Dear Florida Public Service Commission PSC,

My name is [NAME], and I am a resident of [COUNTY NAME]. As a Florida Power & Light customer, I strongly oppose the rate increase request of almost \$10 billion — the largest in US history. This unjust and excessive increase would further cause everyday Floridians, especially Black and Brown communities, to fall deeper into a burden caused by the high costs of living currently.

During the public service hearings, we witnessed firsthand how real Floridians are currently struggling to pay their bills, rent, groceries, and medications. Community organizations are standing up against corporate greed and revealing the conditions that everyday Florida residents are currently experiencing.

The PSC should prioritize consumers by ensuring fair and affordable utility rates. I urge the Public Service Commission to reject this massive rate hike and stand by Floridians and not for-profit corporations. We need affordable and clean energy.

Sincerely,
Ms. Terry Watts

Subject: Reject the FPL proposed settlement Docket #20250011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

I am a residential customer of Florida Power & Light (FPL) and a member of AARP, and I oppose FPL's attempts to raise its rates even higher than they already are. I opposed the increases FPL proposed in February, and I oppose the nearly identical increases FPL has now put forward with its corporate partners in a so-called "Settlement" negotiated in secret. These rates remain excessive and unfair to residential customers.

FPL's claim that this "Settlement" represents residential customers like me and my family is false. No one from FPL ever consulted us, asked for our input, or received our consent to speak on our behalf. Instead, FPL chose to ignore the voices of ordinary Floridians who have already expressed strong opposition to these increases.

My family and I call on the Public Service Commission to reject these secret deals cut with large industrial and commercial interests and to hold FPL accountable.

Enough is enough — protect residential customers from corporate greed and unjustified rate hikes.

Thank you for your time and consideration.

Sincerely,

Maria Ruiz

RE: Florida Public Service Commission
Docket No. 20250011

Dear Sirs,

I'm not sure if you have read, there was a solar panel farm in Boulder City, NV that caught on fire. Solar energy and batteries to store the power can cause huge fires. We have seen many EV electric cars go up in flames when charging or just parked.

This is another big issue the Public Service Commission must take into consideration when evaluating the price increases for FPL. Not only do solar farms destroy the land and wildlife under them, but they also have the potential of catching fire, and it takes hours to put them out. Just image having 30 million solar panels- the potential fires and loss of life. We are against these solar farms.

I believe the customers of FPL, who are the ones paying for these outrageous solar farms, should have a big say where our power comes from. We believe in nuclear power plants and gas energy plants, both a clean energy alternative to solar energy. At the same time, keeping the cost of power to FPL paying customers down and affordable. Solar power cost 4 times more than gas or nuclear power plants.

We are asking the Public Service Commission not to fund this solar energy but to fund nuclear and gas energy plants, that the customers of FPL would approve of. I have spoken to many customers of FPL, and they had no idea that FPL has already reduced our non-renewable energy by 10% since 2000 and already have seen the cost of electricity go up. If this is approved, it will destroy the very population that the PSC is supposed to protect. Cancel solar power-

Thank You for your time-

Sincerely,
Richard Champon
