**Re: Docket No. 20250011-EI - Petition for rate increase by Florida Power & Light Company**

Dear Mr. Teitzman:

This filing is being made via the Florida Public Service Commission's web-based electronic filing portal in five separate filings due to the voluminous sizes of the Exhibits filed with Citizens' Motion and Notice of Intent to Seek Official Recognition.

This filing is **No. 2 of 5**: Exhibit J (Part 1 of 3)

Please note **Exhibit J has been divided into three (3) parts due to electronic filing requirements.**

If you have any questions or concerns, please do not hesitate to contact me. Thank you for your assistance in this matter.

Sincerely,

Walt Trierweiler  
Public Counsel

**Subject:** FPL rate increases

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hello,

I heard on the news that Florida power and light was asking for a rate increase for the next three years. I personally feel FPL is taking advantage of its customers and the public service commission. The customers of Florida are paying too much as it is. We wasn't paying no where near what we are now when the Southern Company had north west FL. Ever since FPL bought our area, the prices have skyrocketed and the customers are tired of their rate increases. Enough is enough. I was in the military and can recognize when someone is making a turd shine and this is one of those times. They are spending/wasting money on TV and radio advertising, it's not like I have a choice where I get my power from. If FPL keeps needing ridiculous increases, or increases often, sounds like whoever is running that company is irresponsible. NO TO RATE INCREASE.

Dear Mike LaRosa,

I am writing as a concerned Florida resident and customer of Florida Power & Light (FPL). I received notification that FPL intends to increase rates for their customers across the state, hurting the most vulnerable in our communities the most. We urge you to rethink this decision and not increase our bills.

This past year has been challenging and unrelenting, and folks have spent it worrying; worrying about the health and safety of their families and friends; worrying about finding work or being safe at work; worrying about the future of the business they built from the ground up; and worrying about making sure that they could keep the lights and heat on at home. For many of us, the pandemic has changed all of our lives in ways we'll still likely be grappling with long after the pandemic comes to an end.

Nevertheless, for some reason, corporate greed seems to be more important than the sustainability of our communities and our livelihood. This was evident when FPL, among several other power companies resumed closing customer accounts due to non-payment during the second wave of the pandemic. Now, they want to increase rates for their most vulnerable customers. We can't allow companies to continue taking advantage of working-class families, and luckily, you have the power NOW to stop this.

Our families need relief, real solutions to the climate crisis and fair and affordable utility rates. By raising prices, FPL is treating energy as a commodity when it's a necessity. We are demanding that Florida Power & Light halt this unfair plan and that Florida's Public Service Commission require FPL to maintain fair rates for their consumers, and prioritize the communities they serve.

Sincerely,  
Ms Manouchka Marcelus

To: GovernorRon.DeSantis@eog.myflorida.com  
Subject: FPL increases

Governor Desantis,

Please consider options towards helping Florida residents with the ever increasing price of electric. The continued rate increases through FPL are breaking the bank for middle class residents. Between this and the ever Increasing cost of homeowner's insurance, as a veteran family, we and many just like us struggle to meet our obligations.

Please work for some relief for us.

Thank you,

Tara Arceneaux

**Subject:** Consumer Inquiry - Florida Power & Light Company

Ms. Tara Arceneaux  
tarama0980@yahoo.com

Dear Ms. Arceneaux:

The Governor's office forwarded a copy of your email regarding Florida Power & Light Company (FPL) to the Florida Public Service Commission (FPSC). The FPSC regulates investor-owned electric, and natural gas utilities throughout the state, and investor-owned water and wastewater utilities in those counties which have opted to transfer jurisdiction to the FPSC. The FPSC has authority in the telephone industry which is limited to the Lifeline Assistance Program, Florida Relay Service, and pay telephone service. We appreciate the opportunity to respond directly to you.

You expressed concern about FPL's petition for a rate increase. We will add your comments to Docket 20250011 regarding the petition.

You may review all the information filed for Commission consideration in docket 20250011 by accessing the FPSC website at <http://www.floridapsc.com>. Under the Clerk's Office tab at the top of the page, click on Dockets. Type in the docket number 20250011. Click the Search button. Then select Document Filings Index for a list of all filings in the docket. This procedure allows you to view all of the information filed by the utility and other parties in the docket.

If you have any questions, please contact me at 1-800-342-3552 or by fax at 1-800-511-0809.

Sincerely,

Ellen Plendl

Just read about the FPL rate increase request.

If you have a scintilla of fortitude, tell them not only NO---But HELL NO!!!

If you are just a marshmallow, then roll over as you usually do. These people are nothing but crooks who have managed to pull over a big heist so far. I just read where the average household electric bill in Kentucky is \$157 per family per month. I am curious about the average household electric bill in Florida. Mine is a multiple of that and I'm sure yours is to. You are supposed to represent the citizens of Florida, not boot lick the arrogant.

In this situation where the consumer has no choice in utility service, they tout what percent of cost is taken as profit. Then in the name of Public Relations, they run up cost by donating millions to their favorite cause. They buy advertising touting what nice guys they are. They even did a Super Bowl ad—boy did we need that. All the time, they are simply running up cost so the percent of cost--- their-profit—is higher. They might fool some—but surely not all.

Please look at the WEAR ABC 3 news, Pensacola Facebook page for other public opinions.

Do I ever miss Gulf Coast Power!!!!

**COMPLAINT INFORMATION**

Complaint: Other Complaints against Florida Power & Light Company  
Details:

We have no choice as to who we buy electric power from. FPL wastes money by the bucketloads and then charges us for it--and now want a rate increase. We can hardly turn on the T V without a FPL ad telling us how wonderful they are. They even had a Super Bowl ad--exactly what good did that do?? Then they donate thousands to most any cause they choose--we have no voice. We now pay multirole what others in other states pay. They are now complaining that because they are adding more customers, they need to have a higher rate---the opposite is true. Jessie James rode a horse and had a gun. We knew what to expect from him.

**FPL ???**

All you people do is rubber stamp FPL demands for more money from Florida residents! FPL are liars and thieves! They charge Florida residents for the production and installation of electric car charging stations and other ineffective, wasteful projects! FPL steals money left and right! Their executives are overpaid and do little to earn their bloated salaries! END fpl stealing of residents money!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To the Director:

There was a time when the PSC of FL would prevent FPL from rate increases that would hurt the hard working citizens of this state. As a retired FL teacher who is struggling on the lousy FL pension for us teachers, all I have seen are continuous rate increases that your Commission grants FPL continuously. Many of us are struggling to recover from the hurricanes of 2024, and you have allowed FPL a \$14 PER MONTH increase, which many cannot afford. Now FPL wants another 2.5% annual increase until 2029 saying they need to make more "updates." What updates? And where is their proof of going solar to save US money? We started to go solar in Coral Springs, FL back in the 1970s, but then Westinghouse left. I remember it well as I was teaching in Coral Springs! YOU NEED TO STEP UP AND STOP THESE UNNECESSARY RATE INCREASES NOW. DO THE JOB YOU ONCE DID PROTECTING YOUR HARDWORKING AND UNDERPAID FLORIDA CITIZENRY! STOP GIVING IN TO FPL. WHY DON'T YOU AND THE STATE LEGISLATURE DO THE RIGHT THING? How much do we need to beg? There is plenty of Money IN OUR STATE COFFERS, and it is NOT going to your teachers, etc. Some of that money could go to FPL to shut them up?! Why are you totally mishandling FPL? Are you getting kickbacks? As one of your struggling retired teachers who keeps her AC at 85 degrees during the long hot summer, I am totally fed up with your actions of not caring nor protecting US CITIZENRY. Please STEP UP AND DO THE JOB YOU ONCE DID.

**Sent:** Friday, January 31, 2025 12:42 PM  
**To:** GovernorRon.DeSantis@eog.myflorida.com  
**Subject:** Out of Control FPL continual rate increases, etc

To Gov Ron DeSantis:

I am one of your struggling teacher retirees. I have lived permanently most of my life (over 53 years) and yes, I wish I had the state of NY retirement. I am an alumna from University of Florida (class of 1972, Magna cum Laude and Phi Beta Kappa) and knew Pres Steve O'Connell, now deceased. The Public Service Commission of FL use to care about us Floridians with closely monitoring utility costs and for the most part NOT granting the rate increases to FPL. I would say that over the past 10 years the PSC continues to ignore us citizenry and is shaking hands with FPL, etc giving them what they want. I have been through many hurricanes and the PSC always stood firm to help keep costs DOWN. Our FL coffers, thanks to you, are full. YOU CERTAINLY ARE NOT GIVING YOUR TEACHER RETIREES ANY HELP ESPECIALLY AFTER 4 TERRIBLE YEARS OF INFLATION. I SIT IN A FOOD LINE EVERY 2 WEEKS. THE 3% CAP ON MY ANNUAL COLA IS PATHETIC, AND YOU DO NOTHING TO HELP US. THE STATE LEGISLATURE WON'T EVEN CONSIDER A BILL TO RAISE THE Aforementioned!

Meanwhile, the PSC gives more approval for rate increases! WHY? I have emailed them and get no reply back. They are definitely shaking hands with FPL.

By the way during the long hot summer I keep my AC set at 85 degrees. The recent cold spell, I tried to hardly turn on heat, because that is even more than AC!

I am asking you, because I have always supported and voted for you to get answers from the PSC and to stop their "probable" corruption. I have given 30 years of my life to this state for a paltry salary and my pension is pathetic. I am angry and disgusted with the costs of living in this state at 74 years of age. I won't even bother to mention the insurance crisis and costs which I and millions of others are waiting for you to correct.

Please STEP UP AND DO THE ACTIONS THAT ARE NEEDED ASAP. I want ANSWERS. Also, I waited on a phone call to your office for 20 minutes and then was told by a robot that too many calls coming in! Maybe you could hire me to answer calls remotely from my home! Yes, I continue to look for part-time jobs and get nowhere because of my age, I suspect! I know the games that many companies play. Thank God Trump is back

in the WH, but YOU, with all due respect, need to do Much More for millions suffering in this state that are NOT your multi millionaires.

RE: FPSC Inquiry 1463879C

Dear Ms. O'Connell:

The Governor's office forwarded a copy of your email regarding Florida Power & Light Company (FPL) to the Florida Public Service Commission (FPSC). The FPSC regulates investor-owned electric, and natural gas utilities throughout the state, and investor-owned water and wastewater utilities in those counties which have opted to transfer jurisdiction to the FPSC. The FPSC has authority in the telephone industry which is limited to the Lifeline Assistance Program, Florida Relay Service, and pay telephone service. We appreciate the opportunity to respond directly to you.

You expressed concern about FPL's petition for a rate increase. We will add your comments to Docket 20250011 regarding the petition.

You may review all the information filed for Commission consideration in docket 20250011 by accessing the FPSC website at <http://www.floridapsc.com>. Under the Clerk's Office tab at the top of the page, click on Dockets. Type in the docket number 20250011. Click the Search button. Then select Document Filings Index for a list of all filings in the docket. This procedure allows you to view all of the information filed by the utility and other parties in the docket.

If you have any questions, please contact Ms. Ellen Plendl at 1-800-342-3552 or by fax at 1-800-511-0809.

Sincerely,

Shonna McCray  
Regulatory Program Administrator

To Shonna McCray:

I received a letter from FPL through Snail mail which was/is a bit disturbing and absurd, as they feel they are entitled to this huge 4 yr rate increase to continue to me the needs of Floridians in our growing state. It is up to the FPSC to STOP THEM. Our state is now seeing many leaving our state because they canNOT afford the escalating insurance and utility costs. Among them are snowbird Canadians too! The fact that you put me on the docket means nothing to FPL. You need to WAKE up to their potential corruption, lies, and trying to take advantage of all of us full-time residents! Do NOT grant them any rate increase, because if you do it again and again as you have been over the past 5+ yrs, then it will definitely smell that your agency, WHICH USED TO PROTECT US FLORIDIANS, that now you are Complicit. Please DO YOUR JOB THAT FPSC was created to do and that you once did many years ago. I will forward this on to Gov DeSantis.

I just read that it is "very likely that the FL Public Service Commission will grant FPL the rate increase they are asking for 2026-2029! DON'T YOU DARE DO THAT. The AARP is trying to fight both of you! FPL's claim that they need this 2.5% rate increase per yr plus a "new rate system" based on FL's "continual growth" is a COMPLETE FALLACIOUS LIE! The "Growth" has stopped due to their increases, the out of control insurance costs, and other rising costs! Many are selling and leaving this state, including Canadians because ALL COSTS ARE OUT OF CONTROL. Both grocery and gas prices have NOT gone down at all in Collier County, etc! DO YOUR HOMEWORK. STOP GIVING IN TO FPL. SUPPORT US Floridians AS YOU ONCE DID YEARS

GO. Your commission was formed over 50 years ago when I arrived in this state to definitely protect FLORIDA'S CITIZENS, NOT UTILITY OR OTHER RIP-OFF COMPANIES. YOU HAVE FAILED US TOTALLY. REVITALIZE YOUR MISSION AND PROMISES YOU MADE TO THIS STATE ASAP. I am

again forwarding this email to our Governor DeSantis, who like President Trump, should fire a bunch of you to get the FPSC back on track. SO SHAMEFUL BEYOND WORDS. Yes, I am a "lowly peon" in your view, but I  NOT going to stop fighting for millions of us whom you don't care about. What has your placing me on your docket achieved, since you are obviously supporting the Moneyed Companies in this state? I want an updated reply from your top brass as to what you will do to stop FPL's insanity and how, when, and what you are doing to Support US FL CITIZENS.

Complaint: Other Complaints against Florida Power & Light Company  
Details:  
Thursday 9 January 2025 1130 hours

To whom it may concern,

I am writing to express my ongoing deepest disappointment that the electrical utility industrial sector continues to mismanage the electrical infrastructure throughout the State of Florida despite given unfettered access to elected and appointed government officials and agencies in the furtherance of policies and agendas, which consist of pursuing poorly thought out sourcing of energy resources and a decidedly anti-consumer stance with the rate-paying public across the board. Ongoing investigations continue undercover the long-standing practices by these captains of industry

to extract ever larger fees and electrical rates to aggrandize their oversized ambitions by direct and indirect political arrangements in backrooms.

The attached documentation clearly indicates the ongoing disreputability behavior by these captains of industry, despite the level of crushing runaway inflation and fixed incomes on the elderly and senior citizens in the City of Pompano Beach AND Broward County AND the State of Florida.

Time permitting, respectfully request to please place these observations and articles in the appropriate docket to underscore the overwhelmingly calculated cold-hearted manner that these captains seem to influence the very elected/appointed representatives that should, instead, be seeking to comfort their constituents day-to-day hardships to pay for the aggrandizement of these out sized economic sectors.

Thank you for your time in these matters and hope to hear from you soon.

Sincerely,  
Beatrice Balboa

Pompano Beach, FL 33062-6631  
USA

The Public Service Commission Favors Profits Over People Posted on January 8, 2025 • by Shelley Reback Share

Brooke Ward & Isabella Moeller, Food & Water Watch Food and Water Watch Senior Organizer Brooke Ward and Isabella Moeller, a USF student working with the Hillsborough Affordable Energy Coalition, joined MidPoint to explain the shocking rate increases we will find in our electric bills after January 1st, and the further increases we will face in March 2025.

Your Utilities Bill Just Got Hiked

On December 3d, 2024, the Florida Public Service Commission (PSC)— a political body consisting of officials appointed by Governor DeSantis that apparently provides little service to the interests of the public—voted to deny their own staff’s recommendations that would have slashed the Tampa Electric Company’s (TECO) rate hike request in half and would have saved TECO’s residential customers millions of dollars over the next three years. Residents and small businesses will now be footing the bill for \$71 million in rate increases to save large industrial and commercial customers money the company will pass on to their shareholders. The PSC’s denial came despite sustained public opposition to the rate hikes from Hillsborough County customers. Now, perhaps emboldened by the Public Service Commission’s capitulation to TECO’s rate increase request, Florida Power and Light customers will face the largest rate increase request ever made by a power utility in the United States pending before the PSC.

It Gets Worse

The PSC also rejected their staff’s recommendation to deny TECO’s request to build a new fracked gas plant at MacDill Air Force base and approved passing on the \$167 million cost of the plant to customers in increased electricity rates. They also approved a plan that will require Hillsborough consumers to now also face additional expenses of \$30 to \$50 on average per month for 12 months beginning in March 2025 to replenish TECO’s reserves that were spent on hurricane recovery expenses this year.

Our guests, Brooke Ward, Senior Florida Organizer, Food & Water Watch, and Isabella Moeller, together with their allies, have been mobilizing citizen opposition to “these greedy fossil-fueled rate hikes,” according to Ms. Ward. They were instrumental in winning Tampa Bay’s first in-district PSC TECO rate hike hearing in 15 years so that impacted community members could be heard. Despite this opposition and the recommendations of PSC staff, “the PSC continues to be a rubber stamp for utilities and big business over struggling communities.”

What Now?

Because irony is dead in Florida and hypocrisy rules, Tampa Electric is raising its customers' utility bills to move their headquarters from downtown Tampa to higher ground in Midtown, claiming it's to protect against flooding and meet hurricane resiliency standards. But here's the real issue: while TECO is protecting its headquarters from extreme weather, it continues to invest in dirty fossil fuels that are fueling the climate crisis, which is causing more frequent storms and flooding. Eighty-nine percent of TECO's energy customers are in Hillsborough County. The Affordable Energy Coalition suggests that the Hillsborough County Commission can mitigate the PSC's rate hike actions by passing an Affordable Energy and Climate Plan to keep energy bills lower by moving away from fossil fuels.

It is extraordinary how the PSC continues to allow FPL to raise rates which cause dramatic fluctuations in billing, as I have seen over the past 4 months. Further, as a monopoly, why is FPL spending millions on TV advertising. We don't need to have FPL try to make us feel more confident with ads, we need them to keep the power on when the wind blows and not gouge us with rate hikes.

Details:

I am a single disabled woman living on social security between the price of property taxes, homeowners insurance and all the other fees. I cannot and door another increase in my utilities. They got 31% just a couple years ago, what was that used for and they want? How much more it looked like quite a bit? It It's not okay. Like I'm getting pushed out of my house just because of utilities and taxes and insurance which is ridiculous. When I first moved in here, everything cost me about \$3600 a year to live here. Now it's almost 10000 and it's only Ben 7 years That's crazy. Inflation and social security does not keep up with inflation. I'm at the point right now that I'm already going to food pantries for groceries. I don't know what will happen if I can't afford my utilities.Please don't let this happen.

FPL

### Message

Good morning,

While I am not sure who will read this or if they will pass the information, I am trying to reach out about Florida Power and Light. The high cost and not having a competitor is hurting those who are struggling. I along with many friends of mine are struggling to pay our outrageous power bills. Now they are going up again. We are now funding their solar field most of us don't want or cannot use because we rent. The people getting solar should be funding it, not us.

To the Honorable Patt Maney ;

Good afternoon,

I am writing this email to try and touch base with someone who is willing to go against FPL and stop their continuous rate hikes. Just because they fail to plan for improving or rebuilding infrastructure, it shouldn't be passed on to the consumer while their pockets get lined. Power bills are just as important as home owners insurance bills. The people need help and a possible cap being placed on power bills. If not, the homeless population will grow, children will be severely impacted by this as well. Please help us!!

V/r,

Floyd Craig

RE: FPSC Inquiry 1465036C

Dear Mr. Craig:

Florida State Representative Patt Maney's office forwarded a copy of your email regarding Florida Power & Light Company (FPL) to the Florida Public Service Commission (FPSC). The FPSC regulates investor-owned electric, and natural gas utilities throughout the state, and investor-owned water and wastewater utilities in those counties which have opted to transfer jurisdiction to the FPSC. The FPSC has authority in the telephone industry which is limited to the Lifeline Assistance Program, Florida Relay Service, and pay telephone service. We appreciate the opportunity to respond directly to you.

You expressed concern about FPL's petition for a rate increase. We will add your comments to Docket 20250011 regarding the petition.

You may review our brochure, "Utility Ratemaking in Florida," by using the following information:

<https://www.floridapsc.com/pscfiles/website-files//PDF/Publications/Consumer/Brochure/Ratemaking.pdf>

You may review all the information filed for Commission consideration in docket 20250011 by accessing the FPSC website at <http://www.floridapsc.com>. Under the Clerk's Office tab at the top of the page, click on Dockets. Type in the docket number 20250011. Click the Search button. Then select Document Filings Index for a list of all filings in the docket. This procedure allows you to view all of the information filed by the utility and other parties in the docket.

If you have any questions, please contact Ms. Ellen Plendl at 1-800-342-3552 or by fax at 1-800-511-0809.

Sincerely,

Shonna McCray  
Regulatory Program Administrator  
Florida Public Service Commission

FPL rate increases NW Florida

### Message

Governed Desantis

Please see the below link regarding FPL and their continuing rate increases. Power bills have gotten out of hand here in NW Florida with FOL rate increases year after year. It has gotten so we can't afford these rate hikes every year. We have no options available for electric other than FPL. Something has to be done, and it starts with you. Please do not allow FPL to raise rates as they requested.

Complaint: Other Complaints against Florida Power & Light Company

Details:

How does an almost \$40B company need to increase rates yet again? Better yet how does THE ONLY OPTION for electric need to raise rates yet again? Now if I don't have electricity my children get taken, so I'm FORCED to pay whatever they decide to charge because, again, they are the ONLY option. Absolutely malicious money profiteering and taking advantage of forced customers.

Comment or Question:

Hello, I would like to talk to you about the malicious price raising of electricity company FPL, as it pertains to Crestview, FL. FPL is set to decide if they will raise their rates again. The problem is, and many others have, is that we have no other

option for electricity services. The only "choice" we have is FPL. So by default they can essentially raise their rates and many of us have no choice but to abide. This does not sit well as FPL currently has a monopoly over the city. Valued at \$35B, and set to increase rates again FPL engaging in very predatory practices. Now, our city "officials" do not want to hear from the public and often say we have no choice and to "deal with it" as it be. I will be continuing to contact every, and all, person/s that should, and could, be doing something to represent their constituents. I will be researching the legalities of FPL's, as well as Crestview official's, actions and hope that the FL IG will investigate as well. Predatory businesses who have a literal monopoly on services, that are required by law and or rules, by default should have the proper restrictions in place to protect the American citizen.

**COMPLAINT INFORMATION**

**Complaint:** Improper Billing against Florida Power & Light Company  
**Details:**  
Good evening,

I am writing to inquire as to what the justification is for a rate increase. FPL already has declining customer service, and it is quite difficult to get ahold of a representative to have assistance with billing.

The rates have already exceeded previous years for less energy usage.

FPL essentially charges you twice per month for billing, and also gives out a \$5 late charge if you pay on the "due by" date.

The manipulation, poor customer service and unjustifiable rate increase is highly questionable .

PSC was contacted previously

Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Miss April Acevedo

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Ms. Michelle Gonzalez

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Mrs. Nerea Arce Masn 

826 Euclid Ave Miami Beach, FL 33139-5713 nerearcearnu@gmail.com

**Subject:** FPL Rate Increase

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

PLEASE do not approve the proposed FPL rate increase. I am a retired teacher with a pension and Social Security so I am able to live comfortably right now. My current power bill ranges from \$175 to \$250 per month and it's affordable for this retiree. Any kind of raise will begin to make my life difficult. I already cut back on heating and cooling to keep the bill down as low as possible. I hang my clothes out to save on drying costs. Lights are off if I'm not in the room.

I feel that FPL is wasting the funds coming in by advertising (on Channel 3 WEAR Pensacola daily) and by building solar energy plants. With the cost of those plants, we could have gotten underground power lines. That would be the better investment due to them not being affected like over ground power lines during hurricanes.

I am only one person in this state and I am not an activist, but I felt that I needed to speak up before this raise is approved.

Sincerely,  
Regina Lynn Powell

To whom it may concern,

I do NOT agree with FPL's move to request 9billion dollar rate hike! This is crazy that they would ask for MORE.

Please do not Approve this request!!!

Thank you

Frank Toich

Miami Florida.

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Miss Celina Westerberg  
982 W Brevard St Tallahassee, FL 32304-7709 celinapwest@gmail.com

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to demand that the Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company). The public deserves a clear and fair opportunity to weigh in on this monumental decision.

FPL has already raised rates significantly, with some bills increasing by 60% in just five years. Now, they are requesting nearly \$9 billion more over the next five years. This is an unreasonable ask at a time when Floridians are struggling with the basics.

Moreover, FPL is ranked 52nd out of 53 utilities nationwide for its efforts in efficiency and conservation. The company is doing little to help consumers save, yet it continues to profit at our expense. Approving this hike would reward corporate greed while burdening everyday Floridians even further.

I strongly urge you to reject this request and ensure the voices of your constituents are heard. Holding in-district hearings is essential for accountability.

Sincerely,

Mr Dane Williams

Energy Cost Increase FPL

### Message

I just read this: Florida Power & Light, the state's largest utility, is seeking a nearly \$9 billion hike to customers' base rates over four years, a sum that affordability advocates said represents the largest rate hike request in U.S. history.

This administration needs to work to prevent this. Costs of living and property taxes keep going up and now utilities. We need DOGE in the states to figure out what can be done to reduce costs, in this case energy costs.

Prevent FPL from Unjustified Rate Increases on Florida Consumers

**Message**  
I urge you to oppose the proposed rate increase by FPL. Your responsibility lies with Florida's families, not FPL's shareholders. Many constituents struggle financially and have no other electricity options, making them vulnerable to these hikes. Please stand with us and protect the interests of Florida residents by voting against this increase.

March 4, 2025

Dear Governor DeSantis and Honorable Members of the Florida Legislature,

I am writing to you as a concerned constituent regarding the proposed rate increase by Florida Power & Light (FPL), as mentioned in a recent article. As a resident of Florida, I urge you to reconsider this rate increase and vote against it. It is crucial to remember that your responsibility lies not to the shareholders of FPL, but to the people of Florida—the families and constituents who rely on affordable energy to power their homes.

In the current economic climate, many families are already struggling to make ends meet. An increase in electricity rates would disproportionately affect vulnerable communities, senior citizens, and low-income households, further straining their budgets. Unlike other states, Florida residents have limited options when it comes to choosing their electricity provider, which means FPL holds a near-monopoly over the market. This lack of competition puts an unfair burden on consumers who are left with no choice but to accept these higher rates.

As their representative, I ask that you consider the impact this decision will have on your constituents—many of whom are already facing financial difficulties. It is essential that the priorities of our elected officials are aligned with the needs of the people, not corporate interests. Please stand with Florida families and vote against the proposed rate increase.

Thank you for your attention to this important matter. I look forward to your response and your commitment to protecting the interests of Florida's citizens.

Sincerely,  
Danielle Garcia RN-BSN

Hello

I read that after this years increases FPL want to increase rates yet again for the next 2 years?

This is absolutely wrong !!

In 2024, Florida Power & Light (FPL) made \$4.543 billion in profit, their top execs are making near 400k per year and the CEO In 2023, Armando Pimentel Jr.'s total compensation as CEO of Florida Power and Light (FPL) was \$10,445,978

They DO NOT need any more money !!

Please be a "public service" And tell them NO they are getting plenty of money from the people of Florida already ! and we cant choose our electric company -they have a monopoly!

Thank you  
Paul Harrison

**Subject: Request for Public Hearings on Florida Power & Light Rate Case**  
**Re: Docket #: 20250011**

Dear Commissioners,

On behalf of AARP and our members within Florida Power & Light (FPL) service areas, we urge the Public Service Commission (PSC) to hold multiple public hearings regarding the proposed rate increase. To ensure broad accessibility, we recommend prioritizing hearings in densely populated service areas, where more ratepayers can participate and voice their concerns.

These hearings are essential for transparency and for allowing individuals from diverse backgrounds and financial situations to share how the rate changes could impact their daily lives. AARP is particularly concerned about the financial strain rising utility costs place on older residents, many of whom live on fixed incomes. Higher electricity rates disproportionately affect seniors, often forcing difficult choices between essential needs such as medication, food, and energy.

Given the significant number of AARP members within FPL's service area, it is critical that the PSC provides ample opportunities for public input. We appreciate your attention to this matter and strongly urge you to prioritize broad community participation.

*Chante' Jones*

### Subject

Florida Power & Light seeks a \$9B rate hike

### Message

Dear Governor Ron DeSantis,  
I would ask that you oppose FPL's recently submitted rate hike proposal and urge the Public Service Commission and Governor DeSantis to reject it. An article in by Emily Mahoney of the Tampa Bay Times published on Saturday March 1 indicates that this would boost FPL's profit margin well above the national electric utility average. FPL already charges Floridians \$12 per month for hurricane associated costs. The rate hike request would simply pad the company's profits.

FP&L

**Message**  
Dear Governor DeSantis

Please move to cut off the direction of FP&L in building solar facilities.  
Solar is overpriced, unreliable and unnecessary.  
Natural gas or nuclear are reliable options that work 24/7  
MD and CA are two states currently using unreliable solar are now buying power from other states at high prices.  
This was a very poor decision made by politicians who don't know what they are doing

Please use your power as governor to give direction to FP&L

Thank you

### Message

dear governor, no sane person would allow a rate increase for florida power and light / nextera right now. they run on natural gas and quietly reduced solar. they aquired gulf power. they still refuse to bury power lines that would reduce power outages. nextera the parent company uses these rate hikes to aquire companies not increase florida's power output. other than insurance this is the biggest ponzi scheme in the state. look at nextera the parent company's financials.

Dear Commissioner Art Graham,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am asking formally to request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. I have several family, friends, and community members that will be affected.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Miss Katelyn Clary

### Message

Gov. DeSantis,

I am writing you to express 2 concerns as a Floridian in Northwest panhandle. First was my concern on insurance premiums. However, I hope you are correct in your State of the State address that we'll see rates drop. But second, I am deeply concerned with the significant rate hike proposals from FPL over the next 2-5 years. They claim the aim is to keep prices low. However, they have hike rates consistently and look to continue. Please help. This is unsustainable for most people.

### Message

Dear Governor DeSantis,

Please help your citizens of Florida get rid of Florida Power and Light. These continued rate hikes are getting extremely out of hand. The excuses are only that excuses. We the people are tiered of this monopoly always raising rates and we only get worse service. Please put a stop to this nonsense.

**Subject:** FPL MINIMUM BASE cHARGE- 2022 ?

**Representative Hillary Cassel,**

**Florida House District 101**

**Good Day !**

**Senior Constituent Pertinent Feedback & Request:**

**FPL Account No. 26582 57510 US Navy Veteran**

**Ref : FPL Minimum Base Charge 2022 <<<<<**

Over the preceding several years my **FPL** account has been monetarily penalized primarily due to the oversight that occurred by the **FPSC**

when they mistakenly granted **FPL** permission to levy an extra charge on individuals such as myself for our minimum **KWH** usage of power every

month since the year **2022**. This inappropriate charge will also continue until the end of **2025**.<<<<<

As your loyal constituent I personally feel that your office should be made fully aware of what **FPL** has been able to levy upon customers such as myself for

no good cause, when in essence we should have been rewarded, and also commented for our diligent sacrifice by **FPL**.<<<<<

It is also very difficult to comprehend as to how the **FPSC** could have granted **FPL** permission to monetarily penalize individuals such as myself . <<<<<

**FPL** is no doubt a conglomerate that could care less, otherwise none of what has occurred to individuals such as myself never would have occurred.

The Office of Public Counsel also mistakenly informed the **FPSC** that the general public would not object to the extra charge every month, when in

essence nothing could be farther from the truth.<<<<<

**In Summation:**

Your direct assistance is being respectfully requested in order to hopefully have the minimum base charge removed from my account as I am retired, and also living

on a fixed income.

Thank You.

Respectfully,

Michael J. Walsh  
6601 Evans Street  
Hollywood, Fl. 33024-1909

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am asking formally to request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. I have several family, friends, and community members that will be affected.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Miss Katelyn Clary

<alyssa.flspn@everyactioncustom.com>  
**Sent:** Tuesday, March 4, 2025 5:05 PM  
**To:** Office of Commissioner Graham  
**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Miss Alyssa White

**Subject:** Subject: Request for Public Hearings on Florida Power & Light Rate Case - Docket #: 20250011

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioners,

On behalf of Earth Ethics, Inc. and our members (2,200+) within Florida Power & Light (FPL) service areas, we urge the Public Service Commission (PSC) to hold multiple public hearings regarding the proposed rate increase. We are asking that, at a minimum, the PSC host 5 public hearings in the panhandle of Florida - Pensacola, Fort Walton Beach/Destin, Panama City, Port St. Joe, and Tallahassee.

Earth Ethics is particularly concerned about the additional financial burden on consumers and communities across the state. At a time when many families are already struggling with the rising cost of living, higher utility bills will only add to their economic hardships, forcing difficult choices between essential expenses like food, healthcare, and housing. In addition, small businesses, which are the backbone of Florida's economy, will also feel the strain as increased operational costs make it harder to stay competitive. For low-income households and fixed-income seniors, this rate hike could be particularly devastating, further deepening energy insecurity and financial distress. Beyond individual consumers, entire communities will suffer from the ripple effects of

higher energy costs. Nonprofits, schools, and local government services could face budget shortfalls, reducing their ability to provide critical programs and support to those in need.

it is critical that the PSC provides ample opportunities for public input. We appreciate your attention to this matter and strongly urge you to prioritize broad community participation.

With gratitude-

Mary Gutierrez, she/her/ella

**Subject:** FPL PROPOSED RATE HIKE

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To whom it may concern:

I am requesting that FOL's proposed rate hike be rejected.

Please consider the following:

1. Financial Impact on Consumers:

**Increased Monthly Bills:** The proposed rate hike could add an additional \$11.52 per month to a typical residential customers bill in 2026, increasing to \$18.57 more per month in 2027. This represents a 22% increase, amounting to approximately \$360 more annually over the next two years.

2. Recent Rate Increases:

**Cumulative Financial Burden:** FPL customers have already experienced significant rate hikes in recent years. In 2021, FPL was granted a \$5 billion increase, which was the largest utility rate hike in Florida's history at that time. The current proposal nearly doubles that amount, exacerbating the financial strain on consumers.

### 3. Profit Margins and Executive

Compensation: Allocation of Funds: Concerns have been raised regarding FPL's allocation of revenue, particularly in relation to executive salaries and shareholder dividends. Critics argue that before implementing rate hikes, FPL should evaluate internal cost-saving measures and ensure that profits are not unduly prioritized over consumer affordability.

### 4. Transparency and Public Interest:

Regulatory Scrutiny: The Florida Supreme Court has previously intervened in FPL's rate adjustments. In a notable case, the court required the Florida Public Service Commission to provide a more detailed justification for approving a four-year settlement that increased base electric rates, emphasizing the need for decisions to be in the public interest and result in fair, just, and reasonable rates.

Than you,

Adriana Belen

Comments:

I understand FPL has requested a rate increase. We are already grossly overpaying for "power". I am asking that the commission reject the request entirely. Please represent the consumer against FPL and the influences of the lobby executives.

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping

customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Ms. Gladys Escobar

To whom it may concern , I hope the PSC denies the rate hikes being asked by these electrical utilities . We're still feeling the pain of this high inflation and high cost of everything .. Everything goes up but our pay and it's difficult to keep up with the cost of living in South Florida. FPL has record earnings every quarter and they want to keep squeezing the consumer until we can't be squeezed anymore . Please side with the consumer and not the giant corporations .

Thank you

Would all of you on the commission PLEASE VOTE NO for the FPL rate increase.  
I just read where FPL has a profit margin of 11.9 %. Why not have the share holders pay for any increase?

We users have to go thru Hurricanes and weather events and we can not ask for subsidies, rate increase's, etc.  
My wife & I live on Social Security and we do not even receive the true cost of living increase.

Please vote no on this rate increase.

Respectfully;  
David T. Pachucki

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

Hello,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Ms. Tyana Blackledge

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Miss amaya borroto

The all in cost of owning a home in the major metro areas of FL is now 44% of annual income, up from 28%, according to the Wall Street Journal. With inflation, Washington Shenanigans and general cost of living, FL

residents are no longer able to afford to live here and FP&L has just filed for the largest rate hike in US history. I've watched the legislature bail out insurance companies and PSC grant rate increases. Migration has slowed diluting demand. We are now on the edge of a new economic crisis that we have not seen since 2008. Please do not grant FPL's petition. The legislature and you have granted all these rate increases and now you must stop. You are making Florida unaffordable at a time when our major economic engines -- NASA, defense industry -- are cutting back. Please do not add to the crisis. Kathryn Creedy

Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Mrs. Samantha Hillard  
35250 SW 177th Ct Homestead, FL 33034-5654 shillard@mail.usf.edu

**To:** Office of Commissioner Graham  
**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Mr. juan meneses

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

Dear Commissioners,

I am writing to formally request that the Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Now more than ever, Floridians and our fragile ecosystems need protection—not additional financial burdens. In recent years, our state has faced intensifying hurricanes, record-breaking heat, and rising living costs. Meanwhile, some FPL customers have already seen their bills increase by 60% in just five years. Now, FPL is asking for an additional \$9 billion in rate hikes over the next five years—all while many Floridians struggle to afford housing, groceries, and essential utilities.

At the same time, FPL ranks 52nd out of 53 utilities nationwide in helping customers lower their power bills through efficiency and conservation programs, according to the American Council for an Energy-Efficient Economy. Why should hard-working Floridians pay even more while FPL neglects energy-saving solutions and prioritizes corporate profits?

I urge you to reject this rate hike and prioritize Florida's consumers over corporate greed. Holding in-district hearings is the least that can be done to ensure that those most affected—everyday Floridians—have a voice in this process.

Thank you for your attention to this matter. I look forward to your response.

Sincerely,  
Miss Shella Mercado  
1645 Corner Meadow Cir Orlando, FL 32820-1942 shellmarket87@gmail.com

**COMPLAINT INFORMATION**

Complaint: Other Complaints against Florida Power & Light Company  
Details:

Please log this under complaint 20250011. The citizens of Crestview unfortunate enough to be stuck with FPL absolutely cannot afford any further increases to our rates. The rates are the highest I've ever seen. We keep our home at 80+° during the day in the summer and at 60° in the winter with 3 children in a single story home. We have nothing extraordinary in our home and use minimal energy and we are already at \$300-\$400 bills in the summer. We cannot afford this.

Please think of the people first and not share holders.

Orange City, Florida 32763-6010

Dear Ms. Tremblay:

Thank you for contacting Governor Ron DeSantis. We are sorry to hear of your difficulties and appreciate the opportunity to respond to your letter.

As you may know, the Public Service Commission is an arm of the legislative branch of government and regulates certain public utilities in Florida. To assist you, I forwarded a copy of your letter to PSC for their review. If you want to contact PSC directly, please use the information provided below.

Thank you again for contacting Governor Ron DeSantis.

Sincerely,

A handwritten signature in blue ink that reads "Martha Lynn".

RE: FP&L Solar Farm

Dear Governor DeSantis,

After spending 2.2B on California's solar plant it turned out to be a bust. You think FP&L might wake up? The report said that they reported that it was less expensive to use natural gas.

Perhaps you can speak with FP&L on our behalf to consider doing the same. I believe FP&L was raising prices, so their "solar farm" is not benefiting anyone that I am aware of. I have yet to hear anyone say their bills were lower. I sold my home a year ago, my daughter has Duke Energy. I do not know if they have solar farms. Their prices are very high.

I found this with homeowners who had solar installed on their homes. Not one has ever said "oh gee my solar panels have saved me a lot of money. You really should get them for your home."

Consider too, they take up a lot of land and make it useless. How safe are they for wildlife? Solar panels lose their effectiveness every year, the voltage output lessens over time. What is their effect on the environment? Are we able to dispose of them in a landfill or do we need to send them to a special landfill?

Just like all those plastic water bottles they are now finding microplastics in people's brains, the placental, eyeballs, synthetic fibers, furnishings & carpets. Sadly, the people we put in charge to make sure our food, medicines and products are safe did not do their jobs. For now, it is up to us, **each state**, to do a better job. I'm old enough to remember glass milk jugs, glasses made of glass, not plastic, etc. I used cloth diapers for all four of my children as well as glass baby bottles. I'm sensitive to synthetic materials, I prefer cotton clothing, etc.

Ok back to solar farms, perhaps we could start there. 😊  
Thank you for listening.

Sincerely,

Enclosure: 3

**Sent:** Sunday, March 9, 2025 12:57 PM  
**To:** Office of Commissioner Graham  
**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Miss Julia Vega  
1720 SW 37th St Gainesville, FL 32607-4442 julia.vega.0225@gmail.com

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

While I am not currently an FPL customer, I was for 32 years living in Naples, FL. Because I understand that electric power is a vital need in Florida's climate, and this rate hike would put peoples' lives and well-being in danger, I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Mrs. Karen Bonnell  
4009 Camino Real Tallahassee, FL 32311-3411 Kbsingr@aol.com

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

Though I am not currently an FPL customer, I resided in Naples, FL for 32 years as an FPL customer. Therefore, I feel it is imperative to voice my opposition to this huge increase. I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians. For many Floridians, they have to choose between having electricity or food and medicine. It's an impossible choice!

There are clean energy alternatives, such as solar and wind, which are now both cheaper and more efficient than burning fossil fuels. They are also much faster to complete and add to the energy mix. I urge you reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms. Karen Bonnell  
4009 Camino Real Tallahassee, FL 32311-3411 kbsingr@aol.com

Dear Clerk Adam Teitzman,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Mr. Larry Benvenuti

1197 52Nd Street Gulf Spoonbill Ln Marathon, FL 33050 larrybfoto@aol.com

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Andrew Giles Fay.,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Mrs. Rebecca Stern Berman

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms. Teresa Casal

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Chair Mike La Rosa,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Mrs Heather Clark

Public Service Commission  
2540 Shumard Oak Blvd.  
Tallahassee, FL 32399-0850

**Subject:** Opposition to Florida Power & Light (FPL) Proposed Rate Increase

March 11, 2025

**Dear Commissioners,**

We write to you today to express our strong opposition to Florida Power & Light's (FPL) proposed rate increase, which would place an undue financial burden on Florida's residents at a time when many are already struggling with the rising cost of living. This proposal, one of the largest rate hikes in Florida's history, warrants serious scrutiny, and we urge the Commission to prioritize consumers in its decision-making process.

While Florida has traditionally maintained relatively low utility rates compared to other states, it is important to consider the state's high energy burden. Many Floridians, especially seniors on fixed incomes, working families, and vulnerable communities, are already facing significant financial strain due to skyrocketing housing costs, rising property insurance premiums, inflation and on-going increases in electricity prices over the last few years.

These increases have been especially pronounced in the Panhandle where customers of FPL Northwest Florida saw bills rise 64% in 2021 - 2023 while the rest of FPL customers saw a 51% increase in that period. In January 2022, FPL was approved for \$4.86 billion in additional costs to customers by 2026 which was decried by public interest advocates as "the highest rate increase in U.S. history".

Just recently, FPL was approved for a \$1.2 billion charge for storm restoration costs - \$113.5 million for Hurricane Debby, \$157.8 million for Hurricane Helene, and \$811.1 million for Hurricane Milton. Additionally, FPL is ranked by the American Council for an Energy Efficient Economy ranks FPL 52 out of 53 in offering efficiency programs which if offered, could help customers save money.

This proposed increase will only exacerbate these challenges, making it even more difficult for residents to afford basic necessities.

Energy is an essential service, and affordability for Florida's consumers should be at the forefront of policy decisions regarding utility rates. Florida's Public Service Commission has an obligation to ensure that the rates imposed on consumers are fair, justifiable, and reflective of actual need rather than excessive corporate profits. We urge you to scrutinize FPL's request and to consider alternative solutions that do not disproportionately burden everyday Floridians.

# Florida State Legislature

Floridians deserve an energy system that prioritizes and protects them—not just utility shareholders. We respectfully request that the PSC reject or significantly modify FPL’s proposal to ensure that consumers are protected from unsustainable and excessive rate hikes.

Thank you for your attention to this important matter, and we look forward to your careful consideration of this request.

**Sincerely,**

Senator Carlos Guillermo Smith | State Senate District

Representative Anna V. Eskamani, PhD | State House District 42

Representative Lindsay Cross | State House District 60

Representative Rita Harris | State House District 44

Representative Angie Nixon | State House District 13

Representative Mitch Rosenwald, PhD | State House District 98

**Subject:** Opposition to Florida Power & Light (FPL) Proposed Rate Increase

March 11, 2025

**Dear Commissioners,**

We write to you today to express our strong opposition to Florida Power & Light's (FPL) proposed rate increase, which would place an undue financial burden on Florida's residents at a time when many are already struggling with the rising cost of living. This proposal, one of the largest rate hikes in Florida's history, warrants serious scrutiny, and we urge the Commission to prioritize consumers in its decision-making process.

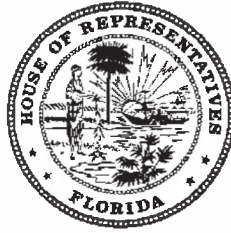

While Florida has traditionally maintained relatively low utility rates compared to other states, it is important to consider the state's high energy burden. Many Floridians, especially seniors on fixed incomes, working families, and vulnerable communities, are already facing significant financial strain due to skyrocketing housing costs, rising property insurance premiums, inflation and on-going increases in electricity prices over the last few years.

These increases have been especially pronounced in the Panhandle where customers of FPL Northwest Florida saw bills rise 64% in 2021 - 2023 while the rest of FPL customers saw a 51% increase in that period. In January 2022, FPL was approved for \$4.86 billion in additional costs to customers by 2026 which was decried by public interest advocates as "the highest rate increase in U.S. history".

Just recently, FPL was approved for a \$1.2 billion charge for storm restoration costs - \$113.5 million for Hurricane Debby, \$157.8 million for Hurricane Helene, and \$811.1 million for Hurricane Milton. Additionally, FPL is ranked by the American Council for an Energy Efficient Economy ranks FPL 52 out of 53 in offering efficiency programs which if offered, could help customers save money.

This proposed increase will only exacerbate these challenges, making it even more difficult for residents to afford basic necessities.

Energy is an essential service, and affordability for Florida's consumers should be at the forefront of policy decisions regarding utility rates. Florida's Public Service Commission has an obligation to ensure that the rates imposed on consumers are fair, justifiable, and reflective of actual need rather than excessive corporate profits. We urge you to scrutinize FPL's request and to consider alternative solutions that do not disproportionately burden everyday Floridians.

# Florida State Legislature

Floridians deserve an energy system that prioritizes and protects them—not just utility shareholders. We respectfully request that the PSC reject or significantly modify FPL’s proposal to ensure that consumers are protected from unsustainable and excessive rate hikes.

Thank you for your attention to this important matter, and we look forward to your careful consideration of this request.

**Sincerely,**

Senator Carlos Guillermo Smith | State Senate District

Representative Anna V. Eskamani, PhD | State House District 42

Representative Lindsay Cross | State House District 60

Representative Rita Harris | State House District 44

Representative Angie Nixon | State House District 13

Representative Mitch Rosenwald, PhD | State House District 98

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Andrew Giles Fay.,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Dr. Judelisse Falu

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Mr. Tevhan Ford

Comments:

Florida power and light does not need another increase. Consumers don't have a choice in electric companies in the panhandle and the rates are already out of hand. People are struggling to keep power on and they waste thousands to produce unnecessary television commercials. Another rate increase in insanity. Especially being it

would be the highest in US history. Please do not approve of yet another rate hike when consumers in the NW Florida panhandle are already struggling. We can't handle 800.00 electric bills.

**Sent:** Tuesday, March 11, 2025 9:53 AM  
**To:** Office of Commissioner Graham  
**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Ms. Emma Heinlen

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Miss Isabel Hidalgo

**Sent:** Tuesday, March 11, 2025 2:11 PM  
**To:** Office of Chairman La Rosa  
**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Chair Mike La Rosa,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Ms. Gina McClain

269 Fairway Pointe Cir Orlando, FL 32828-8513 mcclain\_gina@hotmail.com

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Chair Mike La Rosa,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Ms. Sheri McKee

**Subject:** Opposition to Florida Power & Light (FPL) Proposed Rate Increase

March 11, 2025

**Dear Commissioners,**

We write to you today to express our strong opposition to Florida Power & Light's (FPL) proposed rate increase, which would place an undue financial burden on Florida's residents at a time when many are already struggling with the rising cost of living. This proposal, one of the largest rate hikes in Florida's history, warrants serious scrutiny, and we urge the Commission to prioritize consumers in its decision-making process.

While Florida has traditionally maintained relatively low utility rates compared to other states, it is important to consider the state's high energy burden. Many Floridians, especially seniors on fixed incomes, working families, and vulnerable communities, are already facing significant financial strain due to skyrocketing housing costs, rising property insurance premiums, inflation and on-going increases in electricity prices over the last few years.

These increases have been especially pronounced in the Panhandle where customers of FPL Northwest Florida saw bills rise 64% in 2021 - 2023 while the rest of FPL customers saw a 51% increase in that period. In January 2022, FPL was approved for \$4.86 billion in additional costs to customers by 2026 which was decried by public interest advocates as "the highest rate increase in U.S. history".

Just recently, FPL was approved for a \$1.2 billion charge for storm restoration costs - \$113.5 million for Hurricane Debby, \$157.8 million for Hurricane Helene, and \$811.1 million for Hurricane Milton. Additionally, FPL is ranked by the American Council for an Energy Efficient Economy ranks FPL 52 out of 53 in offering efficiency programs which if offered, could help customers save money.

This proposed increase will only exacerbate these challenges, making it even more difficult for residents to afford basic necessities.

Energy is an essential service, and affordability for Florida's consumers should be at the forefront of policy decisions regarding utility rates. Florida's Public Service Commission has an obligation to ensure that the rates imposed on consumers are fair, justifiable, and reflective of actual need rather than excessive corporate profits. We urge you to scrutinize FPL's request and to consider alternative solutions that do not disproportionately burden everyday Floridians.

# Florida State Legislature

Floridians deserve an energy system that prioritizes and protects them—not just utility shareholders. We respectfully request that the PSC reject or significantly modify FPL’s proposal to ensure that consumers are protected from unsustainable and excessive rate hikes.

Thank you for your attention to this important matter, and we look forward to your careful consideration of this request.

**Sincerely,**

Senator Carlos Guillermo Smith | State Senate District

Representative Anna V. Eskamani, PhD | State House District 42

Representative Lindsay Cross | State House District 60

Representative Rita Harris | State House District 44

Representative Angie Nixon | State House District 13

Representative Mitch Rosenwald, PhD | State House District 98

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

In addition, you need to fully investigate JEA for their egregious billing practices. Are you aware that JEA rounds to the nearest 1,000 gallons for billing? They have the exact number of gallons that a household uses but they decided to use the rounding approach. We can be sure that their rounding hurts consumers.

Thank you.

Sincerely,

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Chair Mike La Rosa,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Ms. Kristen Sanders

Dear Clerk Adam Teitzman,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Mrs Caroline Sévilla

PSC,

As a citizen of this state in Santa Rosa county, i vehemently oppose FPL's request for a rate increase. Since they bought Gulf Power, they have wasted our money on making "green energy " purchases in power generation. They built 4 turbine generators they didn't need and stopped burning coal on four units at plant crist that had been upgraded to the latest technology in coal/gas burning and environmental controls. They has increased our bills significantly, all the while getting on tv and lying saying they are lowering bills. The public service commission should have never approved the sale to FPL, but now that we are here I expect the public service commission to protect the citizens of this state from their insane business practices and put a stop to the increases.

Please deny FPL's request for a record rate hike. FPL has already received a rate increase to cover costs from storms. It is a quite profitable company as it is. There is no need to take more money from Florida citizens to reward the stock holders, one of which I am. I own quite a bit of NextEra stock but I am still against the rate hike.

Thank you for your time - Gray Thomas

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Mr Chris Brecht  
208 San Carlos Rd Cantonment, FL 32533-7811 chris.brecht7@icloud.com

**COMPLAINT INFORMATION**

**Complaint:** Other Complaints against Florida Power & Light Company  
**Details:**

COMES NOW, a customer of Florida Power & Light Company (FPL), and hereby files this formal complaint before the Florida Public Service Commission (PSC) regarding the unjust and prejudicial nature of the recent rate increase imposed by FPL. In support thereof, Complainant states as follows:

JURISDICTIONThe Florida Public Service Commission has jurisdiction over this matter pursuant to Chapter 366, Florida Statutes, which governs the regulation of public utilities in the State of Florida.

#### NATURE OF THE COMPLAINT

- a. The rate increase imposed by FPL is unreasonable and prejudicial to customers, particularly those on fixed incomes and retirees, who cannot afford continued rate hikes.
- b. FPL has made substantial investments in solar energy infrastructure, a business decision that should be financed by the company and its shareholders rather than being unfairly passed on to customers.
- c. The opening of new pipelines and the declining price of crude petroleum have resulted in increased profitability for FPL, further negating the necessity of additional rate hikes.
- d. Hurricane-related costs should not be passed onto customers as additional surcharges, as such contingencies are already factored into the existing rates and recovery mechanisms.
- e. The cost of living continues to rise while wages remain stagnant, creating undue hardship for customers. FPL has not provided adequate justification for how vulnerable populations, including seniors and low-income households, can sustain these continuous increases.
- f. The interests of consumers and the public are being neglected in favor of political influence, corporate profits, and lobbyist agendas, undermining the fair regulation of utilities in Florida.

#### RELIEF REQUESTED

- a. That the Florida Public Service Commission review and investigate the basis of the rate increase and whether it aligns with fair and reasonable utility practices.
- b. That FPL be required to justify its continued increases despite increased corporate profitability and reduced crude petroleum prices.
- c. That the Commission consider placing a moratorium on further rate increases until FPL provides transparency on its financials and demonstrates the necessity of such increases.
- d. That FPL cease passing hurricane-related surcharges onto customers when such costs are already factored into their operational budget and rates.
- e. That the Commission take into consideration the burden these rate increases place on fixed-income and retired individuals, and implement consumer protections to prevent excessive and unnecessary rate hikes.

WHEREFORE, Complainant respectfully requests that the Florida Public Service Commission take immediate action to investigate and address these concerns and provide relief to FPL customers.

Dear Commissioner Art Graham,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms. Aurora Colindres  
344 Mendoza Ave Miami, FL 33134-3854

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Mrs. Lynn Fetting

11222 Island Lakes Ln Boca Raton, FL 33498-6812 fetting.subscriptions@yahoo.com

Dear Florida Public Service Commissioner Art Graham,

I understand Florida Power & Light is pushing for one of the largest rate increases in our state's history - a move that would hit working families, seniors on fixed incomes and vulnerable communities hard. With sky-high housing costs, rising property insurance and ongoing inflation, we can't afford another financial burden.

Sincerely,

Dear Commissioner Art Graham,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms. Marian Iglesias

### Message

Governor DeSantis can you please look into FPL wanting to raise rates besides a 12 dollar surplus that will be added on . We are people who can not afford any more increases. The FPL needs a Doge reveiw by your administration to stop this unfair hike in rates.

Thank you Sir  
Robert Iscenko

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history.

We cannot continue with these hike in costs - where is the fight for Floridas residents ??? Will you all sit idle has people crumble to pay rent, mortgages, and insurance and now high electricity is looming. FPL automatically doubles their rates during the summer - this would mean \$1000 bills that people wouldn't be able to afford.

Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. **COMPLAINT INFORMATION**

Complaint: Other Complaints against Florida Power & Light Company

Details:

Justin and I are bewildered on how FPL can just raise their rates when their previous net profit is about 4 billion \$\$\$. The increases we see in our bill has been ridiculous especially since our home is only 600sqft and no electricity is being used when we are not home which is about 50% of the day. This is crazy and so many people are experiencing higher than normal electricity bills. Something has to give. If FPL had profiting 4 billion, why increase our rates so you guys can buy better equipment ect. Isn't that what the profit is for ? To put back into your business? Or are we just trying to be greedy and make your customers pay for it?

Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Mr. Jacob Lombardo  
724 Pine Island Dr Melbourne, FL 32940-1703 jacobwlombardo@gmail.com

**COMPLAINT INFORMATION**

Complaint: Other Complaints against Florida Power & Light Company  
Details:

FPL is asking you guys once again for a rate increase. Please tell them no. FPL has earned MORE than enough to make their proposed improvements from the last 3 rate hikes. The people of Okaloosa county did NOT choose FPL - nobody here likes FPL and we all miss having Gulf Power. FPL never answers their phone, their customer service is garbage and if I had literally any other choice for electricity I would choose that.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Art Graham,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms. Roberta Neway

Dear Florida Public Service Commission Gabriella Smith,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Mr Michael Price  
6083 White Creek Ln Milton, FL 32570-1571 mpp418@gmail.com

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Mr. William Robinson

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

Hello and thank you for taking your time to read my message. I am not just copy & pasting some letter. I didn't like how the premade letter almost attacked you and just sounded mean and demanding. Instead, I want to ask you to help us florida residents stop the money bleed. All of my bills have increased drastically, especially my power bill. When I first moved here in 2017 my power bill was around \$90-\$100/month. Fast forward to now, still living in the same place, my monthly bill averages \$181. We're not rich people but we both work full-time and do our part. We just need a break from all of the money grabbing Florida companies have been doing to its citizens.

I am formally asking you to please reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. Most importantly to me, it will affect my family negatively.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants. Please do something about the unchecked greed of FPL.

Thank you, again, for reading my message.

Sincerely,  
Mr. Roy South  
711 Underwood Ave Apt 505A Pensacola, FL 32504-8855 hafroy@my.com

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. We desperately need our voice to be heard!

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Ms. Elisa Turner

**To:** Office of Commissioner Graham  
**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Ms. Janet Weiler

With the price of everything going up, heating and cooling our home is fundamental. Everything is UP but my pay. It's stagnant and has not gone up. Waste water assessment is doubling this year. Medical insurance went up and homeowners insurance has gone up. What are we to do? We can't afford our home and it's expenses and we can't afford to rent.

It's ILLEGAL to camp outside. What are we old people retirees and minimum wage earners to do? It's not possible to work a 4th minimum wage job to care for ourselves and our children.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Shirley Lewis-Brown

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Bryant Belli  
1415 Barefoot Cir  
Sebastian, FL

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Mr. Kent Byers

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. We are asking that, at a minimum, host 5 public hearings in the panhandle of Florida - Pensacola, Fort Walton Beach/Destin, Panama City, Port St. Joe, and Tallahassee.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation

programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. In-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to hearing back from you.

Sincerely,

Gina Cooke

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable. They need to use the money they spend on advertising to maintain their system.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Naomi Copeland

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Bob Dube  
2101 NE 1st Ct  
Boynton Beach, FL

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Ms. Jennifer Dussing

1011 Valencia Town Ter Apt 302 Orlando, FL 32825-4748 jenniferdussing6868@yahoo.com

Dear Commissioner Art Graham,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Mrs. Joni Gomes

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Jesse Green

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Esther Johnson  
PO BOX 1086  
Clewiston, FL

Dear Commissioners  
Re: Docket No. 20250011-EL

I am writing to urge you to please reject the rate hike by FP & L. This rate hike is too high, especially for the economically disadvantaged in this area. This hike will add onto an already dismal economic situation.

Also, there must be hearings in this district concerning the rate hikes. I have thought for a long time that there must be competition for electric service in this area to provide good, economical service to the customers.

Thank you.  
Jacqueline Lane

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Judith Lovett  
1310 Catalpa Ln.  
Orlando, FL

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms Patricia Malloy McCaughan

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Jan Marie Moore  
1013 Michigan Dr W APT C  
Dunedin, FL

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Oxana Postnaya  
7421 Leighside Dr  
Windermere, FL

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Mitchell Schneider  
1323 N 15th Ave  
Hollywood, FL

FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

At the risk of repeating myself, I'd like to remind you that you are members of the PUBLIC SERVICE Commission and ought to be doing a PUBLIC SERVICE by allowing the public to speak to you about the proposed rate hikes. If the FPL monopoly would stop its television ads, they'd save millions.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
E. Schorr

**Sent:** Thursday, March 13, 2025 12:03 AM  
**To:** Office of Commissioner Graham  
**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Miss Marion Singleton

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable. Since the take over of OUR GOVERNMENT by the Trump administration ,it appears that the American People are in serious trouble!!!! You're supposed to have the best interests of the FLORIDIAN CITIZENS. Please stand with US !!!! FPL DOES NOT NEED US TO PAY FOR IMPROVEMENTS THEY NEED TO MAINTAIN THEIR EQUIPMENT!!!

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Carole Smith  
30133 Hackney Loop  
Mount Dora, FL

Dear Commissioner Art Graham,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms. Greta Walter

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Marilyn Warlick  
2502 Saint Charlotte Pl  
Tampa, FL

Dear Clerk Adam Teitzman,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Mr. Matthew Cacciaguida  
7285 SW 90th St Miami, FL 33156-1656  
matt.cacciaguida@gmail.com

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Alison Carville

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission Gabriella Smith,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Ms. Megan Dorsey

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ann Esposito  
5473 2nd St  
Saint Augustine, FL

2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms. Jennifer Ferre

**Sent:** Friday, March 14, 2025 1:40 PM  
**To:** Office of Commissioner Fay  
**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Andrew Giles Fay.,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Mrs. Irma Flores

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Miriam Hemphill  
6724 NW 34th Dr  
Gainesville, FL

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Chair Mike La Rosa,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Mx. Seraphina Mckenzie  
4206 Feldspar Trl Orlando, FL 32826-5361 lalaloopsyfan4@gmail.com

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Dottie Miller

Dear Clerk Adam Teitzman,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Ms. Nancy Molina

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Lynette Smith  
2606 N Brentwood Cir  
Lecanto, FL

FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I have yet to hear of any significant reduction in rate requests from the PSC since I have been in Florida - that means since 1971 every rate increase has been rubber stamped by you.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Gavi Stevens

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms Victoria Stevenson

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Candace Willey

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Miss Devy begona  
4430 SW 11th St Miami, FL 33134-2525

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Mrs. JULIEANN BRADY

**Subject:** Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
paula moats

ELECTRIC BILLS

### Message

HOWDY GOVERNOR. I am writing this cause my FPL electric bill has been \$180 during the hot and humid summer months.

I am an 80 yr old Veteran retired and find it more difficult to live here . My taxes went up \$320 for waste collection, \$150 for local school and fire last year and another \$80 for this current year. And I got all the senior exemptions!

If FPL bills were even cut in half they could still make millions. Tax relief is really needed for seniors to stay in their homes.

Thank you.

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Mrs. Stephanie Arroyo-Kou

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good Day,

I am writing to formally request that the Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. We are asking that, at a minimum, host 4 public hearings in the panhandle of Florida - Pensacola, Fort Walton Beach/Destin, Panama City, and Tallahassee. Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce

power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians. I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority.

Thank you,

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

PLEASE do not approve the rate increase by FPL.

There are ao many people struggling and those with padded packets/wallets just keep getting more while those they are taking from have to go without groceries or decide between one need to meet another.

Maybe tell FPL to learn how to balance and manage their budget better rather than always coming up with the bright idea to keep making everyone else have the increase for what they want to enjoy in life.

Thank you,

DeAnn Haase

- Hold In-District Hearings for Public Input Re: Docket No.20250011 -EI Petition by Florida Power & Light Company for Base Rate Increase I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. We are asking that, at a minimum, host 4 public hearings in the panhandle of Florida - Pensacola, Fort Walton Beach/Destin, Panama City, and Tallahassee. Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians. I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority.

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I am writing to request that FPL be made to participate in in district hearings regarding the proposed rate increases (docket 20250011). They are already running among the highest margins in their industry. It would be nice to remind them in person that if they cannot make ends meet on their profits that the world needs ditch diggers too.

Thank you for your consideration.

Subject: Docket No.20250011: Reject FPL's Rate Hike and Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Faye Nino

Greetings

My family and I reside in Mary Esther, FL. We are a single income family of 5 depending solely on my husband's VA disability pay since I do not qualify for SSI benefits because of his income and he is no longer able to work due to worsening of his condition.

We have 2 differently abled children and are already struggling to afford basic necessities.

If FPL is hurting enough to need to increase their rates maybe they should be audited to see where our money is going! They don't offer any payment assistance (they suggest calling catholic charity, who thanks to them is already over burdened).

Something tells me their big wigs could use some humbling financially and maybe then they will care about the people they serve.

This should not even be a necessary email given the economic situation and common sense. Hundreds in just our area are already dealing with financial problems due to insurance rates, grocery and gas prices, on top of utility expenses.

Please do not allow FPL to continue to be part of the problem. Instead, make them become part of the solution for tax payers.

Sincerely,  
Kimberly Schulz and family

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission Gabriella Smith,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Ms Isabella Benedetti

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold **in-district** hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. We are asking that, at a minimum, host 5 public hearings in the panhandle of Florida - Pensacola, Fort Walton Beach/Destin, Panama City, and Tallahassee.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

ElizabethH Major

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission Gabriella Smith,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Mr. Michael Seijas

### Message

Can the governor also call for an investigation into Florida Power & Light charges to Florida citizens? Can he proceed with a DOGE investigation? Born and raised Floridian since 1953. The charges have become ridiculous as well as all the solar fields set up. Who approved? Where's the cost savings? My winter electric charges used to average \$75-\$80 dollars per month. Now average is \$140-\$200. Yes we had hurricanes, but where's the audit on their expenditures?

Look. I get that you don't get hundreds of thousands of dollars of donations from us regular folk, but that's doesn't mean we have no power.

Last time I checked, you still theoretically work for us. And it's time to say NO to FPL's regularly scheduled rate hike request. I mean, you can set your clock by their filings. In fact, we are due another rate DECREASE. What happened to 'Drill, baby, drill?' Aren't fuel prices low enough to cut our rates some more? That's what a lot of people apparently voted for, and you and FPL are not paying attention.

You need to start taking care of Floridians. We've had it with high taxes, insurance, and utilities. I'm a Native Floridian, and I'm not going anywhere, but I'll bet we can run some of you carpetbaggers back to wherever you came from.

Send FPL away empty-handed. They'll survive. That's what you keep telling US, anyway.

Re: Docket No.20250011 -EI  
Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. We are asking that, at a minimum, host 4 public hearings in the panhandle of Florida - Pensacola, Fort Walton Beach/Destin, Panama City, and Tallahassee.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation

programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I am writing to formally request that the Commission hold an in-district hearing in my county for Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. FPL's request to increase returns to shareholders while Florida families are suffering is unconscionable.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable.

I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Kimberly Ruffalo

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Gary Clark,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on. Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents. The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis. I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,  
Miss Cheyanne Taylor

I am a widow and I live on \$34,000 a year. My modest home of 450 sq feet is paid fir but my property taxes are \$2500 a year. Our local water board increased our water 6% last year and January voted to increase another 12%. These increases are hitting the senior population hard.

**Subject:** Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioner Art Graham,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Ms. Luna Plaza

Reject the FPL Rate Hike

**Message**

Honorable Governor DeSantis,

I am writing you today to ask you to oppose the proposed FPL rate hike. Florida families are already struggling with the high cost of food, housing, and insurance. We do not need another rate hike from FPL. For the full year 2024, FPL reported net income on a GAAP basis of \$4.543 billion. And now they're asking Floridians to pay an additional \$5 billion dollars. Can I count on you to stand with Florida families and reject the FPL rate hike?

Respectfully, MB

March 12, 2025

Dear Chairman of the Florida Public Service Commission Mike LaRosa,

The City of DeFuniak Springs is writing to express our formal opposition to the proposed rate increase currently under consideration by the Florida Public Service Commission (FPSC). This proposed increase, which could become the largest rate increase in United States history, raises serious concerns for the well-being of our residents and local businesses.

After the approval of the largest rate increase in Florida's history in 2021, we find it troubling that FPL is now proposing a new rate increase that includes a return on equity rate of 11.9%, well above the national industry average. We question why the residents and businesses of DeFuniak Springs are being asked to guarantee such high levels of private profits when so many are already struggling to make ends meet.

In this time of economic uncertainty, rising inflation, and high costs of living, it is unfair to place an additional financial burden on our community. The impact of such a rate increase would be felt deeply by both individuals and businesses in DeFuniak Springs, especially as many are already facing heightened economic pressures.

We strongly urge the Florida Public Service Commission to deny this proposed rate increase in order to protect our residents and businesses. We believe that the priorities of FPL should be aligned with the needs of our community, and that ensuring reasonable utility costs is a key component of that.

Thank you for your attention to this matter.

Sincerely,

*Bob Campbell*  
Bob Campbell  
Mayor

**Subject:** FPL request to raise rates..

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

My bill has already risen over 100 dollars with FPL. Along with all the other increases in living costs, , I am almost at the point that I am going to have to use what savings I have to buy gas and groceries.

With the rising costs of everything from eggs to rent and insurance, Floridians are already struggling to make ends meet. And now, FPL is pushing for the largest rate hike in U.S. history—just as our state recovers from last year's devastating hurricanes. FPL wants to raise rates by nearly \$10 billion over the next four years, burdening over 5 million households in its monopoly-service area, including millions throughout the State of Florida. In the last five years, FPL customers have already seen their bills rise by over \$400 annually, and if this latest proposal is approved, we'll be paying hundreds of dollars more each year. Meanwhile, FPL continues to make massive profits, while Florida families are left to shoulder the costs of their record-breaking rate hikes. As a for-profit company, FPL has pushed for an 11.9% return on equity, far above the national industry average of 9.6%. Their financial gains are coming at the expense of our wallets. We have to take action before things get worse. We need your help to demand that the PSC holds in-district rate hearings, where the public can voice

their concerns about FPL's rate hike. We also want to let PSC that we do not want rate increases - we can't afford them. Please take a moment to send a comment to the PSC urging them to hold in-district hearings, and listen to the people who will be directly impacted by this hike and to NOT approve the rate hike. Our leaders must take a stand for families, not for profits. Here's a template you can use or feel free to create your own. Email to [CLERK@PSC.STATE.FL.US](mailto:CLERK@PSC.STATE.FL.US) Subject: Reject FPL's Rate Hike - Hold In-District Hearings for Public Input Re: Docket No.20250011 -El Petition by Florida Power & Light Company for Base Rate Increase I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. Dear Clerk Adam Teitzman,

Adam Teitzman, Commission Clerk  
Division of Commission Clerk and Administrative Services Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

This is my written request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

And I also call your attention to the hazardous Turkey Point nuclear power plant that does not deserve an extension. It's condition is due the FPL's unwillingness to make the investments necessary or to close it down.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Ms. Sheryl Gold

Re: Docket No.20250011 -El Petition by Florida Power & Light Company for Base Rate Increase I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. We are asking that, at a minimum, host 4 public hearings in the panhandle of Florida - Pensacola, Fort Walton Beach/Destin, Panama City, and Tallahassee. Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians. I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority.

Sincerely

Heather Hebert

FPL rate increase

**Message**  
Please do not approve FPLs rate increase request, we already cannot afford rates that were previously hiked after they bought out another company in Florida. Now we are forced to go with them when there should be 3 choices. It's a monopoly and allowing this increase would be detrimental to the 5.2 million homes running on FPL power.

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Ms. Sarah Ferracane  
5700 NE 22nd Way Apt 327 Ft Lauderdale, FL 33308-2680 sarfar11@protonmail.com

Dear Florida Public Service Commission Gabriella Smith,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Ms. Elia Angeles

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Mr. Seamus Frost

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

I am writing to express my strong opposition to the proposed rate increase by Florida Power & Light. This decision is deeply troubling, particularly during a time when many families are struggling with rising costs of living and financial uncertainty.

As customers, we should not have to bear the burden of higher bills simply to boost company profits or satisfy shareholder interests. It feels like corporate greed is taking precedence over the needs of the communities FPL serves, and this is both unfair and unacceptable.

The proposed rate increase would impose an unnecessary financial strain on households already working hard to make ends meet. I urge you (the PSC) to prioritize the well-being of FPL customers over corporate profit margins. Transparency about the necessity of this increase and the allocation of funds would go a long way in addressing public concerns.

Thank you for your attention to this matter. Choose to act in the best interest of FPL

customers, not FPL profits.

Sincerely,

TO WHOM IT MAY CONCERN:

Re: Docket No.20250011 -EI  
Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision. We are asking that, at a minimum, host 4 public hearings in the Panhandle of Florida - Pensacola, Fort Walton Beach/Destin, Panama City, and Tallahassee.

Some FPL customers have already seen their bills increase by 60% in the last five years, and I am one of them, watching the savings I thought I'd have from investing huge dollars in solar panels quickly erode. Now FPL is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic

necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,

Sharon Harvill McAuliffe, Fort Walton Beach FL 32548

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,  
Mr Jerry Rivers

Estimados Comisionados de la Comisión de Servicios Públicos de Florida,

Como cliente de Florida Power & Light (FPL) [y miembro de AARP en Florida], me opongo firmemente al aumento de tarifas más grande en la historia de los EE.UU. Este aumento excesivo impondría una carga injusta a los clientes, especialmente a los de bajos ingresos o a los adultos mayores con ingresos fijos que simplemente no pueden pagar más.

Con los costos de vivienda, atención médica y productos esenciales ya altos, lo último que necesito es una factura eléctrica más alta. FPL ya es una compañía de altas ganancias; pedirle a los clientes que paguen más solo para aumentar las ganancias corporativas es completamente inaceptable.

Insto a que rechacen la solicitud de FPL para un mayor retorno sobre el capital y el aumento de la tarifa base mensual. La Comisión de Servicios Públicos debe priorizar a los clientes por encima de la codicia corporativa y asegurar que las tarifas de servicios públicos sigan siendo justas y asequibles.

Por favor, defiendan a los floridianos y digan NO a este aumento masivo de tarifas.

Gracias por su tiempo y consideración.

Atentamente,

Martha Alfaro

Dear PSC

I am writing to express my strong opposition to the FPL proposal for a price increase. With rising living costs already burdening consumers, this increase will only exacerbate financial hardship for many households. Furthermore, FPL's continued record of profitability should be considered before burdening the public with higher rates. It is crucial that regulators prioritize fairness, ensuring that customers are not unduly impacted by UNNECESSARY price hikes. I urge you to carefully evaluate the proposal and ultimately deny the requested increase.

Thank you for your time and consideration.

Sincerely,

Linorche Delouis

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a 28-year customer of FPL, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers like me, an older adult on a fixed income who simply cannot afford to pay more.

With my basic costs rising, & my retirement savings being reduced by major market drops, the last thing I can afford is a higher electric utility bill. This in addition to regular power outages occurring absent any major storms. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

On April 12, my neighbors & I experienced a 10 hour power outage, our 3rd in 17 months. This was on a sunny, cloudless day in April with a slight breeze. It started at 8:30am & repair trucks did not arrive until 5pm! And yesterday I got my bill, no delay there.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly

base rate. I shouldn't have to pay more for inferior line maintenance that results in excessive outages. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Laura MacDermeid

**Subject:** Keep FPL Rates Down Docket #20250011

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Bill DeCoux
