires us to commit capital. If we fail to comply with environmental laws and regulations, even if such failure is caused by factors beyond our control, we may be assessed administrative, civil, or criminal penalties and fines, imposed with investigatory and remedial obligations, or issued injunctions all of which could impact our financial condition, results of operations and cash flows. See *Item 8, Financial Statements and Supplementary Data* (see Note 19*, Environmental Commitments and Contingencies,* in the consolidated financial statements).

Unanticipated changes in our tax provisions or exposure to additional tax liabilities could affect our profitability and cash flow.

We are subject to income and other taxes in the U.S. and the states in which we operate. Changes in applicable state or U.S. tax laws and regulations, or their interpretation and application, including the possibility of retroactive effect, could affect our tax expense and profitability. In addition, the final determination of any tax audits or related litigation could be materially different from our historical income tax provisions and accruals. Changes in our tax provision or an increase in our tax liabilities, due to changes in applicable law and regulations, the interpretation or application thereof, future changes in the tax rate or a final determination of tax audits or litigation, could have a material adverse effect on our financial position, results of operations and cash flows.

Our business may be subject in the future to additional regulatory and financial risks associated with global warming and climate change.

There have been a number of federal and state legislative and regulatory initiatives proposed in recent years in an attempt to control or limit the effects of global warming and overall climate change, including greenhouse gas emissions. The direction of future U.S. climate change regulation is difficult to predict given the potential for policy changes under different Presidential administrations and Congressional leadership. The Environmental Protection Agency, or other Federal agencies, may or may not continue developing regulations to reduce greenhouse gas emissions. Even if federal efforts in this area slow, states, cities and local jurisdictions may continue pursuing climate regulations. Any laws or regulations that may be adopted to restrict or reduce emissions of greenhouse gases could require us to incur additional operating costs, such as costs to purchase and operate emissions controls, to obtain emission allowances or to pay emission taxes, and could reduce demand for our energy delivery services. Federal, state and local legislative initiatives to implement renewable portfolio standards or to further subsidize the cost of solar, wind and other renewable power sources may change the demand for natural gas. We cannot predict the potential impact that such laws or regulations, if adopted, may have on our future business, financial condition or financial results.

Climate changes may impact the demand for our services in the future and could result in more frequent and more severe weather events, which ultimately could adversely affect our financial results.

Significant climate change creates physical and financial risks for us. Our customers' energy needs vary with weather conditions, primarily temperature and humidity. For residential customers, heating and cooling represent their largest energy use. To the extent weather conditions may be affected by climate change, customers' energy use could increase or decrease depending on the duration and magnitude of any changes. To the extent that climate change adversely impacts the economic health or weather conditions of our service territories directly, it could adversely impact customer demand or our customers' ability to pay. Changes in energy use due to weather variations may affect our financial condition through volatility and/or decreased revenues and cash flows. Extreme weather conditions require more system backups and can increase costs and system stresses, including service interruptions. Severe weather impacts our operating territories primarily through thunderstorms, tornadoes, hurricanes, and snow or ice storms. Weather conditions outside of our operating territories could also have an impact on our revenues and cash flows by affecting natural gas prices. To the extent the frequency of extreme weather events increases, this could increase our costs of providing services. We may not be able to pass on the higher costs to our customers or recover all the costs related to mitigating these physical risks. To the extent financial markets view climate change and emissions of greenhouse gases as a financial risk, this could adversely affect our ability to access capital markets or cause us to receive less favorable terms and conditions in future financings. Our business could be affected by the potential for investigations and lawsuits related to or against greenhouse gas emitters based on the claimed connection between greenhouse gas emissions and climate change, which could impact adversely our business, results of operations and cash flows.

Our certificate of incorporation and bylaws may delay or prevent a transaction that stockholders would view as favorable.

Our certificate of incorporation and bylaws, as well as Delaware law, contain provisions that could delay, defer or prevent an unsolicited change in control of Chesapeake Utilities, which may negatively affect the market price of our common stock or the ability of stockholders to participate in a transaction in which they might otherwise receive a premium for their shares over the then current market price. These provisions may also prevent changes in management. In addition, our Board of Directors is authorized to issue preferred stock without stockholder approval on such terms as our Board of Directors may determine. Our common stockholders will be subject to, and may be negatively affected by, the rights of any preferred stock that may be issued in the future.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 1C. CYBERSECURITY

We recognize the importance of assessing, identifying, and managing material risks associated with cybersecurity threats, as such term is defined in Item 106(a) of Regulation S-K. We face a multitude of increasing cybersecurity threats, including those that target the Nation's critical infrastructure sectors. Reliable service and operational continuity are critical to our success and the welfare of those we serve, including our ability to safely and reliably deliver energy to our customers through our transmission, distribution, and generation systems. We are committed to maintaining robust governance and oversight of these risks and to investing in the implementation of mechanisms, controls, technologies, and processes designed to help us assess, identify, and manage these risks in an everchanging landscape.

To mitigate the threat to our business, we take a comprehensive, cross-functional approach to cybersecurity risk management. Our management team is actively involved in the oversight and implementation of our risk management program, of which cybersecurity represents an important component. At least annually, we conduct a cybersecurity risk assessment that evaluates information from internal stakeholders and external sources. The results of the assessment inform our alignment and prioritization of initiatives to enhance our security controls. As described in more detail below, we have established policies, standards, processes and practices for assessing, identifying, and managing material risks from cybersecurity threats which follow frameworks established by the National Institute of Standards and Technology (NIST). These include, among other things: security awareness training for employees; mechanisms to detect and monitor unusual network activity; services that identify cybersecurity threats; conducting scans of the threat environment; evaluating our industry's risk profile; utilizing internal and external audits; conducting threat and vulnerability assessments; and containment and incident response tools. We also actively engage with industry groups for benchmarking and awareness of best practices. We maintain controls and procedures that are designed to ensure prompt escalation of certain cybersecurity incidents so that decisions regarding public disclosure and reporting of such incidents can be made in a timely manner.

Our approach to cybersecurity risk management includes the following key elements:

- Multi-Layered Defense and Continuous Monitoring: We work to protect our business from cybersecurity threats through multi-layered defenses and apply lessons learned from our defense and monitoring efforts to help prevent future attacks. We utilize data analytics to detect anomalies and review trends in the data. We regularly assess and deploy technical safeguards designed to protect our information systems from cybersecurity threats. Such safeguards are regularly evaluated and enhanced based on vulnerability assessments, cybersecurity threat intelligence and incident response experience.

- Information Sharing and Collaboration: We share and receive threat intelligence and best practices with industry peers, government agencies, information sharing and analysis centers, industry trade organizations, and cybersecurity forums. These relationships enable the rapid sharing of information around threat and vulnerability mitigation.

- Third-Party Risk Assessments: We engage third-party services to conduct assessments of our security controls, whether through penetration testing, independent audits or consulting on best practices to address new challenges. These assessments include testing both the design and operational effectiveness of security controls.

- Companywide Policies and Procedures: We have companywide cybersecurity policies and procedures, such as encryption standards, antivirus protection, remote access protocols, multi-factor authentication, protection of confidential information, and the use of the internet, social media, email, and wireless devices. These policies go through an internal review process and are approved by the appropriate members of management.

- Training and Awareness: We provide awareness training to our employees to help identify, avoid and mitigate cybersecurity threats. Our employees routinely participate in phishing campaigns, education that reinforces compliance with our policies, standards and practices, and other awareness training. We also periodically perform simulations and other exercises with management and incorporate external resources and advisors as needed. Our team of cybersecurity professionals collaborate with stakeholders across our business units to further analyze the risk to the Company, and form detection, mitigation and remediation strategies.

- Supplier Engagement: We work collectively with our suppliers to support cybersecurity resiliency in our supply chain. The Company uses a variety of processes to address third-party cybersecurity threats, including reviewing the cybersecurity practices of such provider(s), contractually imposing obligations on the provider(s), notifications in the event of any known or suspected cyber incident, conducting security assessments, and periodic reassessments during the course of the Company's engagement with such provider(s).

As of the date of this Form 10-K, there have not been any cybersecurity incidents that have materially affected our business strategy, results of operations or financial condition. There can be no guarantee that our policies and procedures will be followed or, if followed, will be effective. For more information regarding the risks we face from cybersecurity threats, please see *Item 1A*, *Risk Factors*, which should be read in conjunction with this Item 1C.

Cybersecurity Risk Governance and Oversight

The Company's Board, in conjunction with its Audit Committee, oversees management's approach to cybersecurity risk and its alignment with the Company's risk management program. The Board and Audit Committee receive reports from management about the prevention, detection, mitigation, and remediation of cybersecurity incidents, including material security risks and vulnerabilities. Additionally, management provides the Audit Committee with updates on cybersecurity risk assessments, risk mitigation strategies, and relevant external and industry cybersecurity matters. The Company's Chief Information Officer ("CIO") is responsible for developing and implementing our information security program and reporting on cybersecurity matters to the Board and Audit Committee. The Company's CIO has 25 years of experience in the information technology industry. The CIO reports to the Chief Executive Officer and is supported by a dedicated cybersecurity team within our information systems department, as well as a multidisciplinary incident response team. Employees across the organization also have a role in our cybersecurity defenses, which we believe improves our cybersecurity posture.

In addition, the Company's Risk Management Committee ("RMC") evaluates risks relating to cybersecurity, among other significant risks, and applicable mitigation plans to address such risks. The RMC is comprised of members of the executive leadership team. The RMC meets monthly and receives updates from the CIO or a member of our cybersecurity team. The RMC reviews security performance metrics, global security risks, security enhancements, and updates on our security posture.

ITEM 2. Properties.

Offices and other operational facilities

We own or lease offices and other operational facilities in our service territories located in Delaware, Maryland, Virginia. North Carolina, South Carolina, Florida. Pennsylvania and Ohio.

Regulated Energy Segment

The following table presents a summary of miles of assets operated by our natural gas distribution, natural gas transmission and electric business units as of December 31, 2023:

Operations	Miles
Natural Gas Distribution	
Delmarva Natural Gas (Natural gas pipelines)	2,075
Delmarva Natural Gas (Underground propane pipelines)	17
FPU (Natural gas pipelines)	3,154
Florida City Gas (Natural gas pipelines)	3,860
Natural Gas Transmission	
Eastern Shore	517
Florida City Gas	79
Peninsula Pipeline	177
Aspire Energy Express [1]	—
Electric Distribution	
FPU	906
Total	10,785

[1] Aspire Energy Express had less than 1 mile of natural gas pipeline at December 31, 2023

Peninsula Pipeline also has a 50 percent jointly owned intrastate transmission pipeline with Seacoast Gas Transmission. LLC ("Seacoast Gas Transmission") in Nassau County, Florida. The 26-mile pipeline serves demand in both Nassau and Duval Counties.

Unregulated Energy Segment

The following table presents propane storage capacity, miles of underground distribution mains and transmission for our Unregulated Energy Segment operations as of December 31, 2023:

Operations	Gallons or miles
Propane distribution	
Propane storage capacity (gallons in millions)	8.9
Underground propane distribution mains (miles)	153
Unregulated Energy Transmission and gathering (Aspire Energy)	
Natural gas pipelines (miles)	2,800

ITEM 3. Legal Proceedings.

See Note 20, *Other Commitments and Contingencies* in the Consolidated Financial Statements, which is incorporated into Item 3 by reference.

ITEM 4. Mine Safety Disclosures.

Not applicable.

PART II

ITEM 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Common Stock Dividends and Stockholder Information:

Chesapeake Utilities common stock is traded on the New York Stock Exchange ("NYSE") under the ticker symbol CPK. As of February 16, 2024, we had 1,974 holders of record of our common stock. We declared quarterly cash dividends on our common stock totaling $2.305 per share in 2023 and $2.085 per share in 2022, and have paid a cash dividend to holders of our common stock for 63 consecutive years. Future dividend payments and amounts are at the discretion of the Board of Directors and will depend on our financial condition. results of operations, capital requirements, and other factors.

Indentures to our long-term debt contain various restrictions which limit our ability to pay dividends. Refer to *Item 8, Financial Statements and Supplementary Data* (see Note 12, *Long-Term Debt*, in the consolidated financial statements) for additional information.

J661

Purchases of Equity Securities by the Issuer

The following table sets forth information on purchases by us or on our behalf of shares of our common stock during the quarter ended December 31, 2023:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs [2]	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs [2]
October 1, 2023 through October 31, 2023 [1]	**663**	$ 95.19	—	
November 1, 2023 through November 30, 2023	—	—	—	—
December 1, 2023 through December 31, 2023	—	—	—	—
Total	663	$ 95.19	—	—

[1] In October 2023, we purchased 663 shares of common stock on the open market for the purpose of reinvesting the dividend on shares held in the Rabbi Trust accounts under the Non-Qualified Deferred Compensation Plan. The Non-Qualified Deferred Compensation Plan is discussed in detail in *Item 8, Financial Statements and Supplementary Data* (see Note 16, *Employee Benefit Plans*, in the consolidated financial statements).
[2] Except for the purpose described in footnote [1], we have no publicly announced plans or programs to repurchase our shares.

Information on certain of our equity compensation plans, for which shares of our common stock are authorized for issuance, is included in the section of our Proxy Statement captioned "Equity Compensation Plan Information" and is incorporated herein by reference.

Common Stock Performance Graph

The stock performance graph and table below compares cumulative total stockholder return on our common stock during the five fiscal years ended December 31, 2023, with the cumulative total stockholder return of the Standard & Poor's 500 Index and the cumulative total stockholder return of select peers, which include the following companies: Atmos Energy Corporation; Black Hills Corporation; New Jersey Resources Corporation; NiSource; Northwest Natural Gas Company; Northwestern Corporation; ONE Gas, Inc.; RGC Resources, Inc.; Spire, Inc.; and Unitil Corporation.

The comparison assumes $100 was invested on December 31, 2018 in our common stock and in each of the foregoing indices and assumes reinvested dividends. The comparisons in the graph below are based on historical data and are not intended to forecast the possible future performance of our common stock.

	2018	2019	2020	2021	2022	2023
Chesapeake Utilities	$ 100	$ 120	$ 138	$ 189	$ 156	$ 142
Industry Index	$ 100	$ 119	$ 99	$ 114	$ 122	$ 121
S&P 500 Index	$ 100	$ 131	$ 156	$ 200	$ 164	$ 207

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This section provides management's discussion of Chesapeake Utilities and its consolidated subsidiaries, with specific information on results of operations, liquidity and capital resources, as well as discussion of how certain accounting principles affect our financial statements. It includes management's interpretation of our financial results and our operating segments, the factors affecting these results, the major factors expected to affect future operating results as well as investment and financing plans. This discussion should be read in conjunction with our consolidated financial statements and notes thereto in *Item 8, Financial Statements and Supplementary Data*.

Several factors exist that could influence our future financial performance, some of which are described in Item 1A*, Risk Factors*. They should be considered in connection with forward-looking statements contained in this Annual Report, or otherwise made by or on behalf of us, since these factors could cause actual results and conditions to differ materially from those set out in such forward-looking statements.

Earnings per share information is presented on a diluted basis, unless otherwise noted.

Acquisition of FCG

On November 30, 2023, we completed the acquisition of FCG for $923.4 million in cash, including working capital adjustments as defined in the agreement, pursuant to the previously disclosed stock purchase agreement with Florida Power & Light Company. Upon completion of the acquisition, FCG became a wholly-owned subsidiary of the Company and is included within our Regulated Energy segment. FCG serves approximately 120,000 residential and commercial natural gas customers across eight counties in Florida, including Miami-Dade, Broward, Brevard, Palm Beach, Hendry, Martin, St. Lucie and Indian River. Its natural gas system includes approximately 3,800 miles of distribution main and 80 miles of transmission pipe. Results for FCG are included within our consolidated results from the acquisition date.

In June 2023, FCG received approval from the Florida PSC for a $23.3 million total increase in base revenue in connection with its May 2022 rate case filing. The new rates, which became effective as of May 1, 2023, included the transfer of its SAFE program provisions from a rider clause to base rates, an increase in rates associated with a liquefied natural gas facility, and approval of FCG's proposed reserve surplus amortization mechanism ("RSAM") with a $25.0 million reserve amount. The RSAM is recorded as either an increase or decrease to accrued removal costs on the balance sheet, with a corresponding increase or decrease to depreciation and amortization expense.

The impact of FCG's results from the acquisition date and effects on our liquidity are discussed further below and throughout Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

Non-GAAP Financial Measures

This document, including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

We calculate Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. We calculate Adjusted Net Income and Adjusted EPS by deducting non-recurring costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. We believe that these non-GAAP financial measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit's and the overall Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP financial measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for the years ended December 31, 2023, 2022 and 2021:

Adjusted Gross Margin

	For the Year Ended December 31, 2023			
(in thousands)	Regulated Energy	Unregulated Energy	Other and Eliminations	Total
Operating Revenues	$ 473,595	$ 223,148	$ (26,139)	$ 670,604
Cost of Sales:				
Natural gas, propane and electric costs	(140,008)	(102,492)	26,019	(216,481)

Operations & maintenance expenses (1)	(27,485)	(31,507)	343	(58,649)
Gross Margin (GAAP)	257,940	71,802	231	329,973
Operations & maintenance expenses (1)	27,485	31,507	(343)	58,649
Depreciation & amortization	48,162	17,347	(8)	65,501
Adjusted Gross Margin (Non-GAAP)	$ 333,587	$ 120,656	$ (120)	$ 454,123

	For the Year Ended December 31, 2022			
(in thousands)	Regulated Energy	Unregulated Energy	Other and Eliminations	Total
Operating Revenues	$ 429,424	$ 280,750	$ (29,470)	$ 680,704
Cost of Sales:				
Natural gas, propane and electric costs	(127,172)	(162,683)	29,349	(260,506)
Depreciation & amortization	(52,707)	(16.257)	(9)	(68,973)
Operations & maintenance expenses (1)	(35,472)	(29,825)	9	(65,288)
Gross Margin (GAAP)	214,073	71,985	(121)	285,937
Operations & maintenance expenses (1)	35,472	29,825	(9)	65,288
Depreciation & amortization	52,707	16,257	9	68,973
Adjusted Gross Margin (Non-GAAP)	$ 302,252	$ 118,067	$ (121)	$ 420,198

For the Year Ended December 31, 2021

(in thousands)	Regulated Energy	Unregulated Energy	Other and Eliminations	Total
Operating Revenues	$ **383,920**	$ **206,869**	$ **(20,821)**	$ **569,968**
Cost of Sales:				
Natural gas, propane and electric costs	(100,737)	(106,900)	20,687	(186,950)
Depreciation & amortization	(48,748)	(13,869)	(44)	(62,661)
Operations & maintenance expenses (1)	(32,780)	(24,123)	179	(56,724)
Gross Margin (GAAP)	**201,655**	**61,977**	**1**	**263,633**
Operations & maintenance expenses (1)	32,780	24,123	(179)	56,724
Depreciation & amortization	48,748	13,869	44	62,661
Adjusted Gross Margin (Non-GAAP)	$ **283,183**	$ **99,969**	$ **(134)**	$ **383,018**

(1) Operations & maintenance expenses within the Consolidated Statements of Income are presented in accordance with regulatory requirements and to provide comparability within the industry Operations & maintenance expenses which are deemed to be directly attributable to revenue producing activities have been separately presented above in order to calculate Gross Margin as defined under U S GAAP

2023 to 2022 Gross Margin (GAAP) Variance – Regulated Energy

Gross Margin (GAAP) for the Regulated Energy segment for 2023 was $257.9 million, an increase of $43.9 million. or 20.5 percent, compared to 2022. Higher gross margin reflects contributions from the Company's Florida Natural Gas base rate proceeding. organic growth in the Company's natural gas distribution businesses and continued pipeline expansion projects, and contributions attributable to the acquisition of FCG. These increases were partially offset by reduced customer consumption resulting from the significantly warmer temperatures in our northern service territories throughout the year and increased employee costs related to growth initiatives, the ongoing competitive labor market and higher benefits costs.

2022 to 2021 Gross Margin (GAAP) Variance – Regulated Energy

Gross Margin (GAAP) for the Regulated Energy segment for the year ended December 31, 2022 compared to 2021 is described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated herein by reference.

2023 to 2022 Gross Margin (GAAP) Variance – Unregulated Energy

Gross Margin (GAAP) for the Unregulated Energy segment for 2023 was $71.8 million. which was largely consistent with gross margin for the prior year. The effects of changes in customer consumption due primarily to significantly warmer weather in our Mid-Atlantic and North Carolina service areas throughout the year and increased operating expenses and depreciation were largely offset by increased propane margins and fees and increased gathering charges and consumption for Aspire Energy.

2022 to 2021 Gross Margin (GAAP) Variance – Unregulated Energy

Gross Margin (GAAP) for the Unregulated Energy segment for the year ended December 31, 2022 compared to 2021 is described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated herein by reference.

Adjusted Net Income and Adjusted EPS

(in thousands, except shares and per share data)	Year Ended December 31, 2023	2022	2021
Net Income (GAAP)	**$ 87,212**	$ 89,796	$ 83,466
FCG transaction-related expenses, net [1]	**10,625**	—	—
Adjusted Net Income (Non-GAAP)	**$ 97,837**	$ 89,796	$ 83,466
Weighted average common shares outstanding - diluted	**18,434,857**	17,804,294	17,633,029
Earnings Per Share - Diluted (GAAP)	**$ 4.73**	$ 5.04	$ 4.73
FCG transaction-related expenses, net [1]	**0.58**	—	—
Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 5.31**	$ 5.04	$ 4.73

[1] Transaction-related expenses for the year ended December 31, 2023 represent costs incurred attributable to the acquisition of FCG, including pretax operating expenses of $10.4 million associated with legal, consulting and audit fees and $4.1 million of interest charges related to pretax fees and expenses associated with the Bridge Facility

2023 to 2022 Net Income (GAAP) Variance

Net income (GAAP) for the year ended December 31, 2023 was $87.2 million. or $4.73 per share, compared to $89.8 million, or $5.04 per share in 2022. Net income for the year ended December 31, 2023 included $10.6 million of transaction-related expenses in connection with the FCG acquisition. Excluding these costs, net income increased by $8.0 million or 9 percent compared to the prior year.

2022 to 2021 Net Income (GAAP) Variance

Net income (GAAP) for the year ended December 31, 2022 compared to 2021 is described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated herein by reference.

	(15,245)	(11,206)	(0.62)
Interest charges	(8,494)	(6,243)	(0.34)
Change in pension expense	(1,453)	(1,068)	(0.06)
Increase in shares outstanding due to 2023 and 2022 equity offerings	—	—	(0.17)
Net other changes	1,070	1,841	0.12
Year ended December 31, 2023 Adjusted Results**	**$ 129,744**	**$ 97,837**	**$ 5.31**

* See the Major Projects and Initiatives table

** Transaction-related expenses attributable to the acquisition of FCG have been excluded from the Company's non-GAAP measures of adjusted net income and adjusted EPS. See previous tables for a reconciliation of these items against the related GAAP measures.

SUMMARY OF KEY FACTORS

Recently Completed and Ongoing Major Projects and Initiatives

We constantly pursue and develop additional projects and initiatives to serve existing and new customers, further grow our businesses and earnings, and increase shareholder value. The following table includes the major projects and initiatives recently completed and currently underway. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year. Our practice is to add new projects and initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated.

	Adjusted Gross Margin				
	Year Ended December 31,			Estimate for Calendar Year	
(in thousands)	2021	2022	2023	2024	2025

(1) Includes adjusted gross margin generated from interim services through the project in-service date in September 2023.
(2) Includes adjusted gross margin during 2023 comprised of both interim rates and permanent base rates which became effective in March 2023.
(3) Rate case application filed with the Maryland PSC in January 2024. See additional information provided below.

Pipeline Expansions

Guernsey Power Station

Guernsey Power Station and our affiliate, Aspire Energy Express, are engaged in a firm transportation capacity agreement whereby Guernsey Power Station has constructed a power generation facility and Aspire Energy Express provides firm natural gas transportation service to this facility. Guernsey Power Station commenced construction of the project in October 2019, Aspire Energy Express completed construction of the gas transmission facilities in the fourth quarter of 2021, and the facility went into service during the first quarter of 2023. The project generated additional adjusted gross margin of $0.1 million for the year ended December 31, 2023, and is expected to produce adjusted gross margin of approximately $1.5 million in 2024 and beyond.

Southern Expansion

Eastern Shore installed a new natural gas driven compressor skid unit at its existing Bridgeville, Delaware compressor station that provides 7,300 Dts of incremental firm transportation pipeline capacity. The project was placed in service in the fourth quarter of 2023 and generated adjusted gross margin of $0.6 million for the year ended December 31, 2023 and is expected to produce adjusted gross margin of approximately $2.3 million in 2024 and beyond.

Winter Haven Expansion

In May 2021, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with Florida Natural Gas for an incremental 6,800 Dts/d of firm service in the Winter Haven, Florida area. As part of this agreement, Peninsula Pipeline constructed a new interconnect with FGT and a new regulator station for Florida Natural Gas. Florida Natural Gas is using the additional firm service to support new incremental load due to growth in the area, including providing service, most immediately, to a new can manufacturing facility, as well as reliability and operational benefits to Florida Natural Gas's existing distribution system in the area. In connection with Peninsula Pipeline’s new regulator station, Florida Natural Gas also extended its distribution system to connect to the new station. This expansion was placed in service in the third quarter of 2022. The project generated additional adjusted gross margin of $0.4 million for the year ended December 31, 2023, and is expected to produce adjusted gross margin of approximately $0.6 million in 2024 and beyond.

Beachside Pipeline Expansion

In June 2021, Peninsula Pipeline and FCG entered into a Transportation Service Agreement for an incremental 10,176 Dts/d of firm service in Indian River County, Florida, to support Florida City Gas’ growth along the Indian River's barrier island. As part of this agreement, Peninsula Pipeline constructed approximately 11.3 miles of pipeline from its existing pipeline in the Sebastian, Florida, area east under the Intercoastal Waterway and southward on the barrier island. Construction was completed and the project went into service in April 2023. Subsequent to the acquisition of FCG, the agreement is now an affiliate agreement. The project generated additional adjusted gross margin of $1.8 million for the year ended December 31, 2023, and is expected to produce adjusted gross margin of approximately $2.5 million in 2024 and $2.4 million in 2025 and beyond.

North Ocean City Connector

During the second quarter of 2022, we began construction of an extension of service into North Ocean City, Maryland. Our Delaware natural gas division and Sandpiper installed approximately 5.4 miles of pipeline across southern Sussex County, Delaware to Fenwick Island, Delaware and Worcester County, Maryland. The project reinforces our existing system in Ocean City, Maryland and enables incremental growth along the pipeline. Construction of this project was completed in the second quarter of 2023. The Company filed a natural gas rate case application with the PSC for the state of Maryland in January 2024 as discussed below. Adjusted gross margin in connection with this project is contingent upon the completion of the rate case and inclusion of the project in rate base. As a result, we expect this expansion to generate annual adjusted gross margin of approximately $0.5 million beginning in 2025, with additional margin opportunities from incremental growth.

St. Cloud / Twin Lakes Expansion

In July 2022, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 2,400 Dt/day of firm service in the St. Cloud, Florida area. As part of this agreement, Peninsula Pipeline constructed a pipeline extension and regulator station for FPU. The extension supports new incremental load due to growth in the area, including providing service, most immediately, to the residential development, Twin Lakes. The expansion also improves reliability and provides operational benefits to FPU’s existing distribution system in the area, supporting future growth. This project was placed into service in July 2023 and generated additional adjusted gross margin of $0.3 million for the year ended December 31, 2023. We expect this extension to generate additional annual adjusted gross margin of approximately $0.6 million in 2024 and beyond.

Clean Energy Expansion
During the fourth quarter of 2022, Clean Energy Fuels ("Clean Energy") and Florida Natural Gas entered into a precedent agreement for firm transportation services associated with a CNG fueling station Clean Energy is constructing. We installed approximately 2.2 miles of main extension in Davenport, Florida to support the filling station which was placed into service during September 2023. Our subsidiary, Marlin Gas Services, provided interim services to Clean Energy during the construction phase of the project. The project generated additional adjusted gross margin of $0.9 million for the year ended December 31, 2023, and is expected to contribute adjusted gross margin of approximately $1.0 million in 2024 and $1.1 million in 2025 and beyond.

Wildlight Expansion
In August 2022, Peninsula Pipeline and FPU filed a joint petition with the Florida PSC for approval of its Transportation Service Agreement associated with the Wildlight planned community located in Nassau County, Florida. The project enables us to meet the significant growing demand for service in Yulee, Florida. The agreement will enable us to build the project during the construction and build-out of the community, and charge the reservation rate as each phase of the project goes into service. Construction of the pipeline facilities will occur in two separate phases. Phase one consists of three extensions with associated facilities, and a gas injection interconnect with associated facilities. Phase two will consist of two additional pipeline extensions. Various phases of the project commenced in the first quarter of 2023, with construction on the overall project continuing through 2025. The project generated additional adjusted gross margin of $0.5 million for the year ended December 31, 2023, and is expected to contribute adjusted gross margin of approximately $2.0 million in 2024 and beyond.

Lake Wales Expansion
In February 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with our Florida Natural Gas distribution business, FPU, for an additional 9,000 Dt/d of firm service in the Lake Wales, Florida area. The PSC approved the petition in April 2023. Approval of the agreement enabled Peninsula Pipeline to complete the acquisition of an existing pipeline in May 2023 that is being utilized to serve both current and new natural gas customers. The project generated additional adjusted gross margin of $0.3 million for the year ended December 31, 2023, and is expected to contribute adjusted gross margin of approximately $0.5 million in 2024 and beyond.

Newberry Expansion
In April 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 8,000 Dt/d of firm service in the Newberry, Florida area. The petition was approved by the Florida PSC in the third quarter of 2023. Peninsula Pipeline will construct a pipeline extension, which will be used by FPU to support the development of a natural gas distribution system to provide gas service to the City of Newberry. A filing to address the acquisition and conversion of propane community gas systems in Newberry was made in November 2023, and the Florida PSC is scheduled to vote on this in March 2024. The project is expected to contribute adjusted gross margin of approximately $0.9 million in 2024 and $2.6 million in 2025 and beyond.

Worcester Resiliency Upgrade
In August 2023, Eastern Shore filed an application with the FERC requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, DE and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. Eastern Shore has requested certificate authorization by December 2024, with a target in-service date by the third quarter of 2025.

East Coast Reinforcement Projects
In December 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU’s distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC is scheduled to vote on the projects in March 2024.

Central Florida Reinforcement Projects
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida. The projects are driven by the need for increased supply to communities in central Florida that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU’s distribution system in the areas of Plant City and Lake Mattie with an additional 5,000 Dts/day and 8,700 Dts/day, respectively.

CNG/RNG/LNG Transportation and Infrastructure

We have made a commitment to meet customer demand for CNG, RNG and LNG in the markets we serve. This has included making investments within Marlin Gas Services to be able to transport these products through its virtual pipeline fleet to customers. To date, we have also made an infrastructure investment in Ohio, enabling RNG to fuel a third-party landfill fleet and to transport RNG to end use customers off our pipeline system. Similarly, we announced in March 2022, the opening of a high-capacity CNG truck and tube trailer fueling station in Port Wentworth, Georgia. As one of the largest public access CNG stations on the East Coast, it will offer a RNG option to customers in the near future. We constructed the station in partnership with Atlanta Gas Light, a subsidiary of Southern Company Gas.

We are also involved in various other projects, all at various stages and all with different opportunities to participate across the energy value chain. In many of these projects, Marlin will play a key role in ensuring the RNG is transported to one of our many pipeline systems where it will be injected. We include our RNG transportation service and infrastructure related adjusted gross margin from across the organization in combination with our CNG and LNG projects.

For the year ended December 31, 2023, we generated $0.1 million in additional adjusted gross margin associated with the transportation of CNG and RNG by Marlin's virtual pipeline and Aspire Energy's Noble Road RNG pipeline. We estimate annual adjusted gross margin of approximately $12.5 million in 2024, and $14.0 million in 2025 for these transportation related services, with potential for additional growth in future years.

Full Circle Dairy

In February 2023, we announced plans to construct, own and operate a dairy manure RNG facility at Full Circle Dairy in Madison County, Florida. The project consists of a facility converting dairy manure to RNG and transportation assets to bring the gas to market. The first injection of RNG is projected to occur in the first half of 2024.

Noble Road Landfill RNG Project

In October 2021, Aspire Energy completed construction of its Noble Road Landfill RNG pipeline project, a 33.1-mile pipeline, which transports RNG generated from the Noble Road landfill to Aspire Energy’s pipeline system, displacing conventionally produced natural gas. In conjunction with this expansion, Aspire Energy also upgraded an existing compressor station and installed two new metering and regulation sites. The RNG volume is expected to represent nearly 10 percent of Aspire Energy’s gas gathering volumes.

Regulatory Initiatives

Florida GUARD Program

In February 2023, FPU filed a petition with the Florida PSC for approval of the GUARD program. GUARD is a ten-year program to enhance the safety, reliability, and accessibility of portions of our natural gas distribution system. We identified various categories of projects to be included in GUARD, which include the relocation of mains and service lines located in rear easements and other difficult to access areas to the front of the street, the replacement of problematic distribution mains, service lines, and maintenance and repair equipment and system reliability projects. In August 2023, the Florida PSC approved the GUARD program, which included $205 million of capital expenditures projected to be spent over a 10-year period. For the year ended December 31, 2023, there was $0.4 million of incremental adjusted gross margin generated pursuant to the program. The program is expected to generate $2.4 million of adjusted gross margin in 2024 and $5.1 million in 2025.

FCG SAFE Program

In June 2023, the Florida PSC issued the approval order for the continuation of the SAFE program beyond its 2025 expiration date and inclusion of 150 miles of additional mains and services located in rear property easements. The SAFE program is designed to relocate certain mains and facilities associated with rear lot easements to street front locations to improve FCG's ability to inspect and maintain the facilities and reduce opportunities for damage and theft. In the same order, the Commission approved a replacement of 160 miles of pipe that was used in the 1970s and 1980s and shown through industry research to exhibit premature failure in the form of cracking. The program includes projected capital expenditures of $205 million over a 10-year period. The program is expected to generate $2.7 million of adjusted gross margin in 2024 and $5.3 million in 2025.

Capital Cost Surcharge Programs

In December 2019, the FERC approved Eastern Shore's capital cost surcharge to become effective January 1, 2020. The surcharge, an approved item in the settlement of Eastern Shore's last general rate case, allows Eastern Shore to recover capital costs associated with mandated highway or railroad relocation projects that required the replacement of existing Eastern Shore facilities. In 2023, there was $0.8 million of incremental adjusted gross margin generated pursuant to the program. Eastern Shore expects to produce adjusted gross margin of approximately $4.0 million in 2024 and $4.4 million in 2025 from relocation projects, which is ultimately dependent upon the timing of filings and the completion of construction.

Florida Natural Gas Rate Case Proceeding

In May 2022, our legacy natural gas distribution businesses in Florida filed a consolidated natural gas rate case with the Florida PSC. The application included a request for the following: (i) permanent rate relief of approximately $24.1 million, effective January 1, 2023, (ii) a depreciation study also submitted with the filing; (iii) authorization to make certain changes to tariffs to include the consolidation of rates and rate structure across the businesses and to unify the Florida Natural Gas distribution business under FPU; (iv) authorization to retain the acquisition adjustment recorded at the time of the FPU merger in our revenue requirement: and (v) authorization to establish an environmental remediation surcharge for the purposes of addressing future expected remediation costs for FPU MGP sites. In August 2022, interim rates were approved by the Florida PSC in the amount of approximately $7.7 million on an annualized basis, effective for all meter readings in September 2022. The discovery process and related hearings were concluded during the fourth quarter of 2022 and briefs were submitted in the same quarter of 2022. In January 2023, the Florida PSC approved the application for consolidation and permanent rate relief of approximately $17.2 million on an annual basis. Actual rates in connection with the rate relief were approved by the Florida PSC in February 2023 with an effective date of March 1, 2023. For the year ended December 31, 2023, there was $15.8 million of adjusted gross margin generated pursuant to this proceeding. and it is expected to generate $17.2 million of total adjusted gross margin in 2024 and 2025.

Maryland Natural Gas Rate Case

In January 2024, our natural gas distribution businesses in Maryland. CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, we are seeking approval of the following: (i) permanent rate relief of approximately $6.9 million: (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses under the new corporate entity which we anticipate will be called Chesapeake Utilities of Maryland, Inc.; and (iii) authorization to establish a rider for recovery of the costs associated with our new technology systems. The outcome of the application is subject to review and approval by the Maryland PSC.

Storm Protection Plan

In 2020, the Florida PSC implemented the Storm Protection Plan ("SPP") and Storm Protection Plan Cost Recovery Clause ("SPPCRC"), which require electric utilities to petition the Florida PSC for approval of a Transmission and Distribution Storm Protection Plan that covers the utility's immediate 10-year planning period with updates to the plan at least every 3 years. The SPPCRC rules allow the utility to file for recovery of associated costs related to its SPP. Our Florida electric distribution operation's SPP and SPPCRC were filed during the first quarter of 2022 and approved in the fourth quarter of 2022, with modifications, by the Florida PSC. For the year ended December 31, 2023, this initiative generated incremental adjusted gross margin of $0.8 million. and is expected to generate $2.4 million in 2024 and $4.0 million in 2025. We expect continued investment under the SPP going forward.

COVID-19 Regulatory Proceeding

In October 2020, the Florida PSC approved a joint petition of our natural gas and electric distribution utilities in Florida to establish a regulatory asset to record incremental expenses incurred due to COVID-19. The regulatory asset allows us to obtain recovery of these costs in the next base rate proceedings. Our Florida regulated business units reached a settlement with the Florida OPC in June 2021, enabling the business units to establish a regulatory asset of $2.1 million. This amount includes COVID-19 related incremental expenses for bad debt write-offs, personnel protective equipment, cleaning and business information services for remote work. Our Florida regulated business units are currently amortizing the amount over two years effective January 1, 2022 and recovering the regulatory asset through the Purchased Gas Adjustment and Swing Service mechanisms for the natural gas business units and through the Fuel Purchased Power Cost Recovery clause for the electric division. This resulted in additional adjusted gross margin of $1.0 million annually for both 2022 and 2023, which was offset by a corresponding amortization of regulatory asset expense in each year.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption

Weather had a significant impact on customer consumption during 2023, resulting in adjusted gross margin being negatively impacted by approximately $13.6 million compared to 2022 driven largely by significantly warmer weather in some of the Company's service territories resulting in reduced consumption. The following table summarizes heating degree day ("HDD") and cooling degree day ("CDD") variances from the 10-year average HDD/CDD ("Normal") for the years ended 2023 compared to 2022, and 2022 compared to 2021.

HDD and CDD Information

	For the Years Ended December 31,					
	2023	**2022**	**Variance**	**2022**	**2021**	**Variance**
Delmarva						
Actual HDD	**3,416**	4,088	(672)	4,088	3,849	239
10-Year Average HDD ("Normal")	**4,161**	4,147	14	4,147	4,182	(35)
Variance from Normal	**(745)**	(59)		(59)	(333)	
Florida						
Actual HDD	**664**	836	(172)	836	829	7
10-Year Average HDD ("Normal")	**826**	828	(2)	828	839	(11)

Variance from Normal	**167**	(103)		(103)	(265)	

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula and our legacy Florida Natural Gas distribution business increased by approximately 5.4 percent and 3.9 percent, respectively, during 2023.

On the Delmarva Peninsula, a larger percentage of the adjusted gross margin growth was generated from residential growth given the expansion of gas into new housing communities and conversions to natural gas as our distribution infrastructure continues to build out. In Florida, as new communities continue to build out due to population growth and the additional infrastructure to support the growth, there is increased load from both residential customers as well as new commercial and industrial customers. The details are provided in the following table:

(in thousands)	Adjusted Gross Margin Increase For the Year Ended December 31, 2023	
	Delmarva Peninsula	Florida
Customer growth:		
Residential	$ 1,895	$ 1,599
Commercial and industrial	589	2,131
Total customer growth [1]	$ 2,484	$ 3,730

[1] Customer growth amounts for our legacy Florida operations include the effects of revised rates associated with the Company's natural gas base rate proceeding, but exclude the effects of the FCG acquisition

Regulated Energy

For the Year Ended December	2023	2022	Increase (Decrease)	2022	2021	Increase (Decrease)
(in thousands)						
Revenue	**$ 473,595**	$ 429,424	$ 44,171	$ 429,424	$ 383,920	$ 45,504
Natural gas and electric costs	**140,008**	127,172	12,836	127,172	100,737	26,435
Adjusted gross margin [1]	**333,587**	302,252	31,335	302,252	283,183	19,069
Operations & maintenance	**125,310**	112,963	12,347	112,963	108,190	4,773
Depreciation & amortization	**48,162**	52,707	(4,545)	52,707	48,748	3,959
FCG transaction-related expenses [2]	**10,355**	—	10,355	—	—	—
Other taxes	**23,561**	21,265	2,296	21,265	20,071	1,194
Other operating expenses	**207,388**	186,935	20,453	186,935	177,009	9,926
Operating Income	**$ 126,199**	$ 115,317	$ 10,882	$ 115,317	$ 106,174	$ 9,143

[1] Adjusted Gross Margin is a non-GAAP measure utilized by Management to review business unit performance For a more detailed discussion on the differences between Gross Margin (GAAP) and Adjusted Gross Margin, see the Reconciliation of GAAP to Non-GAAP Measures presented above

[2] Transaction-related expenses referred to in this table represent pretax operating expenses of $10 4 million associated with legal, consulting and audit fees incurred in connection with the acquisition of FCG

2023 compared to 2022

Operating income for the Regulated Energy segment for 2023 was $126.2 million, an increase of $10.9 million. or 9.4 percent, compared to 2022. Excluding transaction-related expenses associated with the acquisition of FCG, operating income increased $21.2 million or 18.4 percent compared to the prior year. Higher operating income reflects contributions from our regulatory initiatives, organic growth in our natural gas distribution businesses and continued pipeline expansion projects, and contributions from the acquisition of FCG. These increases were partially offset by changes in customer consumption resulting from the significantly warmer temperatures in our northern service territories throughout the year. Excluding the transaction-related expenses described above, operating expenses increased by $10.1 million compared to the prior year primarily attributable to increased employee costs driven by growth initiatives, the ongoing competitive labor market and higher benefits costs and higher property taxes compared to the prior year. Increases in depreciation and amortization expense attributable to growth projects that were placed into service during the current year were offset by reductions related to revised depreciation rates approved in the Company's Florida Natural Gas rate case and electric depreciation study filing, and a $5.1 million RSAM adjustment from FCG.

Items contributing to the year-over-year adjusted gross margin increase are listed in the following table:

(in thousands)		
Rate changes associated with the Florida Natural Gas base rate proceeding [1]	$	13,361
Contribution from the acquisition of FCG		8,687
Natural gas growth including conversions (excluding service expansions)		6,214
Natural gas transmission service expansions		4,812
Contributions from regulated infrastructure programs		2,597
Changes in customer consumption, driven by significantly warmer temperatures		(5,096)
Other variances		760
Year-over-year increase in adjusted gross margin	$	31,335

[1] Includes adjusted gross margin contributions from interim rates and permanent base rates that became effective in March 2023

The following narrative discussion provides further detail and analysis of the significant variances in adjusted gross margin detailed above.

Rate Changes Associated with the Florida Natural Gas Base Rate Proceeding
In August 2022, the Florida PSC approved interim rates starting in September 2022. In February 2023, we obtained a final rate order in connection with the Florida Natural Gas base rate proceeding with permanent rates effective on March 1, 2023. These interim and permanent rates contributed additional adjusted gross margin of $13.4 million. Refer to Note 18, *Rates and Other Regulatory Activities*, in the consolidated financial statements for additional information.

Contribution from Acquisition of FCG
FCG contributed adjusted gross margin of $8.7 million from the acquisition date.

Natural Gas Distribution Customer Growth
We generated additional adjusted gross margin of $6.2 million from natural gas customer growth. Adjusted gross margin increased by $3.7 million for our Florida Natural Gas distribution business and $2.5 million on the Delmarva Peninsula compared to 2022, due primarily to residential customer growth of 3.9 percent and 5.4 percent in Florida and on the Delmarva Peninsula, respectively.

Natural Gas Transmission Service Expansions
We generated increased adjusted gross margin of $4.8 million from natural gas transmission service expansions of Peninsula Pipeline, Eastern Shore and Aspire Energy Express.

Contributions from Regulated Infrastructure Programs
Contributions from regulated infrastructure programs generated incremental adjusted gross margin of $2.6 million for the year. The increase in adjusted gross margin was primarily related to FPU Electric's storm protection plan, Eastern Shore's capital surcharge program and Florida's GUARD program. Refer to Note 18, *Rates and Other Regulatory Activities*, in the consolidated financial statements for additional information.

Customer Consumption - Inclusive of Weather

We experienced reduced customer consumption for the year ended December 31, 2023, largely the result of significantly warmer weather experienced in the Delmarva service territory throughout the year resulting in reduced adjusted gross margin of $5.1 million compared to 2022.

The major components of the increase in other operating expenses are as follows:

(in thousands)		
FCG transaction-related expenses [1]	$	10,355
Payroll, benefits and other employee-related expenses		5,054
FCG operating expenses		4,190
Facilities expenses, maintenance costs and outside services		1,416
Customer service related costs		764
Regulatory expenses		658
Depreciation, amortization and property tax costs		(2,308)
Other variances		324
Year-over-year increase in other operating expenses	$	20,453

[1] Transaction-related expenses referred to in this table represent pretax operating expenses of $10.4 million associated with legal, consulting and audit fees incurred in connection with the acquisition of FCG

2022 compared to 2021

The results for the Regulated Energy segment for the year ended December 31, 2022 compared to 2021 are described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated herein by reference.

UNREGULATED ENERGY

For the Year Ended December 31,	2023	2022	Increase (Decrease)	2022	2021	Increase (Decrease)
(in thousands)						
Revenue	$ 223,148	$ 280,750	$ (57,602)	$ 280,750	$ 206,869	$ 73,881
Propane and natural gas costs	102,492	162,683	(60,191)	162,683	106,900	55,783
Adjusted gross margin [1]	120,656	118,067	2,589	118,067	99,969	18,098
Operations & maintenance	74,168	70,489	3,679	70,489	57,905	12,584
Depreciation & amortization	17,347	16,257	1,090	16,257	13,869	2,388
Other taxes	4,715	3,971	744	3,971	3,768	203
Other operating expenses	96,230	90,717	5,513	90,717	75,542	15,175
Operating Income	$ 24,426	$ 27,350	$ (2,924)	$ 27,350	$ 24,427	$ 2,923

[1] Adjusted Gross Margin is a non-GAAP measure utilized by Management to review business unit performance. For a more detailed discussion on the differences between Gross Margin (GAAP) and Adjusted Gross Margin, see the Reconciliation of GAAP to Non-GAAP Measures presented above.

2023 Compared to 2022

Operating income for the Unregulated Energy segment for 2023 decreased by $2.9 million compared to 2022. Operating results were impacted by changes in customer consumption due to significantly warmer weather in our Mid-Atlantic and North Carolina service areas throughout the year as well as conversion of propane customers to our natural gas distribution service. Additionally, we experienced increased operating expenses associated with increased payroll, benefits and employee related expenses driven by competition in the current labor market, depreciation, amortization and property taxes, as well as increased costs for facilities, maintenance and outside services. These factors were partially offset by increased propane margins and fees and increased gathering charges and customer consumption for Aspire.

Adjusted Gross Margin

Items contributing to the year-over-year increase in adjusted gross margin are listed in the following table:

(in thousands)		
Propane Operations		
Increased propane margins and fees	$	8,821
Propane customer consumption - primarily weather related		(8,235)
Decreased customer consumption due to conversion of customers to our natural gas system		(793)
Aspire Energy		
Increase in gathering margin		1,141
Increased customer consumption		496
Eight Flags		
Increased electric generation margin		1,018
Other variances		141
Year-over-year increase in adjusted gross margin	**$**	**2,589**

The following narrative discussion provides further detail and analysis of the significant items in the foregoing table.

Propane Operations

- *Increased propane margins and fees* - Adjusted gross margin increased by $8.8 million, mainly due to increased margins and customer service fees. These market conditions, which include market pricing and competition with other propane suppliers, as well as the availability and price of alternative energy sources, may fluctuate based on changes in demand, supply and other energy commodity prices.

- *Propane customer consumption* - Adjusted gross margin was negatively impacted by $8.2 million as a result of reduced customer consumption driven by significantly warmer weather that our Mid-Atlantic and North Carolina service areas experienced throughout 2023.

- *Reduced customer consumption due to conversion of customers to natural gas* - Adjusted gross margin was reduced by $0.8 million as more customers converted from propane to our natural gas distribution service.

Aspire Energy

- *Increase in gathering charges* - Adjusted gross margin increased by $1.1 million primarily due to increased gathering charges associated with a large commercial customer.

- *Increased customer consumption* - Adjusted gross margin increased by $0.5 million despite warmer temperatures due to increased customer consumption from agricultural customers compared to the prior year.

Eight Flags

- *Increased electric generation margin* - Adjusted gross margin increased by $1.0 million due to increased electric generation compared to the prior year.

Other Operating Expenses

Items contributing to the period-over-period increase in other operating expenses are listed in the following table:

(in thousands)		
Increased payroll, benefits and other employee-related expenses	$	3,959
Increased depreciation, amortization and property tax costs		1,717
Other variances		(163)
Period-over-period increase in other operating expenses	**$**	**5,513**

2022 compared to 2021

The results for the Unregulated Energy segment for the year ended December 31, 2022 compared to 2021 are described in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, which is incorporated by reference.

OTHER INCOME, NET

Other income, net was $1.4 million and $5.1 million for 2023 and 2022, respectively. Other income, net includes non-operating investment income (expense), interest income, late fees charged to customers, gains or losses from the sale of assets for our unregulated businesses and pension and other benefits expense. The decrease was primarily attributable to the absence of a one-time gain related to a building sale during 2022, the absence of interest income received in connection with a Federal Income Tax refund during 2022, and higher pension related expenses compared to the prior-year period.

INTEREST CHARGES

2023 Compared to 2022

Interest charges for 2023 increased by $12.6 million compared to the same period in 2022. This increase is primarily attributable to $6.2 million in interest expense as a result of long-term debt placements in 2023, including the November 2023 placement in connection with the FCG acquisition as well as $4.1 million related to bridge financing costs also attributable to the FCG acquisition. Higher interest expense on Revolver borrowings of $3.1 million driven by higher average interest rates compared to the prior year also contributed to the increase. The weighted-average interest rate on our Revolver borrowings was 5.4 percent for the year ended December 31, 2023 compared to 2.5 percent during the prior year as a result of the Federal Reserve actions in 2022 and 2023. These factors were partially offset by higher capitalized interest of $1.7 million during the current year associated with capital projects.

INCOME TAXES

2023 Compared to 2022

Income tax expense was $28.1 million for 2023 compared to $33.8 million for 2022. Our effective income tax rates were 24.4 percent and 27.4 percent for the years ended December 31, 2023 and 2022, respectively. Income tax expense for the year ended December 31, 2023 includes a $2.5 million benefit resulting from a reduction in the Pennsylvania state income tax rate. Excluding this change, our effective income tax rate was 26.5 percent in 2023.

LIQUIDITY AND CAPITAL RESOURCES

Our capital requirements reflect the capital-intensive and seasonal nature of our business and are principally attributable to investment in new plant and equipment, retirement of outstanding debt and seasonal variability in working capital. We rely on cash generated from operations, short-term borrowings, and other sources to meet normal working capital requirements and to temporarily finance capital expenditures. We may also issue long-term debt and equity to fund capital expenditures and to maintain our capital structure within our target capital structure range. We maintain effective shelf registration statements with the SEC, as applicable, for the issuance of shares of common stock under various types of equity offerings, including the DRIP and previously, shares of common stock under an ATM equity program. Depending on our capital needs and subject to market conditions, in addition to other possible debt and equity offerings, we may consider issuing additional shares under the direct share purchase component of the DRIP and/or under an ATM equity program.

Our energy businesses are weather-sensitive and seasonal. We normally generate a large portion of our annual net income and subsequent increases in our accounts receivable in the first and fourth quarters of each year due to significant volumes of natural gas, electricity, and propane delivered by our distribution operations, and our natural gas transmission operations to customers during the peak heating season. In addition, our natural gas and propane inventories, which usually peak in the fall months, are largely drawn down in the heating season and provide a source of cash as the inventory is used to satisfy winter sales demand.

Capital expenditures for investments in new or acquired plant and equipment are our largest capital requirements. Our capital expenditures were $1.1 billion in 2023, which includes $923.4 million attributable to the purchase of FCG and $3.9 million related to an acquisition in the propane distribution business.

The following table shows our capital expenditures for the year ended December 31, 2023 by segment and by business line:

(in thousands)	For the Year Ended December 31, 2023
Regulated Energy:	
Natural gas distribution	$ 109,245
Natural gas transmission	40,179
Electric distribution	19,745
Total Regulated Energy	169,169
Unregulated Energy:	
Propane distribution	14,287
Energy transmission	5,469
Other unregulated energy	20,508
Total Unregulated Energy	40.264
Other:	
Corporate and other businesses	1,762
Total Other	1,762
Legacy capital expenditures	**211,195**
FCG Acquisition [(1)]	**926,702**
Total 2023 Capital Expenditures	**$ 1,137,897**

[(1)] Includes amounts for the acquisition of FCG net of cash acquired and their capital expenditures from the date of the acquisition through December 31, 2023. For additional information on the FCG acquisition, refer to Note 4, *Acquisitions*, in the consolidated financial statements

In the table below, we have provided a range of our forecasted capital expenditures by segment and business line for 2024:

	Estimate for Fiscal 2024	
(in thousands)	Low	High
Regulated Energy:		
Natural gas distribution	$ 150,000	$ 170,000
Natural gas transmission	90,000	120,000
Electric distribution	25,000	28,000
Total Regulated Energy	265,000	318,000
Unregulated Energy:		
Propane distribution	13,000	15,000
Energy transmission	5,000	6,000
Other unregulated energy	13,000	15,000
Total Unregulated Energy	31,000	36,000
Other:		
Corporate and other businesses	4,000	6,000
Total 2024 Forecasted Capital Expenditures	**$ 300,000**	**$ 360,000**

The 2024 forecast excludes potential acquisitions due to their opportunistic nature.

As a result of the Company's most recent 5-year strategic plan review where we revisited growth projections over the next five years for our legacy businesses and with the increased scale and investment opportunities related to FCG, the Company previously announced new capital expenditure guidance for the five-year period ended 2028 that will range from $1.5 billion to $1.8 billion.

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth or acquisition opportunities and availability of capital and other factors discussed in Item 1A, *Risk Factors*. Historically, actual capital expenditures have typically lagged behind the budgeted amounts. The timing of capital expenditures can vary based on delays in regulatory approvals, securing environmental approvals and other permits. The regulatory application and approval process has lengthened in the past few years, and we expect this trend to continue.

Capital Structure

We are committed to maintaining a sound capital structure and strong credit ratings. This commitment, along with adequate and timely rate relief for our regulated energy operations, is intended to ensure our ability to attract capital from outside sources at a reasonable cost, which will benefit our customers, creditors, employees and stockholders.

The following tables present our capitalization as of December 31, 2023 and 2022 and includes the impacts associated with financing the FCG acquisition:

(dollars in thousands)	December 31, 2023		December 31, 2022	
Long-term debt, net of current maturities	**$ 1,187,075**	**49 %**	$ 578,388	41 %
Stockholders' equity	**1,246,104**	**51 %**	832,801	59 %
Total capitalization, excluding short-term borrowings	**$ 2,433,179**	**100 %**	$ 1,411,189	100 %

(dollars in thousands)	December 31, 2023		December 31, 2022	
Short-term **debt**	**$ 179,853**	**7 %**	$ 202,157	12 %
Long-term **debt, including** current maturities	**1,205,580**	**46 %**	599,871	37 %
Stockholders' equity	**1,246,104**	**47 %**	832,801	51 %
Total capitalization, including short-term borrowings	**$ 2,631,537**	**100 %**	$ 1,634,829	100 %

Our target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. We seek to align permanent financing with the in-service dates of our capital projects. We may utilize more temporary short-term debt when the financing cost is attractive as a bridge to the permanent long-term financing or if the equity markets are volatile. We expect to move closer to our target capital structure over the next couple of years.

In November 2023, in connection with our acquisition of FCG, we completed an overnight offering resulting in the issuance of 4.4 million shares of our common stock at a price per share of $82.72 (net of underwriter discounts and commissions). We received net proceeds of $366.4 million which were used to partially finance the acquisition.

During 2023, there were no issuances under the DRIP. In 2022, we issued less than 0.1 million shares at an average price per share of $136.26 and received net proceeds of $4.5 million under the DRIP.

Shelf Agreements

We have entered into Shelf Agreements with Prudential and MetLife, whom are under no obligation to purchase any unsecured debt. In February 2023, we amended these Shelf Agreements, which expanded the total borrowing capacity and extended the term of the agreements for an additional three years from the effective dates to 2026. The following table summarizes our Shelf Agreements at December 31, 2023:

Shelf Agreement [(1)] *(in thousands)*	**Total Borrowing Capacity**	**Less: Amount of Debt Issued**	**Less: Unfunded Commitments**	**Remaining Borrowing Capacity**
Prudential Shelf Agreement	$ 405,000	$ (300,000)	—	$ 105,000
MetLife Shelf Agreement	200,000	(50,000)	—	150,000
Total	$ 605,000	$ (350,000)	$ —	$ 255,000

~~(1) The amended Prudential and MetLife Shelf Agreements both expire in February 2026.~~

Long-Term Debt

All of our outstanding Senior Notes set forth certain business covenants to which we are subject when any note is outstanding, including covenants that limit or restrict our ability, and the ability of our subsidiaries, to incur indebtedness, or place or permit liens and encumbrances on any of our property or the property of our subsidiaries.

In November 2023, we issued Senior Notes in the aggregate principal amount of $550.0 million at an average interest rate of 6.54 percent that were used to partially finance our acquisition of FCG which closed during the fourth quarter of 2023. These notes have varying maturity dates of between three and 15 years, and the outstanding principal balance of the notes will be due on their respective maturity dates with interest payments payable semiannually until the principal has been paid in full. These Senior Notes have similar covenants and default provisions as our other Senior Notes.

In March 2023, we issued 5.43 percent Senior Notes due March 14, 2038 in the aggregate principal amount of $80.0 million and used the proceeds received from the issuances of the Senior Notes to reduce short-term borrowings under our Revolver and to fund capital expenditures. These Senior Notes have similar covenants and default provisions as our other Senior Notes, and have an annual principal amortization payment beginning in the sixth year after the issuance.

Short-Term Borrowings

We are authorized by our Board of Directors to borrow up to $375.0 million of short-term debt, as required. At December 31, 2023 and 2022, we had $179.9 million and $202.2 million, respectively, of short-term borrowings outstanding at a weighted average interest rate of 5.83 percent and 5.04 percent, respectively. There were no borrowings outstanding under the sustainable investment sublimit of the 364-day tranche at December 31, 2023.

We have entered into several amendments to our Revolver which resulted in modifications to both tranches of the facility. The most recent amendment in October 2023 allowed for a change in our funded indebtedness ratio from 65 percent to 70 percent during the quarter in which the acquisition of FCG is consummated and the quarter subsequent to the closing of the acquisition. The amendment in August 2023 served to renew the 364-day tranche of the Revolver, providing for $175.0 million of short-term debt capacity. Additionally, the amendment for borrowings under the 364-day tranche shall now bear interest (i) based upon the SOFR, plus a 10-basis point credit spread adjustment, and an applicable margin of 1.05 percent or less, with such margin based on total indebtedness as a percentage of total capitalization or (ii) the base rate, solely at our discretion. Further, the amendment provided that borrowings under the 364-day green loan sublimit shall now bear interest at (i) the SOFR rate plus a 10-basis point credit spread adjustment and an applicable margin of 1.00 percent or less, with such margin based on total indebtedness as a percentage of total capitalization or (ii) the base rate plus 0.05 percent or less, solely at our discretion. The amendment entered into in 2022 served to reset the benchmark interest rate to SOFR and to eliminate a previous covenant which capped our investment limit to $150.0 million for investments where we maintain less than 50 percent ownership.

The 364-day tranche of the Revolver expires in August 2024 and the five-year tranche expires in August 2026. Borrowings under both tranches of the Revolver are subject to a pricing grid, including the commitment fee and the interest rate charged based upon our total indebtedness to total capitalization ratio for the prior quarter. As of December 31, 2023, the pricing under the 364-day tranche of the Revolver included a commitment fee of 9-basis points on undrawn amounts and an interest rate of 75-basis points over SOFR plus a 10-basis point SOFR adjustment on outstanding balances. As of December 31, 2023, the pricing under the five-year tranche of the Revolver included a commitment fee of 9-basis points on undrawn amounts and an interest rate of 95-basis points over SOFR plus a 10-basis point SOFR adjustment on outstanding balances.

The availability of funds under the Revolver is subject to conditions specified in the credit agreement, all of which we currently satisfy. These conditions include our compliance with financial covenants and the continued accuracy of representations and warranties contained in the Revolver's loan documents. We are required by the financial covenants in the Revolver to maintain, at the end of each fiscal year, a funded indebtedness ratio as described above. As of December 31, 2023, we are in compliance with this covenant.

Our total available credit under the Revolver at December 31, 2023 was $188.1 million. As of December 31, 2023, we had issued $7.0 million in letters of credit to various counterparties under the Revolver. These letters of credit are not included in the outstanding short-term borrowings and we do not anticipate that they will be drawn upon by the counterparties. The letters of credit reduce the available borrowings under the Revolver.

J683

In connection with our acquisition of FCG, we entered into a 364-day Bridge Facility commitment with Barclays Bank PLC [illegible]. Upon closing of the FCG acquisition in November 2023, and with the completion of other financing activities as defined in the lending agreement, this facility was terminated without any funds drawn to finance the transaction.

Key statistics regarding our unsecured short-term credit facilities (our Revolver and previous bilateral lines of credit and revolving credit facility) for the years ended December 31, 2023, 2022 and 2021 are as follows:

(in thousands)		2023		2022		2021
Average borrowings during the year	$	**130,246**	$	170,434	$	182,305
Weighted average interest rate for the year		**5.41 %**		2.49 %		1.03 %
Maximum month-end borrowings	$	**206,460**	$	225,050	$	226,097

Cash Flows

The following table provides a summary of our operating. investing and financing cash flows for the years ended December 31, 2023, 2022 and 2021:

	For the Year Ended December 31,					
(in thousands)		2023		2022		2021
Net cash provided by (used in):						
Operating activities	$	**203,482**	$	158,882	$	150,504
Investing activities		**(1,111,391)**		(136,448)		(223,023)
Financing activities		**906,609**		(21,206)		73,996
Net (decrease) increase in cash and cash equivalents		**(1,300)**		1,228		1,477
Cash and cash equivalents—beginning of period		**6,204**		4,976		3,499
Cash and cash equivalents—end of period	$	**4,904**	$	6,204	$	4,976

Cash Flows Provided by Operating Activities

Changes in our cash flows from operating activities are attributable primarily to changes in net income, adjusted for non-cash items, such as depreciation and changes in deferred income taxes, and changes in working capital. Working capital requirements are determined by a variety of factors, including weather, the prices of natural gas, electricity and propane, the timing of customer collections, payments for purchases of natural gas, electricity and propane, and deferred fuel cost recoveries.

We normally generate a large portion of our annual net income and related increases in our accounts receivable in the first and fourth quarters of each year due to significant volumes of natural gas and propane delivered to customers during the peak heating season by our natural gas and propane operations and our natural gas supply, gathering and processing operation. In addition. our natural gas and propane inventories, which usually peak in the fall months, are largely drawn down in the heating season and provide a source of cash as the inventory is used to satisfy winter sales demand.

During 2023, net cash provided by operating activities was $203.5 million. Operating cash flows were primarily impacted by the following:

- Net income, adjusted for non-cash adjustments, provided a $170.0 million source of cash;
- Changes in net regulatory assets and liabilities due primarily to the change in fuel costs collected through the various cost recovery mechanisms resulted in a $20.1 million source of cash; and
- Other working capital changes, as well as propane inventory and the related hedging activity, resulted in a $9.8 million source of cash.

Cash Flows Used in Investing Activities

Net cash used in investing activities totaled $1.1 billion during the year ended December 31, 2023. Key investing activities contributing to the cash flow change included:

- Net cash of $925.0 million was used in 2023 to acquire FCG and a propane distribution business; and
- Cash used to pay for capital expenditures amounted to $188.6 million for 2023.

Cash Flows Provided by Financing Activities

Net cash provided by financing activities totaled $906.6 million for the year ended December 31, 2023. This source of cash was largely related to financing activities in connection with the FCG acquisition and included:

- A net increase in long-term debt borrowings resulting in a net source of cash of $605.5 million, including $627.0 million from issuances, offset by long-term repayments of $21.5 million;
- Net proceeds of $366.4 million from the issuance of common stock: partially offset by
- A $40.0 million use of cash for dividend payments in 2023; and
- Net repayments under lines of credit resulting in a use of cash of $22.5 million.

Contractual Obligations

We have the following contractual obligations and other commercial commitments as of December 31, 2023:

	Payments Due by Period				
Contractual Obligations	**2024**	**2025-2026**	**2027-2028**	**After 2028**	**Total**
(in thousands)					
Long-term debt [1]	$ 18,505	$ 160,079	$ 268,373	$ 762,376	$ 1,209,333
Operating leases [2]	2,771	4,062	2,788	5,243	14,864
Purchase obligations [3]					
Transmission capacity	45,314	87,627	70,030	128,326	331.297
Storage capacity	3,312	4,519	860	—	8,691
Commodities	30,983	—	—	—	30,983
Electric supply	6,431	12,936	12,961	12,961	45,289
Unfunded benefits [4]	228	485	474	1,131	2,318
Funded benefits [5]	2,018	4,035	4,035	2,172	12,260
Total Contractual Obligations	**$ 109,562**	**$ 273,743**	**$ 359,521**	**$ 912,209**	**$ 1,655,035**

[1] This represents principal payments on long-term debt See *Item 8, Financial Statements and Supplementary Data*, Note 12, *Long-Term Debt*, for additional information The expected interest payments on long-term debt are $62 4 million, $116 4 million, $92 8 million and $160 6 million, respectively, for the periods indicated above Expected interest payments for all periods total $432 2 million.

[2] See *Item 8, Financial Statements and Supplementary Data*, Note 14, *Leases*, for additional information.

[3] See *Item 8, Financial Statements and Supplementary Data*, Note 20, *Other Commitments and Contingencies*, for additional information

[4] These amounts associated with our unfunded post-employment and post-retirement benefit plans are based on expected payments to current retirees and assume a retirement age of 62 for currently active employees There are many factors that would cause actual payments to differ from these amounts, including early retirement, future health care costs that differ from past experience and discount rates implicit in calculations See *Item 8, Financial Statements and Supplementary Data*, Note 16, *Employee Benefit Plans*, for additional information on the plans

[5] We have recorded long-term liabilities of $0 2 million at December 31, 2023 for the FPU qualified, defined benefit pension plan The assets funding this plan are in a separate trust and are not considered assets of ours or included in our balance sheets We do not expect to make payments to the trust funds in 2024 Additional contributions may be required in future years based on the actual return earned by the plan assets and other actuarial assumptions, such as the discount rate and long-term expected rate of return on plan assets See *Item 8, Financial Statements and Supplementary Data*, Note 16, *Employee Benefit Plans*, for further information on the plans Additionally, the Contractual Obligations table above includes deferred compensation obligations totaling $12 3 million, funded with Rabbi Trust assets in the same amount The Rabbi Trust assets are recorded under Investments on the consolidated balance sheets We assume a retirement age of 65 for purposes of distribution from this trust

Off-Balance Sheet Arrangements

Our Board of Directors has authorized us to issue corporate guarantees securing obligations of our subsidiaries and to obtain letters of credit securing our subsidiaries' obligations. The maximum authorized liability under such guarantees and letters of credit as of December 31, 2023 was $35.0 million. The aggregate amount guaranteed at December 31, 2023 was approximately $24.3 million with the guarantees expiring on various dates through December 2024. In addition, the Board has authorized us to issue specific purpose corporate guarantees. The amount of specific purpose guarantees outstanding at December 31, 2023 was $4.0 million.

As of December 31, 2023, we have issued letters of credit totaling approximately $7.0 million related to the electric transmission services for FPU's electric division, the firm transportation service agreement between TETLP and our Delaware and Maryland divisions, the capacity agreement between NEXUS and Aspire, and our current and previous primary insurance carriers. These letters of credit have various expiration dates through October 2024. There have been no draws on these letters of credit as of December 31, 2023. We do not anticipate that the counterparties will draw upon these letters of credit, and we expect that they will be renewed to the extent necessary in the future. Additional information is presented in *Item 8, Financial Statements and Supplementary Data*, Note 20, *Other Commitments and Contingencies* in the consolidated financial statements.

Critical Accounting Estimates

We prepare our financial statements in accordance with GAAP. Application of these accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingencies during the reporting period. We base our estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Since a significant portion of our businesses are regulated and the accounting methods used by these businesses must comply with the requirements of the regulatory bodies, the choices available are limited by these regulatory requirements. In the normal course of business, estimated amounts are subsequently adjusted to actual results that may differ from the estimates.

Regulatory Assets and Liabilities

As a result of the ratemaking process, we record certain assets and liabilities in accordance with ASC Topic 980, *Regulated Operations*, and consequently, the accounting principles applied by our regulated energy businesses differ in certain respects from those applied by the unregulated businesses. Amounts are deferred as regulatory assets and liabilities when there is a probable expectation that they will be recovered in future revenues or refunded to customers as a result of the regulatory process. This is more fully described in Item 8*, Financial Statements and Supplementary Data,* Note 2*, Summary of Significant Accounting Policies,* in the consolidated financial statements. If we were required to terminate the application of ASC Topic 980, we would be required to recognize all such deferred amounts as a charge or a credit to earnings, net of applicable income taxes. Such an adjustment could have a material effect on our results of operations.

Financial Instruments

We utilize financial instruments to mitigate commodity price risk associated with fluctuations of natural gas, electricity and propane and to mitigate interest rate risk. We continually monitor the use of these instruments to ensure compliance with our risk management policies and account for them in accordance with GAAP, such that every derivative instrument is recorded as either an asset or a liability measured at its fair value. It also requires that changes in the derivatives' fair value are recognized in the current period earnings unless specific hedge accounting criteria are met. If these instruments do not meet the definition of derivatives or are considered "normal purchases and normal sales," they are accounted for on an accrual basis of accounting.

Additionally, GAAP also requires us to classify the derivative assets and liabilities based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the fair value of the assets and liabilities and their placement within the fair value hierarchy.

We determined that certain propane put options, call options, swap agreements and interest rate swap agreements met the specific hedge accounting criteria. We also determined that most of our contracts for the purchase or sale of natural gas, electricity and propane either: (i) did not meet the definition of derivatives because they did not have a minimum purchase/sell requirement, or (ii) were considered "normal purchases and normal sales" because the contracts provided for the purchase or sale of natural gas, electricity or propane to be delivered in quantities that we expect to use or sell over a reasonable period of time in the normal course of business. Accordingly, these contracts were accounted for on an accrual basis of accounting.

Additional information about our derivative instruments is disclosed in Item 8, *Financial Statements and Supplementary Data,* Note 8, *Derivative Instruments,* in the consolidated financial statements.

Goodwill and Other Intangible Assets

We test goodwill for impairment at least annually in December, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. We generally use a present value technique based on discounted cash flows to estimate the fair value of our reporting units. An impairment charge is recognized if the carrying value of a reporting unit's goodwill exceeds its fair value. The annual impairment testing for 2023 indicated no impairment of goodwill. At December 31, 2023, our goodwill balance totaled $508.2 million including $461.2 million attributable to the acquisition of FCG. Additional information is presented in Item 8*, Financial Statements and Supplementary Data,* Note 4, *Acquisitions,* and Note 10*, Goodwill and Other Intangible Assets,* in the consolidated financial statements.

Other Assets Impairment Evaluations

We periodically evaluate whether events or circumstances have occurred which indicate that long-lived assets may not be recoverable. When events or circumstances indicate that an impairment is present, we record an impairment loss equal to the excess of the asset's carrying value over its fair value, if any.

Pension and Other Postretirement Benefits

Pension and other postretirement plan costs and liabilities are determined on an actuarial basis and are affected by numerous assumptions and estimates including the market value of plan assets, estimates of the expected returns on plan assets, assumed discount rates, the level of contributions made to the plans, and current demographic and actuarial mortality data. The assumed discount rates and the expected returns on plan assets are the assumptions that generally have the most significant impact on the pension costs and liabilities. The assumed discount rates, the assumed health care cost trend rates and the assumed rates of retirement generally have the most significant impact on our postretirement plan costs and liabilities. Additional information is presented in Item 8, *Financial Statements and Supplementary Data,* Note 16*, Employee Benefit Plans,* in the consolidated financial statements, including plan asset investment allocation, estimated future benefit payments, general descriptions of the plans, significant assumptions, the impact of certain changes in assumptions, and significant changes in estimates.

At December 31, 2023, actuarial assumptions include expected long-term rates of return on plan assets for FPU's pension plan of 6.00 percent and a discount rate of 5.00 percent. The discount rate was determined by management considering high-quality corporate bond rates, such as the Empower curve index and the FTSE Index, changes in those rates from the prior year and other pertinent factors, including the expected lives of the plans and the availability of the lump-sum payment option. A 0.25 percent increase or decrease in the discount rate would not have a material impact on our pension and postretirement liabilities and related costs.

Actual changes in the fair value of plan assets and the differences between the actual return on plan assets and the expected return on plan assets could have a material effect on the amount of pension benefit costs that we ultimately recognize for our funded pension plan. A 0.25 percent change in the rate of return would not have a material impact on our annual pension cost for the FPU pension plan.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

INTEREST RATE RISK

The fluctuation in interest rates expose us to potential increased cost we could incur when we issue debt instruments or to provide financing and liquidity for our business activities. We evaluate whether to refinance existing debt or permanently refinance existing short-term borrowings based in part on the fluctuation in interest rates. We utilize interest rate swap agreements to mitigate short-term borrowing rate risk. Additional information about our long-term debt and short-term borrowing is disclosed in Note 12, *Long-Term Debt,* and Note 13, *Short-Term Borrowings*, respectively, in the consolidated financial statements.

COMMODITY PRICE RISK

Regulated Energy Segment

We have entered into agreements with various wholesale suppliers to purchase natural gas and electricity for resale to our customers. Our regulated energy distribution businesses that sell natural gas or electricity to end-use customers have fuel cost recovery mechanisms authorized by the PSCs that allow us to recover all of the costs prudently incurred in purchasing natural gas and electricity for our customers. Therefore, our regulated energy distribution operations have limited commodity price risk exposure.

Unregulated Energy Segment

Our propane operations are exposed to commodity price risk as a result of the competitive nature of retail pricing offered to our customers. In order to mitigate this risk, we utilize propane storage activities and forward contracts for supply and sales activities.

We can store up to approximately 8.9 million gallons of propane (including leased storage and rail cars) during the winter season to meet our customers' peak requirements and to serve metered customers. Decreases in the wholesale price of propane may cause the value of stored propane to decline, particularly if we utilize fixed price forward contracts for supply. To mitigate the risk of propane commodity price fluctuations on the inventory valuation, we have adopted a Risk Management Policy that allows our propane distribution operation to enter into fair value hedges, cash flow hedges or other economic hedges of our inventory.

Aspire Energy is exposed to commodity price risk, primarily during the winter season, to the extent we are not successful in balancing our natural gas purchases and sales and have to secure natural gas from alternative sources at higher spot prices. In order to mitigate this risk, we procure firm capacity that meets our estimated volume requirements and we continue to seek out new producers in order to fulfill our natural gas purchase requirements.

The following table reflects the changes in the fair market value of financial derivatives contracts related to propane purchases and sales from December 31, 2022 to December 31, 2023:

(in thousands)	Balance at December 31, 2022	Increase (Decrease) in Fair Market Value	Less Amounts Settled	Balance at December 31, 2023
Sharp	$ 1,507	$ (1,822)	$ (61)	$ (376)

There were no changes in the methods of valuations during the year ended December 31, 2023.

The following is a summary of fair market value of financial derivatives as of December 31, 2023, by method of valuation and by maturity for each fiscal year period.

(in thousands)	2024	2025	2026	Total Fair Value
Price based on Mont Belvieu - Sharp	$ (264)	$ (75)	$ (37)	$ (376)

WHOLESALE CREDIT RISK

The Risk Management Committee reviews credit risks associated with counterparties to commodity derivative contracts prior to such contracts being approved.

Additional information about our derivative instruments is disclosed in Item 8, *Financial Statements and Supplementary Data,* Note 8, *Derivative Instruments,* in the consolidated financial statements.

INFLATION

Inflation affects the cost of supply, labor, products and services required for operations, maintenance and capital improvements. To help cope with the effects of inflation on our capital investments and returns, we periodically seek rate increases from regulatory commissions for our regulated operations and closely monitor the returns of our unregulated energy business operations. To compensate for fluctuations in propane gas prices, we adjust propane sales prices to the extent allowed by the market.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Chesapeake Utilities Corporation

Opinions on the Consolidated Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Chesapeake Utilities Corporation and Subsidiaries (the "Company") as of December 31, 2023 and 2022, the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows, for each of the years in the three-year period ended December 31, 2023, and the related notes and financial statement schedule listed in Item 15(a)2 (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control – Integrated Framework: (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2023, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control – Integrated Framework: (2013)* issued by COSO.

Basis for Opinion

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for their assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances.

As indicated in the accompanying Management's Report on Internal Control Over Financial Reporting, management has excluded Florida City Gas ("FCG") from its assessment of internal control over financial reporting as of December 31, 2023, because it was acquired by the Company in a business combination during 2023. We have also excluded FCG from our audit of internal control over financial reporting. FCG is a wholly-owned subsidiary whose total assets and loss before taxes represented 31 percent and 4 percent, respectively, of the Company's consolidated total assets and earnings before taxes as of December 31, 2023 and for the year then ended.

We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Goodwill Impairment Assessment - Energy Transmission and Supply Services (Aspire Energy) - Unregulated Energy Segment - Refer to Notes 2 and 10 to the consolidated financial statements

Critical Audit Matter Description

As described in Notes 2 and 10 to the consolidated financial statements, the Company has recorded goodwill associated with the Aspire Energy reporting unit within its Unregulated Energy reportable segment as of December 31, 2023. To test goodwill for impairment, the Company uses a present value technique based on discounted cash flows to estimate the fair value of its reporting units. Management's testing of goodwill as of December 31, 2023 indicated no impairment.

We identified the goodwill impairment assessment of Aspire Energy as a critical audit matter because the fair value estimate requires significant estimates and assumptions by management, including those relating to future revenue and operating margin forecasts and discount rates. Testing these estimates involved especially challenging, subjective, or complex judgments and effort.

How the Critical Audit Matter was Addressed in the Audit

The primary procedures we performed to address this critical audit matter included:

- We obtained an understanding, evaluated the design, and tested the operating effectiveness of controls over management's goodwill impairment evaluation, including those over the determination of the fair value of the Aspire Energy reporting unit.
- We evaluated the appropriateness of management's valuation methodology, including testing the mathematical accuracy of the calculation.
- We assessed the historical accuracy of management's revenue and operating margin forecasts.
- We compared the significant assumptions used by management to current industry and economic trends, current and historical performance of the reporting unit, and other relevant factors.
- We performed sensitivity analyses of the significant assumptions to evaluate the changes in the fair value of the reporting units that would result from changes in the assumptions.
- We evaluated whether the assumptions were consistent with evidence obtained in other areas of the audit, including testing the Company's fair value of all reporting units within the Company's Regulated and Unregulated Energy segments, in relation to the market capitalization of the Company and assessed the results.

/s/ Baker Tilly US, LLP

We have served as the Company's auditor since 2007.

[1] 2,000,000 shares of preferred stock at $0 01 par value per share have been authorized No shares have been issued or are outstanding, accordingly, no information has been included in the Consolidated Statements of Stockholders' Equity
[2] Includes 107,623, 108,143 and 116,238 shares at December 31, 2023, 2022 and 2021, respectively, held in a Rabbi Trust related to our Non-Qualified Deferred Compensation Plan.
[3] Includes amounts for shares issued for directors' compensation.
[4] The shares issued under the SICP are net of shares withheld for employee taxes For 2023, 2022 and 2021, we withheld 19,859, 21,832 and 14,020 shares, respectively, for taxes
[5] Includes shares issued under the Retirement Savings Plan, DRIP and/or ATM equity issuances, as applicable

The accompanying notes are an integral part of the financial statements.

FPSC EXH NO. 8

ADMITTED

1. Organization and Basis of Presentation

Chesapeake Utilities, incorporated in 1947 in Delaware, is a diversified energy company engaged in regulated and unregulated energy businesses.

Our regulated energy businesses consist of: (a) regulated natural gas distribution operations in central and southern Delaware, Maryland's eastern shore and Florida; (b) regulated natural gas transmission operations on the Delmarva Peninsula, in Pennsylvania, Florida and in Ohio; and (c) regulated electric distribution operations serving customers in northeast and northwest Florida.

Our unregulated energy businesses primarily include: (a) propane operations in the Mid-Atlantic region, North Carolina, South Carolina, and Florida; (b) our unregulated natural gas transmission/supply operation in central and eastern Ohio; (c) our CHP plant in Florida that generates electricity and steam; (d) our subsidiary, based in Florida, that provides CNG, LNG and RNG transportation and pipeline solutions, primarily to utilities and pipelines throughout the United States; and (e) sustainable energy investments including renewable natural gas.

Our consolidated financial statements include the accounts of Chesapeake Utilities and its wholly-owned subsidiaries. We do not have any ownership interest in investments accounted for using the equity method or any interest in a variable interest entity. All intercompany accounts and transactions have been eliminated in consolidation. We have assessed and, if applicable, reported on subsequent events through the date of issuance of these consolidated financial statements. Where necessary to improve comparability, prior period amounts have been reclassified to conform to current period presentation.

2. Summary of Significant Accounting Policies

Use of Estimates

Preparing the consolidated financial statements to conform with GAAP requires management to make estimates in measuring assets and liabilities and related revenues and expenses. These estimates involve judgments about various future economic factors that are difficult to predict and are beyond our control; therefore, actual results could differ from these estimates. As additional information becomes available, or actual amounts are determined, recorded estimates are revised. Consequently, operating results can be affected by revisions to prior accounting estimates.

Property, Plant and Equipment

Property, plant and equipment are stated at original cost less accumulated depreciation or fair value, if impaired. Costs include direct labor, materials and third-party construction contractor costs, allowance for funds used during construction ("AFUDC"), and certain indirect costs related to equipment and employees engaged in construction. The costs of repairs and minor replacements are charged to expense as incurred, and the costs of major renewals and improvements are capitalized. Upon retirement or disposition of property within the regulated businesses, the gain or loss, net of salvage value, is charged to accumulated depreciation. Upon retirement or disposition of property owned by the unregulated businesses, the gain or loss, net of salvage value, is charged to income. A summary of property, plant and equipment by classification as of December 31, 2023 and 2022 is provided in the following table:

(in thousands)	As of December 31, 2023	2022
Property, plant and equipment		
Regulated Energy		
Natural gas distribution - Delmarva Peninsula and Florida [(1)]	$ 1,486,796	$ 925,501
Natural gas transmission - Delmarva Peninsula, Pennsylvania, Ohio and Florida	788,185	741,865
Electric distribution	143,513	135,633
Unregulated Energy		
Propane operations – Mid-Atlantic, North Carolina, South Carolina and Florida	194,918	185,090
Natural gas transmission and supply – Ohio	134,192	128,620
Electricity and steam generation	37,064	36,886
Mobile CNG and pipeline solutions	40,558	38,543
Sustainable energy investments, including renewable natural gas	4,076	4,076
Other	30,309	29,890
Total property, plant and equipment	2,859,611	2,226,104
Less: Accumulated depreciation and amortization	(516,429)	(462,926)
Plus: Construction work in progress	113,192	47,295
Net property, plant and equipment	$ 2,456,374	$ 1,810,473

[(1)] Includes amounts attributable to the acquisition of FCG. See Note 4 for additional details on the acquisition.

Contributions or Advances in Aid of Construction

Customer contributions or advances in aid of construction reduce property, plant and equipment, unless the amounts are refundable to customers. Contributions or advances may be refundable to customers after a number of years based on the amount of revenues generated from the customers or the duration of the service provided to the customers. Refundable contributions or advances are recorded initially as liabilities. Non-refundable contributions reduce property, plant and equipment at the time of such determination. As of December 31, 2023 and 2022, the non-refundable contributions totaled $4.2 million and $7.6 million, respectively.

AFUDC

Some of the additions to our regulated property, plant and equipment include AFUDC, which represents the estimated cost of funds, from both debt and equity sources, used to finance the construction of major projects. AFUDC is capitalized in the applicable rate base for rate-making purposes when the completed projects are placed in service. During the years ended December 31, 2023, 2022 and 2021, AFUDC was immaterial and was reflected as a reduction of interest charges.

Leases

We have entered into lease arrangements for office space, land, equipment, pipeline facilities and warehouses. These leases enable us to conduct our business operations in the regions in which we operate. Our operating leases are included in operating lease right-of-use assets, other accrued liabilities, and operating lease - liabilities in our consolidated balance sheets.

Right-of-use assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Operating lease right-of-use assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. Leases with an initial term of 12 months or less are not recorded on our balance sheet; we recognize lease expense for these leases on a straight-line basis over the lease term. Our leases do not provide an implicit lease rate, therefore, we utilize our incremental borrowing rate, as the basis to calculate the present value of future lease payments, at lease commencement. Our incremental borrowing rate represents the rate that we would have to pay to borrow funds on a collateralized basis over a similar term and in a similar economic environment.

We have lease agreements with lease and non-lease components. At the adoption of ASC 842, we elected not to separate non-lease components from all classes of our existing leases. The non-lease components have been accounted for as part of the single lease component to which they are related. See Note 14, *Leases,* for additional information.

Jointly-owned Pipelines

Property, plant and equipment for our Florida natural gas transmission operation included $28.4 million of jointly owned assets at December 31, 2023, primarily comprised of the 26-mile Callahan intrastate transmission pipeline in Nassau County, Florida jointly-owned with Seacoast Gas Transmission. Peninsula Pipeline's ownership is 50 percent. Direct expenses for the jointly-owned pipeline are included in operating expenses within our consolidated statements of income. Accumulated depreciation for this pipeline totaled $2.2 million and $1.5 million at December 31, 2023 and 2022, respectively.

Impairment of Long-lived Assets

We periodically evaluate whether events or circumstances have occurred. which indicate that long-lived assets may not be fully recoverable. The determination of whether an impairment has occurred is based on an estimate of undiscounted future cash flows attributable to the asset, compared to the carrying value of the asset. When such events or circumstances are present, we record an impairment loss equal to the excess of the asset's carrying value over its fair value, if any.

Depreciation and Accretion Included in Operations Expenses

We compute depreciation expense for our regulated operations by applying composite, annual rates, as approved by the respective regulatory bodies. Certain components of depreciation and accretion are reported in operations expenses, rather than as depreciation and amortization expense, in the accompanying consolidated statements of income in accordance with industry practice and regulatory requirements. Depreciation and accretion included in operations expenses consists of the accretion of the costs of removal for future retirements of utility assets, vehicle depreciation, computer software and hardware depreciation, and other minor amounts of depreciation expense. For the years ended December 31, 2023, 2022 and 2021, we reported $11.9 million, $11.0 million and $10.2 million, respectively, of depreciation and accretion in operations expenses.

The following table shows the average depreciation rates used for regulated operations during the years ended December 31, 2023, 2022 and 2021:

	2023	2022	2021
Natural gas distribution – Delmarva Peninsula	**2.5%**	2.5%	2.5%
Natural gas distribution – Florida [(1) (2)]	**2.2%**	2.5%	2.5%
Natural gas transmission – Delmarva Peninsula	**2.7%**	2.7%	2.7%
Natural gas transmission – Florida	**2.4%**	2.4%	2.3%
Natural gas transmission – Ohio	**5.0%**	5.0%	N/A
Electric distribution	**2.4%**	2.8%	2.8%

(1) Excludes the acquisition of FCG which was completed on November 30, 2023

(2) Average for 2023 includes the impact of the depreciation study that was approved by the Florida PSC in connection with the natural gas base rate proceeding

For our unregulated operations, we compute depreciation expense on a straight-line basis over the following estimated useful lives of the assets:

Asset Description	Useful Life
Propane distribution mains	10-37 years
Propane bulk plants and tanks	10-40 years
Propane equipment, meters and meter installations	5-33 years
Measuring and regulating station equipment	5-37 years
Natural gas pipelines	45 years
Natural gas right of ways	Perpetual
CHP plant	30 years
Natural gas processing equipment	20-25 years
Office furniture and equipment	3-10 years
Transportation equipment	4-20 years
Structures and improvements	5-45 years
Other	Various

Regulated Operations

We account for our regulated operations in accordance with ASC Topic 980, *Regulated Operations,* which includes accounting principles for companies whose rates are determined by independent third-party regulators. When setting rates, regulators often make decisions, the economics of which require companies to defer costs or revenues in different periods than may be appropriate for unregulated enterprises. When this situation occurs, a regulated company defers the associated costs as regulatory assets on the balance sheet and records them as expense on the income statement as it collects revenues. Further, regulators can also impose liabilities upon a regulated company, for amounts previously collected from customers and for recovery of costs that are expected to be incurred in the future, as regulatory liabilities. If we were required to terminate the application of these regulatory provisions to our regulated operations, all such deferred amounts would be recognized in our consolidated statement of income at that time, which could have a material impact on our financial position, results of operations and cash flows.

We monitor our regulatory and competitive environments to determine whether the recovery of our regulatory assets continues to be probable. If we determined that recovery of these assets is no longer probable, we would write off the assets against earnings. We believe that the provisions of ASC Topic 980 continue to apply to our regulated operations and that the recovery of our regulatory assets is probable.

Revenue Recognition

Revenues for our natural gas and electric distribution operations are based on rates approved by the PSC in each state in which they operate. Customers' base rates may not be changed without formal approval by these commissions. The PSCs, however, have authorized our regulated operations to negotiate rates, based on approved methodologies, with customers that have competitive alternatives. Eastern Shore's revenues are based on rates approved by the FERC. The FERC has also authorized Eastern Shore to negotiate rates above or below the FERC-approved maximum rates, which customers can elect as an alternative to FERC-approved maximum rates.

For regulated deliveries of natural gas and electricity, we read meters and bill customers on monthly cycles that do not coincide with the accounting periods used for financial reporting purposes. We accrue unbilled revenues for natural gas and electricity delivered, but not yet billed, at the end of an accounting period to the extent that they do not coincide. We estimate the amount of the unbilled revenue by jurisdiction and customer class.

All of our regulated natural gas and electric distribution operations have fuel cost recovery mechanisms. These mechanisms allow us to adjust billing rates, without further regulatory approvals, to reflect changes in the cost of purchased fuel. Differences between the cost of fuel purchased and delivered are deferred and accounted for as either unrecovered fuel cost or amounts payable to customers. Generally, these deferred amounts are recovered or refunded within one year.

We charge flexible rates to our natural gas distribution industrial interruptible customers who can use alternative fuels. Interruptible service imposes no contractual obligation to deliver or receive natural gas on a firm service basis.

Our unregulated propane distribution businesses record revenue in the period the products are delivered and/or services are rendered for their bulk delivery customers. For propane customers with meters whose billing cycles do not coincide with our accounting periods, we accrue unbilled revenue for product delivered but not yet billed and bill customers at the end of an accounting period, as we do in our regulated energy businesses.

Our Ohio natural gas transmission/supply operation recognizes revenues based on actual volumes of natural gas shipped using contractual rates based upon index prices that are published monthly.

Eight Flags records revenues based on the amount of electricity and steam generated and sold to its customers.

Our mobile compressed natural gas operation recognizes revenue for CNG services at the end of each calendar month for services provided during the month based on agreed upon rates for labor, equipment utilized, costs incurred for natural gas compression, miles driven, mobilization and demobilization fees.

We report revenue taxes, such as gross receipts taxes, franchise taxes, and sales taxes, on a net basis.

For our businesses with agreements that contain variable consideration, we use the invoice practical expedient method. We determined that the amounts invoiced to customers correspond directly with the value to our customers and our performance to date.

Natural Gas, Electric and Propane Costs

Natural gas, electric and propane costs include the direct costs attributable to the products sold or services provided to our customers. These costs include primarily the variable commodity cost of natural gas, electricity and propane, costs of pipeline capacity needed to transport and store natural gas, transmission costs for electricity, costs to gather and process natural gas, costs to transport propane to/from our storage facilities or our mobile CNG equipment to customer locations, and steam and electricity generation costs. Depreciation expense is not included in natural gas, electric and propane costs.

Operations and Maintenance Expenses

Operations and maintenance expenses include operations and maintenance salaries and benefits, materials and supplies, usage of vehicles, tools and equipment, payments to contractors, utility plant maintenance, customer service, professional fees and other outside services, insurance expense, minor amounts of depreciation, accretion of removal costs for future retirements of utility assets and other administrative expenses.

Cash and Cash Equivalents

Our policy is to invest cash in excess of operating requirements in overnight income-producing accounts. Such amounts are stated at cost, which approximates fair value. Investments with an original maturity of three months or less when purchased are considered cash equivalents.

Accounts Receivable and Allowance for Credit Losses

Accounts receivable consist primarily of amounts due for sales of natural gas, electricity and propane and transportation and distribution services to customers. An allowance for doubtful accounts is recorded against amounts due based upon our collections experiences and an assessment of our customers' inability or reluctance to pay. If circumstances change, our estimates of recoverable accounts receivable may also change. Circumstances which could affect such estimates include, but are not limited to, customer credit issues, natural gas, electricity and propane prices and impacts from general economic conditions. Accounts receivable are written off when they are deemed to be uncollectible.

Our estimate for expected credit losses has been developed by analyzing our portfolio of financial assets that present potential credit exposure risk. These assets consist solely of our trade receivables from customers and contract assets. The estimate is based on five years of historical collections experience, a review of current economic and operating conditions in our service territories, and an examination of economic indicators which provide a reasonable and supportable basis of potential future activity. Those indicators include metrics which we believe provide insight into the future collectability of our trade receivables such as unemployment rates and economic growth statistics in our service territories.

When determining estimated credit losses, we analyze the balance of our trade receivables based on the underlying line of business. This includes an examination of trade receivables from our energy distribution, energy transmission, energy delivery services and propane operations businesses. Our energy distribution business consists of all our regulated distribution utility (natural gas and electric) operations on the Delmarva Peninsula and in Florida. These business units have the ability to recover their costs through the rate-making process, which can include consideration for amounts historically written off to be included in rate base. Therefore, they possess a mechanism to recover credit losses which we believe reduces their exposure to credit risk. Our energy transmission and energy delivery services business units consist of our natural gas pipelines and our mobile CNG delivery operations. The majority of customers served by these business units are regulated distribution utilities who also have the ability to recover their costs. We believe this cost recovery mechanism significantly reduces the amount of credit risk associated with these customers. Our propane operations are unregulated and do not have the same ability to recover their costs as our regulated operations. However, historically our propane operations have not had material write offs relative to the amount of revenues generated.

Our estimate of expected credit losses reflects our anticipated losses associated with our trade receivables as a result of nonpayment from our customers beginning the day the trade receivable is established. We believe the risk of loss associated with trade receivables classified as current presents the least amount of credit exposure risk and therefore, we assign a lower estimate to our current trade receivables. As our trade receivables age outside of their expected due date, our estimate increases. Our allowance for credit losses relative to the balance of our trade receivables has historically been immaterial as a result of on time payment activity from our customers. The table below illustrates the changes in the balance of our allowance for expected credit losses for the year ended December 31, 2023:

(in thousands)		
Balance at December 31, 2022	**$**	**2,877**
Additions:		
Provision for credit losses		**2,340**
Recoveries		**166**
Deductions:		
Write offs		**(2,684)**
Balance at December 31, 2023	**$**	**2,699**

Inventories

We use the average cost method to value propane, materials and supplies, and other merchandise inventory. If market prices drop below cost. inventory balances that are subject to price risk are adjusted to their net realizable value. There were no lower-of-cost-or-net realizable value adjustment for the years ended December 31, 2023, 2022 or 2021.

Goodwill and Other Intangible Assets

Goodwill is not amortized but is tested for impairment at least annually, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. We generally use a present value technique based on discounted cash flows to estimate the fair value of our reporting units. An impairment charge is recognized if the carrying value of a reporting unit's goodwill exceeds its fair value. There were no goodwill impairments recognized during the years ended December 31, 2023, 2022 and 2021. Other intangible assets are amortized on a straight-line basis over their estimated economic useful lives.

Other Deferred Charges

Other deferred charges include issuance costs associated with short-term borrowings. These charges are amortized over the life of the related short-term debt borrowings.

Asset Removal Cost

As authorized by the appropriate regulatory body (state PSC or FERC), we accrue future asset removal costs associated with utility property, plant and equipment even if a legal obligation does not exist. Such accruals are provided for through depreciation expense and are recorded with corresponding credits to regulatory liabilities or assets. When we retire depreciable utility plant and equipment. we charge the associated original costs to accumulated depreciation and amortization, and any related removal costs incurred are charged to regulatory liabilities or assets. The difference between removal costs recognized in depreciation rates and the accretion and depreciation expense recognized for financial reporting purposes is a timing difference between recovery of these costs in rates and their recognition for financial reporting purposes. Accordingly, these differences are deferred as regulatory liabilities or assets. In the rate setting process, the regulatory liability or asset is excluded from the rate base upon which those utilities have the opportunity to earn their allowed rates of return. The costs associated with our asset retirement obligations are either currently being recovered in rates or are probable of recovery in future rates.

See Note 18, *Rates and Other Regulatory Activities*, for information related to FCG's reserve surplus amortization mechanism ("RSAM") that was approved as part of its rate case effective as of May 1, 2023.

Pension and Other Postretirement Plans

Pension and other postretirement plan costs and liabilities are determined on an actuarial basis and are affected by numerous assumptions and estimates, including the fair value of plan assets, estimates of the expected returns on plan assets, assumed discount rates, the level of contributions made to the plans, and current demographic and actuarial mortality data. We review annually the estimates and assumptions underlying our pension and other postretirement plan costs and liabilities with the assistance of third-party actuarial firms. The assumed discount rates, expected returns on plan assets and the mortality assumption are the factors that generally have the most significant impact on our pension costs and liabilities. The assumed discount rates, health care cost trend rates and rates of retirement generally have the most significant impact on our postretirement plan costs and liabilities.

The discount rates are utilized principally in calculating the actuarial present value of our pension and postretirement obligations and net pension and postretirement costs. When estimating our discount rates, we consider high-quality corporate bond rates, such as the Empower curve index and the FTSE Index, changes in those rates from the prior year and other pertinent factors, including the expected life of each of our plans and their respective payment options.

The expected long-term rates of return on assets are utilized in calculating the expected returns on the plan assets component of our annual pension plan costs. We estimate the expected returns on plan assets by evaluating expected bond returns, asset allocations, the effects of active plan management, the impact of periodic plan asset rebalancing and historical performance. We also consider the guidance from our investment advisors in making a final determination of our expected rates of return on plan assets.

We estimate the health care cost trend rates used in determining our postretirement expense based upon actual health care cost experience, the effects of recently enacted legislation and general economic conditions. Our assumed rate of retirement is estimated based upon our annual reviews of participant census information as of the measurement date.

The mortality assumption used for our pension and postretirement plans is reviewed periodically and is based on the actuarial table that best reflects the expected mortality of the plan participants.

Income Taxes, Investment Tax Credit Adjustments and Tax-Related Contingency

Deferred tax assets and liabilities are recorded for the income tax effect of temporary differences between the financial statement basis and tax basis of assets and liabilities and are measured using the enacted income tax rates in effect in the years in which the differences are expected to reverse. Deferred tax assets are recorded net of any valuation allowance when it is more likely than not that such income tax benefits will be realized. Investment tax credits on utility property have been deferred and are allocated to income ratably over the lives of the subject property.

We account for uncertainty in income taxes in our consolidated financial statements only if it is more likely than not that an uncertain tax position is sustainable based on technical merits. Recognizable tax positions are then measured to determine the amount of benefit recognized in the consolidated financial statements. We recognize penalties and interest related to unrecognized tax benefits as a component of other income.

We account for contingencies associated with taxes other than income when the likelihood of a loss is both probable and estimable. In assessing the likelihood of a loss, we do not consider the existence of current inquiries, or the likelihood of future inquiries, by tax authorities as a factor. Our assessment is based solely on our application of the appropriate statutes and the likelihood of a loss, assuming the proper inquiries are made by tax authorities.

Financial Instruments

We utilize financial instruments to mitigate commodity price risk associated with fluctuations of natural gas, electricity and propane and to mitigate interest rate risk. Our propane operations enter into derivative transactions, such as swaps, put options and call options in order to mitigate the impact of wholesale price fluctuations on inventory valuation and future purchase commitments. These transactions may be designated as fair value hedges or cash flow hedges, if they meet all of the accounting requirements pursuant to ASC Topic 815, *Derivatives and Hedging,* and we elect to designate the instruments as hedges. If designated as a fair value hedge, the value of the hedging instrument, such as a swap, future, or put option, is recorded at fair value, with the effective portion of the gain or loss of the hedging instrument effectively reducing or increasing the value of the hedged item. If designated as a cash flow hedge, the value of the hedging instrument, such as a swap or call option, is recorded at fair value with the effective portion of the gain or loss of the hedging instrument being initially recorded in accumulated other comprehensive income (loss) and reclassified to earnings when the associated hedged transaction settles. The ineffective portion of the gain or loss of a hedge is immediately recorded in earnings. If the instrument is not designated as a fair value or cash flow hedge, or it does not meet the accounting requirements of a hedge under ASC Topic 815, *Derivatives and Hedging*, it is recorded at fair value with all gains or losses being recorded directly in earnings.

Our natural gas, electric and propane operations enter into agreements with suppliers to purchase natural gas, electricity, and propane for resale to our respective customers. Purchases under these contracts, as well as distribution and sales agreements

J703

with counterparties or customers either do not meet the definition of a derivative, or qualify for "normal purchases and normal sales" treatment under ASC Topic 815 and are accounted for on an accrual basis.

We manage interest rate risk by entering into derivative contracts to hedge the variability in cash flows attributable to changes in the short-term borrowing rates. We designate and account for the interest rate swaps as cash flows hedges. Accordingly, unrealized gains and losses associated with the interest rate swaps are recorded as a component of accumulated other comprehensive income (loss). When the interest rate swaps settle, the realized gain or loss will be recorded in the income statement and recognized as a component of interest charges.

Recent Accounting Standards Yet to be Adopted

Segment Reporting (ASC 280) - In November 2023, the FASB issued ASU 2023-07, *Improvements to Reportable Segments Disclosures*, which modifies required disclosures about a public entity's reportable segments and addresses requests from investors for more detailed information about a reportable segment's expenses and a more comprehensive reconciliation of each segment's reported profit or loss. ASU 2023-07 will be effective for our annual financial statements beginning January 1, 2024 and our interim financial statements beginning January 1, 2025. ASU 2023-07 only impacts disclosures, and as a result, will not have a material impact on our financial position or results of operations.

Income Taxes (ASC 740) - In December 2023, the FASB issued ASU 2023-09, *Improvements to Income Tax Disclosures,* which modifies required income tax disclosures primarily related to an entity's rate reconciliation and information pertaining to income taxes paid. These enhancements have been made to address requests from investors related to transparency and usefulness of income tax disclosures. ASU 2023-09 will be effective for our annual financial statements beginning January 1, 2024. ASU 2023-09 only impacts disclosures, and as a result, will not have a material impact on our financial position or results of operations.

3. Earnings Per Share

The following table presents the calculation of our basic and diluted earnings per share:

	For the Year Ended December 31,		
(in thousands, except shares and per share data)	**2023**	**2022**	**2021**
Calculation of Basic Earnings Per Share:			
Net Income	**$ 87,212**	$ 89,796	$ 83,466
Weighted average shares outstanding [1]	**18,370,758**	17,722,227	17,558,078
Basic Earnings Per Share	**$ 4.75**	$ 5.07	$ 4.75
Calculation of Diluted Earnings Per Share:			
Reconciliation of Denominator:			
Weighted average shares outstanding — Basic [1]	**18,370,758**	17,722,227	17,558,078
Effect of dilutive securities — Share-based compensation	**64,099**	82,067	74,951
Adjusted denominator — Diluted [1]	**18,434,857**	17,804,294	17,633,029
Diluted Earnings Per Share	**$ 4.73**	$ 5.04	$ 4.73

[1] 2023 weighted average shares reflect the impact of 4.4 million common shares issued in November 2023 in connection with the acquisition of FCG. See Notes 4 and 15 for additional details on the acquisition and related equity offering.

4. Acquisitions

Acquisition of Florida City Gas

On November 30, 2023, we completed the acquisition of FCG for $923.4 million in cash, including working capital adjustments as defined in the agreement. pursuant to the previously disclosed stock purchase agreement with Florida Power & Light Company. Upon completion of the acquisition, FCG became a wholly-owned subsidiary of the Company and is included within our Regulated Energy segment.

FCG, a regulated utility, serves approximately 120,000 residential and commercial natural gas customers across eight counties in Florida, including Miami-Dade, Broward, Brevard, Palm Beach, Hendry, Martin, St. Lucie and Indian River. Its natural gas system includes approximately 3,800 miles of distribution main and 80 miles of transmission pipe.

The purchase price of the acquisition was funded with $366.4 million of net proceeds from the issuance of 4.4 million shares of our common stock, the issuance of approximately $550.0 million principal amount of uncollateralized senior notes, and borrowings under the Company's Revolver. See Note 12, *Long-Term Debt*, and Note 15, *Stockholders' Equity,* for additional details on these financing activities.

We accounted for the acquisition of FCG using the acquisition method. At December 31, 2023, the allocation of the purchase price remains preliminary pending finalizing of certain working capital balances. As such. the fair value measurements presented below are subject to change within the measurement period not to exceed one year from the date of the acquisition. As FCG is a regulated utility, the measurement of the fair value of most of the assets acquired and liabilities assumed were determined using the predecessor's carrying value. In certain other instances where assets and liabilities are not subject to regulation. we determined the fair value in accordance with the principles of ASC Topic 820, *Fair Value Measurements.*

The excess of the purchase price for FCG over the fair value of the assets acquired and liabilities assumed has been reflected as goodwill within the Regulated Energy segment. Goodwill resulting from the acquisition is largely attributable to expansion opportunities provided within our existing regulated operations in Florida. including planned customer growth and growth in rate base through continued investment in our utility infrastructure, as well as natural gas transmission infrastructure supporting the distribution operations. The goodwill recognized in connection with the acquisition of FCG will be deductible for income tax purposes.

The components of the preliminary purchase price allocation are as follows:

(in thousands)

	Acquisition Date Fair Value
Assets acquired:	
Cash	$ 2,270
Accounts receivable, net	14,396
Regulatory assets - current	2,983
Other current assets	2,707
Property, plant and equipment	453,845
Goodwill	461,193
Regulatory assets - non-current	3,381
Other deferred charges and other assets,	18,309
Total assets acquired	**959,084**
Liabilities assumed:	
Current liabilities	(20,954)
Regulatory liabilities	(14,137)
Other deferred credits and other liabilities	(548)
Total liabilities assumed	**(35,639)**
Net purchase price	**$ 923,445**

Direct transaction costs of $10.4 million associated with the FCG acquisition are reflected in "FCG transaction-related expenses" on our consolidated statement of income for the year ended December 31, 2023. In addition, interest charges include $4.1 million related to fees and expenses associated with the Bridge Facility, which was terminated without any funds drawn, for the year ended December 31, 2023. Other transaction costs of $15.9 million related primarily to the debt and equity financings executed in connection with the acquisition have been deferred on the consolidated balance sheet or recorded in equity as an offset to proceeds received, as appropriate.

For the period from the acquisition date through December 31, 2023, the Company's consolidated results include $12.1 million of operating revenue and a $3.3 million net loss attributable to FCG which includes $7.5 million of the transaction-related expenses described above. For additional information on FCG's results, see discussion under Item 7, *Management's Discussion* *and Analysis of Financial Condition and Results of Operations*. The following unaudited financial information reflects pro forma operating revenues and net income assuming the FCG acquisition had occurred on January 1, 2022. The unaudited pro forma financial information has been presented for illustrative purposes only and is not necessarily indicative of the results of operations that would have been achieved or the future results of operations of FCG.

(in thousands) [redacted]	For the Year Ended December 31, 2023		For the Year Ended December 31, 2022

Net Income	**$**	**85,398**	$	81,508

Acquisition of J.T. Lee and Son's

In December 2023, Sharp acquired the propane operating assets of J.T. Lee and Son's in Cape Fear, North Carolina for $3.9 million. In connection with this acquisition, we recorded a $0.3 million liability which is subject to the seller's adherence to various provisions contained in the purchase agreement through the first anniversary of the transaction closing. Through this acquisition. we expanded our operating footprint further in North Carolina, where customers are served by Sharp Energy's Diversified Energy division. Sharp added approximately 3,000 customers and distribution of approximately 800,000 gallons of propane annually. The transaction also includes a bulk plant with 60,000 gallons of propane storage, enabling the Company to realize efficiencies with additional storage capacity and overlapping delivery territories.

In connection with this acquisition. we recorded $2.7 million in property plant and equipment, $0.9 million in goodwill, $0.2 million in working capital, and less than $0.1 million in intangible assets associated primarily with non-compete agreements, all of which are deductible for income tax purposes. The amounts recorded in conjunction with the acquisition are preliminary, and subject to adjustment based on contractual provisions and finalization prior to the first anniversary of the transaction closing. The financial results associated with this acquisition are included within our propane distribution operations within our Unregulated Energy segment. The operating revenues and net income of this acquisition were not material to our consolidated results for the year ended December 31, 2023.

Acquisition of Planet Found Energy Development

In October 2022, we acquired Planet Found Energy Development, LLC ("Planet Found") for $9.5 million. In connection with this acquisition. we recorded a $0.9 million liability which was released after the first anniversary of the transaction closing. We accounted for this acquisition as a business combination within our Unregulated Energy segment beginning in the fourth quarter of 2022. Planet Found's farm scale anaerobic digestion pilot system and technology produces biogas from 1200 tons of poultry litter annually. The transaction accelerated our efforts in converting poultry waste to renewable, sustainable energy while simultaneously improving the local environments in our service territories.

In connection with this acquisition, we recorded $4.4 million in intangible assets associated primarily with intellectual property and non-compete agreements, $4.0 million in property plant and equipment, $1.1 million in goodwill, and less than $0.1 million in working capital, all of which are deductible for income tax purposes. The operating revenues and net income of Planet Found were not material to our consolidated results for the years ended December 31, 2023 and 2022.

Acquisition of Davenport Energy

In June 2022, Sharp acquired the propane operating assets of Davenport Energy's Siler City, North Carolina propane division for approximately $2.0 million. Through this acquisition. the Company expanded its operating footprint further into North Carolina, where customers are served by Sharp Energy's Diversified Energy division. Sharp added approximately 850 customers, and expected distribution of approximately 0.4 million gallons of propane annually. We recorded $1.5 million in property plant and equipment, $0.5 million in goodwill, and immaterial amounts associated with customer relationships and non-compete agreements, all of which are deductible for income tax purposes. The financial results associated with this acquisition are included within the Company's propane distribution operations within its Unregulated Energy segment. The operating revenues and net income of Davenport Energy were not material to our consolidated results for the years ended December 31, 2023 and 2022.

5. Revenue Recognition

We recognize revenue when our performance obligations under contracts with customers have been satisfied. which generally occurs when our businesses have delivered or transported natural gas, electricity or propane to customers. We exclude sales

J706

taxes and other similar taxes from the transaction price. Typically, our customers pay for the goods and/or services we provide to them following the satisfaction of our performance obligation. The following table displays revenue by major source based on product and service type for the years ended December 31, 2023, 2022 and 2021:

	For the year ended December 31, 2023			
(in thousands)	Regulated Energy	Unregulated Energy	Other and Eliminations	Total
Energy distribution

(1) In accordance with the Florida PSC approval of our natural gas base rate proceeding, effective March 1, 2023, our natural gas distribution businesses in Florida (FPU, FPU-Indiantown division, FPU-Fort Meade division and Chesapeake Utilities' CFG division) have been consolidated and amounts above are now being presented on a consolidated basis consistent with the final rate order

(2) Total operating revenues for the year ended December 31, 2021, include other revenue (revenues from sources other than contracts with customers) of $0 2 million and $0 4 million for our Regulated and Unregulated Energy segments, respectively The sources of other revenues include revenue from alternative revenue programs related to revenue normalization for Maryland division and Sandpiper and late fees

Regulated Energy Segment

The businesses within our Regulated Energy segment are regulated utilities whose operations and customer contracts are subject to rates approved by the respective state PSC or the FERC.

Our energy distribution operations deliver natural gas or electricity to customers, and we bill the customers for both the delivery of natural gas or electricity and the related commodity, where applicable. In most jurisdictions, our customers are also required to purchase the commodity from us, although certain customers in some jurisdictions may purchase the commodity from a third-party retailer (in which case we provide delivery service only). We consider the delivery of natural gas or electricity and/or the related commodity sale as one performance obligation because the commodity and its delivery are highly interrelated with two-way dependency on one another. Our performance obligation is satisfied over time as natural gas or electricity is delivered and consumed by the customer. We recognize revenues based on monthly meter readings, which are based on the quantity of natural gas or electricity used and the approved rates. We accrue unbilled revenues for natural gas and electricity that have been delivered. but not yet billed, at the end of an accounting period. to the extent that billing and delivery do not coincide.

Revenues for Eastern Shore are based on rates approved by the FERC. The FERC has also authorized Eastern Shore to negotiate rates above or below the FERC-approved maximum rates, which customers can elect as an alternative to the FERC-approved maximum rates. Eastern Shore's services can be firm or interruptible. Firm services are offered on a guaranteed basis and are available at all times unless prevented by force majeure or other permitted curtailments. Interruptible customers receive service only when there is available capacity or supply. Our performance obligation is satisfied over time as we deliver natural gas to the customers' locations. We recognize revenues based on capacity used or reserved and the fixed monthly charge.

Peninsula Pipeline is engaged in natural gas intrastate transmission to third-party customers and certain affiliates in the State of Florida. Our performance obligation is satisfied over time as the natural gas is transported to customers. We recognize revenue based on rates approved by the Florida PSC and the capacity used or reserved. We accrue unbilled revenues for transportation services provided and not yet billed at the end of an accounting period.

Aspire Energy Express is engaged in natural gas intrastate transmission in the State of Ohio. We currently serve the Guernsey power plant and our performance obligation is satisfied over time as the natural gas is transported to the plant. We recognize revenue based on rates approved by the Ohio PSC and the capacity used or reserved. We accrue unbilled revenues for transportation services provided and not yet billed at the end of an accounting period.

Unregulated Energy Segment

Revenues generated from the Unregulated Energy segment are not subject to any federal, state, or local pricing regulations. Aspire Energy primarily sources gas from hundreds of conventional producers and performs gathering and processing functions to maintain the quality and reliability of its gas for its wholesale customers. Aspire Energy's performance obligation is satisfied over time as natural gas is delivered to its customers. Aspire Energy recognizes revenue based on the deliveries of natural gas at contractually agreed upon rates (which are based upon an established monthly index price and a monthly operating fee, as applicable). For natural gas customers, we accrue unbilled revenues for natural gas that has been delivered, but not yet billed, at the end of an accounting period, to the extent that billing and delivery do not coincide with the end of the accounting period.

Eight Flags' CHP plant, which is located on land leased from a customer, produces three sources of energy: electricity, steam and heated water. This customer purchases the steam (unfired and fired) and heated water, which are used in the customer’s production facility. Our electric distribution operation purchases the electricity generated by the CHP plant for distribution to its customers. Eight Flags' performance obligation is satisfied over time as deliveries of heated water, steam and electricity occur. Eight Flags recognizes revenues over time based on the amount of heated water, steam and electricity generated and delivered to its customers.

For our propane distribution operations, we recognize revenue based upon customer type and service offered. Generally, for propane bulk delivery customers (customers without meters) and wholesale sales, our performance obligation is satisfied when we deliver propane to the customers' locations (point-in-time basis). We recognize revenue from these customers based on the number of gallons delivered and the price per gallon at the point-in-time of delivery. For our propane distribution customers with meters, we satisfy our performance obligation over time. We recognize revenue over time based on the amount of propane consumed and the applicable price per unit. For propane distribution metered customers, we accrue unbilled revenues for propane that is estimated to have been consumed, but not yet billed, at the end of an accounting period, to the extent that billing and delivery do not coincide with the end of the accounting period.

Marlin Gas Services provides mobile CNG and pipeline solutions primarily to utilities and pipelines. Marlin Gas Services provides temporary hold services, pipeline integrity services, emergency services for damaged pipelines and specialized gas services for customers who have unique requirements. Marlin Gas Services' performance obligations are comprised of the compression of natural gas, mobilization of CNG equipment, utilization of equipment and on-site CNG support. Our performance obligations for the compression of natural gas, utilization of mobile CNG equipment and for the on-site CNG staff support are satisfied over time when the natural gas is compressed, equipment is utilized or as our staff provide support services to our customers. Our performance obligation for the mobilization of CNG equipment is satisfied at a point-in-time when the equipment is delivered to the customer project location. We recognize revenue for CNG services at the end of each calendar month for services provided during the month based on agreed upon rates for equipment utilized, costs incurred for natural gas compression, miles driven, mobilization and demobilization fees.

Contract balances

The timing of revenue recognition, customer billings and cash collections results in trade receivables, unbilled receivables (contract assets), and customer advances (contract liabilities) in our consolidated balance sheets. The balances of our trade receivables, contract assets, and contract liabilities as of December 31, 2023 and 2022 were as follows:

(in thousands)	Trade Receivables	Contract Assets (Current)	Contract Assets (Noncurrent)	Contract Liabilities (Current)
Balance at 12/31/2022	$ 61,687	$ 18	$ 4,321	$ 983
Balance at 12/31/2023	67,741	18	3,524	1,022
Increase (decrease)	$ 6,054	$ —	$ (797)	$ 39

Our trade receivables are included in trade and other receivables in the consolidated balance sheets. Our non-current contract assets are included in receivables and other deferred charges in the consolidated balance sheet and relate to operations and maintenance costs incurred by Eight Flags that have not yet been recovered through rates for the sale of electricity to our electric distribution operation pursuant to a long-term service agreement.

At times, we receive advances or deposits from our customers before we satisfy our performance obligation, resulting in contract liabilities. Contract liabilities are included in other accrued liabilities in the consolidated balance sheets and relate to non-refundable prepaid fixed fees for our propane distribution operation's retail offerings. Our performance obligation is satisfied over the term of the respective retail offering plan on a ratable basis. For the years ended December 31, 2023 and 2022, the amounts recognized in revenue were not material.

Remaining performance obligations

Our businesses have long-term fixed fee contracts with customers in which revenues are recognized when performance obligations are satisfied over the contract term. Revenue for these businesses for the remaining performance obligations at December 31, 2023 are expected to be recognized as follows:

(in thousands)	2024	2025	2026	2027	2028	2029 and thereafter
Eastern S[redacted]re and Peninsula Pipeline	$ 36,657	$ 30,330	$ 26,547	$ 23,433	$ 22,559	$ 149,124
Natural gas distribution operations	9,680	9.216	8,501	6,472	5.252	28,428
FPU electric distribution	652	275	275	275	275	[redacted] —
Total revenue contracts with remaining performance obligations	$ 46,989	$ 39,821	$ 35,323	$ 30,180	$ 28,086	$ 177,552

6. Segment Information

We use the management approach to identify operating segments. We organize our business around differences in regulatory environment and/or products or services, and the operating results of each segment are regularly reviewed by the chief decision maker (our Chief Executive Officer, or "CEO") in order to make decisions about resources and to assess performance.

Our operations are entirely domestic and are comprised of two reportable segments:

- *Regulated Energy*. Includes energy distribution and transmission services (natural gas distribution, natural gas transmission and electric distribution operations). All operations in this segment are regulated, as to their rates and services, by the PSC having jurisdiction in each operating territory or by the FERC in the case of Eastern Shore.
- *Unregulated Energy*. Includes energy transmission, energy generation (the operations of our Eight Flags' CHP plant), propane distribution operations, mobile compressed natural gas distribution and pipeline solutions operations, and sustainable energy investments including renewable natural gas. Also included in this segment are other unregulated energy services, such as energy-related merchandise sales and heating. ventilation and air conditioning. plumbing and electrical services. These operations are unregulated as to their rates and services.

The remainder of our operations are presented as "Other businesses and eliminations," which consists of unregulated subsidiaries that own real estate leased to Chesapeake Utilities, as well as certain corporate costs not allocated to other operations.

The following tables present information about our reportable segments:

(in thousands)	For the Year Ended December 31, 2023	2022	2021
Operating Revenues, Unaffiliated Customers			
Regulated Energy	$ 471,591	$ 422,894	$ 381,879
Unregulated Energy	199,013	257,810	188,089
Total operating revenues, unaffiliated customers	$ 670,604	$ 680,704	$ 569,968
Intersegment Revenues (1)			
Regulated Energy	$ 2,004	$ 6,530	$ 2,041
Unregulated Energy	24,135	22,940	18,780
Other businesses	182	308	527
Total intersegment revenues	$ 26,321	$ 29,778	$ 21,348
Operating Income			
Regulated Energy	$ 126,199	$ 115,317	$ 106,174
Unregulated Energy	24,426	27,350	24,427
Other businesses and eliminations	178	266	511
Operating Income	150,803	142,933	131,112
Other income, net	1,438	5,051	1,720
Interest charges	36,951	24,356	20,135
Income before Income Taxes	115,290	123,628	112,697
Income Taxes	28,078	33,832	29,231
Net Income	$ 87,212	$ 89,796	$ 83,466
Depreciation and Amortization			
Regulated Energy (2)	$ 48,162	$ 52,707	$ 48,748
Unregulated Energy	17,347	16,257	13,869
Other businesses and eliminations	(8)	9	44
Total depreciation and amortization	$ 65,501	$ 68,973	$ 62,661
Capital Expenditures			
Regulated Energy (3)	$ 1,095,871	$ 97,554	$ 139,733
Unregulated Energy	40,264	40,773	81,651
Other businesses	1,762	2,355	6,425
Total capital expenditures	$ 1,137,897	$ 140,682	$ 227,809

(1) All significant intersegment revenues are billed at market rates and have been eliminated from consolidated revenues
(2) Depreciation and amortization in 2023 includes a $5.1 million RSAM adjustment. See Note 18 for additional details.
(3) Capital expenditures in 2023 include our acquisition of FCG for $923.4 million. See Note 4 for additional details.

(in thousands)	As of December 31, 2023	2022
Identifiable Assets		
Regulated Energy segment	$ 2,781,581	$ 1,716,255
Unregulated Energy segment	477,402	463,239
Other businesses and eliminations	45,721	35,543
Total identifiable assets	$ 3,304,704	$ 2,215,037

7. Supplemental Cash Flow Disclosures

Cash paid for interest and income taxes during the years ended December 31, 2023, 2022 and 2021 were as follows:

	For the Year Ended December 31,		
(in thousands)	2023	2022	2021
Cash paid for interest	$ **30,525**	$ 24,267	$ 20,809
Cash (received) paid for income taxes, net of refunds	$ **21,920**	$ (4,963)	$ 8,395

Non-cash investing and financing activities during the years ended December 31, 2023, 2022, and 2021 were as follows:

	For the Year Ended December 31,		
(in thousands)	2023	2022	2021
Capital property and equipment acquired on account, but not paid for as of December 31,	$ **33,334**	$ 13,211	$ 16,164
Common stock issued for the Retirement Savings Plan	$ —	$ —	$ 1,712
Common stock issued under the SICP	$ **3,740**	$ 2,868	$ 2,834

8. Derivative Instruments

We use derivative and non-derivative contracts to manage risks related to obtaining adequate supplies and the price fluctuations of natural gas, electricity and propane and to mitigate interest rate risk. Our natural gas, electric and propane distribution operations have entered into agreements with suppliers to purchase natural gas, electricity and propane for resale to our customers. Our natural gas gathering and transmission company has entered into contracts with producers to secure natural gas to meet its obligations. Purchases under these contracts typically either do not meet the definition of derivatives or are considered “normal purchases and normal sales” and are accounted for on an accrual basis. Our propane distribution operations may also enter into fair value hedges of their inventory or cash flow hedges of their future purchase commitments in order to mitigate the impact of wholesale price fluctuations. Occasionally, we may enter into interest rate swap agreements to mitigate risk associated with changes in short-term borrowing rates. As of December 31, 2023 and 2022, our natural gas and electric distribution operations did not have any outstanding derivative contracts.

Volume of Derivative Activity

As of December 31, 2023, the volume of our open commodity derivative contracts were as follows:

Business unit	Commodity	Contract Type	Quantity hedged (in millions)	Designation	Longest expiration date of hedge
Sharp	Propane (gallons)	Purchases	18.1	Cash flow hedges	June 2026
Sharp	Propane (gallons)	Sales	3.2	Cash flow hedges	March 2024

Sharp entered into futures and swap agreements to mitigate the risk of fluctuations in wholesale propane index prices associated with the propane volumes expected to be purchased and/or sold during the heating season. Under the futures and swap agreements, Sharp will receive or pay the difference between (i) the index prices (Mont Belvieu prices in December 2023 through June 2026) and (ii) the per gallon propane contracted prices, to the extent the index prices deviate from the contracted prices. We designated and accounted for the propane swaps as cash flows hedges. The change in the fair value of the swap agreements is initially recorded as a component of accumulated other comprehensive income (loss) and later recognized in our consolidated statement of income in the same period and in the same line item as the hedged transaction. We expect to reclassify approximately $0.3 million of unrealized losses from accumulated other comprehensive income (loss) to earnings during the next 12-month period.

Interest Rate Swap Activities

We manage interest rate risk by entering into derivative contracts to hedge the variability in cash flows attributable to changes in the short-term borrowing rates. In September 2022, we entered into an interest rate swap with a notional amount of $50.0 million through September 2025, with pricing of 3.98 percent.

In February 2021, we entered into an interest rate swap with a notional amount of $40.0 million through December 202[illegible] with pricing [illegible] percent. In the fourth quarter of 2020, we entered into interest rate swaps with notional amounts totaling $60.0 million through December 2021 with pricing of approximately 0.20 percent for the period associated with our outstanding borrowing under the Revolver.

In August 2022, we amended and restated the Revolver and transitioned the benchmark interest rate to the 30-day SOFR as a result of the expiration of LIBOR. Accordingly, our current interest rate swap is cash settled monthly as the counter-party pays us the 30-day SOFR rate less the fixed rate. Prior to August 2022, our short-term borrowing interest rate was based on the 30-day LIBOR rate. Our pre-2022 interest rate swaps were cash settled monthly as the counter-party paid us the 30-day LIBOR rate less the fixed rate.

We designate and account for interest rate swaps as cash flows hedges. Accordingly, unrealized gains and losses associated with the interest rate swaps are initially recorded as a component of accumulated other comprehensive income (loss). As the interest rate swap settles each month, the realized gain or loss is recorded in the income statement and is recognized as a component of interest charges.

Broker Margin

Futures exchanges have contract specific margin requirements that require the posting of cash or cash equivalents relating to traded contracts. Margin requirements consist of initial margin that is posted upon the initiation of a position, maintenance margin that is usually expressed as a percent of initial margin, and variation margin that fluctuates based on the daily mark-to-market relative to maintenance margin requirements. We currently maintain a broker margin account for Sharp included within other current assets on the consolidated balance sheet with a balance of $2.1 million as of December 31, 2023 compared to a current liability of $0.1 million at December 31, 2022.

Financial Statements Presentation

The following tables present information about the fair value and related gains and losses of our derivative contracts. We did not have any derivative contracts with a credit-risk-related contingency. Fair values of the derivative contracts recorded in the consolidated balance sheets as of December 31, 2023 and 2022 are as follows:

	Derivative Assets		
		Fair Value as of	
(in thousands)	Balance Sheet Location	December 31, 2023	December 31, 2022
Derivatives designated as cash flow hedges			
Propane swap agreements	Derivative assets, at fair value (1)	$ 702	$ 3,317
Interest rate swap agreements	Derivative assets, at fair value (1)	365	452
Total Derivative Assets		$ 1,067	$ 3,769

(1) Derivative assets, at fair value include $1.0 million and $2.8 million in current assets in the consolidated balance sheet at December 31, 2023 and 2022, respectively, with the remainder of the balance classified as long-term.

	Derivative Liabilities		
		Fair Value as of	
(in thousands)	Balance Sheet Location	December 31, 2023	December 31, 2022
Derivatives designated as cash flow hedges			
Propane swap agreements	Derivative liabilities, at fair value (1)	$ 1,078	$ 1,810
Interest rate swap agreements	Derivative liabilities, at fair value (1)	203	405
Total Derivative Liabilities		$ 1,281	$ 2,215

(1) Derivative liabilities, at fair value include $0.4 million and $0.6 million in current liabilities in the consolidated balance sheet at December 31, 2023 and 2022, respectively, with the remainder of the balance classified as long-term.

The effects of gains and losses from derivative instruments and their location in the consolidated statements of income are as follows:

		Amount of Gain (Loss) on Derivatives:		
	Location of Gain (Loss) on Derivatives	For the Year Ended December 31,		
(in thousands)		2023	2022	2021
Derivatives not designated as hedging instruments				
Propane swap agreements	Propane and natural gas costs	$ —	$ 56	$ (1)
Derivatives designated as fair value hedges				
Put/Call option	Propane and natural gas costs	—	—	(24)
Derivatives designated as cash flow hedges				
Propane swap agreements	Revenues	1,221	(373)	(536)
Propane swap agreements	Propane and natural gas costs	(1,160)	3,881	7,187
Interest rate swap agreements	Interest expense	523	(47)	(40)
Total		$ 584	$ 3,517	$ 6,586

9. Fair Value of Financial Instruments

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation methods used to measure fair value. The three levels of the fair value hierarchy are as follows:

Fair Value Hierarchy	Description of Fair Value Level	Fair Value Technique Utilized
Level 1	Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities	*Investments - equity securities* - The fair values of these trading securities are recorded at fair value based on unadjusted quoted prices in active markets for identical securities. *Investments - mutual funds and other* - The fair values of these investments, comprised of money market and mutual funds, are recorded at fair value based on quoted net asset values of the shares.
Level 2	Quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability	*Derivative assets and liabilities* - The fair value of the propane put/call options, propane and interest rate swap agreements are measured using market transactions for similar assets and liabilities in either the listed or over-the-counter markets.
Level 3	Prices or valuation techniques requiring inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity)	*Investments - guaranteed income fund* - The fair values of these investments are recorded at the contract value, which approximates their fair value.

Financial Assets and Liabilities Measured at Fair Value

The following tables summarize our financial assets and liabilities that are measured at fair value on a recurring basis and the fair value measurements, by level, within the fair value hierarchy as of December 31, 2023 and 2022, respectively:

		Fair Value Measurements Using:		
As of December 31, 2023 *(in thousands)*	**Fair Value**	**Quoted Prices in Active Markets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
Assets:				
Investments—equity securities	$ 21	$ 21	$ —	$ —
Investments—guaranteed income fund	1,489	—	—	1,489
Investments—mutual funds and other	10,772	10,772	—	—
Total investments	12,282	10,793	—	1,489
Derivative assets	1,067	—	1,067	—
Total assets	$ 13,349	$ 10,793	$ 1,067	$ 1,489
Liabilities:				
Derivative liabilities	$ 1,281	$ —	$ 1,281	$ —

		Fair Value Measurements Using:		
As of December 31, 2022 *(in thousands)*	**Fair Value**	**Quoted Prices in Active Markets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
Assets:				
Investments—equity securities	$ 24	$ 24	$ —	$ —
Investments—guaranteed income fund	1,853	—	—	1,853
Investments—mutual funds and other	8,699	8,699	—	—
Total investments	10,576	8,723	—	1,853
Derivative assets	3,769	—	3,769	—
Total assets	$ 14,345	$ 8,723	$ 3,769	$ 1,853
Liabilities:				
Derivative liabilities	$ 2,215	$ —	$ 2,215	$ —

The changes in the fair value of our Level 3 investments for the years ended December 31, 2023 and 2022 were immaterial. Investment income from our Level 3 investments is reflected in other income (expense), net in the consolidated statements of income.

At December 31, 2023 and 2022, there were no non-financial assets or liabilities required to be reported at fair value. We review our non-financial assets for impairment at least on an annual basis, as required.

Other Financial Assets and Liabilities

Financial assets with carrying values approximating fair value include cash and cash equivalents and accounts receivable. Financial liabilities with carrying values approximating fair value include accounts payable, other accrued liabilities and short-term debt. The fair value of cash and cash equivalents is measured using the comparable value in the active market (Level 1 measurement). The fair value of short-term debt approximates the carrying value due to its near-term maturities and because interest rates approximate current market rates (Level 2 measurement).

At December 31, 2023, long-term debt, which includes the current maturities but excludes debt issuance cost, had a carrying value of $1.2 billion, compared to the estimated fair value of $1.2 billion. At December 31, 2022, long-term debt. which includes the current maturities and excludes debt issuance costs, had a carrying value of $600.8 million, compared to a fair value of $505.0 million. The fair value was calculated using a discounted cash flow methodology that incorporates a market interest rate based on published corporate borrowing rates for debt instruments with similar terms and average maturities, and with adjustments for duration, optionality, and risk profile. The valuation technique used to estimate the fair value of long-term debt would be considered a Level 2 measurement.

See Note 16, *Employee Benefit Plans,* for fair value measurement information related to our pension plan assets.

10. Goodwill and Other Intangible Assets

The carrying value of goodwill as of December 31, 2023 and 2022 was as follows:

(in thousands)	Regulated Energy	Unregulated Energy	Total Goodwill
Balance at December 31, 2022	$ 7,689	$ 38,524	$ 46,213
Additions [(1)]	461,025	936	461,961
Balance at December 31, 2023	**$ 468,714**	**$ 39,460**	**$ 508,174**

[(1)] 2023 additions primarily attributable to goodwill from the November 2023 acquisition of FCG See Note 4 for additional details

There were no goodwill impairments recognized during the three-year period ended December 31, 2023.

The carrying value and accumulated amortization of intangible assets subject to amortization as of December 31, 2023 and 2022 was as follows:

	As of December 31,			
	2023		2022	
(in thousands)	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Customer relationships	$ 17,004	$ 7,146	$ 16,965	$ 6,131
Non-Compete agreements	3,125	1,855	3,105	1,411
Patents [(1)]	6,558	859	5,819	533
Other	270	232	270	225
Total	$ 26,957	$ 10,092	$ 26,159	$ 8,300

[(1)] Includes amounts related to patented technology developed by Marlin Gas Services and the acquisition of Planet Found

The customer relationships, non-compete agreements, patents and other intangible assets acquired in the purchases of the operating assets of several companies are being amortized over a weighted average of 14 years. Amortization expense of intangible assets for the year ended December 31, 2023, 2022 and 2021 was $1.8 million. $1.5 million and $1.3 million, respectively. Amortization expense of intangible assets is expected to be $1.8 million for the years 2024 through 2025, $1.6 million for 2026, $1.5 million for 2027 and $1.3 million for 2028.

11. Income Taxes

We file a consolidated federal income tax return. Income tax expense allocated to our subsidiaries is based upon their respective taxable incomes and tax credits. State income tax returns are filed on a separate company basis in most states where we have operations and/or are required to file. Our state returns for tax years after 2017 are subject to examination. At December 31, 2023, the 2015 through 2019 federal income tax returns are no longer under examination.

For state income tax purposes, we had NOL in various states of $72.9 million and $67.7 million as of December 31, 2023 and 2022, respectively, almost all of which will expire in 2040. Excluding NOLs from discontinued operations, we have recorded deferred tax assets of $1.8 million and $1.5 million related to state NOL carry-forwards at December 31, 2023 and 2022, respectively. We have not recorded a valuation allowance to reduce the future benefit of the tax NOL because we believe they will be fully utilized.

Tax Law Changes

In March 2020, the CARES Act was signed into law and included several significant changes to the Internal Revenue Code. The CARES Act includes certain tax relief provisions including the ability to carryback five years net operating losses arising in a tax year beginning in 2018, 2019, or 2020. This provision allows a taxpayer to recover taxes previously paid at a 35 percent federal income tax rate during tax years prior to 2018. In addition, the CARES Act removed the taxable income limitation to allow a tax NOL to fully offset taxable income for tax years beginning before January 1, 2021. As a result, our income tax expense for the year ended December 31, 2021 included a tax benefit $0.9 million. attributable to the tax NOL carryback provided under the CARES Act for losses generated in 2018 and 2019 and then applied back to our 2013 and 2015 tax years in which we paid federal income taxes at a 35 percent tax rate. Tax benefits associated with this legislation were not available for the year ended December 31, 2023.

On December 22, 2017, the TCJA was signed into law. Substantially all of the provisions of the TCJA were effective for taxable years beginning on or after January 1, 2018. The provisions that significantly impacted us include the reduction of the corporate federal income tax rate from 35 percent to 21 percent. Our federal income tax expense for periods beginning on January 1, 2018 are based on the new federal corporate income tax rate. The TCJA included changes to the Internal Revenue Code, which materially impacted our 2017 financial statements. ASC 740, *Income Taxes*, requires recognition of the effects of changes in tax laws in the period in which the law is enacted. ASC 740 requires deferred tax assets and liabilities to be measured at the enacted tax rate expected to apply when temporary differences are to be realized or settled. During 2018, we completed the assessment of the impact of accounting for certain effects of the TCJA. At the date of enactment in 2017, we re-measured deferred income taxes based upon the new corporate tax rate. See Note 18, *Rates and Other Regulatory Activities*, for further discussion of the TCJA's impact on our regulated businesses.

The following tables provide: (a) the components of income tax expense in 2023, 2022, and 2021; (b) the reconciliation between the statutory federal income tax rate and the effective income tax rate for 2023, 2022, and 2021; and (c) the components of accumulated deferred income tax assets and liabilities at December 31, 2023 and 2022.

Terms of the Senior Notes

All of our outstanding Senior Notes set forth certain business covenants to which we are subject when any note is outstanding. including covenants that limit or restrict our ability, and the ability of our subsidiaries, to incur indebtedness, or place or permit liens and encumbrances on any of our property or the property of our subsidiaries.

Senior Notes

On November 20, 2023, we issued Senior Notes in the aggregate principal amount of $550.0 million at an average interest rate of 6.54 percent that were used to partially finance our acquisition of FCG which closed during the fourth quarter of 2023. These notes have varying maturity dates of between three and 15 years, and the outstanding principal balance of the notes will be due on their respective maturity dates with interest payments payable semiannually until the principal has been paid in full. These Senior Notes have similar covenants and default provisions as our other Senior Notes.

J720

On March 14, 2023 we issued 5.43 percent Senior Notes due March 14, 2038 in the aggregate principal amount of $80.0 million and used the proceeds received from the issuances of the Senior Notes to reduce short-term borrowings under our Revolver and to fund capital expenditures. These Senior Notes have similar covenants and default provisions as our other Senior Notes, and have an annual principal amortization payment beginning in the sixth year after the issuance.

Annual Maturities

Annual maturities and principal repayments of long-term debt are as follows:

Year	2024	2025	2026	2027	2028	Thereafter	Total
(in thousands)							
Payments	$ 18,505	$ 25,528	$ 134,551	$ 131,674	$ 136,699	$ 762,376	$ 1,209,333

Shelf Agreements

We have entered into Shelf Agreements with Prudential and MetLife, whom are under no obligation to purchase any unsecured debt. In February 2023, we amended these Shelf Agreements, which expanded the total borrowing capacity and extended the term of the agreements for an additional three years to 2026. The following table summarizes the current available capacity under our Shelf Agreements at December 31, 2023:

(in thousands)	Total Borrowing Capacity	Less Amount of Debt Issued	Less Unfunded Commitments	Remaining Borrowing Capacity
Shelf Agreements (1)				
Prudential Shelf Agreement	$ 405,000	$ (300,000)	$ —	$ 105,000
MetLife Shelf Agreement	200,000	(50,000)	—	150,000
Total	$ 605,000	$ (350,000)	$ —	$ 255,000

13. SHORT-TERM BORROWINGS

We are authorized by our Board of Directors to borrow up to $375.0 million of short-term debt, as required. At December 31, 2023 and 2022, we had $179.9 million and $202.2 million, respectively, of short-term borrowings outstanding at a weighted average interest rate of 5.83 percent and 5.04 percent, respectively. There were no borrowings outstanding under the sustainable investment sublimit of the 364-day tranche at December 31, 2023.

We have entered into several amendments to our Revolver which resulted in modifications to both tranches of the facility. The most recent amendment in October 2023 allowed for a change in our funded indebtedness ratio from 65 percent to 70 percent during the quarter in which the acquisition of FCG is consummated and the quarter subsequent to the closing of the acquisition. The amendment in August 2023 served to renew the 364-day tranche of the Revolver, providing for $175.0 million of short-term debt capacity. Additionally, the amendment for borrowings under the 364-day tranche shall now bear interest (i) based upon the SOFR, plus a 10-basis point credit spread adjustment, and an applicable margin of 1.05 percent or less, with such margin based on total indebtedness as a percentage of total capitalization or (ii) the base rate, solely at our discretion. Further, the amendment provided that borrowings under the 364-day green loan sublimit shall now bear interest at (i) the SOFR rate plus a 10-basis point credit spread adjustment and an applicable margin of 1.00 percent or less, with such margin based on total indebtedness as a percentage of total capitalization or (ii) the base rate plus 0.05 percent or less, solely at our discretion. The amendment entered into in 2022 served to reset the benchmark interest rate to SOFR and to eliminate a previous covenant which capped our investment limit to $150.0 million for investments where we maintain less than 50 percent ownership.

The 364-day tranche of the Revolver expires in August 2024 and the five-year tranche expires in August 2026. Borrowings under both tranches of the Revolver are subject to a pricing grid, including the commitment fee and the interest rate charged based upon our total indebtedness to total capitalization ratio for the prior quarter. As of December 31, 2023, the pricing under the 364-day tranche of the Revolver included a commitment fee of 9-basis points on undrawn amounts and an interest rate of 75-basis points over SOFR plus a 10-basis point SOFR adjustment on outstanding balances. As of December 31, 2023, the pricing under the five-year tranche of the Revolver included a commitment fee of 9-basis points on undrawn amounts and an interest rate of 95-basis points over SOFR plus a 10-basis point SOFR adjustment on outstanding balances.

The availability of funds under the Revolver is subject to conditions specified in the credit agreement, all of which we currently satisfy. These conditions include our compliance with financial covenants and the continued accuracy of representations and warranties contained in the Revolver's loan documents. We are required by the financial covenants in the Revolver to maintain, at the end of each fiscal year, a funded indebtedness ratio as described above. As of December 31, 2023, we are in compliance with this covenant.

Our total available credit under the Revolver at December 31, 2023 was $188.1 million. As of December 31, 2023, we had issued $7.0 million in letters of credit to various counterparties under the Revolver. These letters of credit are not included in the outstanding short-term borrowings and we do not anticipate that they will be drawn upon by the counterparties. The letters of credit reduce the available borrowings under the Revolver.

In connection with our acquisition of FCG, we entered into a 364-day Bridge Facility commitment with Barclays Bank PLC and other lending parties for up to $965.0 million. Upon closing of the FCG acquisition in November 2023, and with the completion of other financing activities as defined in the lending agreement, this facility was terminated with no funds drawn to finance the transaction. For additional information regarding the acquisition and related financing, see Note 4, *Acquisitions,* Note 12, *Long-Term Debt* and Note 15, *Stockholders Equity*.

For additional information on interest rate swaps related to our short-term borrowings, see Note 8, *Derivative Instruments*.

14. LEASES

We have entered into lease arrangements for office space, land, equipment, pipeline facilities and warehouses. These lease arrangements enable us to better conduct business operations in the regions in which we operate. Office space is leased to provide adequate workspace for our employees in several locations throughout our service territories. We lease land at various locations throughout our service territories to enable us to inject natural gas into underground storage and distribution systems, for bulk storage capacity, for our propane operations and for storage of equipment used in repairs and maintenance of our infrastructure. We lease natural gas compressors to ensure timely and reliable transportation of natural gas to our customers. We also lease warehouses to store equipment and materials used in repairs and maintenance for our businesses.

Some of our leases are subject to annual changes in the Consumer Price Index ("CPI"). While lease liabilities are not re-measured as a result of changes to the CPI. changes to the CPI are treated as variable lease payments and recognized in the period in which the obligation for those payments was incurred. A 100-basis-point increase in CPI would not have resulted in material additional annual lease costs. Most of our leases include options to renew, with renewal terms that can extend the lease term from one to 25 years or more. The exercise of lease renewal options is at our sole discretion. The amounts disclosed in our consolidated balance sheet at December 31, 2023, pertaining to the right-of-use assets and lease liabilities, are measured based on our current expectations of exercising our available renewal options. Our existing leases are not subject to any restrictions or covenants that would preclude our ability to pay dividends, obtain financing or enter into additional leases. As of December 31, 2023, we have not entered into any leases, which have not yet commenced. that would entitle us to significant rights or create additional obligations. The following table presents information related to our total lease cost included in our consolidated statements of income:

		Year Ended December 31,	
(in thousands)	**Classification**	**2023**	**2022**
Operating lease cost [1]	Operations expense	$ 3,040	$ 2,883

[1] Includes short-term leases and variable lease costs, which are immaterial

The following table presents the balance and classifications of our right of use assets and lease liabilities included in our consolidated balance sheets at December 31, 2023 and 2022:

(in thousands)	Balance sheet classification	December 31, 2023	December 31, 2022
Assets			
Operating lease assets	Operating lease right-of-use assets	$ 12,426	$ 14,421
Liabilities			
Current			
Operating lease liabilities	Other accrued liabilities	$ 2,454	$ 2,552
Noncurrent			
Operating lease liabilities	Operating lease - liabilities	10,550	12,392
Total lease liabilities		$ 13,004	$ 14,944

The following table presents our weighted-average remaining lease term and weighted-average discount rate for our operating leases at December 31, 2023 and 2022:

	December 31, 2023	December 31, 2022
Weighted-average remaining lease term (*in years*)		
Operating leases	8.1	8.5
Weighted-average discount rate		
Operating leases	3.5 %	3.4 %

The following table presents additional information related to cash paid for amounts included in the measurement of lease liabilities included in our consolidated statements of cash flows at December 31, 2023 and 2022:

	Year Ended December 31,	
(in thousands)	2023	2022
Operating cash flows from operating leases	$ 2,906	$ 2,931

The following table presents the future undiscounted maturities of our operating and financing leases at December 31, 2023 and for each of the next five years and thereafter:

(in thousands)	Operating Leases [1]
2024	$ 2,771
2025	2,288
2026	1,774
2027	1,583
2028	1,205
Thereafter	5,243
Total lease payments	14,864
Less: Interest	(1,860)
Present value of lease liabilities	$ 13,004

[1] Operating lease payments include $2.1 million related to options to extend lease terms that are reasonably certain of being exercised.

15. STOCKHOLDERS' E

Common Stock Issuances

In November 2023, in connection with our acquisition of FCG, we completed an overnight offering resulting in the issuance of 4.4 million shares of our common stock at a price per share of $82.72 (net of underwriter discounts and commissions). We received net proceeds of $366.4 million which were used to partially finance the acquisition.

We maintain an effective shelf registration statement with the SEC for the issuance of shares under our DRIP and our previous ATM programs. Depending on our capital needs and subject to market conditions, in addition to other possible debt and equity offerings, we may issue additional shares under the direct stock purchase component of the DRIP. There were no issuances under the DRIP in 2023. In 2022, we issued less than 0.1 million shares at an average price per share of $136.26 and received net proceeds of $4.5 million under the DRIP. Our most recent ATM equity program, which allowed us to issue and sell shares of our common stock up to an aggregate offering price of $75 million, expired in June 2023.

Net proceeds from share issuances under our DRIP and ATM programs are used for general corporate purposes including, but not limited to, financing of capital expenditures, repayment of short-term debt. financing acquisitions, investing in subsidiaries, and general working capital purposes.

Accumulated Other Comprehensive Income (Loss)

Defined benefit pension and postretirement plan items, unrealized gains (losses) of our propane swap agreements designated as commodity contract cash flow hedges, and the unrealized gains (losses) of our interest rate swap agreements designated as cash flow hedges are the components of our accumulated other comprehensive income (loss). The following tables present the changes in the balances of accumulated other comprehensive income (loss) components for the years ended December 31, 2023 and 2022. All amounts in the following tables are presented net of tax.

(in thousands)	Defined Benefit Pension and Postretirement Plan Items	Commodity Contract Cash Flow Hedges	Interest Rate Swap Cash Flow Hedges	Total
As of December 31, 2021	$ (3,268)	$ 4,571	$ —	$ 1,303
Other comprehensive income (loss) before reclassifications	705	(934)	—	(229)
Amounts reclassified from accumulated other comprehensive income (loss)	57	(2,545)	35	(2,453)
Net current-period other comprehensive income (loss)	762	(3,479)	35	(2,682)
As of December 31, 2022	**(2,506)**	**1,092**	**35**	**(1,379)**
Other comprehensive income (loss) before reclassifications	(110)	(1,322)	473	(959)
Amounts reclassified from accumulated other comprehensive income (loss)	32	(44)	(388)	(400)
Net current-period other comprehensive income (loss)	(78)	(1,366)	85	(1,359)
As of December 31, 2023	**$ (2,584)**	**$ (274)**	**$ 120**	**$ (2,738)**

Deferred gains or losses for our commodity contract and interest rate swap cash flow hedges are recognized in earnings upon settlement and are included in the effects of gains and losses from derivative instruments. See Note 8, *Derivative Instruments*, for additional details. Amortization of the net loss related to the defined benefit pension plan and postretirement plans is included in the computation of net periodic costs (benefits). See Note 16, *Employee Benefit Plans*, for additional details.

16. EMPLOYEE BENEFIT PLANS

We measure the assets and obligations of the defined benefit pension plans and other postretirement benefits plans to determine the plans' funded status as of the end of the year. The changes in funded status that occurred during the year that are not recognized as part of net periodic benefit costs are recorded as a component of other comprehensive income (loss) or a regulatory asset.

J724

Defined Benefit Pension Plans

At December 31, 2023 we sponsored two defined benefit pension plans: the FPU Pension Plan and the Chesapeake Supplemental Executive Retirement Plan ("SERP").

The FPU Pension Plan, a qualified plan, covers eligible FPU non-union employees hired before January 1, 2005 and union employees hired before the respective union contract expiration dates in 2005 and 2006. Prior to the FPU merger, the FPU Pension Plan was frozen with respect to additional years of service and compensation. effective December 31, 2009.

The Chesapeake SERP, a nonqualified plan, is comprised of two sub-plans. The first sub-plan was frozen with respect to additional years of service and additional compensation as of December 31, 2004. The second sub-plan provides fixed payments for several executives who joined the Company as a result of an acquisition and whose agreements with the Company provided for this benefit.

The unfunded liability for all plans at both December 31, 2023 and 2022, is included in the other pension and benefit costs liability in our consolidated balance sheets.

The following schedules set forth the funded status at December 31, 2023 and 2022 and the net periodic cost (benefit) for the years ended December 31, 2023, 2022 and 2021 for the FPU Pension Plan and the Chesapeake SERP:

	FPU Pension Plan		Chesapeake SERP	
At December 31,	**2023**	**2022**	**2023**	**2022**
(in thousands)				
Change in benefit obligation:				
Benefit obligation — beginning of year	$ 49,941	$ 67,030	$ 1,659	$ 2,096
Interest cost	2,495	1,781	81	50
Actuarial (gain) loss	454	(15,713)	48	(335)
Benefits paid	(3,233)	(3,157)	(152)	(152)
Benefit obligation — end of year	49,657	49,941	1,636	1,659
Change in plan assets:				
Fair value of plan assets — beginning of year	46,203	58,712	—	—
Actual return on plan assets	6,462	(9,552)	—	—
Employer contributions	—	200	152	152
Benefits paid	(3,233)	(3,157)	(152)	(152)
Fair value of plan assets — end of year	49,432	46,203	—	—
Accrued pension cost / funded status	$ (225)	$ (3,738)	$ (1,636)	$ (1,659)
Assumptions:				
Discount rate	5.00 %	5.25 %	4.88 %	5.00 %
Expected return on plan assets	6.00 %	6.00 %	— %	— %

	FPU Pension Plan			Chesapeake SERP		
For the Years Ended December 31,	**2023**	**2022**	**2021**	**2023**	**2022**	**2021**
(in thousands)						
Components of net periodic pension cost:						
Interest cost	$ 2,495	$ 1,781	$ 1,714	$ 81	$ 50	$ 48
Expected return on assets	(2,670)	(3,430)	(3,306)	—	—	—
Amortization of actuarial loss	407	466	612	8	28	28
Total periodic cost	$ 232	$ (1,183)	$ (980)	$ 89	$ 78	$ 76
Assumptions:						
Discount rate	5.25 %	2.75 %	2.50 %	5.00 %	2.50 %	2.25 %
Expected return on plan assets	6.00 %	6.00 %	6.00 %	— %	— %	— %

During the fourth quarter of 2021, we formally terminated the Chesapeake Pension Plan. Total periodic cost for the plan during that year was $2.0 million attributable to a settlement charge.

Our funding policy provides that payments to the trust of each qualified plan shall be equal to at least the minimum funding requirements of the Employee Retirement Income Security Act of 1974. The following schedule summarizes the assets of the FPU Pension Plan, by investment type, at December 31, 2023, 2022 and 2021:

	FPU Pension Plan		
At December 31,	2023	2022	2021
Asset Category			
Equity securities	**50 %**	53 %	52 %
Debt securities	**49 %**	38 %	38 %
Other	**1 %**	9 %	10 %
Total	**100 %**	100 %	100 %

The investment policy of the FPU Pension Plan is designed to provide the capital assets necessary to meet the financial obligations of the plan. The investment goals and objectives are to achieve investment returns that, together with contributions, will provide funds adequate to pay promised benefits to present and future beneficiaries of the plan, earn a competitive return to increasingly fund a large portion of the plan's retirement liabilities, minimize pension expense and cumulative contributions resulting from liability measurement and asset performance, and maintain the appropriate mix of investments to reduce the risk of large losses over the expected remaining life of the plan.

The following allocation range of asset classes is intended to produce a rate of return sufficient to meet the FPU Pension Plan's goals and objectives:

Asset Allocation Strategy

Asset Class	Minimum Allocation Percentage	Maximum Allocation Percentage
Domestic Equities (Large Cap, Mid Cap and Small Cap)	33 %	57 %
Fixed Income (Inflation Bond and Taxable Fixed)	38 %	58 %
Foreign Equities (Developed and Emerging Markets)	3 %	7 %
Cash	0 %	5 %

Due to periodic contributions and different asset classes producing varying returns, the actual asset values may temporarily move outside of the intended ranges. The investments are monitored on a quarterly basis, at a minimum. for asset allocation and performance. At December 31, 2023 and 2022, the assets of the FPU Pension Plan were comprised of the following investments:

FPSC EXH NO. 8
ADMITTED

Asset Category *(in thousands)*	Fair Value Measurement Hierarchy For Year Ended December 31, 2023	2022
Mutual Funds - Equity securities		
U.S. Large Cap [1]	$ 15,360	$ 3,413
U.S. Mid Cap [1]	4,271	1,425
U.S. Small Cap [1]	2,518	692
International [2]	2,499	9,352
Alternative Strategies [3]	—	4,824
	24,648	19,706
Mutual Funds - Debt securities		
Fixed income [4]	24,228	15,343
High Yield [4]	—	2,269
	24,228	17,612
Mutual Funds - Other		
Commodities [5]	—	1,832
Real Estate [6]	—	1,709
Guaranteed deposit [7]	556	398
	556	3,939
Total Pension Plan Assets in fair value hierarchy [8]	49,432	41,257
Investments measured at net asset value [9]	—	4,946
Total Pension Plan Assets	$ 49,432	$ 46,203

[1] Includes funds that invest primarily in United States common stocks
[2] Includes funds that invest primarily in foreign equities and emerging markets equities
[3] Includes funds that actively invest in both equity and debt securities, funds that sell short securities and funds that provide long-term capital appreciation. The funds may invest in debt securities below investment grade
[4] Includes funds that invest in investment grade and fixed income securities
[5] Includes funds that invest primarily in commodity-linked derivative instruments and fixed income securities
[6] Includes funds that invest primarily in real estate
[7] Includes investment in a group annuity product issued by an insurance company
[8] All investments in the FPU Pension Plan are classified as Level 1 within the Fair Value hierarchy exclusive of the Guaranteed Deposit Account which is classified as Level 3
[9] Certain investments that were measured at net asset value per share have not been classified in the fair value hierarchy These amounts are presented to reconcile to total pension plan assets

At December 31, 2023 and 2022, our pension plan investments were classified under the same fair value measurement hierarchy (Level 1 through Level 3) described under Note 9, *Fair Value of Financial Instruments*. The Level 3 investments were recorded at fair value based on the contract value of annuity products underlying guaranteed deposit accounts, which was calculated using discounted cash flow models. The contract value of these products represented deposits made to the contract. plus earnings at guaranteed crediting rates, less withdrawals and fees. Certain investments that were measured at net asset value per share have not been classified in the fair value hierarchy and are presented in the table above to reconcile to total pension plan assets.

The changes in the fair value within our pension assets for Level 3 investments for the years ended December 31, 2023 and 2022 were immaterial.

Other Postretirement Benefits Plans

We sponsor two defined benefit postretirement health plans: the Chesapeake Utilities Postretirement Plan ("Chesapeake Postretirement Plan") and the FPU Medical Plan. At December 31, 2023 and 2022, the funded status of the Chesapeake Postretirement Plan was $1.1 million and $0.6 million, respectively. The funded status of the FPU Medical Plan was $0.4 million and $0.7 million as of December 31, 2023 and 2022, respectively.

Net periodic postretirement benefit costs for the Chesapeake Postretirement Plan and the FPU Medical Plan were not material for the years ended December 31, 2023, 2022, and 2021.

As of December 31, 2023, there was $12.8 million not yet reflected in net periodic postretirement benefit costs and included in accumulated other comprehensive income (loss) or as a regulatory asset. Net losses of $10.8 million and $1.2 million attributable to the FPU Pension Plan and Chesapeake Postretirement Plan, respectively, comprised most of this amount with $3.2 million recorded in accumulated other comprehensive income (loss) and $8.7 million recorded as a regulatory asset at December 31, 2023.

Pursuant to a Florida PSC order, FPU continues to record as a regulatory asset the portion of the unrecognized pension and postretirement benefit costs after the merger with Chesapeake Utilities related to its regulated operations.

Assumptions

The assumptions used for the discount rate to calculate the benefit obligations were based on the interest rates of high-quality bonds in 2023, considering the expected lives of each of the plans. In determining the average expected return on plan assets for the FPU Pension Plan, various factors, such as historical long-term return experience, investment policy and current and expected allocation, were considered. Since the FPU Pension Plan is frozen with respect to additional years of service and compensation, the rate of assumed compensation increases is not applicable.

The health care inflation rate for 2023 used to calculate the benefit obligation is 5 percent for medical and 6 percent for prescription drugs for the Chesapeake Postretirement Plan; and 5 percent for both medical and prescription drugs for the FPU Medical Plan.

Estimated Future Benefit Payments

In 2024, we do not expect to contribute to the FPU Pension Plan, and total payments of $0.2 million are expected for the Chesapeake SERP, Chesapeake Postretirement Plan and FPU Medical Plan combined.

The schedule below shows the estimated future benefit payments for each of the plans previously described:

(in thousands)	FPU Pension Plan(1)	Chesapeake SERP(2)	Chesapeake Postretirement Plan(2)	FPU Medical Plan(2)
2024	$ 3,528	$ 151	$ 42	$ 35
2025	$ 3,603	$ 164	$ 46	$ 35
2026	$ 3,617	$ 161	$ 45	$ 34
2027	$ 3,616	$ 158	$ 48	$ 33
2028	$ 3,651	$ 154	$ 49	$ 32
Years 2029 through 2033	$ 17,951	$ 689	$ 299	$ 143

(1) The pension plan is funded, therefore, benefit payments are expected to be paid out of the plan assets
(2) Benefit payments are expected to be paid out of our general funds

Retirement Savings Plan

We sponsor a 401(k) Retirement Savings Plan which is offered to all eligible employees who have completed three months of service. We match 100 percent of eligible participants' pre-tax contributions to the Retirement Savings Plan up to a maximum of six percent of eligible compensation. The employer matching contribution is made in cash and is invested based on a participant's investment directions. In addition, we may make a discretionary supplemental contribution to participants in the plan, without regard to whether or not they make pre-tax contributions. Any supplemental employer contribution is generally made in our common stock. With respect to the employer match and supplemental employer contribution, employees are 100 percent vested after two years of service or upon reaching 55 years of age while still employed by us. New employees who do not make an election to contribute and do not opt out of the Retirement Savings Plan will be automatically enrolled at a deferral rate of three percent. and the automatic deferral rate will increase by one percent per year up to a maximum of ten percent. All contributions and matched funds can be invested among the mutual funds available for investment.

Employer contributions to our Retirement Savings Plan totaled $6.6 million, $6.2 million. and $5.9 million for the years ended December 31, 2023, 2022 and 2021, respectively. As of December 31, 2023, there were 798,586 shares of our common stock reserved to fund future contributions to the Retirement Savings Plan.

Non-Qualified Deferred Compensation Plan

Members of our Board of Directors and officers of the Company are eligible to participate in the Non-Qualified Deferred Compensation Plan. Directors can elect to defer any portion of their cash or stock compensation and officers can defer up to 80 percent of their base compensation, cash bonuses or any amount of their stock bonuses (net of required withholdings). Officers may receive a matching contribution on their cash compensation deferrals up to six percent of their compensation, provided it does not duplicate a match they receive in the Retirement Savings Plan. Stock bonuses are not eligible for matching contributions. Participants are able to elect the payment of deferred compensation to begin on a specified future date or upon separation from service. Additionally, participants can elect to receive payments upon the earlier or later of a fixed date or separation from service. The payments can be made in one lump sum or annual installments for up to 15 years.

All obligations arising under the Non-Qualified Deferred Compensation Plan are payable from our general assets, although we have established a Rabbi Trust to informally fund the plan. Deferrals of cash compensation may be invested by the participants in various mutual funds (the same options that are available in the Retirement Savings Plan). The participants are credited with gains or losses on those investments. Deferred stock compensation may not be diversified. The participants are credited with dividends on their deferred common stock units in the same amount that is received by all other stockholders. Such dividends are reinvested into additional deferred common stock units. Assets held in the Rabbi Trust, recorded as Investments on the consolidated balance sheet. had a fair value of $12.3 million and $10.6 million at December 31, 2023 and 2022, respectively. The assets of the Rabbi Trust are at all times subject to the claims of our general creditors.

Deferrals of officer base compensation and cash bonuses and directors' cash retainers are paid in cash. All deferrals of executive performance shares and directors' stock retainers are made in the form of deferred common stock units and are paid out in shares of our common stock, on a one-for-one basis, except that cash is paid in lieu of fractional shares. The value of our stock held in the Rabbi Trust is classified within the stockholders' equity section of the consolidated balance sheets and has been accounted for in a manner similar to treasury stock. The amounts recorded under the Non-Qualified Deferred Compensation Plan totaled $9.1 million and $7.1 million at December 31, 2023 and 2022, respectively, which are also shown as a deduction against stockholders' equity in the consolidated balance sheet.

17. Share-Based Compensation Plans

Our key employees and non-employee directors have been granted share-based awards through our SICP. We record these share-based awards as compensation costs over the respective service period for which services are received in exchange for an award of equity or equity-based compensation. The compensation cost is based primarily on the fair value of the shares awarded, using the estimated fair value of each share on the date it was granted, and the number of shares to be issued at the end of the service period. We have 561,115 shares of common stock reserved for issuance under the SICP.

The table below presents the amounts included in net income related to share-based compensation expense for the awards granted under the SICP for the years ended December 31, 2023, 2022 and 2021:

	For the Year Ended December 31,		
(in thousands)	**2023**	**2022**	**2021**
Awards to key employees	**$ 6,716**	$ 5,479	$ 5,163
Awards to non-employee directors	**906**	959	782
Total compensation expense	**7,622**	6,438	5,945
Less: tax benefit	**(1,947)**	(1,663)	(1,535)
Share-based compensation amounts included in net income	**$ 5,675**	$ 4,775	$ 4,410

Officers and Key Employees

Our Compensation Committee is authorized to grant our key employees the right to receive awards of shares of our common stock, contingent upon the achievement of established performance goals and subject to SEC transfer restrictions once awarded. Our President and CEO has the right to issue awards of shares of our common stock. to other officers and key employees of the Company, contingent upon various performance goals and subject to SEC transfer restrictions.

We currently have several outstanding multi-year performance plans, which are based upon the successful achievement of long-term goals, growth and financial results and comprise both market-based and performance-based conditions and targets. The fair value per share, tied to a performance-based condition or target, is equal to the market price per share on the grant date. For the market-based conditions, we used a Monte Carlo valuation to estimate the fair value of each share granted.

The table below presents the summary of the stock activity for awards to all officers:

	Number of Shares	Weighted Average Fair Value
Outstanding — December 31, 2021	**197,398**	**$ 94.15**
Granted	69,620	117.61
Vested	(60,191)	90.60
Expired	(2,678)	91.42
Outstanding — December 31, 2022	**204,149**	**103.17**
Granted	80,820	126.06
Vested	(68,302)	91.59
Expired	(2,053)	94.64
Forfeited	(1,490)	113.44
Outstanding — December 31, 2023	**213,124**	**$ 117.74**

During the year ended December 31, 2023, we granted awards of 80,820 shares of common stock to officers and key employees under the SICP, including awards granted in February 2023 and to key employees appointed to officer positions. The shares granted are multi-year awards that will vest no later than the three-year service period ending December 31, 2025.

The aggregate intrinsic value of the SICP awards granted was $22.5 million, $24.1 million. and $28.8 million at December 31, 2023, 2022 and 2021, respectively. At December 31, 2023, there was $6.6 million of unrecognized compensation cost related to these awards, which is expected to be recognized through 2025.

In March 2023, 2022 and 2021, upon the election by certain of our executive officers, we withheld shares with a value at least equivalent to each such executive officer's minimum statutory obligation for applicable income and other employment taxes related to shares that vested and were paid in March 2023, 2022 and 2021 for the performance periods ended December 31, 2022, 2021, and 2020. We paid the balance of such awarded shares to each such executive officer and remitted the cash equivalent of the withheld shares to the appropriate taxing authorities. The below table presents the number of shares withheld and amounts remitted:

	For the Year Ended December 31,		
(amounts in thousands, except shares)	2023	2022	2021
Shares withheld to satisfy tax obligations	**19,859**	21,832	14,020
Amounts remitted to tax authorities to satisfy obligations	**$ 2,455**	$ 2,838	$ 1,478

Non-employee Directors

Shares granted to non-employee directors are issued in advance of the directors' service periods and are fully vested as of the grant date. We record a deferred expense equal to the fair value of the shares issued and amortize the expense equally over a service period of one year or less.

Our directors receive an annual retainer of shares of common stock under the SICP for services rendered through the subsequent Annual Meeting of Shareholders. Accordingly, our directors that served on the Board as of May 2023 and 2022 each received 765 and 652 shares of common stock. respectively, with a weighted average fair value of $124.12 and $130.36 per share, respectively.

At December 31, 2023, there was $0.3 million of unrecognized compensation expense related to shares granted to non-employee directors. This expense will be recognized over the remaining service period ending in May 2024.

18. Rates and Other Regulatory Activities

Our natural gas and electric distribution operations in Delaware, Maryland and Florida are subject to regulation by their respective PSC; Eastern Shore, our natural gas transmission subsidiary, is subject to regulation by the FERC; and Peninsula Pipeline and Aspire Energy Express, our intrastate pipeline subsidiaries, are subject to regulation (excluding cost of service) by the Florida PSC and Public Utilities Commission of Ohio, respectively.

Refer to the additional details below pertaining to the Customer Information System Regulatory Asset Petition and COVID-19 impact.

Delaware

The October 2, 2023, application for the issuance of common stock and long-term debt was unanimously approved on October 25, 2023, by the Delaware PSC.

In September 2023, the Delaware Division submitted the Energy Efficiency Rider application for natural gas with the Delaware PSC after obtaining an affirmative recommendation from the Delaware Energy Efficiency Advisory Council ("EEAC"). The application is the first in the state and applies to a portfolio of four programs including, Home Energy Counseling, Home Performance with Energy Star, Assisted Home Performance with Energy Star, and standard Offer Program in which customers can participate and allow for recovery. The evidentiary hearing on this matter is set for April 2024. If approved as filed, rates will be effective May 1, 2024.

Maryland

On October 2, 2023, Chesapeake filed a notification of the financing plans associated with the FCG acquisition with the Maryland PSC. The filing was successfully noted during the November 1, 2023, Maryland PSC administrative meeting.

Maryland Natural Gas Rate Case: In January 2024, our natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, we are seeking approval of the following: (i) permanent rate relief of approximately $6.9 million; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses under the new corporate entity which we anticipate will be called Chesapeake Utilities of Maryland, Inc.; and (iii) authorization to establish a rider for recovery of the costs associated with our new technology systems. The outcome of the application is subject to review and approval by the Maryland PSC.

Maryland Natural Gas Depreciation Study: In January 2024, our Maryland natural gas distribution businesses filed a joint petition for approval of their proposed unified depreciation rates with the Maryland PSC. If approved, new rates will become effective retroactively on January 1, 2023.

Ocean City Maryland Reinforcement: During the second quarter of 2022, we began construction of an extension of service into North Ocean City, Maryland. Our Delaware natural gas division and Sandpiper installed approximately 5.4 miles of pipeline across southern Sussex County, Delaware to Fenwick Island, Delaware and Worcester County, Maryland. The project reinforces our existing system in Ocean City, Maryland and enables incremental growth along the pipeline. Construction of this project was completed in the second quarter of 2023. The Company filed a natural gas rate case application with the PSC for the state of Maryland in January 2024 as discussed above.

Florida

Wildlight Expansion: In August 2022, Peninsula Pipeline and FPU filed a joint petition with the Florida PSC for approval of its Transportation Service Agreement associated with the Wildlight planned community located in Nassau County, Florida. The project enables us to meet the significant growing demand for service in Yulee, Florida. The agreement will enable us to construct the project during the build-out of the community, and charge the reservation rate as each phase of the project goes into service. Construction of the pipeline facilities will occur in two separate phases. Phase one consists of three extensions with associated facilities, and a gas injection interconnect with associated facilities. Phase two will consist of two additional pipeline extensions. The various phases of the project commenced in the first quarter of 2023, with construction on the overall project continuing through 2025. The petition was approved by the Florida PSC in November 2022.

Florida Natural Gas Rate Case: In May 2022, our legacy natural gas distribution businesses in Florida filed a consolidated natural gas rate case with the Florida PSC. The application included a request for the following: (i) permanent rate relief of approximately $24.1 million, effective January 1, 2023, (ii) a depreciation study also submitted with the filing; (iii) authorization to make certain changes to tariffs to include the consolidation of rates and rate structure across the businesses and to unify the Florida Natural Gas distribution businesses under FPU; (iv) authorization to retain the acquisition adjustment recorded at the time of the FPU merger in our revenue requirement; and (v) authorization to establish an environmental remediation surcharge for the purposes of addressing future expected remediation costs for FPU MGP sites. In August 2022, interim rates were approved by the Florida PSC in the amount of approximately $7.7 million on an annualized basis, effective for all meter readings in September 2022. The discovery process and subsequent hearings were concluded during the fourth quarter of 2022 and briefs were submitted during the same quarter of 2022. In January 2023, the Florida PSC approved the application for consolidation and permanent rate relief of approximately $17.2 million on an annual basis. Actual rates in connection with the rate relief were approved by the Florida PSC in February 2023 with an effective date of March 1, 2023.

FCG Natural Gas Rate Case: In May 2022, FCG filed a general base rate increase with the Florida PSC based on a projected 2023 test year. In June 2023, the Florida PSC issued an order approving a single total base revenue increase of $23.3 million (which included an incremental increase of $14.1 million, a previously approved increase of $3.8 million for a liquefied natural gas facility, and $5.3 million to transfer the SAFE investments from a rider clause to base rates), with new rates becoming effective as of May 1, 2023. The Commission also approved FCG's proposed RSAM with a $25.0 million reserve amount. continuation and expansion of the capital SAFE program, implementation of an automated metering infrastructure pilot, and continuation of the storm damage reserve with a target reserve of $0.8 million. On June 23, 2023, the Florida OPC filed a motion for reconsideration of the PSC's approval of RSAM, which was denied on September 12, 2023. On July 7, 2023, the Florida OPC filed a notice of appeal with the Florida Supreme Court, which is pending. The Florida OPC filed their initial brief on January 31, 2024.

The RSAM is recorded as either an increase or decrease to accrued removal costs which is reflected on the Company's balance sheets and a corresponding increase or decrease to depreciation and amortization expense. In order to earn the targeted regulatory ROE in each reporting period subject to the conditions of the effective rate agreement, RSAM is calculated using a trailing thirteen-month average of rate base and capital structure in conjunction with the trailing twelve months regulatory base net operating income, which primarily includes the base portion of rates and other revenues, net of operations and maintenance expenses, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items is adjusted. in part, by RSAM or its reversal to earn the targeted regulatory ROE. For the year ended December 31, 2023, the Company recorded decreases to asset removal costs and depreciation expense of $5.1 million as a result of the RSAM adjustment.

Beachside Pipeline Extension: In June 2021, Peninsula Pipeline and FCG entered into a Transportation Service Agreement for an incremental 10,176 Dts/d of firm service in Indian River County, Florida, to support FCG's growth along the Indian River's barrier island. As part of this agreement, Peninsula Pipeline constructed 11.3 miles of pipeline from its existing pipeline in the Sebastian, Florida area. traveling east under the Intercoastal Waterway and southward on the barrier island. The project was placed in-service during April 2023.

St. Cloud / Twin Lakes Expansion: In July 2022, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 2,400 Dt/d of firm service in the St. Cloud, Florida area. As part of this agreement. Peninsula Pipeline constructed a pipeline extension and regulator station for FPU. The extension supports new incremental load due to growth in the area, including providing service, most immediately, to the residential development, Twin Lakes. The expansion also improves reliability and provides operational benefits to FPU's existing distribution system in the area, supporting future growth. The petition was approved by the Florida PSC in October 2022, and the expansion was placed into service during the third quarter of 2023.

Storm Protection Plan: In 2020, the Florida PSC implemented the Storm Protection Plan ("SPP") and Storm Protection Plan Cost Recovery Clause ("SPPCRC") rules, which require electric utilities to petition the Florida PSC for approval of a Transmission and Distribution Storm Protection Plan that covers the utility's immediate 10-year planning period with updates to the plan at least every 3 years. The SPPCRC rules allow the utility to file for recovery of associated costs for the SPP. Our Florida electric distribution operations' SPP was filed during the first quarter of 2022 and approved in the fourth quarter of 2022, with modifications, by the Florida PSC. Rates associated with this initiative were effective in January 2023. The Company filed 2024 SPPCRC projections on May 1, 2023. A hearing was held on September 12, 2023. The Commission voted to approve the projections on November 9, 2023. FPU projects to spend $13.6 million on the program in 2024.

Lake Wales Pipeline Acquisition: In February 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 9,000 Dt/d of firm service in the Lake Wales, Florida area. The Commission approved the petition in April 2023. Approval of the agreement allowed Peninsula Pipeline to complete the acquisition of the existing pipeline in May 2023 which is being utilized to serve both current and new natural gas customers.

GUARD: In February 2023, FPU filed a petition with the Florida PSC for approval of the GUARD program. GUARD is a ten-year program to enhance the safety, reliability, and accessibility of portions of our natural gas distribution system. We identified various categories of projects to be included in GUARD, which include the relocation of mains and service lines located in rear easements and other difficult to access areas to the front of the street, the replacement of problematic distribution mains, service lines, and maintenance and repair equipment and system reliability projects. In August 2023, the Florida PSC approved the GUARD program, which included $205.0 million of capital expenditures projected to be spent over a 10-year period.

Newberry Expansion: In April 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 8,000 Dt/d of firm service in the Newberry, Florida area. The petition was approved by the Florida PSC in the third quarter of 2023. Peninsula Pipeline will construct a pipeline extension. which will be used by FPU to support the development of a natural gas distribution system to provide gas service to the City of Newberry. A filing to address the acquisition and conversion of propane community gas systems in Newberry was made in November 2023, and the Florida PSC is scheduled to vote on this in March 2024. The Company anticipates beginning the conversions of the community gas systems in the second quarter of 2024.

Amendment to Escambia County Agreement: In April of 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of an amendment to an existing contract with FPU. This amendment will allow Peninsula Pipeline to construct an additional delivery point on a pipeline located in Escambia County. The additional delivery point comes at the request of an FPU customer and will be used to enhance natural gas service in the area. The amendment was approved by the Florida PSC in the third quarter of 2023.

Florida Electric Depreciation Study: The Florida PSC requires electric utilities to file a depreciation study every four years to reevaluate and set depreciation rates for the utility's plant assets. In June 2023, FPU filed a petition with the Florida PSC for approval of its proposed depreciation rates, which was approved in December 2023.

East Coast Reinforcement Projects: In December 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively.

Eastern Shore

Southern Expansion Project: In January 2022, Eastern Shore submitted a prior notice filing with the FERC pursuant to blanket certificate procedures, regarding its proposal to install an additional compressor unit and related facilities at Eastern Shore's compressor station in Bridgeville, Sussex County, Delaware. The project enables Eastern Shore to provide additional firm natural gas transportation service to an existing shipper on its pipeline system. The project obtained FERC approval in December 2022 and went into service in October 2023.

Capital Cost Surcharge: In December 2022, Eastern Shore submitted a filing with the FERC regarding a capital cost surcharge to recover capital costs associated with the replacement of existing Eastern Shore facilities as a result of mandated highway relocation projects as well as compliance with the PHMSA regulation. The capital cost surcharge mechanism was approved in Eastern Shore's last rate case. In conjunction with the filing of this surcharge, a cumulative adjustment to the existing surcharge to reflect additional depreciation was included. The FERC issued an order approving the surcharge as filed on December 19, 2022. The combined revised surcharge became effective January 1, 2023.

Worcester Resiliency Upgrade: In August 2023, Eastern Shore filed an application with the FERC requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, DE and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. Eastern Shore has requested certificate authorization by December 2024, with a target in-service date by the third quarter of 2025.

Various Jurisdictional Activity Related to the Joint Customer Information System Project

In July 2022, we filed a joint petition for our natural gas divisions in Maryland (Maryland Division, Sandpiper, and Elkton Gas) for the approval to establish a regulatory asset for non-capitalizable expenses related to the initial development and implementation of our new Customer Information System ("CIS") system. The petition was approved by the Maryland PSC in August 2022. A similar petition for our Florida Regulated Energy businesses was filed during the same time frame, however, the Florida PSC approved capitalization of these expenses in lieu of establishment of regulatory assets. Additionally, our Delaware Division has the ability to defer these costs as a regulatory asset. We have completed the system selection process and the CIS implementation began during the first quarter of 2023.

COVID-19 Impact

In March 2020, the CDC declared a national emergency due to the rapidly growing outbreak of COVID-19. In response to the declaration and the rapid spread of COVID-19 within the United States, federal, state and local governments throughout the country imposed varying degrees of restrictions on social and commercial activity to promote social distancing in an effort to slow the spread of the illness. These restrictions significantly impacted economic conditions in the United States in 2020 and continued to impact economic conditions, to a lesser extent. through 2021 and 2022. Chesapeake Utilities is considered an "essential business," which allowed us to continue operational activities and construction projects with appropriate safety precautions and personal protective equipment. while being mindful of the social distancing restrictions that were in place.

In response to the COVID-19 pandemic and related restrictions, we experienced reduced consumption of energy largely in the commercial and industrial sectors, higher bad debt expenses and incremental expenses associated with COVID-19, including expenditures associated with personal protective equipment and premium pay for field personnel. The additional operating expenses we incurred support the ongoing delivery of our essential services during the height of the pandemic. In April and May 2020, we were authorized by the Maryland and Delaware PSCs, respectively, to record regulatory assets for COVID-19 related costs which offered us the ability to seek recovery of those costs. In July 2021, the Florida PSC issued an order that approved incremental expenses we incurred due to COVID-19. The order allowed us to establish a regulatory asset in a total amount of $2.1 million as of June 30, 2021 for natural gas and electric distribution operations. The regulatory asset is being amortized over two years and is recovered through the Purchased Gas Adjustment and Swing Service mechanisms for our natural gas distribution businesses and through the Fuel Purchased Power Cost Recovery clause for our electric division. As of December 31, 2023 and 2022, our total COVID-19 regulatory asset balance was $0.2 million and $1.2 million, respectively.

Summary TCJA Table

Customer rates for our regulated business were adjusted. as approved by the regulators, prior to 2020 except for Elkton Gas, which implemented a one-time bill credit in May 2020. The following table summarized the regulatory liabilities related to accumulated deferred taxes ("ADIT") associated with TCJA for our regulated businesses as of December 31, 2023 and 2022:

	Amount (in thousands)		
Operation and Regulatory Jurisdiction	**December 31, 2023**	**December 31, 2022**	**Status**
Eastern Shore (FERC)	$34,190	$34,190	Will be addressed in Eastern Shore's next rate case filing
Chesapeake Delaware natural gas division (Delaware PSC)	$12,038	$12,230	PSC approved amortization of ADIT in January 2019
Chesapeake Maryland natural gas division (Maryland PSC)	$3,585	$3,703	PSC approved amortization of ADIT in May 2018.
Sandpiper Energy (Maryland PSC)	$3,487	$3,597	PSC approved amortization of ADIT in May 2018.
Florida Natural Gas distribution (Florida PSC) (1)	$26,757	$27,179	PSC issued order authorizing amortization and retention of net ADIT liability by the Company in February 2019.
FPU electric division (Florida PSC)	$4,760	$4,993	In January 2019, PSC issued order approving amortization of ADIT through purchased power cost recovery, storm reserve and rates
Elkton Gas (Maryland PSC)	$1,027	$1,059	PSC approved amortization of ADIT in March 2018

(1) In accordance with the Florida PSC approval of our natural gas base rate proceeding, effective March 1, 2023, our natural gas distribution businesses in Florida have been consolidated and amounts above are now being presented on a consolidated basis consistent with the final rate order

Regulatory Assets and Liabilities

At December 31, 2023 and 2022, our regulated utility operations recorded the following regulatory assets and liabilities included in our consolidated balance sheets, including amounts attributable to FCG. These assets and liabilities will be recognized as revenues and expenses in future periods as they are reflected in customers' rates.

FPSC EXH NO. 8

(in thousands)	As of December 31, 2023	As of December 31, 2022
Regulatory Assets		
Under-recovered purchased fuel, gas and conservation cost recovery [(1)] [(2)]	$ **13,696**	$ 43,583
Under-recovered GRIP revenue [(3)]	**1,777**	1,705
Deferred postretirement benefits [(4)]	**10,802**	13,927
Deferred conversion and development costs [(1)]	**21,466**	23,653
Acquisition adjustment [(5)]	**31,857**	25,609
Deferred costs associated with COVID-19 [(6)]	**190**	1,233
Deferred storm costs [(7)]	**19,370**	27,687
Deferred rate case expenses - current	**1,171**	—
Other	**15,573**	12,256
Total Regulatory Assets	$ **115,902**	$ 149,653
Regulatory Liabilities		
Self-insurance [(8)]	$ **521**	$ 339
Over-recovered purchased fuel and conservation cost recovery [(1)]	**12,340**	3,827
Over-recovered GRIP revenue [(3)]	**501**	—
Storm reserve [(8)]	**1,900**	2,845
Accrued asset removal cost [(9)]	**86,534**	50,261
Deferred income taxes due to rate change [(10)]	**105,055**	87,690
Interest related to storm recovery [(7)]	**536**	1,207
Other	**1,611**	1,851
Total Regulatory Liabilities	$ **208,998**	$ 148,020

[(1)] We are allowed to recover the asset or are required to pay the liability in rates We do not earn an overall rate of return on these assets

[(2)] At December 31, 2022, includes $21 2 million being recovered over a three year period primarily concentrated in our electric division Per Florida PSC approval, our electric division was allowed to recover these amounts over an extended period of time in an effort to reduce the impact of increased commodity prices to our customers Recovery of these costs began in January 2023

[(3)] The Florida PSC allowed us to recover through a surcharge, capital and other program-related-costs, inclusive of an appropriate return on investment, associated with accelerating the replacement of qualifying distribution mains and services (defined as any material other than coated steel or plastic) in FPU's natural gas distribution, Fort Meade division and Chesapeake Utilities' CFG division. We are allowed to recover the asset or are required to pay the liability in rates related to GRIP

[(4)] The Florida PSC allowed FPU to treat as a regulatory asset the portion of the unrecognized costs pursuant to ASC Topic 715, *Compensation - Retirement Benefits*, related to its regulated operations. This balance also includes the portion of pension settlement expense associated with the termination of the Chesapeake Pension Plan pursuant to an order from the FERC and the respective PSCs that allowed us to defer Eastern Shore, Delaware and Maryland Divisions' portion. See Note 16, *Employee Benefit Plans*, for additional information

[(5)] We are allowed to include the premiums paid in various natural gas utility acquisitions in Florida in our rate bases and recover them over a specific time period pursuant to the Florida PSC approvals. We paid $34 2 million of the premium in 2009, including a gross up for income tax, because it is not tax deductible, and $0 7 million of the premium paid by FPU in 2010 For additional information, see *Florida Natural Gas Rate Case* discussion above

[(6)] We deferred as regulatory assets the net incremental expense impact associated with the net expense impact of COVID-19 as authorized by the stated PSCs

[(7)] The Florida PSC authorized us to recover regulatory assets (including interest) associated with the recovery of Hurricanes Michael and Dorian storm costs which will be amortized between 6 and 10 years Recovery of these costs includes a component of an overall return on capital additions and regulatory assets

[(8)] We have storm reserves in our Florida regulated energy operations and self-insurance for our regulated energy operations that allow us to collect through rates amounts to be used against general claims, storm restoration costs and other losses as they are incurred

[(9)] See Note 2, *Summary of Significant Accounting Policies*, for additional information on our asset removal cost policies

[(10)] We recorded a regulatory liability for our regulated businesses related to the revaluation of accumulated deferred tax assets/liabilities as a result of the TCJA The liability will be amortized over a period between 5 to 80 years based on the remaining life of the associated property Based upon the regulatory proceedings, we will pass back the respective portion of the excess accumulated deferred taxes to rate payers See Note 11, *Income Taxes*, for additional information

J735

19. Environmental Commitments and Contingencies

We are subject to federal, state and local laws and regulations governing environmental quality and pollution control. These laws and regulations require us to remove or remediate, at current and former operating sites, the effect on the environment of the disposal or release of specified substances.

MGP Sites

We have participated in the investigation, assessment or remediation of, and have exposures at, seven former MGP sites. We have received approval for recovery of clean-up costs in rates for sites located in Salisbury, Maryland; Seaford, Delaware; and Winter Haven, Key West, Pensacola, Sanford and West Palm Beach, Florida.

As of December 31, 2023 and 2022, we had approximately $3.6 million and $4.3 million, respectively, in environmental liabilities, related to the former MGP sites. As of December 31, 2023 and 2022, we have cumulative regulatory assets of $0.5 million and $0.8 million, respectively, for future recovery of environmental costs from customers. Specific to FPU's four MGP sites in Key West, Pensacola, Sanford and West Palm Beach, FPU has approval for and has recovered, through a combination of insurance and customer rates, $14.0 million of its environmental costs related to its MGP sites as of December 31, 2023.

Environmental liabilities for our MGP sites are recorded on an undiscounted basis based on the estimate of future costs provided by independent consultants. We continue to expect that all costs related to environmental remediation and related activities, including any potential future remediation costs for which we do not currently have approval for regulatory recovery, will be recoverable from customers through rates.

Remediation is ongoing for the MGP's in Winter Haven and Key West in Florida and in Seaford, Delaware and the remaining clean-up costs are estimated to be between $0.3 million to $0.9 million for these three sites. The Environmental Protection Agency has approved a "site-wide ready for anticipated use" status for the Sanford, Florida MGP site, which is the final step before delisting a site. The remaining remediation expenses for the Sanford MGP site are immaterial.

The remedial actions approved by the Florida Department of Environmental Protection have been implemented on the east parcel of our West Palm Beach Florida site. Similar remedial actions have been initiated on the site's west parcel, and construction of active remedial systems are expected to be completed in 2024. Remaining remedial costs for West Palm Beach, including completion of the construction of the system on the West Parcel, five to ten years of operation, maintenance and monitoring, and final site work for closeout of the property, is estimated to be between $1.9 million and $3.2 million.

20. Other Commitments and Contingencies

Natural Gas, Electric and Propane Supply

In March 2023, our Delmarva Peninsula natural gas distribution operations entered into asset management agreements with a third party to manage their natural gas transportation and storage capacity. The agreements were effective as of April 1, 2023 and expire in March 2026.

FPU natural gas distribution operations and Eight Flags have separate asset management agreements with Emera Energy Services, Inc. to manage their natural gas transportation capacity. These agreements commenced in November 2020 and expire in October 2030.

Florida Natural Gas has firm transportation service contracts with FGT and Gulfstream. Pursuant to a capacity release program approved by the Florida PSC, all of the capacity under these agreements has been released to various third parties. Under the terms of these capacity release agreements, Chesapeake Utilities is contingently liable to FGT and Gulfstream should any party, that acquired the capacity through release, fail to pay the capacity charge. To date, Chesapeake Utilities has not been required to make a payment resulting from this contingency.

FPU’s electric supply contracts require FPU to maintain an acceptable standard of creditworthiness based on specific financial ratios. FPU’s agreement with Florida Power & Light Company requires FPU to meet or exceed a debt service coverage ratio of 1.25 times based on the results of the prior 12 months. If FPU fails to meet this ratio, it must provide an irrevocable letter of credit or pay all amounts outstanding under the agreement within five business days. FPU’s electric supply agreement with Gulf Power requires FPU to meet the following ratios based on the average of the prior six quarters: (a) funds from operations interest coverage ratio (minimum of 2 times), and (b) total debt to total capital (maximum of 65 percent). If FPU fails to meet the requirements, it has to provide the supplier a written explanation of actions taken, or proposed to be taken, to become compliant. Failure to comply with the ratios specified in the Gulf Power agreement could also result in FPU having to provide an irrevocable letter of credit. As of December 31, 2023, FPU was in compliance with all of the requirements of its supply contracts.

Eight Flags provides electricity and steam generation services through its CHP plant located on Amelia Island, Florida. In June 2016, Eight Flags began selling power generated from the CHP plant to FPU pursuant to a 20-year power purchase agreement for distribution to our electric customers. In July 2016, Eight Flags also started selling steam pursuant to a separate 20-year contract, to the landowner on which the CHP plant is located. The CHP plant is powered by natural gas transported by FPU through its distribution system and Peninsula Pipeline through its intrastate pipeline.

The total purchase obligations for natural gas, electric and propane supplies are as follows:

Year *(in tho[redacted])*	2024	2025-2026	2027-2028	Beyond 2028	Total
Purchase Obligations	$ 86,040	$ 105,082	$ 83,851	$ 41,287	$ 416,260

Corporate Guarantees

The Board of Directors has authorized us to issue corporate guarantees securing obligations of our subsidiaries and to obtain letters of credit securing our subsidiaries' obligations. The maximum authorized liability under such guarantees and letters of credit as of December 31, 2023 was $35.0 million. The aggregate amount guaranteed related to our subsidiaries at December 31, 2023 was approximately $24.3 million with the guarantees expiring on various dates through December 2024. In addition. the Board has authorized us to issue specific purpose corporate guarantees. The amount of specific purpose guarantees outstanding at December 31, 2023 was $4.0 million.

As of December 31, 2023, we have issued letters of credit totaling approximately $7.0 million related to the electric transmission services for FPU's electric division, the firm transportation service agreement between TETLP and our Delaware and Maryland divisions, the capacity agreement between NEXUS and Aspire, and our current and previous primary insurance carriers. These letters of credit have various expiration dates through October 2024 and to date, none have been used. We do not anticipate that the counterparties will draw upon these letters of credit. and we expect that they will be renewed to the extent necessary in the future.

Item 9. Changes In and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Our Chief Executive Officer and Chief Financial Officer, with the participation of other Company officials, have evaluated our "disclosure controls and procedures" (as such term is defined under Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended) as of December 31, 2023. Based upon their evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2023.

CHANGE IN INTERNAL CONTROLS

During the quarter ended December 31, 2023, other than the ongoing changes resulting from the FCG acquisition discussed below, there have been no changes in internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)) that have materially affected, or are reasonably likely to materially affect, internal controls over financial reporting.

On November 30, 2023, we completed the acquisition of FCG. We are currently integrating processes, procedures, and internal controls related to the acquisition. See Note 4, *Acquisitions,* to the consolidated financial statements and Management's Report on Internal Control Over Financial Reporting for additional information related to the acquisition of FCG. The scope of that assessment excluded FCG, which we acquired on November 30, 2023. FCG's total assets and loss before taxes represented approximately 31 percent and 4 percent, respectively, of the Company's consolidated total assets and earnings before taxes as of December 31, 2023 and for the year then ended. This exclusion is permitted based upon current guidance of the U.S. Securities & Exchange Commission.

CEO AND CFO CERTIFICATIONS

Our Chief Executive Officer and Chief Financial Officer have filed with the SEC the certifications required by Section 302 of the Sarbanes-Oxley Act of 2002 as Exhibits 31.1 and 31.2 to our Annual Report on Form 10-K for the fiscal year ended December 31, 2023. In addition, on May 31, 2023 our Chief Executive Officer certified to the NYSE that he was not aware of any violation by us of the NYSE corporate governance listing standards.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act. A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. A company's internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records which in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, our management conducted an evaluation of the effectiveness of its internal control over financial reporting based on the criteria established in an updated report entitled "Internal Control - Integrated Framework," issued in May 2013 by the Committee of Sponsoring Organizations of the Treadway Commission. The scope of that assessment excluded FCG, which we acquired on November 30, 2023. FCG's total assets and loss before taxes represented approximately 31 percent and 4 percent, respectively, of the Company's consolidated total assets and earnings before taxes as of December 31, 2023 and for the year then ended. This exclusion is permitted based upon current guidance of the U.S. Securities & Exchange Commission.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management has evaluated and concluded that our internal control over financial reporting was effective as of December 31, 2023.

Our independent registered public accounting firm, Baker Tilly US, LLP, has audited the effectiveness of our internal control over financial reporting as of December 31, 2023, as stated in its attestation report which appears under Part II, *Item 8. Financial Statements and Supplementary Data*.

Item 9B. Other Information.

None.

ITEM 9C. Disclosure Regarding Foreign Jurisdictions That Prevent Inspections

None.

Part III

Item 10. Directors, Executive Officers of the Registrant and Corporate Governance.

We have adopted a Code of Ethics that applies to our Principal Executive Officer, President, Principal Financial Officer, Principal Accounting Officer, Treasurer, Assistant Treasurer, Corporate Controller and persons performing similar functions, which is a “code of ethics” as defined by applicable rules of the SEC. This Code of Ethics is publicly available on our website at https://www.chpk.com. If we make any amendments to this code other than technical, administrative or other non-substantive amendments, or grant any waivers, including implicit waivers, from a provision of this code to the individuals and roles noted above, or persons performing similar functions, we intend to disclose the nature of the amendment or waiver, its effective date and to whom it applies by posting such information on our website at the address and location specified above.

The remaining information required by this Item is incorporated herein by reference to the sections of our Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Election of Directors (Proposal 1),” “Governance Trends and Director Education," "Corporate Governance Practices,” “Board of Directors and its Committees” and “Delinquent Section 16(a) Reports.”

Item 11. Executive Compensation.

The information required by this Item is incorporated herein by reference to the sections of our Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Director Compensation,” “Executive Compensation” and “Compensation Discussion and Analysis".

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The information required by this Item is incorporated herein by reference to the sections of our Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Security Ownership of Certain Beneficial Owners and Management” and "Equity Compensation Plan Information."

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information required by this Item is incorporated herein by reference to the section of our Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Corporate Governance Practices” and "Director Independence."

Item 14. Principal Accounting Fees and Services.

The information required by this Item is incorporated herein by reference to the portion of the Proxy Statement (which we intend to file with the SEC within 120 days after the close of our fiscal year) captioned “Fees and Services of Independent Registered Public Accounting Firm." The Company's independent registered public accounting firm is Baker Tilly US, LLP, PCAOB ID: (23)
