COMMISSION
CLERK

RE: Docket No. 000121B-TP

Dear Mrs. Bayó:

Enclosed is an original and 15 copies of Sprint's July 2004 Root Cause Analysis (RCA) report as required by Order Number PSC-03-0176-CO-TP in Docket 000121B-TP. This order required that any failure in three consecutive months to meet any performance for a given level of disaggregation shall require a RCA by Sprint, which shall then be published on a monthly basis. This report is for results for the period of April 2004 through June 2004 as published in the May, June and July reports.

A copy of this letter is enclosed. Please stamp it to indicate that the original was filed and return the copy to me. Copies have been served to the parties shown on the attached Certificate of Service.

Sincerely,

Susan S. Masterton

FPSC-COMMISSION CLERK

August 2004 Root Cause Analysis Report (reflects June 2004 data published July 20)

Florida Public Service Commission

Background

If there is non-compliance at the aggregate level in three consecutive months for a given level of disaggregation, Sprint shall provide a report of root cause analysis on a monthly basis. Sprint's root cause analysis shall include a plan for corrective action with key activities and anticipated completion dates for implementation.

Measure 2: Average FOC Notice Interval					
Submeasure 2.01.02: All Electronic - Business POTS					
Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
<p>Sprint is experiencing an increase in CLEC project orders which require more manual intervention. Sprint is also experiencing a shift in the types of services ordered from CLEC customers. CLECs are ordering less Resale and more UNE-P and CLEC to CLEC conversion orders. Resale orders can be completed systematically; however, UNE-P and CLEC to CLEC conversion orders must be completed manually.</p> <p>Project Definition: Service requests that exceed the line size and/or level of complexity that would allow for the use of standard ordering and provisioning processes. Generally, due dates for projects are negotiated, coordination of service installations/changes is required and automated provisioning may not be practical.</p>	4Q 2003	3Q 2004	30-40% of orders		<p>Several initiatives have been implemented to balance the workload in the service centers. These include streamlining current processes and resource management.</p> <p>Sprint established a group of dedicated employees to handle complex orders.</p> <p>Sprint is investigating the feasibility of a system enhancement that will decrease manual intervention of orders.</p>
A system release in June caused several PONS to go into error status in IRES. This resulted in a backlog of orders that were not completed in a timely manner.	3Q 2004	3Q 2004	100% of orders from 06-18-04 to 06-22-04	06-22-04	Sprint cleared the errors and removed the PONS from error status. This task required manual intervention and was completed on 6/22/04.

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
Sprint's ordering system processes the manual re-queuing of the order as an electronic order when it should be an electronic/manual mix order. For instance,	2Q 2004	4Q 2004	TBD		A system enhancement request was submitted to appropriately include any order manually entered into the queue by an analyst in the electronic/manual mix submeasure. The request is in the level

if an order is received by Sprint's ordering center in error and the analyst corrects the error, the analyst resubmits (original date and time are not impacted) the order so that the system can systematically complete a firm order confirmation notice to the customer.				of effort stage; future updates will include the projected improvement dates and estimated impacts.

Measure 2: Average FOC Notice Interval

Submeasure 2.03.131 Electronic/Manual Mix – UNE Platform

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
<p>Sprint is experiencing an increase in CLEC project orders which require more manual intervention. Sprint is also experiencing a shift in the types of services ordered from CLEC customers. CLECs are ordering less Resale and more UNE-P and CLEC to CLEC conversion orders. Resale orders can be completed systematically; however, UNE-P and CLEC to CLEC conversion orders must be completed manually.</p> <p>Project Definition: Service requests that exceed the line size and/or level of complexity that would allow for the use of standard ordering and provisioning processes. Generally, due dates for projects are negotiated, coordination of service installations/changes is required and automated provisioning may not be practical.</p>	2Q 2004	4Q 2004	30-40% of orders		<p>Several initiatives have been implemented to balance the workload in the service centers. These include streamlining current processes and resource management.</p>

A system release in June caused several PONS to go into error status in IRES. This resulted in a backlog of orders that were not completed in a timely manner.	3Q 2004	3Q 2004	100% of orders from 06-18-04 to 06-22-04	06-22-04	Sprint cleared the errors and removed the PONS from error status. This task required manual intervention and was completed on 6/22/04.
--	---------	---------	--	----------	--

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
Compliance has been impacted due to the complexity and manual intervention required for these types of orders.	3Q 2004	4Q 2004	30-40% of orders		Sprint has designated specific order assigners to handle these types of orders.

Measure 3: Average Reject Notice Interval

Submeasure 3.03.02.01: Electronic/Manual Mix – Content Errors – Resale Orders

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
<p>Sprint is experiencing an increase in CLEC project orders which require more manual intervention. Sprint is also experiencing a shift in the types of services ordered from CLEC customers. CLECs are ordering less Resale and more UNE-P and CLEC to CLEC conversion orders. Resale orders can be completed systematically; however, UNE-P and CLEC to CLEC conversion orders must be completed manually.</p> <p>Project Definition: Service requests that exceed the line size and/or level of complexity that would allow for the use of standard ordering and provisioning processes. Generally, due dates for projects are negotiated, coordination of service installations/changes is required and automated provisioning may not be practical.</p>	3Q 2003	3Q 2004	30-40% of orders		<p>Several initiatives have been implemented to balance the workload in the service centers. These include streamlining current processes and resource management.</p> <p>Sprint established a group of dedicated employees to handle complex orders.</p> <p>Sprint is investigating the feasibility of a system enhancement that will decrease manual intervention of orders.</p>
A system release in June caused several PONS to go into error status in IRES. This resulted in a backlog of orders that were not completed in a timely manner.	3Q 2004	3Q 2004	100% of orders from 06-18-04 to 06-22-04	06-22-04	Sprint cleared the errors and removed the PONS from error status. This task required manual intervention and was completed on 6/22/04.

Measure 3: Average Reject Notice Interval

Submeasure 3.03.02.02: Electronic/Manual Mix – Content Errors – UNE Loops and Ports

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
<p>Sprint is experiencing an increase in CLEC project orders which require more manual intervention. Sprint is also experiencing a shift in the types of services ordered from CLEC customers. CLECs are ordering less Resale and more UNE-P and CLEC to CLEC conversion orders. Resale orders can be completed systematically; however, UNE-P and CLEC to CLEC conversion orders must be completed manually.</p> <p>Project Definition: Service requests that exceed the line size and/or level of complexity that would allow for the use of standard ordering and provisioning processes. This task required manual intervention and was completed on 6/22/04.</p>

Measure 7: Average Completed Interval

Submeasure 7.01.02: Residential POTS – No Field Work

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
<p>Cause analysis is ongoing. One cause that has already been identified as a contributor to shorter ILEC intervals is “no physical work” orders. These orders yield short ILEC intervals.</p>	3Q 2003	4Q 2004 2Q 2004	TBD		<p>The lack of “no physical work” orders for CLEC results is inherent to the business. For example: a “no physical work” order is a “change of ownership” in which a Sprint retail customer calls Sprint and requests a change to the person billed for service (for example, when one roommate transfers the bill to another roommate’s name). If a CLEC customer called a CLEC with the same request, the CLEC would handle this internally and would not submit an order to Sprint on their customer’s behalf.</p> <p>A cross-functional team continues to look for opportunities of reducing CLEC intervals.</p>

Measure 7: Average Completed Interval

Submeasure: 7.101.01: UNE Loops xDSL Provisioned – Field Work

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
One order was keyed late (5 days) by an ordering center analyst.	2Q 2004	4Q 2004 2Q 2004	10-20% of days	6-30-04	Several initiatives have been implemented to balance the workload in the service centers. These include streamlining current processes and resource management. Sprint is investigating the feasibility of a system enhancement that will decrease manual intervention of orders.
Certain facilities will not support UNE Loop service. In some cases, this situation cannot be identified until a technician is dispatched on the due date. Additional work may be required in which case the service cannot be provided on the original due date. Sprint does not provide UNE Loops for Sprint retail customers.	1Q 2004	4Q 2004 2Q 2004	40-50% of days 60-70% of days 40-50% of days		Records are being updated to enable these facilities to be identified earlier in the provisioning process so that all work can be completed by the original due date. Sprint has implemented several new processes and technologies to enable the use of UNE Loops that are located behind remote end offices. The entire process should be completed by January 1, 2005.
Severe summer storms caused orders to be carried over.	3Q 2004	3Q 2004	10-20% of orders		This is a seasonal issue that will be resolved as weather conditions improve.

Measure 7: Average Completed Interval

Submeasure 7.11.01: UNE Loops Non-Designed – Field Work

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
Certain facilities will not support UNE Loop service. In some cases, this situation cannot be identified until a technician is dispatched on the due date. Additional work may be required in which case the service cannot be provided on the original due date. Sprint does not provide UNE Loops for Sprint retail customers.	2Q 2003	4Q 2004 2Q 2004	50-60% of days 90-100% of days 30-20% of days 60-70% of days		Records are being updated to enable these facilities to be identified earlier in the provisioning process so that all work can be completed by the original due date.
Severe summer storms caused orders to be carried over.	3Q 2004	3Q 2004	20-30% of days		This is a seasonal issue that will be resolved as weather conditions improve.

Measure 7: Average Completed Interval

Submeasure 7.131.02: UNE Platform – No Field Work

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
Cause analysis is ongoing. One cause that has already been identified as a contributor to shorter ILEC intervals	3Q 2003	4Q 2004 TBD	TBD		The lacks of “no physical work” orders for CLEC results are inherent to the business. Severe summer storms caused orders to be carried over.	3Q 2004	3Q 2004	20-30% of orders		This is a seasonal issue that will be resolved as weather conditions improve.

Measure 17a: Percentage Troubles in 5 Days for New Orders
Submeasure 17a.01: Residential POTS

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
Troubles are being reported on some non-dispatched orders. Non-dispatchable orders automatically flow through provisioning systems and are completed with no indication of any trouble condition until a customer calls. For example there may be a disconnected jumper at the site. In these situations the CLEC will contact Sprint to report a trouble.	4Q 2003	4Q 2004	70-80% of trouble tickets 80-90% of trouble tickets 85-95% of trouble tickets		<p>Non-dispatchable orders meeting certain criteria are being dispatched to ensure service is provided. Data is being accumulated to identify actionable causes for troubles. Corrective actions will be implemented as appropriate. Sprint is also investigating potential ideas for ameliorating the impact of small CLEC volumes in cases where low CLEC ticket volume may decrease the effectiveness of the statistical parity comparisons.</p> <p>Sprint implemented a process to automate ticket submission to technicians via a hand held device. However, some orders were not getting to the Central Office technicians via the hand held device. ARC (Automated Routing Completion) was inadvertently closing some orders. The non-worked orders caused Sprint to experience an increase in trouble activity. These orders were all sent via printers in the last week of April until the hand held devices could be fixed.</p> <p>Sprint is in the process of identifying wire centers where chronic non-compliance exists. Once a wire center is deemed 'chronic', which includes per 100 and repeats (mostly cleared to outside plant or high level disposition for facilities), Sprint plans to upgrade those facilities.</p> <p>Sprint is also performing refresher training in the districts to improve accuracy of closing troubles related to defective/deteriorated cable.</p>

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
Service center workload is shifting to order types which require additional manual intervention. This is preventing the clearing of errors on orders prior to the due date.	3Q 2004	1Q 2005	80-90% of orders		Several initiatives have been implemented to balance the workload in the service centers. These include streamlining current processes and resource management.

Measure 19: Customer Trouble Report Rate
Submeasure 19.11: UNE Loops Non-designed

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
----------------------	------------	-----------------------	------------------	----------	------------------

<p>Troubles are being reported on some non-dispatched orders. Non-dispatchable orders automatically flow through provisioning systems and are completed with no indication of any trouble condition until a customer calls. For example there may be a disconnected jumper at the site. In these situations the CLEC will contact Sprint to report a trouble.</p>	2Q 2004	3Q 2004	50-60% of trouble tickets	<p>Non-dispatchable orders meeting certain criteria are being dispatched to ensure service is provided. Data was accumulated to identify causes for troubles and provided to the field teams for appropriate corrective action plans. Sprint is doing additional analysis to target specific problem areas.</p> <p>Sprint implemented a process to automate ticket submission to technicians via a hand held device. However, some orders were not getting to the Central Office technicians via the hand held device. ARC (Automated Routing Completion) was inadvertently closing some orders. Sprint is doing additional analysis to target specific problem areas.</p> <p>Sprint is in the process of identifying wire centers where chronic non-compliance exists. Once a wire center is deemed 'chronic', which includes per 100 and repeats (mostly cleared to outside plant</p>

					<p>or high level disposition for facilities), Sprint plans to upgrade those facilities.</p> <p>Sprint is also performing refresher training in the districts to improve accuracy of closing troubles related to defective/deteriorated cable.</p>
--	--	--	--	--	---

Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
CLECs forwarded incorrect database function codes to Sprint. These errors caused the measure to be non-compliant.	2Q 2004	3Q 2004	90-95% of record updates		Sprint is implementing a process that will automatically reject and return (echo-back) the CLEC records when they contain improper function codes and/or fail master street address guide (MSAG) edits as determined by that county. Notification regarding this process was communicated to all CLECs July 1, 2004.

Measure 44: Center Responsiveness					
Description of Issue	Start Date	Projected Improvement	Estimated Impact	End Date	Improvement Plan
Due to increases in 2004 CLEC order volumes and significant manual order intervention, more resources were required to process orders. This resulted in an increase in response times from under 20 seconds to more than 60 seconds.	3Q 2004	4Q 2004	TBD		Sprint is in the process of drafting a letter to all CLECs describing how CLECs can help improve the ordering process. This is expected to decrease the amount of calls coming into the service centers and also decrease the current response time. Analysis indicates that about 35-45% of the calls that come into the center are for information the CLECs are able to view online in IRES.
