I. REMOTE CALL FORWARDING (RCF)

1. General

- a. Remote Call Forwarding (RCF) is a service whereby a call placed from an originating number (Calling Party) to a customer's Remote Call Forwarding (RCF customer) telephone number (the call forwarding location) is automatically forwarded by Company central office equipment to another telephone number (the terminating number) designated by the RCF customer.

2. Regulations

- a. RCF service is offered only from suitably equipped central offices and is subject to the availability of facilities.
- b. Each RCF service allows for forwarding one call at a given time. A subsequent RCF service or path is necessary for each additional call to be forwarded simultaneously.
- c. RCF service will be provided on the condition that the customer subscribes to sufficient facilities to adequately handle calls without interfering with or impairing any services offered by the Company.
- d. When the RCF number is to be located in a multi-office exchange, the Company will determine the serving office.
- e. Customers are prohibited from using Remote Call Forwarding for the purpose of bypassing toll service (e.g., Long Distance Message Telecommunications Service and/or Extended Calling Service (ECS) Routes).
- f. Transmission characteristics may vary depending on the distance and routing necessary to complete the forwarded call.
- g. RCF service is not represented as suitable for satisfactory transmission of data.
- h. RCF service is not offered when the terminating number for a forwarded call is a Pay Telephone access line service.

MISCELLANEOUS SERVICE ARRANGEMENTS

Y. PRIVACY ID

1. General

- a. Privacy ID provides Caller ID subscribers with the ability to identify unavailable, unknown, blocked and private numbers. Privacy ID intercepts all unidentified calls before the subscriber's telephone rings then asks the caller to state their name or company. Once the calling party has responded, the service rings the subscriber and announces the calling party's information. The subscriber has the option to accept the call, reject the call, play an announcement to the calling party or forward the call to voicemail.
- b. The Privacy ID subscriber may provide calling parties with a Caller's Access Code. Use of this access code allows the calling party to bypass Privacy ID.

2. Terms and Conditions

- a. Privacy ID is provided subject to availability of facilities.
- b. Privacy ID is not offered in conjunction with ISDN, Centrex, Payphone Line and PBX Service.
- c. When the Call Trace and Return Call features are activated on calls intercepted by Privacy ID, the telephone number captured is that of the Service Node, which performs Privacy ID, not the telephone number of the calling party.
- d. Caller ID Service is required in order to subscribe to Privacy ID.

3. Rates and Charges

G. CALL SCREENING SERVICES

1. Residence and Business Operator Screening - United Telephone Exchanges Only

- a. Operator screening enables a single line residence customer, business customer, or PBX trunk customer subscribing to the flat rate option, by means of telephone company operator identification, to restrict outgoing telephone calls from station users to only those calls which are placed as credit card, third party billed or collect to the called telephone. This applies to all 0+ and 0- calls as specified following.
- b. All calls to Company numbers such as Repair Service, Directory Assistance and Public Emergency Service numbers (911) will be permitted from the originating station unless the customer also subscribes to specific Custom Code Restrictions.
- c. Operator Screening is limited to those areas served by central offices arranged for this service and is subject to the availability of facilities at rates following.
- d. Operator Screening is provided for intraLATA calling through Company operators. Screening for interLATA calling is the responsibility of the interLATA carriers who choose to acknowledge the network screening signals passed to them.
- e. The Company will not be responsible for screening calls placed by the caller which are not routed through a Company operator. Calls routed through Alternate Operator Services cannot be screened by the Company.

I. REMOTE CALL FORWARDING (RCF)

1. General

- a. Remote Call Forwarding (RCF) is a service whereby a call placed from an originating number (Calling Party) to a customer's Remote Call Forwarding (RCF customer) telephone number (the call forwarding location) is automatically forwarded by Company central office equipment to another telephone number (the terminating number) designated by the RCF customer.

2. Regulations

- a. RCF service is offered only from suitably equipped central offices and is subject to the availability of facilities.
- b. Each RCF service allows for forwarding one call at a given time. A subsequent RCF service or path is necessary for each additional call to be forwarded simultaneously.
- c. RCF service will be provided on the condition that the customer subscribes to sufficient facilities to adequately handle calls without interfering with or impairing any services offered by the Company.
- d. When the RCF number is to be located in a multi-office exchange, the Company will determine the serving office.
- e. Customers are prohibited from using Remote Call Forwarding for the purpose of bypassing toll service (e.g., Long Distance Message Telecommunications Service and/or Extended Calling Service (ECS) Routes).
- f. Transmission characteristics may vary depending on the distance and routing necessary to complete the forwarded call.
- g. RCF service is not represented as suitable for satisfactory transmission of data.
- h. RCF service is not offered when the terminating number for a forwarded call is a Pay Telephone access line service.

MISCELLANEOUS SERVICE ARRANGEMENTS

Y. PRIVACY ID

1. General

- a. Privacy ID provides Caller ID subscribers with the ability to identify unavailable, unknown, blocked and private numbers. Privacy ID intercepts all unidentified calls before the subscriber's telephone rings then asks the caller to state their name or company. Once the calling party has responded, the service rings the subscriber and announces the calling party's information. The subscriber has the option to accept the call, reject the call, play an announcement to the calling party or forward the call to voicemail.
- b. The Privacy ID subscriber may provide calling parties with a Caller's Access Code. Use of this access code allows the calling party to bypass Privacy ID.

2. Terms and Conditions

- a. Privacy ID is provided subject to availability of facilities.
- b. Privacy ID is not offered in conjunction with ISDN, Centrex, Payphone Line and PBX Service.
- c. When the Call Trace and Return Call features are activated on calls intercepted by Privacy ID, the telephone number captured is that of the Service Node, which performs Privacy ID, not the telephone number of the calling party.
- d. Caller ID Service is required in order to subscribe to Privacy ID.

G. CALL SCREENING SERVICES

1. Residence and Business Operator Screening - United Telephone Exchanges Only

- a. Operator screening enables a single line residence customer, business customer, or PBX trunk customer subscribing to the flat rate option, by means of telephone company operator identification, to restrict outgoing telephone calls from station users to only those calls which are placed as credit card, third party billed or collect to the called telephone. This applies to all 0+ and 0- calls as specified following.
- b. All calls to Company numbers such as Repair Service, Directory Assistance and Public Emergency Service numbers (911) will be permitted from the originating station unless the customer also subscribes to specific Custom Code Restrictions.
- c. Operator Screening is limited to those areas served by central offices arranged for this service and is subject to the availability of facilities at rates following.
- d. Operator Screening is provided for intraLATA calling through Company operators. Screening for interLATA calling is the responsibility of the interLATA carriers who choose to acknowledge the network screening signals passed to them.
- e. The Company will not be responsible for screening calls placed by the caller which are not routed through a Company operator. Calls routed through Alternate Operator Services cannot be screened by the Company.

f. Rates and Charges

OBSOLETE SERVICE OFFERING

DATA TRANSPORT SERVICE

B. SWITCHLINK PLUS (Cont'd)

1. General (Cont'd)

- d. The Remote Access Line feature of the SwitchLink Service is available to subscribers of SwitchLink Plus at the rates specified in Section A29 of this tariff.
- e. SwitchLink Plus access lines are not voice functional.

2. Regulations

- a. SwitchLink Plus requires a data-conditioned local loop from the serving central office to the subscriber's premises. The local loop is limited to the transport of digital information only. The service may not be used for analog transmissions.
- b. Compatible data units must be utilized at the originating and terminating ends of the transmission to transmit and receive the data at the 56 Kbps speed. The same data unit may be used for either SwitchLink or SwitchLink Plus. The subscriber is responsible for obtaining and maintaining the data unit.
- c. If the data is to be transmitted over interexchange facilities, the carrier chosen by the subscriber must be capable of passing high speed data end-to-end over a digital network. If the requirements in b. and c. are not met, the information will not be transmitted correctly.

3. Rates and Charges

- a. Local usage rates are billed for outward local and EAS calling only. Long distance rates will apply to calls beyond the local calling area.

b. SwitchLink Plus Rates
