## A13. MISCELLANEOUS SERVICE ARRANGEMENTS

### A13.70 Privacy Director Service (Cont'd)

#### A13.70.2 Regulations and Limitations of Service

- A. The following regulations and limitations apply:
1. Privacy Director service is provided subject to availability of facilities.
  2. Privacy Director service is available to single and multi-line residence customers.
  3. Privacy Director service is not compatible with Calling Number Delivery Blocking-Permanent, FX, FCO, ISDN, ADSL or Prestige Communications Service. Privacy Director service may not be compatible with RingMaster service in all switch types.
  4. Caller ID-Deluxe and Touch-Tone service are required in order to subscribe to Privacy Director service.

#### A13.70.3 Rates and Charges

- A. The following rates are for Privacy Director service only and are in addition to the applicable service charges and monthly rates for exchange access lines and other services with which this service is associated.

### A13.71 Reserved for Future Use

### A13.72 Inter-Switch Simplified Message Desk Interface

#### A13.72.1 General

- A. Inter-Switch Simplified Message Desk Interface (ISMDI) service provides subscribers with the capability of receiving call information over a data link interface for use with voice messaging system (VMS) equipment. Only call information routed over the Public Switched Telephone Network using the Common Channel Signaling/Signaling System 7 (CCS/SS7) network is available for ISMDI. The ISMDI data link must be associated with a voice level hunt group assigned to the VMS subscriber. Incoming call data available from the CCS/SS7 network includes the number called, the type of incoming call (direct or forwarding due to busy or no answer), the forwarding number, and the calling number. The telephone numbers are provided as ten digit Directory Numbers.
- B. ISMDI provides the capability for the VMS provider to transmits data messages over the data link to the ISMDI host switch for use in delivering message waiting notification to VMS client users. These data messages will enable the VMS subscriber to activate or deactivate message waiting indicators (MWI) on VMS client station lines served by ISMDI compatible central offices.
- C. The subscriber had the option of specifying an SS7 Point Code to which MWI messages are to be routed.

### A13.71 Reserved for Future Use

### A13.72 Inter-Switch Simplified Message Desk Interface

#### A13.72.1 General

- A. Inter-Switch Simplified Message Desk Interface (ISMDI) service provides subscribers with the capability of receiving call information over a data link interface for use with voice messaging system (VMS) equipment. Only call information routed over the Public Switched Telephone Network using the Common Channel Signaling/Signaling System 7 (CCS/SS7) network is available for ISMDI. The ISMDI data link must be associated with a voice level hunt group assigned to the VMS subscriber. Incoming call data available from the CCS/SS7 network includes the number called, the type of incoming call (direct or forwarding due to busy or no answer), the forwarding number, and the calling number. The telephone numbers are provided as ten digit Directory Numbers.
- B. ISMDI provides the capability for the VMS provider to transmits data messages over the data link to the ISMDI host switch for use in delivering message waiting notification to VMS client users. These data messages will enable the VMS subscriber to activate or deactivate message waiting indicators (MWI) on VMS client station lines served by ISMDI compatible central offices.
- C. The subscriber had the option of specifying an SS7 Point Code to which MWI messages are to be routed.
