As a senior citizen on a fixed income this increase will cause a hardship both to me and to 1000s of other seniors, as well as to working class people in our area.

FPL is seeking a substantial rate increase, with estimates suggesting increases of at least \$200 annually by 2027. Previous rate hikes have already placed a burden on customers, with some reports indicating a 60% increase in bills over the last five years. I believe FPW already has one of the highest rates in the country.

PSC must prioritize affordability and consumer needs!

Our state with all its sunshine should be encouraging solar energy. It's clean and cheap. We should also incentivize investments in clean energy - like the US government did - until now. This along with energy efficiency programs will reduce bills and promote a more sustainable future.

FPL is focused on making huge profits. You as our representatives should focus on the citizens.
