This comment is in regards to Coastal States Water Resources Doc. No. 20250136 WS. CSWR's petition to utilize cost sharing to recoup purchase and repair costs to Rolling Oaks Utilities with other owned Water and Waste Water Systems. I am a resident of Coventry Subdivision and oppose this cost sharing petition. We will not receive any benefits from this cost sharing and should not be obligated to pay for CSWR's short sightedness in failure to do their due diligence and budget accordingly for cost of purchase and repair/upgrade of Rolling Oaks Utilities. This along with a recently awarded rate increase that is now in place that almost doubles the previous cost, poor service since purchasing the water service used in Coventry Subdivision, periods of low water pressure, multiple water boil notifications, and poor communications on these issues does not warrant an additional cost to Coventry Subdivision residents. Robert L Davis
