Subject: Concerns Regarding High Electric Bills

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good morning,

I hope this message finds you well. I wanted to bring to your attention the ongoing issue we have been facing with our electric bills. Despite keeping our AC at a higher temperature and ensuring that all our appliances and duct work are in good condition, our bills have been consistently over \$300.

To our surprise, the latest bill we received amounted to \$495, with the energy insight note indicating a significant increase in our daily kWh usage compared to the previous period. This happens like clockwork each summer despite the fact that we have not altered our energy consumption habits during peak periods or at night.

It is disheartening to see our bills skyrocket, especially during these challenging economic times when every expense is a burden. It is concerning that electric companies like TECO continue to raise rates without proper justification, leaving many families, including ours, feeling financially strained.

As a resident of Florida, I believe it is crucial for us to address these issues and seek relief from what appears to be unjustified price hikes. It is frustrating to witness the continuous rise in costs while struggling to make ends meet. I urge you to consider the impact of these escalating bills on families like ours and take necessary steps to prevent what feels like exploitation by utility companies. Thank you for your attention to this matter,

Warm regards,

Tammy Watson
