CONFIDENTIAL

3. In its Petition to Intervene, Walmart explained that it purchases more than 290 million kWh annually from Duke Energy Florida. Please provide how many kWh Walmart has purchased from Duke for each of the last five years.

RESPONSE: Walmart states that it has purchased the following kWh amounts from Duke for each of the last five full calendar years: 2015 – 283,000,000, 2016 – 295,000,000, 2017 – 307,000,000, 2018 – 313,000,000, and 2019 – 297,000,000.

4. Please explain whether Walmart has preregistered to participate in the Program. If so, please provide the size of the subscription, and please explain how many kWh are projected to be produced annually by that subscription size. Please provide how this compares to Walmart's total kWh annually purchased from Duke as a percent (for example, whether it is expected to cover 100%, 50%, or some other number of Walmart's electricity consumption).

RESPONSE: Walmart has preregistered to participate in the Program. Walmart states that the size of the subscription is 84,980 kW, and that 200,000,000 kWh are projected to be produced annually by that subscription size. The subscription is approximately 67% of Walmart's total kWh annually purchased from Duke.

5. If the Program is approved, please detail how much, on net, Walmart expects to pay or receive as a bill credit each year for participating in the Clean Energy Connection program throughout the life of the Program. Please identify any documents containing this information.
