RE: Florida Public Service Commission
Docket No. 20250011

Dear Sirs,

We have been reading up on the FPLs plans to go green (solar) in the state of FL. They want 30 million solar panels by 2030 in the state. Not only do these panels destroy our land and wildlife, the power produced is very expensive, roughly 4 times more than non-renewable power plants. Solar panels use a lot of silver, which has tripled since FPL started their crusade of green energy. Solar panels have a life span of 20 years, I can only imagine what the replacement cost will be then. FPLs plans to go in this direction, will not only put the power cost out of reach to millions of people, it will hurt Florida's elderly population.

If you look at what Europe is going through right now, their economies are dying. They don't have enough power to supply their manufacturing anymore. Germany is sending their manufacturing to eastern Europe, due to the high cost and lack of power. The EU GDP has dropped more than 25% since going in the direction of green energy. If the FPSC wants to destroy FL, then approve this ridiculous direction FPL is taking. From my understanding, the federal government is no longer subsidizing green energy. I believe this is why FPL wants a price increase.

I'm asking FPSC to force FPL to survey their customers, give their customers the facts of renewable and non-renewable power. Give the facts of cost of power, and the destruction of our land. I hope FPSC does its job and protect the citizens of Florida from an over burden electric company who is going in the wrong direction. If FPL wants green, then start building nuclear power plants. They are very efficient, clean, and produce power 24 hours a day, unlike solar panels and nuclear energy is cheap. Please do not let FPL destroy our beautiful state. Thank You for your time-

Sincerely,
Richard Champon

Dear Florida Public Service Commission PSC,

My name is [NAME], and I am a resident of [COUNTY NAME]. As a Florida Power & Light customer, I strongly oppose the rate increase request of almost \$10 billion — the largest in US history. This unjust and excessive increase would further cause everyday Floridians, especially Black and Brown communities, to fall deeper into a burden caused by the high costs of living currently.

During the public service hearings, we witnessed firsthand how real Floridians are currently struggling to pay their bills, rent, groceries, and medications. Community organizations are standing up against corporate greed and revealing the conditions that everyday Florida residents are currently experiencing.

The PSC should prioritize consumers by ensuring fair and affordable utility rates. I urge the Public Service Commission to reject this massive rate hike and stand by Floridians and not for-profit corporations. We need affordable and clean energy.

Sincerely,
Ms. Test Test
