Dear Commissioners,

My husband and I are adamantly against the sewer project proposed by EU. We have been very involved in the fight against them and they have not proved first and foremost that there is a need.

Further objections as evidenced in the hearings of which I attended the entire process of which many extremely intelligent educated individuals that are far smarter than me spoke and shared information that I would never have known about, reinforced my opinion that we do not want or need this.

The ACTUAL costs are unknown along with this being a 💰**FOR PROFIT**💰 business with no oversight in costs to run, maintain and build of which will all be passed on to the residents.

We can also discuss the damaging effects to the environment of the plant, animal, sea life and birds along with the prospect of the ability to allow developers to have access to the community which would destroy the quaint charm that is long gone from all other gulf front islands.

Please take into consideration how strongly we oppose this proposal by EU.

PS I do not know of another single resident that is in support of this.

Regards,

Georgiana and Scott Sinnett
