Subject: DENY EU APPLICATION - RE. Docket #20240032-SU

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Commissioners of the Public Service Commission:

I am a property owner at 9700 Little Gasparilla Island which is a property within the service area of the proposed wastewater service, Docket #20240032-SU

I formally object and request that PSC **deny** Environment Utilities (EU) application for wastewater service.

The homes, on average, do not have heavy usage. Half of them are empty at any given time and all very easily managed with a properly maintained septic. A sewer system is a terrible 'solution' to a misdiagnosed problem.

Additionally, there is no plausible reason to understand how this is even permitted to be brought to the table yet again after it was previously denied for the incredible amount of reasons from outrageous costs initially and ongoing to environmental hazards to the extreme maintenance and electricity it must have. It is simply and truly reprehensible.

This is about ONE family that wants to make a massive amount of income off of our land and our residents. It is that simple. The amount of financial and area devastation for so many with their homes on the island water 3 major hurricanes is reason alone to point out the obvious.

In good conscience, there is no possible way for this to be approved by the PSC and is yet again a waste of everyone's time and resources.

Thank you,

Korrie Stevenson
