Re: Docket No. 20250011-EI - Petition for rate increase by Florida Power & Light Company

Dear Mr. Teitzman:

This filing is being made via the Florida Public Service Commission's web-based electronic filing portal in six separate filings due to the voluminous size of Exhibit S filed with Citizens' Third Motion and Notice of Intent to Seek Official Recognition.

This filing is Exhibit S, **No. 5 of 6.**

Please note **Exhibit S has been divided into six (6) parts due to electronic filing requirements.**

If you have any questions or concerns, please do not hesitate to contact me. Thank you for your assistance in this matter.

Sincerely,

/s/ Walt Trierweiler

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Thomas Wagoner

Comments:

Please stand up for the residents of Florida - you know, the "public" that you are supposed to represent - and deny the enormous rate increase that FPL seeks on 8/11! It isn't justified or warranted, and as the public service commission, you are supposed to look out for Floridians, not corporate behemoths like FPL who bribe, cheat, and do whatever it takes to make money on the backs of Floridians.

Subject: Opposition to the Rate Increase for FPL

Honorable Governor Desantis and Florida Public service Commission:

I am sending this email to you as a Florida Power and Light consumer to object to the rate increase that has been filed by Florida Power and Light/Nextera Energy and or their subsidiaries. They are using our funds from Florida electric consumers to lease prime farmland in multiple counties in Indiana for solar panel farms. They are purchasing these 25-year leases from farmers on these prime, productive farms that have the capability of growing over 200 bushels to the acre of corn to build these solar panel farms. In Indiana, the effective rate of producing electricity from these solar farms is less than 3 percent due to the lack of continuous daylight hours, with a yearly average of 5.1 hours per day, and the likelihood of snow covering the panels during the winter. They are requesting a rate increase for the next 4 years, which many consumers will not be able to afford.

Respectfully,
Daryl J. Wattenbarger
Retired Electric Consumer

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission PSC,

My name is Arnold Welber, and I am a resident of Broward County. As a member of Florida Rising and a Florida Power & Light customer, I strongly oppose the rate increase request of almost \$10 billion — the largest in US history. This unjust and excessive increase would further cause everyday Floridians, especially Black and Brown communities, to fall deeper into a burden caused by the high costs of living currently.

During the public service hearings, we witnessed firsthand how real Floridians are currently struggling to pay their bills, rent, groceries, and medications. Community organizations are standing up against corporate greed and revealing the conditions that everyday Florida residents are currently experiencing.

The PSC should prioritize consumers by ensuring fair and affordable utility rates. I urge the Public Service Commission to reject this massive rate hike and stand by Floridians and not for-profit corporations. We need affordable and clean energy.

Sincerely,
Mr. Arnold Welber

Petition to the Florida Public Service Commission Regarding Florida Power & Light's
Proposal to Raise Residential Customers' Electric Rates

SUBJECT: Docket #20250011

Commissioners:

Florida residents are already struggling to keep up with the high cost of living.

For the sake of transparency and fairness, I urge the Public Service Commission to thoroughly scrutinize Florida Power & Light's (FPL) proposal to raise residential customers' rates.

The requested 11.9% return on equity (guaranteed profit) is well over the national average of 9.5%. As the cost of living in Florida continues to rise, especially for property insurance and housing expenses, an unnecessary increase in electric utility rates will place unnecessary financial burdens on Floridians.

FPL should not be allowed to pad their profits on the backs of residential customers like me.

Please consider the impact to residential customers and put our needs above corporate profits.

Reject FPL's proposal to unfairly raise my electric utility rates.

Thank you,

Susan Trestyn
33437-5695

Reject FPL's proposal to unfairly raise my electric utility rates!

Dear Commissioners,

Please consider the impact to residential customers and put our needs above corporate profits. FPL should not be allowed to pad their profits on the backs of residential customers like me. Reject FPL's proposal to unfairly raise my electric utility rates.

A huge thank you to FPL for keeping both my business and home running smoothly!

We only lost power in one of my offices, and it was restored within just a few days allowing us to keep serving our clients without major interruptions. Every time I've called customer service, the process has been quick, easy, and stress-free.

One standout moment for me was when I purchased a commercial building and discovered during inspection that the previous owner hadn't paid the electricity bill. FPL went above and beyond, turning the power on during my inspection period so I could move forward without delays.

From reliability to customer care, FPL has truly exceeded my expectations. Thank you for the outstanding service!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

We as FL residents on fixed income are opposed to FPL's historical rate hike set to be enacted in January 2026. I have attended public PSC hearing and was disgusted by witnessing all the paid FPL hacks that are in favor of this historical rate hike. We will be affected both by businesses passing additional utility costs unto us and our own residential rates. This is unrealistic and an unjust money grab from FPL. I am requesting you vote "NO" ON THIS RATE HIKE THAT WILL GRAVELY AFFECT MANY FL RESIDENTS.

Good Evening,

I am currently a homeowner and customer of FPL in Northwest Florida. I strongly urge all commission members to vote against FPL's historic rate increase. The current "negotiations" have left out a major stakeholder, the everyday residential customer. That is where your commission can greatly impact the residents of Florida that are forced to be customers of FPL.

Sincerely,
Alexander Arduini
Pensacola FL 32526

From: Alfred Jonas (fredjonasmd@gmail.com) Sent You a Personal Message
<fredjonasmd@p2a.co>
Sent: Monday, August 11, 2025 10:03 AM
To: Office of Chairman La Rosa
Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

I know FPL pays off the Florida legislature to direct the PSC to let them charge whatever they want. You want campaign money, and it's not easy for you to consider that it is the citizens of Florida, not FPL, who are your constituents. (We will remind you when you run for re-election.) As a frame of reference, I will tell you that Massachusetts, for example, does not permit a minimum monthly bill. My daughter lives there, she and my son-in-law have solar panels, as I do, and often enough, their bill is zero. I create more electricity than I use every day. If you're getting the message that the Florida legislature is useless to Floridians, or their enemy, I won't disagree with you.

Thank you,

Sincerely,

Alfred Jonas

Subject: Reject FPL's Latest Rate Hike Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida PSC Commissioners,

As a Florida Power & Light (FPL) customer, I urge you the Florida PSC to reject the largest rate increase in U.S. History. In the past five years, FPL customers have seen bills rise by over \$400 annually. These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is.

It's already difficult to stay on top of the rising costs of gas, housing, and healthcare bills due to inflation—how am I supposed to afford a rate hike too? Why do I need to suffer when FPL raked in over \$10 billion in profits in the last five years? It is unconscionable to force customers to endure financial hardship so wealthy utility executives and shareholders can line their pockets.

Please stand up for Florida ratepayers and reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize the needs of customers over corporate greed and ensure utility rates remain fair and affordable.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Ms. Alicia Saxe
641 Española Way # 33 Miami Beach, FL 33139 aliciasaxe@gmail.com

Subject: Reject

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Alicia Williams

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Antonio Perez Melero

Subject: Reject FPL's Rate Hike – Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gary Clark,

Adam Teitzman, Commission Clerk
Division of Commission Clerk and Administrative Services Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,
Miss Brenna Strehle

Subject: Docket No. 20250011 - Please Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gary Clark,

Adam Teitzman, Commission Clerk
Division of Commission Clerk and Administrative Services Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

Sincerely,
Ms. Carrie Roach

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

FPL Rate Increase

Message

Governor Ron DeSantis, I am writing this letter to you, please do not allow the increase in electrical power. Since FPL has taken control of electrical power, I have not seen my power bill lower once. Even after you approved the increase for Hurrican Micheal a couple years ago. FPL has done nothing but increase my power bill without the reliability of Gulf Power. As a costumer and someone that has been living in Florida for most of my life, if approved this may push me/family to another state.

Dear Commission Members,

Please consider vetoing the proposed rate increase this coming week proposed by FPL. This is literally the largest rate hike in the history of the United States.

Average people cannot afford it. We are already one car engine or medical bill away from serious financial trouble. Unlike huge companies, we can't just go to our work and demand a 2.5% raise every year.

Please help reign in this proposal if you care about your average Floridian. Also, remember that higher power bills at businesses will also cause them to raise prices to offset the cost, meaning that us consumers will have to pay 2.5% more on goods and services as well.

Thank you for your consideration,

Cody Johnson

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Cynthia Luster

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Honorable Governor Desantis and Florida Public service Commission:

I am sending this email to you as a Florida Power and Light consumer to object to the rate increase that has been filed by Florida Power and Light/Nextera Energy and or their subsidiaries. They are using our funds from Florida electric consumers to lease prime farmland in multiple counties in Indiana for solar panel farms. They are purchasing these 25-year leases from farmers on these prime, productive farms that have the capability of growing over 200 bushels to the acre of corn to build these solar panel farms. In Indiana, the effective rate of producing electricity from these solar farms is less than 3 percent due to the lack of continuous daylight hours, with a yearly average of 5.1 hours per day, and the likelihood of snow covering the panels during the winter. They are requesting a rate increase for the next 4 years, which many consumers will not be able to afford.

Respectfully,
Daryl J. Wattenbarger
Retired Electric Consumer
1234 Wing Rd SW
Palm Bay, FL. 32908

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
David Beard

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Greetings Commissioners,

I'll be brief:

Unless Florida Power and Light can explain to the consumer why a utility company making over \$4 Billion annually for its shareholders needs to increase their rates; put me down as opposed.

This message also serves as a gentle reminder that your agency exists to serve the public and not the utility companies.

That is all,

V/R,
David Grodey - an FPL customer

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

David Lord

Subject: Docket No. 20250011-EI

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

As a Florida resident and former FPL employee with nearly two decades of service, I write to express my understanding of the need for the proposed rate adjustments currently before the Commission.

While no resident welcomes increased utility costs, my professional experience provides me with insight into the operational realities that drive these requests. The proposed base rate modifications reflect genuine cost pressures that have been building across our utility infrastructure. During my years at FPL, I witnessed the company's commitment to operational efficiency and customer service excellence. The Solar and Battery Base Rate Adjustments for additional clean energy projects represent forward-thinking investments that will serve Florida families for generations.

Since FPL's last base rate filing years ago, labor costs have risen nearly 16% and critical infrastructure materials like wires, cables, poles, and transformers surged climbed to alarming numbers. These cost increases affect every aspect of maintaining reliable electric service. What gives me confidence in supporting this proposal is FPL's proven track record of efficiency.

As both a former employee and current customer, I can attest that FPL delivers an unmatched combination of reliability and affordability. The proposed rate plan represents a balanced approach to maintaining the service excellence that Florida's families and businesses depend on daily.

With that said, I agree with the intent behind the proposal, and I support the Commission's fair review.

Sincerely,
Dominic Corbie

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
James Turner

Sirs:
I have lived and invested in Florida for over 40 years. I have raised my family here. We have worked hard to make this state a good and equitable place to live. THE REQUESTED RATE HIKE BY FPL, is the passing on of expense burdens of special interest groups who are not serving the community but themselves. The job impact they represent to our communities are minimal but they wish us to bear their financial burden. The same special interests are converting, not sharing, land use with the needed agricultural industry of this state. Do not approve the requested rate hikes but put the burden back on industries that are driving the upgrade demands.

Hello,
I am completely opposed to the proposed FPL Rate increase.
All of the citizens expenses have increased, and many of us are
on a fixed income, and feel overwhelmed already.
Many have to choose between medicine and food.
Please deny their request.
Thank you for your consideration.

Stay Well,
Jane Jackson

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Janet Warfield

Dear Governor DeSantis,

FPL does a great job of delivering reliable electricity and maintaining a first class grid, BUT they announced a huge rate increase. Please, NO MORE SOLAR!!!! We need baseload electricity, not a field of solar panels that can be destroyed by a storm and batteries that catch fire. I moved here from San Diego 4 years ago, So far, there have been 2 major utility battery fires, on in Escondido that was near where I lived, it burned for 2 weeks, another in San Diego.

Help me understand how it's acceptable that FPL is looking to get \$10 BILLION dollars from FLORIDA RESIDENCE within the next 4 years. HELP ME UNDERSTAND HOW THIS IS EVEN A CONSIDERATION. We are tapped out. We are struggling to live. THIS SHOULD BE ADDRESSED AND NOT IGNORED. I'm working my butt off to pay bills and I'm stuck here with enormous interest rates on Credit Cards and an electric bill that is insane NOW. I cannot imagine what things will be like in 4 yrs. HELP US.

To Whom It May Concern:

I wanted to take a moment to express my appreciation for the exceptional service provided by Nicole Raspberry in assisting Destin Commons with our FPL needs.

Nicole's professionalism, responsiveness, and thorough understanding of our property and needs makes each interaction smooth and efficient. She consistently goes above and beyond to ensure that all matters are handled promptly and with great attention to detail. It's a pleasure to work with someone who is both knowledgeable and genuinely committed to delivering outstanding service.

Please pass along my gratitude to Nicole for her hard work and support. We truly value the partnership and look forward to continued collaboration.

Best Regards,

Jessica

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Joe Leonard

Subject: Keep FPL Rates Down Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Julia LaRue

Subject: FP&L Rate Increase - Vs- Office of Public Council

I am a Native Floridian of Palm Beach County. I am a widow with 2 children, 1 child diagnosed with Diabetes 2 years ago and has medical needs, in addition, I am also a Real Estate Professional. The Real Estate market has been less than desirable and unable to make a living over the last 2 years; therefore, I have been looking for employment since December 2024, to no avail. Over the years my FP&L bill, even through the summer months and August especially, at it's highest has stayed around \$300.00, last year it was around \$350.00, ok, I accepted it was a little more due to unbelievable inflation we have had over the last 4 years. Let me say, I keep my A/C at 77-78 degrees; Recently, over the last 2 months, I have been paying \$400.00 and I just received a bill for \$500.00, we are not even through August (the hottest month of the year) yet! I am terrified at what my bill will be at the end of August. I can not even wrap my head around a \$500.00 bill, I am still in shock. I have NEVER paid a \$400.00 electric bill, yet a \$500.00 bill!

I am not willing to take another rate hike to pay for AI or Electric Vehicle Stations/Electric Car Owners Charging their cars.

The Office of the Public Council, Court Proceedings will begin this coming Monday, defending the residents against FP&L and these rate hikes. The people need the

Governor's Help in quashing this increase. Somehow, FP&L always gets their way

I am asking for you to step in and step up to protect the citizens of Florida against this rate hike and FP&L to bring these costs down, not up with a rate hike and to back The Office of Public Council in defending us against FP&L.

Thank you,

Julie Montesano

Hello,
I wanted to take a moment to acknowledge the outstanding service we continue to receive from FPL's new construction division.

FP&L goes above and beyond for their customers. The service team is responsive and professional. I am a project manager with many sites throughout the state of Florida. Navigating power service during new construction can often be complex and unpredictable, but FP&L has a way of making the experience smoother and more efficient every step of the way.

We've worked with many utility companies over the years, and the service team helps projects move forward. It truly makes a difference.

Thank you again to FPL for fostering this level of excellence and support.

Regards,
Kara Phillips

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Kenneth Wendorf

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Regarding FPL Rate Increase, PSC Docket 20250011.

I oppose this rate increase. There should be no discussion of a rate increase without first ensuring that there will be no more alternative unreliable intermittent energy such as wind and solar projects approved until after regulations are in place to ensure sufficient conventional base power generation capacity is in place to provide safe reliable power at a level to satisfy the needs of Floridians for electricity when the

alternative unreliable intermittent energy sources are not generating power.

Furthermore, no settlement agreement on this matter should be considered. This issue should be discussed and resolved via a full public hearing with full public participation.

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Laura Tein

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Les Rivkin

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I would like to register my opposition to the current FPL rate increase request case. FPL has had ongoing rate increases that have effected consumer electric cost rates since taking over Gulf Power Co. It is my belief FPL should use cash on hand or obtain bank financing for their infrastucture projects as is done by any other business. I view these projects as a cost of doing business. Judging by current news reports the expected cost increase for electricity from the current rate increase case represents a nearly 10% annual increase to me personally as well as most all other NW FL consumers.

Subject: Reject FPL's Rate Hike – Hold In-District Hearings for Public Input

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gary Clark,

Adam Teitzman, Commission Clerk
Division of Commission Clerk and Administrative Services Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I am writing to formally request that The Commission hold in-district hearings regarding Docket No. 20250011 (Petition for Rate Increase by Florida Power & Light Company) to ensure that the public has a fair opportunity to weigh in on this critical decision.

Some FPL customers have already seen their bills increase by 60% in the last five years, and now the company is asking to increase rates by almost \$9 billion over the next five years, all while Floridians struggle to afford basic necessities. FPL is ranked 52 out of 53 by the American Council for an Energy Efficient Economy of utilities nationwide in terms of helping customers reduce power bills with efficiency and conservation programs. Approving this rate hike would only reward corporate greed at the expense of millions of hard-working Floridians.

I urge you to reject this request to ensure that consumers, not corporate profits, remain your priority. Holding in-district hearings will allow impacted residents to voice their concerns and hold FPL accountable. I appreciate your attention to this matter and look forward to your response.

Sincerely,
Miss Liv Doura

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Madelyn Ferguson

These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Margaret Heck

Docket #2025-0011

To The Public Service Commission,

As a lifelong Floridian, FPL customer, and small business owner I know how important reliable power is, especially during hurricane season and the intense summer heat.

I've seen firsthand how quickly FPL responds during outages, and I want to see that level of service continue. I operate a few Airbnbs in Fort Lauderdale and I've had issues ranging from random raccoons to overgrown neighboring trees causing power outages, and every time I've had an issue, FPL has always responded within a few hours or within the day which is absolutely critical for a business like airbnb; if you can imagine, guests don't like not having their AC and power during their short stays!

While I don't want to see rates increase, I support whatever is necessary to continue the great service FPL has provided to keep the lights on and respond with quick action when I need them most for me personally and for my business.

Thank you,

Marvin Pierre

August 7, 2025

Subject Keep FPL Rates Down Docket #20250011

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Sincerely,

Mary Elwell

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Mary Schroeder

Dr. Myechia Minter- Jordan **President** <http://www.aarp.gov>

Good Day !

Ref : Senior Citizen- US Navy Veteran Feedback. >>>>> (FPL \$ 9B Dollar Rate Increase)<<<<<

Docket # 20210015 FPSC Inquiry # 139858OC

Since the year 2022 our household has been monetarily penalized every month by FPL for our minimum monthly

usage of KWH ? In retrospect the FPSC granted FPL permission to do so without any regard for the justification

of same ? Instead of FPL rewarding, and also commending our household for conserving electrical power we

continue to be monetarily penalized.<<<<<

One would also wonder as to how the FPSC could of granted FPL permission to do so ?<<<<<

In the interim our legitimate request to have the extra charge removed has been irresponsibly overlooked by the FPSC ?

Now FPL is seeking an Outrageous \$ 9 Billion Dollar Rate Increase.<<<<<

In Summation:

Will the FPSC bow to FPL, or will they think twice about what the Greedy Conglomerate is seeking this time ?<<<<<

Thank You.

Respectfully,

Michael J. Walsh

To whom it may concern:

Please do not increase our rates especially if you are planning to use them to expand the unreliable solar power capability in Florida. Not only is solar power unreliable, it is so sad to see field after field of these unsightly panels destroy the beauty of our state and animal habitats.

Rather, please increase our conventional base power generation capacity to meet demand.

Thank you.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good morning. I know that the PSC is considering FPL's request for a rate increase and I want to register my strong objection. Over my 70+ years in Florida I have seen FPL take advantage of consumers and destroy small electrical companies. Listed below are my reasons for objecting:

1. FPL is a monopoly and has no right to use consumer dollars to randomly advertise on Florida's radio and television stations – and then to ask for more money on top of that waste.
2. FPL uniformly goes outside its box, now offering FREE EV chargers, with the cost also passed on to consumers and with the effect of financially hurting small companies who also install EV charges but must absorb the cost and cannot pass it on to other consumers, as FPL does.
3. FPL needs competition, not only to prevent these abuses but to provide the people of South Florida with an option, just as finally happened with internet provides.

Thank you for listening to my rant. I can't think of a utility company that takes more advantage than this one.

Subject: Docket No. 20250011 - Please Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gary Clark,

Adam Teitzman, Commission Clerk
Division of Commission Clerk and Administrative Services Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, FL 32399-0850

Re: Docket No.20250011 -EI

Petition by Florida Power & Light Company for Base Rate Increase

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

Sincerely,
Ms. Natalie Cammisa
5132 19th St N Saint Petersburg, FL 33714-2608 natalie.cammisa@gmail.com

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Dear commissioners,

And by that I mean Gary, Andrew, Art, Mike, and Gabriella. The reason I use your names is to remind you that you are people just like us. Although you may have friends in high places and extraordinarily well paying salaries, I want you all to remember that we all are human and your fellow man is struggling. Nobody wants this stupid rate hike other than FPL. They might think it's only an Extra \$10 or \$20 but to a people that have been squeezed dry at every turn it's enough already. People are already struggling as it is and to strong arm the very people that are already overpaying for a service is wrong and unethical. These higher rates are going to put more money in executive pockets and there's going to be no oversight as to how the money is spent when it goes to hiring contractors to put in more overpriced solar panels that nobody wants.

If FPL wants more money they have to give full transparency as to where it will be going and not just give blanket statements to try and fool the people. Why don't they reorganize their budget first to see where they can make some changes? Isn't that what we are told to do when we need more money? Why don't they invest in more efficient methods of power like nuclear? We don't want more land turned into solar farms, it's not worth the money spent. It just allows for more backdoor deals to be made between contractors and people in positions of power.

There's a lot to be said but ultimately it can be summed up like this. The people are tired. The people are fed up. It's time for you to choose whether you are for the corporations that only care about money or if you are for the people that make it possible for the company to exist in the first place. I hope your large paychecks and associations with power haven't blinded you from being able to see the plight of your fellow man.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

To: Office of Commissioner Passidomo Smith
Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Patrick Huey

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

FPL customers may be forced to swallow largest utility rate hike in U.S. history.

FPL is the largest utility rip off in the country. Deny this outrageous rate hike. People are having a lot of trouble keeping up with inflation and getting by every day. Also, one has to wonder how much of this absurd increase is meant to fund the increased energy needs of the AI revolution. The users of AI, through the appropriate intermediaries, should pay for that investment, not the general population.

Subject: Proposed FPL Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

PLEASE DENY FPL REQUEST FOR ANY RATE INCREASES.

This is completely ridiculous that Florida Plunder and Loot would ask for more money when they are raking in billions in profits already. Not to mention they provide substandard services that aren't worth what I am paying them now. When does it end? We as customers should be getting rebates, not increasing rates.

From: Richard Mazur <rtmgolf04@gmail.com>
Sent: Wednesday, August 6, 2025 10:40 PM
To: GovernorRon.DeSantis@eog.myflorida.com
Subject: Fwd: Electricity rates in Florida

Dear Governor DeSantis,

I am concerned that the electric power supply in Florida is shrinking?

Why?

Over the next 10 years, 91% of all new power generation will be solar and battery storage. Solar is 5 to 6 times more expensive than natural gas, clean beautiful coal or nuclear. Yet these power plants can run ALL day long.

The peak solar energy from our sun is from 9:30 AM to 4:30 PM and on average only 5.3 hours of sun/day in Florida.

FPL anticipates a \$9 billion rate hike over the next 10 years. FPL is guaranteed an 11.4% rate of return

on investments. The land use for solar is enormous compared to power plants. FPL is planning for washing/drying appliance use between midnight and 5 AM. Who would want to do this?

Is there anything here that is incorrect?

I am requesting that you promote the production of new power plants like clean coal, natural gas or nuclear plants to keep energy rates from skyrocketing.

Please tell me if you agree with this choice. I hope that you want to keep energy costs in Florida as low as possible for the average Florida resident?

Sincerely,

Richard and Sandra Mazur

21033 Anclothe Ct.

Venice, FL 34293

To: Office of Commissioner Graham
Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

To: FL State Policy Makers/Gov

From: FL Tax Payers, Electric Customers

BCC: +1000 rate payers

Subject: FL committed to, as NJ to energy suicide, re bad Policy

FYI: Below 7/9/25 WSJ, outline NJ failed energy policy choices!!

Replacing reliable, affordable energy in favor of Green alternatives, *CCP Solar/Battery, Wind*. Result higher rates, less reliable supply. Similar to FL, FPL plan add 100% CCP Solar/Batter, ignoring lower cost, reliable Gas/Nuclear, CLOSING DOWN current supply!

- *NJ plan 100% Green/Renewable supply 2035!!!*
- *NJ rates +15% V. Nat Average, requesting additional 17%-20% increase currently!!*
- *NJ sending residents CHECKS, offset inordinate ENERGY COST!!!*
- *Ignored expansion - less costly, reliable gas/nuclear!!!!!!*
- *NJ Consumers/Industry, outraged over energy cost, dependent on MJP grid!!!!!!*

ENERGY SUPPLY on the BALLOT NJ!!!!!!!!!!!!!!!!!!!!!!

Conclusion:

FL on same path NJ, closing coal, gas, diesel plants, expanding unreliable CCP Solar!

FPL pending \$9 Bil rate increase covering 1/3 of FL users!!!!

DC opium, tax payer\$ to Utilities owners enable solar expansion, 12,000 Sq mile, Farm Land FPL!

Trump Plan quadruple Nuclear clean energy by 2050!!

Recommendation:

Bad policy, campaign contributions, tax payer \$/subsidies (*re routed through DC/Mordor*) put FL dangerous place re “*Base Load*” *energy supply*. FL Supply issues more dangerous than NJ, FL demand increasing, expanding population, industry relocations require enormous levels of Reliable, affordable, Abundant ENERGY!!!

Sky Rocketing rates, brown/blacks OUTS can be avoided, agriculture need not transition to CCP Solar farming, eating up 10s of thousands Sq miles of farm land.

Policy Makes

☐ On our side (today) rethink FL ENERGY POLICY, based on affordable, reliability, domestic’s sources clean energy!!!

- ***First step***, *stop closing existing utility plants buying farm land to decorate FL landscapes with CCP Solar/Battery and transmission lines!!!*
- ***STOP*** *Solar expansion in favor of LNG, Nuclear, clean diesel and coal.*

How Phil Murphy Caused New Jersey Electricity Prices to Soar WSJ

Despite flat electricity demand for the past two decades—and some of the lowest energy usage per capita among the 50 states—New Jersey residents pay some of the highest retail power prices in the country. As of April 2025, the Garden State ranked No. 12 in

the nation, with prices more than 15% above the U.S. average. This gap has widened further in the wake of the recent decision by the New Jersey Board of Public Utilities to approve an additional 17% to 20% rate increase for most utility customers starting in June.

A decade ago, the *outlook for New Jersey electricity prices was much brighter. The state was adding natural-gas generation capacity to take advantage of abundant, lowcost Marcellus Shale gas located next door in Pennsylvania.* By 2016, New Jersey achieved energy independence by supplying all its power needs with in-state generation for the first time in its history, partially fueled by Pennsylvania gas. *Then the state threw it all away. Since electing Gov. Phil Murphy in November 2017, New Jersey has shut down all its coal plants, reduced its natural gas-generation capacity, and increased its reliance on intermittent wind and solar power. Trenton is on a quixotic quest to achieve 100% “clean” electricity production by 2035.*

Under Mr. Murphy’s leadership, New Jersey has tilted at offshore windmills—none of which have been completed to date, mainly due to cost overruns, despite the state’s generous financial incentives. *New Jersey has also subsidized the rollout of solar power (mostly nonutility scale) even though the state experiences only 94 days with less than 30% cloud cover in an average year.* The state ranks seventh in the country for small-scale solar power generation, with rooftop and utility-pole solar panels now ubiquitous.

Such supply-side mismanagement has led to a 12% decrease in New Jersey’s electric-generating capacity since 2016. Over the same period, average residential power prices increased by almost a third even as consumption declined slightly. The shale revolution has led to a significant drop in U.S. natural-gas prices since the 2000s, but New Jersey electricity customers have seen no benefit in their monthly bills.

A growing dependence on out-ofstate generation to meet electricity demand—the shortfall stood at 16% in 2024—has increased the state’s reliance on the Pennsylvania-New Jersey-Maryland, or PJM, regional transmission organization. This subjects New Jersey to even harsher climate policy.

PJM was started as a two-state, three-utility power pool in 1927 but has expanded into one of the largest regional grid operators in the U.S., responsible for balancing electricity supply and demand across 13 states plus the District of Columbia. Given

PJM's largely blue-state makeup, it's no surprise that its leadership has let climate policy objectives overrun grid planning and market dynamics in recent years.

Despite annual capacity pricing auctions meant to create an incentive for the construction of new power plants, total committed daily PJM capacity decreased by roughly 20%, or 34.3 gigawatts, between June 2015 and June 2025. Like Trenton, PJM has replaced dispatchable coal and natural-gas generation with variable wind and solar facilities across its entire service territory. Subsequent

The state was energyindependent in 2016, thanks to Pennsylvania shale gas. No longer.

CROSS COUNTRY

interconnection bottlenecks have delayed many winningbid renewable projects as PJM struggles to provide the necessary new transmission infrastructure quickly enough. ***Both the North American Electric Reliability Corp. and the Energy Department have raised concerns about grid reliability and potential outages in the PJM system over the next five years due to the forecast increase in electricity demand from data centers and other large industrial users.***

The laws of energy supply and demand are catching up with PJM—and New Jersey. In its last regular capacity auction, generation prices went up more than ninefold yearover-year. It was this price spike that led to the recent regulator-approved 17% to 20% increase in New Jersey residential bills.

Rather than ***mailing out government checks to provide temporary ratepayer relief as the Murphy administration has recently done, New Jersey needs to take responsibility for its own energy destiny by returning to energy self-sufficiency.*** This would make it no longer necessary to participate in PJM. Despite Trenton's climate delusions, from a reliability, cost and emissions perspective, New Jersey already has an optimal generation mix. **Natural gas and nuclear currently comprise more than 90% of its electricity output.** ***The Garden State just needs to supersize both fuel sources to catch up with current demand as well as projected load growth.***

New natural-gas combined-cycle plants can be delivered within three years and are the most affordable option. More natural gas power will also allow New Jerseyites finally to receive the shale dividend that they were promised years ago. Largescale nuclear reactors take longer to complete but never go dark during their 80-year operating lives. **New Jersey should take advantage of the Trump administration's push to quadruple domestic nuclear capacity by 2050.**

In a hopeful sign earlier this year, the state's public utilities board sent out a request for information on potentially building new nuclear power plants in the state.

Bringing down New Jersey's skyhigh electricity prices will require a fundamental shift in the political outlook in Trenton.

Sound energy policy is on the ballot in the Garden State in November.

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Sandra Wait

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

As a Florida Power & Light (FPL) customer, I strongly oppose the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, especially low-income customers or older adults on fixed incomes who simply cannot afford to pay more.

With costs for housing, healthcare, and everyday essentials already high, the last thing I need is a higher electric utility bill. FPL is already a highly profitable company—asking customers to pay more just to boost corporate profits is completely unacceptable.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Subject: FPL PRICE INCREASE

Dear Governor DeSantis, last September I sent you the profit FPL made for the month of September. Now they want to raise their prices.

My issue is now many millions of dollars profit they make each month is beyond excessive.

It is time to tell them no increase. They make more than ample profit!!!

It is time the people vote for utilities to raise profits or not.

I ask you to put a cap and np price increase aftwr that for 10 years.

Please look at their monthly profits!!!! Too extreme! Time to demand no more.

Please watch. Utility companies are pillaging this country. No more!!

Dear Governor DeSantis,

One must but ask why should we allow FPL to mass rate hike when we are already passing via taxes massive fees for the following:

<https://www.facebook.com/share/p/17CfTgJY14/>

When you look at the fact the volume in mass profits they make monthly and a large percentage of Florida are retirees who do not make much from SSI and so many of us are lucky if we even get a pension, I ask you reconsider and veto the price hike bill from FPL and Duke Energy.

They are already a monopoly which is illegal.

It is high time we the people stop allowing big corporations to jack prices up. Especially with inflation.

We need to look at their monthly profits post costs and let them know they do not need to profit more when they get kick backs from federal taxes as well as fema incurred costs paid for hurricanes and storms.

Just say no! It is time to big big corporations on a belt tightening diet!

We also want data centers to pay their own bills. It is our data they take without our permission or sneak it in fine print and we do not consent to paying their bills, their taxes or helping them profit from stealing our personal data. Just say NO!

Thank you.

Tammy Schrader

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Tationa Robinson

This is bullshit. How can you claim to represent residential customers while you "oversee" a corporation with a monopoly and have capitulated to all the rate increases I have seen come up since I moved here in 1976. I'm guessing this rate increase is to accommodate vast additional power needed for data centers, crypto and other corporate uses who dwarf the average schmo's electrical consumption. Where the hell is the savings from abundant solar & wind power in FL?

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Subject: Reject FPL's Latest Rate Hike Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida PSC Commissioners,

As a Florida Power & Light (FPL) customer, I urge you the Florida PSC to reject the largest rate increase in U.S. History. In the past five years, FPL customers have seen bills rise by over \$400 annually. These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is. My family has to choose between feeding our family or pay the high Fpl bill in addition to high property taxes and insurance hikes.

It's already difficult to stay on top of the rising costs of gas, housing, and healthcare bills due to inflation—how am I supposed to afford a rate hike too? Why do I need to suffer when FPL raked in over \$10 billion in profits in the last five years? It is unconscionable to force customers to endure financial hardship so wealthy utility executives and shareholders can line their pockets.

Please stand up for Florida ratepayers and reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize the needs of customers over corporate greed and ensure utility rates remain fair and affordable.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Mrs Vivian Coleman

When are you guys going to do something for the people of Florida who pay your salary concerning FPL and their continuance increase. The first thing that needs to be done is stopping the monopoly they have. We need and should have other electric power companies in order to control the continuance of increase from FPL. Back in the days citizens could reach out to the commissioner and get help. Now a days no one listens to what the Floridians need, only how many billions can elderly can not even buy food because they have to choose pay FPL to have power or buy food. Seriously your job is for the citizens of Florida, NOT FPL.

Sincerely

Hilda Perez Alvarez

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
DAVID BIKE

Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

Subject: Reject FPL's Latest Rate Hike Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida PSC Commissioners,

As a Florida Power & Light (FPL) customer, I urge you the Florida PSC to reject the largest rate increase in U.S. History. In the past five years, FPL customers have seen bills rise by over \$400 annually. These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is.

It's already difficult to stay on top of the rising costs of gas, housing, and healthcare bills due to inflation—how am I supposed to afford a rate hike too? Why do I need to suffer when FPL raked in over \$10 billion in profits in the last five years? It is unconscionable to force customers to endure financial hardship so wealthy utility executives and shareholders can line their pockets.

Please stand up for Florida ratepayers and reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize the needs of customers over corporate greed and ensure utility rates remain fair and affordable.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Ms. Andrea Chisari

Subject: Keep FPL Rates Down Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

I strongly oppose what may amount to the largest rate increase in U.S. History. This excessive hike would place an unfair burden on customers, adding to the already high costs for housing, healthcare, & groceries. The last thing your FPL constituents need is a higher electric utility bill, especially when the company is already a highly profitable one. It's unconscionable to have customers pay more just to boost corporate profits.

Please reject FPL's request for a higher return on equity & increase to the monthly base rate. The PSC is supposed to prioritize CUSTOMERS over corporate greed, ensuring utility rates remain fair & affordable.

Thank you for your time and consideration.

Sincerely,

Susan Datres
8717 Waltham Court
Tallahassee FL, 32311-9428

Subject: FPL is always hiking rates. Stop this current request for price hike.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners,

I urge you to reject Florida Power & Light's proposed rate hike, which would be the largest in U.S. history.

FPL customers have already seen their bills rise by more than \$400 in the past five years. This burden falls hardest on low-income families and seniors living on fixed incomes. Many are already struggling with the rising costs of housing, gas, and healthcare. Adding another steep increase is unacceptable.

It is especially troubling to demand more from customers when FPL has reported over \$10 billion in profits during that same period. This proposal prioritizes corporate shareholders over the public interest.

Your responsibility is to ensure that utility rates are just, reasonable, and serve Floridians. I urge you to reject FPL's request to raise monthly base rates and increase its return on equity.

Floridians deserve affordable, reliable, and clean energy, not another rate hike that worsens the cost-of-living crisis. Please stand up for working families, retirees, and vulnerable communities by voting no on this proposal.

Thank you,
Celeste G.

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Melanie Garcia

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida PSC Commissioners,

As a Florida Power & Light (FPL) customer, I urge you the Florida PSC to reject the largest rate increase in U.S. History. In the past five years, FPL customers have seen bills rise by over \$400 annually. These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is.

It's already difficult to stay on top of the rising costs of gas, housing, and healthcare bills due to inflation—how am I supposed to afford a rate hike too? Why do I need to suffer when FPL raked in over \$10 billion in profits in the last five years? It is unconscionable to force customers to endure financial hardship so wealthy utility executives and shareholders can line their pockets.

Please stand up for Florida ratepayers and reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize the needs of customers over corporate greed and ensure utility rates remain fair and affordable.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Miss Rosa Garcia

RE: FPL Rate Increase, PSC Docket 20250011

My family and I are writing to object to a rate hike by Florida Power and Light. What we pay FPL presently is already exorbitant!

I am retired and we live on a fixed income budget. One of largest expenses is the FPL monthly bill. We are struggling to pay their bill and maintain a reasonable home temperature.

FPL has failed to increase its conventional power generation capacity to meet the 24/7 demand of a Florida population that is growing, many of whom are retirees like us.

Without a focus on this priority first, it is unconscionable to increase the already too high rates. We strongly object!

Sincerely,

Andrew HeLal

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

Message

Hi I am a stay at home mom of 3 boys. Our power bill from Florida power has raised so high to the point it is getting hard to keep up with. Florida power and light is the biggest money scamming company there is in Florida. They do not care for their customers or helping in difficult times. They make it hard to pay for these bills they send out. I don't believe they should be able to turn the power off with kids living in a house. Time are hard and FPL does not care about anything but money.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida PSC Commissioners,

As a Florida Power & Light (FPL) customer, I urge you the Florida PSC to reject the largest rate increase in U.S. History. In the past five years, FPL customers have seen bills rise by over \$400 annually. These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is.

It's already difficult to stay on top of the rising costs of gas, housing, and healthcare bills due to inflation—how am I supposed to afford a rate hike too? Why do I need to suffer when FPL raked in over \$10 billion in profits in the last five years? It is unconscionable to force customers to endure financial hardship so wealthy utility executives and shareholders can line their pockets.

Please stand up for Florida ratepayers and reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize the needs of customers over corporate greed and ensure utility rates remain fair and affordable.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Ms. Joy klein

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Annie McCann

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Arlene McCreary

Subject: Please Review and Reject PSC Docket 20250011

Dear Clerk of public Service Commission

I am a life long Floridian. I am one of the millions of FLORIDIANS for abundant, reliable 24/7, low cost & low footprint electricity, I strongly urge you to reject PSC Docket 20250011, FP& L's proposed \$9 billion rate hike. My position is based on multiple good reasons including maintaining low-cost energy, maintaining a reliable availability of power, **promoting a diversity of energy**, promoting wise land use, & ensuring an attractive business environment for smart growth.

In the last 3 years, I've been amazed to learn about numerous misguided energy production ventures where many have been well-intentioned but they, like the FP&L request, have numerous shortcomings. The common thread in these misguided exploits is they consist of Green or Renewable energy examples. These examples include wind & solar developments & they're bad because of where they've been placed or proposed & their implementation scale. For example, 3-4 offshore wind turbine projects have been placed in New England coastal waters where during construction these ventures were found to severely adversely impact the most endangered mammal in N. America, the Atlantic right whale as well as numerous other marine mammals. That's only the start, as New Englanders have found their energy bills have now doubled & when combined with impacts to commercial fisheries activities, things only got worse (seafood costs rose). FP&L, Duke Energy, & TECO are now travelling the same unwise path & are promoting solar energy which is obviously going to cost FLORIDIANS (\$9B) as evidenced in this Docket proposal.

FP&L has been inappropriately promoting solar power despite its limitations and inherent shortcomings. This Docket proposal would take place over 10 yrs & requires 192,000 acres of surface land area, largely in So. Florida. This type of power generation is maximally efficient for **only 5.2 hrs** of the day (DOE Berkeley Natl Lab) & this is tops with the best weather conditions. Further, this Docket strategy requires both solar & battery storage (BESS) components which require import products- lithium batteries namely from Chinese supply sources or Chinese sub-vendor countries. Also, numerous sources-Reuters, other news sources, & govt. sources (DOE Sandia Lab 2017) have revealed the presence of control sensors embedded within solar panels, power transformers, & inverters of Chinese origin...all vital components of this energy Docket proposal. Building this type of solar & BESS capacity **has caused rates to rise** in areas where power diversity is limited and solar is the

mainstay. Over the last 5 yrs. in western Europe, Spain, & Australia, there have been many rolling “blackouts” that have occurred due to an overreliance on solar power and where the power grid has been unwisely configured with minimal power diversity.

This proposal is not acceptable because of FP&L’s unwise history in solar power development, a need to maintain FL’s existing long-term economies, and a need for future smart development. The land space needed for this Docket proposal (ie., 192,000 acres) will in time infringe on Florida’s longstanding cattle production, citrus farming, wildlife habitat, & crop production in the So. FL landscape. Solar farms will simply take up too much land space. Florida has good potential for hosting Artificial Intelligence (AI) development with its current land area & a low business tax framework to attract this growing AI expansion. However, AI absolutely requires a highly dependable 24-hr power grid which could be met with a rich power diversity. Hence, Florida’s power providers should be working to diversify its array of power generation. Thankfully, Pres. Trump has ordered a full reform of nuclear power permitting that should be operational in a couple of years. This reform and the refinement of small module (nuclear) reactors have fueled high hopes for a new era of nuclear power development that Duke Energy & FP&L should partake in. Further, FL utilities should be developing a more diverse power character with more natural gas proposals built with US components & sources ..all of which are cost efficient & American made.

Thus, **I strongly urge you to REJECT this Docket proposal** as this action should alternatively lead to a more reliable and abundant, low-cost power diversity that will benefit FL businesses and current & future FP&L ratepayers.

Sincerely

Stuart

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Marybeth Payor

The government authorized monopoly FPL!

Message

Please vote completely against the FPL rate hike. We have had enough rate hikes while they give their board members massive bonuses. 8.9 Billion? Maybe more if they pass on the solar costs, that we have already had two rate increases for already. What we need to do is dismantle this government authorized monopoly.

Dear PSC Commissioners:

This is a bullcrap money grab! Companies don't even care what is a fair rate, they are raising rates for no other reason than PURE GREED! They think they can get away with out right corporate greed that I say is the same as theft, and they are trying to get an approval to go through with this theft so they can get richer and blame it on everyone that approved this con. FPL feels emboldened since our Federal Government has ruthlessly ripped away many institutions that help everyday Americans make it through the day. This whole thing, is nothing more than a HUGE con they want to make legal by ripping more money away from us for no reason! We all see the cost of fuel, fuel prices are way down, so this whole thing is a pile of crap!

I urge you to reject what would be the largest utility rate increase in U.S. history.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Judy Stafford

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida PSC Commissioners,

I urge you the Florida PSC to reject the largest rate increase in U.S. History. In the past five years, FPL customers have seen bills rise by over \$400 annually. These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is.

It's already difficult to stay on top of the rising costs of gas, housing, and healthcare bills due to inflation—how am I supposed to afford a rate hike too? Why do I need to suffer when FPL raked in over \$10 billion in profits in the last five years? It is unconscionable to force customers to endure financial hardship so wealthy utility executives and shareholders can line their pockets.

Please stand up for Florida ratepayers and reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize the needs of customers over corporate greed and ensure utility rates remain fair and affordable.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Mr. James Teas

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Elizabeth Watts

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Abby Dozier

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida PSC Commissioners,

As a Florida Power & Light (FPL) customer, I urge you the Florida PSC to reject the largest rate increase in U.S. History. In the past five years, FPL customers have seen bills rise by over \$400 annually. These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is.

It's already difficult to stay on top of the rising costs of gas, housing, and healthcare bills due to inflation—how am I supposed to afford a rate hike too? Why do I need to suffer when FPL raked in over \$10 billion in profits in the last five years? It is unconscionable to force customers to endure financial hardship so wealthy utility executives and shareholders can line their pockets.

Please stand up for Florida ratepayers and reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize the needs of customers over corporate greed and ensure utility rates remain fair and affordable.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Mr. Hunter Echols
4540 Sabine Dr Gulf Breeze, FL 32563-9253 hundred1@earthlink.net

Subject: Florida Power Light non fuel rate

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To PSC Representative FPL non fuel charge is 0.096990 for the first 1000 KWH. Over 1000 KWH is 0.107050. Fuel rate is 0.024080 first 1000 KWH. Over 1000KWH is 0.034080. In my bill I am paying \$177.70 non fuel! \$49.78 for fuel charges, logically I find this a great ripoff I do not have a choice in which fuel they use, in a competitive environment I will go with a competitor. There is non! FPL use wind and solar panels it is free energy but they charge triple! of course windmills and thousands of solar panels and inverters are expensive, but they do not have to worry about the red line. FPL need competition!. End this monopoly. The town of Homestead fl. 2 miles from me (were my son lives) and getting their power from the same grid, energy cost is lower. Part of The town of Homestead do not use FPL. Help! Luis Hernandez 27070 SW 187 ave 33031 tel. 3056066650 thank you.

Subject: OPPOSITION TO THE FPL RATE INCREASE

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Regarding FPL Rate Increase, PSC Docket 20250011.

I oppose this rate increase. There should be no discussion of a rate increase without first ensuring that there will be no more alternative unreliable intermittent energy such as wind and solar projects approved until after regulations are in place to ensure sufficient conventional base power generation capacity is in place to provide safe reliable power at a level to satisfy the needs of Floridians for electricity when the alternative unreliable intermittent energy sources are not generating power.

Furthermore, no settlement agreement on this matter should be considered. This issue should be discussed and resolved via a full public hearing with full public participation.

Sincerely,
Kathi Meo, Treasurer

To: Office of Commissioner Passidomo Smith
Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Subject: Reject FPL's Latest Rate Hike Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida PSC Commissioners,

As a Florida Power & Light (FPL) customer, I urge you the Florida PSC to reject the largest rate increase in U.S. History. In the past five years, FPL customers have seen bills rise by over \$400 annually. These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is.

It's already difficult to stay on top of the rising costs of gas, housing, and healthcare bills due to inflation—how am I supposed to afford a rate hike too? Why do I need to suffer when FPL raked in over \$10 billion in profits in the last five years? It is unconscionable to force customers to endure financial hardship so wealthy utility executives and shareholders can line their pockets.

Please stand up for Florida ratepayers and reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize the needs of customers over corporate greed and ensure utility rates remain fair and affordable.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Ms. Pam Nolan

Subject: Docket No. 20250011 - Reject FPL's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I'm writing to urge you to reject Florida Power & Light Company's proposed rate increase (Docket No. 20250011).

FPL is requesting nearly \$10 billion in new charges over the next four years — costs that will fall on the backs of the very people who rely on FPL to keep the lights on. Half of every dollar in this proposal would go straight to shareholder profits, not essential services. That's unacceptable.

In the last five years alone, FPL customers have seen their bills jump by more than \$400 a year. This latest plan would add another \$360 in just two years — all while Floridians are still recovering from devastating storms and battling the rising cost of living.

FPL claims the hike is needed to meet demand, but the Office of Public Counsel has made it clear that this is misleading. According to OPC, FPL's numbers are inflated — and rather than raise rates, the company should actually cut them by \$620.5 million in 2026.

The Public Service Commission is charged with protecting the public — not maximizing utility profits. I strongly urge you to reject this rate hike and send a clear message that Floridians come first.

Sincerely,
Kristi Padgett

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Subject: Reject the FPL rate hike!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

This is a bullcrap money grab! Companies don't even care what is a fair rate, they are raising rates for no other reason than PURE GREED! They think they can get away with out right corporate greed that I say is the same as theft, and they are trying to get an approval to go through with this theft so they can get richer and blame it on everyone that approved this con. FPL feels emboldened since our Federal Government has ruthlessly ripped away many institutions that help everyday Americans make it through the day. This whole thing, is nothing more than a HUGE con they want to make legal by ripping more money away from us for no reason! We all see the cost of fuel, fuel prices are way down, so this whole thing is a pile of crap!

I urge you to reject what would be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

As a Florida resident and consumer, I know the value of my hard-earned money. I also know that the power and light I pay for every month is a lifesaver, especially during these extreme heat waves that are becoming all too common.

Florida Power & Light (FPL) wants to raise my rates by hundreds a year and make working residents like me foot the bill for their profits and executive bonuses. Reporting has shown that 50 cents of every dollar is going to profit, not keeping the power on. Additionally, from March 2024 to February 2025, FPL shut off 1.216 M residential customers for non-payment — about a fifth of all their residential customers.

The Office of Public Counsel—the watchdog for consumers—submitted expert testimony showing FPL is inflating the numbers and should cut rates by \$620 million, not raise them.

I urge you to reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize customers over corporate greed and ensure utility rates remain fair and affordable.

Please stand up for Floridians and say NO to this massive rate hike.

Thank you for your time and consideration.

Docket # 2025-0011

My experience with FPL has been very pleasurable. I can always count on the lights being on. In addition, I can always count on service being restored quickly after a storm-related outage. My experience paying my electric bill has also been very straightforward and easy. I can always count on the bill amount being relatively similar given my consistent use of electricity. In addition, the manner in which the charges are shown is easy to read and understand. FPL provides consistent and reliable service at a reasonable cost. Their customer service is always reliable as well and their website is very intuitive. In addition, attempts to reach FPL via phone have always been successful and resulted in issues being resolved efficiently.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida PSC Commissioners,

As a Florida Power & Light (FPL) customer, I urge you the Florida PSC to reject the largest rate increase in U.S. History. In the past five years, FPL customers have seen bills rise by over \$400 annually. These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is.

It's already difficult to stay on top of the rising costs of gas, housing, and healthcare bills due to inflation—how am I supposed to afford a rate hike too? Why do I need to suffer when FPL raked in over \$10 billion in profits in the last five years? It is unconscionable to force customers to endure financial hardship so wealthy utility executives and shareholders can line their pockets.

Please stand up for Florida ratepayers and reject FPL's request for a higher return on equity and increase to the monthly base rate. The PSC must prioritize the needs of customers over corporate greed and ensure utility rates remain fair and affordable.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Mr. George Chesrow

Subject: Reject the Proposed FPL Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC Commissioners:

I urge you to reject what is projected to be the largest utility rate increase in U.S. history.

Over the past five years, FPL customers have seen their annual bills increase by more than \$400. These ongoing rate hikes hit hardest for low-income families and seniors living on fixed incomes—Floridians who are already struggling to keep up with the rising cost of essentials like gas, housing, and healthcare. Adding another unaffordable rate hike on top of these burdens is unacceptable.

It is especially egregious to ask customers to pay more when FPL has reported more than \$10 billion in profits over the last five years. This proposal does not reflect the needs of everyday Floridians—it reflects the priorities of corporate shareholders and executives looking to maximize returns at the expense of the public.

The Public Service Commission has a duty to ensure that utility rates are just, reasonable, and in the public interest. I respectfully urge you to reject FPL's request to increase the monthly base rate and raise its return on equity. Floridians deserve fair and affordable energy—not price hikes that fuel corporate profits.

Please stand up for Florida's working families, retirees, and vulnerable communities, and say NO to this rate hike.

Thank you,

Sincerely,

Cindy Dwyer

I'm really impressed with Florida Power & Light's work on the Downtown Miami Injection Project. As a resident of the City of Miami, I've seen firsthand how much Downtown Miami has grown, and it's great to know FPL is planning ahead by installing an underground transmission line to meet our future energy needs.

What stands out to me is the teamwork behind this project. FPL partnered with Miami-Dade County, the City of Miami, and The Underline to make sure the upgrades are done in a way that benefits the entire community. Putting the lines underground means fewer outages during storms, more reliable service, and no unsightly poles cluttering our streets.

I also appreciate how they're coordinating with The Underline to protect and enhance this amazing public space while improving our energy infrastructure. It's clear they're thinking about both reliability and quality of life.

Overall, this is the kind of forward-thinking project that will help power the City of Miami's growth. I appreciate FPL's commitment for investing in our energy infrastructure and supporting our community's future.

These increases disproportionately burden low income customers and older customers living on fixed income who can barely afford their utility bills as is.

IF YOU ARE GOING TO DO THIS RATE HIKE, THE LEAST YOU CAN DO IS LOOSEN THE COSTS FOR ROOFTOP SOLAR. ALLOW THOSE WITH SOLAR TO SELL EXCESS ENERGY BACK - AT a ONE to ONE rate. Currently there is no benefit to allow larger systems in a state where the sun will help prevent these rate hikes, by adding more low cost electricity to the system.

Please say NO to this massive rate hike.

I appreciate your consideration of my feedback on this historic rate proposal.

Sincerely,
Mr. Andrew Giddings
