9.10 Pay Per Use Features

**Repeat Dialing (\*66):** Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard. The customer hangs up and a queuing process begins. For the next 30 minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. In some locations, due to technological limitations Repeat Dialing must be purchased with Call Return.

**Call Return (\*69):** This feature enables the customer to dial back the number of the last incoming call whether the call was answered or not. If the line is busy call return will keep trying to complete the call for 30 minutes.

**Call Trace** Provides a detailed record of last incoming call, including call-waiting calls. It automatically records the phone number, time, and date of the call. MCI security processes this information and provides it to the appropriate law enforcement agency should you decide to file a complaint. Cannot be selected with Block Call Trace.

**Three-Way Calling** Allows another party to be added to a call already in progress. The added party may be local or long distance. Toll or local measured service charges will apply to each leg of a 3-Way Call. Cannot be selected with Block Three Way Calling.

<u>Feature</u>	<u>Per-Use Charge</u>
Repeat Dialing (*66)	\$0.75
Call Return (*69)	\$0.75

Three-Way Calling**	\$0.75
