

ACCESS SERVICES

3.10 Rates and Charges

A. The rate for Carrier Common Line Access is:

1. Per Originating Access Minute

| | <u>Rate</u> |
|---------------------------|-------------|
| GTC SWA FGA, FGB and FGD. | .0304 |

2. Per Terminating Access Minute

| | | |
|--------------------------|---|-----|
| GTC SWA FGA, FGB and FGD | | |
| Port St. Joe | * | (C) |
| Floral | * | |
| Perry | * | |
| Chattahoochee, GA | * | (C) |

*The rates, charges and conditions for the provision of intrastate terminating Carrier Access Service are as specified in the NECA Tariff FCC No. 5 as it now exists, and as it may be revised, added to, or supplemented.

ACCESS SERVICES

SECTION 5 - ORDERING OPTIONS FOR ACCESS SERVICES (CONT'D)

5.1 General (Cont'd)

5.1.2 Ordering Conditions (Cont'd)

- I. The following charges will apply for the installation, move or rearrangement of GTC SWA or Special Access (a.k.a. GTC SPA) service orders with an agreed upon service date interval of four business days or less following the Application Date of the order. These charges are in addition to other applicable GTC SWA or Special Access (a.k.a. GTC SPA) nonrecurring charges for installations, moves or rearrangements of service. These charges will not apply to services provided on a Special Services Arrangement or on an Individual Case Basis, or in the event the agreed upon Service Date, as set forth preceding, is not met, or at the request of the customer to convert from a lower to higher order of service as provided for in 2.4.9.A in this Tariff.

1. Per Service Order

| | Nonrecurring Charge |
|---------------------------------------|------------------------|
| a. Special Access (a.k.a. GTC SPA) | \$365.00 |
| b. GTC SWA | * |

(C)

- J. An IC or End User who initiates a conversion (rollover) of a GTC SWA DS1 to a GTC SWA DS3 High Capacity service is also responsible for submitting Network Channel Interface (NCI) Code Update requests, either mechanically or manually, on all sub-DS1 level circuits that ride the channelized GTC SWA DS1 High Capacity service being rolled over. The Company and the IC or End User will work cooperatively to establish the number of circuits which may be submitted monthly for purposes of mechanical NCI Code updates associated with rollovers of GTC SWA FG DS1 High Capacity service to GTC SWA DS3 High Capacity service.
- K. An IC who converts from an existing feature group service to an equivalent unbundled service shall do so on no lower than an end office level. The Company and the IC will work cooperatively to accomplish these conversions.

*The rates, charges and conditions for the provision of intrastate terminating Carrier Access Service are as specified in the NECA Tariff FCC No. 5 as it now exists, and as it may be revised, added to, or supplemented.

ACCESS SERVICES

SECTION 5 - ORDERING OPTIONS FOR ACCESS SERVICES (CONT'D)

5.2 Access Order (Cont'd)

5.2.2 Access Order Modifications (Cont'd)

D. Service Date Change Charge (Cont'd)

4. A Service Date Change Charge will apply, on a per order per occurrence basis, for each service date changed. The Service Date Change-Additional Dispatch Charge will apply for each occurrence of a technician dispatch to the IC's or customer's premises when the customer is not ready for service as specified in D.2 preceding. The applicable charges are:

- | | <u>Nonrecurring
Charge</u> | |
|--|--------------------------------|-----|
| a. Service Date Change Charge, per Order | * | (C) |
| b. Service Date Change-Additional Dispatch Charge, per Occurrence | * | (C) |

5. For multiple orders with the same service date for the same customer premises, only one Service Date Change-Additional Dispatch Charge will apply. However, a Service Date Change Charge will apply for each order.
6. Service Installation Guarantee, as set forth in 2.4.1 0 preceding, is not applicable for Service Date Change charges.

E. Partial Cancellation Charge

1. Any decrease in the number of ordered Dedicated Access Service channels, or GTC SWA Service Lines, Trunks or GTC SWA Transport facilities, CCS7 Signaling Connections and CCS7 Signaling Terminations or WATS Access Lines (a.k.a. GTC SPA WATS Lines) will be treated as a partial cancellation and the charges as set forth in 5.2.3.B following will apply.

*The rates, charges and conditions for the provision of intrastate terminating Carrier Access Service are as specified in the NECA Tariff FCC No. 5 as it now exists, and as it may be revised, added to, or supplemented.

ACCESS SERVICES

SECTION 5 - ORDERING OPTIONS FOR ACCESS SERVICES (CONT'D)

5.2 Access Order (Cont'd)

5.2.2 Access Order Modifications (Cont'd)

F. Design Change Charges (Cont'd)

3. The Company will review the requested change, notify the IC or End User whether the change is a design change, if it can be accommodated and if a new service date is required. If the IC or End User authorizes the Company to proceed with the design change, a Design Change Charge will apply. The Design Change Charge will apply on a per order, per occurrence basis, for each order requiring a design change. The applicable charge is:

- | | | |
|------------------------------------|--------------------------------------|-----|
| | <u>Nonrecurring</u> <u>Charge</u> | |
| a. Design change charge, per order | * | (C) |

Service Installation Guarantee, as set forth in 2.4.10 preceding, is not applicable for Design Change Charge.

4. If a change of service date is required, the Service Date Change Charge as set forth in D preceding will also apply.

*The rates, charges and conditions for the provision of intrastate terminating Carrier Access Service are as specified in the NECA Tariff FCC No. 5 as it now exists, and as it may be revised, added to, or supplemented.

SECTION 6 - GTC SWA SERVICE (CONT'D.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

A. GTC SWA Transport (Cont'd.)

9. Optional Features (Cont'd.)

These optional supervisory signaling arrangements are not available in combination with the GTC SWA

CCSAC option, as specified in e. following.

b. IC Specified Entry Switch Receive Level

This feature allows the IC to specify the receive transmission level at the first point of switching. The range of transmission levels which may be specified is described in Technical Reference TR-NPL-000334. This feature is available with Interface Groups 2, 6 and/or 9 for GTC SWA FGA and GTC SWA FGB.

c. IC Specification of Switched Transport Termination

This option allows the IC to specify, for GTC SWA routed directly to an end office or access tandem, a four-wire termination of the GTC SWA Transport at the entry switch in lieu of a Company selected two-wire termination. This option is available only when the GTC SWA arrangement is provided with Type B Transmission Specifications.

d. Switched Digital 56 kbps Services

This option allows an IC to establish a connection between the IC's premises and a suitably equipped end user premises over facilities that are capable of transmitting 56 kbps digital data. This option requires the use of Interface Groups 6 and/or 9. It is provided to suitably equipped electronic end offices or access tandems and is available only with GTC SWA FGD.

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

A. GTC SWA Transport (Cont'd.)

9. Optional Features (Cont'd.)

j. Tandem Signaling

(T)

This option provides for the automatic transmission of signaling indicators, which identify the interexchange carrier and trunk group to which the call is to be directed. This option, available with GTC SWA FGD, is provided on originating direct trunk groups.

Direct trunk groups equipped with tandem signaling can be arranged to overflow to other direct trunk groups equipped with tandem signaling. Direct trunk groups equipped with tandem signaling cannot be arranged to overflow to the Company's common trunk groups.

Depending on the signaling facilities available, this option will be provisioned via MF or CCS7 signaling. The CCS7 alternative requires the establishment of, 1) GTC SWA CCSAC as described in e. preceding and 2) CCS7 Signaling Connections and CCS7 Signaling Terminations, as further described in E. following.

1. Surveillance Optional Feature

GTC SWA DS1 and DS3 Transport services may terminate into SPA Customer Reconfiguration as set forth in 7 of this Tariff for surveillance only. These GTC SWA channel terminations are not available for reconfiguration. Rates and charges for the surveillance options are provided in 7.4.12 of this Tariff.

3. Nonrecurring Charges (Cont'd.)

(D)

(D)

f. GTC SWA 900 Service

A nonrecurring charge as specified in 6.8.2 following applies to the activation of 900 NXX codes to be routed to an IC in the operating territory of the Company. There are two nonrecurring charges. The first 900 NXX code nonrecurring charge applies for the first 900 NXX code submitted on an Access Service Request (ASR) and is assessed per each Company End Office and Access Tandem in which translations are required to route 900 NXX calls to the IC. The additional 900 NXX code nonrecurring charge applies for each additional 900 NXX code submitted on the same ASR and is assessed per each Company End Office and Access Tandem in which translations are required to route 900 NXX calls to the IC. In addition, rearrangement charges, as specified in 6.8.8 following, are applicable for rearrangements of existing 900 NXXs to add or delete 0+ dialing capability.
