Re: Amendment of Water Certificate #611-W and Wastewater Certificate #527-S

Dear Director,

My husband and I own our home at 28965 Palm Shores Blvd, Punta Gorda, FL 33982. We have lived there for over 10 years. Our home is in the area where MSM Utilities wishes to expand their territory of the above referenced Certificates.

We wish to object to the desired expansion of their territory as we have no need or desire to obtain water or sewer services. There are many areas of our community where water and sewer services are offered and we prefer to live in a rural setting where properties are large enough to allow the property owner to safely and efficiently have a well and septic system. We have invested a lot of money in our septic, well and water conditioning equipment and would not want to be faced with future connection or utility fees.

Additionally, and perhaps even more important to us is that the availability of water and sewer in a neighborhood often permits development of a higher density or of a different type than would be allowed where septic and well are the norm. We appreciate the rural, country atmosphere of our neighborhood and would not want to open the door to increased development or a more city type development. We do not feel that we or our neighbors should bear the burden of potential increased costs, increased or more intense development, the sights, sounds and smells that accompany a larger wastewater plant to benefit MSM Utilities and their financial and development desires.

Thank you very much for your attention to this objection.

Yours very truly,

Mr. & Mrs. Robert M. Elliot
