CERTIFIED PUBLIC ACCOUNTANTS

TAMPA, FLORIDA

To Florida Power Corporation:

In connection with our regular examination of the financial statements of Florida Power Corporation (a Florida corporation) for the year ended December 31, 1980, which examination is reported on in our auditors' report dated February 2, 1981, we have also reviewed the schedules listed below (except for the data indicated as excluded) which are included in the Company's Form 1 for 1980 filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. review for this purpose was made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. We did not make a detailed examination such as would be required to determine that each transaction has been recorded in accordance with the Uniform System of Accounts and published accounting releases.

Description of Schedules	Page Numbers
Statement A-Comparative Balance Sheet Notes to Balance Sheet	110-111 112-112C
Statement B-Summary of Utility Plant and Accumulated Provisions for Depreciation, Amortization and Depletion	113
Statement C-Statement of Income for the Year	114 - 116A
Statement D-Statement of Retained Earnings for the Year	117-117A
Statement E-Statement of Changes in Financial Position Materials and Supplies	118 - 119 207
Accumulated Deferred Income Taxes (Account 190) Long-Term Debt	214C-214D 219-219A
Reconciliation of Reported Net Income with Taxable Income for Federal Income Taxes Accumulated Deferred Income Taxes	223-223A 227-227E

Description of Schedules	Page Numbers
Common Utility Plant and Expenses	351
Distribution of Salaries and Wages	355 – 356
Electric Plant in Service	401-403
Electric Plant Held for Future Use	
(Column (c) excluded)	405
Construction Work in Progress and Completed	
Construction Not Classified - Electric	h = 6 h = 6 =
(Column (d) excluded)	406 - 406I
Accumulated Provision for Depreciation of	h = 0 h = 0 h
Electric Utility Plant	408 - 408A
Electric Operating Revenues (Columns (d)	1.00
through (g) excluded)	409
Electric Operation and Maintenance Expenses	417-420
Depreciation and Amortization of Electric	liaa liaa.
Plant (Sections B and C excluded)	429-430A

Based on our review, in our opinion, the accompanying schedules identified above (except for the data indicated as excluded) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

Rev. (12-80)

GENERAL INSTRUCTIONS

1. An original and six conformed copies of this report form properly filled out and attested, shall be mailed to the Energy Information Administration, EI - \$14, Mail Station: BG - 086, Forstl, U. S. Department of Energy, Washington, D. C. 20585, on or before the last day of the third month following the close of the calendar or established fiscal year, by each corporation, person or licensee as defined in section 3 of the Federal Power Act, any agency, authority or other legal entity or instrumentality and any agency, authority or instrumentality of the United States, which are engaged in the generation, transmission or distribution of electricity, whether or not otherwise subject to the jurisdiction of the Commission and which is in either of the following classifications:

> Class A - Having annual electric operating revenues of \$2,500,000 or more.

Class B - Having annual electric operating revenues of more than \$1,000,000 but less than \$2,500,000. One copy of the report should be retained by the respondent

in its files. The conformed copies may be carbon copies.
This report form is not prescribed for municipalities as defined in section 3 of the Federal Power Act; i.e. a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under laws thereof to carry on the business of developing, transmitting, utilizing or distributing power.

2. This form of annual report is prepared in conformity with the Uniform System of Accounts for Public Utilities and Licencees prescribed by the Federal Energy Regulatory Commission, and all accounting words and phrases are to be interpreted in accordance with the said classification. If the respondent is not under the jurisdiction of the Commission and does not keep its books in accordance with the above-mentioned Uniform System of Accounts, the report form should be filled in the best manner possible, the actual accounts kept substituted, where necessary, for the accounts listed.

Instructions should be carefully observed and each question should be answered fully and accurately, whether it has been answered in a previous annual report or not. Where the word "none" truly and completely states the fact, it should be given to any particular inquiry. Where dates are called for, the month and day should be stated as well as the year. Gustomary abbreviations may be used in stating dates.

- 4. If any schedule does not apply to the respondent, such fact should be shown on the schedule by the words "not applicable," or the schedule may be omitted and the notation made in the list of schedules on pages iii, iv, and v.
- The spacea provided in this report are designed to be filled in on a typewriter having elite-size type, and such a typewriter should be used if practicable.
- 6. Reports should be made out by means which result in a permanent record. The original copy in all cases shall be made out in permanent black ink or with permanent black typewriter ribbon. The conformed copies, however, may be carbon copies or made with hectograph impression or other similiar means of reproduction provided the impressions are sharp and accurately alined as to line numbers and columns. Entries of a contrary or opposite character (such as decreases reported in a column providing for both increases and decreases) should be shown in red ink or enclosed in parentheses.
 - 7. DEFINITIONS:

rization.

- (a) Commission Authorization (abbreviation Comm. Auth.) as used in this form, means the authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the comon whose authorization was obtained and give date of the
- (b) Respondent, wherever used in this report, means the erson, corporation, licensee, agency, authority, or other legal entity or instrumentality in whose behalf the report is made.

- 8. The annual report should in all particulars be complete in itself. Reference to reports of previous years or to other reports should not be made in lieu of required entries except as specifically authorized.
- 9. Wherever schedules call for comparisons of figures of a previous year, the figures reported must be based upon those shown by the annual report of the previous year, or an appropriate explanation given why the different figures were used.
- 10. Additional statements inserted for the purpose of further explanation of accounts or schedules should be made on durable paper conforming to this form in size and width of margin. The inserts should be securely bound in the report. inserts should bear the titles of the schedules and report form page numbers to which they pertain.
- 11. Cents are to be omitted on all schedules except where they apply to averages and figures per unit where cents are important. The amount shown on all supporting schedules shall agree with the item in the statements that they support.
- 12. If the respondent makes a report for a period other than a calendar year, the beginning and end of the period covered must be clearly stated on the front cover, and throughout the report where the year or period is required to be stated.
- 13. In addition to filing this report, the respondent shall also file, immediately upon publication, five copies of its latest annual report to stockholders and of any annual financial or statistical report regularly prepared and distributed to bondholders, security analysis, or industry associations. (If reports to stockholders are not prepared, so state below).

14. The respondent, i.f it is under the jurisdiction of the Commission, shall file with the original and each copy of this form, (when the CPA certification accompanies this report it shall be inserted prior to page i. General instructions) or separately, within 30 days after the filing date for the form, a letter or report (required by Sections 41.10 41.12 of the Commission's Regulations under the Federal Power Act) signed by independent certified public accountants or independent licensed public accountant, certified or licensed by a regulatory authority of a State or other political subdivision of the U.S., until December 31, 1975, and beginning January 1, 1976, and each year thereafter, only independent certified public accountants and independent licensed public accountants (licensed on or before December 31, 1970) will be authorized in attesting to the conformity, in all material respects, of the following schedules in this report with the Commission's applicable Uniform System of Accounts (statement certification includes applicable notes relating thereto and published accounting releases:

The letter or report shall be in the following form unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied;

In Connection with our regular examination of the finan-

cial statements of for the year ended

on which we have reported separately under date of we have also reviewed schedules of Form 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below)* conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

The letter or report shall state, edditionally, which, if any, of the schedules set forth above do not conform to the Commission's requirements, and shall describe the discrepancies that eviat.

*Parenthetical phrase inserted only when exceptions are to be reported.

EXCERPTS FROM THE LAW (Federal Power Act, 16 U. S. C. 791a-825r)

- "Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to wit:
 - • (3) 'corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities' as hereinafter defined;
 - (4) 'person' means an individual or a corporation;
 - (5) 'licensee' means any person, State, or municipality licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;
 - (7) 'municipality' means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the laws thereof to carry on the business of developing, transmitting, utilizing, or distributing power; * * * "
- "Sec. 4. The Commission is hereby authorized and empowered—
 - (a) To make investigations and to collect and record data concerning the utilization of the water resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location capacity, development costs, and relation to markets of power sites, * * * to the extent the Commission may deem necessary or useful for the purposes of this Act."
- "Sec. 304. (a) Every licensee and every public utility shall file with the Commission such annual and other periodic or special reports as the Commission may by rules and regulations or order prescribe as necessary or appropriate to assist the Commission in the proper administration of this Act. The Commission may prescribe the manner and form in which such reports shall be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission,

distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies."

"Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, amend, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the form or forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be filed. * * * * * *

"Sec. 311. In order to secure information necessary or appropriate as a basis for recommending legislation, the Commission is authorized and directed to conduct investigations regarding the generation, transmission, distribution, and sale of electric energy, however produced, throughout the United States and its possessions, whether or not otherwise subject to the jurisdiction of the Commission, including the generation, transmission, distribution, and sale of electric energy by any agency, authority, or instrumentality of the United States, or of any State or municipality or other political subdivision of a State. It shall, so far as is practicable, secure and keep current information regarding the ownership, operation, management, and control of all facilities for such generation, transmission, distribution, and sale; the capacity and output thereof and the relationship between the two; the cost of generation, transmission, and distribution; the rates, charges, and contracts in respect of the sale of electric energy and its service to residential, rural, commercial, and industrial consumers and other purchasers by private and public agencies;

"Sec. 315 (a) Any licensee or public utility which willfully fails, within the time prescribed by the Commission, to comply with any order of the Commission, to file any report required under this Act or any rule or regulation of the Commission the under, to submit any information or document required by the Commission in the course of an investigation conducted under this Act, * * * shall forfeit to the United States an amount not exceeding \$1,000 to be fixed by the Commission after notice and opportunity for hearing. * * * *

GENERAL INFORMATION

1. Name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that at which the general corporate books are kept.

R. R. HayesVice President and Controller3201 - 34th Street South

St. Petersburg, Florida 33711
2. Name of State under the laws of which respondent is incorporated and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and date organizated.

State of Florida July 18, 1899

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee.

(b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee cessed.

Not Applicable

4. State the classes of utility and other services furnished by respondent during the year in each State in which the respondent operated.

Electric Utility State of Florida

- 5. State below each class of security of the respondent which is registered on a national securities exchange or is to become so registered upon notice of issuance. Give, (a) exact title of each class of securities, (b) amount of issued securities registered, (c) amount of unissued securities to become registered upon notice of issuance, and (d) name of each exchange upon which registered or to become registered. Explain briefly if the amounts of issued securities differ from the amounts shown by the respondent's balance sheet.
 - a. Common Stock Without Par*
 - b. 32,622,650 Shares Issued
 - c. 914,259 Common Shares are reserved for conversion of 4-3/8% convertible debentures issued in 1966
 - d. New York Stock Exchange

*Effective April 2, 1980, Common Stock Split 2 for 1 and \$2.50 Par Value Changed to Common Stock Without Par Value.

nnual report of FLORIDA	POWER CORPORATION	 ended December 31, 19.80

GENERAL INFORMATION (Continued)

6. State below the name and address of the respondent's independent certified public accountant or independent censed public accountants (licensed on or before December 31, 1970, or registered public accountant through December 31, 1975) and date such accountant was engaged. If one of the above accountants has been engaged as the incipal accountant to audit the respondent's financial statements who was not the principal accountant for the respondent's prior filed certified financial statements, state the date when such independent accountant was injetially engaged.

CONTROL OVER RESPONDENT

If any corporation, business trust, or similar organization or combination of such organizations jointly held control over the respondent at end of year, state name of controlling corporation or organization, manner in which control was held and extent of control. If control was in a holding company organization, show the chain of ownership or control to the main parent company or organization. If control was held by a trustee(s), state name of trustee(s), name of beneficiary or beneficiaries for whom trust was maintained, and purpose of the trust.

NOT APPLICABLE

CORPORATIONS CONTROLLED BY RESPONDENT

- 1. Report below the names of all corporations, business trusts, and similar organizations, controlled directly or indirectly by respondent at any time during the year. If control ceased prior to end of year, give particulars in a footnote.
 - 2. If control was by other means than a direct holding of vot-

ing rights, state in a footnote the manner in which control was held, naming any intermediaries involved.

If control was held jointly with one or more other interests, state the fact in a footnote and name the other interests.

DEFINITIONS

- 1. See the Uniform System of Accounts for a definition of control.
- 2. Direct control is that which is exercised without interposition of an intermediary.
- 3. Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.
 - 4. Joint control is that in which neither interest can effectively

control or direct action without the consent of the other, as where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

OFFICERS

- 1. Report below the name, title and salary for the year for each executive officer whose salary is \$50,000 or more. An "executive officer" of a respondent includes its president, secretary, treasurer, and vice president in charge of a principal business unit, division or function (such as sales, administration or finance) and any other person who performs similar policy making functions.
- 2. If a change was made during the year in the incumbent of any position, show name and total remuneration of the previous incumbent and date change in incumbency was made.
- 3. Utilities which are required to file similar data with the Securities and Exchange Commission, may substitute a copy of item 4 of Regulation S-K, identified as this schedule page. The substituted page(s) should be conformed to the size of this page.

Instruction 5 - Indemnification of Officers and Directors:

The by-laws state, "The Corporation shall indemnify any Director, officer or employee to the full extent permitted by law."

1. (A) Give the names and addresses of the 10 security holders of the respondent who, at the date of the latest closing of the stock book or compilation of list of stockholders of the respondent, prior to the end of the year, had the highest voting powers in the respondent, and state the number of votes which each would have had the right to cast on that date if a meeting were then in order. If any such holder held in trust, give in a footnote the known particulars of the trust (whether voting trust, etc.), duration of trust, and principal holders of beneficiary interests in the trust. If the stock book was not closed or a list of stockholders not compiled within one year prior to the end of the year, or if since the previous compilation of a list of stockholders, some other class of security has become vested with voting rights, then show such 10 security holders as of the close of the year. Arrange the names of the security holders in the order of voting power, commencing with the highest. Show in column (a) the titles of officers and directors included in such list of 10 security holders.

SECURITY HOLDERS AND VOTING POWERS

- (B) Give also the voting powers resulting from ownership of securities of the respondent of each officer and director not included in the list of 10 largest security holders.
- 2. If any security other than stock carries voting rights, explain in a supplemental statement the circumstances whereby such security became vested with voting rights and give other important particulars concerning the voting rights of such security. State whether voting rights are actual or contingent and if contingent describe the contingency.
- 3. If any class or issue of security has any special privileges in the election of directors, trustees or managers, or in the determination of corporate action by any method, explain briefly.
- 4. Furnish particulars concerning any options, warrants, or rights outstanding at the end of the year for others to purchase securities of the respondent or any securities or other assets owned by the respondent, including prices, expiration dates, and other material information relating to exercise of the options, warrants, or rights. Specify the amount of such

securities or assets so entitled to be purchased by any officer, director, associated company, or any of the ten largest security holders. This instruction is inapplicable to convertible securities or to any securities substantially all of which are outstanding in the hands of the general public where the options, warrants, or rights were issued on a prorata basis.

5. Give date of the latest closing of the stock book prior to end of year, and state the purpose of such closing stock book not closed in 1980.

6. State the total number of votes cast at the latest general meeting prior to the end of year for election of directors of the respondent and number of such votes cast by proxy.

Total 12,494,502 By proxy 12,494,502

7. Give the date and place of such meeting. 3-22-80 St. Petersburg, Florida

Annual Report of FLORIDA POWER CORPORATION Year Ended December 31, 1980

Notes for Page 107

(1) Includes 2,200 shares held in a trust which both Mr. Johnson and Mr. Ruppel share with others the power to vote and share the power to dispose of these shares. The 2,200 shares is included only once in the total for Officers and Directors Holdings.

IMPORTANT CHANGES DURING THE YEAR

Hereunder give particulars concerning the matters indicated below. Make the statements explicit and precise and number them in accordance with the inquiries. Each inquiry should be answered. If "none" or "not applicable" states the fact, that response should be made. If information which answers an inquiry is given elsewhere in the report, reference to the schedule in which it appears will be sufficient.

- 1. Changes in and important additions to franchise rights: Describe the actual consideration given therefor and state from whom the franchise rights were acquired. If acquired without the payment of consideration state that fact.
- Acquisition of ownership in other companies; reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization.
- 3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission.
- 4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other conditions. State name of Commission authorizing lease and give reference to such authorization.
- 5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate

number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company also shall state major new continuing sources of gas made available to it from purchases, development, purchase contract, or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements etc.

- 6. Obligation incurred or assumed by respondent as guarantor for the performance by another of any agreement or obligation, excluding ordinary commercial paper maturing on demand or not later than one year after date of issue: State on behalf of whom the obligation was assumed and amount of the obligation. Give reference to Commission authorization if any was required.
- 7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments.
- 8. State the estimated annual effect and nature of any important wage scale changes during the year.
- State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.
- 10. Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on page 106, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.
- List electric generating units placed in service during the year, giving the in-service date, location and generating capacity.
- City of Jasper franchise granted 9/8/80 effective 10/1/80. Town
 of Lady Lake franchise granted 6/2/80 effective 6/2/80.

Both franchises are 30-year franchises with a franchise payment of 6% of residential and commercial revenue less city taxes, fees and other impositions.

- 2. None
- Purchase or Sale of Operating Unit

Purchases:

Description - Purchased distribution facilities from Withlacoochee River Electric Co-op in North Pinellas and Pasco

Summary of Transactions:

Original Cost	\$107 774
Depreciation	34 487
Purchase Price	179 506
Misc. Amortization	106 219

(Continued)

Journal entries submitted to Commission in letter dated 7/24/80.

Sales:

Description - Sale of Distribution facilities to Withlacoochee River Electric Co-op in North Pinellas and Pasco Counties.

Summary of Transactions:

Original Cost		\$	69	885
Depreciation			62	637
Proceeds]	185	064
Non-Operating Inc	come	1	L77	816

Journal entries submitted to Commission in letter dated 7/24/80.

4. None

5. None

6. None

- 7. At the Annual Meeting of Shareholders held on March 22, 1980, an amendment was approved to the Articles of Incorporation, as amended (Charter) of Florida Power Corporation, so as to increase the authorized shares of Common Stock from 30,000,000 shares, of the par value of \$2.50 each, to 60,000,000 shares, without par value, for the purpose of effecting a two-for-one split. Such amendment was filed with the Secretary of State of the State of Florida on April 2, 1980.
- 8. Negotiated general increase of 9.1% effective December 15, 1980, granted for bargaining unit employees.
- 9. Legal Proceedings Pending and Culminated

The following are matters in litigation which would not be considered as being in the normal course of business. Each of these matters was included in the Company's 1979 FERC Form No. 1 filing; however, the initial statements and all update material are incorporated in order that this report may be a self-contained itemization of pending material matters.

In April, 1975, the Company requested an investigation by the Federal Energy Administration (now part of the Department of Energy (DOE)), concerning the Company's suspicions of possible pricing irregularities in connection with spot market purchases of No. 2 oil made by the Company during 1973-74. These purchases are estimated to have been less than 8% of the Company's fuel purchases during this time period. These purchases were arranged through a consultant who was retained by the Company to locate sources of light oil. The Contract allowed the consultant to accept compensation from supplying companies, as well as the Company. However, the Company was under no obligation to purchase oil located by the consultant and the purchases were made at prices which were considered competitive at the time of the purchase. Following three years of investigation, the DOE released its findings to several governmental authorities, including the U.S. Department of Justice, which conducted a grand jury investigation into the matter. Seven persons, including Mr. A. P. Perez, a former President and Chairman of the Board of the Company, Mr. Richard E. Raymond, a former Executive Vice President and Director of the Company, and Mr. Ray Granlund, the consultant hired by the Company, were indicted for their alleged participation in a conspiracy to overcharge the Company in certain oil sales during this period. Six of the seven persons indicted either pleaded guilty to or were convicted of the charges. The former Executive Vice President and Director was acquitted on all charges. The U. S. Department of Justice also filed a civil action against the persons indicted and several oil companies for alleged violations of federal oil pricing regulations. The Company was not named as a defendant in either the indictments or the civil action.

The actions described in paragraphs I through 7 pertain to these alleged overcharges and are those which directly involve the Company.

1. Florida Power Corporation vs. Ray Granlund, et al, U. S. District Court, Middle District of Florida, Case No. 77-0742 Civ. T-K. Florida

Power Corporation filed its complaint on September 19, 1977 against the following defendants: Ray Granlund, A. P. Perez, Ronald Pruitt, Walter Ballard, John L. Burns, Charter International Oil Co., Larcon Petroleum Inc., Matrix Properties, Inc., Rotary Oil Company, and Signal Oil & Gas Company. The Federal Energy Administration, together with the head thereof, were also sued, both as nominal defendants and under the Freedom of Information Act. The complaint was subsequently amended to name the U. S. Department of Energy and its head, and to replace Signal Oil with its successor, Aminoil, U.S.A., Inc. This suit sought, among other things, recovery of any overcharges to Florida Power Corporation on purchases of No. 2 oil on the spot market during the period 1973-74.

A number of different causes of action were asserted against the various defendants, including claims of violations of the federal antitrust laws and federal petroleum pricing laws, common law fraud, common law conspiracy, and violation of fiduciary and agency obligations owed to the Company.

On November 12, 1977, the Florida Attorney General and the State Attorney for the Sixth Judicial Circuit of Florida filed a Motion to Intervene in this litigation as plaintiffs on behalf of a class of customers of the Company. The motion sought leave to file a complaint naming Florida Power Corporation as defendant in this litigation, adding James R. Clark, Burmah Oil & Gas Company and Tauber Oil Co. as additional defendants to those originally sued by the Company, and expanding the claims to encompass No. 6 oil as well as No. 2 oil. The Company opposed the Attorney General's motion, but the Court granted the motion on April 5, 1978. This action placed the Company in the posture of both a plaintiff and a defendant in this proceeding.

On September 17, 1979, after a prior Settlement Agreement had been turned down by the Court, the Company, certain other defendants in the suit, and the Florida Attorney General filed a second proposed Settlement Agreement with the Court. This proposal provided that a settlement fund of \$5.0 million will be established, with the Company contributing \$1.5 million, plus costs of administration, and the other settling defendants contributing \$3.5 million.

In April, 1980, the Court gave preliminary approval to the Settlement Agreement, subject to the parties submitting an acceptable Plan of Administration for implementing the refund. On August 8, 1980, the parties to the Agreement filed a Plan of Administration with the Court, where it is presently pending.

On January 9, 1981, a revised Settlement Agreement was filed with the Court, which included additional defendants as parties, and increased the settlement amount to \$5.3 million. This revised Settlement Agreement was approved by the Court on January 30, 1981. The Company's contribution to the settlement was not changed by this revision.

- 2. State of Florida ex. rel. Jim Smith, Attorney General of State of Florida vs. Florida Power Corporation, et al., U. S. District Court, Middle District of Florida, Case No. 78-169 Civ. T-H. On March 2, 1978, Attorney General Shevin filed a Complaint naming the following defendants: Florida Power Corporation, Ray Granlund, A. P. Perez, Ronald Pruitt, Walter L. Ballard, John L. Burns, James R. Clark, Charter International Oil Co., Signal Oil & Gas Company, Burmah Oil & Gas Company, Aminoil U.S.A., Inc., Matrix Properties, Inc., Larcon Petroleum, Inc., Rotary Oil Co. and Tauber Oil Co. This Complaint is virtually the same as the complaint described in the preceding comment. Little, if any, activity in this suit is anticipated, since the Attorney General is pursuing his claim via Intervention in Florida Power Corporation vs. Granlund (Paragraph 1).
- The State of Florida and Citizens of the State of Florida vs. Florida Power Corporation, Pinellas County Circuit Court, Case No. 77-9463-12. This action was filed on October 13, 1977 by the Public Counsel for the State of Florida and the Citizens of the State of Florida. It is alleged that the Company breached its statutory duties to its customers imposed by Florida Statute Section 366.03, breached its duties of good management owed to its customers, and acted negligently in its fuel oil purchases. It is also alleged that the Company acted in concert with its suppliers to artificially inflate the cost of fuel in violation of the federal petroleum pricing laws. An accounting and the imposition of a constructive trust are sought, based upon claims of fraud, misrepresentation, abuse of confidence, and gross negligence. In addition, compensatory damages in the amount of the fuel overcharges are claimed as well as punitive damages.

The Company filed a Motion to Dismiss the Complaint, asserting, among other things, lack of standing of the Public Counsel to bring such a suit. The Circuit Court granted this motion on February 27, 1978, and dismissed the action. On September 13, 1978, the order of dismissal was affirmed on appeal. In the interim, the Florida Attorney General entered an appearance in the case. The case was stayed and there has been no activity in it since that time. It is not expected that there will be further activity in this case, since the Attorney General is pursuing the claims through the other suits.

Show Cause Order as to alleged overcharges paid by Florida Power Corporation for spot purchases of fuel oil, Docket No. 770671-CI(GI). The Florida Public Service Commission ("Commission") issued a Modified Order to Show Cause, dated November 14, 1978, requiring the Company to show cause why it should not refund \$8,495,000 plus interest from October 1, 1978. The order stemmed from the report and recommendation of a Special Counsel appointed by the Commission to investigate whether the Company's customers were entitled to any refunds as a result of alleged overcharges to the Company on its spot market fuel oil purchases during 1973-74. The Special Counsel concluded that the Company was overcharged on some of those purchases and that the Company, and not the ratepayers, should bear the burden of such overcharges on the ground that the Company allowed the overcharges to occur.

On November 29, 1978, the Company filed its response to the Commission's Order. The response took issue with the Special Counsel's report and set forth a factual description of the circumstances surrounding those oil purchases, together with an explanation of the Company's actions in that regard.

Although the Company denied that it should be required to make a refund to its customers in the amount of \$8,495,000, it stated its will-ingness to seek to reach a settlement of the controversy by means of which a refund could be made to its customers. Such a settlement would permit the Company to move forward in its suit previously filed against multiple defendants in connection with the alleged fuel oil overcharges.

In September, 1979, after a prior settlement agreement had been rejected by the Court, the Company, certain other defendants in the suit to recover the alleged oil overcharges, and the Florida Attorney General filed a new proposed settlement agreement with the Court and the Commission (see Paragraph 1). The Commission held hearings on the proposal, and approved the settlement on February 15, 1980.

- 5. Seminole Electric Cooperative, Inc. vs. Florida Power Corporation.
 Federal Energy Regulatory Commission ("FERC") Docket No. EL78-21. On May 8, 1978, Seminole Electric Cooperative, Inc., one of the Company's wholesale customers, initiated a proceeding before the FERC, asking for an investigation of possible oil overcharges during 1973-75. The Company's other wholesale customers later intervened. There has been little activity in this proceeding, pending the result of the Florida Public Service Commission investigation. The settlement offer discussed in Paragraphs 1 and 4 includes the Company's wholesale customers. However, because FERC has jurisdiction over the Company's wholesale rate matters, its approval of that portion of the settlement may be required.
- 6. The cases previously reported in the Company's 1979 FERC Form No. 1, Zenith Industries Co., individually and as representative of a class and all others similarly situated vs. Florida Power Corporation, Case No. 77-9917-15, and Zenith Industries Co. vs. Florida Power Corporation, Case No. 77-918, involve only a single claimant, who would receive a refund from the Settlement Agreement described in Paragraph 1, if it is implemented. These cases are now not deemed to be material and will no longer be reported.
- 7. In the Matter of Florida Power Corporation, Securities and Exchange Commission, Administrative Proceeding File No. 3-5954. As previously reported in the Company's 1979 FERC Form No. 1, the Securities and Exchange Commission ("SEC") conducted a private investigation into possible violations of the Federal securities laws by the Company, a former consultant, and two former officers who also served as directors. The scope of the investigation related to the adequacy of the Company's SEC filings, reports and proxy materials, in light of certain transactions surrounding the alleged overpricing of the spot market light oil, sold to the Company during the 1973-74 period, the

role that said former officers-directors may have played, and the Company's responses in 1975 and thereafter to such alleged overpricing. As a result of this investigation, the SEC authorized an administrative proceeding under Section 15(c)(4) of the Securities Exchange Act of 1934.

On September 8, 1980, the SEC entered its Order instituting a 15(c)(4) proceeding and accepting the Company's offer of settlement. The Order provided that the 15(c)(4) proceeding was instituted based on allegations that the Company failed, in material respects, to comply with provisions of Section 13(a) of the Exchange Act and Rules 12b-20, 13a-1, 13a-11 and 13a-13 thereunder, by omitting to state, in quarterly, annual and other reports filed with the SEC, material information related to the Company's spot purchases of light fuel oil in 1973 and 1974.

The Order further provided that in anticipation of these proceedings the Company, without admitting or denying that any of its reports are deficient, submitted an Offer of Settlement which the Commission determined to accept.

Pursuant to the SEC's Order, the Company filed a Form 8-K, dated September 8, 1980, setting forth the facts surrounding the oil purchases in question. With the filing of the 8-K, this proceeding terminated.

- (B) The actions described in Paragraphs 8, 9 and 10 pertain to rate proceedings before the Florida Supreme Court and the Florida Public Service Commission.
- 8. Florida Public Service Commission Docket No. 770316-EU; Citizens of the State of Florida vs. Florida Public Service Commission, Supreme Court of Florida, Case No. 56,901. As previously reported in the Company's 1979 FERC Form No. 1, the Public Counsel of Florida appealed to the Florida Supreme Court the Florida Public Service Commission ("FPSC") Order that granted the Company a permanent rate increase of \$59.5 million annually. The Order was a result of a rate increase request made by the Company in April, 1977. Public Counsel claimed that the Order granting the rate increase and terminating the proceeding was procedurally defective.

On May 15, 1980, the Florida Supreme Court denied Public Counsel's appeal, and allowed the FPSC Order to stand. On May 30, 1980, the Public Counsel filed with the Florida Supreme Court a Motion for Rehearing. The Court denied the Motion for Rehearing on July 30, 1980, and this proceeding is now terminated.

9. Florida Public Service Commission Docket No. 780732-EU. On March 3, 1978, the Company's Crystal River nuclear unit was taken out of service following the identification of loose parts within the unit. The unit went back into operation in late September, 1978. During 1978, \$49 million of the Company's fuel adjustment revenues were collected

subject to refund. The FPSC took the position that, if the Company acted imprudently in the continued operation of the plant when the existence of loose parts first became apparent, then the FPSC should determine whether any portion of the higher fuel costs incurred because the nuclear unit was out of service should be borne by the Company. Hearings were held in late 1978, and again in 1980, at which time the Company explained the circumstances surrounding the plant's operation in the early part of 1978, what was discovered when the unit was taken out of service, and how the repair effort was carried out.

Following the hearings, the FPSC staff made recommendations concluding that the Company's actions were not improper with regard to the continued operation of the plant after the loose parts monitoring system was activated; however, the FPSC staff and the Florida Public Counsel suggested that the Company should make a refund to its customers on the theory that the Company was negligent during the repair period with regard to the dropping of a test weight, which prolonged the outage. While the unit was out of service, a test weight in the spent fuel pool dropped against some nuclear fuel rods. The mishap occurred as employees attempted to lift the test weight from the spent fuel pool with a hook intended only for lighter objects.

On January 5, 1981, the FPSC voted to order the Company to refund \$14.7 million to its customers. In making its decision, the FPSC took the position that the Company's management should have had work procedures in place which would have prevented the employee error, and, therefore, any increased fuel cost attributable to the extra down time of the unit because of the dropped-test-weight incident should be borne by the Company's shareholders, rather than its ratepayers. However, in determining the length of time that the outage was extended, the FPSC disregarded both the Company's and the FPSC staff's position that the dropped test weight prolonged the outage by 14 days, and ordered that the refund be based on increased fuel costs for 55 days. The Company has filed a Petition for Reconsideration and Motion to Stay the FPSC order.

10. Florida Public Service Commission Docket No. 800119-EU. On April 24, 1980, the Company filed a petition with the Florida Public Service Commission ("FPSC") requesting a \$99 million, or 12.5%, increase in its retail rates. At that time, the Company also asked that the FPSC allow the Company to immediately begin collecting \$61.2 million on an interim basis.

On July 7, 1980, the FPSC authorized the Company to put into effect new retail rates on August 6, 1980. The interim rates were designed to increase retail revenues by \$54.6 million annually, and would be collected subject to refund, pending FPSC hearings on the Company's full rate request. The Florida Public Counsel opposed the interim increase on the grounds that the FPSC did not have the legal authority to grant interim relief for the type of rate request made by the Company and filed a Petition for Reconsideration of the interim award with the FPSC, claiming that the award was calculated improperly and

that it resulted from certain procedural irregularities. On August 11, 1980, the FPSC granted the Petition for Reconsideration for the limited purpose of determining whether the interim award improperly included any fuel costs that should be collected through the fuel adjustment clause.

On September 3, 1980, the FPSC, after conducting a hearing on the Petition for Reconsideration, ordered that the interim rate increase previously granted be reduced by approximately \$14.2 million, from \$54.6 million to \$40.4 million. The FPSC also ordered the Company to refund approximately \$3 million of the interim rate increase which had been collected between August 6, 1980 and October 10, 1980.

Hearings on the \$99 million rate request began on January 14, 1981. On February 20, 1981, the FPSC granted the Company a \$58.4 million permanent rate increase.

- (C) Other proceedings.
- 11. Zenith Industries Company, individually and as representative of a class of others similarly situated vs. Florida Power Corporation and Gulf Oil Corporation, U. S. District Court, Middle District of Florida. Case No. 78-695 Civ. T-H. On August 25, 1978, Zenith Industries Company ("Zenith") filed suit against the Company and Gulf Oil Corporation ("Gulf"), which it subsequently amended to also include the U.S. Department of Energy. This class action was filed by Zenith as a former customer of the Company and alleges that the Company and Gulf conspired to defraud the Company's customers by charging and paying oil prices in excess of those permitted by federal oil pricing regulations. The Company believes that this action was prompted by the reporting of a proposed consent decree in a Department of Energy proceeding calling for Gulf's payment of \$42 million to the U. S. Department of Energy to be distributed thereafter to Gulf's customers for alleged oil overcharges. Gulf was one of the Company's major oil suppliers during 1973, 1974 and 1975, the time period covered by this action. The plaintiff alleges no facts in the complaint to support its charge of conspiracy other than the fact that the Company purchased oil from Gulf. There are presently pending before the Court motions by the Company and Gulf to dismiss the complaint, and by Zenith to certify the class.

The Company has no information at this time to indicate that Zenith's claims against the Company have any merit. In the absence of certification of the class, the Company does not believe, based upon its present knowledge of plaintiff's claims, that an adverse judgment in this case would result in damages of a material amount and this case will no longer be reported.

10. None.

NOTES TO BALANCE SHEET

- 1. The space below is provided for important notes regarding the belance sheet or any account thereof.
- 2. Purnish particulars as to any significant contingent assets or lishilities existing at end of year, including binef explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a meterial amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
- 3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Commission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
- 4. Where Accounts 189, Unamortized loss on Re- i acquired Debt and 257, Unamortized Gain on Reacquired Debt are not used give an explanation to include the rate treatment given these items. See General instruction 17, Uniform Systems of Accounts.
- 5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
- 6. If the notes to balance sheet relating to the respondent company appearing in the annual report to the stockholders are applicable in every respect and farmish the data required by Instructions 2, 3, 4, and 5 shows, such notes may be attached hereto.

<u>Electric Plant</u> - Electric plant is stated at the original cost of construction which includes payroll and related costs such as taxes, pensions and other fringe benefits, general and administrative costs and an allowance for funds used during construction. Substantially all of the Company's electric plant is pledged as collateral for the first mortgage bonds.

Operating Revenues and Fuel Expense - The Company recognizes revenues concurrent with billing to customers on a cycle billing basis. The cost of fuel for electric generation is charged to expense as burned. The cost of nuclear fuel is amortized to fuel expense based on the quantity of heat produced for generation of electric energy in relation to the quantity of heat expected to be produced over the life of the nuclear fuel core.

Effective April 1, 1980, the Florida Public Service Commission (FPSC) approved a revision to the fuel adjustment clause which eliminated the existing lag and provided for a projected six-month fuel clause. The projections are monitored by the FPSC and adjustments may be made if substantial differences occur; otherwise actual and projected fuel cost differences will be added to or deducted from billings to retail customers during the following projected period. As part of a rate petition in April 1980, the Company also changed its wholesale fuel adjustment clause to a current fuel cost recovery clause. As a result of these changes, the Company began recording deferred fuel revenues and/or deferred fuel expenses which at December 31, 1980, total \$13,611,000 and \$41,801,000, respectively, for a net amount of \$28,190,000.

The Company has been authorized by the Federal Energy Regulatory Commission to provide for the recovery of estimated future permanent storage and disposal costs of spent nuclear fuel. However, the Company is not providing on the books or in the billing rates for the recovery of these costs from retail customers pending approval from the FPSC.

Depreciation and Maintenance - The Company provides for the depreciation of the original cost of properties over their estimated useful lives on a straight-line basis. The annual provision for depreciation, expressed as a percentage of the average balances of depreciable plant was 3.62% for 1980 and 1979. The depreciation rate applied to nuclear facilities includes a factor for dismantling or removal costs to the extent allowed by the FPSC.

The Company charges maintenance with the cost of repairs and minor renewals of property, the plant accounts with the cost of renewals and replacements of property units and accumulated depreciation with cost, less net salvage, of property units retired.

STATEMENT A (Continued)

NOTES TO BALANCE SHEET

- The space below is provided for important notes regarding the balance sheet or any account thereof.
- 2. Permish particulars as to any significant contingent essents or italifities existing at end of year, including half explanation of any action initiated by the internal Revenue Service involving possible assessment of additional income taxes of natural amount, or of a claim for reland of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arreass on casualative preferred stack.
- 3. For Account 116, Utility Plant Adjustments, explain the esign of such assumt, debits and credits during the year, and plan of disposition contemplated, giving references to Commission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
- 4. Where Accounts 189, Unamortized loss on Re- 1 acquired Debt and 257, Unamortized Gain on Reacquired Debt are not used give an explanation to include the rate treatment given these items. See General Enstruction 17, Uniform Systems of Accounts.
- 5. Give a concine explanation of any retained cornings restrictions and state the amount of retained cornings affected by such rectrictions.
- 6. If the motes to belance sheet relating to the respondent company appearing in the annual report to the stockholders are applicable in every respect and farmish the data required by Instructions 2, 3, 4, and 5 above, such notes may be effected between

Allowance for Funds Used During Construction (AFDC) - This item represents the estimated cost of funds applicable to utility plant under construction. Recognition of this item as a cost of utility plant is appropriate because it constitutes an actual cost of construction and, under established regulatory rate practices, the Company is permitted to earn a return on these costs and to recover them in the rates charged for utility services.

The rate used in computing AFDC for 1980 and 1979 was 8.66%, which after consideration of deferred income taxes on the debt component of AFDC produces an after tax rate of 6.99% for 1980 and 1979. The rate of 8.66% is applied to the construction work in progress base which excludes \$106,250,000, the amount allowed in the rate base for rate-making purposes.

Investment in Subsidiary - The Company has a wholly-owned subsidiary, Electric Fuels Corporation, formed to secure long-term fuel supplies. The Company accounts for the investment in the subsidiary on the equity method.

Pension Costs - The Company has a retirement plan covering substantially all of its employees. The total pension costs for 1980 and 1979 were \$8,483,000 and \$7,423,000, respectively, which includes amortization of prior service cost over 10 years. The Company makes annual contributions to the plan equal to the amounts accrued for pension expense. A comparison of the actuarial present value of accumulated plan benefits based on an assumed rate of investment return of 8% a year and plan net assets is presented below:

•	(Thousands)
Actuarial present value of accumulated plan benefits:	
Vested	\$43,226
Nonvested	5,920
Total	\$49,146
Net assets available for benefits	\$84,541

The actuarial present value of accumulated plan benefits does not recognize any improvements in benefits and ignores the effects of future compensation increases on the benefits participants will receive for their past service. If this value is adjusted for projected compensation increases consistent with the assumed rate of investment return, the adjusted actuarial present value of accumulated plan benefits would be approximately \$72,163,000.

STATEMENT A

NOTES TO BALANCE SHEET

- The space below is provided for important notes reparding the belance sheet or any account thereof.
- 2. Permish particulars as to any significant consinguit secrets or liabilities existing at end of year, including brief explementes of any action initiated by the Internal Revenue Services involving possible assessment of additional income taxes of material amount, or of a claim for reland of income taxes of a material amount initiated by the utility. Give also a brief explements of any dividends in arrears on consistive preferred stack.
- 3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Commission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
- 4. Where Accounts 189, Unamortized loss on Re- acquired Debt and 257, Unamortized Gain on Reacquired Debt are not used give an explanation to include the rate treatment given these items. See General Anstruction 17, Uniform Systems of Accounts.
- 5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
- 6. If the notes to balance sheet relating to the respondent company appearing in the entual report to the stockholders are applicable in every respect and farmish the data required by Instructions 2, 3, 4, and 5 shows, such notes may be effected hereto.

<u>Income Taxes</u> - Deferred income taxes result primarily from the use of liberalized depreciation, accelerated amortization, the repair allowance and from the deferral of taxes on the debt component of the allowance for funds used during construction and substantially all other current book-tax timing differences as recognized in rates by the FPSC.

The investment tax credits, including job development investment tax credits, have been deferred and are being amortized through credits to income over the lives of the related property.

Sinking Fund Requirements - The annual sinking fund requirement relating to the first mortgage bonds at December 31, 1980, is \$12,050,000 of which \$4,987,500 must be satisfied in cash or an equal principal amount of bonds and the balance may be satisfied with bondable additions. At December 31, 1980, the Company had reacquired \$8,977,000 principal amount of bonds. This amount will be used to satisfy the 1981 cash sinking fund requirement and the remainder will be used for future cash sinking fund requirements. The balance of the 1981 sinking fund requirement will be met with bondable additions.

The Company is required to retire 15,750 shares of the cumulative preferred stock, 10% series, before August 15 of each year. The Company, starting November 15, 1984, is required to retire 15,000 shares of the cumulative preferred stock, 10.50% series, with the option to retire a maximum of 30,000 shares before November 15 of each year. The combined aggregate amount of minimum redemption requirements for these series amounts to \$1,575,000 per year through 1983 and \$3,075,000 per year through 1985.

Short-Term Debt - During 1980 the Company had established lines of credit which totaled \$100 million, with interest generally payable at the lending institutions' prime interest rates. With the exception of basic working funds, substantially all cash of the Company represents legally unrestricted compensating balances, maintained in support of these lines of credit.

Construction Program - Substantial commitments have been made in connection with the Company's 1981 construction program which is presently estimated to be \$374,300,000.

Legal Proceedings - The 1978 forced shutdown of the Crystal River nuclear unit led to an investigation by the Florida Public Service Commission (FPSC) to determine whether the Company's actions relating to the shutdown or repair of the unit were in any way responsible for the length of time it was out of service. The unit was shut down on March 3, 1978, to repair damages caused by loose parts within the unit and was returned to full service in early October 1978. While the unit was out of service, replacement and purchased power from fossil-fueled generation caused sharp increases in the fuel adjustment portion of the customer's bill. About \$49,000,000 was subject to possible refund pending the outcome of these proceedings.

STATEMENT A

(Continued)

NOTES TO BALANCE SHEET

- 1. The space below is provided for important notes regarding the balance sheet or any account the reof.
- 2. Purnish particulars as to any significant contingent essets or lishilities existing at end of year, including brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on camulative preferred species.
- 3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Commission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
- 4. Where Accounts 189, Unamortized loss on Re- i acquired Oebt and 257, Unamortized Gain on Reacquired Debt are not used give an explanation to include the rate treatment given these items. See General instruction 17, Uniform Systems of Accounts.
- 5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
- 6. If the notes to balance sheet relating to the respondent company appearing in the annual report to the stockholders are applicable in every respect and farmish the data required by Instructions 2, 3, 4, and 5 shows, such notes may be attached hereto.

Legal Proceedings (Cont'd) - On January 5, 1981, the FPSC took action and ordered the Company to refund approximately \$14,700,000 of those revenues, including interest, related to the proceedings discussed above. Company management disagrees with the findings of the FPSC and is in the process of appealing the order. Provision has been made in the 1980 financial statements for the Company's best estimate of the amount of revenues which will ultimately be refunded to customers. In the opinion of Company management and legal counsel, the resolution of this rate matter will not result in any material adjustment to the estimated refund.

The FPSC, revising the retail fuel adjustment clause, authorized the Company a transition adjustment of approximately \$23,000,000. This adjustment was allowed to permit recovery of fuel costs which would otherwise be lost in changing to the new clause. However, on April 2, 1980, the Florida Public Counsel appealed the FPSC's order to the Florida Supreme Court. As a result, on April 4, 1980, the FPSC ordered that billings of the transition fuel adjustment revenues be suspended pending the Court's decision.

As a result of the new retail fuel adjustment clause, the Company has recorded deferred fuel expenses for the period April 1 through September 30, 1980, of \$46,300,000, which will be billed to customers in future periods. This underrecovery of retail fuel expenses is primarily due to the fuel cost effect of the nuclear unit being shut down for a longer period than anticipated when the original projections were made. On November 6, 1980, the FPSC authorized the Company to collect \$22,800,000 of the deferred fuel expenses. It postponed ruling on the remaining \$23,500,000 of deferred fuel costs pending further hearings. At this time the Company cannot predict when it will be allowed to collect the remainder of the deferred fuel costs.

Gain on Reacquired Bonds - The Company recognizes gains or losses on reacquirement of long-term debt in current income. The Florida Public Service Commission presently does not consider these gains or losses in arriving at cost of capital components for rate-making purposes.

Dividend Restriction - The Composite Amended Articles of Incorporation prohibits the payment of dividends on common stock which would reduce the common stock equity below 25% of total capitalization, unless such dividends would not exceed 75% of net income, as defined, for the preceding 12 months. At December 31, 1980, approximately \$215 million of retained earnings was free of such restrictions.

STATEMENT D

STATEMENT OF RETAINED EARNINGS FOR THE YEAR

- 1. Report in this schedule all changes in appropriated retained earnings, unappropriated retained earnings and unappropriated undistributed subsidiary earnings for the year.
- 2. Each credit and debit during the year abould be identified as to the retained earnings account in which recorded (Accounts 433, 436-439 inclusive) and the contra primary account affected shown in column (b).
- 3. For each reservation or appropriation of retained earnings state the purpose and amount.
- 4. List first, account 439, Adjustments to Retained Earnings reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items.

- Dividends should be shown for each class and series of capital stock. Show amounts of dividends per share.
- 6. Show separately the state and federal income tax effect of items shown in account 439, Adjustments to Retained Earnings.
- 7. Explain in a footnote the basis for determining the amount reserved or appropriated and if such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
- 8. If any notes appearing in the report to stockholders are applicable to this statement, attach them hereto the Notes to Statement of Retained Earnings.

INSTRUCTIONS AND NOTES TO STATEMENT E

- 1. This statement is not restricted to those items, which are noncurrent in nature. It is intended that this statement be firstble enough in nature so that latitude can be given, under the classification of "Other," to allow for disclosure of all significant changes and transactions, whether they are within or without the current asset and liability groups.
- If the notes to the funds statement in the respondent's annual report to stockholders are applicable in every respect to this statement, such notes should be attached hereto.
- 3. Under ''Other'' specify significent amounts and group others.

- 4. Codes;
 - (a) Such as not increase-decrease in working capital, etc., other than changes in short term investments shown as iterm 4(e).
 - (b) Bonds, debantures and other longterm debt.
 - (c) Net proceeds or payments.
 - (d) Include commercial paper.
 - (c) Identify separately such items as investments, fixed assets, intengibles, etc.
- 5. Clarifications and explanations should be listed below.

INVESTMENT IN SUBSIDIARY COMPANIES (Account 123.1)

- 1. Report below investments in Account 123.1, Investment in Subsidiary Companies.
- 2. Provide a subheading for each company and list thereunder the information called for, observing the instructions below. Sub-total by company and give a total in columns (e), (f), (g) and (h).
- Investment in Securities-List and describe each security owned. For bonds give also principal amount, date of issue, maturity, and interest rate.
- 4. Investment Advances-Report separately the amounts of loans or investment advances which are subject to repayment but which are not subject to current set-

tlement. With respect to each advance show whether the advance is a note or open account. Each note should be listed giving date of issuance, maturity date, and specifying whether note is a renewal.

- 5. Report separately the equity in undistributed subsidiary earnings since acquisition. The total in columns (e) should equal the amount in account 418.1.
- For any securities, notes, or accounts that were pledged, designate such securities, notes, or accounts and in a footnote, state the name of pledgee and purpose of the pledge.
 - 7. If Commission approval was required for any ad-

vance made or security acquired, designate such fact and in a footnote give name of Commission, date of authorization, and case or docket number.

- 8. Interest and dividend revenues from investments should be reported in column (f), including such revenues from securities disposed of during the year.
- 9. In column (h), report for each investment disposed of during the year the gain or loss represented by the difference between cost of the investment (or the other amount at which carried in the books of account if different from cost) and the selling price therefor, not including interest adjustment includible in column (f).

MATERIALS AND SUPPLIES

- 1. For Account 154, report the amount of plant materials and operating supplies at end of year under titles which are indicative of the character of the material included. In column (d), designate the department or departments which use the class of material.
- 2. Give an explanation of important inventory adjustments during year (on a separate page) showing general classes of material and supplies and the various accounts (operating expense, clearing accounts, plant, etc.) affected—debited or credited. Debits or credits to stores expense-clearing shall be shown separately, if applicable.

DEFERRED LOSSES FROM DISPOSITION OF UTILITY PLANT (Account 187)

- 1. In column (a) give a brief description of property creating the deferred loss and the date the loss was recognized. Identify items by department where applicable.
- Losses on property with an original cost of less than \$50,000 may be grouped. The number of items making up the grouped amount shall be reported in column (a).
- 3. In column (b) give the date of Commission approval of journal entries. Where approval has not been received, give explanation following the respective item in column (a). (See account 187, Deferred Losses From Sale of Utility Plant.)

CAPITAL STOCK (Accounts 201 and 204)

- 1. Report below the particulars called for concerning common and preferred stock at end of year, distinguishing separate series of any general class. Show totals separately for common and preferred stock.
- 2. Entries in column (b) should represent the number of shares authorized by the articles of incorporation as amended
- to end of year.

3. Give particulars concerning shares of any class and series

- of stock authorized to be issued by a regulatory commission which have not yet been issued.
- 4. The designation of each class of preferred stock should show the dividend rate and whether the dividends are cumu-

lative or noncumulative.

- 5. State if any capital stock which has been nominally issued is nominally outstanding at end of year.
- 6. Give particulars of any nominally issued capital stock, reacquired stock, or stock in sinking and other funds which is pledged, stating name of pledgee and purpose of pledge.

OTHER PAID-IN CAPITAL (Accounts 208-211, inc.)

- 1. Report below balance at end of year and the information specified in the instructions below for the respective other paidin capital accounts. Provide a conspicuous subheading for each account and show a total for the account, as well as total of all accounts for reconciliation with balance sheet. Additional columns may be added for any account if deemed necessary. Explain the change in any account during the year and give the accounting entries effecting such change.
- 2. Donations Received from Stockholders (Account 208)—State amount and give brief explanation of the origin and purpose of each donation.
- 3. Reduction in Par or Stated Value of Capital Stock (Account 209)—State amount and give brief explanation of the

capital changes which gave rise to amounts reported under this caption including identification with the class and series of stock to which related.

- 4. Gain on Resale or Cancellation of Reacquired Capital Stock (Account 210)—Report balance at beginning of year. credits, debits, and balance at end of year with a succinct designation of the nature of each credit and debit identified as to class and series of stock to which related.
- 5. Miscellaneous Paid-In Capital (Account 211)—Classify amounts included in this account at end of year according to captions which, together with brief explanations, disclose the general nature of transactions which gave rise to the reported amounts.

SECURITIES ISSUED OR ASSUMED AND SECURITIES REFUNDED OR RETIRED DURING THE YEAR

- 1. Furnish an insert schedule giving a brief description of security financing and refinancing transactions during the year and the accounting for the securities, discounts, premiums, expenses, and gains or losses relating thereto, identified as to Commission authorization numbers and dates.
- 2. The particulars furnished should be sufficient to show fully the accounting for the total principal amount, par value, or stated value of each class and series of security issued, assumed, retired, or refunded and the accounting for premiums, discounts, expenses, and gains or losses relating to the securities. The facts of the accounting snould be clearly set forth with regard to redemption premiums, unamortized discounts, expenses, and gains or losses relating to securities retired or refunded, including the accounting for such amounts carried in the respondent's accounts at the date of the refunding or refinancing transactions with respect to securities previously refunded or retired.
- 3. The identification of each class and series of security should include, as appropriate, the interest or dividend rate, nominal

- date of issuance, maturity date, aggregate principal amount, par value or stated value, and number of shares. Also to be given are the issuance or redemption price and name of the principal underwriting firm through which the security transactions were consummated.
- 4. Where the accounting for amounts relating to securities refunded or retired is other than that specified in General Instruction 17 of the Uniform System of Accounts, references should be given to the Commission authorization for the different accounting and the accounting should be stated.
- 5. For securities assumed the name of the company for which the liability on the securities was assumed should be given as well as particulars of the transactions whereby the respondent undertook to pay obligations of another company. If any unamortized discount, premiums. Expenses, and gains or losges were taken over onto the respondent's books, details of these amounts should be furnished with amounts relating to refunded securities clearly earmarked.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR.

- 1. This schedule is intended to give particulars of the combined prepaid and accrued tax accounts and to show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the material on which the tax was levied was charged. If the actual or estimated amounts of such taxes are known, they should be shown as a footnote and designated whether estimated or actual amounts.
- 2. Taxes, paid during the year and charged direct to final accounts, that is, not charged to prepaid or accrued taxes, should be included in the schedule. Enter the amounts both in columns (d) and (e). The balancing of the schedule is not affected by the inclusion of these taxes.
- 3. Taxes charged during the year, column (d), include taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b) amounts credited to

prepaid taxes for proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax ac-

4. The aggregate of each kind of tax should be listed under the appropriate heading of "Federal," "State," and "Local" in such manner that the total tax for each State and for all subdivisions can readily be scertained.

^{*} Audited by Internal Revenue Service

222

5. If any tax covers more than one year, the required information of all columns should be shown separately for each tax year. When the amounts accrued pertain to other than the current year, show by footnote for each year whether the tax return has been audited by the Internal Revenue Service and furnish particulars for any adjustments, in total (debit or credit), that have been made to Account 236, Taxes Accrued, due to any such audits.

 Enter all adjustments of the accrued and prepaid tax accounts in column (f) and explain each adjustment.
 Designate debit adjustments by parentheses.

7. Do not include in this schedule entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.

8. The accounts to which taxes charged were distri-

buted should be shown in columns (i) to (o). Show both the utility department and number of account charged. For taxes charged to utility plant show the number of the appropriate balance sheet plant account or subaccount.

9. For any tax which it was necessary to apportion to more than one utility department or account, state in a footnote the basis of apportioning such tax.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR.

1. This schedule is intended to give particulars of the combined prepaid and accrued tax accounts and to show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the material on which the tax was levied was charged. If the actual or estimated amounts of such taxes are known, they should be shown as a footnote and designated whether estimated or actual amounts.

Rev. (12-70)

- 2. Taxes, paid during the year and charged direct to final accounts, that is, not charged to prepaid or accused taxes, should be included in the schedule. Enter the amounts both in columns (d) and (e). The balancing of the schedule is not affected by the inclusion of these taxes.
- 3. Taxes charged during the year, column (d), include taxes that the column (d), include taxes that the column (d), include taxes that the column (d), include taxes accrued (b) amounts credited to taxes accrued (b) amounts credited to

prepaid taxes for proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.

4. The aggregate of each kind of tax should be listed under the appropriate heading of "Federal," "State," and "Local" in such manner that the total tax for each State and for all subdivisions can readily be ascertained.

RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES

- 1. Repert hereunder a reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. The reconciliation should include as far as practicable the same detail as furnished on Schedule M-1 of the tax return for the year. The reconciliation shall be submitted even though there is no taxable income for the year. Descriptions should clearly indicate the nature of each reconciling amount.
- 2. If the utility is a member of a group which files consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be filed, indicating, however, intercompany amounts to be eliminated in such consolidated return. State names of group members, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members.

OPERATING RESERVES (Accounts 261, 262, 263, 265)

- Report below an analysis of the changes during the year for each of the above-named reserves.
- 2. Show title of reserve, account number, description of the general nature of the entry and the contra account debited or credited. Combine the amounts of monthly accounting entries of the same general nature. If respondent has more than one utility department, contra accounts debited or credited should indicate the utility department affected.
- For Accounts 261, Property Insurance Reserve and 262, Injuries and Damages Reserve, explain the nature of the risks covered by the reserves.
- 4. For Account 265, Miscellaneous Operating Reserves, report separately each reserve comprising the account and explain briefly its purpose.

Information Required by Instructions for Account 282

2. (b)

The Company has been using the double declining balance method of depreciation on new additions since January 1, 1954. The years 1954 through 1961 were at a liberalized depreciation rate of 6.32%. The years 1962 through 1970 were at the Guideline Rates. Starting in 1971 the new additions were at the Class Life – A D R rates. The Company has switched from the use of the declining balance method to the sum of the years digit method for the years 1971 through 1978. The switch for each of these years was made during the third year after the assets were placed in service. The basis used for the 1980 tax deferral was the guideline straight-line tax rate to liberalized tax rate. The accounting methods for liberalized depreciation have been approved by the Florida Public Service Commission.

INVESTMENT TAX CREDITS GENERATED AND UTILIZED

- 1. This schedule shall be prepared by the reporting company regardless of the method of accounting adopted for the investment tax credits. By footnote state the method of accounting adopted, and whether the company has consented or is required by another Commission, to pass the tax credits on to customers.
- 2. As indicated in Col. (a), the schedule shall show each year's activities from 1962 through the year covered by this seport, and shall separately identify the data for 3 percent (3%), 4 percent (4%), 7 percent (1%), 10 percent (10%) & 11 percent (11%) or grita.
- 3 Report in Cols. (b & e) the amount of investment tax credits generated from properties acquired for use in utility operations and report in Column (c & f) the amount of such generated
- credits utilized in computing the annual income taxes. Also explain by footnote any adjustments to Cols. (b infough f) such as for corrections, etc., or carryback of unused credits. Such adjustments should be carried back or forward to the applicable years.
- 4. Report in Col. (d) the weighted-average useful life of all properties used in computing the investment tax credits in Col. (b). Also, show in this column for the year 1971 and thereafter, the option exercised (1) rate base treatment, (2) ratable flow through, or (3) flow through, for rate purposes in accordance with section 46(¢) of the Internal Revenue Code.
- Show by footnote any unused credits available at end of each year for carry forward as a reduction of taxes in subsequent years.

INCOME FROM UTILITY PLANT LEASED TO OTHERS (Accounts 412 and 413)

- 1. Report below the following information with respect to utility property leased to others constituting an operating unit or system.
- 2. For each lease show: (1) name of lessee and description and location of the leased property; (2) revenues; (3) operating expenses classified as to operation, maintenance, depreciation, rents, amortization; and (4) net income from

lease for year. Arrange amounts so that deductions appear as a subtraction from revenues, and income as the remainder.

- 3. Provide a subheading and total for each utility department in addition to a total for all utility departments.
- 4. Furnish particulars of the method of determining the annual rental for the property.
 - 5. Designate associated companies.

PARTICULARS CONCERNING CERTAIN OTHER INCOME ACCOUNTS

- 1. Report in this schedule the information specified in the instructions below for the respective other income accounts. Provide a conspicuous subheading for each account and show a total for the account. Additional columns may be added for any account if deemed necessary.
- 2. Merchandising, Jobbing and Contract Work (Accounts 415 and 416)-Describe the general nature of merchandising, jobbing and contract activities. Show revenues by class of activity, operating expenses classified as to operation, maintenance, depreciation, rents and net income before taxes. Give the bases of any allocations of expenses between utility and merchandising, jobbing and contract work activities.
- 3. Nonutility Operations (Accounts 417 and 417.1)-Describe each nonutility operation and show revenues, operating expenses classified as to operation, maintenance, depreciation, rents, amortization and net income before taxes, from the operation. Give the bases of any allocations of expenses between utility and nonutility operations. The book cost of property classified as nonutility operations should be included in Account 121.
- 4. Nonoperating Rental Income (Account 418)-For each major item of miscellaneous property included in Account 121, Nonutility Property, which is not used in operations for which income is included in Account 417, but which is leased

- or rented to others, give name of lessee, brief description of property, effective date and expiration date of lease, amount of rent revenues, operating expenses classified as to operation, maintenance, depreciation, rents, amortization, and net income, before taxes, from the rentals. If the property is leased on a basis other than that of a fixed annual rental, state the method of determining the rental. Minor items may be grouped by classes, but the number of items so grouped should be shown. Designate any lessees which are associated
- 5. Interest and Dividend Income (Account 419)-Report interest and dividend income, before taxes, identified as to the asset account or group of accounts in which are included the assets from which the interest or dividend income was derived. Income derived from investments, Accounts 123, 124 and 136 may be shown in total. Income from sinking and other funds should be identified with the related special funds. Show also expenses, included in Account 419 as required by the uniform system of accounts.
- 6. Miscellaneous Nonoperating Income (Account 421)-Give the nature and source of each miscellaneous nonoperating income, and expense and the amount thereof for the year. Minor items may be grouped by classes.

PARTICULARS CONCERNING CERTAIN INCOME DEDUCTION AND INTEREST CHARGES ACCOUNTS

- 1. Report in this schedule the information specified in the instructions below for the respective income deduction and interest charges accounts. Provide a conspicuous subheading for each account and show a total for the account. Additional columns may be added if deemed appropriate with respect to any account.
- 2. Miscellaneous Amortization (Account 425)-Describe the nature of items included in this account, the contra account charged, the total of amortizations charges for the year, and the period of amortization.
- 3. Miscellaneous Income Deductions port the nature, payee, and amount of other income deductions for the year as required by Accounts 426.1, Donations; 426.2, Life Insurance; 426.3, Penalties; and 426.5 Other Deductions, of the Uniform System of Accounts. Amounts of less than \$1,000 may be grouped by classes within the
- accounts if the number of items so grouped is shown. Additionally, report the total amount of income deductions included in Account 426.4, particulars of which are contained in the separate schedule "Expenditures for Certain Civic, Political and Related Activities."
- 4. Interest on Debt to Associated Companies (Account 430)-For each associated company to which interest on debt was incurred during the year show the amount and interest rate respectively for (a) advances on notes (b) advances on open account (c) notes payable (d) accounts payable and (c) other debt, and total interest. Explain the nature of other debt on which interest was incurred during the year.
- 5. Other Interest Expense (Account 431)-Report particulars, including the amount and interest rate for other interest charges incurred during the year.

EXPENDITURES FOR CERTAIN CIVIC, POLITICAL AND RELATED ACTIVITIES

(Account 426.4)

- 1. Report below all expenditures incurred by the respondent during the year for the purpose of influencing public opinion with respect to the election or appointment of public officials, referenda, legislation or ordinances (either with respect to the possible adoption of new referenda, legislation or ordinances or repeal or modification of existing referenda, legislation or ordinances); approval, modification, or revocation of franchises; or for the purpose of influencing the decisions of public officials which are accounted for as Other Income Deductions, Expenditures for Certain Civic, Political and Related Activities; A ccount 426.4.
- 2. Advertising expenditures in this A count shall be classified according to subheadings, as follows: (a) radio, television, and motion picture advertising; (b) newspaper, magazine, and pamphlet advertising; (c) letters or inserts in customers' bills; (d) inserts in reports to stockholders; (e) newspaper,

paper and magazine editorial services; and (f) other advertising.

- Expenditures within the definition of paragraph (1), other than advertising shall be reported according to captions or descriptions, clearly indicating the nature and purpose of the activity.
- 4. If respondent has not incurred any expenditures contemplated by the instructions of A count 426.4, so state.
- 5. For reporting years which begin during the calendar year 1963 only, minor amounts may be grouped by classes if the number of items so grouped is shown.

Note: The classification of expenses as nonoperating and their inclusion in this account is for accounting purposes. It does not preclude Commission consideration of proof to the contrary for ratemaking or other purposes.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Amounts originally charged to clearing accounts should be segregated as to Utility Departments, Construction, Plant Removals, and Other Accounts, and shown in the appropriate lines and spaces provided for such amounts on pages 355 and 356. In determining this segregation of salaries and wages originally charged to clearing accounts a method of approximation giving substantially correct results may be used.

ELECTRIC PLANT IN SERVICE

(In addition to Account 101, Electric Plant in Service [Classified], this schedule includes Account 102, Electric Plant Purchased or Sold, Account 103, Experimental Electric Plant Unclassified and Account 106, Completed Construction Not Classified-Electric.)

1. Report below the original cost of electric plant in service according to prescribed accounts.

2. Do not include as adjustments, corrections of additions and retirements for the current or the preceding year. Such items should be included in column (c) or (d) as appropriate.

3. Credit adjustments of plant accounts should be enclosed

Rev (12-72)

in parentheses to indicate the negative effect of such amounts.

4. Reclassifications or transfers within utility plant accounts should be shown in column (f). Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102, Electric Plant Purchased or Sold.

In showing the clearance of Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.

* State the nature and use of plant included in this account and if substantial in amount submit a supplementary schedule showing subaccount classification of such plant conforming to the requirements of this schedule

** For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchaser, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date of such filing

NOTE

Completed Construction Not Classified, Account 106, shall be classified in this schedule according to prescribed accounts, on an estimated basis if necessary, and the entries included in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (c). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, a tentative distribution of such retirements, on an estimated basis with appropriate contra entry to the account for accumulated depreciation provision, shall be included in column (d). Include also in column (d) reversals of tentative distributions of prior year of unclassified retirements. Attach an insert page showing the account distributions of these tentative classifications in columns (c) and (d) including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of

FISH AND WILDLIFE AND RECREATION PLANTS (Subaccounts of 330, 331, 332 and 335)

- 1. Report below the original cost of fish and wildlife and recreation facilities included in hydraulic production plant, according to the texts of the prescribed accounts.
- 2. Do not include as adjustments in column (e) any corrections of additions and retirements for the current or the preceding year. Such items should be included in column (c) or (d) as appropriate.
- 3. Credit adjustments of plant accounts should be enclosed in parentheses to indicate the negative effect of such amounts
- 4. Reclassifications or transfers within utility plant accounts should be shown in column (f).

ELECTRIC PLANT HELD FOR FUTURE USE (Account 105)

Report separately each property held for future use at end of the year having an original cost of \$100,000 or more.
 Other items of property held for future use may be grouped provided that the number of properties so grouped is indicated.
 For property having an original cost of \$100,000 or more previously used in utility operations, now held for future use, give, in addition to other required information, the date that utility use of such property was discontinued, and the date the original cost was transferred to Account 105.

CONSTRUCTION WORK IN PROGRESS AND COMPLETED CONSTRUCTION NOT CLASSIFIED—ELECTRIC (Accounts 107 and 106)

1. Report below descriptions and balances at end of year of projects in process of construction and completed construction not classified for projects actually in service. For any substantial amounts of completed construction not classified for plant actually inservice explain the circumstances which have prevented final classification of such amounts to prescribed primary accounts for plant in service.

2. The information specified by this schedule for Account 106, Completed Construction Not Classified-

Electric, shall be furnished even though this account is included in the schedule, Electric Plant in Service, pages 401-403, according to a tentative classification by primary accounts.

- Show items relating to "research and development" projects last under a caption Research and Development: (See account 107, Uniform System of Accounts).
 - 4. Minor projects may be grouped.

Annual Report of . PLANT ACQUISITION ADJUSTMENTS AND ACCUMULATED PROVISION FOR AMORTIZATION OF PLANT ACQUISITION ADJUSTMENTS (Accounts 114, 115)

- 1. Report the particulars called for concerning acquisition adjustments
- 2. Provide a subheading for each account and list thereunder the information called for, observing the instructions below.
- 3. Explain each debit and credit during the year, give reference to any Commission orders or other authorizations concerning such amounts, and show contra account debited or credited.

4. For acquisition adjustments arising during the

year state the name of the company from which the property was acquired, date of transaction, and date journal entries clearing Account 102, Plant Purchased or Sold, were accepted for filing by the Commission.

5. In the blank space at the bottom of the schedule explain the plan of disposition of any acquisition adjustments not currently being amortized.

6. Give date Commission authorized use of Account 115,

ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)

- 1. Report below the information called for concerning accumulated provision for depreciation of electric utility plant.
- 2. Explain any important adjustments during year.
- 3. Explain any difference between the amount for book cost of plant retired, line..., column (c), and that reported in the schedule for electric plant in service, pages 401-403, column (d) exclusive of retirements of nondepreciable property.

Uniform System of Accounts contemplate that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a signiticant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, preliminary closing entries should be made to tentatively functionalize the book cost of the

plant retired. In addition, all cost included in retirement work in progress at year end should be included in the appropriate functional classifications.

- 5. Show separately interest credits under a sinking fund or similar method of depreciation accounting.
- 6. In section B show the amounts applicable to prescribed functional classifications.

reserve for the purchase of certain distribution facilities from Withlacoochee River Electric

Cooperative.

- 1. Report below the amount of operating revenue for the
- year for each prescribed account and the amount of increase or decrease over the preceding year. 2. If increases and decreases are not derived from previ-
- 3. Number of customers should be reported on the basis of number of meters, plus number of flat rate accounts, except that where separate meter readings are added for billing pur-

ously reported figures explain any inconsistencies.

ELECTRIC OPERATING REVENUES (Account 400)

poses, one customer shall be counted for each group of meters so added. The average number of customers means the average of the 12 figures at the close of each month. If the customer count in the residential service classification includes customers counted more than once because of special services, such as water heating, etc., indicate in a footnote the number of such duplicate customers included in the classification.

4. Unmetered sales should be included below. The de-

tails of such sales should be given in a footnote

5. Classification of Commercial and Industrial Sales, Account 442, according to Small (or Commercial) and Large (or Industrial) may be according to the basis of classification regularly used by the respondent if such basis of classification is not greater generally than 1000 Kw of demand. See Account 442 of the Uniform System of Accounts. Explain basis of classification.

SALES OF ELECTRICITY—BY COMMUNITIES (Continued)

- 2. The information to be shown below should be on the same basis as provided in Schedule entitled "Electric Operating Revenues." page 409.
- 3. Provide a subheading for sales in each State, also a total for each State of sales not required by this schedule to be reported for each community.
- 4. The totals for Accounts 440, 442, 444, and 445 should agree with the amounts for those accounts shown in Schedule entitled "Electric Operating Revenues."

SALES FOR RESALE (Account 447)

1. Report sales during year to other electric utilities and to cities or other public authorities for distribution to ultimate consumers.

2. Provide subheadings and classify sales as to (1) Associated Utilities, (2) Nonassociated Etilities, (3) Municipalities, (4) Cooperatives, and (5) Other Public Authorities. For each sale designate statistical classification in column (b) thus. FP, for him power supplying total system requirements of customer or total requirements at a specific point of delivery. FPIC), for firm power supplying total system requirements of customer or total requirements at a specific point of delivery with credit allowed customer for available standby, FPIP), for him power supplementing cus-

omer's own generation or other purchases. DP, for dump power. Of for other. Place an "x" in column (c) if sale involves export across a state line. Group together sales coded "x" in column (c) by state, or counts; of origin, providing a subtotal for each state for counts) of delivery in columns. I) and (p), suitably identified in column (e).

3. Report separately firm, dump, and other power sold to the same utility. Describe the nature of any sales classified as Other Power, column

4. If delivery is made at a substation indicate ownership in column (f), thus, respondent owned or leased, RS, customer owned or leased, CS.

SALES FOR RESALE (Account 447) (Continued)

- 5. If a fixed number of kilowatts of maximum demand is specified in the power contract as a basis of billings to the customer this number should be shown in column (g). The number of kilowatts of maximum demand to be shown in column (h) and (i) should be actual based on monthly readings and should be furnished whether or not used in the determination of demand charges. Show in column (j) type of demand reading (instantaneous, 15, 30, or 60 minutes integrated).

- adjustments.

 8. If a contract covers several points of delivery and small amounts of electric energy are delivered at each point, such sales may be grouped.

SALES OF ELECTRICITY BY RATE SCHEDULES

- 1. Report below for each rate schedule in effect during the year the Kwh of electricity sold, revenue, average number of customers, average Kwh per customer, and average revenue per Kwh.
- 2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in Schedule entitled "Electric Operating Revenues," page 409. If the sales under any rate schedule are classified in more than one revenue account list the rate schedule and sales data under each applicable revenue account subheading.
- 3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
- 4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
- For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.

NUMBER OF ELECTRIC DEPARTMENT EMPLOYEES

	regular full-time employees, payroll period ended 12/28/80	4 195
	part-time and temporary employees	364
3 .	Total employees.	<u>4 559</u>

The data on number of employees should be reported for the pagroll period ending nearest to October 31, or any payroll period ending 60 days before or after October 31.

If the respondent's payrolls for the reported period include any special construction forces include such employees as parttime and temporary employees and show the number of such special construction employees so included.

The number of employees assignable to the electric department from joint functions of combination utilities may be determined by estimate, on the basis of employee equivalents. Show the estimated number of equivalent employees attributed to the electric department from joint functions.

^{*}Includes a credit of \$41,800,786 for deferred fuel expense, Account 501 Page 417.

OPERATION AND MAINTENANCE EXPENSES OF FISH - AND WILDLIFE AND RECREATION OPERATIONS (Subaccounts of 537 and 545)

Report in this schedule the expenses in connection with the operation and maintenance of fish and wildlife and recreation facilities. Report by subaccounts the expenses required by the texts of Accounts 537, Hydraulic Expenses, and 545, Mainte-

nance of Miscellaneous Hydraulic Plant. Include amounts whether facilities are operated by company or by contract concessionaires.

LEASE RENTALS CHARGED

- 1. For purposes of this schedule a "lease" is defined as a contract or other agreement by which one party (lessor) conveys an intangible right or land or other tangible property and equipment to another (lessee) for a specified period of one year or more for rent.
- 2. Report below, for leases with annual charges of \$25,000 or more, but less than \$250,000 the data called for in columns a, b (description only), f, g and j.
- 3. For leases having annual charges of \$250,000 or more, report the data called for in all the column below.
- 4. The annual charges referred to in Instruction 1 and 2 include the basic lease payment and other payments to or in behalf of the lessor such as taxes, depreci-

- ation, assumed interest or dividends on the lessor's curities, cost of property replacements* and other expitures with respect to leased property except the expenses of operating and maintaining such leased property. Expenses paid by lessee are to be itemized in column f below.
- 5. Leases of construction equipment in connection with construction work in progress are not required to be reported herein. Continuous, master or open-end leases for EOP or office equipment, automobile fleets and other equipment that is short-lived and replaced under terms of the lease or for pole rentals shall report only the data called for in columns a, b (description only), f, g and f, unless the lessee has the option to purchase the property.
 - 6. In column (a) report the name of the lessor. List

lessors which are associated companies (describing association) first, followed by mon-associated lessors.

7. In column (b) for each leasing arrangement, report in order, classified by generating station, transmission line, distribution system, large substation, or other operating unit or system, followed by any other leasing arrangements not covered under the preceding classific-

Description of the property, whether lease is a sale and leaseback, whether lessee has option to purchase and conditions of purchase, whether lease is cancellable by either party and the cancellation conditions, state the tax treatment used, the accounting treatment of the lease payments (levelized charges to expense or other treatment), the basis of any charges apportioned between the lessor and lessee, and the responsibility

of the respondent for operation and maintenance expenses and replacement of property.

The above information is to be reported with initiation of the lease and thereafter when changed or every five years, which ever occurs first.

- 8. Report in column (d), as of the date of the current lease term, the original cost of the property leased, estimated if not known, or the fair market value of the property if greater than original cost and indicate as shown. If leased property is part of a larger unit, such as part of a building, indicate without associating any cost or value with it.
- 9. Report in column (k) below the estimated remaining annual charges under the current term of the lease. Do not apply a present value factor to the estimate. Assume that cancellable leases will not be cancelled when estimating the remaining charges.

PURCHASED POWER (Account 555) (Except interchange power)

1. Report power purchased for resale during the year. Exclude from this schedule and report on page 424 particulars concerning interchange power transactions during the year.

2. Provide subheadings and classify purchases as to (1) Associated Utilities, (2) Nonassociated Utilities, (3) Associated Nonutilities, (4) Other Nonutilities, (5) Municipalities, (6) Cooperatives, and (7) Other Public Authorities. For each

purchase designate statistical classification in column (b), thus: firm power, FP; dump or surplus power, DP; other, O, and place an "x" in column (c) if purchase involves import across a state line.

3. Report separately firm, dump, and other power purchased from the same company. Describe the nature of any purchases classified as Other Power, column (b).

PURCHASED POWER (Account 555) (Continued) (Except interchange power)

4. If receipt of power is at a substation indicate ownership in column (f), thus: respondent owned or leased, RS; seller owned or leased, SS.

5. If a fixed number of kilowatts of maximum demand is specified in the power contract as a basis of billing, this number should be shown in column (g). The number of kilowatts of maximum demand to be shown in columns (h) and (i) should be actual based on monthly readings and should be

furnished whether or not used in the determination of demand charges. Show in column (j) type of demand reading (instantaneous, 15, 30, or 60 minutes integrated).

6. The number of kilowatt hours purchased should be the quantities shown by the power bills.

7. Explain any amount entered in column (o) such as fuel or other adjustments.

TRANSMISSION OF ELECTRICITY FOR OR BY OTHERS (Accounts 456 and 565) (Including transactions sometimes referred to as "wheeling")

- 1. Describe below and give particulars of any transactions by respondent during the year for transmission of electricity for or by others during year, including transactions sometimes referred to as wheeling.
- 2. Provide separate subheadings for: (a) Transmission of Electricity for Others (included in Account 456) and (b) Transmission of Electricity by Others (Account 565).
- 3. Furnish the following information in the space below concerning each transaction:
 - (a) Name of company and description of service rendered or received. Designate associated companies.
 - (b) Points of origin and termination of service specifying also any transformation service involved.
 - (c) Kwh received and Kwh delivered.

- (d) Monetary settlement received or paid and basis of settlement, included in Account 456 or 565.
- (e) Nonmonetary settlement, if any, specifying the Kwh representing compensation for the service, specifying whether such power was firm power, dump or other power, and state basis of settlement. If nonmonetary settlement was other than Kwh describe the nature of such settlement and basis of determination.
- ff) Other explanations which may be necessary to indicate the nature of the reported transactions. Include in such explanations a statement of any material services remaining to be received or furnished at end of year and the accounting recorded to avoid a possible material distortion of reported operating income for the year.

Account 456 - Transmission of Electricity for Others

Southeastern Power Administration

- a. Contract (Code 14-05-0001-198) providing for the transmission by Florida Power Corporation of electric capacity and energy from Jim Woodruff Project to preference customers of the Government and the use of the Company's transmission lines for transmitting and disposing of such capacity and energy from the Project and other support sources. Contract dated 7/19/57 for an initial term of 10 years from 8/20/57, renewable automatically for successive terms of 5 years, until and unless terminated by either party giving written notice.
- b. Points of Origin: Project power delivered at the connection of the Company's transmission system with the Project bus or at the points of connection with the Georgia Power Company System.

Points of Delivery: Municipal corporations or REA financed electric cooperatives located within the service area of the Company and within 150 miles of the Project and purchasing capacity and energy from the Government.

c. KWH received and KWH delivered:

Energy Delivered - Year 1980 179,662,040 (Preference Customers) 2,093,000 (Project)

Energy Received - Year 1980 Deliveries to Preferences Customers are increased by 7% allowance for losses.

- d. Charges for Transmission Services furnished by Company to Government delivery to Preference Customers:
 - 1.00 mills per KWH Zone 1 (within 100 miles of Project)
 - 1.75 mills per KWH Zone 2 (100-150 miles from Project)

Delivery of energy from the Project to Georgia Power System and from the Georgia Power System to the Project:

1.25 mills per KWH for all energy delivered

Total Revenue for Transmission Service - Year 1980

\$208,324

See Item c - Energy Received for Loss Allowance.

1. Report below cash payments of \$25,000 or more to municipal or other governmental authorities, and the cost of electricity, materials, supplies, and other items furnished such authorities during the year without reinibursement in compliance with franchise, ordinance, or similar requirements. For amounts less than \$25,000 the payments may be grouped

provided the number of payments so grouped is shown.

2. Give the basis of amounts entered in columns (c) and (d) for electricity supplied vithout charge.

CONSTRUCTION OVERHEADS—ELECTRIC

- Report below the information called for concerning construction overheads for the year.
- 2. List in column (a) the kinds of overheads according to the titles used by the respondent. Charges for outside professional services for engineering fees and management or supervision fees capitalized should be shown as separate items.
- 3. On page 428 furnish the requested explanatory information concerning construction overheads.
 - 4. A respondent should not report "none" to this schedule

if no overhead apportionments are made, but rather should explain on page 428 the accounting procedures employed and the amounts of engineering, supervision and administrative costs, etc., which are directly charged to construction. Engineering, supervision, administrative, and allowance for funds used during construction, etc., which are first assigned to a blanket work order and then prorated to construction johs shall be considered overheads for the purpose of formulating a response to this schedule.

e	Description of overhead {a}	Total Amount Charged for the Year (b.	Total Cost of construction to which everheads were charged (exclusive of everhead charges) (c)	Percent everheeds to construction cost (d)

GENERAL DESCRIPTION OF CONSTRUCTION OVERHEAD PROCEDURE

1. For each construction overhead explain: (a) the nature and extent of work, etc., the overhead charges are intended to cover, (b) the general procedure for determining the amount capitalized, (c) the method of distribution to construction jobs, (d) whether different rates are applied to different types of construction, (e) basis of differentiation in rates for different types of construction and (f) whether the overhead is directly or indirectly assigned.

4. Weighted average rate actually used for the year.

2.75%

actually serned during the proceeding three year chall be use

a. Rate for borrowed funds - 5.91%

b. Rate for other funds -

- 2. Show below the computation of allowance for funds used during construction rates, in accordance with the previsions of Electric Plant Instruction 3 (17).
- 3. Where a net-of-tax rate for borrowed funds is used, show the appropriate tax effect adjustment to the computations below in a manner that clearly indicates the amount of reduction in the gross rate for tax effects.

Engineering & Supervision

The expenditures reported under the above caption include payroll, auto, expense accounts, and miscellaneous expenses of employees engaged on specific projects and are charged directly to the work orders involved except overhead and underground distribution lines. Costs for overhead and underground lines are charged directly to a separate work order for each in Construction Work in Progress, Account 107, and allocated monthly to open construction work orders. The allocation to open projects is determined by the percentage of distribution engineering and supervision monthly charges to the related Construction Work in Progress monthly direct charges.

Amount Capitalized \$6 048 887

ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION RATES 1. Components of formula (derived from actual book balances and actual cost rates): Capitalization Cost Rate Title Assunt Ratio Percentage (percent) 64 356 Average short-term debt 12.58% Short-term interest rate 689 538 7.02% 47.6 Long-term debt 220 625 15.2 8.31% Preferred stock 538 182 37.2 14.60% Common equity 448 345 Total capitalization 100\$ Average balance of Account 107 231 113 pluss Account 120.1 $\frac{3}{4}$) + d $\left(\frac{0}{0.000}\right)$ $\left(1-\frac{3}{4}\right)$ 2. Gress Rate for borrowed funds = $p(\frac{p}{p+p+c}) + c(\frac{c}{p+p+c})$ 3. Rate for other funda 4.83%

If fate shall be the rate granted in the last rate precoeding. If such is not available, the average rate

8.66% Per Florida Public Service

Commission Order 6640 dated

April 28, 1975.

Annual Report of FLORIDA POWER CORPORATION Year Ended December 31, 1980

(Continued from 428)

General Administrative Capitalized

General Administrative Capitalized represents the incremental salaries and expenses of general office employees whose duties are directly attributable to construction. The costs are charged directly to separate work orders, Construction Work in Progress, Account 107, and allocated monthly to open construction work orders. The allocation to open projects is determined by the percentage of General Administrative capitalized monthly charges to the monthly Construction Work in Progress charges.

Amount Capitalized \$511 152

Engineering Services

Includes amounts paid to other companies, firms, or individuals for specialized engineering services and assistance which are charged directly to construction work orders.

Amount Capitalized \$1 966 204

Allowance for Funds Used During Construction

Florida Public Service Commission Rate Order No. 6794 (effective September 1, 1975) set the annual AFUDC rate at 8.66% and includes Construction Work in Progress (CWIP) of \$106,253,880 in the allowed rate base. As a result of this order, the effective monthly rate is computed using the following formula:

$$A = \frac{TB - J}{TB} X \frac{R}{12}$$

Where:

A = Monthly Effective AFUDC Rate

J = Jurisdictional Allowable CWIP in the Rate Base

TB = Total AFUDC Base

R = Annual AFUDC Rate (gross)

The effective rate is applied monthly to the beginning month's balance plus one-half of the prior month's charges - adjusted for AFUDC and contract retainage. Work orders requiring less than one month to complete, blankets, and certain other minor work orders are not subject to AFUDC. AFUDC computed in nuclear fuel is at an annual rate of 8.66%. The computation ends on the in-service date. This date is assumed to be the 15th day of the month for projects less than \$10,000,000.

Amount Capitalized \$1 415 616

DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Accounts 403, 404, 405) (Except Amortization of Acquisition Adjustments)

- l. Report in section A for the year amounts of; depreciation expense (account 403) according to plant functional classifications and depreciation expense in total only applicable to common plant allocated to the electric department, amortization of limited-term electric plant (account 404) amortization of other electric plant (account 405).
- 2. Report in section B the rates used to compute amortization charges for electric plant (accounts 404 and 405). State the basis used to compute the charges and whether any changes has been made in the basis or rates used from the preceding report year.
- 3. Complete reporting of all available information called for in section C shall be made every fifth year beginning with report year 1971, with only changes to columns (c) through (g) from the preceding complete report to be reported annually.

Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of section C the type of plant included in any subaccounts used.

in column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional classifications and showing a composite total. Indicate at the bottom of section C the manner in which column (b) balances are obtained. If average balances, state the method of averaging used.

For columns (c), (d) and (e) report available information for each plant subaccount, account or functional classification listed in column (a). If plant mortality studies are prepared to assist in estimating average service lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant.

if composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.

4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.

MONTHLY PEAKS AND OUTPUT

1. Report hereunder the information called for pertaining to simultane-

1. Report hereunder the information called for pertaining to simultaneous peaks established monthly (in kilowatts) and monthly output (in kilowatt-hours) for the combined sources of electric energy of respondent.

2. Monthly peak col. (b) should be respondent's maximum kw. load as measured by the sum of its coincidental net generation and purchases plus or minus net interchange, minus temporary deliveries (not interchange) of emergency power to another system. Monthly peak including such emergency deliveries should be shown in a footnote with a brief explanation as to the nature of the emergency.*

3. State type of monthly peak reading (instantaneous 15, 30, or 60 min-

utes integrated).

4. Monthly output should be the sum of respondent's net generation for load and purchases plus or minus net interchange and plus or minus net transmission or wheeling. Total for the year should agree with line

If above.
 If the respondent has two or more power systems not physically connected, the information called for below should be furnished for each

System

^{*} In some cases there may be situations of commingling of purchases and exchanges and "wheeling," also of direct deliveries by the supplier to customers of the reporting utility wherein segregation of kw demand for determination of peaks as specified by this schedule may be unavailable. In these cases peaks may be reported which include these intermingled transactions. An

explanatory note, however, should be furnished, which indicates, among other things, the relative significance of the deviation from basis otherwise appli-cable. If the individual kw amounts of such totals are needed for billing under separate rate schedules and are estimated, give the amount and basis

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Picnts)

- 1. Large plants for the purpose of this schedule are steam plants of 25,000 km or more of installed capacity (name plate rating). Include gas-turbine and internal combustion plants of 10,000 km and more in this schedule. Include nuclear plants.

 2. If any plant is leased or operated as a joint facility, indicate such facts by the use of esterisks and footnotes.

 3. If net peak demand for 60 minutes is not available, give that which is available, specifying period.

 4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plant.
- able to each plant.
- 5. If gas is used and purchased on a therm basis, the B.t.u. content of the gas should be given and the quantity of fuel burned converted to M cu. ft.

 6. Quantities of fuel burned (line 38) and average coet per unit of fuel burned (line 41) should be consistent with charges to expense accounts 501 and 547 (line 42) as shown on line 21.

 7. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

 8. The items under cost of plant represents accounts or combinatione of accounts prescribed by the Uniform System of Accounts. Production expenses do not include Purchased Power, System Control and Load Dis-

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Picnis)

1. Large plants for the purpose of this schedule are stean plants of 25,000 km or more of installed capacity (asee plats rating). Include gas-turbine and internal conduction plants of 10,000 km and more in this schedule. Include nuclear plants.

2. If any plant is leased or operated as a joint facility, indicate such facts by the use of asterisks and feetnetee.

3. If not peak domand for 60 minutes is not available, give that which is available, specifying period.

4. If a group of employees attends core than one generating plant, report on line 11 the approximate average number of employees assignable to each plant.

5. If gas is used and purchased on a there basis, the 8.t.u. content of the gas should be given and the quantity of fuel burned converted to 8 cu. ft.
6. Quantities of fuel burned (line 38) and average cost per unit of fuel burned (line 41) should be consistent with charges to empense accounts 501 and 547 (line 42) as shown on line 21.
7. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.
8. The items under cost of plant represents accounts or continuing.

8. The items under cost of plant represents accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production expenses do not include Purchased Power, System Control and Load Dis-

•	le to each plant.						**

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Large plants for the purpose of this schedule are stean plants of 25,000 km or more of installed capacity (name plate rating). Include gas-turbine and internal combustion plants of 10,000 km and more in this schedule. Include nuclear plants.

2. If any plant is leased or operated as a joint facility, indicate much facts by the use of asterisks and factories.

3. If act peak demand for 60 minutes is not available, give that which is available, apacifying period.

4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plant.

5. If gas is used and purchased on a there basis, the 8-t.u. content of the gas should be given and the quantity of fuel burned converted to 8 cu. ft.
6. Quantities of fuel burned (line 38) and average cost per unit of fuel burned (line 41) should be consistent with charges to expense accounts 501 and 547 (line 42) as shown on line 21.
7. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

6. The itemanufar cost of plant represents accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production expenses do not include Purchased Power, System Control and Load Dis-

L "	le te each plant.					processed Power, System Control and Load Dis-

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)

Average Annual Heat Rates and Corresponding Net Kwh Output for Most Efficient Generating Units

- 1. Report only the most efficient generating units (not to exceed 10 in number) which were operated at annual capacity factors? of 50 percent or higher. List only unit type installations, i.e., single boiler serving one turbine-generator. It is not necessary to report single unit plants in this schedule. Do not include non-condensing or automatic extraction-type turbine units operated for processing steam and electric power generation.
- •2. Report annual system heat rate for total conventional steam-power generation and corresponding net generation (Line 11).
- All heat rates on this page and also on page 432/432a should be computed on the basis of total fuel burned including burner lighting and banking fuel.

- * Total System Steam Plants includes Gas Turbine Plants per Instruction No. 1, Page 432.
- ** Crystal River Unit 3 included in spite of capacity factor below 50% because of long refueling outage.
 - (Note 1) All combustion gas turbine units generator nameplate ratings rerated to conform to ANSI C50.14 Code for air-coooled electric generators.
 - (Note 2) Cost of plant reported on Pages 432, 432-a, 432-b does not include \$190,154 marine equipment used for various plants and \$12,767,068 for Anclote-Bartow Pipeline.

**FOOTNOTES TO PRECEDING PAGES

- 1. Winter. November 1 April 30. Ambient 40°F.
 - Ambient 90°F. Summer. May 1 - October 31.
- 2. Winter and Summer performance rating is according to Southeastern Electric Reliability Council Guideline No. 2 for uniform generator ratings for reporting published by SERC Technical Advisory Committee and approved by the Executive Board. November, 1979.
- 3. ANSI C50.14 Code for Air-Cooled Electric Generators at Sea Level, 59°F, and Base Load.
- 4. Crystal River No. 3 (Nuclear) is owned jointly; Florida Power Corporation 90%, participating utilities 10%.
- 5. Suwannee Gas Turbines, Commercial Operations P-1, 10/27/80; P-2, 10/28/80; P-3, 10/29/80.

HYDROELECTRIC GENERATING PLANT STATISTICS (Large Plants)

- 1. Large plants are hydro plants of 10,000 kw. or more of installed capacity (name plate ratings).
- 3. If net peak demand for 60 minutes is not available, give that which is available, specifying period.
- 2. If any plant is leased, operated under a license from the Federal Power Commission, or operated as a joint facility, indicate such facts by the use of asterisks and footnotes. If licensed project give project number.
- 4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plant.

- 11	censed project give project number.	·

PUMPED STORAGE GENERATING PLANT STATISTICS (Large Plants) (Continued)

5. The items under cost of plant represent accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses classified as "Other Power Supply Expenses."

6. Pumping energy (line 10) is that energy measured as input to the plant for numping purposes.

put to the plant for pumping purposes.

7. Include in this schedule (line 35) the cost of energy used in pumping into the storage reservoir. When this item cannot be accurately computed, leave lines 35, 36 and 37 blank and

describe at the bottom of the schedule the company's principal sources of pumping power, the estimated amounts of energy from each station or other source that individually provides more than 10 percent of the total energy used for pumping, and production expenses per net kwh as reported herein for each source described. Stations and other sources which individually provide less than 10 percent of total pumping energy may be grouped. If contracts are made with others to purchase power for pumping, the supplier, contract number and date of contract should be stated.

GENERATING PLANT STATISTICS (Small Plants)

1. Small generating plants are steam plants of less than 25,000 kw.; internal combustion and gas turbine-plants, conventional hydro plants and pumped storage plants of less than 10,000 kw. installed capacity (name plate rating).

2. Designate any plant leased from others, operated under a license from the Federal Power Commission, or op-

erated as a joint facility, and give a concise statement of the facts in a footnote. If licensed project give project number in footnote.

3. List plants appropriately under subheadings for steam, hydro, nuclear, internal combustion and gas turbine plants. For nuclear, see instruction 10, page 432a.

4. If net peak demand for 60 minutes is not available,

give that which is available, specifying period.

5. If any plant is equipped with combinations of steam, should be reported as a separate plant. However, if the exhaust heat from the gas turbine is utilized in a steam turbine regenerative feed water cycle, or for preheated combustion air in a boiler, report as one plant.

STEAM-ELECTRIC GENERATING PLANTS

- t. Include in this schedule steam-electric plants of 25,000 kw. (name plate rating) or more of installed capacity.
- 2. Report the information called for concerning generating plants and equipment at end of year. Show unit type installation, boiler and turbine-generator, on same line.
- 3. Exclude from this schedule, plant, the book cost of which is included in Account 121, Nonutility Property.
 - 4. Designate any generating plant or portion thereof for

which the respondent is not the sole owner. If such property is leased from another company give name of lessor, date and term of lease, and annual rent. For any generating plant, other than a leased plant or portion thereof for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars as to such matters as percent ownership by respondent, name of co-owner, basis of sharing output, expenses or revenues, and how

TRANSMISSION LINE STATISTICS

- 1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Transmission lines below these voltages may be reported in group totals only for each voltage.
- 2. Transmission lines include such lines as come within the definition of transmission system plant as given in the Uniform System of Accounts. Substation costs and expenses are not to be included in the costs and expenses reported in this schedule.
- Data may be reported by individual lines for all voltages if so required by a State commission.
- Exclude from this schedule any transmission lines for which plant costs are included in Account 121. Nonutility Properts.
- 5. The type of supporting structure reported in column (e) should indicate whether (1) single pole, wood or steel, (2) M-frame, wood or steel poles, (3) tower; or (4) underground construction. If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines in the schedule. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.

^{**} In the case of underground lines, report circuit miles

TRANSMISSION LINE STATISTICS (Continued)

- 6. Report in columns (f) and (g) the total pole miles of each transmission line. It is intended that column (f) shall show the pole miles of line on structures the cost of which is reported for the line designated, and, conversely, that column (g) shall show the pole miles of line on structures the cost of which is reported for another line. Pole miles of line on leased or partly owned structures shall be reported in column (g) with appropriate designation and footnote explaining the basis of such occupancy and stating whether expenses with respect to such structures are included in the expenses reported for the line designated.
- 7. Transmission line structures which also support a line of lower voltage should be included with the line of higher voltage. Designate if such is not the case with respect to any transmission line reported in this schedule. Transmission line structures which also support a line of the same voltage should be included with the line most appropriate. The pole miles of such structures for the line in which included should be reported in column (f) and for the other line in column (g).
- 8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of lease, and amount of rent for year. For any transmission line, other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars as to such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the line, and how the expenses borne by the respondent are accounted for and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
- 9. Designate any transmission line leased to another company and give name of lessee, date and terms of lease, annual rent for year and how determined. Specify whether lessee is an associated company.
- 10. The plant cost figures called for in columns (j) to (l) should be the book cost at end of year.

TRANSMISSION LINE STATISTICS

- 1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Transmission lines below these voltages may be reported in group totals only for each voltage.
- 2. Transmission lines include such lines as come within the definition of transmission system plant as given in the Uniform System of Accounts. Substation costs and expenses are not to be included in the costs and expenses reported in this schedule.
- 3. Data may be reported by individual lines for all voltages if so required by a State commission.
- 4. Exclude from this schedule any transmission lines for which plant costs are included in Account 121. Nonutility Property
- 5. The type of supporting structure reported in column (c) should indicate whether (1) single pole, wood or steel, (2) Heframe, wood or steel poles; (3) tower; or (4) underground construction. If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines in the schedule. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.

TRANSMISSION LINE STATISTICS (Continued)

- b. Report in columns (f) and (g) the total pole miles of each transmission line. It is intended that column (f) shall show the pole miles of line on structures the cost of which is reported for the line designated, and, conversely, that column (g) shall show the pole miles of line on structures the cost of which is reported for another line. Pole miles of line on leased or partly owned structures shall be reported in column (g) with appropriate designation and footnote explaining the basis of such occupancy and stating whether expenses with respect to such structures are included in the expenses reported for the line designated.
- 7. Transmission line structures which also support a line of lower voltage should be included with the line of higher voltage. Designate if such is not the case with respect to any transmission line reported in this schedule. Transmission line structures which also support a line of the same voltage should be included with the line most appropriate. The pole miles of such structures for the line in which included should be reported in column (f) and for the other line in column (g).
- 8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of lease, and amount of rent for year. For any transmission line, other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, lurinish a succinct statement explaining the arrangement and giving particulars as to such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the line, and how the expenses borne by the respondent are accounted for and accounts affected. Specific whether lessor, co-owner, or other party is an associated company
- 9. Designate any transmission line leased to another company and give name of lessee, date and terms of lease, annual rent for year and how determined. Specify whether lessee is an associated company.
- 10. The plant cost figures called for in columns (j) to (l) should be the book cost at end of year.

TRANSMISSION LINES ADDED DURING YEAR

- 1 Report below the information called for concerning transmission lines added or altered during the year. It is not necessary, however, to report minor revisions of lines.
- 2. Provide separate subheadings for overhead and underground construction and show each transmission line sepa-

rately. If actual costs of completed construction are not readily available for reporting in columns (I) to (o), it is permissible to report in these columns, the estimated final completion costs. Designate, however, if estimated amounts are reported. Include costs of Clearing Land and Rights-of-

Way, and Roads and Trails, in column (I) with appropriate footnote, and costs of Underground Conduit in column (m).

3. If design voltage differs from operating voltage indicate such fact by footnote; also where line is other than 60 cycle, 3 phase indicate such other characteristic.

TRANSMISSION LINES ADDED DURING YEAR

- 1. Report below the information called for concerning transmission lines added or altered during the year. It is not necessary, however, to report minor revisions of lines.
- 2. Provide separate subheadings for overhead and underground construction and show each transmission line sepa-

rately. If actual costs of completed construction are not readily available for reporting in columns (1) to (0), it is permissible to report in these columns, the estimated final completion costs. Designate, however, if estimated amounts are reported. Include costs of Clearing Land and Rights-ofWay, and Roads and Trails, in column (I) with appropriate footnote, and costs of Underground Conduit in column (m).

3. If design voltage differs from operating voltage indicate such fact by footnote; also where line is other than 60 cycle, 3 phase indicate such other characteristic.

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.

2. Substations which serve but one industrial or street railway customer should not be listed hereunder.

3. Substations with capacities of less than 10,000 kva, except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.

4. Indicate in col. (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the schedule summarize according to function the capacities reported for the individual stations in column (f).

5. Show in cols. (i), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.

6. Designate substations or major items of equipment leased from others, joinfly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

ELECTRIC DISTRIBUTION METERS AND LINE TRANSFORMERS

- 1. Report below the information called for concerning distribution watt-hour meters and line transformers.
- Watt-hour demand distribution meters should be included below but external demand meters should not be included.
- 3. Show in a footnote the number of distribution watt-hour meters or line transformers held by the respondent under lease from others, jointly owned with others, or held otherwise than by reason of sole ownership by the respondent. If 500 or more

meters or line transformers are held under a lease, give name of lessor, date and period of lease, and annual rent. If 500 or more meters or line transformers are held other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of accounting for expenses between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

			LINE TRAN	ISFORMERS

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES

- 1. Describe and show below costs incurred and accounts charged during the year for technological research, development, and demonstration projects initiated, continued or concluded during the year. Report also support to others during the year for jointly-sponsored projects. (Recipient must be identified regardless of affiliation.) For any research, development, or demonstration work carried on by the respondent in which there is a sharing of costs with others, show separately the respondent's cost for the year and cost chargeable to others. (See definition of research, development, and demonstration in Uniform System of Accounts.
- 2. Indicate in column (a) the applicable classification, as shown below: list in column (b) all R, D & D items performed internally and those items performed outside the company costing \$5,000 or more, briefly describing the specific area of research, development, and demonstration (such as safety, corrosion con-

troi, poliution, automation, measurement, insulation, type of appliance, etc.). Items under \$5,000 may be grouped by classifications provided that the number of items so grouped is indicated. Under Other, A. (6) and B. (4) Items should be classified by type of research, development, and demonstration activity.

ENVIRONMENTAL PROTECTION FACILITIES

- 1. For purposes of this schedule, environmental protection facilities shall be defined as any building, structure, equipment, facility or improvement designed and constructed solely for control, reduction, prevention or abatement of discharges or releases into the environment of gaseous, liquid or solid substances, heat, noise or for the control, reduction, prevention or abatement of any other adverse impact of an activity on the environment.
- 2. There shall be reported herein the difference in cost of facilities installed for environmental considerations over the cost of alternative facilities wich would otherwise be used without environmental considerations. The basis for determining costs without environmental considerations will be the best engineering design achievable without environmental restrictions. It is not intended that special design studies be made for purposes of this response. The best engineering judgement shall suffice where direct comparisons are not available.

These differences in costs would include the costs or estimated costs of environmental protection_facilities in service, constructed or modified in connection with the production, transmission and distribution of electrical energy and shall be reported herein for all such environmental facilities placed in service on or after January 1, 1969, so long as it is readily determinable that such facilities were constructed or modified for environmental rather than operational purposes. Similar expenditures for environmental plant included in construction work in progress shall also be reported herein. The cost of facilities may be estimated when the original cost is not available or facilities are jointly owned with another utility, provided the respondent explains the basis of such estimations.

Examples of these costs would include a portion of the costs of tall smokestacks, underground lines and landscaped substations. Use the space below to explain such costs.

- 3. The cost of facilities included herein shall include an estimated portion of the cost of plant that is or will be used to provide power to operate associated environmental protection facilities. These costs may be estimated on a percentage of plant basis. Use the space provided to explain
- 4. All costs shall be reported under the major classifications provided below and include, but are not limited to, the items listed hereunders
- Air pollution control facilities:
 - 1. Scrubbers, precipitators, tall smokestacks, etc.
 - 2. Changes necessary to accommodate use of environmentally clean fuels such as low ash or low sulfur fuels including storage and handling equipment.
 - 3. Monitoring equipment
 - 4. Other

Annual Report of

- 8. Water pollution control facilities:
 - 1. Cooling towers, ponds, piping, pum-
 - 2. Waste water treatment equipment
 - 3. Sanitary waste disposal equipment
 - 4. Oil interceptors
 - 5. Sediment control facilities
 - 6. Monitoring equipment
 - 7. Other
- C. Solid waste disposal costs:
 - 1. Ash handling and disposal equipment
 - 2. Land
 - 3. Settling ponds
 - 4. Other
- D. Noise abatement equipments
 - 1. Structures
 - 2. Mufflers
 - 3. Sound proofing equipment
 - 4. Monitoring equipment
 - 5. Other
- E. Esthetic costs:
 - l. Architectural costs
 - 2. Towers
 - Undergrounding lines
 - 4. Landscaping
 - 5. Other
- F. Additional plant capacity necessary due to restricted output from existing facilities, or addition of pollution control facilities.
- G. Miscellaneous:
 - 1. Preparation of environmental reports
 - 2. Fish and wildlife plants included in Accounts 330, 331, 332 and 335.
 - 3. Parks and related facilities
 - 4. Other
- 5. In those instances when costs are com, of both actual supportable costs and est mates of costs, specify in column (g) th actual costs that are included in column (f)
- Construction work in progress relating to environmental facilities shall be reported at line 9.

NOTES:

- (1) Closed to capital but not identifiable by classification as of 12-31-80.
- (2) Net disqualified after reclassifications-does not qualify for certification.

ENVIRONMENTAL PROTECTION EXPENSES

- Show below expenses incurred in connection with the use of environmental protection facilities, the cost of which is reported on page 501. Where it is necessary that allocations and/or estimates of costs be made, state the basis or method used.
- The expenses shown below shall include the costs incurred due to the operation of environmental protection equipment, facilities, and programs.
- Expenses shall be reported under the subheadings listed below.
- 4. Under item 6 include the difference in costs of environmentally clean fuels as opposed to the alternative fuels that would otherwise be used and are available for use.
- 5. Item 7 shall include the cost of replacement power, purchased or generated, to compensate for the deficiency in output from existing plants due to the addition of pollu-

tion control equipment, use of alternate environmentally preferable fuels or environmental regulations of governmental bodies. Replacement power purchased shall be priced at the average system price of purchased power if the actual cost of such replacement power is not known. Internally generated replacement power shall be priced at the system average cost of power generated if the actual cost of specific replacement generation is not known.

- 6. Under item 8 include ad velorem and other taxes assessed directly on or directly relatable to environmental facilities. This item shall also include licensing and similar fees on such facilities.
- 7. In those instances where expenses are composed of both actual supportable data and estimates of costs, specify in column (c) the actual expenses that are included in column (b).

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Large plants for the purpose of this schedule are steam plants of 25,000 hw or more of installed capacity (none plants rating). Include gas-turbine and internal combustion plants of 10,000 kw and more in this schedule. Include nuclear plants.

2. If any plant is leased or operated as a joint facility, indicate such facts by the use of asterioks and feetnetse.

3. If and pack demand for 60 minutes is not available, give that which is available, specifying period.

4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plants.

able to each plant.

\$\text{NI SIMIISIUS (Large Pichts)}\$
5. If gis is used and purchased on a there basis, the 8.1.u. content of the gas should be given and the quantity of fuel burned converted to 8 cu. ft.
6. Quantities of fuel burned (line 38) and average cost per unit of fuel burned (line 41) should be consistent with charges to expense accounts 501 and 547 (line 42) as shown on line 21.
7. If more than one fuel is burned one plant furnish only the composite heat rate for all fuels burned.
6. The items under cost of plant represents accounts or combinations of accounts prescribed by the Uniform System of Accounts. Production empenses do not include Purchased Power, System Control and load Dio-
