Enforcement Mechanisms Methodology 4.3.2.1 Tier- 2 Enforcement Mechanisms apply, for an aggregate of all CLEC ALEC data generated by BellSouth, on a per measurement transaction basis for a particular Enforcement Measurement Element each Enforcement Mechanism Element for which	Enforcement Mechanisms Methodology 4.3.2 Tier-2 Enforcement Mechanisms will be triggered by BellSouth's failure to achieve applicable Enforcement Measurement Compliance or Enforcement Measurement Benchmarks for the State of Florida for given Enforcement Measurement Elements for three consecutive months. The based upon the method of calculation is set forth in Appendix D, incorporated herein by this reference Statistical Formulas and Technical Description.	Enforcement Mechanisms Methodology 4.3.1.2 When a measurement has five or more transactions for the <u>CLECALEC</u> , calculations will be performed to determine remedies according to the methodology described in the remainder of the document.	Enforcement Mechanisms Methodology 4.3.1.1 All OCNs and ACNAs for individual <u>CLECs ALECs</u> will be consolidated for purposes of calculating <u>transaction</u> measure-based failures.	The Enforcement Mechanisms contained in this Plan have been provided by BellSouth on a voluntary basis in order to maintain compliance between BellSouth and each CLEC. As a result, CLECs may not use the existence of this section or any payments of any Tier-1 or Tier-2 Enforcement Mechanisms under this section as evidence that BellSouth has not complied with or has violated any state or federal law or regulation.	It is not the intent of the Parties that BellSouth be liable for both Tier-2 Enforcement Mechanisms and any other assessments or sanctions imposed by the Commission. CLECs will not oppose any effort by BellSouth to set off Tier-2 Enforcement Mechanisms from any assessment imposed by the Commission.	Enforcement Mechanisms Application 4.2.2:performance and the payment of any Tier-1 or Tier-2 Enforcement Mechanisms shall not be used as evidence that BellSouth has not complied with or has violated any state or federal law or regulation. The payment of any Tier-1 Enforcement Mechanism to a CLEC shall be credited against any liability associated with or related to BellSouth's service performance.	Enforcement Mechanisms Application 4.2.1 The application of the Tier1- and Tier-2 Enforcement Mechanisms does not foreclose other legal and regulatory claims and remedies available to each CLECALEC .	4.1.10 Parity: Gap — refers to the incremental departure from a compliant-level of service. This is also referred to as "diff" in Appendix D, Statistical Formulas and Technical Description.	Proposed Change

	4.4.6 : BellSouth may set off any SEEM payments to a CLEC against undisputed amounts owed by a CLEC to BellSouth pursuant to the Interconnection Agreement between the parties which have not been paid to BellSouth within ninety (90) days past the Bill Due	BellSouth is paying SEEM to a CLEC who is not paying an undisputed bill.	
31	Enforcement Mechanisms Payment of Tier-1 and Tier-2 Amounts 4.4.7 Any adjustments for underpayment or overpayment of calculated Tier 1 and Tier 2 remedies will be made consistent with the terms of BellSouth's Policy On Reposting Of Performance Data and Recalculation of SEEM Payments, as set forth in Appendix G of this document.	This provision is provided to formalize the incorporation of the Reposting Policy.	V
32	Enforcement Mechanisms Payment of Tier-1 and Tier-2 Amounts 4.4.8 Any adjustments for underpayments will be made in the next month's payment cycle after the recalculation is made. The final current month PARIS reports will reflect the final paid dollars, including adjustments for prior months where applicable. Questions regarding the adjustments should be made in accordance with the normal process used to address CLEC questions related to SEEM payments.	Clarify by stating current practice used to make adjustments and address CLEC questions.	Y
33	Enforcement Mechanisms Limitations of Liability 4.5.1 BellSouth's total liability for the payment of Tier-1 and Tier-2 Enforcement Mechanisms shall be collectively and absolutely capped at 39 % of net revenues in Florida, based upon the most recently reported ARMIS data.	Addressed in new Section 4.7 entitled "Enforcement Mechanism Cap."	V
34	Enforcement Mechanisms Limitation of Liability 4.5.2: BellSouth will not be obligated to pay Tier-1 or Tier-2 if such noncompliance results fromfailure to follow established and documented procedures.	Clarifies current provisions by stating additional specific instances where BellSouth should not be obligated to pay SEEM.	V
35	Enforcement Mechanisms Limitations of Liability 4.5.3 BellSouth shall not be obligated for Tier-1 or Tier-2 Enforcement Mechanisms for noncompliance with a performance measure if such non-compliance was the result of an act or omission by a ALEC that was in bad faith.	Covered in revised Section 4.5.2.	V
36	Enforcement Mechanisms Limitations of Liability 4.5.4:a Force Majeure event (as defined in the most recent version of BellSouth's standard Interconnection Agreement)	Clarification by identifying the specific source of the definition of a Force Majeure event	V
37	Enforcement Mechanisms Affiliate Reporting 4.6 Affiliate Reporting Change of Law	This is a new section that uses the section number previously designated for Affiliate Reporting.	V
38	Enforcement Mechanisms Affiliate Reporting Change of Law 4.6.1 Upon a particular Commission's issuance of an Order pertaining to Performance Measurements or Remedy Plans in a proceeding expressly applicable to all CLECs, BellSouth shall implement such performance measures and remedy plans covering its performance for the CLECs, as well as any changes to those plans ordered by the Commission, on the date specified by the Commission. If a change of law relieves	The Affiliate Reporting section is eliminated because it is irrelevant for SEEM. That is, this provision is unnecessary to determine whether BellSouth provides nondiscriminatory access. The standards for nondiscriminatory access are defined for each metric in the SQM.	Y

	Florida Public Service C
SEEM Sub-metrics Measures O-3 & O-4; (PFT) Table B-1: Tier 1 Sub-metrics BellSouth recommended combining measure O-4, Flow-Through Service Requests (Detail), with measure O-3, Flow-Through Service Request (Summary). Thus, measure O-4 would no longer exist as a separate measure and measure O-3, as modified, would only apply to Tier 2; Tier 1 would not apply. Also change disaggregation for this measure as follows:	Commission SEEM Non-Technical Matrix
in this area, which is the situation that Tier 2 was designed to address. Also, this measure captures performance related to an electronic process that uses regional systems, problems that occur Are not limited to individual CLECs, as intended when Tier 1 penalties apply. Further the nature of electronic systems usually makes this problem largely self-correcting and any harm that occurs affects the industry as a whole not an individual CLEC. Therefore, this measure should be included in Tier 2 only. If BellSouth's performance for a given month triggers the Low Performance Fee Schedule, BellSouth will pay Tier 1 penalties in addition to Tier 2 penalty for the month involved. BellSouth, in its current proposal, recommends that measures O-3, Percent Flow-Through Service Requests (Summary), and O-4, Percent Flow-Through Service Requests (Detail) be combined into a single SQM that shows both the Aggregate CLEC data (Summary) and	Matrix BST Reasoning

SEEM Sub-metrics Measure O-8; (RI) Table B-1: Tier 1 Sub-metrics		Proposed Change	Florida Public Service Commission
			SEEM Non-Technical Matrix
HellSouth's Proposed SQM disaggregates the Reject Interval measurement by 3 methods of	the standard for measuring FOC timeliness by 7 hours. The mechanized FOC Timeliness standard is 95% in 3 hours and for orders that do not flow through and should do so, the FOC Timeliness standard is 95% in 10 hours. Such delay periodically does not directly affect the CLECs ability to provide service to its customers. As such, intermittent deficiencies, particularly with the high benchmark do not indicate a significant problem. Consequently, penalties should only apply if there are persistent problems in this area, which is the situation that Tier 2 was designed to address. Further, the nature of electronic systems usually makes this problem largely self-correcting and any harm that occurs affects the industry as a whole not an individual CLEC Therefore, this measure should be included in Tier 2 only. Finally, since all CLECs are affectedly similarly, Tier 1 penalties should not apply. If BellSouth's performance for a given month triggers the Low Performance Fee Schedule, BellSouth will pay Tier 1 penalties in addition to Tier 2 penalty for the month involved. The proposed disaggregation for this measure in the SEEM plan is the same as the SQM. See the SQM matrix filed on July 28, 2004 for the rationale for this change.	BST Reasoning	Matrix

BellSouth's proposal excludes this measure from Tier 1 and Tier 2 of SEEM. This is because the same data	The proposed SQM reflects two levels of disaggregation for this measure, namely "Non-IDLC" and "IDLC." See the SQM matrix filed on July 28, 2004 for the rationale for that change. For purposes of the SEEM plan, while the proposed disaggregation for this metric in SEEM only reflects one category for "UNE Loops," the calculations for penalties actually applies the separate benchmarks for Non-IDLC and IDLC Loops. The penalties would simply be reported as a single category designated as UNE Loops.	New measure that combines former measures FOC Timeliness and Average Completion Interval. These two functions are proposed to be in SEEM.	Interval (FOCI) that BellSouth is proposing to include in both Tier 1 and Tier 2 of SEEM. The FOCI measure will combine the two current measures, FOC Timeliness and Average Completion Interval (OCI) & Order Completion Interval Distribution, into a single metric as requested by the CLECs in the past. Since the failure to complete orders within appropriate intervals will show up in the FOCI metric, which is proposed for both Tier 1 and Tier 2, including a separate OCI measure in the SEEM plan as well would result in dual penalties for the same failure. Proposed Change	Florida Public Service Commission SEEM Non-Technical Matrix
This measure is neither an indicator of	BellSouth's proposal includes these three measures as Tier 2 only. These metrics evaluate a combination of largely automated processes and procedures performed by technicians in a centralized work center. The result is that the processes are the same from CLEC to CLEC and, if there is a problem, the problem affects all CLECs, rather than an individual CLEC. Consequently, a Tier-2 enforcement mechanism is appropriate for these measurements. Further, if BellSouth's performance for a given month triggers the Low Performance Fee Schedule, BellSouth will pay Tier 1 penalties in addition to Tier 2 penalty for the month involved.	BellSouth proposes to add this new measure to both Tier 1 and Tier 2 of SEEM. This measure, as described in the SQM matrix filed on July 28, 2004, captures the percentage of non-coordinated customer conversions that BellSouth completes and provides notification to the CLEC on the due date. Considering the increased role that non coordinated hot cuts may have in the future and the potential direct impact on customer service this measure is being proposed for inclusion in SEEM.	BellSouth proposed removal of this measure from the SQM. See SQM matrix filed on July 28, 2004 for the rationale.	Days, which is included in Tier 1 and Tier 2. Including both these measures in SEEM would subject BellSouth to dual penalties for the same failure.	BST Reasoning	Matrix
