1		
2	Every task was allotted a 20 minute time to complete. Most tasks take less time than 20 minutes to complete but wanted to add something for travel. If needed, we can adjust the time up or down by division based on what we believe to be a good time to account for mobility	
3	There are other benefits that aren't easily quanitfiable in hiring internal team members. These benefits are not included in this analysis, but, they should be considered.	
4	For transportation, utilized a fuel number for all divisions. Information was given by a single meter tech in the central territory.	
5	There are other benefits that aren't easily quanitfiable in hiring internal team members. These benefits are not included in this analysis, but, they should be considered.	
6	Insurance is determined at year end and therefore will not know the impact if additional vehicles to the fleet until EOY 2025 when renewal policies take place.	
7	Meter reading is subjective by area. Used a flat 30,000 meter reads per meter reader as the capacity for all divisions. Completely understand there are differences amongst the divisions and we may need to fine tune that number to be slighly more accurate.

OPC'S FIRST SET OF INTERROGATORIES
INTERROGATORY NO. 90
BATES PAGE(S): 17530 - 17534
APRIL 30, 2025

90. Regulatory Asset and Regulatory Liability. Please provide a schedule of the amortization expense and remaining balance associated with each regulatory asset and regulatory liability for each month for the years 2022 through 2024, and for each month with actual data and projected for 2025 and continuing through the end of the test year and subsequent year. In addition, provide the amortization period and the docket number and order in which the Commission approved the recovery and the amortization period, if any.

ANSWER:

Peoples is answering this interrogatory in part by producing records as allowed under Florida Rule of Civil Procedure 1.340(c). Please see the schedule posted to the Consumers SharePoint site in a folder entitled "ROG_1_90" or provided via USB.

The revenue requirements included in the proposed 2027 Subsequent Year Adjustment ("SYA") include incremental costs associated with the annualization of depreciation and amortization expense, property tax expense and return requirements related to capital investments made during the 2026 test year. The proposed 2027 SYA is not based on a full projected test year for 2027. As a result, the company does not have a "subsequent year projection" for the data requested by this interrogatory.

Please see below the information on Regulatory Assets and Regulatory Liabilities being amortized in the company's 2026 test year filing.

Manufactured Gas Plant ("MGP") Environmental Remediation Amortization

This annual amortization of $1.0 million is included in the 2026 test year on MFR Schedule G-2, page 5, line number 8. This amortization amount was stated in the Stipulation and Settlement Agreement approved by the Florida Public Service Commission ("Commission") in Order No. PSC-2020-0485-FOF-GU, issued December 10, 2020, in Docket Nos. 20200051-GU, 20200166-GU, and 20200178-GU ("2020 Agreement") and began with the effective date of the 2020 Agreement. In the company's last base rate case, Docket No. 20230023-GU, the Commission

APRIL 30, 2025

approved $1.0 million amortization amount again in Order No. PSC-2023-0388-FOF-GU (see Amortization Exp. – Other in Attachment 3, page 2 of 2). As of January 1, 2026, the expected balance of the MGP related regulatory assets is $17.7 million. The resulting amortization period would be approximately 17.7 years, which is longer than the expected time to complete most of the environmental remediation activities and is a reasonable amortization period.

Non-Capitalizable Software Implementation Costs

The Commission-approved 2020 Agreement required the company to record non-capitalizable software implementation costs as a regulatory asset and amortize the costs over a five-year period. In the company's last base rate case, the company continued this accounting treatment of non-capitalizable software implementation costs and the Commission approved revenue requirements including amortization of this regulatory asset. The company projects an unamortized balance of $743,859 as of January 1, 2026, with an amortization of $306,900 in the 2026 test year. The amortization amounts are shown on MFR Schedule G-2, page 19b, line number 40, and are included in FERC Account 930.2 on MFR Schedule G-2, page 18a.

Rate Case Expense

In the company's last base rate case, the Commission approved rate case expense of $2,778,647 with a three-year amortization period. As shown on MFR Schedule C-13, the company's final actual total expense for the last case was slightly lower at $2,766,047. As shown on MFR Schedule C-13, the current rate case expense is projected to be $2,672,370 and the unamortized balance from the last case is $922,016. In this case, the company is requesting a two-year amortization period and an annual rate case cost amortization expense of $1,797,193 in the 2026 test year as shown on MFR Schedule G-2, page 19b, line number 27, and is included in FERC Account 928 on MFR Schedule G-2, page 18a. This amortization of $1,797,193 for 2026 equals the sum of current case expense plus the unamortized balance divided by the two-year amortization period.

State Tax Reform Revenue Requirement Impacts Amortization

A state "Tax Reform" (as defined in section 8 of the 2020 Agreement) occurred when the Florida corporate income tax rate changed from 4.458 percent to 3.535 percent for 2021 and then back to 5.5 percent for taxable years beginning on or after January 1, 2022 (the "State Tax Rate Change"). Peoples used the 2021 and 2022 Forecasted Earnings Surveillance Reports to calculate the impact of the tax rate change and petitioned the Commission to allow the adjusted NOI impacts on annual revenue requirements to be offset and addressed in the company's Rider CI/BSR. In Order No. PSC-2022-0134-PAA-GU ("2022 State Tax Order") issued on April 11, 2022, in Docket No. 20220018-GU, the Commission approved the company's proposal to pass a net revenue requirement increase of $253,079 through the Rider CI/BSR. For 2023, the NOI and revenue requirement was impacted by the same tax rate increase that impacted the 2022 NOI. This tax rate increase triggered Section (8), paragraph (d) of the 2020 Agreement, which required the company to "defer the revenue requirement impacts to a regulatory asset." In the last case, the company reflected a regulatory asset of $1,166,807 for the 2023 revenue requirement impact and requested recovery of this regulatory asset over a three-year amortization period. In the company's revenue requirements approved by the Commission in the last case, there was an annual amortization of $388,936 starting in 2024 and continuing through the 2026 test year. As shown on MFR Schedule G-2, page 19b, line number 1, this approved $388,936 annual amortization is included in FERC account 407 on MFR Schedule G-2, page 12a.

State Tax Rate Increase Impact on ADIT

As a result of the 5.5 percent state tax rate increase in the State Tax Rate Change, and in accordance with Rule 25-14.013(4), F.A.C., the company performed the required recalculation of its Accumulated Deferred Income Tax ("ADIT"). This recalculation created deficient deferred taxes, which Peoples recorded as a credit to ADIT with a corresponding debit to a regulatory asset. For more on this regulatory asset, see response to OPC's First Set of Interrogatories No. 80.

INTERROGATORY NO. 90
BATES PAGE(S): 17530 - 17534
APRIL 30, 2025

Transmission Integrity Management Program Expense

The 2020 Agreement required the company to use reserve accounting treatment for Transmission Integrity Management Program ("TIMP") costs and record an annual expense of $1,437,475. Any difference between the actual cumulative spending and cumulative expense accrual will be reflected as a regulatory asset or liability, as appropriate. The basis for this adjustment was the projected volatility in annual TIMP related spending from year to year depending on timing of required transmission pipeline inspections. In the last case, the company proposed continuing the reserve accounting treatment but with a reduction to the levelized annual expense from $1,437,475 to $998,571, which was included in the revenue requirements approved by the Commission. The company projects that a TIMP related regulatory asset of $3.5 million will be recorded on Peoples' books by January 1, 2026. This balance reflects cumulative TIMP costs from 2021 to 2025 of $9.8 million and cumulative accruals during that period of $6.3 million. With TIMP spending volatility projected to continue, the company proposes in this case to continue reserve accounting treatment and accrue a levelized TIMP expense to address expected continuing volatility in TIMP spending. Peoples also proposes in this case to continue reflecting any difference between the actual cumulative spending and cumulative expense accrual as a regulatory asset or liability. Summing the $4.7 million of projected TIMP costs over the 2026-2028 period and the projected regulatory asset balance of $3.5 million as of January 1, 2026, results in a total of $8.2 million. Using the total of $8.2 million spread over a three-year period, the company proposes a levelized accrual expense of approximately $2.7 million starting in the 2026 test year revenue requirements. The annual TIMP expense of $2,717,698 is included in the 2026 test year on MFR Schedule G-2, page 19b, line number 8, and is included in FERC Account 887 on MFR Schedule G-2, page 12c.

91. Amortization. For all other amortization not identified in the preceding response, please identify each separate amortization reflected in the filing. For each amortization, provide the corresponding account, the detailed description of what is being amortized, the initial amount to be amortized, the beginning date of the amortization, the amortization period, the basis for the amortization period, and the docket and order where such amortization period was authorized.

ANSWER:

Peoples is answering this interrogatory in part by producing records as allowed under Florida Rule of Civil Procedure 1.340(c). Please see the schedule provided in response to OPC's First Set of Interrogatories No. 90, posted to the Consumers SharePoint site in a folder entitled "ROG_1_90." In addition to the amortization identified in OPC's First Set of Interrogatories No. 90, the company records and budgets amortization expense associated with certain Plant in Service accounts based on Commission approved rates and lives as shown in Table 2 on page 22 of Order No. PSC-2023-0388-FOF-GU in Docket Nos. 20230023-GU, 20220219-GU and 20220212-GU.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for Rate Increase by Peoples Gas System, Inc.	DOCKET NO. 20250029-GU FILED: May 5, 2025

PEOPLES GAS SYSTEM, INC.'S ANSWERS TO OFFICE OF PUBLIC COUNSEL'S SECOND SET OF INTERROGATORIES (NOS. 95-117)

Pursuant to Rule 106.206, Florida Administrative Code, and Florida Rule of Civil Procedure 1.350, Peoples Gas System, Inc. ("Peoples" or the "company"), hereby answers Office of Public Counsel's ("OPC") Second Set for Interrogatories (Nos. 95-117), served April 4, 2025 ("OPC's Second Interrogatory").

General Objections

1. Peoples objects to each interrogatory in OPC's Second Interrogatory ("Set") to the extent that it seeks information that is duplicative, not relevant to the subject matter of this docket, and is not reasonably calculated to lead to the discovery of admissible evidence.

2. Peoples objects to each Set to the extent it is vague, ambiguous, overly broad, imprecise, or utilizes terms that are subject to multiple interpretations but are not properly defined or explained for purposes of such Set. Peoples will seek clarification from OPC if a Set is not clear, but Peoples will produce documents subject to, and without waiving, this objection.

3. Peoples objects to each Set to the extent it requires Peoples to produce information that is already in the public record before the Florida Public Service Commission ("FPSC" or the "Commission") or other public agency and available to OPC through normal procedures or is readily accessible through legal search engines.

4. Peoples objects to each Set to the extent that it calls for data or information protected by the attorney-client privilege, the work product doctrine, the accountant-client

privilege, the trade secret privilege, or any other applicable privilege or protection afforded by law. Peoples will describe the nature of the privileged material, if any, in a privilege log that will accompany its responses.

5. Peoples objects to producing paper copies on the grounds that doing so would be unduly burdensome. Peoples has entered into an agreement with OPC, governing discovery production and responses, and will serve its answers to the Sets and related responsive documents to OPC in electronic form via a SharePoint site to which OPC and its consultants has remote access.

6. Peoples objects to each Request to the extent it requires the company to provide information that it believes is "proprietary confidential business information" as described in Section 366.093, Florida Statutes. Peoples will provide such confidential information to OPC in a designated confidential portion of the SharePoint site described above and subject to a Motion for Temporary Protective Order, Notice of Intent to Request Confidential Classification, and/or Request for Confidential Classification, as appropriate.

7. Peoples objects to each Set, instruction, or definition in that purports to expand Peoples' obligations under applicable law.

8. Peoples objects to each Set to the extent it requests Peoples to prepare information in a particular format or create data or information that it otherwise does not possess as unduly burdensome and as purporting to expand Peoples' obligations under applicable law.

9. Subject to Section 366.093(1), Florida Statutes, Peoples objects to any definition or Set that requests documents from persons or entities who are not parties to this proceeding, that seek information from affiliates unrelated to transactions or cost allocations involving Peoples, or that are not otherwise subject to discovery under applicable rules.

FPSC EXH NO. 93
ADMITTED

10. Peoples objects to any Set requiring the company to provide additional information beyond that obtained through a reasonable and diligent search.

General Response

Subject to and without waiving its general objections, which are incorporated by reference in each of its specific answers, Peoples provides its answers to OPC's Second Interrogatory by posting its answers on the Peoples Discovery SharePoint site established for this docket (the "SharePoint") and as specified in its specific answers. Peoples will serve its answers to the Commission staff by hand delivering a USB containing its answers to the Commission Clerk's office, and for Staff's purposes, the term "USB" should be substituted for "SharePoint" in the specific answers shown below.

The company's specific answers will identify interrogatories that call for answers that contain (a) information for which the company asserts a legal privilege and/or (b) "proprietary confidential business information" as defined in Section 366.093, Florida Statutes.

An answer that contains information for which the company asserts a legal privilege will be identified in the privilege log attached as Exhibit A.

An answer that contains information the company asserts to be "proprietary confidential business information" will be provided in the Confidential portion of the SharePoint subject to a request for confidential classification, motion for temporary protective order and/or a non-disclosure agreement.

BATES PAGE(S): 17690 - 17691
May 5, 2025

101. Forecasting Process. Describe the Company's multi-year financial forecasting process, including the resulting financial data and financial statement output. Describe the assumptions used, the sources of those assumptions, the number of years forecast, the modeling software used for this purpose, the time cycle (frequency) of the process, e.g., annually only or annually with periodic updates for major events, the timeline to develop each formal or official forecast, the approvals obtained, the scope of the approvals for the forecast compared to the scope of the approvals for the budget, and the use of the resulting data and financial statement output. Identify all documentation of this multi-year financial forecasting process, including the process actually utilized in 2024 for 2025 and future years and the process the Company plans to follow this year for 2026 and future years.

ANSWER:

The company annually prepares a Long-term forecast ("LTF") that encompasses the current year and a five-year future period. In filing the company's current rate case, the company prepared two budgeted years, which are included in the annual LTF process in progress at the time of filing this response. Please see the testimony of Luke Buzard pages 21-27 and the testimony of Andrew Nichols pages 10-18 that describe the company's 2025 and 2026 annual budgeting processes, including the resulting financial data and financial statement outputs. The company's major assumptions used to develop the budgets and resulting test year information included in the company's filing have been provided and are described in MFR Schedules G-6 & G-8. As described by witness Buzard, the load forecast is developed using regression models and customer-specific projected usage. These outputs are then used as inputs to develop the forecasted revenue. The two-year budget data developed for both 2025 and 2026 was compiled by the company using its SAP EPM software system. The jurisdictional regulatory budget used to produce the company's 2025 and 2026 forecasted surveillance report is produced in Excel. See the response to OPC's First Set of Interrogatories, No. 100 for the timeline of this process. As stated in witness Nichols' testimony, the company's Board of Directors approved the 2025 and 2026 Budgets in February 2025.

The forecasting process results in an income statement, balance sheet and cash flow statement that is produced using Excel. In 2024, this forecasting process included the years 2024-2029. In 2025, this forecasting process includes the years 2025-2030. In addition, Total Load and Total Customer growth rates were forecast for Years 2031-2035, while Total Revenue, Net Income, and Rate base were not

calculated beyond 2030. The LTF is finalized by the company and submitted to Emera in May of each year. Unlike the budgeting process, the company's Board of Directors does not approve the LTF. The LTF reflects the budget assumptions and results for the respective budget years unless a known significant change has occurred. For years not budgeted, certain LTF assumptions, such as inflation, are provided by Moody's Analytics. The LTF capital expenditures forecast assumptions are primarily based on the company's Integrated Resource Plan ("IRP"), which is discussed in the testimony of company witness Christian Richard. The annual IRP update process starts the year before the LTF is officially submitted to Emera (e.g., began in June 2024 along with the annual budget process). During the year, the LTF may be updated to reflect changes to the capital expenditure forecast identified in the ongoing IRP process or other major events that have changed the company's financial outlook (e.g., COVID pandemic).

107. Working Capital. Refer to the Direct Testimony of Andrew Nichols at 49-50 wherein he describes adjustments made to test year working capital. Refer also to the quantification of test year working capital contained on Schedule G-1, pages 2 and 3.

a. Indicate the test year projected amount of the "competitive rate adjustment" that is projected to be under-recovered during 2026 and cite to the line number(s) on Schedule G-1 wherein this under-recovery was "deducted."

b. Indicate the test year projected amount of the "Purchased Gas Adjustment clause" over-recovery and cite to the line number(s) on Schedule G-1 wherein this over-recovery is reflected. In addition, confirm that this projected over-recovery represented a reduction to the working capital amount added to rate base. If not confirmed, please explain why not.

c. Indicate the test year projected amount of the "Conservation Cost Recovery" over-recovery and cite to the line number(s) on Schedule G-1 wherein this over-recovery is reflected. In addition, confirm that this projected over-recovery represented a reduction to the working capital amount added to rate base. If not confirmed, please explain why not.

d. Indicate the test year projected amount of the "Rider CI/BSR" over-recovery and cite to the line number(s) on Schedule G-1 wherein this over-recovery is reflected. In addition, confirm that this projected over-recovery represented a reduction to the working capital amount added to rate base. If not confirmed, please explain why not.

ANSWER:

a. The competitive rate adjustment under-recovery of $5,693,200 is deducted from rate base on line 20 of MFR Schedule G-1, page 2. The deduction can also be seen in the reconciliation to rate base provided in witness Nichols' testimony Exhibit AN-1, Document No. 8, Bates stamped page 126.

b. The over-recovery of Purchased Gas Adjustment clause of $2,226,004 is reflected as a credit balance on line 30 of MFR Schedule G-1, page 2. As shown on MFR Schedule G-1, page 2, this is a reduction to working capital.

c. The over-recovery of Conservation Cost of $899,725 is reflected in the credit balance on line 12 of MFR Schedule G-1, page 3 ($1,042,174) offset

by the debit balance on line 26 of MFR Schedule G-1, page 2 ($142,449). As shown on MFR Schedule G-1, pages 2 and 3, this is a reduction to working capital.

d. The over-recovery of CI/BSR of $426,453 is reflected as a credit balance on line 13 of MFR Schedule G-2, page 3 ($443,933) offset by the debit balance on line 27 of MFR Schedule G-2, page 2 ($17,480). As shown on MFR Schedule G-1, pages 2 and 3, this is a reduction to working capital.

108. Off-System Sales. Refer to the Direct Testimony of Andrew Nichols at 67-68 wherein he provides a rounded quantification of the off-system sales net revenue for the test year of $2.6 million that is based on the current 25% percent of such revenue being retained by the Company. Provide the dollar amount (not rounded) of both the total projected off-system sales net revenue for the test year as well as the amount to be retained by the Company based on the current 25% level.

ANSWER:

The total projected off-system sales net revenue for the test year is $10,583,552 and the 25 percent amount retained by the company is $2,645,888.

109. Off-System Sales. Refer to the Direct Testimony of Andrew Nichols at 67-68 wherein he describes the significant increase in off-system sales net revenue during 2024 that is not expected to reoccur in the test year. Provide the total amount of off-system sales net revenues in total, the offset amount to PGA clause expenses to the benefit of customers, and the amount retained by the Company for each calendar year 2020 through 2024, budgeted for 2025, and projected during the test year.

ANSWER:

The below table presents the total amount of off-system sales net revenues in total, the offset amount to PGA clause expenses to the benefit of customers, and the amount retained by the company for each calendar year 2020 through 2024, budgeted for 2025, and projected during the test year.

112. WAM System Amortization. Refer to the Direct Testimony of Luke Buzzard at 19 wherein he describes the request to increase the amortization period of the WAM system from 15 to 20 years and the related reduction of WAM amortization expense of $717,633. Provide the amount of the WAM system costs to be amortized and the calculation of the potential $717,633 in amortization expense savings in electronic format with all formulas intact.

ANSWER:

Peoples is answering this interrogatory in part by producing records as allowed under Florida Rule of Civil Procedure 1.340(c). The 2026 test year 13-month average WAM system cost amount to be amortized is $45,126,115. 113. Significant Pipeline Damages. Refer to the Direct Testimony of Timothy O'Conner at 26-28 wherein he describes significant pipeline damages caused by third-party contractors that occurred during 2024 with costs of $250,000, $4.3 million, and $200,000.

a. Indicate whether the Company normally seeks reimbursements from the third-party contractors when such significant pipeline damages occur. If the Company does not seek such reimbursements, explain why not.

b. Indicate the amount of projected expenses associated with significant pipeline damages caused by third-party contractors that is included in the test year.

ANSWER:

a. Yes. Peoples follows its damage claims and billing processes to seek reimbursement from all third-party contractors that are found to be at fault for damages and there is sufficient evidence for Peoples to meet the threshold for legal burden of proof.

b. Peoples' test year does not include projected expenses for significant pipeline damage. When the company experiences a significant damage incident, a deferred debit (asset) account is initially established while a determination is made regarding the nature of the expense, cause and fault of the incident, and likelihood of reimbursement through our damage claims process.

In 2024, a deferred debit asset was established for the $4.3 million cited incident and the costs for the $200,000 and $250,000 cited incidents were capitalized. Collection is outstanding from the parties at fault for all three incidents.
