Subject: DENY EU APPLICATION - RE. Docket #20240032-SU

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hello and thank you for your attention to this issue,

Please deny this application. This is a very costly and unnecessary request for our beautiful and pristine island. Come out and visit! There is no place like it.

Kind Regards,

Jamie S Gage
8900 Gulf St.
Little Gasparilla Island

Dear Commissioners,

Hi, our name is John & Beth Hofer. We own 2 condos on LGI at 9400 Little Gasparilla Island, Unit J2 and H10 which are part of the Hideaway Bay Beach Club condos. (HBBC). We are writing this letter to ask you to **deny** the application by Environmental Utilities for a certificate to install sewers on our island.

EU made the change to the location of the wastewater transmission line from Don Pedro State Park to the HBBC property. Even though we were excluded from the scope of this application on May 13, 2024 (Doc # 03001-2024) by EU's attorney, this change directly affects every one of the owners at HBBC. We were not notified of this substantial change to the application. This is a direct violation of one of the tenets by which the PSC should base their decision - proper notification of all involved parties. This change to the application without notification denies the owners at HBBC of our due process to be able to fight this change.

The letter from the HBBC lawyer, Nick Porter dated February 28, 2025 (Doc #01210-2025) also states HBBC's position in this matter. I was extremely disappointed that the PSC staff did not consider this oversight in their recommendation.

100+ Families are being denied their due process because of the change made by EU without notification.

If EU plans to use the model as indicated in the 2017 CC SMP, the pump house for the sewer will be built on the HBBC Septic Plant drain field. Building anything on our drain field will result in the community being shut down completely while the construction is underway. It will also force us to hook up to the EU sewer despite being excluded from the scope of this project. How can this be done without any kind of notification? Again, 100+ families are being denied our due process.

Because we were excluded from the scope of this application, there have been no estimates of the hook up costs for the condos. If this scenario plays out, HBBC would have to be the first people forced to hook up to the sewer system. We wouldn't have any recourse to this questionable action by EU, we wouldn't have any indication of the costs associated with this action, we wouldn't be able to use our homes resulting in additional living expenses and loss rental income until the initial sewer construction was completed and we would have to assume the costs of decommissioning our septic plant. Is this fair & reasonable for the 100+ families that are excluded from the scope of this application.

100+ families that are directly affected have not been notified. 100+ families currently using a DEP permitted septic plant do not need a sewer line brought to our property. 100+ families have no idea what the financial burden will be if this transmission line is brought to our property.

Please do the right thing and deny this application.

Sincerely,

John & Beth Hofer
