Subject: Docket No. 20170009 - Oppose FPL's Unfair Request

Dear FL PSC,

Dear Commissioners,

We need to hold our "public" suppliers of energy accountable for every deal they want/try to make. The grid is getting more and more of a supply of clean energy, and continuing to support expansion of the old fossil fuels and/or dangerous sources of energy is backward. We, especially in Florida, need to make sure our regulators understand exactly where the future is, and it is not in more of the same old sources.

Please do not give the power companies a favorable response to their requests. They are only for their own survival (reference all their latest attempts to undo solar and wind systems or minimally not have to support them). In their current state, they are not in the peoples' corner. Please say no.

Sincerely,
Mary Lou Flannery
