VIA ELECTRONIC FILING

Adam J. Teitzman
Commission Clerk
Florida Public Service Commission
2540 Shumard Oak Boulevard
Tallahassee, Florida 32399-0850

Re: FPL's Annual Report; Undocketed

Mr. Teitzman:

Please find enclosed Florida Power and Light Company's Annual Report Forms as required by Rule 25-6.135(2) F.A.C. The documents include:

- Florida Power and Light Company's 2025 Diversification Report;
- A report from independent auditors, Deloitte & Touche LLP;
- NextEra Energy's 2025 Annual Report and Form 10-K filed with the Securities and Exchange Commission;

FPL's FERC Form 1 for the calendar year 2025 can be found at the following link:

https://elibrary.ferc.gov/eLibrary/filelist?accession_number=20260410-8017

Sincerely,

A handwritten signature in blue ink, appearing to read 'Amin A. Mohomed', is written over a light blue rectangular stamp.

Amin A. Mohomed
Vice President, Accounting and Controller

Enclosures

cc: Andrew Maurey, Director, FPSC Division of Accounting & Finance

Florida Power and Light Company
2025 Diversification Report

FLORIDA PUBLIC SERVICE COMMISSION SIGNATURE PAGE

I certify that I am the responsible accounting officer of

FLORIDA POWER & LIGHT COMPANY;

That I have examined the following report; that to the best of my knowledge, information, and belief, all statements of fact contained in the said report are true and the said report is a correct statement of the business and affairs of the above named respondent in respect to each and every matter set forth therein during the period from January 1, 2025 to December 31, 2025, inclusive.

I also certify that all affiliated transfer prices and affiliated cost allocations were determined consistent with the methods reported to this Commission on the appropriate forms included in this report.

I am aware that Section 837.06, Florida Statutes, provides:

Whoever knowingly makes a false statement in writing with the intent to mislead a public servant in the performance of his official duty shall be guilty of a misdemeanor of the second degree, punishable as provided in s. 775.082, s. 775.083 or s. 775.084.

April 30, 2026

Amin Mohamed

Name

Vice President Accounting and Controller

Title

Affiliation of Officers & Directors

Florida Power & Light Company
For the Year Ended December 31, 2025

For each of the officials named in Part 1 of the Executive Summary, list the principal occupation or business affiliation if other than listed in Part 1 of the Executive Summary and all affiliations or connections with any other business or financial organizations, firms, or partnerships. For purposes of this part, the official will be considered to have an affiliation with any business or financial organization, firm or partnership in which he is an officer, director, trustee, partner, or a person exercising similar functions.

Business Contracts with Officers, Directors and Affiliates

Florida Power & Light Company

For the Year Ended December 31, 2025

List all contracts, agreements, or other business arrangements* entered into during the calendar year (other than compensation-related to position with respondent) between the respondent and each officer and director listed in Part 1 of the Executive Summary. In addition, provide the same information with respect to professional services for each firm, partnership, or organization with which the officer or director is affiliated.

Note: * Business agreement, for this schedule, shall mean any oral or written business deal which binds the concerned parties for products or services during the reporting year or future years.

Name of Officer or Director	Name and Address of Affiliated Entity	Amount	Identification of Product or Service
No such contracts, agreements or other business arrangements to report.			
Note: The above listing excludes contributions, payments to educational institutions, hospitals and industry associations and other dues. See pages 454 through 463 for disclosure of diversification activity.			

**Reconciliation of Gross Operating Revenues
Annual Report versus Regulatory Assessment Fee Return**

Company: Florida Power & Light Company

For the YTD period ended December 31, 2025

			For the current year, reconcile the gross operating revenues as reported on Page 300 of this report with the gross operating revenues on the utility's regulatory assessment fee return. Explain and justify any differences between the reported gross operating revenues in column (h).							
	(a)		(b)	(c)	(d)		(e)	(f)	(g)	(h)
Line No.	Description		Gross Operating Revenues per Page 300	Interstate and Sales for Resale Adjustments	Adjusted Intrastate Gross Operating Revenues		Gross Operating Revenues per RAF Return	Interstate and Sales for Resale Adjustments	Adjusted Intrastate Gross Operating Revenues	Difference (d) - (g)
1	Total Sales to Ultimate Customers (440-446, 448)		\$16,718,452,685		\$16,718,452,685		\$16,718,452,685		\$16,718,452,685	\$0
2	Sales for Resale (447)		\$769,308,244	\$769,308,244	\$0		\$769,308,244	\$769,308,244	\$0	\$0
3	Total Sales of Electricity		\$17,487,760,929	\$769,308,244	\$16,718,452,685		\$17,487,760,929	\$769,308,244	\$16,718,452,685	\$0
4	Provision for Rate Refunds (449.1)		(\$8,795,811)	(\$772,892)	(\$8,022,919)		(\$8,795,811)	(\$772,892)	(\$8,022,919)	\$0
5	Total Net Sales of Electricity		\$17,478,965,118	\$768,535,352	\$16,710,429,766		\$17,478,965,118	\$768,535,352	\$16,710,429,766	\$0
6	Total Other Operating Revenues (450-456)		\$612,138,238	\$148,973,807	\$463,164,431		\$612,283,265	\$148,973,807	\$463,309,458	(\$145,027)
7	Other (Specify)									
8			\$0	\$0	\$0		\$0	\$0	\$0	\$0
9										
10	Total Gross Operating Revenues		\$18,091,103,356	\$917,509,160	\$17,173,594,197		\$18,091,248,383	\$917,509,160	\$17,173,739,224	(\$145,027)
Notes: The differences are due to:										
1) The Regulatory Assessment Fee (RAF) return is required to be filed on a consolidated basis, versus the requirement for the FERC Form 1 to be unconsolidated. Based on this, the following adjustments have been made: Revenues generated by FPL Services, LLC included in the RAF, but not in FF1 Page 300.										
			(145,027)

Analysis of Diversification Activity

New or Amended Contracts with Affiliated Companies

Florida Power & Light Company

For the Year Ended December 31, 2025

Provide a synopsis of each new or amended contract, agreement, or arrangement with affiliated companies for the purchase, lease, or sale of land, goods, or services (excluding tariffed items). The synopsis shall include, at a minimum, the terms, price, quantity, amount, and duration of the contracts.

Name of Affiliated Company (a)	Synopsis of Contract (b)
<i>Palms Insurance Company, Limited</i>	Palms Insurance Company, Limited provides insurance for FPL employees' workers' compensation liability up to policy limit of \$3,000,000 per accident or per employee. Premium for the term November 15, 2025 to November 15, 2026 was \$9,857,026. Workers' compensation and employer's liability coverage for certain FPL contractors is provided in excess of \$5,000,000 per accident or per contractor employee. Premium for the term November 15, 2025 to November 15, 2026 was \$1,129,097.
<i>Palms Insurance Company, Limited</i>	Palms Insurance Company, Limited insures the FPL fleet vehicles for third-party auto liability up to \$3,000,000 per occurrence in excess of a \$25,000 per accident retention for accidents prior to March 1, 2016 and a \$100,000 per accident retention occurring on or after March 1, 2016 through January 1, 2020. Beginning January 1, 2020, limit of liability is \$5,000,000 per occurrence, inclusive of defense costs. Premium for the term November 15, 2025 to November 15, 2026 was \$6,902,259.
<i>Palms Insurance Company, Limited</i>	Palms Insurance Company, Limited writes a builder's risk line for various projects under construction. The stand alone builder's all risk coverage has a 35% or \$70,000,000 liability up to \$200,000,000 per occurrence in excess of policy deductibles and 35% of sublimits. Payments are made 45 days after each policy quarter for projects enrolled into the builder's risk insurance property program. Premium paid through January 2026 relating to the term May 1, 2025 to May 1, 2026 is \$1,938,640.
<i>Palms Insurance Company, Limited</i>	Excess Liability Insurance was issued by Associated Electric & Gas Insurance Services (AEGIS) and Palms Insurance Company on a co-participation basis. Palms Insurance Company, Limited has a 35% share and AEGIS has a 65% share of the \$50,000,000 liability per occurrence, and \$100,000,000 per aggregate in excess of the primary liability program. Premium for the term November 15, 2025 to November 15, 2026 is \$2,944,815. Palms has an additional \$2,500,000 limit or 17% share of \$15,000,000 liability per occurrence, in excess of \$338,000,000. Premium for the term November 15, 2025 to November 15, 2026 is \$38,413.
<i>Palms Insurance Company, Limited</i>	Palms Insurance Company, Limited participates on a standalone builder's risk placement for an FPL office building project during construction. Palms Insurance Company holds a 7.5% share, equal to \$22,253,108, as part of the \$296,708,100 per occurrence limit, in excess of policy deductibles. Premium for the term November 18, 2024 to August 16, 2029 is \$236,945.
<i>NextEra Energy Inc.</i>	In past years, every time a subsidiary was added to or deleted from the consolidated income tax return, such subsidiary generally became a party to, or was deleted from, the Tax Allocation Agreement of NextEra Energy, Inc. (NEE) and subsidiaries. Therefore, any corporate structure changes noted on pages 454A-1 through 454A-26 would also be reflected in NEE's tax arrangement.

Analysis of Diversification Activity

New or Amended Contracts with Affiliated Companies

Florida Power & Light Company

For the Year Ended December 31, 2025

Provide a synopsis of each new or amended contract, agreement, or arrangement with affiliated companies for the purchase, lease, or sale of land, goods, or services (excluding tariffed items). The synopsis shall include, at a minimum, the terms, price, quantity, amount, and duration of the contracts.

Name of Affiliated Company (a)	Synopsis of Contract (b)
<i>GridLiance West LLC</i>	Effective July 2025, a Corporate Support Services Agreement was executed between NextEra Energy Resources, LLC, NextEra Energy Transmission, LLC, Lone Star Transmission, LLC, and several of their affiliates, including Florida Power & Light Company, and GridLiance West LLC. The agreement provides for the performance of corporate support services among affiliated companies. The agreement will expire on the 20th anniversary of the effective date and will be subject to automatic extensions for additional five-year periods from the initial expiration date. As consideration for performing support services hereunder, Florida Power & Light Company shall be paid in accordance with the terms of its Cost Allocation Manual.
<i>NextEra Energy Transmission Virginia, Inc.</i>	Effective December 23, 2025, a Corporate Support Services Agreement was executed between NextEra Energy Resources, LLC, NextEra Energy Transmission, LLC, NextEra Energy Transmission MidAtlantic, Inc., NextEra Energy Transmission New York, Inc., and several of their affiliates, including Florida Power & Light Company, and NextEra Energy Transmission Virginia, Inc. The agreement provides for the performance of corporate support services among affiliated companies. The agreement will expire on the 20th anniversary of the effective date and will be subject to automatic extensions for additional five-year periods from the initial expiration date. As consideration for performing support services hereunder, Florida Power & Light Company shall be paid in accordance with the terms of its Cost Allocation Manual.
<i>NextEra Energy Transmission MidAtlantic, Inc</i>	Effective December 23, 2025, an Amended and Restated Corporate Support Services Agreement was executed between NextEra Energy Resources, LLC, NextEra Energy Transmission, LLC, NextEra Energy Transmission New York, Inc., NextEra Energy Transmission MidAtlantic, Inc., and several of their affiliates, including Florida Power & Light Company. The agreement amends and restates a prior Corporate Support Services Agreement dated August 18, 2023. The agreement will expire on the 20th anniversary of the effective date and will be subject to automatic extensions for additional five-year periods from the initial expiration date. As consideration for performing support services hereunder, Florida Power & Light Company shall be paid in accordance with the terms of its Cost Allocation Manual.
<i>Paso Bronco, LLC</i>	On December 18, 2024, Florida Power & Light Company ("FPL") and Paso Bronco, LLC entered into an "Assignment Agreement" and executed a "Bill of Sale" pursuant to which Paso Bronco, LLC assigned to FPL its rights and interests under a Photovoltaic Module Supply Agreement dated April 26, 2024, as amended, with Runergy USA Trading LLC. Under the Assignment Agreement, Paso Bronco, LLC transferred 1.86547 MW DC of photovoltaic modules with a minimum wattage rating of 575W to FPL. In connection with the assignment, Paso Bronco, LLC conveyed all right, title, and interest in the photovoltaic modules to FPL pursuant to the Bill of Sale in exchange for payment of \$500,347.

New or Amended Contracts with Affiliated Companies

Florida Power & Light Company

For the Year Ended December 31, 2025

Provide a synopsis of each new or amended contract, agreement, or arrangement with affiliated companies for the purchase, lease, or sale of land, goods, or services (excluding tariffed items). The synopsis shall include, at a minimum, the terms, price, quantity, amount, and duration of the contracts.

Name of Affiliated Company (a)	Synopsis of Contract (b)
<i>Paso Bronco, LLC</i>	On February 20, 2025, Florida Power & Light Company (“FPL”) and Paso Bronco, LLC entered into an “Assignment Agreement” and executed a “Bill of Sale” pursuant to which Paso Bronco, LLC assigned to FPL its rights and interests under a Photovoltaic Module Supply Agreement dated August 28, 2019, as amended, with BYD America, LLC. Under the Assignment Agreement, Paso Bronco, LLC transferred 0.693 MW DC of photovoltaic modules with a minimum wattage rating of 330W to FPL. In connection with the assignment, Paso Bronco, LLC conveyed all right, title, and interest in the photovoltaic modules to FPL pursuant to the Bill of Sale in exchange for payment of \$220,920.
<i>NextEra Energy Constructors, LLC</i>	On June 30, 2025, Florida Power & Light Company (“FPL”) and NextEra Energy Constructors, LLC (“NEEC”) entered into an “Assignment Agreement” and executed a “Bill of Sale” pursuant to which NEEC assigned to FPL its rights and interests under a contract for the design, fabrication, and delivery of power conversion units dated July 28, 2023, as amended, with GE Grid Solutions, LLC. Under the Assignment Agreement, NEEC transferred one (1) power conversion unit with a nameplate rating of 4.5 MVA to FPL. In connection with the assignment, NEEC conveyed all right, title, and interest in the power conversion unit to FPL pursuant to the Bill of Sale in exchange for payment of \$221,465.
<i>NextEra Energy Constructors, LLC</i>	On August 7, 2025, Florida Power & Light Company (“FPL”) and NextEra Energy Constructors, LLC (“NEEC”) entered into an “Assignment Agreement” and executed a “Bill of Sale” pursuant to which FPL assigned to NEEC its rights and interests under a contract for the design, fabrication, and delivery of BESS power conversion units dated September 25, 2024, as amended, with GE Grid Solutions, LLC. Under the Assignment Agreement, FPL transferred one hundred forty-eight (148) power conversion units with a nameplate rating of 4.3 MVA to NEEC. In connection with the assignment, FPL conveyed all right, title, and interest in the power conversion units to NEEC pursuant to the Bill of Sale in exchange for payment of \$38,972,840.
<i>NextEra Energy Constructors, LLC</i>	On February 20, 2025, Florida Power & Light Company (“FPL”) and NextEra Energy Constructors, LLC (“NEEC”) entered into an “Assignment and Assumption Agreement” and executed a “Bill of Sale” pursuant to which NEEC assigned to FPL its rights and obligations under a Project Supply Agreement for Photovoltaic Modules dated August 8, 2023, as amended, with Trina Solar (U.S.) Inc. Under the Assignment and Assumption Agreement, NEEC transferred 0.02046 MW DC of photovoltaic modules with a minimum wattage rating of 660W to FPL. In connection with the assignment, NEEC conveyed all right, title, and interest in the photovoltaic modules to FPL pursuant to the Bill of Sale in exchange for payment of \$5,524.

New or Amended Contracts with Affiliated Companies

Florida Power & Light Company

For the Year Ended December 31, 2025

Provide a synopsis of each new or amended contract, agreement, or arrangement with affiliated companies for the purchase, lease, or sale of land, goods, or services (excluding tariffed items). The synopsis shall include, at a minimum, the terms, price, quantity, amount, and duration of the contracts.

Name of Affiliated Company (a)	Synopsis of Contract (b)
<i>NextEra Energy Constructors, LLC</i>	On August 8, 2024, Florida Power & Light Company (FPL) entered into eight separate Assignment and Assumption Agreements with NextEra Energy Constructors, LLC (NEC) and executed a Bill of Sale with each, pursuant to which six transformers were transferred to FPL for consideration of \$1,835,000 per unit, and two transformers were transferred for consideration of \$2,913,697 per unit. In connection with the transfers, FPL assumed all rights and obligations under the contracts originally entered into between NEC and a third party.
<i>NextEra Energy Constructors, LLC</i>	On August 13, 2025, Florida Power & Light Company (“FPL”) and NextEra Energy Constructors, LLC (“NEEC”) entered into an Amended and Restated Assignment and Assumption Agreement pursuant to which NEEC assigned to FPL its rights and obligations under certain purchase documents with third-party suppliers for Generator Step Up Transformers. In connection with the assignment, FPL assumed all rights, liabilities, and obligations under the assigned contracts and agreed to reimburse NEEC for amounts previously paid to the suppliers, for total consideration of \$17,326,096, in accordance with the terms of the agreement.
<i>NextEra Energy Constructors, LLC</i>	On August 8, 2025, Florida Power & Light Company (“FPL”) and NextEra Energy Constructors, LLC (“NEEC”) entered into an Assignment and Assumption Agreement pursuant to which NEEC assigned to FPL its rights and obligations under certain purchase documents with third-party suppliers for Generator Step Up Transformers. In connection with the assignment, FPL assumed all rights, liabilities, and obligations under the assigned contracts and agreed to reimburse NEEC for amounts previously paid to the suppliers, for total consideration of \$19,628,862, in accordance with the terms of the agreement.
<i>NextEra Energy Constructors, LLC</i>	On August 7, 2025, Florida Power & Light Company (“FPL”) and NextEra Energy Constructors, LLC (“NEEC”) entered into an Assignment and Assumption Agreement pursuant to which NEEC assigned to FPL its rights and obligations under certain purchase documents with third-party suppliers for Generator Step Up Transformers.. In connection with the assignment, FPL assumed all rights, liabilities, and obligations under the assigned contracts and agreed to reimburse NEEC for amounts previously paid to the suppliers, for total consideration of \$8,048,500, in accordance with the terms of the agreement.
<i>NextEra Energy Constructors, LLC</i>	On February 16, 2024, Florida Power & Light Company (“FPL”) and NextEra Energy Constructors, LLC (“NEEC”) entered into an “Assignment and Assumption Agreement” and executed a “Bill of Sale” pursuant to which NEEC assigned to FPL its rights and obligations under a Project Supply Agreement for Photovoltaic Modules dated July 17, 2020, with Trina Solar (U.S.), Inc. Under the Assignment and Assumption Agreement, NEEC transferred 0.6286 MW DC of photovoltaic modules with a minimum wattage rating of 400W to FPL. In connection with the assignment, NEEC conveyed all right, title, and interest in the photovoltaic modules to FPL pursuant to the Bill of Sale in exchange for payment of \$226,800.

Name of Affiliated Company (a)	Synopsis of Contract (b)
<i>NextEra Energy Constructors, LLC</i>	On December 3, 2025, Florida Power & Light Company ("FPL") and NextEra Energy Constructors, LLC ("NEEC") entered into an "Assignment Agreement" and executed a "Bill of Sale" pursuant to which NEEC assigned to FPL its rights and obligations under a Project Supply Agreement for Photovoltaic Modules dated April 23, 2023, with BYD America, LLC. Under the Assignment Agreement, NEEC transferred 1.3299 MW DC of photovoltaic modules with a minimum wattage rating of 660W to FPL. In connection with the assignment, NEEC conveyed all right, title, and interest in the photovoltaic modules to FPL pursuant to the Bill of Sale in exchange for payment of \$373,701.90.
<i>NextEra Energy Constructors, LLC</i>	On January 3, 2024, Florida Power & Light Company ("FPL") and NextEra Energy Constructors, LLC ("NEEC") entered into an "Assignment and Assumption Agreement" and executed a "Bill of Sale" pursuant to which NEEC assigned to FPL its rights and obligations under a Project Supply Agreement for Photovoltaic Modules dated July 17, 2020, with Trina Solar (U.S.), Inc. Under the Assignment and Assumption Agreement, NEEC transferred 0.1936 MW DC of photovoltaic modules with a minimum wattage rating of 395W and 0.3080 MW DC of photovoltaic modules with a minimum wattage rating of 400W to FPL. In connection with the assignment, NEEC conveyed all right, title, and interest in the photovoltaic modules to FPL pursuant to the Bill of Sale in exchange for payment of \$180,558.
<i>NextCity Networks, LLC</i>	On July 31, 2025, pursuant to a previously disclosed Master Conduit Sales Agreement, Florida Power & Light Company ("FPL") issued an installation request to NextCity Networks, LLC for the construction and installation of conduit systems. In accordance with the applicable installation request and price quote, NextCity Networks, LLC constructed and installed the conduit systems. Upon execution of the related Bill of Sale, title to the conduit systems transferred to FPL, and FPL remitted payment of \$1,190,237 for all final amounts due under the applicable documents.
<i>NextCity Networks, LLC</i>	On October 27, 2025, pursuant to a previously disclosed Master Conduit Sales Agreement, Florida Power & Light Company ("FPL") issued an installation request to NextCity Networks, LLC for the construction and installation of a conduit system. In accordance with the applicable Purchase Order, NextCity Networks, LLC provided a price quote and completed construction of the conduit system. Upon completion of construction, title to the conduit system transferred to FPL, and FPL remitted payment of \$2,196,541 for all final amounts due under the Purchase Order.

Florida Power & Light Company
For the Year Ended December 31, 2025

Provide a synopsis of each new or amended contract, agreement, or arrangement with affiliated companies for the purchase, lease, or sale of land, goods, or services (excluding tariffed items). The synopsis shall include, at a minimum, the terms, price, quantity, amount, and duration of the contracts.

Name of Affiliated Company (a)	Synopsis of Contract (b)
<i>NextEra Energy, Inc., NextEra Energy Capital Holdings, Inc., Florida Power & Light Company, XPLR Infrastructure Operating Partners, LP, Northern Colorado Holdings, LLC, Autumn Shores, LLC, Cutler Brothers Funding, LLC, Cutler Brothers Holding, LLC, ESI Vansycle Partners, L.P., FPL Energy North Dakota, LLC, FPL Energy South Dakota, LLC, Horse Ridge TE Holdings, LLC, Kinderwood Wind, LLC, Magnolia Waves, LLC, Marble Ridge, LLC, NextEra Energy Qualified Opportunity Zone Business III, LLC, Nitro Renewables Holdings, LLC, Palmwood Wind Holdings, LLC, Peach Grove Funding, LLC, Peach Grove Holding, LLC, Renewable Portfolio Holdings, LLC, Roadrunner La Casa Wind Holdings, LLC, Silver Skyline, LLC, Silver Skyline Funding, LLC, Sterling Wind Holdings, LLC, Topaz Wind Holdings, LLC, Trailblazer Wind Holdings, LLC, Winters Edge Funding, LLC</i>	Effective October 18, 2024, Florida Power & Light Company entered into an amended and restated Payment Direction and Nominee/Agency Agreement with several affiliated entities. Under certain sections of the Internal Revenue Code of 1986, companies in connection with the operation of certain renewable energy and infrastructure projects may be entitled to receive energy tax credits. NextEra Energy Capital Holdings, Inc. (“NEECH”) has entered into agreements, and will from time to time enter into agreements, for the sale of such tax credits to various buyers, including on behalf of parties other than NEECH. NEECH may, as a matter of administrative convenience, receive amounts related to the sale of tax credits as a nominee for and on behalf of the parties to this agreement, including Florida Power & Light Company. The parties agree that any such payments received by NEECH will be treated as received by the party that generated the tax credits for all applicable legal, tax, and financial accounting purposes. The agreement amends and restates a prior payment direction agreement and does not create a partnership or joint venture among the parties.

ANALYSIS OF DIVERSIFICATION ACTIVITY
Summary of Affiliated Transfers and Cost Allocations

FLORIDA POWER & LIGHT COMPANY
For the Year Ended December 31, 2025

Name of Affiliate (a)	Type of Service and/or Name of Product (b)	Relevant Contract or Agreement and Effective Date (c)	Total Charge for Year		
			"P" or "S" (d)	Account Number (e)	Dollar Amount (f)

Footnotes and General Comments:

Note 1: Services provided by FPL primarily include accounting, financial, consulting, human resources systems and programs, education and training, land management, legal, payroll, management and administrative, computer services, printing and duplicating, physical facilities, software maintenance and license fees.

Note 2: Services direct charged to affiliates are recorded in FERC account 146 (Accounts Receivable from Associated Companies). In FPL records, activity is netted at the GAAP account level before the balances are translated to FERC accounts, therefore the FERC account offset to account 146 is not separately identifiable.

Note 3: Column (c) Relevant Contract or Agreement and Effective Date - all activity between FPL and its affiliates is in accordance with FPL's Cost Allocation Manual (CAM)

Note 4: Column (c) Relevant Contract or Agreement and Effective Date - all activity between FPL and LoneStar Transmission LLC is governed by a Corporate Services Agreement dated 5/15/2003, which is in accordance with FPL's Cost Allocation Manual (CAM)

Note 5: Column (c) Relevant Contract or Agreement and Effective Date - all activity between FPL and Trans Bay Cable LLC is governed by a Corporate Services Agreement dated 10/30/2020, which is in accordance with FPL's Cost Allocation Manual (CAM)

Note 6: Column (c) Relevant Contract or Agreement and Effective Date - all activity between FPL and NextEra Energy Transmission New York Inc is governed by a Corporate Services Agreement dated 10/30/2021, which is in accordance with FPL's Cost Allocation Manual (CAM)

Note 7: Column (c) Relevant Contract or Agreement and Effective Date - all activity between FPL and NextEra Energy Transmission Southwest LLC is governed by a Corporate Services Agreement dated 1/5/2021, which is in accordance with FPL's Cost Allocation Manual (CAM)

Note 8: Column (c) Relevant Contract or Agreement and Effective Date - all activity between FPL and Gridliance West, LLC is governed by a Corporate Services Agreement dated 7/18/2025, which is in accordance with FPL's Cost Allocation Manual (CAM)

Note 9: Column (c) Relevant Contract or Agreement and Effective Date - all activity between FPL andNextEra Energy Transmission MidAtlantic, Inc. is governed by a Corporate Services Agreement dated 12/17/2025, which is in accordance with FPL's Cost Allocation Manual (CAM)

Number of Electric Department Employees

FLORIDA POWER & LIGHT COMPANY

For the Year Ended December 31, 2025

1. The data on number of employees should be reported for the payroll period ending nearest to October 31, or any payroll period ending 60 days before or after October 31.
2. If the respondent's payroll for the reporting period includes any special construction personnel, include such employees on line 3, and show the number of such special construction employees in a footnote.
3. The number of employees assignable to the electric department from joint functions of combination utilities may be determined by estimate, on the basis of employee equivalents. Show the estimated number of equivalent employees attributed to the electric department from joint functions.

1. Payroll Period Ended (Date)	12/31/2025
2. Total Regular Full-Time Employees	9,129
3. Total Part-Time and Temporary Employees	58
4. Total Employees	9,187

Details

Note: The above numbers do not include temporary employees to remain consistent with the company's 10-K filing.

Particulars Concerning Certain Income Deductions and Interest Charges Accounts

Florida Power & Light Company

For the Year Ended December 31, 2025

Report the information specified below, in the order given, for the respective income deduction and interest charges accounts. Provide a subheading for each account and a total for the account. Additional columns may be added if deemed appropriate with respect to any account.

(a) Miscellaneous Amortization (Account 425) -- Describe the nature of items included in this account, the contra account charged, the total of amortization charges for the year, and the period of amortization.

(b) Miscellaneous Income Deductions -- Report the nature, payee, and amount of other income deductions for the year as required by Accounts 426.1, Donations; 426.2, Life Insurance; 426.3, Penalties; 426.4, Expenditures for Certain Civic, Political and related Activities; and 426.5, Other Deductions, of the Uniform System of Accounts. Amounts of less than 5% of each account total for the year (or \$1,000, whichever is greater) may be grouped by classes within the above accounts.

(c) Interest on Debt to Associated Companies (Account 430) -- For each associated company to which interest on debt was incurred during the year, indicate the amount and interest rate respectively for (a) advances on notes, (b) advances on open account, (c) notes payable, (d) accounts payable, and (e) other debt, and total interest. Explain the nature of other debt on which interest was incurred during the year.

(d) Other Interest Expense (Account 431) -- Report particulars (details) including the amount and interest rate for other interest charges incurred during the year.

Item	Amount
(a) Miscellaneous Amortization - Account 425	-
(b) Miscellaneous Income Deductions - Account 426:	
Donations - Account 426.1	
FPL Foundation	15,000,000

INDEPENDENT AUDITOR'S REPORT

Florida Power & Light Company
700 Universe Blvd.
Juno Beach, FL

Opinion

We have audited the financial statements of Florida Power & Light Company ("FPL" or the "Company"), which comprise the balance sheet – regulatory basis as of December 31, 2025, and the related statements of income – regulatory basis, cash flows – regulatory basis, and retained earnings – regulatory basis for the year then ended, included on pages 110 through 123 of the accompanying Federal Energy Regulatory Commission Form 1, and the related notes to the financial statements (the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the assets, liabilities, and proprietary capital of the Company as of December 31, 2025, and the results of its operations and its cash flows for the year then ended in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter - Basis of Accounting

As discussed in the Introduction to the financial statements, these financial statements were prepared in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a basis of accounting other than accounting principles generally accepted in the United States of America. As a result, the financial statements may not be suitable for another purpose. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Restriction on Use

This report is intended solely for the information and use of the board of directors and management of the Company and for filing with the Federal Energy Regulatory Commission and is not intended to be and should not be used by anyone other than these specified parties.

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-K

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended **December 31, 2025**

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number	Exact name of registrants as specified in their charters, address of principal executive offices and registrants' telephone number	IRS Employer Identification Number
1-8841	NEXTERA ENERGY, INC.	59-2449419
2-27612	FLORIDA POWER & LIGHT COMPANY	59-0247775
	700 Universe Boulevard Juno Beach, Florida 33408 (561) 694-4000	

State or other jurisdiction of incorporation or organization: Florida

Securities registered pursuant to Section 12(b) of the Act:

Registrants	Title of each class	Trading Symbol(s)	Name of each exchange on which registered
NextEra Energy, Inc.	Common Stock, \$0.01 Par Value	NEE	New York Stock Exchange
	7.299% Corporate Units	NEE.PRS	New York Stock Exchange
	7.234% Corporate Units	NEE.PRT	New York Stock Exchange
Florida Power & Light Company	None		

Indicate by check mark if the registrants are well-known seasoned issuers, as defined in Rule 405 of the Securities Act of 1933.

NextEra Energy, Inc. Yes ☒ No ☐

Florida Power & Light Company Yes ☒ No ☐

Indicate by check mark if the registrants are not required to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934.

NextEra Energy, Inc. Yes ☐ No ☒

Florida Power & Light Company Yes ☐ No ☒

Indicate by check mark whether the registrants (1) have filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) have been subject to such filing requirements for the past 90 days.

NextEra Energy, Inc. Yes ☒ No ☐

Florida Power & Light Company Yes ☒ No ☐

Indicate by check mark whether the registrants have submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months.

NextEra Energy, Inc. Yes ☒ No ☐

Florida Power & Light Company Yes ☒ No ☐

Indicate by check mark whether the registrants are a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company.

NextEra Energy, Inc. Large Accelerated Filer ☒ Accelerated Filer ☐ Non-Accelerated Filer ☐ Smaller Reporting Company ☐ Emerging Growth Company ☐
Florida Power & Light Company Large Accelerated Filer ☐ Accelerated Filer ☐ Non-Accelerated Filer ☒ Smaller Reporting Company ☐ Emerging Growth Company ☐

If an emerging growth company, indicate by check mark if the registrants have elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Securities Exchange Act of 1934. ☐

Indicate by check mark whether each registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrants included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrants' executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrants are shell companies (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes ☐ No ☒

Aggregate market value of the voting and non-voting common equity of NextEra Energy, Inc. held by non-affiliates at June 30, 2025 (based on the closing market price on the Composite Tape on June 30, 2025) was \$142,860,484,569.

There was no voting or non-voting common equity of Florida Power & Light Company held by non-affiliates at June 30, 2025.

Number of shares of NextEra Energy, Inc. common stock, \$0.01 par value, outstanding at January 31, 2026: 2,083,521,964

Number of shares of Florida Power & Light Company common stock, without par value, outstanding at January 31, 2026, all of which were held, beneficially and of record, by NextEra Energy, Inc.: 1,000

DOCUMENTS INCORPORATED BY REFERENCE

Portions of NextEra Energy, Inc.'s Proxy Statement for the 2026 Annual Meeting of Shareholders are incorporated by reference in Part III hereof.

This combined Form 10-K represents separate filings by NextEra Energy, Inc. and Florida Power & Light Company. Information contained herein relating to an individual registrant is filed by that registrant on its own behalf. Florida Power & Light Company makes no representations as to the information relating to NextEra Energy, Inc.'s other operations.

Florida Power & Light Company meets the conditions set forth in General Instruction I.(1)(a) and (b) of Form 10-K and is therefore filing this Form with the reduced disclosure format.

DEFINITIONS

Acronyms and defined terms used in the text include the following:

Term	Meaning
AFUDC – equity	equity component of allowance for funds used during construction
Bcf	billion cubic feet
CAISO	California Independent System Operator
capacity clause	capacity cost recovery clause, as established by the FPSC
clean energy tax credits	production tax credits and investment tax credits collectively
DOE	U.S. Department of Energy
Duane Arnold	Duane Arnold Energy Center
environmental clause	environmental cost recovery clause, as established by the FPSC
EPA	U.S. Environmental Protection Agency
ERCOT	Electric Reliability Council of Texas
FERC	U.S. Federal Energy Regulatory Commission
FPL	Florida Power & Light Company
FPSC	Florida Public Service Commission
fuel clause	fuel and purchased power cost recovery clause, as established by the FPSC
GAAP	generally accepted accounting principles in the U.S.
ISO	independent system operator
ISO-NE	ISO New England Inc.
ITC	investment tax credit
kW	kilowatt
kWh	kilowatt-hour(s)
Management's Discussion	Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations
MISO	Midcontinent Independent System Operator
MMBtu	One million British thermal units
mortgage	mortgage and deed of trust dated as of January 1, 1944, from FPL to Deutsche Bank Trust Company Americas, as supplemented and amended
MW	megawatt(s)
MWh	megawatt-hour(s)
NEE	NextEra Energy, Inc.
NEECH	NextEra Energy Capital Holdings, Inc.
NEER	an operating segment comprised of NextEra Energy Resources and NEET
NEET	NextEra Energy Transmission, LLC
NERC	North American Electric Reliability Corporation
net capacity	net ownership interest in pipeline(s) capacity
net generating capacity	net ownership interest in plant(s) capacity
net generation	net ownership interest in plant(s) generation
Note ____	Note ____ to consolidated financial statements
NextEra Energy Resources	NextEra Energy Resources, LLC
NRC	U.S. Nuclear Regulatory Commission
NYISO	New York Independent System Operator
O&M expenses	other operations and maintenance expenses in the consolidated statements of income
OEB	Ontario Energy Board
OTC	over-the-counter
OTTI	other than temporary impairment or other than temporarily impaired
PJM	PJM Interconnection, LLC
Point Beach	Point Beach Nuclear Power Plant
PPA	purchased power agreement(s)
PTC	production tax credit
PUCT	Public Utility Commission of Texas
regulatory ROE	return on common equity as determined for regulatory purposes
RPS	renewable portfolio standards
RTO	regional transmission organization
Seabrook	Seabrook Station
SEC	U.S. Securities and Exchange Commission
storm protection plan	storm protection plan cost recovery clause, as established by the FPSC
XPLR	XPLR Infrastructure, LP (formerly known as NextEra Energy Partners, LP)
XPLR OpCo	XPLR Infrastructure Operating Partners, LP (formerly known as NextEra Energy Operating Partners, LP), a subsidiary of XPLR
U.S.	United States of America

NEE, FPL, NEECH, NextEra Energy Resources and NEET each has subsidiaries and affiliates with names that may include NextEra Energy, FPL, NextEra Energy Resources, NextEra Energy Transmission, NextEra, FPL Group, FPL Energy and similar references. For convenience and simplicity, in this report the terms NEE, FPL, NEECH, NextEra Energy Resources, NEET and NEER are sometimes used as abbreviated references to specific subsidiaries, affiliates or groups of subsidiaries or affiliates. The precise meaning depends on the context.

FORWARD-LOOKING STATEMENTS

This report includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements that express, or involve discussions as to, expectations, beliefs, plans, objectives, assumptions, strategies, future events or performance (often, but not always, through the use of words or phrases such as may result, are expected to, will continue, is anticipated, believe, will, could, should, would, estimated, may, plan, potential, future, projection, goals, target, outlook, predict and intend or words of similar meaning) are not statements of historical facts and may be forward looking. Forward-looking statements involve estimates, assumptions and uncertainties. Accordingly, any such statements are qualified in their entirety by reference to, and are accompanied by, important factors included in Part I, Item 1A. Risk Factors (in addition to any assumptions and other factors referred to specifically in connection with such forward-looking statements) that could have a significant impact on NEE's and/or FPL's operations and financial results, and could cause NEE's and/or FPL's actual results to differ materially from those contained or implied in forward-looking statements made by or on behalf of NEE and/or FPL in this combined Form 10-K, in presentations, on their respective websites, in response to questions or otherwise.

Any forward-looking statement speaks only as of the date on which such statement is made, and NEE and FPL undertake no obligation to update any forward-looking statement to reflect events or circumstances, including, but not limited to, unanticipated events, after the date on which such statement is made, unless otherwise required by law. New factors emerge from time to time and it is not possible for management to predict all of such factors, nor can it assess the impact of each such factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained or implied in any forward-looking statement.

PART I

Item 1. Business

OVERVIEW

NEE is one of the largest electric power and energy infrastructure companies in North America. As of December 31, 2025, NEE had approximately 80 gigawatts of net generation and storage capacity from a diverse portfolio of assets, primarily including natural gas, wind, solar and nuclear generation facilities and battery storage facilities. NEE has two principal businesses, FPL and NEER. FPL is the largest electric utility in Florida and the U.S. FPL's strategic focus is centered on investing in generation, storage, transmission and distribution facilities to deliver on its value proposition of keeping customer bills low and delivering high reliability, outstanding customer service and energy from diverse generation sources for the benefit of its more than six million customer accounts. NEER is one of the largest energy infrastructure developers in the U.S. NEER's strategic focus is centered on the development, construction and operation of long-term contracted generation facilities, including renewables, nuclear and natural gas, as well as battery storage facilities. NEER also builds and owns regulated electric and gas transmission assets, is a leading gas and power supplier, and delivers integrated energy and technology solutions to utilities and businesses across the U.S.

NEE seeks to create value in its two principal businesses by meeting customer needs more economically and reliably than its competitors. NEE's strategy has resulted in profitable growth over sustained periods at both FPL and NEER. Management seeks to grow each business (see Note 15 – Commitments) in a manner consistent with the varying opportunities available to it; however, management believes that the diversification and balance represented by FPL and NEER is a valuable characteristic of the enterprise and recognizes that each business contributes to NEE's financial strength in different ways. FPL and NEER share a common platform with the objective of lowering costs, creating efficiencies and encouraging innovative ideas for their businesses. NEE and its subsidiaries, with employees totaling approximately 17,400 as of December 31, 2025, continue to develop and implement enterprise-wide initiatives, including deploying advanced technologies such as artificial intelligence and proprietary tools, focused on improving processes, lowering costs and driving growth.

NEE's reportable segments for financial reporting purposes are FPL and NEER (see Note 16). NEECH, a wholly owned subsidiary of NEE, owns and provides funding for NEE's operating subsidiaries, other than FPL and its subsidiaries. The following diagram depicts NEE's simplified ownership structure:

(1) Comprises the NEER segment.

FPL

FPL is a rate-regulated electric utility engaged primarily in the generation, storage, transmission, distribution and sale of electric energy in Florida. FPL is the largest electric utility in Florida and the U.S. As of December 31, 2025, FPL had 35,963 MW of net generating capacity, approximately 93,000 circuit miles of transmission and distribution lines and 932 substations. FPL provides electric service through an integrated transmission and distribution system that links its generation facilities to its customers.

FPL serves approximately 12 million people through more than 6 million customer accounts. The following map shows FPL's service areas and plant locations as of February 13, 2026, which cover most of the east and lower west coasts of Florida and are in ten counties throughout northwest Florida (see FPL Sources of Generation below).

CUSTOMERS AND REVENUE

FPL's primary source of operating revenues is from its retail customer base; it also serves a limited number of wholesale customers within Florida. The percentage of FPL's operating revenues and customer accounts by customer class were as follows:

For both retail and wholesale customers, the prices (or rates) that FPL may charge are approved by regulatory bodies, by the FPSC in the case of retail customers and by the FERC in the case of wholesale customers. In general, under U.S. and Florida law, regulated rates are intended to cover the cost of providing service, including a reasonable rate of return on invested capital. Since the regulatory bodies have authority to determine the relevant cost of providing service and the appropriate rate of return on capital employed, there can be no guarantee that FPL will be able to earn any particular rate of return or recover all of its costs through regulated rates. See FPL Regulation below.

FPL seeks to maintain low rates for its customers, while continuing to deliver reliable service. Since rates are largely cost-based, maintaining low rates requires a strategy focused on developing and maintaining a low-cost position, including the implementation of ideas generated from cost savings initiatives and the use of advanced technologies such as artificial intelligence. FPL also seeks to serve large-load customers, such as data centers, through the tariff established in the 2025 rate agreement (as defined in FPL Regulation – FPL Electric Rate Regulation – Base Rates – Base Rates Effective January 2026 through December 2029 below).

FRANCHISE AGREEMENTS AND COMPETITION

FPL's service to its electric retail customers is provided primarily under franchise agreements negotiated with municipalities or counties. During the term of a franchise agreement, which is typically 30 years, the municipality or county agrees not to form its own utility, and FPL has the right to offer electric service to residents. As of December 31, 2025, FPL held 226 franchise agreements with various municipalities and counties in Florida with varying expiration dates through 2055. These franchise agreements cover the vast majority of FPL's retail customer base in Florida. As of December 31, 2025, FPL also provided service to customers in 10 other municipalities and to 27 unincorporated areas within its service area without franchise agreements, pursuant to the general obligation to serve as a public utility. FPL relies upon Florida law for access to public rights-of-way.

Because any customer may elect to provide its own electric services, FPL effectively must compete for an individual customer's business. As a practical matter, few customers provide their own service at the present time since FPL's cost of service is lower than the cost of self-generation for a significant majority of customers. Changing technology (particularly the increasing efficiency of solar power generation), tax incentives, economic conditions, regulatory changes and other factors could alter the favorable relative cost position that FPL currently enjoys; however, FPL seeks as a matter of strategy to ensure that it delivers superior value in the form of low customer bills, high reliability, outstanding customer service and energy from diverse generation sources.

In addition to self-generation by residential, commercial and industrial customers, FPL also faces competition from other suppliers of electrical energy to wholesale and industrial customers and from alternative energy sources. In 2025, 2024 and 2023, annual operating revenues from wholesale and industrial electric customers combined represented approximately 5% of FPL's total operating revenues.

For the building of new steam and solar generating capacity of 75 MW or greater, the FPSC requires investor-owned electric utilities, including FPL, to issue a request for proposal (RFP) except when the FPSC determines that an exception from the RFP process is in the public interest. The RFP process allows independent power producers and others to bid to supply the new generating capacity. If a bidder has the most cost-effective alternative, meets other criteria such as financial viability and demonstrates adequate expertise and experience in building and/or operating generating capacity of the type proposed, the investor-owned electric utility would seek to negotiate a PPA with the selected bidder and request that the FPSC approve the terms of the PPA and, if appropriate, provide the required authorization for the construction of the bidder's generating capacity.

FPL SOURCES OF GENERATION

As of December 31, 2025, FPL's resources for serving load consisted of approximately 36,616 MW of net generating capacity, of which 36,372 MW were from FPL-owned facilities and 244 MW were available through PPAs. FPL owned and operated 44 units with generating capacity of 24,314 MW that primarily use natural gas and 108 solar generation facilities with generating capacity totaling 7,932 MW. In addition, FPL owned, or had undivided interests in, and operated four nuclear units with net generating capacity totaling 3,502 MW (see Nuclear Operations below) and had a joint ownership interest in a coal unit located in Georgia, which is operated by the joint owner, with a net generating capacity of 215 MW (see Note 7 – Jointly-Owned Electric Plants). FPL also develops and constructs battery storage projects, which, when combined with its solar projects, serve to enhance its ability to meet customer needs for a nearly firm generation source. As of December 31, 2025, FPL had 991 MW of battery storage capacity that delivers energy to the transmission system. FPL customer usage and operating revenues are typically higher during the summer months, largely due to the prevalent use of air conditioning in its service area. Occasionally, unusually cold temperatures during the winter months result in significant increases in electricity usage for short periods of time.

In 2025, FPL added new solar generation with capacity totaling 894 MW and battery storage capacity totaling 522 MW. In January 2026, FPL placed 596 MW of solar generating capacity in service and expects to place an additional 298 MW of solar capacity and approximately 1,420 MW of additional battery storage capacity in service over the remainder of 2026.

In 2025, FPL received FERC approval for the acquisition of a 660 MW gas-fired peaking facility with dual fuel capability. The acquisition is expected to close in 2027.

Fuel Sources

FPL relies upon a mix of fuel sources for its generation facilities, the ability of some of its generation facilities to operate on both natural gas and low sulfur diesel, the use of battery storage at certain generation facilities and on purchased power to maintain the flexibility to achieve a more economical fuel mix in order to respond to market and industry developments.

**FPL
2025 Net Generating Capacity by Fuel Type
MW**

**FPL
2025 Energy Mix
MWh**

*approximately 66% has dual fuel capability

**certain solar facilities have approximately 582 MW of co-located batteries

Significant Fuel and Transportation Contracts. As of December 31, 2025, FPL had the following significant fuel and transportation contracts in place:

- firm transportation contracts with ten different transportation suppliers for natural gas pipeline capacity for an aggregate maximum delivery quantity of 2,836,000 MMBtu/day with expiration dates through 2042 (see Note 15 – Contracts);
- several contracts for the supply of uranium and the conversion, enrichment and fabrication of nuclear fuel with expiration dates through 2039; and
- short- and medium-term natural gas supply contracts, with expiration dates through 2028, to provide a portion of FPL's anticipated needs for natural gas, with the remainder of FPL's natural gas requirements being purchased in the spot market.

Nuclear Operations

As of December 31, 2025, FPL owned, or had undivided interests in, and operated the four nuclear units in Florida discussed below. FPL's nuclear units are periodically removed from service to accommodate planned refueling and maintenance outages, including inspections, repairs and certain other modifications. Scheduled nuclear refueling outages require the unit to be removed from service for variable lengths of time.

Facility	Net Generating Capacity (MW)	Beginning of Next Scheduled Refueling Outage	Operating License Expiration Date
St. Lucie Unit 1	981	April 2027	2036 ^(a)
St. Lucie Unit 2	840 ^(b)	April 2026	2043 ^(a)
Turkey Point Unit 3	837	February 2028	2052 ^(c)
Turkey Point Unit 4	844	February 2027	2053 ^(c)

- (a) In 2021, FPL filed an application with the NRC to renew both St. Lucie operating licenses for an additional 20 years. License renewals are pending.
- (b) Excludes 147 MW operated by FPL but owned by non-affiliates.
- (c) In September 2024, the license renewals for both Turkey Point units were approved. An intervenor's appeal of the decision dismissing its proposed contentions against the license renewals is pending before the NRC.

NRC regulations require FPL to submit a plan for decontamination and decommissioning five years before the projected end of plant operation. If the license renewals are approved by the NRC, FPL's plans provide for St. Lucie Unit 1 to be shut down in 2056 with decommissioning activities to be integrated with the dismantlement of St. Lucie Unit 2 commencing in 2063. FPL's plans provide for the dismantlement of Turkey Point Units 3 and 4 with decommissioning activities commencing in 2052 and 2053, respectively.

FPL's nuclear facilities use both on-site storage pools and dry storage casks to store spent nuclear fuel generated by these facilities, which are expected to provide sufficient storage of spent nuclear fuel that is generated at these facilities through license expiration, as well as through any pending license extensions.

FPL ENERGY MARKETING AND TRADING

FPL's Energy Marketing & Trading division (EMT) supports the operation of FPL's generation fleet by procuring and managing fuel supplies and related energy commodities, including renewable energy credits (RECs). EMT sources natural gas, oil and low sulfur diesel from a diverse set of suppliers and geographic markets. FPL sells excess fuel and electricity when available and also uses derivative instruments (primarily swaps, options and forwards) to manage the physical and financial risks inherent in the purchase and sale of fuel and electricity. The results of EMT's activities are primarily passed through to customers in the fuel or capacity clauses, and beginning in 2026, certain amounts will be recognized in base rates. See Management's Discussion – Energy Marketing and Trading and Market Risk Sensitivity and Note 3.

FPL REGULATION

FPL's operations are subject to regulation by a number of federal, state and other organizations, including, but not limited to, the following:

- the FPSC, which has jurisdiction over retail rates, service areas, issuances of securities, and planning, siting and construction of facilities, among other things;
- the FERC, which oversees the acquisition and disposition of electric generation, transmission and other facilities, transmission of electricity and natural gas in interstate commerce, proposals to build and operate interstate natural gas pipelines and storage facilities, and wholesale purchases and sales of electric energy, among other things;
- the NERC, which, through its regional entities, establishes and enforces mandatory reliability standards, subject to approval by the FERC, to ensure the reliability of the U.S. electric transmission and generation system and to prevent major system blackouts;

- the NRC, which has jurisdiction over the operation of nuclear power plants through the issuance of operating licenses, rules, regulations and orders; and
- the EPA, which has the responsibility to maintain and enforce national standards under a variety of environmental laws, and in some cases delegates authority to state agencies. The EPA also works with industries and all levels of government, including federal and state governments, in a wide variety of voluntary pollution prevention programs and energy conservation efforts.

FPL Electric Rate Regulation

The FPSC sets rates at a level that is intended to allow the utility the opportunity to collect from retail customers total revenues (revenue requirements) equal to its cost of providing service, including a reasonable rate of return on invested capital. To accomplish this, the FPSC uses various ratemaking mechanisms, including, among other things, base rates and cost recovery clauses.

Base Rates. In general, the basic costs of providing electric service, other than fuel and certain other costs, are recovered through base rates, which are designed to recover the costs of constructing, operating and maintaining the utility system. These basic costs include O&M expenses, depreciation and taxes, as well as a return on investment in assets used and useful in providing electric service (rate base). When base rates are established, the allowed rate of return on rate base approximates the FPSC's determination of the utility's estimated weighted-average cost of capital, which includes its costs for outstanding debt and an allowed return on common equity. The FPSC monitors the utility's actual regulatory ROE through a surveillance report that is filed monthly with the FPSC. The FPSC does not provide assurance that any regulatory ROE will be achieved. Base rates are determined in rate proceedings or through negotiated settlements of those proceedings. Proceedings can occur at the initiative of the utility or upon action by the FPSC. Existing base rates remain in effect until new base rates are approved by the FPSC.

Base Rates Effective January 2026 through December 2029 – In January 2026, the FPSC issued a final order approving a stipulation and settlement agreement between FPL and several intervenors in FPL's base rate proceeding (2025 rate agreement). Key elements of the 2025 rate agreement, which became effective in January 2026 and continues through at least December 2029, include, among other things, the following:

- New retail base rates and charges were established resulting in the following increases in annualized retail base revenues:
 - \$945 million beginning January 1, 2026; and
 - \$705 million beginning January 1, 2027.
- In addition, FPL will receive, subject to conditions specified in the 2025 rate agreement, base rate increases associated with solar generation projects that enter service in 2027, 2028 and 2029 and battery storage projects that enter service in 2028 and 2029 through a Solar and Battery Base Rate Adjustment (SoBRA) mechanism. FPL is required to demonstrate either a specified economic or resource/reliability need for these projects.
- FPL's authorized regulatory ROE is 10.95%, with a range of 9.95% to 11.95%. If FPL's earned regulatory ROE falls below 9.95%, FPL may seek retail base rate relief. If the earned regulatory ROE rises above 11.95%, any party with standing may seek a review of FPL's retail base rates.
- FPL's authorized regulatory capital structure reflects a 59.6% equity ratio, consistent with prior base rate cases.
- FPL is authorized to implement a rate stabilization mechanism (RSM) over the term of the 2025 rate agreement up to approximately \$1.5 billion, after tax. The RSM reserve includes certain deferred tax liabilities, the remaining balance from FPL's existing reserve amortization mechanism as of January 1, 2026 and investment tax credit amortization for battery storage projects placed in service in 2025. Subject to certain conditions, FPL could amortize the RSM reserve over the term of the 2025 rate agreement, provided that in any 12-month period of the 2025 rate agreement FPL would be required to amortize at least enough RSM reserve amount to maintain its minimum authorized regulatory ROE and also could not amortize any RSM reserve amount that would result in an earned regulatory ROE in excess of its maximum authorized regulatory ROE.
- Future storm restoration costs are recoverable on an interim basis beginning 60 days from the filing of a cost recovery petition, but capped at an amount that produces a surcharge of no more than \$5 for every 1,000 kWh of usage on residential bills during the first 12 months of cost recovery. Any additional costs would be eligible for recovery in subsequent years. If storm restoration costs, inclusive of the costs to replenish the storm reserve, exceed the cap, FPL could request an increase to the \$5 surcharge. See Note 1 – Storm Funds, Storm Reserves and Storm Cost Recovery.
- If federal or state permanent corporate income tax changes become effective during the term of the 2025 rate agreement, FPL will be able to prospectively adjust base rates after a review by the FPSC.
- FPL will implement tariffs for large-load customers with new or incremental load of 50 MW or greater and with a load factor of at least 85%.

In February 2026, the Office of Public Counsel, Floridians Against Increased Rates, Inc. and, as a group, Florida Rising, Inc., Environmental Confederation of Southwest Florida, Inc. and League of United Latin American Citizens of Florida filed a joint motion for reconsideration and a joint request for oral argument challenging the FPSC's final order approving the 2025 rate agreement. FPL has opposed the motion and the request for oral argument.

Base Rates Effective January 2022 through December 2025 – In December 2021, the FPSC issued a final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding (2021 rate agreement). In March 2024, the FPSC issued a supplemental final order which affirmed its prior approval of the 2021 rate agreement. Key elements of the 2021 rate agreement, which became effective in January 2022, include, among other things, the following:

- New retail base rates and charges which resulted in the following increases in annualized retail base revenues:
 - \$692 million beginning January 1, 2022; and
 - \$560 million beginning January 1, 2023.
- Additional base rate increases in 2024 and 2025 associated with the addition of 894 MW of new solar generation through the Solar Base Rate Adjustment mechanism in each year.
- Authorized regulatory ROE of 10.60%, with a range of 9.70% to 11.70%, which was increased in 2022 to be 10.80%, with a range of 9.80% to 11.80%, based on a provision associated with an increase in the U.S. Treasury rate.
- Subject to certain conditions, the right to amortize up to \$1.45 billion (depreciation reserve), provided that in any 12-month period of the 2021 rate agreement, FPL was required to amortize at least enough of the depreciation reserve amount to maintain its minimum authorized annual regulatory ROE and also could not amortize any depreciation reserve amount that would result in an earned regulatory ROE in excess of its maximum authorized regulatory ROE.
- Expansion of SolarTogether® (a voluntary community solar program that gives FPL electric customers an opportunity to participate directly in the expansion of solar energy where participants pay a fixed monthly subscription charge and receive credits on their related monthly customer bill) by constructing an additional 1,788 MW of solar generation from 2022 through 2025, such that the total capacity of SolarTogether® is 3,278 MW.
- An interim storm cost recovery mechanism for storm restoration costs. See Note 1 – Storm Funds, Storm Reserves and Storm Cost Recovery.

Cost Recovery Clauses. Cost recovery clauses are designed to permit full recovery of certain costs and provide a return on certain assets allowed to be recovered through these clauses. Cost recovery clause costs are recovered through levelized monthly charges per kWh or kW, depending on the customer's rate class. These cost recovery clause charges are calculated annually based on estimated costs and estimated customer usage for the following year, plus or minus true-up adjustments to reflect the estimated over- or under-recovery of costs for the current and prior periods. An adjustment to the levelized charges may be approved during the course of a year to reflect revised estimates. FPL recovers costs from customers through the following clauses:

- Fuel – primarily fuel costs, the most significant of the cost recovery clauses in terms of operating revenues (see Note 1 – Rate Regulation);
- Storm Protection Plan – costs associated with an FPSC-approved transmission and distribution storm protection plan, substantially all of which are costs for hardening overhead transmission and distribution lines, undergrounding of certain distribution lines and vegetation management;
- Capacity – primarily certain costs associated with the acquisition and retirement of an electric generation facility (see Note 1 – Rate Regulation) and capacity payments related to PPAs;
- Energy Conservation – costs associated with implementing energy conservation programs; and
- Environmental – certain costs of complying with federal, state and local environmental regulations enacted after April 1993 and costs associated with certain of FPL's solar facilities placed in service prior to 2016.

The FPSC has the authority to disallow recovery of costs that it considers excessive or imprudently incurred. These costs may include, among others, fuel and O&M expenses, the cost of replacing power lost when generation units are unavailable, storm restoration costs and costs associated with the construction or acquisition of new facilities.

FERC

The Federal Power Act grants the FERC exclusive ratemaking jurisdiction over wholesale sales of electricity and the transmission of electricity and natural gas in interstate commerce. Pursuant to the Federal Power Act, electric utilities must file for FERC acceptance and maintain tariffs and rate schedules which govern the rates, terms and conditions for the provision of FERC-jurisdictional wholesale power and transmission services. Wholesale power sales tariffs on file at FERC may authorize sales at cost-based rates or, where the seller lacks market power, at market-based rates. The Federal Power Act also gives the FERC authority to certify and oversee an electric reliability organization with authority to establish and independently enforce mandatory reliability standards applicable to all users, owners and operators of the bulk-power system. See NERC below. Electric utilities are subject to accounting, record-keeping and reporting requirements administered by the FERC. The FERC also places certain limitations on transactions between electric utilities and their affiliates.

NERC

The NERC has been certified by the FERC as an electric reliability organization. The NERC's mandate is to ensure the reliability and security of the North American bulk-power system through the establishment and enforcement of reliability standards approved by FERC. The NERC's regional entities also enforce reliability standards approved by the FERC. FPL is subject to these reliability standards and incurs costs to ensure compliance with continually heightened requirements, and can incur significant penalties for failing to comply with them.

FPL Environmental Regulation

FPL is subject to environmental laws and regulations as described in the NEE Environmental Matters section below. FPL expects to seek recovery through the environmental clause for compliance costs associated with any new environmental laws and regulations.

FPL HUMAN CAPITAL

FPL had approximately 9,400 employees as of December 31, 2025, with approximately 30% of these employees represented by the International Brotherhood of Electrical Workers (IBEW). The collective bargaining agreements have approximately three-year terms and expire between April 2027 and January 2028.

NEER

NEER, one of the largest energy infrastructure developers in the U.S., is comprised of NEE's competitive energy and regulated transmission businesses. NEER is a diversified energy business with a strategy that emphasizes the development, construction and operation of long-term contracted generation facilities and builds and owns regulated electric and gas transmission assets. NEER also provides gas and power solutions through its customer supply business. NEER's strategy focuses on providing cost-effective differentiated solutions to its customers, including emerging large-load opportunities, and on lowering costs and driving growth, including through the use of advanced technologies, such as artificial intelligence and proprietary tools. NEE reports NextEra Energy Resources and NEET, a rate-regulated electric transmission business, on a combined basis for segment reporting purposes, and the combined segment is referred to as NEER.

The NEER segment owns, develops, constructs, manages and operates generation facilities, including renewables, nuclear and natural gas, as well as battery storage facilities in wholesale energy markets in the U.S. and Canada. NEER, with approximately 37,505 MW of total net generating capacity as of December 31, 2025, is one of the largest wholesale generators of electric power in the U.S., including approximately 37,145 MW of net generating capacity across 44 states and 360 MW of net generating capacity in 4 Canadian provinces. As of December 31, 2025, NEER operates facilities, in which it has partial or full ownership interests, with a total generating capacity of approximately 45,680 MW. In addition, NEER, a world leader in battery storage based on 2025 MW of net storage capacity, develops and constructs battery storage projects, that either are integrated with its generation projects to enhance its ability to meet customers' firm capacity needs, or operate as standalone facilities. NEER primarily sells its capacity and/or energy output through long-term power sales and battery storage tolling agreements with utilities, retail electricity providers, power cooperatives, municipal electric providers and commercial and industrial customers.

The NEER segment also owns, develops, constructs and operates rate-regulated electric transmission assets in North America with a total rate base of \$3.2 billion as of December 31, 2025. NEER's rate-regulated electric transmission assets and the transmission lines that connect its electric generation and battery storage facilities, including facilities of noncontrolling or joint venture interests, to the electric grid are comprised of approximately 400 substations and 4,175 circuit miles of transmission lines as of December 31, 2025. In addition, as of December 31, 2025, the NEER segment also has ownership interests in regulated natural gas pipelines primarily located in the U.S. NEER's regulated gas transmission business has approximately 3.8 Bcf per day gross pipeline capacity and consists of equity method investments totaling approximately \$1.5 billion as of December 31, 2025.

Through its customer supply business, NEER engages in energy-related commodity marketing and trading activities, including entering into financial and physical contracts. These contracts primarily involve power and fuel commodities and their related products for the purpose of providing full energy and capacity requirements services, primarily to distribution utilities in certain markets. They are also used to offer customized power and fuel and related risk management services to wholesale customers, including services provided under natural gas asset management agreements, as well as to hedge the production from NEER's generation assets that is not sold under long-term power supply agreements. In addition, NEER participates in natural gas, natural gas liquids and oil production through operating and non-operating ownership interests. NEER hedges the expected output from its natural gas and oil production assets to protect against price movements.

OPERATIONS

NEER sells products associated with its generation and battery storage facilities (energy, capacity, RECs and ancillary services) in competitive markets in regions where those facilities are located. Customer transactions may be supplied from NEER generation and battery storage facilities or from purchases in the wholesale markets, or from a combination thereof. See Markets and Competition below.

NEER's generation and battery storage projects, natural gas pipelines and transmission assets (including noncontrolling or joint venture interests) as of December 31, 2025 are as follows:

Energy Assets

Generation Assets

2025 Net Generating Capacity by Fuel Type MW

NEER's portfolio of generation assets primarily consists of generation facilities with long-term power sales agreements for substantially all of their capacity and/or energy output. Information related to contracted generation assets as of December 31, 2025 was as follows:

- represented approximately 35,627 MW of total net generating capacity; and
- weighted-average remaining contract term of the power sales agreements of approximately 14 years, primarily based on forecasted contributions to earnings.

NEER's merchant generation assets primarily consist of generation facilities that do not have long-term power sales agreements to sell their capacity and/or energy output and therefore require active marketing and hedging. Merchant generation assets as of December 31, 2025 represented approximately 1,878 MW of total net generating capacity, including 841 MW from nuclear generation and 1,032 MW from other peak generation facilities, and are primarily located in the Northeast region of the U.S. NEER utilizes swaps, options, futures and forwards to lock in pricing and manage the commodity price risk inherent in power sales and fuel purchases.

In response to potential customer needs, NEER evaluates opportunities for expanding its portfolio of generation assets, including adding new facilities and repowering its current facilities.

NEER Generation Assets' Fuel/Technology Mix

During 2025, NEER generated approximately 121 million MWh utilizing the following mix of fuel sources for generation facilities in which it has an ownership interest:

2025 Net Generation by Fuel Type MWh

Wind Facilities

- located in 23 states in the U.S. and 4 provinces in Canada;
- operated a total generating capacity of approximately 27,855 MW, including capacity associated with noncontrolling and joint venture interests, as of December 31, 2025;
- ownership interests in a total net generating capacity of approximately 22,404 MW as of December 31, 2025;
 - essentially all MW are contracted wind assets located primarily throughout Texas and the West and Midwest regions of the U.S. and Canada;
 - includes the impact of approximately 1,604 MW of new generating capacity added in the U.S. in 2025, as well as ownership interests in assets sold to third parties totaling approximately 165 MW and includes repowering activity related to approximately 132 MW of wind generating capacity.

Solar Facilities

- located in 35 states in the U.S.;
- operated photovoltaic and solar thermal facilities with a total generating capacity of approximately 12,794 MW, including capacity associated with noncontrolling and joint venture interests, as of December 31, 2025;
- ownership interests in solar facilities with a total net generating capacity of approximately 10,504 MW as of December 31, 2025;
 - essentially all MW are contracted solar facilities located primarily throughout the West and South regions of the U.S.;
 - includes the impact of approximately 2,859 MW of generating capacity added in the U.S. in 2025, as well as assets sold to a third party totaling approximately 188 MW.

Nuclear Facilities

As of December 31, 2025, NextEra Energy Resources was the sole owner of the two Point Beach nuclear units shown in the table below and was the largest joint owner of the Seabrook nuclear facility shown in the table below. NEER's nuclear units are periodically removed from service to accommodate planned refueling and maintenance outages, including inspections, repairs and certain other modifications. Scheduled nuclear refueling outages require the unit to be removed from service for variable lengths of time.

Facility	Location	Net Generating Capacity (MW)	Portfolio Category	Beginning of Next Scheduled Refueling Outage ^(a)	Operating License Expiration Date
Seabrook	New Hampshire	1,102 ^(b)	Merchant ^(c)	April 2026	2050
Point Beach Unit 1	Wisconsin	595	Contracted ^(d)	October 2026	2050
Point Beach Unit 2	Wisconsin	595	Contracted ^(d)	March 2026	2053

- (a) NEER has several contracts for the supply of uranium and the conversion, enrichment and fabrication of nuclear fuel for all nuclear units with expiration dates through 2033 (see Note 15 – Contracts).
- (b) Excludes 147 MW operated by NEER but owned by non-affiliates.
- (c) Includes 261 MW sold under a long-term contract.
- (d) NEER sells all of the output of Point Beach Units 1 and 2 under long-term contracts through 2030 and 2033, respectively, and sells 84 MW from each unit through their respective operating license dates.

NEER is responsible for all nuclear unit operations and the ultimate decommissioning of the nuclear units, the cost of which is shared on a pro-rata basis by the joint owners with respect to the Seabrook unit. NRC regulations require plant owners to submit a plan for decontamination and decommissioning five years before the projected end of plant operation. NEER's nuclear facilities use both on-site storage pools and dry storage casks to store spent nuclear fuel generated by these facilities, which, based on existing regulations, are expected to provide sufficient storage of spent nuclear fuel that is generated at these facilities through current license expiration, as well as through any pending license extensions.

NEER also has an approximately 70% interest in Duane Arnold, a nuclear facility located in Iowa. In December 2025, NEER submitted an application to the NRC to reinstate the operating license for Duane Arnold, with an estimated commercial operation date in 2029. A recommissioning of Duane Arnold is contingent upon several factors including receipt of NRC and other regulatory approvals. Additionally, NEER entered into a 25-year PPA for the full capacity of Duane Arnold, and agreements to increase its ownership interest to 100% of the plant, subject to regulatory approvals. In the event that Duane Arnold is not recommissioned, NEER estimates that the cost of decommissioning Duane Arnold is fully funded and would expect completion by approximately 2080.

Natural Gas and Other Energy Assets

As of December 31, 2025, NEER's portfolio included natural gas generation facilities with a net generating capacity of approximately 1,584 MW. NEER's portfolio also included assets and investments in other businesses with a clean energy focus, such as renewable fuels. NextEra Energy Resources owns, or has a partial ownership interest in, a portfolio of 29 biogas projects, eight of which are operating renewable natural gas facilities and the others are primarily operating landfill gas-to-electric facilities.

Battery Storage

As of December 31, 2025, NextEra Energy Resources had net ownership interests in approximately 5,177 MW of battery storage capacity located in 18 states in the U.S. and 1 province in Canada. During 2025, NEER added approximately 1,799 MW of battery storage capacity.

Policy Incentives for Clean Energy Projects

U.S. federal, state and local governments have established various incentives to support the development of clean energy projects. These incentives include accelerated tax depreciation, PTCs, ITCs, cash grants, tax abatements and RPS programs. Pursuant to the U.S. federal Modified Accelerated Cost Recovery System, wind and solar generation facilities are depreciated for tax purposes over a five-year period even though the useful life of such facilities is generally much longer than five years.

Owners of wind and solar facilities are eligible to claim an income tax credit (the PTC, or an ITC in lieu of the PTC) upon initially achieving commercial operation. The One Big Beautiful Bill Act (OBBBA) modified several pre-existing provisions, including the phase out of these income tax credits, of the Inflation Reduction Act and other laws. Wind and solar generation facilities are eligible for 100% PTC or 30% ITC if such facilities begin construction before July 5, 2026 or are placed in service by December 31, 2027. The PTC is determined based on the amount of electricity produced by the facility during the first ten years of commercial operation. A facility must also meet certain labor requirements to qualify for the 100% PTC or 30% ITC rate or construction must have started on the facility before January 29, 2023. In addition, the PTC is increased by 10% and the ITC rate is increased by 10 percentage points for facilities that satisfy certain tax credit enhancement requirements. Retrofitted wind and solar generation facilities may qualify for a PTC or an ITC if the cost basis of the new investment is at least 80% of the retrofitted facility's total fair value.

In addition, the 30% ITC, subject to a phase-down in 2034 and 2035, applies to energy storage projects placed in service after 2022 that begin construction by December 31, 2033 (no eligibility for projects that begin construction after 2035), and to certain property with respect to renewable natural gas facilities (including gas upgrading equipment) placed in service after 2022 that begin construction by December 31, 2024. These projects and property are subject to the same labor requirements and credit enhancements applicable to wind and solar facilities (discussed above).

NEE and the wind and solar industries have relied on the settled understanding of the term "begin construction" as informed by longstanding Treasury Department guidance regarding what constitutes the "beginning of construction" for purposes of claiming clean energy tax credits. On August 15, 2025, the Internal Revenue Service issued new guidance for the purpose of determining whether wind and solar facilities "begin construction" before July 5, 2026 such that they are not subject to the December 31, 2027 placed in service requirement. The new guidance applies to wind and solar facilities that begin construction on or after September 2, 2025, with prior guidance applying before that. The new guidance is substantially similar to the prior guidance except that it eliminates the 5% spend test safe harbor as a method to begin construction, such that wind and solar facilities must begin construction by starting physical work of a significant nature. Physical work of a significant nature includes onsite work other than preliminary activities, and offsite work on non-inventory equipment performed by a third-party manufacturer under a binding written contract. The new guidance also retains the "continuity requirement" from prior guidance, as well as the continuity safe harbor that deems the continuity requirement as satisfied if the related facility is placed in service no more than four years after the year it began construction. There will be no clean energy tax credits for wind or solar facilities placed in service after 2030.

Nuclear facilities placed in service before August 16, 2022, are eligible for a PTC of \$3/MWh (increased to \$15/MWh if certain prevailing wage requirements are satisfied) for electricity produced and sold after 2023 and before 2033. The PTC for these nuclear facilities begins to phase out when gross receipts from electricity produced by the nuclear facility exceed \$25/MWh and is completely phased out when gross receipts exceed \$43.75/MWh (subject to an annual inflation factor). Nuclear facilities placed in service after 2024 (including the restart of nuclear facilities previously in decommissioning) that begin construction by December 31, 2033 are eligible for the 100% PTC or 30% ITC (no eligibility for facilities that begin construction after 2035), and are subject to the same labor requirements and credit enhancements applicable to wind and solar facilities (discussed above).

All facilities and projects discussed above that begin construction after December 31, 2025 must satisfy the prohibited foreign entity material assistance requirements under the OBBBA in order to be eligible for tax credits.

Clean energy tax credits can be transferred to an unrelated purchaser for cash, providing an additional path, along with sales of differential membership interests, for developers to monetize the value of clean energy tax credits.

Other countries, including Canada, provide for incentives like feed-in-tariffs for renewable energy projects. The feed-in-tariffs promote renewable energy investments by offering long-term contracts to renewable energy producers, typically based on the cost of generation of each technology.

Regulated Operations

Rate-Regulated Electric Transmission – As of December 31, 2025, certain entities within the NEER segment had ownership interests in rate-regulated electric transmission and related facilities.

Jurisdiction	Miles	Substations	Kilovolt	Location	Rate Regulator	Ownership	Actual/Expected In-Service Dates
Operational:							
Southwest Power Pool (SPP)	607	18	69 – 345	Kansas, Missouri and Oklahoma	FERC	100% ^(a)	1960 – 2025
ERCOT	374	12	138 – 345	Texas	PUCT	100%	2013
Independent Electricity System Operator (IESO)	280	–	230	Ontario, Canada	OEB	48%	2022
CAISO	223	9	200 ^(b) – 230	California and Nevada	FERC	100% ^(c)	1960 – 2021
NYISO	20	2	345	New York	FERC	100%	2021 – 2022
Other	70	3	161 – 345	Illinois, Indiana, Kentucky and New Hampshire	FERC	100% ^(d)	1953 – 1982
Under Construction:							
CAISO	142	7	230 – 500	Arizona, California and Nevada	FERC	100%	2027 – 2031
MISO	139	–	161 – 765	Minnesota and Wisconsin	FERC	40%	2034
SPP	137	–	345	New Mexico	FERC	100%	2026
PJM	108	1	500	Maryland, Pennsylvania, Virginia and West Virginia	FERC	100%	2031
ERCOT	41	5	345	Texas	PUCT	100%	2026 – 2028

(a) Includes a 33-mile transmission line and 5 substations, in which NEET owns a 65% interest.

(b) Direct current.

(c) In July 2025, a subsidiary of NEET entered into an agreement to sell a 50% equity interest in a joint venture, consisting of a rate-regulated electric transmission asset located in California. NEER expects to close the sale in the first quarter of 2026. See Note 1 – Disposal of Businesses.

(d) Includes a substation, in which NEET owns an 88.3% interest.

Regulated Natural Gas Transmission – As of December 31, 2025, NextEra Energy Resources had ownership interests in natural gas pipelines.

	Miles of Pipeline	Pipeline Location/Route	Ownership	Total Gross Capacity (per day)	Actual In-Service Dates
Operational:					
Sabal Trail ^(a)	517	Southwestern Alabama to Central Florida	36.125%	1.00 Bcf	June 2017 – May 2020
Florida Southeast Connection ^(a)	172	Central Florida to South Florida	85%	0.64 Bcf	June 2017
Mountain Valley Pipeline	303	Northwestern West Virginia to Southern Virginia	33.36% ^(b)	2.00 Bcf	June 2024
Lowman Pipeline	60	Southwestern Alabama	85%	0.12 Bcf	September 2023

(a) See Note 15 – Contracts for a discussion of transportation contracts with FPL.

(b) In January 2026, NextEra Energy Resources increased its ownership interest to 36.02%.

Other Operations

Customer Supply – NEER provides commodities-related products to customers, including municipal utilities and cooperatives, engages in energy-related commodity marketing and trading activities and includes the operations of a retail electricity provider and ownership interests in natural gas and oil shale formations located primarily in the South region of the U.S. Through NextEra Energy Resources' subsidiary, NextEra Energy Marketing, LLC, NEER:

- manages risk associated with fluctuating commodity prices and optimizes the value of NEER's power generation and natural gas and oil production assets through the use of swaps, options, futures and forwards;
- sells output from NEER's plants that is not sold under long-term contracts and procures fuel for use by NEER's generation fleet;
- provides full energy and capacity requirements to customers; and
- markets and trades energy-related commodity products, including power and fuel, as well as marketing and trading services to customers.

In January 2026, a wholly owned subsidiary of NextEra Energy Resources acquired Symmetry Energy Solutions, a commercial and industrial natural gas business. See Note 6 – Symmetry Acquisition.

MARKETS AND COMPETITION

Electricity markets in the U.S. and Canada are regional and diverse in character. All are extensively regulated, and competition in these markets is shaped and constrained by regulation. The nature of the products offered varies based on the specifics of regulation in each region. Generally, in addition to the natural constraints on pricing freedom presented by competition, NEER may also face specific constraints in the form of price caps, or maximum allowed prices, for certain products. NEER's ability to sell the output of its generation facilities may also be constrained by available transmission capacity, which can vary from time to time and can have a significant impact on pricing.

The degree and nature of competition is different in wholesale markets than in retail markets. A majority of NEER's revenues are derived from sales of energy, capacity, credits and ancillary products under long-term PPAs to customers located in wholesale electricity markets. Wholesale power generation is a capital-intensive, commodity-driven business with numerous industry participants. NEER primarily competes on the basis of price, but believes that its track record of completing projects on schedule, creditworthiness, operating scale and ability to offer and manage reliable customized risk solutions to wholesale customers are competitive advantages. Wholesale power generation is a regional business that is highly fragmented relative to many other commodity industries and diverse in terms of industry structure. As such, there is a wide variation in terms of the capabilities, resources, nature and identity of the companies NEER competes with depending on the market. In wholesale markets, customers' needs are met through a variety of means, including long-term bilateral contracts, standardized bilateral products such as full requirements service and customized supply and risk management services.

In general, U.S. and Canadian electricity markets encompass three classes of services: energy and related energy credits, capacity and ancillary services. Energy services relate to the physical delivery of power; capacity services relate to the availability of MW capacity of a power generation asset; and ancillary services are other services that relate to power generation assets, such as load regulation and spinning and non-spinning reserves. The exact nature of these classes of services is defined in part by regional tariffs. Not all regions have a capacity services class, and the specific definitions of ancillary services vary from region to region.

RTOs and ISOs exist throughout much of North America to coordinate generation and transmission across wide geographic areas and to run markets. NEER operates in all RTO and ISO jurisdictions. As of December 31, 2025, NEER also had generation facilities with a total net generating capacity of approximately 9,788 MW that fall within reliability regions that are not under the jurisdiction of an established RTO or ISO, including 6,121 MW within the Western Electricity Coordinating Council and 2,977 MW within the SERC Reliability Corporation. Although each RTO and ISO may have differing objectives and structures, some benefits of these entities include regional planning, managing transmission congestion, developing larger wholesale markets for energy and capacity, maintaining reliability and facilitating competition among wholesale electricity providers. RTO and ISO rules and procedures are currently being revisited in stakeholder processes and other proceedings, including proceedings before FERC, in response to the substantial increase in power demand from data centers and other large-load customers. Any such rule changes could impact the manner in which data centers and other large loads interconnect to the grid and interact with the wholesale power markets, which could in turn create new risks and opportunities for NEER's businesses.

NEER has operations that fall within the following RTOs and ISOs:

NEER competes in different regions to differing degrees, but in general it seeks to enter into long-term bilateral contracts for the full output of its generation facilities. As of December 31, 2025, approximately 95% of NEER's net generating capacity was committed under long-term contracts. As long-term contracts approach maturity, NEER expects to pursue recontracting and other commercial renewals where supported by market conditions and customer demand. Where long-term contracts are not in effect, NEER sells the output of its facilities into daily spot markets. In such cases, NEER will frequently enter into shorter term bilateral contracts, typically of less than three years duration, to hedge the price risk associated with selling into a daily spot market. Such bilateral contracts, which may be hedges either for physical delivery or for financial (pricing) offset, serve to protect a portion of the revenue that NEER expects to derive from the associated generation facility. Contracts that serve the economic purpose of hedging some portion of the expected revenue of a generation facility but are not recorded as hedges under GAAP are referred to as "non-qualifying hedges" for adjusted earnings purposes. See Management's Discussion – Overview – Adjusted Earnings.

Certain facilities within the NEER wind and solar generation portfolio produce RECs and other environmental attributes which are typically sold along with the energy from the plants under long-term contracts, or may be sold separately from wind and solar generation not sold under long-term contracts. The purchasing party is solely entitled to the reporting rights and ownership of the environmental attributes.

While the majority of NEER's revenue is derived from the output of its generation facilities, NEER is also an active competitor in several regions in the wholesale full requirements business and in providing structured and customized power and fuel products and services to a variety of customers. In the full requirements service, typically, the supplier agrees to meet the customer's needs for a full range of products for every hour of the day, at a fixed price, for a predetermined period of time, thereby assuming the risk of fluctuations in the customer's volume requirements.

The regulated electric transmission market, served by NEET, operates under a cost-of-service model where revenues are primarily determined by approved rates set by FERC and state/provincial regulators. Transmission is essential for delivering electricity from generation sources to distribution systems and end users. Investments in transmission infrastructure are driven by reliability requirements, generation integration and grid modernization initiatives, with returns based on allowed equity and debt structures rather than commodity price fluctuations.

Expanded competition in a frequently changing regulatory environment presents both opportunities and risks for NEER. Opportunities exist for the selective acquisition of generation assets and for the construction and operation of efficient facilities that can sell power in competitive markets. NEER seeks to reduce its market risk by having a diversified portfolio by fuel type and location, as well as by contracting for the future sale of a significant amount of the electricity output of its facilities.

NEER REGULATION

The energy markets in which NEER operates are subject to domestic and foreign regulation, as the case may be, including local, state and federal regulation, and other specific rules.

As of December 31, 2025, essentially all of NEER's generation facilities located in the U.S. have received exempt wholesale generator status as defined under the Public Utility Holding Company Act of 2005. Exempt wholesale generators own or operate a facility exclusively to sell electricity to wholesale customers. They are barred from selling electricity directly to retail customers. While projects with exempt wholesale generator status are exempt from various restrictions, each project must still comply with other federal, state and local laws, including, but not limited to, those regarding siting, construction, operation, licensing, pollution abatement and other environmental laws.

Additionally, most of the NEER facilities located in the U.S. are subject to FERC regulations and market rules and the NERC's mandatory reliability standards. All of NEER's facilities are subject to environmental laws and the EPA's environmental regulations, and its nuclear facilities are also subject to the jurisdiction of the NRC. See FPL – FPL Regulation for additional discussion of FERC, NERC, NRC and EPA regulations. Rates of NEER's rate-regulated electric transmission business are set by regulatory bodies as noted in Operations – Regulated Operations – Rate-Regulated Electric Transmission. With the exception of facilities located in ERCOT, the FERC has jurisdiction over various aspects of NEER's business in the continental U.S., including the oversight and investigation of competitive wholesale energy markets, regulation of the interstate transmission of electricity, regulation of the transmission and sale of natural gas, and oversight of environmental matters related to natural gas projects and major electricity policy initiatives. The PUCT has jurisdiction, including the regulation of rates and services, oversight of competitive markets, and enforcement of statutes and rules, over NEER facilities located in ERCOT. In addition, certain of NEER's sales to retail customers are subject to consumer protection laws and other regulations related to consumer activities.

Certain entities within the NEER segment and their affiliates are also subject to federal and provincial or regional regulations in Canada related to energy operations, energy markets and environmental standards. In Canada, activities related to owning and operating wind and solar projects and participating in wholesale and retail energy markets are regulated at the provincial level. In Ontario, for example, electric generation facilities must be licensed by the OEB and may also be required to complete registrations and maintain market participant status with the IESO, in which case they must agree to be bound by and comply with the provisions of the market rules for the Ontario electricity market as well as the mandatory reliability standards of the NERC.

In addition, NEER is subject to environmental laws and regulations as described in the NEE Environmental Matters section below. In order to better anticipate potential regulatory changes, NEER continues to actively monitor and participate in regional market stakeholder processes and other forums where changes to existing rules for the interconnection of renewable energy resources and the purchase and sale of energy commodities are under consideration.

In addition to regulation associated with operating assets, the development of energy infrastructure also involves additional and often extensive approvals and permitting requirements at the local, state and federal levels for items such as disturbing wetlands, obtaining no hazard determinations from the Federal Aviation Administration, interacting with wildlife, making wholesale sales of electricity, and other clearances. These requirements may change from time to time. A number of regulatory actions occurred in 2025, including, among others, a federal executive order that calls for a pause in federal land leasing, permitting and approvals for wind development facilities pending completion of a review of the federal rules providing for leasing, permitting and approvals for wind projects and the FERC approval of proposals by regional transmission operators regarding the process for interconnecting new generation projects to certain regional transmission grids. These or similar initiatives could limit NEER's and FPL's ability to obtain or renew necessary approvals, rights-of-way, permits, leases or loans for wind or other energy projects.

NEER HUMAN CAPITAL

NEER had approximately 7,900 employees as of December 31, 2025. NEER has collective bargaining agreements with the IBEW, the Utility Workers Union of America and the Security Police and Fire Professionals of America, which collectively represent approximately 6% of NEER's employees. The collective bargaining agreements have approximately three-to-four-year terms and expire between September 2026 and December 2028.

NEE ENVIRONMENTAL MATTERS

NEE and its subsidiaries, including FPL, are subject to environmental laws and regulations, including extensive federal, state and local environmental statutes, rules and regulations relating to, among others, air quality, water quality and usage, waste management, wildlife protection and historical resources, for the siting, construction and ongoing operations of their facilities. The environmental laws in the U.S., including, among others, the Endangered Species Act (ESA), the Migratory Bird Treaty Act, and the Bald and Golden Eagle Protection Act (BGEPA), provide for the protection of numerous species, including endangered species and/or their habitats, migratory birds, bats and eagles. The environmental laws in Canada, including, among others, the Species at Risk Act, provide for the recovery of wildlife species that are endangered or threatened and the management of species of special concern. Complying with these environmental laws and regulations could result in, among other things, changes in the design and operation of, and additional costs associated with, existing facilities and changes or delays in the location, design, construction and operation of new facilities. Failure to comply could result in fines, penalties, criminal sanctions or injunctions. NEE's rate-regulated subsidiaries expect to seek recovery for compliance costs associated with any new environmental laws and regulations, which recovery for FPL would be through the environmental clause.

WEBSITE ACCESS TO SEC FILINGS

NEE and FPL make their SEC filings, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, available free of charge on NEE's internet website, www.nexteraenergy.com, as soon as reasonably practicable after those documents are electronically filed with or furnished to the SEC. The information and materials available on NEE's website (or any of its subsidiaries' or affiliates' websites) are not incorporated by reference into this combined Form 10-K.

INFORMATION ABOUT OUR EXECUTIVE OFFICERS^(a)

Name	Age	Position	Effective Date
Brian W. Bolster	53	President and Chief Executive Officer of NextEra Energy Resources	May 22, 2025
Scott Bores	44	President of FPL	December 1, 2025
Robert Coffey	62	Executive Vice President, Nuclear Division and Chief Nuclear Officer of NEE Vice President and Chief Nuclear Officer of FPL	June 14, 2021 June 15, 2021
Terrell Kirk Crews II	47	Executive Vice President, Chief Risk Officer of NEE Executive Vice President, Chief Risk Officer of FPL	May 6, 2024
Nicole Daggs	51	Executive Vice President, Human Resources and Corporate Services of NEE Executive Vice President, Human Resources and Corporate Services of FPL	January 1, 2024
Michael H. Dunne	50	Executive Vice President, Finance and Chief Financial Officer of NEE Executive Vice President, Finance and Chief Financial Officer of FPL	May 22, 2025
William J. Gough	39	Vice President, Controller and Chief Accounting Officer of NEE	May 22, 2025
John W. Ketchum	55	Chairman, President and Chief Executive Officer of NEE Chairman of FPL	July 29, 2022 February 15, 2023
Mark Lemasney	50	Executive Vice President, Power Generation Division of NEE Executive Vice President, Power Generation Division of FPL	January 1, 2023
James M. May	49	Treasurer and Assistant Secretary of NEE Treasurer of FPL	May 22, 2025
Armando Pimentel, Jr.	63	Chief Executive Officer of FPL	February 15, 2023
Ronald R. Reagan	57	Executive Vice President, Engineering, Construction and Integrated Supply Chain of NEE Vice President, Engineering and Construction of FPL	January 1, 2020 March 1, 2019
Charles E. Sieving	53	Executive Vice President, Chief Legal, Environmental and Federal Regulatory Affairs Officer of NEE Executive Vice President of FPL	May 18, 2023 January 1, 2009

- (a) Information is as of February 13, 2026. Executive officers are elected annually by, and serve at the pleasure of, their respective boards of directors. Except as noted below, each officer has held his/her present position for five years or more and his/her employment history is continuous. Mr. Bolster served as Executive Vice President, Finance and Chief Financial Officer of NEE and FPL from May 2024 to May 2025. He previously was Partner Managing Director, Head of Natural Resources Investment Banking (Americas) for Goldman Sachs & Co. LLC from September 2020 until May 2024. Mr. Bores served as Vice President, Finance of FPL from January 2022 to December 2025. He previously served as Senior Director, Financial Forecast, Strategy and Analysis of FPL from July 2015 to December 2021. Mr. Coffey served as Vice President, Nuclear for FPL from May 2019 to June 2021. Mr. Crews served as Vice President, Business Management of NextEra Energy Resources from March 2019 to February 2022 and was Executive Vice President, Finance and Chief Financial Officer of NEE and FPL from March 2022 until May 2024. Mrs. Daggs served as Vice President, Human Resources for FPL from April 2018 to December 2023. Mr. Dunne served as Treasurer of NEE and FPL and Assistant Secretary of NEE from January 2023 to May 2025 and was Vice President Finance of NEE from April 2022 to December 2022. He was previously Managing Director, Global Energy & Power Investment Banking for Bank of America from January 2012 to March 2022. Mr. Gough served as Vice President, Financial Planning and Analysis of NEE from October 2024 to May 2025 and Executive Director, Financial Planning and Analysis of NEE from January 2024 to October 2024. He previously served as Assistant Controller of NEE from August 2023 to January 2024 and Controller of NEE from August 2021 to August 2023. Prior to that he served as Vice President, New York Financial Controller at National Grid plc from December 2019 to April 2021. Mr. Ketchum served as President and Chief Executive Officer of NEE from March 2022 to July 2022. He previously served as President and Chief Executive Officer of NextEra Energy Resources from March 2019 to February 2022. Mr. Lemasney served as Vice President of Power Generation Division Engineering and Operations Support Services of NEE from November 2018 to December 2022. Mr. May served as Vice President, Controller and Chief Accounting Officer of NEE from March 2019 to May 2025. Mr. Pimentel served as a member of the Board of Directors of Ameriprise Financial, Inc. from September 2022 to April 2025. He previously served as President of FPL from February 2023 to December 2025 and as President and Chief Executive Officer of NextEra Energy Resources from October 2011 to March 2019. Mr. Sieving previously served as Executive Vice President and General Counsel of NEE from December 2008 to May 2023.

Item 1A. Risk Factors

Risks Relating to NEE's and FPL's Business

The business, financial condition, results of operations and prospects of NEE and FPL are subject to a variety of risks, many of which are beyond the control of NEE and FPL. These risks, whether or not expressly stated with respect to any particular risk factor, as well as additional risks and uncertainties either not presently known or that are currently believed to not be material to the business, may materially adversely affect the business, financial condition, results of operations and prospects of NEE and FPL and may cause actual results of NEE and FPL to differ substantially from those that NEE or FPL currently expects or seeks. In that event, the market price for the securities of NEE or FPL could decline. Accordingly, the risks described below should be carefully considered together with the other information set forth in this report and in future reports that NEE and FPL file with the SEC.

Regulatory, Legislative and Legal Risks

NEE's and FPL's business, financial condition, results of operations and prospects may be materially adversely affected by the extensive regulation of their business.

The operations of NEE and FPL are subject to complex and comprehensive federal, state and other regulation. This extensive regulatory framework, portions of which are more specifically identified in the following risk factors, regulates, among other things and to varying degrees, NEE's and FPL's industry, businesses, operations, and rates and cost structures, including: siting, permitting, planning, construction and operation of electric generation, storage, transmission and distribution facilities and natural gas, oil and other fuel production, transportation, processing and storage facilities; acquisitions, disposals, depreciation and amortization of facilities and other assets; decommissioning costs and funding; service reliability; wholesale and retail competition; and commodities trading and derivatives transactions. In their business planning and in the management of their operations, NEE and FPL must address the effects of regulation on their business and any inability or failure to do so adequately could have a material adverse effect on their business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if they are unable to recover in a timely manner any significant amount of costs, a return on certain assets or a reasonable return on invested capital through base rates, cost recovery clauses, other regulatory mechanisms or otherwise.

FPL operates as an electric utility and is subject to the jurisdiction of the FPSC over a wide range of business activities, including, among other items, the retail rates charged to its customers through base rates and cost recovery clauses, the terms and conditions of its services, procurement of electricity for its customers and fuel for its plant operations, issuances of securities, and aspects of the siting, permitting, planning, construction and operation of its generation, storage, transmission and distribution facilities for the sale of electric energy. The FPSC has the authority to disallow recovery by FPL of costs that it considers excessive or imprudently incurred and to determine the level of return that FPL is permitted to earn on invested capital. The regulatory process, which may be adversely affected by the geopolitical, political, regulatory, operational and economic environment in Florida and elsewhere, limits or could otherwise adversely impact NEE's and FPL's earnings. The regulatory process also does not provide any assurance as to achievement of authorized or other earnings levels, or that FPL will be permitted to earn an acceptable return on capital investments it wishes to make. NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected if any material amount of costs, a return on certain assets or a reasonable return on invested capital cannot be recovered through base rates, cost recovery clauses, other regulatory mechanisms or otherwise. Certain other subsidiaries of NEE, such as subsidiaries of NEET, are utilities subject to the ratemaking jurisdiction of FERC, the PUCT or the OEB and are subject to similar risks.

Regulatory decisions that are important to NEE and FPL may be materially adversely affected by political, regulatory, operational and economic factors.

The local and national political, regulatory and economic environment has had, and may in the future have, an adverse effect on regulatory decisions with negative consequences for NEE and FPL. These decisions, which may come from any level of government, including through actions taken, or not taken, by government agencies as a result of executive orders, may require, for example, FPL or NEER to cancel or delay planned development activities, to reduce or delay other planned capital expenditures or to pay for investments or otherwise incur costs that it may not be able to recover through rates or otherwise, each of which could have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL.

Any reductions or modifications to, or the elimination of, governmental incentives or policies that support clean energy, including, but not limited to, tax laws, policies and incentives, RPS and feed-in-tariffs, or changes in or the imposition of additional taxes, tariffs, duties or other costs or assessments on clean energy or the equipment necessary to generate, store or deliver it, could result in, among other items, the lack of a satisfactory market for the development and/or financing of new clean energy projects, NEE and FPL abandoning the development of clean energy projects, a

loss of investments in clean energy projects and reduced project returns, any of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE depends on government policies that support clean energy and enhance the economic feasibility of developing and operating clean energy projects in regions in which NEER and FPL operate or plan to develop and operate such facilities. The federal government, a majority of state governments in the U.S. and portions of Canada provide incentives, such as tax incentives, RPS or feed-in-tariffs, that support or are designed to support the sale of energy from clean energy facilities, such as wind and solar energy facilities and energy storage facilities. However, as a result of budgetary constraints, geopolitical factors, political factors or otherwise, governments from time to time may review their laws and policies that support, or do not overly burden, the development and operation of clean energy facilities and, instead, consider or take actions, such as the OBBBA and related governmental actions, that make or would make the laws and policies less conducive to the development and operation of such projects. Any reductions or modifications to, or the elimination of, governmental incentives or policies that support clean energy or changes in or the imposition of additional taxes, tariffs, duties or other costs or assessments on clean energy or the equipment necessary to generate, store or deliver it, could result in, among other items, higher equipment costs, scarcity of equipment, the lack of a satisfactory market for the development and/or financing of new clean energy projects, NEE and FPL abandoning the development of clean energy projects, a loss of investments in the projects and reduced project returns, any of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected by new or revised laws, regulations or executive orders, as well as by regulatory action or inaction.

NEE's and FPL's business could be materially adversely affected by a variety of legal activity, such as: 1) the adoption of new or revised laws, such as international trade laws, regulations and interpretations; 2) constitutional ballot or regulatory initiatives, such as those seeking deregulation or restructuring of the energy industry; 3) new or revised regulations, such as those affecting the commodities trading and derivatives markets, emissions, water consumption, water discharges, wetlands, gas and oil infrastructure operations, and environmental and other permitting requirements for energy infrastructure projects; 4) actions taken, or not taken, by government agencies as a result of executive orders, such as failing to issue, delaying the issuance of, or increasing the requirements necessary to obtain approvals, rights-of-way, permits, determinations, leases or loans related to wind or other clean energy projects; and 5) changes in the way government interprets or applies laws, regulations and orders. Changes in the nature of the regulation of NEE's and FPL's business through this type or other types of legal activity, such as the repeal, revocation or reversal of existing laws, regulations or actions, could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects. NEE and FPL are unable to predict future legislative, regulatory or executive action or inaction, including through constitutional ballot initiatives or changed government interpretations or applications, although any such changes may increase costs, the challenges associated with developing and operating clean and other energy infrastructure projects, and competitive pressures on NEE and FPL, which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

FPL has limited, but growing, competition in the Florida market for retail electricity customers and is not subject to an RPS. Any changes in Florida law or regulation, whether through new, modified, repealed or overturned legislation, regulation or executive action or through citizen-approved state constitutional ballot initiatives, which increase competition in the Florida retail electricity market, such as government incentives that would further facilitate the installation of solar generation facilities on residential or other rooftops or would permit third-party sales of electricity, could have a material adverse effect on FPL's business, financial condition, results of operations and prospects. FPL and NEER are also regulated by FERC as transmission providers and sellers of wholesale power. FERC regulation of transmission and wholesale power transactions, including the ability of new energy infrastructure projects to interconnect to the transmission grid and sell the power they produce, evolves over time as a result of rulemaking proceedings and new legislative directives from Congress. There can be no assurance that FPL or NEER would be able to respond adequately to the aforementioned state and federal regulatory changes, which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

FPL and NEER are also subject to FERC rules related to transmission that are designed to facilitate competition in the wholesale market on practically a nationwide basis and that evolve over time. NEE cannot predict the impact of changing FERC rules or policies of the RTOs and ISOs, such as existing or potential future rules governing economic dispatch, generator and load interconnection procedures, transmission planning requirements, cost allocation methodologies and cost recovery policies, or the effect of changes in levels of wholesale supply and demand, which are typically driven by factors beyond NEE's control. There can be no assurance that FPL or NEER will be able to respond adequately to such rules and developments, which may impact the ability, timeline and cost to interconnect new or repowered energy projects to the transmission system and the availability of transmission system capacity to deliver energy products to market, or to any changes that reverse or restrict the competitive restructuring of the energy industry in those jurisdictions in which such restructuring has occurred. Any of these events could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

The structure of the energy industry and regulation in the U.S. is currently, and may continue to be, subject to challenges and restructuring proposals. Additional regulatory approvals may be required due to changes in law or for other reasons. NEE expects the laws and regulations applicable to its business and the energy industry, including laws and regulations generally supportive of clean energy project development, generally to be in a state of transition for the foreseeable future. Changes in the

structure of the industry or in such laws and regulations could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL are subject to numerous environmental laws, regulations and other standards that may result in capital expenditures, increased operating costs and various liabilities, and may require NEE and FPL to limit or eliminate certain operations.

NEE and FPL are subject to domestic environmental laws, regulations and other standards, including, but not limited to, extensive federal, state and local environmental statutes, rules and regulations relating to air quality, water quality and usage, soil quality, greenhouse gas emissions, waste management, hazardous wastes, marine, avian, bat and other wildlife mortality and habitat protection, historical artifact preservation, natural resources, health (including, but not limited to, electric and magnetic fields from power lines and substations), safety, fire prevention and RPS, that could, among other things, prevent or delay the development of electric generation, storage, transmission and distribution facilities, gas transportation, or other development projects, restrict or enjoin the output of some existing facilities, limit the availability and use of some fuels required for the production of electricity, require additional pollution control and fire prevention equipment, and otherwise increase costs, increase capital expenditures and limit or eliminate certain operations. Certain subsidiaries of NEE are also subject to foreign environmental laws, regulations and other standards and, as such, are subject to similar risks.

There are significant capital, operating and other costs associated with compliance with these environmental statutes, rules and regulations, and those costs could be even more significant in the future as a result of new requirements, stricter or more expansive application of existing environmental laws and regulations, and the addition of species, such as additional bat species, to the endangered species list.

Violations of current or future laws, rules, regulations or other standards could expose NEE and FPL to regulatory and legal proceedings, disputes with, and legal challenges by, governmental entities and third parties, and potentially significant civil fines, criminal penalties and other sanctions, such as restrictions on how NextEra Energy Resources develops, sites and operates wind facilities. These violations could result in, without limitation, litigation regarding property damage, personal injury, common law nuisance and enforcement by citizens or governmental authorities of environmental requirements. For example, one of NextEra Energy Resources' subsidiaries is currently on probation as a result of accidental collisions of eagles into wind turbines at a number of NextEra Energy Resources' wind facilities. If NextEra Energy Resources' subsidiary violates the terms of the probation, or fails to obtain eagle "take" permits under the BGEPA or incidental take permits under the ESA for certain of its wind facilities and additional eagles or listed species, like cave bats, perish in collisions with facility turbines, NextEra Energy Resources or its subsidiaries could face criminal prosecution under these laws.

NEE's and FPL's business could be negatively affected by federal or state laws or regulations mandating new or additional limits on the production of greenhouse gas emissions.

Federal or state laws or regulations may be adopted that would impose new or additional limits on greenhouse gas emissions, including, but not limited to, carbon dioxide and methane, from electric generation units using fuels, such as natural gas. The potential effects of greenhouse gas emission limits on NEE's and FPL's electric generation units are subject to significant uncertainties based on, among other things, the timing of the implementation of any new requirements, the required levels of emission reductions, the nature of any market-based or tax-based mechanisms adopted to facilitate reductions, the relative availability of greenhouse gas emission reduction offsets, the development of cost-effective, commercial-scale carbon capture and storage technology and supporting regulations and liability mitigation measures, and the range of available compliance alternatives.

The results of operations of NEE and FPL could be materially adversely affected to the extent that new federal or state laws or regulations impose any new greenhouse gas emission limits. Any future limits on greenhouse gas emissions could:

- create substantial additional costs in the form of taxes or emissions allowances;
- make some of NEE's and FPL's electric generation units uneconomical to operate in the long term;
- require significant capital investment in carbon capture and storage technology, fuel switching, or the replacement of high-emitting generation facilities with lower-emitting generation facilities; or
- affect the availability or cost of fuel, such as natural gas.

There can be no assurance that NEE or FPL would be able to completely recover any such costs or investments, which could have a material adverse effect on its business, financial condition, results of operations and prospects.

Extensive federal, state and local government regulation of the operations and businesses of NEE and FPL exposes NEE and FPL to significant and increasing compliance costs and may also expose them to substantial monetary penalties and other sanctions for compliance failures.

NEE's and FPL's operations and businesses are subject to extensive federal, state and local government regulation, which generally imposes significant and increasing compliance costs. Additionally, any actual or alleged compliance failures could result in significant costs and other potentially adverse effects of regulatory investigations, proceedings, settlements, decisions

and claims, including, among other items, potentially significant monetary penalties. As an example, under the Energy Policy Act of 2005, NEE and FPL, as owners and operators of bulk-power transmission systems and/or electric generation facilities, are subject to mandatory reliability standards. Compliance with these mandatory reliability standards may subject NEE and FPL to higher operating costs and may result in increased capital expenditures. If FPL or NEE is found not to be in compliance with these standards, they may incur substantial monetary penalties and other sanctions. In addition, certain of NEE's and FPL's sales to retail customers are subject to consumer protection laws and other regulations related to consumer activities that are implemented and enforced by a number of federal, state and local government entities. Both the costs of regulatory compliance and the costs that may be imposed as a result of any actual or alleged compliance failures could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

Changes in tax laws, guidance or policies, including but not limited to, changes in corporate income tax rates and the qualifications for clean energy tax credits, as well as judgments and estimates used in the determination of tax-related asset and liability amounts, could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's provision for income taxes and reporting of tax-related assets and liabilities require significant judgments and the use of estimates. Amounts of tax-related assets and liabilities involve judgments and estimates of the timing and probability of recognition of income, deductions and tax credits, including, but not limited to, estimates for potential adverse outcomes regarding tax positions that have been taken and the ability to utilize tax benefit carryforwards, such as net operating loss and tax credit carryforwards. Actual income taxes could vary significantly from estimated amounts due to the future impacts of, among other things, changes in tax laws, guidance or policies, including, but not limited to, changes in corporate income tax rates, clean energy tax credits and transferability of clean energy tax credits, the issuance of guidance related to the qualification for clean energy tax credits and bonus credits, the financial condition and results of operations of NEE and FPL and the resolution of audit issues raised by taxing authorities. These factors, including the ultimate resolution of income tax matters, may result in material adjustments to tax-related assets and liabilities, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects may be materially affected due to adverse results of litigation.

NEE's and FPL's business, financial condition, results of operations and prospects may be materially affected by adverse results of litigation. Unfavorable resolution of legal or administrative proceedings in which NEE or FPL is involved or other future legal or administrative proceedings may have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL.

Allegations of violations of law by FPL or NEE have the potential to result in fines, penalties, or other sanctions or effects, as well as cause reputational damage for FPL and NEE, and could hamper FPL's and NEE's effectiveness in interacting with governmental authorities.

FPL's and NEE's business and reputation could be adversely affected by allegations that FPL or NEE has violated laws, by any investigations or proceedings that arise from such allegations, or by ultimate determinations of legal violations. For example, media articles were first published in 2021 that alleged, among other things, Florida state and federal campaign finance law violations by FPL. FPL and NEE cannot provide assurance that the outcome of any allegations of violations of law will not result in the imposition of material fines, penalties, or otherwise result in other sanctions or effects on FPL or NEE, or will not have a material adverse impact on the reputation of NEE or FPL or on the effectiveness of their interactions with governmental regulators or other authorities.

Development and Operational Risks

NEE's and FPL's business, financial condition, results of operations and prospects could suffer if NEE and FPL do not proceed with projects under development or are unable to complete the construction of, or capital improvements to, electric generation, storage, transmission and distribution facilities, natural gas and oil production and transportation facilities and other facilities on schedule or within budget.

NEE's and FPL's ability to proceed with projects under development and to complete construction of, and capital improvement projects for, their electric generation, storage, transmission and distribution facilities, natural gas and oil production and transportation facilities and other facilities on schedule and within budget have been, from time to time, and in the future may be, adversely affected by timely availability of equipment and labor, escalating costs for materials, labor and regulatory compliance, inability to obtain, maintain or renew necessary licenses, rights-of-way, permits or other approvals on acceptable terms or on schedule, disputes involving contractors, labor organizations, land owners, governmental entities, environmental groups, Native American and aboriginal groups, lessors, joint venture partners, suppliers and other third parties, negative publicity, transmission interconnection issues, geopolitical factors, supply chain disruptions, inflation, rising interest rates and other factors. For example, the ability of NEE and FPL to develop certain generation and storage facilities is dependent on the international supply chain for generation equipment, batteries and other associated equipment, and governmental or regulatory actions have caused

minor, and could in the future cause material, disruptions in the ability of NEE and FPL to acquire certain generation equipment and batteries on time and at acceptable costs.

Additionally, NEER is actively pursuing the restart of the Duane Arnold nuclear generation facility. The restart is subject to certain regulatory approvals, including NRC safety and environmental reviews, as well as permits from relevant state and local agencies. NEER has applied to the NRC to reinstate the operating license and to MISO for an interconnection agreement. Failure to obtain the necessary approvals could result in the impairment of amounts capitalized. Further, NEE could encounter difficulty in procuring or restoring specialized components which could impact the restart timeline. NEE could incur costs greater than expected or encounter unforeseen issues.

If any development project or construction or capital improvement project is not completed, is delayed or is subject to cost overruns, certain associated costs may not be approved for recovery or otherwise be recoverable through regulatory mechanisms that may be available, and NEE and FPL could become obligated to make delay or termination payments or become obligated for other damages under contracts, could experience the loss, or reduction, of tax credits, bonus credits or tax incentives, the inability to transfer tax credits, or delayed or diminished returns, and could be required to write off all or a portion of their investment in the project. Any of these events could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL face risks related to project siting, construction, permitting, governmental approvals and the negotiation of project development agreements that may impede their development and operating activities.

NEE and FPL own, develop, construct, manage and operate electric generation, storage, transmission and distribution facilities and natural gas pipelines. A key component of NEE's and FPL's growth is their ability to site, permit, construct and operate generation, storage, transmission and distribution facilities and natural gas pipelines to meet customer needs. As part of these operations, NEE and FPL must periodically apply for licenses and permits, including those related to project siting, from various local, state, federal and other regulatory authorities and abide by their respective conditions. Should NEE or FPL be unsuccessful in obtaining or maintaining necessary licenses or permits on acceptable terms or resolving third-party challenges to such licenses or permits, should there be any delay in obtaining or renewing necessary licenses or permits or should regulatory authorities initiate any associated investigations or enforcement actions or impose related penalties or disallowances on NEE or FPL, NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected. Any failure to negotiate successful project development agreements for new facilities with third parties could have similar consequences.

The operation and maintenance of NEE's and FPL's electric generation, storage, transmission and distribution facilities, natural gas and oil production and transportation facilities and other facilities are subject to many operational risks, the consequences of which could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's electric generation, storage, transmission and distribution facilities, natural gas and oil production and transportation facilities and other facilities are subject to many operational uncertainties and risks. Operational uncertainties and risks could result in, among other things, lost revenues due to prolonged outages, increased expenses due to monetary penalties or fines for compliance failures or legal claims, liability to third parties for property and personal injury damage or loss of life, unsatisfied customers, a failure to perform under applicable power sales agreements or other agreements and associated loss of revenues from terminated agreements or liability for liquidated damages under continuing agreements, and replacement equipment costs or an obligation to purchase or generate replacement power at higher prices.

Uncertainties and risks inherent in operating and maintaining NEE's and FPL's facilities that could cause these results include, but are not limited to:

- risks associated with facility start-up operations, such as whether the facility will achieve projected operating performance on schedule and otherwise as planned;
- failures in the availability, acquisition or transportation of fuel or other necessary supplies;
- the impact of unusual or adverse weather conditions and natural disasters, including, but not limited to, hurricanes, tornadoes, extreme temperatures, icing events, wildfires, floods, severe convective storms, earthquakes and droughts;
- performance below expected or contracted levels of output or efficiency;
- breakdown or failure of equipment, transmission or distribution systems or pipelines whether as a result of explosions, fires, leaks, other events or otherwise;
- lack of availability of replacement equipment;
- risks of property damage, human injury or loss of life from energized equipment, hazardous substances or explosions, fires, leaks or other events, including where facilities are located near populated areas;
- potential environmental impacts of natural gas and oil production and transportation operations;
- risks associated with potential harm to wildlife;
- lack of availability of adequate water resources and ability to satisfy water intake and discharge requirements;
- inability to identify, manage properly or mitigate equipment defects in NEE's and FPL's facilities;
- use of new or unproven technology;

- inability to anticipate or adapt to changes in the reliability of NEE's or FPL's equipment, operating systems or facilities;
- risks associated with dependence on a specific type of fuel or fuel source, such as commodity price risk, availability of adequate fuel supply and transportation, and lack of available alternative fuel sources;
- increased competition due to, among other factors, new facilities, excess supply, shifting demand and regulatory changes; and
- insufficient insurance, warranties or performance guarantees to cover any or all lost revenues or increased expenses from the foregoing.

NEE's and FPL's business, financial condition, results of operations and prospects may be negatively affected by a lack of growth, slower growth or a decline in the number of customers or in customer usage.

Growth in customer accounts and growth of customer usage each directly influence the demand for electricity and the need for additional power generation and power delivery facilities, as well as the need for energy-related commodities, such as natural gas. Customer growth and customer usage are affected by a number of factors outside the control of NEE and FPL, such as mandated energy efficiency measures, demand side management requirements, installation of distributed generation technologies and economic and demographic conditions, such as population changes, job and income growth, housing starts, new business formation, expanded use of data centers, inflation and the overall level of economic activity. A lack of growth, or a decline, in the number of customers or in customer demand for electricity or natural gas and other fuels may cause NEE and FPL to fail to fully realize benefits from pending and planned future investments and expenditures and could have a material adverse effect on NEE's and FPL's growth, business, financial condition, results of operations and prospects.

The productivity increases and competitive advantages NEE and FPL plan to achieve through the use of artificial intelligence (AI) technologies may not be realized and the use of and reliance on AI may present certain risks, both of which could materially adversely affect their business, financial condition, results of operations and prospects.

NEE and FPL use AI technologies in various aspects of their operations, including, without limitation, financial analysis, strategic planning, field work intelligence, work scheduling, grid optimization, energy forecasting, customer service and operations management. The use of and reliance on AI may present certain risks such as, but not limited to, AI tools may malfunction, produce inaccurate or biased outputs, or behave unpredictably, and introduce NEE and FPL to additional cybersecurity threats and data privacy risks. In addition, as NEE and FPL rely on third-party vendors for certain AI tools, platforms and collaborations, NEE and FPL could experience third-party vendor issues such as disruptions in vendor relationships, performance issues, cybersecurity threats or disputes over intellectual property rights. Further, the regulatory environment governing AI is also evolving, and future legislation or agency rulemaking may impose new compliance obligations or restrict certain AI applications, increasing costs to comply with such requirements and failure to do so could result in regulatory enforcement, penalties or reputational harm. While AI technologies offer the potential to enhance operational efficiency, accelerate growth and lower costs, these benefits may not be realized and the use of and reliance on AI may present certain risks, both of which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects can be materially adversely affected by weather conditions and related impacts, including, but not limited to, the impact of severe weather.

Weather conditions directly influence the demand for electricity and natural gas and other fuels and affect the price of energy and energy-related commodities. In addition, severe weather and natural disasters, such as hurricanes, floods, tornadoes, droughts, extreme temperatures, icing events, wildfires, severe convective storms and earthquakes, can be destructive and cause power outages, personal injury and property damage, reduce revenue, affect the availability of fuel and water, and require NEE and FPL to incur additional costs, for example, to restore service and repair damaged facilities, to obtain replacement power, to access available financing sources, to obtain insurance, to pay for any associated injuries and damages and to fund any associated legal matters and compliance penalties. Furthermore, NEE's and FPL's physical plants could be placed at greater risk of damage should there be unusual variations in temperature and weather patterns, resulting in more intense, frequent and extreme weather events, abnormal levels of precipitation and, particularly relevant to FPL, a change in sea level. For example, FPL operates in the east and lower west coasts of Florida and in northwest Florida, areas that historically have been prone to severe weather events, such as hurricanes. A disruption or failure of electric generation, storage, transmission or distribution systems or natural gas production, transmission, storage or distribution systems in the event of a hurricane, tornado or other severe weather event, or otherwise, could prevent NEE and FPL from operating their business in the normal course and could result in any of the adverse consequences described above. Additionally, the actions taken to address the potential for severe weather such as additional winterizing of critical equipment and infrastructure, modifying or alternating plant operations and expanding load shedding options could result in significant increases in costs. Any of the foregoing could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

At FPL and other businesses of NEE where cost recovery is available, recovery of costs to restore service, to repair damaged facilities or for other actions to address severe weather is or may be subject to regulatory approval, and any determination by the regulator not to permit timely and full recovery of the costs incurred could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

Changes in weather can also affect the production of electricity at power generation facilities, including, but not limited to, NEER's wind and solar facilities. For example, the level of wind resource affects the revenue produced by wind generation facilities. Because the levels of wind and solar resources are variable and difficult to predict, NEER's results of operations for individual wind and solar facilities specifically, and NEE's results of operations generally, may vary significantly from period to period, depending on the level of available resources. To the extent that resources are not available at planned levels, the financial results from these facilities may be less than expected.

Threats of terrorism and catastrophic events that could result from geopolitical factors, terrorism, cyberattacks, or individuals and/or groups attempting to disrupt NEE's and FPL's business, or the businesses of third parties, may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL are subject to the potentially adverse operating and financial effects of geopolitical factors, terrorist acts and threats, cyberattacks and other disruptive activities of individuals or groups. There have been cyberattacks and other physical attacks within the energy industry on energy infrastructure such as substations, gas pipelines and related assets in the past and there may be such attacks in the future. In addition, the advancement of artificial intelligence has given rise to added vulnerabilities and potential entry points for cyberattacks. NEE's and FPL's electric generation, storage, transmission and distribution facilities, information technology systems and other infrastructure facilities and systems could be direct targets of, or otherwise be materially adversely affected by, such activities.

Geopolitical factors, terrorist acts, cyberattacks or other similar events affecting NEE's and FPL's systems and facilities, or those of third parties on which NEE and FPL rely, could harm NEE's and FPL's businesses by, for example, limiting their ability to generate, purchase, store or transmit power, natural gas or other energy-related commodities, limiting their ability to bill customers and collect and process payments, and delaying their development and construction of new electric generation, storage, distribution or transmission assets or capital improvements to existing facilities. These events, and governmental actions in response, could result in a material decrease in revenues, significant additional costs (for example, to repair assets, implement additional security requirements or maintain or acquire insurance), significant fines and penalties, and reputational damage, could materially adversely affect NEE's and FPL's operations (for example, by contributing to disruption of supplies and markets for natural gas, oil and other fuels), and could impair NEE's and FPL's ability to raise capital (for example, by contributing to financial instability and lower economic activity). In addition, the implementation of security guidelines and measures has resulted in, and is expected to continue to result in, increased costs. Such events or actions may materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. NEE's and FPL's insurance coverage does not provide protection against all significant losses.

Insurance coverage may not continue to be available or may not be available at rates or on terms similar to those presently available to NEE and FPL. The ability of NEE and FPL to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, including impacts of actual or perceived climate-related events, as well as the financial condition of insurers. If NEE or FPL cannot or does not obtain insurance coverage, NEE or FPL may be required to pay costs associated with adverse future events. Additionally, if certain unconsolidated subsidiaries of NEE do not obtain third-party insurance coverage, NEE may be required to pay costs associated with losses or adverse future events involving these entities.

NEE and FPL generally are not fully insured against all significant losses. For example, NEE, including FPL, does not have property insurance coverage for a substantial portion of its transmission and distribution property and natural gas pipeline assets. A loss for which NEE or FPL is not fully insured could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE invests in natural gas and oil production assets which are exposed to fluctuating market prices of natural gas, natural gas liquids, oil and other energy commodities. A prolonged period of low natural gas and oil prices, disrupted production or unsuccessful drilling efforts could impact NEER's natural gas and oil production operations and cause NEER to delay or cancel certain natural gas and oil production projects and could result in certain assets becoming impaired, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.

Natural gas and oil prices are affected by supply and demand, both globally and regionally. Factors that influence supply and demand include operational issues, natural disasters, weather, political instability, conflicts, new discoveries, technological advances, economic conditions and actions by major oil-producing countries. There can be significant volatility in market prices for natural gas and oil, and price fluctuations could have a material effect on the financial performance of natural gas and oil producing assets. For example, in a low natural gas and oil price environment, NEER would generate less revenue from its investments in natural gas and oil production properties, and as a result certain investments might become less profitable or incur losses. Additionally, production could be disrupted due to weather or operational issues, among other causes, or drilling efforts could be unsuccessful. Prolonged periods of low oil and gas prices or low production, including from unsuccessful drilling efforts, could also result in the delay or cancellation of natural gas and oil production projects, could cause projects to experience

lower returns, and could result in certain assets becoming impaired, which could materially adversely affect NEE's business, financial condition, results of operations and prospects.

If supply costs necessary to provide NEE's full energy and capacity requirements services are not favorable, operating costs could increase and materially adversely affect NEE's business, financial condition, results of operations and prospects.

NEE provides full energy and capacity requirements services primarily to distribution utilities, which include load-following services and various ancillary services, to satisfy all or a portion of such utilities' power supply obligations to their customers. The supply costs for these transactions may be affected by a number of factors, including, but not limited to, weather conditions, transmission constraints, fluctuating prices for, and locational disconnects in, energy and ancillary services, and the ability of the distribution utilities' customers to elect to receive service from competing suppliers. If any of these factors materialize, costs to supply services may exceed revenues generated or be below expected return levels, which could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

Due to the potential for significant volatility in market prices for fuel, electricity, transmission rights and environmental and other energy-related commodities, NEE's inability or failure to manage properly or hedge effectively the commodity risks within its portfolio could materially adversely affect NEE's business, financial condition, results of operations and prospects.

There can be significant volatility in market prices for fuel, electricity, transmission rights and environmental and other energy-related commodities, both in general and across geographies. NEE's inability or failure to manage properly or hedge effectively its assets or positions against changes in commodity prices, volumes, interest rates, counterparty credit risk or other risk measures, based on factors that are either within, or wholly or partially outside of, NEE's control, may materially adversely affect NEE's business, financial condition, results of operations and prospects.

Reductions in the liquidity of energy markets may restrict NEE's ability to manage its operational risks, which, in turn, could negatively affect NEE's business, financial condition, results of operations and prospects.

NEE is an active participant in energy markets. Liquidity in energy markets can be described as the degree to which a product, such as electricity, gas or transmission rights, can be quickly bought or sold without significantly affecting its price and without incurring significant transaction costs. It can be driven in part by the number of active market participants and is an important factor in NEE's ability to manage risks in its participation in these markets. Liquidity in the energy markets can be adversely affected by price volatility, restrictions on the availability of credit, inflation, rising interest rates and other factors, and any reduction in the liquidity of energy markets could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

NEE's and FPL's hedging and trading procedures and associated risk management tools may not protect against significant losses.

NEE and FPL have hedging and trading procedures and associated risk management tools, such as separate but complementary financial, credit, operational, compliance and legal reporting systems, internal controls, management review processes and other mechanisms. NEE and FPL are unable to assure that such procedures and tools will be effective against all potential risks, including, without limitation, employee misconduct or severe weather or operating conditions. If such procedures and tools are not effective, this could have a material adverse effect on NEE's business, financial condition, results of operations and prospects.

If price movements significantly or persistently deviate from historical behavior, NEE's and FPL's risk management tools associated with their hedging and trading procedures may not protect against significant losses.

NEE's and FPL's risk management tools and metrics associated with their hedging and trading procedures, such as daily value at risk, earnings at risk, stop loss limits and liquidity guidelines, are based on historical price movements. Due to the inherent uncertainty involved in price movements and potential deviation from historical pricing behavior, NEE and FPL are unable to assure that their risk management tools and metrics will be effective to protect against significant losses that could have a material adverse effect on their business, financial condition, results of operations and prospects.

If power transmission or natural gas, nuclear fuel or other commodity transportation operations are unavailable or disrupted, the ability for subsidiaries of NEE, including FPL, to sell and deliver power or natural gas may be limited.

Subsidiaries of NEE, including FPL, depend upon power transmission and natural gas, nuclear fuel and other commodity transportation operations, many of which they do not own or control. Occurrences affecting these operations that may or may not be beyond the control of subsidiaries of NEE, including FPL, (such as geopolitical factors, cyber incidents, physical attacks, severe weather or a generation or transmission asset outage, pipeline rupture, or sudden and significant increase or decrease in wind or solar generation) may limit or halt their ability to sell and deliver power and natural gas, or to purchase necessary fuels

and other commodities, which could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL are subject to credit and performance risk from customers, hedging counterparties and vendors.

NEE and FPL are exposed to risks associated with the creditworthiness and performance of their customers, hedging counterparties and vendors under contracts for the supply of equipment, materials, fuel and other goods and services required for their business operations and for the construction and operation of, and for capital improvements to, their facilities. Adverse conditions in the energy industry or the general economy such as inflation, as well as circumstances of individual customers, hedging counterparties and vendors, may adversely affect the ability of some customers, hedging counterparties and vendors to perform as required under their contracts with NEE and FPL.

If any customer, vendor or hedging or other counterparty fails to fulfill its contractual obligations, NEE and FPL may need to make arrangements with other counterparties, customers or vendors, which could result in material financial losses, higher costs, untimely completion of electric generation or storage facilities and other projects, or a disruption of their operations. If a defaulting counterparty is in poor financial condition, NEE and FPL may not be able to recover damages for any contract breach.

NEE and FPL could recognize financial losses or a reduction in operating cash flows if a counterparty fails to perform or make payments in accordance with the terms of derivative contracts or if NEE or FPL is required to post margin cash collateral under derivative contracts.

NEE and FPL use derivative instruments, such as swaps, options, futures and forwards, some of which are traded in the OTC markets or on exchanges, to manage their commodity and financial market risks, and for NEE to engage in commodity trading and marketing activities. Any failures by their counterparties to perform or make payments in accordance with the terms of those transactions could have a material adverse effect on NEE's or FPL's business, financial condition, results of operations and prospects. Similarly, any requirement for NEE or FPL to post margin cash collateral under its derivative contracts could have a material adverse effect on its business, financial condition, results of operations and prospects. These risks may be increased during periods of adverse market or economic conditions such as inflation affecting the industry in which NEE and FPL participate.

NEE and FPL are highly dependent on sensitive and complex information technology systems, and any failure or breach of those systems, or implementation challenges, could have a material adverse effect on their business, financial condition, results of operations and prospects.

NEE and FPL operate in a highly regulated industry that requires the continuous functioning of sophisticated information technology systems and network infrastructure. Despite NEE's and FPL's implementation of security measures, all of their technology systems are vulnerable to disability, failures or unauthorized access. If NEE's or FPL's information technology systems were to fail or be breached, sensitive, confidential and other data could be compromised and NEE and FPL could be unable to fulfill critical business functions.

NEE's and FPL's businesses are highly dependent on NEE's and FPL's ability to process and monitor, on a daily basis, a very large number of transactions, many of which are highly complex and cross numerous and diverse markets. Due to the size, scope, complexity and geographical reach of NEE's and FPL's business, the development and maintenance of information technology systems to keep track of and process information is critical and challenging. NEE's and FPL's operating systems and facilities may fail to operate properly or become disabled as a result of events that are either within, or wholly or partially outside of, their control, such as operator error, severe weather, geopolitical activities, terrorist activities or cyber incidents. NEE and FPL also face the risks of operational failure or capacity constraints associated with the information systems of third parties, including, but not limited to, those who provide power transmission and natural gas transportation services. Any such failure or disabling event could impact NEE's and FPL's ability to process transactions and provide services, and materially adversely affect their business, financial condition, results of operations and prospects.

NEE and FPL add, modify and replace information systems on a regular basis. Modifying existing information systems or implementing new or replacement information systems is costly and involves risks, including, but not limited to, integrating the modified, new or replacement system with existing systems and processes, implementing associated changes in accounting procedures and controls, and ensuring that data conversion is accurate and consistent. Any disruptions or deficiencies in existing information systems, or disruptions, delays or deficiencies in the modification or implementation of new information systems, could result in increased costs, the inability to track or collect revenues and the diversion of management's and employees' attention and resources, and could negatively impact the effectiveness of NEE's and FPL's control environment, and/or their ability to timely file required regulatory reports which could materially adversely affect their business, financial condition, results of operations and prospects.

NEE's and FPL's retail businesses are subject to the risk that sensitive customer data may be compromised, which could result in a material adverse impact to their reputation and/or have a material adverse effect on the business, financial condition, results of operations and prospects of NEE and FPL.

NEE's and FPL's retail businesses require access to sensitive customer data in the ordinary course of business. NEE's and FPL's retail businesses may also need to provide sensitive customer data to vendors and service providers who require access to this information in order to provide services, such as call center services, to the retail businesses. If a significant breach occurred, the reputation of NEE and FPL could be materially adversely affected, customer confidence could be diminished, or customer information could be subject to identity theft. NEE and FPL would be subject to costs associated with the breach and/or NEE and FPL could be subject to fines and legal claims, any of which may have a material adverse effect on their business, financial condition, results of operations and prospects.

NEE and FPL could recognize financial losses as a result of volatility in the market values of derivative instruments and limited liquidity in OTC markets.

NEE and FPL execute transactions in derivative instruments on either recognized exchanges or through the OTC markets, depending on management's assessment of the most favorable credit and market execution factors. Transactions executed on OTC markets have the potential for greater volatility and less liquidity than transactions on recognized exchanges. As a result, NEE and FPL may not be able to execute desired OTC transactions due to such heightened volatility and limited liquidity.

In the absence of actively quoted market prices and pricing information from external sources, the valuation of derivative instruments involves management's judgment and use of estimates. As a result, changes in the underlying assumptions or use of alternative valuation methods could affect the reported fair value of these derivative instruments and have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE and FPL may be materially adversely affected by negative publicity.

From time to time, political and public sentiment has resulted in and may result in a significant amount of adverse press coverage and other adverse public statements affecting NEE and FPL. Adverse press coverage and other adverse statements, whether or not driven by political or public sentiment, may also result in investigations by regulators, legislators and law enforcement officials, internal investigations or in legal claims. Responding to the negative publicity and any resulting investigations and lawsuits, regardless of the ultimate outcome of the proceeding, can divert the time and effort of senior management from NEE's and FPL's business.

Addressing any adverse publicity, governmental scrutiny or enforcement or other legal proceedings is time consuming and expensive and, regardless of the factual basis for the assertions being made, can have a negative impact on the reputation of NEE and FPL, on the morale and performance of their employees and on their relationships with regulators. It may also have a negative impact on their ability to take timely advantage of various business and market opportunities. The direct and indirect effects of negative publicity, and the demands of responding to and addressing it, may have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects may be adversely affected if FPL is unable to maintain, negotiate or renegotiate franchise agreements on acceptable terms with municipalities and counties in Florida.

FPL may negotiate franchise agreements with municipalities and counties in Florida to provide electric services within such municipalities and counties, and electricity sales generated pursuant to these agreements represent a very substantial portion of FPL's revenues. If FPL is unable to maintain, negotiate or renegotiate such franchise agreements on acceptable terms, it could contribute to lower earnings and FPL may not fully realize the anticipated benefits from significant investments and expenditures, which could adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected by work strikes or stoppages and increasing personnel costs.

Employee strikes or work stoppages could disrupt operations and lead to a loss of revenue and customers. Personnel costs may also increase due to inflationary or competitive pressures on payroll and benefits costs and revised terms of collective bargaining agreements with union employees. These consequences could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

NEE's ability to successfully identify, complete and integrate acquisitions is subject to significant risks, including, but not limited to, the effect of increased competition for acquisitions resulting from the consolidation of the energy industry.

NEE is likely to encounter significant competition for acquisition opportunities that may become available as a result of the consolidation of the energy industry. In addition, NEE may be unable to identify attractive acquisition opportunities at favorable prices and to complete and integrate them successfully and in a timely manner.

Nuclear Generation Risks

The operation and maintenance of NEE's and FPL's nuclear generation facilities involve environmental, health and financial risks that could result in fines or the closure of the facilities and in increased costs and capital expenditures.

NEE's and FPL's nuclear generation facilities are subject to environmental, health and financial risks, including, but not limited to, those relating to site storage of spent nuclear fuel, the disposition of spent nuclear fuel, leakage and emissions of tritium and other radioactive elements in the event of a nuclear accident or otherwise, the threat of a terrorist attack or cyber incident and other potential liabilities arising out of the ownership or operation of the facilities. NEE and FPL maintain decommissioning funds and external insurance coverage which are intended to reduce the financial exposure to some of these risks; however, the cost of decommissioning nuclear generation facilities could exceed the amount available in NEE's and FPL's decommissioning funds, and the exposure to liability and property damages could exceed the amount of insurance coverage. If NEE or FPL is unable to recover the additional costs incurred through insurance or, in the case of FPL, through regulatory mechanisms, its business, financial condition, results of operations and prospects could be materially adversely affected.

In the event of an incident at any nuclear generation facility in the U.S. or at certain nuclear generation facilities in Europe, NEE and FPL could be assessed significant retrospective assessments and/or retrospective insurance premiums as a result of their participation in a secondary financial protection system and nuclear insurance mutual companies.

Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains the maximum amount of private liability insurance obtainable, and participates in a secondary financial protection system, which provides liability insurance coverage for an incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments and/or retrospective insurance premiums, plus any applicable taxes, for an incident at any nuclear reactor in the U.S. or at certain nuclear generation facilities in Europe, regardless of fault or proximity to the incident. Such assessments, if levied, could materially adversely affect NEE's and FPL's business, financial condition, results of operations and prospects.

NRC orders or new regulations related to increased security measures and any future safety requirements promulgated by the NRC could require NEE and FPL to incur substantial operating and capital expenditures at their nuclear generation facilities and/or result in reduced revenues.

The NRC has broad authority to impose licensing and safety-related requirements for the operation and maintenance of nuclear generation facilities, the addition of capacity at existing nuclear generation facilities and the construction of new nuclear generation facilities, and these requirements are subject to change. In the event of non-compliance, the NRC has the authority to impose fines and/or shut down a nuclear generation facility, depending upon the NRC's assessment of the severity of the situation, until compliance is achieved. Any of the foregoing events could require NEE and FPL to incur increased costs and capital expenditures, and could reduce revenues.

Any serious nuclear incident occurring at a NEE or FPL plant could result in substantial remediation costs and other expenses. A major incident at a nuclear facility anywhere in the world could cause the NRC to limit or prohibit the operation or licensing of any domestic nuclear generation facility. An incident at a nuclear facility anywhere in the world also could cause the NRC to impose additional conditions or other requirements on the industry, or on certain types of nuclear generation units, which could increase costs, reduce revenues and result in additional capital expenditures for NEE and FPL.

The inability to operate any of NEE's or FPL's nuclear generation units through the end of their respective operating licenses or planned license extensions could have a material adverse effect on NEE's and FPL's business, financial condition, results of operations and prospects.

If any of NEE's or FPL's nuclear generation facilities are not operated for any reason through the life of their respective operating licenses or planned license extensions, NEE or FPL may be required to increase depreciation rates, incur impairment charges and accelerate future decommissioning expenditures, any of which could materially adversely affect its business, financial condition, results of operations and prospects.

NEE's and FPL's nuclear units are periodically removed from service to accommodate planned refueling and maintenance outages, and for other purposes. If planned outages last longer than anticipated or if there are unplanned outages, NEE's and FPL's business, financial condition, results of operations and prospects could be materially adversely affected.

NEE's and FPL's nuclear units are periodically removed from service to accommodate planned refueling and maintenance outages, including, but not limited to, inspections, repairs and certain other modifications as well as to replace equipment. In the event that a scheduled outage lasts longer than anticipated or in the event of an unplanned outage due to, for example, equipment failure, such outages could materially adversely affect NEE's or FPL's business, financial condition, results of operations and prospects.

Liquidity, Capital Requirements and Common Stock Risks

Disruptions, uncertainty or volatility in the credit and capital markets, among other factors, may negatively affect NEE's and FPL's ability to fund their liquidity and capital needs and to meet their growth objectives, and could also materially adversely affect their business, financial condition, liquidity, results of operations and prospects.

NEE and FPL rely on access to capital and credit markets as significant sources of liquidity for capital requirements, refinancing activities to support existing debt maturities and other requirements that are not satisfied by operating cash flows. Disruptions, uncertainty or volatility in those capital and credit markets related to or caused by inflation, rising or sustained higher interest rates, political, regulatory and geopolitical events or other factors could increase NEE's and FPL's cost of capital and limit or eliminate their ability to fund their liquidity and capital needs, to refinance existing indebtedness and to meet their growth objectives. If NEE or FPL is unable to access regularly the capital and credit markets on terms that are as expected, it may have to delay raising capital, issue shorter-term securities, incur an unfavorable cost of capital or reduce or eliminate planned investments, which, in turn, could adversely affect its ability to maintain and grow its business, could contribute to lower earnings or result in losses or reduced financial flexibility and could have a material adverse effect on its business, financial condition, liquidity, results of operations and prospects.

Although certain NEE subsidiaries have used non-recourse or limited-recourse, project-specific or other financing structures or arrangements in the past, market conditions, changes to regulatory capital requirements, credit ratings requirements and other factors could adversely affect the future availability of such financing, structures or arrangements. The inability of NEE's subsidiaries, including, without limitation, NEECH and its subsidiaries, to access the capital and credit markets to provide project-specific or other financing for electric generation or other facilities or acquisitions on favorable terms, whether because of disruptions or volatility in those markets or otherwise, could necessitate additional capital raising or borrowings by NEE and/or NEECH in the future and there can be no assurance that NEE or NEECH will have the ability to complete such financings.

Defaults or noncompliance related to project-specific, limited-recourse financing agreements of NEE's consolidated and unconsolidated subsidiaries could materially adversely affect NEE's business, financial condition, liquidity, results of operations and prospects, as well as the availability or terms of future financings for NEE or its subsidiaries.

NEE's consolidated and unconsolidated subsidiaries finance a number of their assets with project-specific, limited-recourse financings. The inability of subsidiaries that have existing project-specific or other financing arrangements to meet the requirements of various agreements relating to those financings, as well as actions by third parties or lenders, could give rise to a project-specific financing default which, if not cured or waived, might result in the specific project, and potentially in some instances its parent companies, being required to repay the associated debt or other borrowings earlier than otherwise anticipated. If such repayments were not made, the lenders or security holders would generally have rights to foreclose against the project assets and related collateral. Such an occurrence also could result in NEE expending additional funds or incurring additional obligations over the shorter term to ensure continuing compliance with project-specific financing arrangements based upon the expectation of improvement in the project's performance or financial returns over the longer term. Any of these actions could materially adversely affect NEE's business, financial condition, liquidity, results of operations and prospects, as well as the availability or terms of future financings for NEE or its subsidiaries.

NEE's, NEECH's and FPL's inability to maintain their current credit ratings may materially adversely affect NEE's and FPL's liquidity and results of operations, limit the ability of NEE and FPL to grow their business, and increase interest costs.

The inability of NEE, NEECH and FPL to maintain their current credit ratings could materially adversely affect their ability to raise capital or obtain credit on favorable terms, which, in turn, would likely increase their interest costs and could impact NEE's and FPL's ability to raise capital to grow and otherwise fund their businesses, including, without limitation, to service indebtedness and refinance or repay borrowings. In addition, certain agreements and guarantee arrangements would require posting of additional collateral in the event of a ratings downgrade. Some of the factors that can affect credit ratings are cash flows, liquidity, the amount of debt as a component of total capitalization including rating agencies' treatment of certain indebtedness, NEE's overall business mix and political, legislative and regulatory actions. There can be no assurance that one or more of the ratings of NEE, NEECH and FPL will not be lowered or withdrawn entirely by a rating agency.

NEE's and FPL's liquidity may be reduced if their credit providers are unable to fund their credit commitments to NEE, NEECH or FPL or to maintain their current credit ratings.

The inability of NEE's, NEECH's and FPL's credit providers to fund their credit commitments or to maintain their current credit ratings could require NEE, NEECH or FPL, among other things, to renegotiate requirements in agreements, find an alternative credit provider with acceptable credit ratings to meet funding requirements, or post cash collateral and could have a material adverse effect on NEE's and FPL's liquidity.

Poor market performance and other economic factors could affect NEE's defined benefit pension plan's funded status, which may materially adversely affect NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries. A decline in the market value of the assets held in the defined benefit pension plan due to poor investment performance or other factors may increase the funding requirements for this obligation.

NEE's defined benefit pension plan is sensitive to changes in interest rates, since as interest rates decrease, the funding liabilities increase, potentially increasing benefits costs and funding requirements. Any increase in benefits costs or funding requirements may have a material adverse effect on NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

Poor market performance and other economic factors could adversely affect the asset values of NEE's and FPL's nuclear decommissioning funds, which may materially adversely affect NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

NEE and FPL are required to maintain decommissioning funds to satisfy their future obligations to decommission their nuclear power plants. A decline in the market value of the assets held in the decommissioning funds due to poor investment performance or other factors may increase the funding requirements for these obligations. Any increase in funding requirements may have a material adverse effect on NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

Certain of NEE's assets and investments are subject to changes in market value and other risks, which may materially adversely affect NEE's liquidity, financial condition and results of operations.

NEE holds certain assets and investments where changes in the fair value affect NEE's financial results. In some cases there may be no observable market values for these assets and investments, requiring fair value estimates to be based on other valuation techniques. This type of analysis requires significant judgment and the actual values realized in a sale of these assets and investments could differ materially from those estimated. A sale of an asset or investment below previously estimated value, or other decline in the fair value of an asset or investment, could result in losses or the write-off of such asset or investment, and may have a material adverse effect on NEE's liquidity, financial condition and results of operations.

NEE has invested in various joint ventures and equity method investments where it does not have full control over operations, management or decision-making. In many cases, NEE shares control rights with its partners, but may lack influence or be dependent on their business priorities. This situation can lead to decisions that differ from NEE's preferences, potentially impacting the profitability and value of these investments. Furthermore, if a joint venture partner becomes insolvent or bankrupt or is otherwise unable to meet its obligations, NEE may be responsible for meeting certain obligations of the joint ventures as stipulated in its governing documents or applicable law. NEE's joint venture partners may not always share NEE's business priorities which may have a material adverse effect on NEE's liquidity, financial condition and results of operations.

NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if its subsidiaries are unable to pay upstream dividends, make distributions or repay funds to NEE.

NEE is a holding company and, as such, has no material operations of its own. Substantially all of NEE's consolidated assets are held by its subsidiaries. NEE's ability to meet its financial obligations, including, but not limited to, its guarantees, and to pay dividends on its common stock is primarily dependent on its subsidiaries' net income and cash flows, which are subject to the risks of their respective businesses, and their ability to pay upstream dividends, make distributions or to repay funds to NEE.

NEE's subsidiaries are separate legal entities and have no independent obligation to provide NEE with funds for its payment obligations. The subsidiaries have financial obligations themselves, including, but not limited to, payment of debt service, which they must satisfy before they can provide NEE with funds or make other payments to NEE. In addition, in the event of a subsidiary's liquidation or reorganization, NEE's right to participate as an equity holder in a distribution of assets is subject to the prior claims of the subsidiary's creditors.

The ability of some of the subsidiaries to pay dividends or make certain other payments is limited by contractual restrictions which are contained in outstanding financing agreements and which may be included in future financing agreements. The future enactment of laws or regulations also may prohibit or restrict the ability of NEE's subsidiaries to pay upstream dividends, make distributions or to repay funds.

NEE may be unable to meet its ongoing and future financial obligations and to pay dividends on its common stock if NEE is required to perform under guarantees of financial obligations of its subsidiaries.

NEE guarantees many of the financial obligations of its consolidated subsidiaries, other than FPL, through guarantee agreements with NEECH. These guarantees may require NEE to provide substantial funds to its subsidiaries or their creditors or counterparties at a time when NEE is in need of liquidity to meet its own financial obligations. Funding such guarantees may materially adversely affect NEE's ability to meet its financial obligations or to pay dividends.

Disruptions, uncertainty or volatility in the credit and capital markets may exert downward pressure on the market price of NEE's common stock.

The market price and trading volume of NEE's common stock are subject to fluctuations as a result of, among other factors, general credit and capital market conditions and changes in market sentiment regarding the operations, business and financing strategies of NEE, its subsidiaries and its affiliates. As a result, disruptions, uncertainty or volatility in the credit and capital markets may, for example, have a material adverse effect on the market price of NEE's common stock.

Widespread public health crises and epidemics or pandemics may have material adverse impacts on NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

NEE and FPL are subject to the impacts of widespread public health crises, epidemics and pandemics, including, but not limited to, impacts on the global, national or local economy, capital and credit markets, NEE's and FPL's workforce, customers and suppliers. There is no assurance that NEE's and FPL's businesses will be able to operate without material adverse impacts depending on the nature of the public health crisis, epidemic or pandemic. The ultimate severity, duration and impact of public health crises, epidemics and pandemics cannot be predicted. Additionally, there is no assurance that vaccines, or other treatments, are or will be widely available or effective, or that the public will be willing to participate, in an effort to contain the spread of disease. Actions taken in response to such crises by federal, state and local government or regulatory agencies may have a material adverse impact on NEE's and FPL's business, financial condition, liquidity, results of operations and prospects.

Item 1B. Unresolved Staff Comments

None

Item 1C. Cybersecurity

Risk Management and Strategy

Cybersecurity risk management is included in NEE's, including FPL's, overall risk management program. NEE, including FPL, operates a cybersecurity program which, among other objectives, seeks to identify potential unauthorized occurrences on or conducted through the electronic information resources owned or used by NEE or FPL (information systems) that may result in adverse effects on the confidentiality, integrity or availability of its information systems or any information residing on those systems (cybersecurity threats) as well as on its operations. The cybersecurity program includes controls to reduce the risk and potential impact of a cybersecurity incident and to align its processes, controls and implemented technologies with industry standard frameworks and regulations. In addition, outside experts assess NEE's, including FPL's, cybersecurity program capabilities, technology environment and security controls to regularly evaluate effectiveness.

NEE, including FPL, operates a cybersecurity operations center and has cyber threat intelligence capability to identify, monitor, detect and respond to cybersecurity threats which is led by a cybersecurity incident response team. NEE, including FPL, uses these resources, and leverages third-party resources, to identify cybersecurity threats and monitor for anomalies that may result in cybersecurity incidents on its systems, and monitors for impacts to its vendors or suppliers. Assessment of incidents includes, but is not limited to, analysis of the urgency and operational or business impact of an incident and the status and effectiveness of incident defenses. NEE, including FPL, invests in personnel and technologies with the objective of limiting the frequency and impact of cybersecurity incidents. Following documented cybersecurity incident response procedures, the cybersecurity incident response team escalates information about cybersecurity incidents depending on circumstances to oversight committees and personnel charged with managing specific aspects of cybersecurity risk, including, among others, the Cybersecurity and Resiliency Committee, the Cybersecurity Governance Executive Committee and NEE's Board of Directors.

NEE, including FPL, conducts periodic tabletop exercises and an annual cybersecurity drill with the participation from time to time of local, state and U.S. federal agencies to test its capability of dealing with a simulated cyberattack. NEE, including FPL, also participates in industry forums and various trade groups, as well as in NERC activities, to learn and apply these incident preparedness learnings to its cybersecurity policies and procedures.

NEE, including FPL, uses third parties to periodically assess the extent to which its cybersecurity risk management protocols align with the U.S. Department of Energy's Cybersecurity Capability Maturity Model standard or to the U.S. National Institute of Standards and Technology's Cybersecurity Framework for Protecting Critical Infrastructure. Certain functions within NEE, including FPL, are required to comply with certain regulatory standards that are designed to protect against cybersecurity incidents, including the NERC Critical Infrastructure Protection standards, as well as the NRC cybersecurity protection standards. Further, NEE, including FPL, has a cybersecurity training program and a mock phishing program to educate and train employees on potential cybersecurity risks and on privacy and data protection. Given geopolitical events, NEE, including FPL, continues to take steps to defend against cybersecurity threats to its critical infrastructure, including communications and training with personnel to ensure heightened awareness of increased cybersecurity threats worldwide.

The cybersecurity capabilities of third-party vendors providing services to NEE or FPL or accessing NEE's or FPL's systems or data are evaluated as part of the new vendor establishment process. NEE, including FPL, retains the right to audit vendors for cybersecurity of products and services. Where applicable in NEE's or FPL's contracts with third-party vendors accessing its systems or data, standard data security terms and conditions are utilized and minimum amounts of insurance coverage based on the risk of exposure are required.

NEE, including FPL, operates U.S. critical infrastructure. There have been cyberattacks and other physical attacks within the energy industry on energy infrastructure such as substations, gas pipelines and related assets and there may be such attacks in the future. In addition, the advancement of artificial intelligence has given rise to new security risks. Although there have been no cybersecurity incidents or threats with a material impact on NEE's nor FPL's business strategy, results of operations, or financial condition, NEE's or FPL's information technology systems could fail or be breached, and such systems could be inoperable, causing NEE and FPL to be unable to fulfill critical business operations. The disclosures herein should be reviewed with the risk factors included in Item 1A.

Governance

The vice president and chief information officer, the vice president cybersecurity and the executive director cybersecurity are responsible for assessing and managing material risks from cybersecurity threats. They have careers that represent more than 50 years of combined experience related to the management and protection of technologies. These individuals participate in or receive updates from not only the cybersecurity incident response team but also cybersecurity oversight committees, such as the Cybersecurity and Resiliency Committee comprised of various members of management, including the executive vice president and chief risk officer, presidents and chief executive officers of FPL and NEER, the executive vice president, finance and chief financial officer and the executive vice president, chief legal, environmental & federal regulatory affairs officer, and the Cybersecurity Governance Executive Committee comprised of various members of management, including the vice president, internal audit and the executive director, emergency preparedness. These committees are charged with governing cybersecurity, cyber risks and resilience activities as well as the cyber and physical security policies and programs for NEE and its subsidiaries.

NEE's Board of Directors is responsible for the oversight of risks from cybersecurity threats and receives cybersecurity reports from NEE's vice president and chief information officer and its vice president cybersecurity. The cybersecurity reports to the Board of Directors include various information, such as updates on the cybersecurity threat landscape, risk assessments, mitigation plans, including cyber defenses, notable incidents and a summary of the annual cyber drill results. Significant active cybersecurity incidents and threats are communicated to the Board of Directors as they occur.

Item 2. Properties

See Item 1. Business – FPL and Item 1. Business – NEER for a description of principal properties.

Character of Ownership

Substantially all of FPL's properties are subject to the lien of FPL's mortgage, which secures most long-term debt securities issued by FPL. The majority of FPL's real property is held in fee and is free from other encumbrances, subject to minor exceptions which are not of a nature as to substantially impair the usefulness to FPL of such properties. Some of FPL's electric lines are located on parcels of land which are not owned in fee by FPL but are covered by necessary consents of governmental authorities or rights obtained from owners of private property. Subsidiaries within the NEER segment have ownership interests in entities that own generation facilities, pipeline facilities and transmission assets and a number of those facilities and assets are encumbered by liens securing various financings. Additionally, the majority of NEER's generation facilities, pipeline facilities and transmission lines are located on land under easement, rights-of-way or leased from owners of private property or governmental entities. See Note 7 – FPL and – NEER.

Item 3. Legal Proceedings

See Note 15 – Legal Proceedings.

With regard to environmental proceedings to which a governmental authority is a party, NEE's and FPL's policy is to disclose any such proceeding if it is reasonably expected to result in monetary sanctions of greater than or equal to \$1 million.

Item 4. Mine Safety Disclosures

Not applicable

PART II

Item 5. Market for Registrants' Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Common Stock Data. All of FPL's common stock is owned by NEE. NEE's common stock is traded on the New York Stock Exchange under the symbol "NEE." As of January 31, 2026, there were 12,314 holders of record of NEE's common stock. The amount and timing of dividends payable on NEE's common stock are within the sole discretion of NEE's Board of Directors. The Board of Directors reviews the dividend rate at least annually (generally in February) to determine its appropriateness in light of NEE's financial position and results of operations, legislative and regulatory developments affecting the electric utility industry in general and FPL in particular, competitive conditions, change in business mix and any other factors the Board of Directors deems relevant. In February 2026, NEE announced that it would increase its quarterly dividend on its common stock from \$0.5665 per share to \$0.6232 per share.

Issuer Purchases of Equity Securities. Information regarding purchases made by NEE of its common stock during the three months ended December 31, 2025 is as follows:

Period	Total Number of Shares Purchased ^(a)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares that May Yet be Purchased Under the Program ^(b)
10/1/25 – 10/31/25	—	\$ —	—	180,000,000
11/1/25 – 11/30/25	7,036	\$ 83.88	—	180,000,000
12/1/25 – 12/31/25	1,224	\$ 81.65	—	180,000,000
Total	8,260	\$ 83.55	—	

(a) Includes shares of common stock withheld from employees to pay certain withholding taxes upon the vesting of stock awards granted to such employees under the NextEra Energy, Inc. Amended and Restated 2021 Long Term Incentive Plan or the NextEra Energy, Inc. Amended and Restated 2011 Long Term Incentive Plan.

(b) In May 2017, NEE's Board of Directors authorized repurchases of up to 45 million shares of common stock (180 million shares after giving effect to the four-for-one stock split of NEE common stock effective October 26, 2020) over an unspecified period.

Item 6. Reserved

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

NEE's operating performance is driven primarily by the operations of its two principal businesses, FPL, which serves more than six million customer accounts in Florida and is the largest electric utility in the U.S., and NEER, which together with affiliated entities is one of the largest energy infrastructure developers in the U.S. The table below presents net income (loss) attributable to NEE and earnings (loss) per share attributable to NEE, assuming dilution, by reportable segment, FPL and NEER. Corporate and Other is primarily comprised of the operating results of other business activities, as well as other income and expense items, including interest expense, and eliminating entries, and may include the net effect of rounding. See Note 16 for additional segment information. The following discussion should be read in conjunction with the Notes to Consolidated Financial Statements contained herein and all comparisons are with the corresponding items in the prior year.

	Net Income (Loss) Attributable to NEE			Earnings (Loss) Per Share Attributable to NEE, Assuming Dilution		
	Years Ended December 31,			Years Ended December 31,		
	2025	2024	2023	2025	2024	2023
	(millions)					
FPL	\$ 5,012	\$ 4,543	\$ 4,552	\$ 2.42	\$ 2.21	\$ 2.24
NEER ^(a)	2,975	2,299	3,558	1.44	1.12	1.75
Corporate and Other	(1,152)	104	(800)	(0.56)	0.04	(0.39)
NEE	<u>\$ 6,835</u>	<u>\$ 6,946</u>	<u>\$ 7,310</u>	<u>\$ 3.30</u>	<u>\$ 3.37</u>	<u>\$ 3.60</u>

(a) NEER's results reflect an allocation of interest expense from NEECH to NextEra Energy Resources based on a deemed capital structure of 70% debt and differential membership interests sold by NextEra Energy Resources' subsidiaries.

For the five years ended December 31, 2025, NEE delivered a total shareholder return of approximately 18.2%, compared to the S&P 500's 96.2% return, the S&P 500 Utilities' 59.1% return and the Dow Jones U.S. Electricity's 64.8% return. The historical stock performance of NEE's common stock shown in the performance graph below is not necessarily indicative of future stock price performance.

*\$100 invested on 12/31/20 in stock or index, including reinvestment of dividends.
Fiscal year ending December 31.

Adjusted Earnings

NEE prepares its financial statements under GAAP. However, management also uses earnings adjusted for certain items (adjusted earnings), a non-GAAP financial measure, internally for financial planning, analysis of performance, reporting of results to the Board of Directors and as an input in determining performance-based compensation under NEE's employee incentive compensation plans. NEE also uses adjusted earnings when communicating its financial results and earnings outlook to analysts and investors. NEE's management believes that adjusted earnings provide a more meaningful representation of NEE's fundamental earnings power. Although these amounts are properly reflected in the determination of net income under GAAP, management believes that the amount and/or nature of such items make period to period comparisons of operations difficult and potentially confusing. Adjusted earnings do not represent a substitute for net income, as prepared under GAAP.

The following table provides details of the after-tax adjustments to net income considered in computing NEE's adjusted earnings discussed above.

	Years Ended December 31,		
	2025	2024	2023
	(millions)		
Net gains (losses) associated with non-qualifying hedge activity ^(a)	\$ (272)	\$ 666	\$ 1,497
Differential membership interests-related – NEER	\$ —	\$ (5)	\$ (49)
XPLR investment gains, net – NEER ^(b)	\$ (656)	\$ (852)	\$ (963)
Gain on disposal of a business ^(c)	\$ —	\$ —	\$ 306
Change in unrealized gains (losses) on equity securities held in NEER's nuclear decommissioning funds and OTTI, net – NEER	\$ 80	\$ 74	\$ 116
Impairment charges related to investment in Mountain Valley Pipeline – NEER	\$ —	\$ —	\$ (38)

- (a) For 2025, 2024 and 2023, approximately \$28 million of gains, \$36 million of losses and \$1,729 million of gains, respectively, are included in NEER's net income; the remaining balance is included in Corporate and Other. The change in non-qualifying hedge activity is primarily attributable to changes in forward power and natural gas prices, interest rates and foreign currency exchange rates, as well as the reversal of previously recognized unrealized mark-to-market gains or losses as the underlying transactions were realized.
- (b) See Note 4 – Nonrecurring Fair Value Measurements for a discussion of impairment charges related to the investment in XPLR in 2025, 2024 and 2023.
- (c) For 2023, approximately \$300 million of gains are included in FPL's net income; the remaining balance is included in NEER. See Note 1 – Disposal of Businesses for a discussion of the sale of FPL's ownership interest in its Florida City Gas business.

NEE segregates into two categories unrealized mark-to-market gains and losses and timing impacts related to derivative transactions. The first category, referred to as non-qualifying hedges, represents certain energy derivative, interest rate derivative and foreign currency transactions entered into as economic hedges, which do not meet the requirements for hedge accounting, or for which hedge accounting treatment is not elected or has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the consolidated statements of income, resulting in earnings volatility because the economic offset to certain of the positions are generally not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the impact of the non-qualifying hedges as a meaningful measure of current period performance. The second category, referred to as trading activities, which is included in adjusted earnings, represents the net unrealized effect of actively traded positions entered into to take advantage of expected market price movements and all other commodity hedging activities. At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 3.

2025 Summary

Net income attributable to NEE for 2025 was lower than 2024 by \$111 million, or \$0.07 per share, assuming dilution, due to lower results at Corporate and Other, partly offset by higher results at FPL and NEER.

FPL's net income increased in 2025 primarily driven by continued investments in plant in service and other property and a higher earned regulatory ROE in 2025.

NEER's results increased in 2025 primarily reflecting higher earnings from new investments, partly offset by higher financing costs. In 2025, NEER added approximately 1,604 MW of new wind generating capacity, 2,859 MW of solar generating capacity and 1,799 MW of battery storage capacity and increased its backlog of contracted development projects.

Corporate and Other's results in 2025 decreased primarily related to higher interest expense due to unfavorable non-qualifying hedge activity compared to 2024 as well as higher average debt balances.

NEE and its subsidiaries require funds to support and grow their businesses. These funds are primarily provided by cash flows from operations, borrowings or issuances of short- and long-term debt and, from time to time, issuances of equity securities, proceeds from differential membership investors, and sales of tax credits and ownership interests in assets/businesses. See Liquidity and Capital Resources.

RESULTS OF OPERATIONS

Net income attributable to NEE for 2025 was \$6.84 billion compared to \$6.95 billion in 2024. In 2025, net income attributable to NEE decreased primarily due to lower results at Corporate and Other, partly offset by higher results at FPL and NEER. The comparison of the results of operations for the years ended December 31, 2024 and 2023 are included in Management's Discussion in NEE's and FPL's Annual Report on Form 10-K for the year ended December 31, 2024.

NEE's effective income tax rate for 2025 and 2024 was approximately (18)% and 6%, respectively. The rates for both years reflect the composition of pretax income in 2025 and 2024 as well as the impact of clean energy tax credits. See Note 5.

A number of legislative, executive and administrative activities occurred in 2025 that affect NEE and FPL including 1) the enactment of the OBBBA which, among other things, modified tax legislation affecting clean energy tax credits, 2) the issuance of a number of federal executive orders and presidential actions, 3) the imposition of tariffs on a variety of imports and 4) the issuance of guidance by various federal agencies. A number of similar activities remain pending or are in various phases of implementation, such as certain Treasury Department rulemaking authorized by the OBBBA, trade investigations that may lead to additional tariffs or place limitations on imports of certain materials, ordered reviews of, or process or policy changes with respect to, federal permitting and approvals for wind and solar projects and proposals by regional transmission operators regarding the process for interconnecting new generation projects to certain regional transmission grids that have been approved by FERC. There has been no material impact on NEE's or FPL's operations or financial performance as a result of these developments and NEE believes that its current pipeline of wind and solar facilities to be placed in service through 2030 will qualify for clean energy tax credits. NEE will assess any further developments for potential impacts in future periods.

FPL: Results of Operations

FPL obtains its operating revenues primarily from the sale of electricity to retail customers at rates established by the FPSC through base rates and cost recovery clause mechanisms. FPL's net income for 2025 and 2024 was \$5,012 million and \$4,543 million, respectively, representing an increase of \$469 million. The increase was primarily driven by higher earnings from investments in plant in service and other property. Such investments grew FPL's average rate base by approximately \$5.5 billion in 2025 and reflect, among other things, solar generation additions and ongoing transmission and distribution additions. The increase was also due to a higher earned regulatory ROE in 2025.

During 2025, FPL completed a twelve-month interim storm restoration surcharge that began in January 2025 for eligible storm restoration costs and the replenishment of the storm reserve of approximately \$1.2 billion, related to Hurricanes Debby, Helene and Milton which impacted FPL's service area in 2024. The amount collected is subject to refund based on an FPSC prudence review. During 2024, FPL completed a twelve-month interim storm restoration surcharge that began in April 2023 for eligible storm restoration costs and the replenishment of the storm reserve of approximately \$1.3 billion, primarily related to Hurricanes Ian and Nicole which impacted FPL's service area in 2022. See Note 1 – Storm Funds, Storm Reserves and Storm Cost Recovery.

The use of reserve amortization was permitted by the 2021 rate agreement. See Item 1. Business – FPL – FPL Regulation – FPL Electric Rate Regulation – Base Rates – Base Rates Effective January 2022 through December 2025 for additional information on the 2021 rate agreement. In order to earn a targeted regulatory ROE, subject to limitations associated with the 2021 rate agreement, reserve amortization was calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues, net of O&M, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items must be adjusted, in part, by reserve amortization to earn the targeted regulatory ROE. In certain periods, reserve amortization was reversed so as not to exceed the targeted regulatory ROE. The drivers of FPL's net income not reflected in the reserve amortization calculation typically included wholesale and transmission service revenues and expenses, cost recovery clause revenues and expenses, AFUDC – equity and revenue and costs not recoverable from retail customers. In 2025 and 2024, FPL recorded reserve amortization of approximately \$593 million and \$328 million, respectively. See Depreciation and Amortization Expense below. FPL's earned regulatory ROE for 2025 and 2024 was approximately 11.70% and 11.40%, respectively.

During 2025, operating revenues increased \$1,243 million primarily due to higher storm cost recovery, retail base and storm protection plan cost recovery revenues, partly offset by lower fuel cost recovery revenues.

Retail Base

FPL's retail base revenues for 2025 and 2024 reflect the 2021 rate agreement. Retail base revenues increased approximately \$222 million during the year ended December 31, 2025 primarily related to an increase of 1.7% in the average number of customer accounts and new retail base rates through its Solar Base Rate Adjustment mechanism under the 2021 rate agreement. The increases were partly offset by a decrease of approximately 1.2% in the average usage per retail customer primarily driven by unfavorable weather when compared to the prior year. See Note 1 – Rate Regulation.

In January 2026, the FPSC issued a final order approving a stipulation and settlement agreement between FPL and several intervenors in FPL's 2025 base rate proceeding. In February 2026, certain intervenors filed a joint motion for reconsideration and a joint request for oral argument challenging the FPSC's final order. See Note 1 – Rate Regulation – Base Rates Effective January 2026 through December 2029.

Cost Recovery Clauses

Revenues from fuel and other cost recovery clauses and pass-through costs, such as franchise fees, revenue taxes and storm-related surcharges, are largely a pass-through of costs. Such revenues also include a return on investment allowed to be recovered through the cost recovery clauses on certain assets, primarily related to certain solar, environmental projects, storm protection plan investments and the unamortized balance of the regulatory asset associated with FPL's acquisition of a generation facility. See Item 1. Business – FPL – FPL Regulation – FPL Electric Rate Regulation – Cost Recovery Clauses. Under-recovery or over-recovery of cost recovery clause and other pass-through costs (deferred clause and franchise expenses and revenues) can significantly affect NEE's and FPL's operating cash flows. During 2025, the change from a net over-recovery of cost recovery clauses to a net under-recovery of cost recovery clauses impacted FPL's operating cash flows by approximately \$89 million, primarily related to higher fuel prices.

The increase in operating revenues in 2025 reflects higher storm cost recovery revenues of approximately \$1,091 million primarily associated with the completion of surcharges for Hurricanes Debby, Helene and Milton, as discussed above, as well as an increase of \$217 million in revenues from the storm protection plan cost recovery clause as a result of increased investments. The increase in operating revenues in 2025 was partly offset by a decrease in fuel cost recovery revenues of approximately \$353 million primarily as a result of lower fuel rates. In 2025 and 2024, cost recovery clauses contributed approximately \$497 million and \$417 million, respectively, to FPL's net income.

Other Items Impacting FPL's Consolidated Statements of Income

Fuel, Purchased Power and Interchange Expense

Fuel, purchased power and interchange expense decreased \$310 million in 2025 primarily related to lower amortization of deferred fuel costs, partly offset by higher fuel prices as compared to the prior year.

Depreciation and Amortization Expense

The major components of FPL's depreciation and amortization expense are as follows:

	Years Ended December 31,	
	2025	2024
	(millions)	
Reserve amortization recorded under the 2021 rate agreement	\$ (593)	\$ (328)
Other depreciation and amortization recovered under base rates (excluding reserve amortization) and other	2,850	2,667
Depreciation and amortization primarily recovered under cost recovery clauses and storm-recovery cost amortization	1,521	488
Total	<u>\$ 3,778</u>	<u>\$ 2,827</u>

Depreciation and amortization expense increased \$951 million during 2025 primarily reflecting higher amortization of deferred storm costs, primarily associated with Hurricanes Debby, Helene and Milton, as discussed above, of approximately \$1,090 million and increased depreciation related to higher plant in service balances, partly offset by the impact of reserve amortization. Reserve amortization, or reversal of such amortization, reflects adjustments to accrued asset removal costs provided under the 2021 rate agreement in order to achieve the targeted regulatory ROE. Reserve amortization is recorded as either an increase or decrease to accrued asset removal costs which is reflected in noncurrent regulatory assets on NEE's and FPL's consolidated balance sheets. As of December 31, 2025, approximately \$303 million of reserve amortization remains available for future amortization through the RSM under the 2025 rate agreement.

Income Taxes

FPL's income taxes decreased \$251 million during 2025 primarily related to higher clean energy tax credits as compared to the prior year.

NEER: Results of Operations

NEER owns, develops, constructs, manages and operates a diversified portfolio of electric generation and battery storage facilities in wholesale energy markets in the U.S. and Canada, and includes assets and investments in other businesses with a clean energy focus. NEER also owns, develops, constructs and operates regulated electric and gas transmission assets. In addition, NEER provides full energy and capacity requirements services, engages in energy-related commodity marketing and trading activities and participates in natural gas, natural gas liquids and oil production. NEER's net income less net loss attributable to noncontrolling interests for 2025 and 2024 was \$2,975 million and \$2,299 million, respectively, resulting in an increase in 2025 of \$676 million. The primary drivers, on an after-tax basis, of the change are in the following table.

	Increase (Decrease) From Prior Period
	Year Ended December 31, 2025
	(millions)
New investments ^(a)	\$ 967
Existing clean energy ^(a)	(81)
Customer supply ^(b)	89
NEET	39
Other, including financing costs, corporate general and administrative expenses, asset recycling, state taxes and other investment income	(604)
Change in non-qualifying hedge activity ^(c)	64
Change in unrealized gains/losses on equity securities held in nuclear decommissioning funds and OTTI, net ^(c)	6
XPLR investment gains, net ^(c)	196
Change in net income less net loss attributable to noncontrolling interests	\$ 676

- (a) Reflects after-tax project contributions, including the net effect of deferred income taxes and other benefits associated with clean energy tax credits for wind, solar and battery storage projects, as applicable (see Note 1 – Income Taxes and – Noncontrolling Interests and Note 5), but excludes allocation of interest expense and corporate general and administrative expenses except for an allocated credit support charge related to guarantees issued to conduct business activities. Results from projects and regulated gas transmission assets are included in new investments during the first twelve months of operation or ownership. Project results, including repowered wind projects, and regulated gas transmission assets results are included in existing clean energy beginning with the thirteenth month of operation or ownership.
- (b) Excludes allocation of interest expense and corporate general and administrative expenses except for an allocated credit support charge related to guarantees issued to conduct business activities and includes natural gas, natural gas liquids and oil production results.
- (c) See Overview – Adjusted Earnings for additional information.

New Investments

Results from new investments in 2025 increased primarily due to higher earnings related to new wind and solar generation and battery storage facilities that entered service during or after 2024.

Other Factors

Supplemental to the primary drivers of the changes in NEER's results discussed above, the discussion below describes changes in certain line items set forth in NEE's consolidated statements of income as they relate to NEER.

Operating Revenues

Operating revenues for 2025 increased \$1,218 million primarily due to:

- revenues from new investments of approximately \$519 million;
- the impact of non-qualifying commodity hedges due primarily to changes in energy prices (approximately \$343 million of gains during 2025 compared to \$66 million of losses for 2024); and
- net increases in revenues of \$300 million from the customer supply business.

Operating Expenses – net

Operating expenses – net for 2025 increased \$613 million primarily due to increases of \$221 million in O&M expenses, \$161 million in depreciation and amortization expenses and \$152 million in fuel, purchased power and interchange expenses. The increases were primarily associated with growth across the NEER businesses.

Gains on Disposal of Businesses/Assets – net

In 2025, the change in gains on disposal of businesses/assets – net is the result of lower disposal gains in the current year as compared to the prior year. See Note 1 – Disposal of Businesses for a discussion of gains related to the September 2024 sales of ownership interests in connection with the pipeline joint venture and the renewable assets joint venture.

Interest Expense

NEER's interest expense for 2025 increased \$569 million primarily reflecting approximately \$351 million of unfavorable impacts related to changes in the fair value of interest rate derivative instruments as well as higher average debt balances driven by growth in the business.

Equity in Losses of Equity Method Investees

NEER recognized \$193 million and \$267 million of equity in losses of equity method investees in 2025 and 2024, respectively. The change in 2025 primarily reflects the impact of an impairment charge of approximately \$0.7 billion (\$0.5 billion after tax) compared to a 2024 impairment charge of \$0.8 billion (\$0.6 billion after tax) related to the investment in XPLR (see Note 4 – Nonrecurring Fair Value Measurements).

Income Taxes

NEER's effective income tax rate for 2025 and 2024 was approximately (343)% and (165)%, respectively, and is primarily based on the composition of pretax income in 2025 and 2024 as well as the impact of clean energy tax credits. PTCs from wind and solar projects and ITCs from solar, battery storage and certain wind projects are included in NEER's earnings. PTCs are recognized as wind and solar energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes. During the year ended December 31, 2025, clean energy tax credits increased by approximately \$585 million reflecting growth in NEER's business. See Note 1 – Income Taxes for a discussion of clean energy tax credits, Note 5 and Note 16.

Net Loss Attributable to Noncontrolling Interests

The change in net loss attributable to noncontrolling interests primarily reflects an increase in additional differential membership interests. See Note 1 – Noncontrolling Interests.

Symmetry Acquisition

On January 9, 2026, a wholly owned subsidiary of NextEra Energy Resources acquired a commercial and industrial natural gas business. See Note 6 – Symmetry Acquisition.

Corporate and Other: Results of Operations

Corporate and Other is primarily comprised of the operating results of other business activities, as well as corporate interest income and expenses. Corporate and Other allocates a portion of NEECH's corporate interest expense to NextEra Energy Resources. Interest expense is allocated based on a deemed capital structure of 70% debt and differential membership interests sold by NextEra Energy Resources' subsidiaries.

Corporate and Other's results decreased \$1,256 million during 2025 primarily due to unfavorable after-tax impacts of approximately \$1,002 million, as compared to the prior year, related to non-qualifying hedge activity as a result of changes in the fair value of interest rate derivative instruments used to manage interest rate and foreign currency exchange rate risk associated primarily with outstanding and expected future debt issuances and borrowings (see Note 3) as well as higher average debt balances.

LIQUIDITY AND CAPITAL RESOURCES

NEE and its subsidiaries require funds to support and grow their businesses. These funds are used for, among other things, working capital, capital expenditures (see Note 15 – Commitments), investments in or acquisitions of assets and businesses (see Note 6), payment of maturing debt and related derivative obligations (see Note 13 and Note 3) and, from time to time, redemption or repurchase of outstanding debt or equity securities. It is anticipated that these requirements will be satisfied through a combination of cash flows from operations, short- and long-term borrowings, the issuance of short- and long-term debt (see Note 13) and, from time to time, equity securities, proceeds from differential membership investors, sales of clean energy tax credits (see Note 1 – Income Taxes) and sales of ownership interests in assets/businesses (see Note 1 – Disposal of Businesses), consistent with NEE's and FPL's objective of maintaining, on a long-term basis, a capital structure that will support a strong investment grade credit rating. NEE, FPL and NEECH rely on access to credit and capital markets as significant sources of liquidity for capital requirements and other operations that are not satisfied by operating cash flows. The inability of NEE, FPL and NEECH to maintain their current credit ratings could affect their ability to raise short- and long-term capital, their cost of capital and the execution of their respective financing strategies, and could require the posting of additional collateral under certain agreements.

In October 2015, NEE authorized a program to purchase, from time to time, up to \$150 million of common units representing limited partner interests in XPLR. Under the program, purchases may be made in amounts, at prices and at such times as NEE or its subsidiaries deem appropriate, all subject to market conditions and other considerations. The purchases may be made in the open market or in privately negotiated transactions. Any purchases will be made in such quantities, at such prices, in such manner and on such terms and conditions as determined by NEE or its subsidiaries in their discretion, based on factors such as market and business conditions, applicable legal requirements and other factors. The common unit purchase program does not require NEE to acquire any specific number of common units and may be modified or terminated by NEE at any time. The purpose of the program is not to cause XPLR's common units to be delisted from the New York Stock Exchange or to cause the common units to be deregistered with the SEC. As of December 31, 2025, the dollar value of units that may yet be purchased by NEE under this program was \$114 million. As of December 31, 2025, NEE had an approximately 52.5% noncontrolling interest in XPLR, primarily through its limited partner interest in XPLR OpCo.

Cash Flows

NEE's sources and uses of cash for 2025, 2024 and 2023 were as follows:

	Years Ended December 31,		
	2025	2024	2023
	(millions)		
Sources of cash:			
Cash flows from operating activities	\$ 12,485	\$ 13,260	\$ 11,301
Issuances of long-term debt, including premiums and discounts	23,394	24,769	13,857
Proceeds from differential membership investors	3,276	2,257	2,745
Proceeds from the sale of Florida City Gas business	—	—	924
Sale of independent power and other investments of NEER	1,115	2,659	1,883
Issuances of common stock/equity units	2,038	48	4,514
Net increase in commercial paper and other short-term debt	676	—	2,308
Cash swept from related parties – net	—	—	1,213
Other sources – net	118	—	—
Total sources of cash	43,102	42,993	38,745
Uses of cash:			
Capital expenditures, independent power and other investments and nuclear fuel purchases	(24,606)	(24,729)	(25,113)
Retirements of long-term debt	(10,347)	(10,113)	(7,978)
Net decrease in commercial paper and other short-term debt	—	(3,018)	—
Payments to differential membership investors	(516)	(740)	(75)
Repayments of cash swept to related parties – net	(131)	(1,371)	—
Dividends on common stock	(4,680)	(4,235)	(3,782)
Other uses – net	(1,223)	(791)	(1,814)
Total uses of cash	(41,503)	(44,997)	(38,762)
Effects of currency translation on cash, cash equivalents and restricted cash	5	(14)	(4)
Net increase (decrease) in cash, cash equivalents and restricted cash	\$ 1,604	\$ (2,018)	\$ (21)

For significant financing activity that occurred subsequent to December 31, 2025, see Note 13.

NEE's primary capital requirements are for expanding and enhancing FPL's electric system and generation facilities to continue to provide reliable service to meet customer electricity demands and for funding NEER's investments in independent power and other projects. See Note 15 – Commitments for estimated capital expenditures in 2026 through 2030.

The following table provides a summary of capital investments for 2025, 2024 and 2023.

	Years Ended December 31,		
	2025	2024	2023
	(millions)		
FPL:			
Generation:			
New	\$ 2,915	\$ 2,479	\$ 3,163

Corporate and Other	2	123	61
Total capital expenditures, independent power and other investments and nuclear fuel purchases	\$ 24,606	\$ 24,729	\$ 25,113

Liquidity

As of December 31, 2025, NEE's total net available liquidity was approximately \$18.7 billion. The table below provides the components of FPL's and NEECH's net available liquidity as of December 31, 2025.

	FPL	NEECH (millions)	Total	Maturity Date	
				FPL	NEECH
Syndicated revolving credit facilities ^{(a)(b)}	\$ 3,346	\$ 10,519	\$ 13,865	2028 – 2030	2026 – 2030
Issued letters of credit	(3)	(480)	(483)		
	3,343	10,039	13,382		
Bilateral revolving credit facilities ^(c)	1,080	3,550	4,630	2026 – 2028	2026 – 2027
Borrowings ^(d)	—	—	—		
	1,080	3,550	4,630		
Letter of credit facilities ^(e)	—	4,328	4,328		2027 – 2029
Issued letters of credit	—	(3,813)	(3,813)		
	—	515	515		
Subtotal	4,423	14,104	18,527		
Cash and cash equivalents	42	2,767	2,809		
Commercial paper and other short-term borrowings outstanding	(1,130)	(1,433)	(2,563)		
Cash swept from unconsolidated entities	—	(119)	(119)		
Net available liquidity	\$ 3,335	\$ 15,319	\$ 18,654		

- (a) Provide for the funding of loans up to the amount of the credit facility and the issuance of letters of credit up to \$3,200 million (\$450 million for FPL and \$2,750 million for NEECH). The entire amount of the credit facilities is available for general corporate purposes and to provide additional liquidity in the event of a loss to the companies' or their subsidiaries' operating facilities (including, in the case of FPL, a transmission and distribution property loss). FPL's syndicated revolving credit facilities are also available to support the purchase of \$1,566 million of pollution control, solid waste disposal and industrial development revenue bonds in the event they are tendered by individual bondholders and not remarketed prior to maturity as well as the repayment of approximately \$1,975 million of floating rate notes in the event an individual noteholder requires repayment at specified dates prior to maturity.
- (b) In February 2026, FPL and NEECH updated the capacity and extended the maturity date for a portion of their syndicated revolving credit facilities resulting in total capacity under their syndicated revolving credit facilities of \$4,500 million and \$10,500 million, respectively, with maturity dates ranging from 2028 – 2031 and 2027 – 2031, respectively. Letters of credit up to \$1,450 million (\$450 million for FPL and \$1,000 million for NEECH) may be funded by the syndicated revolving credit facilities.
- (c) Only available for the funding of loans. As of December 31, 2025, approximately \$300 million of FPL's and \$2,400 million of NEECH's bilateral revolving credit facilities expire over the next 12 months.
- (d) In January 2026, NEECH borrowed a total of \$850 million under bilateral revolving credit facilities.
- (e) Only available for the issuance of letters of credit. In January 2026, NEECH increased the capacity of the letter of credit facilities to \$4,928 million.

Approximately 75 banks, located globally, participate in FPL's and NEECH's revolving credit facilities, with no one bank providing more than 5% of the combined revolving credit facilities. Pursuant to a 1998 guarantee agreement, NEE guarantees the payment of NEECH's debt obligations under its revolving credit facilities. In order for FPL or NEECH to borrow or to have letters of credit issued under the terms of their respective revolving credit facilities and, also for NEECH, its letter of credit facilities, FPL, in the case of FPL, and NEE, in the case of NEECH, are required, among other things, to maintain a ratio of funded debt to total capitalization that does not exceed a stated ratio. The FPL and NEECH revolving credit facilities also contain default and related acceleration provisions relating to, among other things, failure of FPL and NEE, as the case may be, to maintain the respective ratio of funded debt to total capitalization at or below the specified ratio. As of December 31, 2025, each of NEE and FPL was in compliance with its required ratio.

On December 31, 2025, NEE established an at-the-market equity issuance program (ATM program) pursuant to which NEE may offer and sell, from time to time, NEE common stock having an aggregate gross sales price of up to \$4 billion.

Capital Support

Guarantees, Letters of Credit, Surety Bonds and Indemnifications (Guarantee Arrangements)

Certain subsidiaries of NEE issue guarantees and obtain letters of credit and surety bonds, as well as provide indemnities, to facilitate commercial transactions with third parties and financings. Substantially all of the guarantee arrangements are on behalf of NEE's consolidated subsidiaries, as discussed in more detail below. See Note 8 and Note 15 – Commitments regarding guarantees of obligations on behalf of unconsolidated entities. NEE is not required to recognize liabilities associated with guarantee arrangements issued on behalf of its consolidated subsidiaries unless it becomes probable that they will be required to perform. As of December 31, 2025, NEE believes that there is no material exposure related to these guarantee arrangements.

NEE subsidiaries issue guarantees related to equity contribution agreements and engineering, procurement and construction agreements, associated with the development, construction and financing of certain power generation facilities (see Note 1 – Structured Payables) and a natural gas pipeline project, as well as a natural gas transportation agreement. Commitments associated with these activities are included in the contracts table in Note 15.

In addition, as of December 31, 2025, NEE subsidiaries had approximately \$7.1 billion in guarantees related to obligations under PPAs and acquisition agreements, interconnection agreements, nuclear-related activities, support for NEER's retail electricity provider activities, as well as other types of contractual obligations (see Note 15 – Commitments).

In some instances, subsidiaries of NEE elect to issue guarantees instead of posting other forms of collateral required under certain financing arrangements, as well as for other project-level cash management activities. As of December 31, 2025, these guarantees totaled approximately \$3.0 billion and support, among other things, cash management activities, including those related to debt service and operations and maintenance service agreements, as well as other specific project financing requirements.

Subsidiaries of NEE also issue guarantees to support customer supply and proprietary power and gas trading activities, including the buying and selling of wholesale energy commodities. As of December 31, 2025, the estimated mark-to-market exposure (the total amount that these subsidiaries of NEE could be required to fund based on energy commodity market prices as of December 31, 2025) plus contract settlement net payables, net of collateral posted for obligations under these guarantees totaled approximately \$1.6 billion.

As of December 31, 2025, subsidiaries of NEE also had approximately \$7.1 billion of standby letters of credit and approximately \$1.6 billion of surety bonds to support certain of the commercial activities discussed above. FPL's and NEECH's credit facilities are available to support substantially all of the standby letters of credit.

In addition, as part of contract negotiations in the normal course of business, certain subsidiaries of NEE have agreed and in the future may agree to make payments to compensate or indemnify other parties, including those associated with asset divestitures, for possible unfavorable financial consequences resulting from specified events. The specified events may include, but are not limited to, an adverse judgment in a lawsuit, or the imposition of additional taxes due to a change in tax law or interpretations of the tax law. NEE is unable to estimate the maximum potential amount of future payments by its subsidiaries under some of these contracts because events that would obligate them to make payments have not occurred or, if any such event has occurred, they have not been notified of its occurrence.

NEECH, a 100% owned subsidiary of NEE, provides funding for, and holds ownership interests in, NEE's operating subsidiaries other than FPL. NEE has fully and unconditionally guaranteed certain payment obligations of NEECH, including most of its debt and all of its debentures registered pursuant to the Securities Act of 1933 and commercial paper issuances, as well as most of its payment guarantees and indemnifications, and NEECH has guaranteed certain debt and other obligations of subsidiaries within the NEER segment. Certain guarantee arrangements described above contain requirements for NEECH and FPL to maintain a specified credit rating. For a discussion of credit rating downgrade triggers, see Credit Ratings below.

NEE fully and unconditionally guarantees NEECH debentures pursuant to a guarantee agreement, dated as of June 1, 1999 (1999 guarantee) and NEECH junior subordinated debentures pursuant to an indenture, dated as of September 1, 2006 (2006 guarantee). The 1999 guarantee is an unsecured obligation of NEE and ranks equally and ratably with all other unsecured and unsubordinated indebtedness of NEE. The 2006 guarantee is unsecured and subordinate and junior in right of payment to NEE senior indebtedness (as defined therein). No payment on those junior subordinated debentures may be made under the 2006 guarantee until all NEE senior indebtedness has been paid in full in certain circumstances. NEE's and NEECH's ability to meet their financial obligations are primarily dependent on their subsidiaries' net income, cash flows and their ability to pay upstream dividends or to repay funds to NEE and NEECH. The dividend-paying ability of some of the subsidiaries is limited by contractual restrictions which are contained in outstanding financing agreements.

Summarized financial information of NEE and NEECH is as follows:

Year Ended December 31, 2025				
	Issuer/ Guarantor Combined ^(a)	NEECH Consolidated ^(b)	NEE Consolidated ^(b)	
	(millions)			
Operating revenues	\$ (8)	\$ 9,191	\$ 27,412	
Operating income (loss)	\$ (378)	\$ 1,765	\$ 8,280	
Net income (loss)	\$ (1,279)	\$ 335	\$ 5,332	
Net income (loss) attributable to NEE/NEECH	\$ (1,279)	\$ 1,838	\$ 6,835	

December 31, 2025				
	Issuer/ Guarantor Combined ^(a)	NEECH Consolidated ^(b)	NEE Consolidated ^(b)	
	(millions)			
Total current assets	\$ 1,530	\$ 9,422	\$ 13,584	
Total noncurrent assets	\$ 2,546	\$ 98,902	\$ 199,137	
Total current liabilities	\$ 3,887	\$ 17,135	\$ 22,817	
Total noncurrent liabilities	\$ 44,680	\$ 73,236	\$ 123,425	
Noncontrolling interests	\$ —	\$ 11,871	\$ 11,871	

(a) Excludes intercompany transactions, and investments in, and equity in earnings of, subsidiaries.

(b) Information has been prepared on the same basis of accounting as NEE's consolidated financial statements.

Shelf Registration

In March 2024, NEE, NEECH and FPL filed a shelf registration statement with the SEC for an unspecified amount of securities, which became effective upon filing. The amount of securities issuable by the companies is established from time to time by their respective boards of directors. Securities that may be issued under the registration statement include, depending on the registrant, senior debt securities, subordinated debt securities, junior subordinated debentures, first mortgage bonds, common stock, preferred stock, depositary shares, stock purchase contracts, stock purchase units, warrants and guarantees related to certain of those securities.

Credit Ratings

NEE's liquidity, ability to access credit and capital markets, cost of borrowings and collateral posting requirements under certain agreements is dependent on its and its subsidiaries credit ratings. As of February 13, 2026, Moody's Investors Service, Inc. (Moody's), S&P Global Ratings (S&P) and Fitch Ratings, Inc. (Fitch) had assigned the following credit ratings to NEE, FPL and NEECH:

	Moody's ^(a)	S&P ^(a)	Fitch ^(a)
NEE:^(b)			
Corporate credit rating	Baa1	A-	A-
FPL:^(b)			
Corporate credit rating	A1	A	A
First mortgage bonds	Aa2	A+	AA-
Senior unsecured notes	A1	A	A+
Pollution control, solid waste disposal and industrial development revenue bonds ^(c)	VMIG-1/P-1	A-1	F1
Commercial paper	P-1	A-1	F1
NEECH:^(b)			
Corporate credit rating	Baa1	A-	A-
Debentures	Baa1	BBB+	A-
Junior subordinated debentures	Baa2	BBB	BBB
Commercial paper	P-2	A-2	F2

- (a) A security rating is not a recommendation to buy, sell or hold securities and should be evaluated independently of any other rating. The rating is subject to revision or withdrawal at any time by the assigning rating organization.
- (b) The outlook indicated by each of Moody's, S&P and Fitch is stable.
- (c) Short-term ratings are presented as all bonds outstanding are currently paying a short-term interest rate. At FPL's election, a portion or all of the bonds may be adjusted to a long-term interest rate.

NEE and its subsidiaries have no credit rating downgrade triggers that would accelerate the maturity dates of outstanding debt. A change in ratings is not an event of default under applicable debt instruments, and while there are conditions to drawing on the credit facilities noted above, the maintenance of a specific minimum credit rating is not a condition to drawing on these credit facilities.

Commitment fees and interest rates on loans under these credit facilities' agreements are tied to credit ratings. A ratings downgrade also could reduce the accessibility and increase the cost of commercial paper and other short-term debt issuances and borrowings and additional or replacement credit facilities. In addition, a ratings downgrade could result in, among other things, the requirement that NEE subsidiaries post collateral under certain agreements and guarantee arrangements, including, but not limited to, those related to fuel procurement, power sales and purchases, nuclear decommissioning funding, debt-related reserves and trading activities. FPL's and NEECH's credit facilities are available to support these potential requirements.

Covenants

NEE's charter does not limit the dividends that may be paid on its common stock. As a practical matter, the ability of NEE to pay dividends on its common stock is dependent upon, among other things, dividends paid to it by its subsidiaries. For example, FPL pays dividends to NEE in a manner consistent with FPL's long-term targeted capital structure. However, the mortgage securing FPL's first mortgage bonds contains provisions which, under certain conditions, restrict the payment of dividends to NEE and the issuance of additional first mortgage bonds. Additionally, in some circumstances, the mortgage restricts the amount of retained earnings that FPL can use to pay cash dividends on its common stock. The restricted amount may change based on factors set out in the mortgage. Other than this restriction on the payment of common stock dividends, the mortgage does not restrict FPL's use of retained earnings. As of December 31, 2025, no retained earnings were restricted by these provisions of the mortgage and, in light of FPL's current financial condition and level of earnings, management does not expect that planned financing activities or dividends would be affected by these limitations.

FPL may issue first mortgage bonds under its mortgage subject to its meeting an adjusted net earnings test set forth in the mortgage, which generally requires adjusted net earnings to be at least twice the annual interest requirements on, or at least 10% of the aggregate principal amount of, FPL's first mortgage bonds including those to be issued and all indebtedness of FPL that ranks prior or equal to the first mortgage bonds. As of December 31, 2025, coverage for the 12 months ended December 31, 2025 would have been approximately 7.5 times the annual interest requirements and approximately 3.6 times the aggregate principal requirements. New first mortgage bonds are also limited to an amount equal to the sum of 60% of unfunded property additions after adjustments to offset property retirements, the amount of retired first mortgage bonds or qualified lien bonds and the amount of cash on deposit with the mortgage trustee. As of December 31, 2025, FPL could have issued in excess of \$38 billion of additional first mortgage bonds based on the unfunded property additions and retired first mortgage bonds. As of December 31, 2025, no cash was deposited with the mortgage trustee for these purposes.

In September 2006, NEE and NEECH executed a Replacement Capital Covenant (as amended, September 2006 RCC) in connection with NEECH's offering of \$350 million principal amount of Series B Enhanced Junior Subordinated Debentures due 2066 (Series B junior subordinated debentures). The September 2006 RCC is for the benefit of persons that buy, hold or sell a specified series of long-term indebtedness (covered debt) of NEECH (other than the Series B junior subordinated debentures) or, in certain cases, of NEE. NEECH's 3.50% Debentures, Series due April 1, 2029 have been designated as the covered debt under the September 2006 RCC. The September 2006 RCC provides that NEECH may redeem, and NEE or NEECH may purchase, any Series B junior subordinated debentures on or before October 1, 2036, only to the extent that the redemption or purchase price does not exceed a specified amount of proceeds from the sale of qualifying securities, subject to certain limitations described in the September 2006 RCC. Qualifying securities are securities that have equity-like characteristics that are the same as, or more equity-like than, the Series B junior subordinated debentures at the time of redemption or purchase, which are sold within 365 days prior to the date of the redemption or repurchase of the Series B junior subordinated debentures.

In June 2007, NEE and NEECH executed a Replacement Capital Covenant (as amended, June 2007 RCC) in connection with NEECH's offering of \$400 million principal amount of its Series C Junior Subordinated Debentures due 2067 (Series C junior subordinated debentures). The June 2007 RCC is for the benefit of persons that buy, hold or sell a specified series of covered debt of NEECH (other than the Series C junior subordinated debentures) or, in certain cases, of NEE. NEECH's 3.50% Debentures, Series due April 1, 2029 have been designated as the covered debt under the June 2007 RCC. The June 2007 RCC provides that NEECH may redeem or purchase, or satisfy, discharge or defease (collectively, defease), and NEE and any majority-owned subsidiary of NEE or NEECH may purchase, any Series C junior subordinated debentures on or before June 15, 2037, only to the extent that the principal amount defeased or the applicable redemption or purchase price does not exceed a specified amount raised from the issuance, during the 365 days prior to the date of that redemption, purchase or defeasance, of qualifying securities that have equity-like characteristics that are the same as, or more equity-like than, the applicable characteristics of the Series C junior subordinated debentures at the time of redemption, purchase or defeasance, subject to certain limitations described in the June 2007 RCC.

CRITICAL ACCOUNTING ESTIMATES

Critical accounting estimates are those that NEE believes are both most important to the portrayal of its financial condition and results of operations, and require complex, subjective judgments, often as a result of the need to make assumptions about the effect of matters that are inherently uncertain. Judgments and uncertainties affecting the critical accounting estimates may result in materially different amounts being reported under different conditions or using different assumptions. NEE's significant accounting policies, including those requiring critical accounting estimates, are described in Note 1 to the consolidated financial statements, which were prepared under GAAP. Further details regarding NEE's critical accounting estimates are as follows:

Accounting for Derivatives and Hedging Activities

NEE uses derivative instruments (primarily swaps, options, futures and forwards) to manage the physical and financial risks inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and expected future debt issuances and borrowings. In addition, NEE, through NEER, uses derivatives to optimize the value of its power generation and natural gas and oil production assets and engages in power and fuel marketing and trading activities to take advantage of expected future favorable price movements.

Nature of Accounting Estimates

Accounting pronouncements require the use of fair value accounting if certain conditions are met, which may require significant judgment to measure the fair value of assets and liabilities. This applies not only to traditional financial derivative instruments, but to any contract having the accounting characteristics of a derivative. As a result, significant judgment must be used in applying derivatives accounting guidance to contracts. In the event changes in interpretation occur, it is possible that contracts that currently are excluded from derivatives accounting rules would have to be recorded on the balance sheet at fair value, with changes in the fair value recorded in the statement of income.

Assumptions and Accounting Approach

Derivative instruments, when required to be marked to market, are recorded on the balance sheet at fair value using a combination of market and income approaches. Fair values for some of the longer-term contracts where liquid markets are not available are derived through the use of industry-standard valuation techniques, such as internally developed models which estimate the fair value of a contract by calculating the present value of the difference between the contract price and the forward prices. Forward prices represent the price at which a buyer or seller could contract today to purchase or sell a commodity at a future date. The near-term forward market for electricity is generally liquid and therefore the prices in the early years of the forward curves reflect observable market quotes. However, in the later years, the market is much less liquid and forward price curves must be developed using factors including the forward prices for the commodities used as fuel to generate electricity, the expected system heat rate (which measures the efficiency of power plants in converting fuel to electricity) in the region where the purchase or sale takes place, and a fundamental forecast of expected spot prices based on modeled supply and demand in the region. NEE estimates the fair value of interest rate and foreign currency derivatives using an income approach based on a discounted cash flows valuation technique utilizing the net amount of estimated future cash inflows and outflows related to the derivative agreements. The assumptions in these models are critical since any changes therein could have a significant impact on the fair value of the derivative.

At FPL, substantially all changes in the fair value of energy derivative transactions are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel clause. See Note 3.

In NEE's non-rate regulated operations, predominantly NextEra Energy Resources, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues and the equity method investees' related activity is recognized in equity in losses of equity method investees in NEE's consolidated statements of income.

For interest rate and foreign currency derivative instruments, all changes in the derivatives' fair value are recognized in interest expense and the equity method investees' related activity is recognized in equity in losses of equity method investees in NEE's consolidated statements of income. NEE estimates the fair value of these derivatives using an income approach based on a discounted cash flows valuation technique utilizing observable inputs.

Certain derivative transactions at NEER are entered into as economic hedges but the transactions do not meet the requirements for hedge accounting, hedge accounting treatment is not elected or hedge accounting has been discontinued. Changes in the fair value of those transactions are marked to market and reported in the consolidated statements of income, resulting in earnings volatility. These changes in fair value are reflected in the non-qualifying hedge category in computing adjusted earnings and could be significant to NEER's results because the economic offset to the positions are not marked to market. As a consequence, NEE's net income reflects only the movement in one part of economically-linked transactions. For example, a gain (loss) in the non-qualifying hedge category for certain energy derivatives is offset by decreases (increases) in the fair value of related physical asset positions in the portfolio or contracts, which are not marked to market under GAAP. For this reason, NEE's management views results expressed excluding the unrealized mark-to-market impact of the non-qualifying hedges as a meaningful measure of current period performance. For additional information regarding derivative instruments, see Note 3, Overview and Energy Marketing and Trading and Market Risk Sensitivity.

Accounting for Pension Benefits

NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries. Management believes that, based on actuarial assumptions and the well-funded status of the pension plan, NEE will not be required to make any cash contributions to the qualified pension plan in the near future. The qualified pension plan has a fully funded trust dedicated to providing benefits under the plan. NEE allocates net periodic income associated with the pension plan to its subsidiaries annually using specific criteria.

Nature of Accounting Estimates

For the pension plan, the benefit obligation is the actuarial present value, as of the December 31 measurement date, of all benefits attributed by the pension benefit formula to employee service rendered to that date. The amount of benefit to be paid depends on a number of future events incorporated into the pension benefit formula, including an estimate of the average remaining life of employees/survivors as well as the average years of service rendered. The projected benefit obligation is measured based on assumptions concerning future interest rates and future employee compensation levels. NEE derives pension income from actuarial calculations based on the plan's provisions and various management assumptions including discount rate, rate of increase in compensation levels and expected long-term rate of return on plan assets.

Assumptions and Accounting Approach

Accounting guidance requires recognition of the funded status of the pension plan in the balance sheet, with changes in the funded status recognized in other comprehensive income within shareholders' equity in the year in which the changes occur. Since NEE is the plan sponsor, and its subsidiaries do not have separate rights to the plan assets or direct obligations to their employees, this accounting guidance is reflected at NEE and not allocated to the subsidiaries. The portion of previously unrecognized actuarial gains and losses and prior service costs or credits that are estimated to be allocable to FPL as net periodic (income) cost in future periods and that otherwise would be recorded in accumulated other comprehensive income are classified as regulatory assets and liabilities at NEE in accordance with regulatory treatment.

Net periodic pension income is calculated using a number of actuarial assumptions. Those assumptions for the years ended December 31, 2025, 2024 and 2023 include:

	2025	2024	2023
Discount rate	5.58 %	4.88 %	5.05 %
Salary increase	4.90 %	4.90 %	4.90 %
Expected long-term rate of return, net of investment management fees	8.00 %	8.00 %	8.00 %
Weighted-average interest crediting rate	3.88 %	3.89 %	3.82 %

In developing these assumptions, NEE evaluated input, including other qualitative and quantitative factors, from its actuaries and consultants, as well as information available in the marketplace. Discount rates are established using the full yield curve approach. In addition, for the expected long-term rate of return on pension plan assets, NEE considered different models, capital market return assumptions and historical returns for a portfolio with an equity/bond asset mix similar to its pension fund, as well as its pension fund's historical compounded returns. NEE will continue to evaluate all of its actuarial assumptions, including its expected rate of return, at least annually, and will adjust them as appropriate.

NEE utilizes in its determination of pension income a market-related valuation of plan assets. This market-related valuation reduces year-to-year volatility and recognizes investment gains or losses over a five-year period following the year in which they occur. Investment gains or losses for this purpose are the difference between the expected return calculated using the market-related value of plan assets and the actual return realized on those plan assets. Since the market-related value of plan assets recognizes gains or losses over a five-year period, the future value of plan assets will be affected as previously deferred gains or losses are recognized. Such gains and losses together with other differences between actual results and the estimates used in the actuarial valuations are deferred and recognized in determining pension income only to the extent they exceed 10% of the greater of projected benefit obligations or the market-related value of plan assets.

The following table illustrates the effect on net periodic pension income of changing the critical actuarial assumptions discussed above, while holding all other assumptions constant:

	Change in Assumption	Increase (Decrease) in 2025 Net Periodic Pension Income	
		NEE	FPL
		(millions)	
Expected long-term rate of return	0.5%	\$ 26	\$ 15
Discount rate	(0.5)%	\$ 1	\$ 1
Salary increase	0.5%	\$ (2)	\$ (1)

NEE also utilizes actuarial assumptions about mortality to help estimate obligations of the pension plan. NEE has adopted the latest mortality tables released by the Society of Actuaries and an actuarially adjusted mortality improvement scale that incorporates recent experience. The annual update to the mortality assumptions did not have a material impact on the pension plan's obligation.

See Note 12.

Carrying Value of Long-Lived Assets

NEE evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable.

Nature of Accounting Estimates

The amount of future net cash flows, the timing of the cash flows and the determination of an appropriate interest rate all involve estimates and judgments about future events. In particular, the aggregate amount of cash flows determines whether an impairment exists, and the timing of the cash flows is critical in determining fair value. Because each assessment is based on the facts and circumstances associated with each long-lived asset, the effects of changes in assumptions cannot be generalized.

Assumptions and Accounting Approach

An impairment loss is required to be recognized if the carrying value of the asset exceeds the undiscounted future net cash flows associated with that asset. The impairment loss to be recognized is the amount by which the carrying value of the long-lived asset exceeds the asset's fair value. In most instances, the fair value is determined by discounting estimated future cash flows using an appropriate interest rate.

Carrying Value of Equity Method Investments

NEE tests its equity method investments for impairment whenever events or changes in circumstances indicate that the fair value of the investment is less than the carrying value.

Nature of Accounting Estimates

Indicators of impairment may include, but are not limited to, a series of operating losses of an investee, the absence of an ability to recover the carrying amount of the investment, the inability of the investee to sustain an earnings capacity and a current fair value of an investment that may be less than its carrying value. If indicators of impairment exist, an estimate of the investment's fair value will be calculated. Approaches for estimating fair value include, among others, an income approach using a probability-weighted discounted cash flows model, a market approach using an earnings before interest, taxes, depreciation and amortization (EBITDA) multiple model, and a market observable transaction. The probability assigned to each scenario as well as the cash flows and EBITDA multiple identified are critical in determining fair value.

Assumptions and Accounting Approach

An impairment loss is required to be recognized if the impairment is deemed to be other than temporary. Assessment of whether an investment is other than temporarily impaired involves, among other factors, consideration of the length of time that the fair value is below the carrying value, current expected performance relative to the expected performance when the investment was initially made, performance relative to peers, industry performance relative to the economy, credit rating, regulatory actions and legal and permitting challenges. If management is unable to reasonably assert that an impairment is temporary or believes that there will not be full recovery of the carrying value of its investment, then the impairment is considered to be other than temporary. Investments that are other than temporarily impaired are written down to their estimated fair value and cannot subsequently be written back up for increases in estimated fair value. Impairment losses are recorded in equity in losses of equity method investees in NEE's consolidated statements of income. See Note 4 – Nonrecurring Fair Value Measurements.

Decommissioning and Dismantlement

NEE accounts for asset retirement obligations and conditional asset retirement obligations (collectively, AROs) under accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred if it can be reasonably estimated, with the offsetting associated asset retirement costs capitalized as part of the carrying amount of the long-lived assets. NEE's AROs relate primarily to decommissioning obligations of FPL's and NEER's nuclear units and to obligations for the dismantlement of certain of NEER's wind and solar facilities.

Nature of Accounting Estimates

The calculation of the future cost of retiring long-lived assets, including nuclear decommissioning and plant dismantlement costs, involves estimating the amount and timing of future expenditures and making judgments concerning whether or not such costs are considered a legal obligation. Estimating the amount and timing of future expenditures includes, among other things, making projections of when assets will be retired and ultimately decommissioned and how costs will escalate with inflation. In addition, NEE also makes interest rate and rate of return projections on its investments in determining recommended funding requirements for nuclear decommissioning costs. Periodically, NEE is required to update these estimates and projections which can affect the annual expense amounts recognized, the liabilities recorded and the annual funding requirements for nuclear decommissioning costs. For example, an increase of 0.25% in the assumed escalation rates for nuclear decommissioning costs would increase NEE's AROs as of December 31, 2025 by approximately \$179 million.

Assumptions and Accounting Approach

FPL – For ratemaking purposes, FPL accrues and funds for nuclear plant decommissioning costs over the expected service life of each unit based on studies that are approved by the FPSC. The most recent studies, filed in 2025, reflect, among other things, the expiration dates of the operating licenses for FPL's nuclear units at the time of the studies. FPL's portion of the future cost of decommissioning its four nuclear units, including spent fuel storage above what is expected to be refunded by the DOE under a spent fuel settlement agreement, is estimated to be approximately \$10.2 billion, or \$2.7 billion expressed in 2025 dollars. The ultimate costs of decommissioning reflect the applications submitted to the NRC for the extension of St. Lucie Units 1 and 2 licenses for an additional 20 years.

FPL accrues the cost of dismantling its other generation plants over the expected service life of each unit based on studies filed with the FPSC. Unlike nuclear decommissioning, dismantlement costs are not funded. The most recent studies became effective January 1, 2026. The cost estimates below are based on the January 1, 2022 studies, which were in effect during 2025. As of December 31, 2025, FPL's portion of the ultimate cost to dismantle its other generation units is approximately \$2.1 billion, or \$1.2 billion expressed in 2025 dollars. The majority of the dismantlement costs are not reported as AROs. FPL accrues for interim removal costs over the life of the related assets based on depreciation studies approved by the FPSC. Any differences between the amount of the ARO and the amount recorded for ratemaking purposes are reported as a regulatory asset or liability in accordance with regulatory accounting.

The components of FPL's decommissioning of nuclear plants, dismantlement of plants and other accrued asset removal costs are as follows:

	Nuclear Decommissioning		Other Generation Plant Dismantlement		Interim Removal Costs and Other		Total	
	December 31,		December 31,		December 31,		December 31,	
	2025	2024	2025	2024	2025	2024	2025	2024
	(millions)							
ARO ^(a)	\$ 1,844	\$ 1,959	\$ 323	\$ 331	\$ 3	\$ 5	\$ 2,170	\$ 2,295
Less capitalized ARO asset net of accumulated depreciation	—	58	80	82	—	—	80	140
Accrued asset removal costs ^(b)	548	509	201	191	(2,066)	(1,375)	(1,317)	(675)
Asset retirement obligation regulatory expense difference ^(c)	5,784	4,936	(112)	(130)	—	—	5,672	4,806
Accrued decommissioning, dismantlement and other accrued asset removal costs ^(d)	<u>\$ 8,176</u>	<u>\$ 7,346</u>	<u>\$ 332</u>	<u>\$ 310</u>	<u>\$ (2,063)</u>	<u>\$ (1,370)</u>	<u>\$ 6,445</u>	<u>\$ 6,286</u>

(a) See Note 11.

(b) Included in noncurrent regulatory liabilities on NEE's and FPL's consolidated balance sheets, except for \$2,064 million and \$1,373 million which are related to interim removal costs and are included in noncurrent regulatory assets as of December 31, 2025 and 2024, respectively. See Note 1 – Rate Regulation.

(c) Included in noncurrent regulatory liabilities on NEE's and FPL's consolidated balance sheets, except for \$1 million and \$3 million which are related to other generation plant dismantlement and are included in noncurrent regulatory assets as of December 31, 2025 and 2024, respectively. See Note 1 – Rate Regulation.

(d) Represents total amount accrued for ratemaking purposes.

NEER – NEER records liabilities for the present value of its expected nuclear plant decommissioning and its expected wind and solar facilities dismantlement costs which are determined using various internal and external data and applying a probability percentage to a variety of scenarios regarding the life of the plant and facilities, as well as the timing of decommissioning or dismantlement. The liabilities are being accreted using the interest method through the date decommissioning or dismantlement activities are expected to be complete. As of December 31, 2025 and 2024, the AROs for decommissioning of NEER's nuclear plants approximated \$688 million and \$646 million, respectively. NEER's portion of the ultimate cost of decommissioning its nuclear plants, including costs associated with spent fuel storage above what is expected to be refunded by the DOE under a spent fuel settlement agreement, is estimated to be approximately \$11.4 billion, or \$2.3 billion expressed in 2025 dollars. As of December 31, 2025 and 2024, the AROs for dismantling certain of NEER's wind facilities approximated \$365 million and \$329 million, respectively, and for dismantling certain of NEER's solar facilities approximated \$316 million and \$315 million, respectively.

See Note 1 – Asset Retirement Obligations and – Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs and Note 11.

Regulatory Accounting

Certain of NEE's businesses are subject to rate regulation which results in the recording of regulatory assets and liabilities. See Note 1 – Rate Regulation for details regarding NEE's regulatory assets and liabilities.

Nature of Accounting Estimates

Regulatory assets and liabilities represent probable future revenues that will be recovered from or refunded to customers through the ratemaking process. Regulatory assets and liabilities are included in rate base or otherwise earn (pay) a return on investment during the recovery period.

Assumptions and Accounting Approach

Accounting guidance allows regulators to create assets and impose liabilities that would not be recorded by non-rate regulated entities. If NEE's rate-regulated entities, primarily FPL, were no longer subject to cost-based rate regulation, the existing regulatory assets and liabilities would be written off unless regulators specify an alternative means of recovery or refund. In addition, the regulators, including the FPSC for FPL, have the authority to disallow recovery of costs that they consider excessive or imprudently incurred. Such costs may include, among others, fuel and O&M expenses, the cost of replacing power lost when generation facilities are unavailable, storm restoration costs and costs associated with the construction or acquisition of new facilities. The continued applicability of regulatory accounting is assessed at each reporting period.

ENERGY MARKETING AND TRADING AND MARKET RISK SENSITIVITY

NEE and FPL are exposed to risks associated with adverse changes in commodity prices, interest rates and equity prices. Financial instruments and positions affecting the financial statements of NEE and FPL described below are held primarily for purposes other than trading. Market risk is measured as the potential loss in fair value resulting from hypothetical reasonably possible changes in commodity prices, interest rates or equity prices over the next year. Management has established risk management policies to monitor and manage such market risks, as well as credit risks.

Commodity Price Risk

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the physical and financial risks inherent in the purchase and sale of fuel and electricity. In addition, NEE, through NEER, uses derivatives to optimize the value of its power generation and natural gas and oil production assets and engages in power and fuel marketing and trading activities to take advantage of expected future favorable price movements. See Critical Accounting Estimates – Accounting for Derivatives and Hedging Activities and Note 3.

During 2024 and 2025, the changes in the fair value of NEE's consolidated subsidiaries' energy contract derivative instruments were as follows:

	Hedges on Owned Assets			NEE Total
	Trading	Non- Qualifying	FPL Cost Recovery Clauses	
	(millions)			
Fair value of contracts outstanding as of December 31, 2023	\$ 1,337	\$ (1,477)	\$ 12	\$ (128)
Reclassification to realized at settlement of contracts	(373)	190	(24)	(207)
Value of contracts acquired	2	24	—	26
Net option premium purchases (issuances)	(2)	23	—	21
Changes in fair value excluding reclassification to realized	380	(284)	50	146
Fair value of contracts outstanding as of December 31, 2024	1,344	(1,524)	38	(142)
Reclassification to realized at settlement of contracts	(766)	516	35	(215)
Value of contracts acquired	46	(7)	—	39
Net option premium purchases (issuances)	29	20	—	49
Changes in fair value excluding reclassification to realized	680	(209)	(49)	422
Fair value of contracts outstanding as of December 31, 2025	1,333	(1,204)	24	153
Net margin cash collateral paid (received)				(86)
Total mark-to-market energy contract net assets (liabilities) as of December 31, 2025	<u>\$ 1,333</u>	<u>\$ (1,204)</u>	<u>\$ 24</u>	<u>\$ 67</u>

NEE's total mark-to-market energy contract net assets (liabilities) as of December 31, 2025 shown above are included on the consolidated balance sheets as follows:

	December 31, 2025
	(millions)
Current derivative assets	\$ 935
Noncurrent derivative assets	1,780
Current derivative liabilities	(767)
Noncurrent derivative liabilities	(1,881)
NEE's total mark-to-market energy contract net assets	<u>\$ 67</u>

The sources of fair value estimates and maturity of energy contract derivative instruments as of December 31, 2025 were as follows:

	Maturity						
	2026	2027	2028	2029	2030	Thereafter	Total
	(millions)						
Trading:							
Quoted prices in active markets for identical assets	\$ (74)	\$ (32)	\$ 15	\$ (18)	\$ 17	\$ 3	\$ (89)
Significant other observable inputs	425	222	66	41	5	73	832
Significant unobservable inputs	165	28	46	45	62	244	590
Total	516	218	127	68	84	320	1,333
Owned Assets – Non-Qualifying:							
Quoted prices in active markets for identical assets	(59)	(35)	(7)	13	8	1	(79)
Significant other observable inputs	(299)	(237)	(131)	(115)	(47)	(356)	(1,185)
Significant unobservable inputs	(32)	(75)	(21)	14	18	156	60
Total	(390)	(347)	(159)	(88)	(21)	(199)	(1,204)
Owned Assets – FPL Cost Recovery Clauses:							
Quoted prices in active markets for identical assets	—	—	—	—	—	—	—
Significant other observable inputs	(7)	(1)	—	—	—	—	(8)
Significant unobservable inputs	31	1	—	—	—	—	32
Total	24	—	—	—	—	—	24
Total sources of fair value	\$ 150	\$ (129)	\$ (32)	\$ (20)	\$ 63	\$ 121	\$ 153

With respect to commodities, NEE's Exposure Management Committee (EMC), which is comprised of certain members of senior management, and NEE's chief executive officer are responsible for the overall approval of market risk management policies and the delegation of approval and authorization levels. The EMC and NEE's chief executive officer receive periodic updates on market positions and related exposures, credit exposures and overall risk management activities.

NEE uses a value-at-risk (VaR) model to measure commodity price market risk in its trading and mark-to-market portfolios. The VaR is the estimated loss of market value based on a one-day holding period at a 95% confidence level using historical simulation methodology. The VaR figures are as follows:

	Trading ^(a)		Non-Qualifying Hedges and Hedges in FPL Cost Recovery Clauses ^(b)		Total	
	FPL	NEE	FPL	NEE	FPL	NEE
December 31, 2024	\$ —	\$ 6	\$ 3	\$ 98	\$ 3	\$ 88
December 31, 2025	\$ —	\$ 14	\$ 9	\$ 92	\$ 9	\$ 83
Average for the year ended December 31, 2025	\$ —	\$ 12	\$ 10	\$ 90	\$ 10	\$ 89

(a) The VaR figures for the trading portfolio include positions that are marked to market. Taking into consideration offsetting unmarked non-derivative positions, such as physical inventory, the trading VaR figures were approximately \$5 million and \$6 million as of December 31, 2025 and 2024, respectively.

(b) Non-qualifying hedges are employed to reduce the market risk exposure to physical assets or contracts which are not marked to market. The VaR figures for the non-qualifying hedges and hedges in FPL cost recovery clauses category do not represent the economic exposure to commodity price movements.

Interest Rate Risk

NEE's and FPL's financial results are exposed to risk resulting from changes in interest rates as a result of their respective outstanding and expected future issuances of debt, investments in special use funds and other investments. NEE and FPL manage their respective interest rate exposure by monitoring current interest rates, entering into interest rate contracts and using a combination of fixed-rate and variable-rate debt. Interest rate contracts are used to mitigate and adjust interest rate exposure when deemed appropriate based upon market conditions or when required by financing agreements.

The following are estimates of the fair value of NEE's and FPL's financial instruments that are exposed to interest rate risk:

	December 31, 2025		December 31, 2024	
	Carrying Amount	Estimated Fair Value ^(a)	Carrying Amount	Estimated Fair Value ^(a)
(millions)				
NEE:				
Special use funds	\$ 2,453	\$ 2,453	\$ 2,294	\$ 2,294
Other investments, primarily debt securities	\$ 2,280	\$ 2,280	\$ 2,007	\$ 2,007
Long-term debt, including current portion	\$ 93,056	\$ 91,614	\$ 80,446	\$ 76,428
Interest rate contracts – net unrealized gains (losses)	\$ (252)	\$ (252)	\$ 293	\$ 293
FPL:				
Special use funds	\$ 1,885	\$ 1,885	\$ 1,741	\$ 1,741
Long-term debt, including current portion	\$ 28,682	\$ 27,354	\$ 26,745	\$ 24,718

(a) See Note 3 and Note 4.

The special use funds of NEE and FPL consist of restricted funds set aside to cover the cost of storm damage for FPL and for the decommissioning of NEE's and FPL's nuclear power plants. See Note 1 – Storm Funds, Storm Reserves and Storm Cost Recovery. A portion of these funds is invested in fixed income debt securities primarily carried at estimated fair value. At FPL, changes in fair value, including any credit losses, result in a corresponding adjustment to the related regulatory asset or liability accounts based on current regulatory treatment. The changes in fair value for NEE's non-rate regulated operations result in a corresponding adjustment to other comprehensive income, except for credit losses and unrealized losses on available for sale securities intended or required to be sold prior to recovery of the amortized cost basis, which are reported in current period earnings. Because the funds set aside by FPL for storm damage could be needed at any time, the related investments are generally more liquid and, therefore, are less sensitive to changes in interest rates. The nuclear decommissioning funds, in contrast, are generally invested in longer-term securities.

As of December 31, 2025, NEE had interest rate contracts with a net notional amount of approximately \$47.3 billion to manage exposure to the variability of cash flows primarily associated with expected future and outstanding debt issuances at NEECH and NEER. See Note 3.

Based upon a hypothetical 10% decrease in interest rates, the fair value of NEE's net liabilities would increase by approximately \$4,392 million (\$1,351 million for FPL) as of December 31, 2025.

Equity Price Risk

NEE and FPL are exposed to risk resulting from changes in prices for equity securities. For example, NEE's nuclear decommissioning reserve funds include marketable equity securities carried at their market value of approximately \$7,007 million and \$6,164 million (\$4,840 million and \$4,219 million for FPL) as of December 31, 2025 and 2024, respectively. NEE's and FPL's investment strategy for equity securities in their nuclear decommissioning reserve funds emphasizes marketable securities which are broadly diversified. As of December 31, 2025, a hypothetical 10% decrease in the prices quoted on stock exchanges would result in an approximately \$657 million (\$446 million for FPL) reduction in fair value. For FPL, a corresponding adjustment would be made to the related regulatory asset or liability accounts based on current regulatory treatment, and for NEE's non-rate regulated operations, a corresponding amount would be recorded in change in unrealized gains (losses) on equity securities held in NEER's nuclear decommissioning funds – net in NEE's consolidated statements of income. See Note 4.

Credit Risk

NEE and its subsidiaries, including FPL, are also exposed to credit risk through their energy marketing and trading operations. Credit risk is the risk that a financial loss will be incurred if a counterparty to a transaction does not fulfill its financial obligation. NEE manages counterparty credit risk for its subsidiaries with energy marketing and trading operations through established policies, including counterparty credit limits, and in some cases credit enhancements, such as cash prepayments, letters of credit, cash and other collateral and guarantees.

Credit risk is also managed through the use of master netting agreements. NEE's credit department monitors current and forward credit exposure to counterparties and their affiliates, both on an individual and an aggregate basis. For all derivative and contractual transactions, NEE's energy marketing and trading operations, which include FPL's energy marketing and trading division, are exposed to losses in the event of nonperformance by counterparties to these transactions. Some relevant considerations when assessing NEE's energy marketing and trading operations' credit risk exposure include the following:

- Operations are primarily concentrated in the energy industry.
- Trade receivables and other financial instruments are predominately with energy, utility and financial services related companies, as well as municipalities, cooperatives and other trading companies in the U.S.
- Overall credit risk is managed through established credit policies and is overseen by the EMC.
- Prospective and existing customers are reviewed for creditworthiness based upon established standards, with customers not meeting minimum standards providing various credit enhancements or secured payment terms, such as letters of credit or the posting of margin cash collateral.
- Master netting agreements are used to offset cash and noncash gains and losses arising from derivative instruments with the same counterparty. NEE's policy is to have master netting agreements in place with significant counterparties.

Based on NEE's policies and risk exposures related to credit, NEE and FPL do not anticipate a material adverse effect on their financial statements as a result of counterparty nonperformance. As of December 31, 2025, NEE's credit risk exposure associated with its energy marketing and trading operations, taking into account collateral and contractual netting rights, totaled approximately \$3.4 billion (\$113 million for FPL), of which approximately 88% (98% for FPL) was with companies that have investment grade credit ratings. See Note 3.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

See Management's Discussion – Energy Marketing and Trading and Market Risk Sensitivity.

Item 8. Financial Statements and Supplementary Data

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

NextEra Energy, Inc.'s (NEE) and Florida Power & Light Company's (FPL) management are responsible for establishing and maintaining adequate internal control over financial reporting as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f). The consolidated financial statements, which in part are based on informed judgments and estimates made by management, have been prepared in conformity with generally accepted accounting principles applied on a consistent basis.

To aid in carrying out this responsibility, we, along with all other members of management, maintain a system of internal accounting control which is established after weighing the cost of such controls against the benefits derived. In the opinion of management, the overall system of internal accounting control provides reasonable assurance that the assets of NEE and FPL and their subsidiaries are safeguarded and that transactions are executed in accordance with management's authorization and are properly recorded for the preparation of financial statements. In addition, management believes the overall system of internal accounting control provides reasonable assurance that material errors or irregularities would be prevented or detected on a timely basis by employees in the normal course of their duties. Any system of internal accounting control, no matter how well designed, has inherent limitations, including the possibility that controls can be circumvented or overridden and misstatements due to error or fraud may occur and not be detected. Also, because of changes in conditions, internal control effectiveness may vary over time. Accordingly, even an effective system of internal control will provide only reasonable assurance with respect to financial statement preparation and reporting.

The system of internal accounting control is supported by written policies and guidelines, the selection and training of qualified employees, an organizational structure that provides an appropriate division of responsibility and a program of internal auditing. NEE's written policies include a Code of Business Conduct & Ethics that states management's policy on conflicts of interest and ethical conduct. Compliance with the Code of Business Conduct & Ethics is confirmed annually by key personnel.

The Board of Directors pursues its oversight responsibility for financial reporting and accounting through its Audit Committee. This Committee, which is comprised entirely of independent directors, meets regularly with management, the internal auditors and the independent auditors to make inquiries as to the manner in which the responsibilities of each are being discharged. The independent auditors and the internal audit staff have free access to the Committee without management present to discuss auditing, internal accounting control and financial reporting matters.

Management assessed the effectiveness of NEE's and FPL's internal control over financial reporting as of December 31, 2025, using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in the *Internal Control – Integrated Framework (2013)*. Based on this assessment, management believes that NEE's and FPL's internal control over financial reporting was effective as of December 31, 2025.

NEE's and FPL's independent registered public accounting firm, Deloitte & Touche LLP, is engaged to express an opinion on NEE's and FPL's consolidated financial statements and an opinion on NEE's and FPL's internal control over financial reporting. Their reports are based on procedures believed by them to provide a reasonable basis to support such opinions. These reports appear on the following pages.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of
NextEra Energy, Inc. and Florida Power & Light Company

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of NextEra Energy, Inc. and subsidiaries (NEE) and Florida Power & Light Company and subsidiaries (FPL) as of December 31, 2025, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, NEE and FPL maintained, in all material respects, effective internal control over financial reporting as of December 31, 2025, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2025, of NEE and FPL and our report dated February 13, 2026, expressed unqualified opinions on those financial statements.

Basis for Opinion

NEE's and FPL's management are responsible for maintaining effective internal control over financial reporting and for their assessments of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express opinions on NEE's and FPL's internal control over financial reporting based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to NEE and FPL in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audits included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

DELOITTE & TOUCHE LLP

Boca Raton, Florida
February 13, 2026

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of
NextEra Energy, Inc. and Florida Power & Light Company

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of NextEra Energy, Inc. and subsidiaries (NEE) and the related separate consolidated balance sheets of Florida Power & Light Company and subsidiaries (FPL) as of December 31, 2025 and 2024, and NEE's and FPL's related consolidated statements of income and cash flows, NEE's consolidated statements of comprehensive income and equity, and FPL's consolidated statements of common shareholder's equity, for each of the three years in the period ended December 31, 2025, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the consolidated financial position of NEE and FPL as of December 31, 2025 and 2024, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2025, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), NEE's and FPL's internal control over financial reporting as of December 31, 2025, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 13, 2026, expressed unqualified opinions on NEE's and FPL's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of NEE's and FPL's management. Our responsibility is to express opinions on NEE's and FPL's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to NEE and FPL in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinions.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements of NEE and FPL that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

NEE – Operating Revenues – Unrealized Gains – Refer to Note 3 to the financial statements

Critical Audit Matter Description

NEE enters into complex energy derivatives and transacts in certain markets that are thinly traded, which may result in subjective estimates of fair value that include unobservable inputs. Changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are primarily recognized on a net basis in operating revenues. For the year ended December 31, 2025, unrealized gains associated with Level 3 transactions of \$395 million are included in operating revenues in the consolidated statement of income of NEE.

Given management uses complex proprietary models and unobservable inputs to estimate the fair value of Level 3 derivative assets and liabilities, performing audit procedures to evaluate the appropriateness of these models and inputs required a high degree of auditor judgment and an increased extent of effort, including the need to involve our firm specialists who possess significant quantitative and modeling expertise.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to operating revenue – unrealized gains included the following, among others:

- We tested the effectiveness of controls relating to commodity valuation models, their related Level 3 unobservable inputs, and market data validation.
- We selected a sample of transactions, obtained an understanding of the business rationale of transactions, and read the underlying contractual agreements.
- We used personnel in our firm who specialize in energy transacting to independently value Level 3 transactions. For certain fair value models, we used our firm specialists to directly test the underlying assumptions of the unobservable inputs used by management.
- We evaluated NEE's disclosures related to the proprietary models and unobservable inputs to estimate the fair value of Level 3 derivative assets and liabilities, including the balances recorded and significant assumptions.

NEE and FPL – Impact of Rate Regulation on the Financial Statements – Refer to Note 1 to the financial statements

Critical Audit Matter Description

FPL is subject to rate regulation by the Florida Public Service Commission (the "FPSC"), which has jurisdiction with respect to the rates of electric utility companies. Management has determined it meets the requirements under accounting principles generally accepted in the United States of America to prepare its financial statements applying the specialized rules to account for the effects of cost-based rate regulation. Accounting for the economics of rate regulation impacts multiple financial statement line items and disclosures, such as property, plant, and equipment; regulatory assets and liabilities; operating revenues; fuel expense; operation and maintenance expense; and depreciation expense.

Rates are determined and approved in regulatory proceedings based on an analysis of FPL's costs to provide utility service and a return on, and recovery of, FPL's investment in the assets required to deliver utility service. Accounting guidance for FPL's regulated operations provides that rate-regulated entities report assets and liabilities consistent with the recovery of those incurred costs in rates, if it is probable that such rates will be charged and collected. The FPSC has the authority to disallow recovery of costs that it considers excessive or imprudently incurred. Future FPSC decisions could impact the accounting for regulated operations, including decisions about the amount of recoverable costs and any refunds that may be required. As a result of this cost-based regulation, FPL follows the accounting guidance that allows regulators to create assets and impose liabilities, based on the probability of future cash flows, that would not be recorded by non-rate regulated entities. Regulatory assets and liabilities represent probable future revenues that will be recovered from or refunded to customers through the ratemaking process.

We identified the impact of rate regulation as a critical audit matter due to the requirement to have auditors with deep knowledge of and significant experience with accounting for rate regulation and the rate setting process due to its inherent complexities.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the impact of rate regulation included the following, among others:

- We tested the effectiveness of management's controls over the evaluation of the likelihood of (1) the recovery in future rates of costs incurred as property, plant, and equipment and deferred as regulatory assets, and (2) a refund or a future reduction in rates that should be reported as regulatory liabilities. We also tested the effectiveness of management's controls over the initial recognition of amounts as property, plant, and equipment and regulatory assets or liabilities, including the depreciation and amortization of such amounts in accordance with FPSC orders; and the monitoring and evaluation of regulatory developments, including from the 2025 base rate proceeding, that may affect the likelihood of recovering costs recognized as property, plant and equipment and regulatory assets in future rates or of a refund or future reduction in rates that should be recognized as a regulatory liability.
- We assessed the likelihood of (1) recovery of recorded regulatory assets and (2) obligations requiring future reductions in rates by obtaining, reading, and evaluating relevant regulatory orders issued by the FPSC to FPL, including from the 2025 base rate proceeding, and considering regulatory precedents established by the FPSC. We also evaluated such regulatory orders and other publicly available filings made by FPL and compared them to management's recorded regulatory asset and liability balances for completeness.
- We evaluated FPL's disclosures related to the impacts of rate regulation, comprising the balances recorded and regulatory developments, including from the 2025 base rate proceeding.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2025, 2024 and 2023

1. Summary of Significant Accounting and Reporting Policies

Basis of Presentation – The operations of NextEra Energy, Inc. (NEE) are conducted primarily through Florida Power & Light Company (FPL), a wholly owned subsidiary, and NextEra Energy Resources, LLC (NextEra Energy Resources) and NextEra Energy Transmission, LLC (NEET) (collectively, NEER), wholly owned indirect subsidiaries that are combined for segment reporting purposes.

FPL's principal business is a rate-regulated electric utility which supplies electric service to more than six million customer accounts throughout most of the east and lower west coasts of Florida and eight counties throughout northwest Florida. NEER invests in independent power projects through both controlled and consolidated entities and noncontrolling ownership interests in joint ventures. NEER participates in natural gas, natural gas liquids and oil production primarily through operating and non-operating ownership interests and in pipeline infrastructure through noncontrolling or joint venture interests. NEER also invests in rate-regulated electric transmission assets and transmission lines that connect its electric generation facilities to the electric grid through controlled and consolidated entities and a noncontrolling ownership interest.

The consolidated financial statements of NEE and FPL include the accounts of their respective controlled subsidiaries. They also include NEE's and FPL's share of the undivided interest in certain assets, liabilities, revenues and expenses. Amounts representing NEE's interest in entities it does not control, but over which it exercises significant influence, are included in investment in equity method investees; the earnings/losses of these entities is included in equity in losses of equity method investees. Intercompany balances and transactions have been eliminated in consolidation. Certain amounts included in prior years' consolidated financial statements have been reclassified to conform to the current year's presentation. The preparation of financial statements requires the use of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Operating Revenues – FPL and NEER generate substantially all of NEE's operating revenues, which primarily include revenues from contracts with customers as further discussed in Note 2, as well as, at NEER, derivative and lease transactions. FPL's operating revenues include amounts resulting from base rates, cost recovery clauses (see Rate Regulation below), franchise fees, gross receipts taxes and surcharges related to storms (see Storm Funds, Storm Reserves and Storm Cost Recovery below). Franchise fees and gross receipts taxes are imposed on FPL; however, the Florida Public Service Commission (FPSC) allows FPL to include in the amounts charged to customers the amount of the gross receipts tax for all customers and the franchise fee for those customers located in the jurisdiction that imposes the amount. Accordingly, FPL's franchise fees and gross receipts taxes are reported gross in operating revenues and taxes other than income taxes and other – net in NEE's and FPL's consolidated statements of income and were approximately \$1,114 million, \$1,053 million and \$1,139 million in 2025, 2024 and 2023, respectively. FPL also collects municipal utility taxes which are reported gross in customer receivables and accounts payable on NEE's and FPL's consolidated balance sheets. Certain NEER commodity contracts for the purchase and sale of power that meet the definition of a derivative are recorded at fair value with subsequent changes in fair value recognized as revenue. See Energy Trading below and Note 3.

Rate Regulation – FPL, the most significant of NEE's rate-regulated subsidiaries, is subject to rate regulation by the FPSC and the Federal Energy Regulatory Commission (FERC). Its rates are designed to recover the cost of providing service to its customers, including a reasonable rate of return on invested capital. As a result of this cost-based regulation, FPL follows the accounting guidance that allows regulators to create assets and impose liabilities that would not be recorded by non-rate regulated entities. Regulatory assets and liabilities represent probable future revenues that will be recovered from or refunded to customers through the ratemaking process.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NEE's and FPL's regulatory assets and liabilities are as follows:

(a) The majority of these regulatory assets are being amortized over 20 years.

(b) The majority of these regulatory assets were amortized over a 12-month period that began in January 2025. See Storm Funds, Storm Reserves and Storm Cost Recovery below.

(c) See Electric Plant, Depreciation and Amortization below.

Cost recovery clauses, which are designed to permit full recovery of certain costs and provide a return on certain assets allowed to be recovered through various clauses, include substantially all fuel, purchased power and interchange expense, costs associated with an FPSC-approved transmission and distribution storm protection plan, certain costs associated with the acquisition and retirement of an electric generation facility, certain construction-related costs for certain of FPL's solar generation facilities, and conservation and certain environmental-related costs. Revenues from cost recovery clauses are recorded when billed; FPL achieves matching of costs and related revenues by deferring the net under-recovery or over-recovery. Any under-recovered costs or over-recovered revenues are collected from or returned to customers in subsequent periods.

If FPL were no longer subject to cost-based rate regulation, the existing regulatory assets and liabilities would be written off unless regulators specify an alternative means of recovery or refund. In addition, the FPSC has the authority to disallow recovery of costs that it considers excessive or imprudently incurred. The continued applicability of regulatory accounting is assessed at each reporting period. Regulatory assets and liabilities are discussed within various subsections below.

Base Rates Effective January 2026 through December 2029 – In January 2026, the FPSC issued a final order approving a stipulation and settlement agreement between FPL and several intervenors in FPL's base rate proceeding (2025 rate agreement).

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Key elements of the 2025 rate agreement, which became effective in January 2026 and continues through at least December 2029, include, among other things, the following:

- New retail base rates and charges were established resulting in the following increases in annualized retail base revenues:
 - \$945 million beginning January 1, 2026; and
 - \$705 million beginning January 1, 2027.
- In addition, FPL will receive, subject to conditions specified in the 2025 rate agreement, base rate increases associated with solar generation projects that enter service in 2027, 2028 and 2029 and battery storage projects that enter service in 2028 and 2029 through a Solar and Battery Base Rate Adjustment (SoBRA) mechanism. FPL is required to demonstrate either a specified economic or resource/reliability need for these projects.
- FPL's authorized regulatory return on common equity (regulatory ROE) is 10.95%, with a range of 9.95% to 11.95%. If FPL's earned regulatory ROE falls below 9.95%, FPL may seek retail base rate relief. If the earned regulatory ROE rises above 11.95%, any party with standing may seek a review of FPL's retail base rates.
- FPL's authorized regulatory capital structure reflects a 59.6% equity ratio, consistent with prior base rate cases.
- FPL is authorized to implement a rate stabilization mechanism (RSM) over the term of the 2025 rate agreement up to approximately \$1.5 billion, after tax. The RSM reserve includes certain deferred tax liabilities, the remaining balance from FPL's existing reserve amortization mechanism as of January 1, 2026 and investment tax credit amortization for battery storage projects placed in service in 2025. Subject to certain conditions, FPL could amortize the RSM reserve over the term of the 2025 rate agreement, provided that in any 12-month period of the 2025 rate agreement FPL would be required to amortize at least enough RSM reserve amount to maintain its minimum authorized regulatory ROE and also could not amortize any RSM reserve amount that would result in an earned regulatory ROE in excess of its maximum authorized regulatory ROE.
- Future storm restoration costs are recoverable on an interim basis beginning 60 days from the filing of a cost recovery petition, but capped at an amount that produces a surcharge of no more than \$5 for every 1,000 kilowatt-hours (kWh) of usage on residential bills during the first 12 months of cost recovery. Any additional costs would be eligible for recovery in subsequent years. If storm restoration costs, inclusive of the costs to replenish the storm reserve, exceed the cap, FPL could request an increase to the \$5 surcharge. See Note 1 – Storm Funds, Storm Reserves and Storm Cost Recovery.
- If federal or state permanent corporate income tax changes become effective during the term of the 2025 rate agreement, FPL will be able to prospectively adjust base rates after a review by the FPSC.
- FPL will implement tariffs for large-load customers with new or incremental load of 50 megawatts (MW) or greater and with a load factor of at least 85%.

In February 2026, the Office of Public Counsel, Floridians Against Increased Rates, Inc. and, as a group, Florida Rising, Inc., Environmental Confederation of Southwest Florida, Inc. and League of United Latin American Citizens of Florida filed a joint motion for reconsideration and a joint request for oral argument challenging the FPSC's final order approving the 2025 rate agreement. FPL has opposed the motion and the request for oral argument.

Base Rates Effective January 2022 through December 2025 – In December 2021, the FPSC issued a final order approving a stipulation and settlement between FPL and several intervenors in FPL's base rate proceeding (2021 rate agreement). In March 2024, the FPSC issued a supplemental final order which affirmed its prior approval of the 2021 rate agreement.

Key elements of the 2021 rate agreement, which became effective in January 2022, include, among other things, the following:

- New retail base rates and charges which resulted in the following increases in annualized retail base revenues:
 - \$692 million beginning January 1, 2022; and
 - \$560 million beginning January 1, 2023.
- Additional base rate increases in 2024 and 2025 associated with the addition of 894 MW of new solar generation through the Solar Base Rate Adjustment mechanism in each year.
- Authorized regulatory ROE of 10.60%, with a range of 9.70% to 11.70%, which was increased in 2022 to be 10.80%, with a range of 9.80% to 11.80%, based on a provision associated with an increase in the U.S. Treasury rate.
- Subject to certain conditions, the right to amortize up to \$1.45 billion (depreciation reserve), provided that in any 12-month period of the 2021 rate agreement, FPL was required to amortize at least enough of the depreciation reserve amount to maintain its minimum authorized annual regulatory ROE and also could not amortize any depreciation reserve amount that would result in an earned regulatory ROE in excess of its maximum authorized regulatory ROE.
- Expansion of SolarTogether® (a voluntary community solar program that gives FPL electric customers an opportunity to participate directly in the expansion of solar energy where participants pay a fixed monthly subscription charge and receive credits on their related monthly customer bill) by constructing an additional 1,788 MW of solar generation from 2022 through 2025, such that the total capacity of SolarTogether® is 3,278 MW.
- An interim storm cost recovery mechanism for storm restoration costs. See Note 1 – Storm Funds, Storm Reserves and Storm Cost Recovery below.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Electric Plant, Depreciation and Amortization – The cost of additions to units of property of FPL and NEER is added to electric plant in service and other property. In accordance with regulatory accounting, the cost of units of utility property retired from FPL's and NEER's rate-regulated electric transmission businesses, less estimated net salvage value, is charged to accumulated depreciation. Maintenance and repairs of property as well as replacements and renewals of items determined to be less than units of utility property are charged to other operations and maintenance (O&M) expenses. The American Recovery and Reinvestment Act of 2009, as amended, provided for an option to elect a cash grant (convertible investment tax credits (ITCs)) for certain renewable energy property (renewable property). Convertible ITCs are recorded as a reduction in property, plant and equipment on NEE's and FPL's consolidated balance sheets and are amortized as a reduction to depreciation and amortization expense over the estimated life of the related property. As of December 31, 2025 and 2024, convertible ITCs, net of amortization, were approximately \$581 million (\$95 million at FPL) and \$607 million (\$100 million at FPL).

Depreciation of FPL's electric property is provided on a straight-line basis, primarily over its average remaining useful life. FPL includes in depreciation expense a provision for electric generation plant dismantlement, interim asset removal costs, accretion related to asset retirement obligations (see Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs below) and storm recovery amortization. For substantially all of FPL's property, depreciation studies are performed periodically and filed with the FPSC which result in updated depreciation rates. As part of the 2025 rate agreement, the FPSC approved new unified depreciation rates which became effective January 1, 2026. Reserve amortization is recorded as either an increase or decrease to accrued asset removal costs which is reflected in noncurrent regulatory assets on NEE's and FPL's consolidated balance sheets. FPL files a twelve-month forecast with the FPSC each year which contains a regulatory ROE intended to be earned based on the best information FPL has at that time assuming normal weather. This forecast establishes a targeted regulatory ROE. In order to earn the targeted regulatory ROE in each reporting period subject to the conditions of the effective rate agreement, reserve amortization is calculated using a trailing thirteen-month average of retail rate base and capital structure in conjunction with the trailing twelve months regulatory retail base net operating income, which primarily includes the retail base portion of base and other revenues, net of O&M, depreciation and amortization, interest and tax expenses. In general, the net impact of these income statement line items is adjusted, in part, by reserve amortization or its reversal to earn the targeted regulatory ROE. See Rate Regulation – Base Rates Effective January 2026 through December 2029 and Rate Regulation – Base Rates Effective January 2022 through December 2025 above.

NEER's electric plant in service and other property less salvage value, if any, are depreciated primarily using the straight-line method over their estimated useful lives. NEER reviews the estimated useful lives of its fixed assets on an ongoing basis. NEER's natural gas and oil production assets are accounted for under the successful efforts method. Depletion expenses for the acquisition of reserve rights and development costs are recognized using the unit of production method. Depreciation of NEER's rate-regulated electric transmission assets are provided on a straight-line basis, primarily over their average remaining useful life. NEER includes in depreciation expense a provision for dismantlement, interim asset removal costs and accretion related to asset retirement obligations. For substantially all of NEER's rate-regulated electric transmission assets, depreciation studies are performed periodically and filed with FERC which result in updated depreciation rates.

Nuclear Fuel – FPL and NEER have several contracts for the supply of uranium and the conversion, enrichment and fabrication of nuclear fuel. See Note 15 – Contracts. FPL's and NEER's nuclear fuel costs are charged to fuel expense on a unit of production method.

Construction Activity – Allowance for funds used during construction (AFUDC) is a noncash item which represents the allowed cost of capital, including an ROE, used to finance construction projects. FPL records the portion of AFUDC attributable to borrowed funds as a reduction of interest expense and the remainder as other income. FPSC rules limit the recording of AFUDC to projects that have an estimated cost in excess of 0.4% of a utility's plant in service balance and require more than one year to complete. FPSC rules allow construction projects below the applicable threshold as a component of rate base.

FPL's construction work in progress includes construction materials, progress payments on major equipment contracts, engineering costs, AFUDC and other costs directly associated with the construction of various projects. Upon completion of the projects, these costs are transferred to electric utility plant in service and other property. Capitalized costs associated with construction activities are charged to O&M expenses when recoverability is no longer probable.

NEER capitalizes project development costs once it is probable that such costs will be realized through the ultimate construction of the related asset or sale of development rights. As of December 31, 2025 and 2024, NEER's capitalized development costs totaled approximately \$1.9 billion and \$1.6 billion, respectively, which are included in noncurrent other assets on NEE's consolidated balance sheets. These costs include land rights and other third-party costs directly associated with the development of a new project. Upon commencement of construction, these costs either are transferred to construction work in progress or remain in other assets, depending upon the nature of the cost. Capitalized development costs are charged to O&M expenses when it is probable that these costs will not be realized.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NEER's construction work in progress includes construction materials, progress payments on major equipment contracts, third-party engineering costs, capitalized interest and other costs directly associated with the construction and development of various projects. Interest expense allocated from NextEra Energy Capital Holdings, Inc. (NEECH) to NextEra Energy Resources is based on a deemed capital structure of 70% debt and differential membership interests sold by NextEra Energy Resources' subsidiaries. Upon commencement of project operation, costs associated with construction work in progress are transferred to electric plant in service and other property.

Asset Retirement Obligations – NEE and FPL each account for asset retirement obligations and conditional asset retirement obligations (collectively, AROs) under accounting guidance that requires a liability for the fair value of an ARO to be recognized in the period in which it is incurred if it can be reasonably estimated, with the offsetting associated asset retirement costs capitalized as part of the carrying amount of the long-lived assets. NEE's AROs relate primarily to decommissioning obligations of FPL's and NEER's nuclear units and to obligations for the dismantlement of certain of NEER's wind and solar facilities. See Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs below and Note 11.

For NEE's rate-regulated operations, including FPL, the asset retirement cost is allocated to a regulatory liability or regulatory asset using a systematic and rational method over the asset's estimated useful life. Changes in the ARO resulting from the passage of time are recognized as an increase in the carrying amount of the ARO and a decrease in the regulatory liability or regulatory asset. Changes resulting from revisions to the timing or amount of the original estimate of cash flows are recognized as an increase or a decrease in the ARO and asset retirement cost, or regulatory liability when asset retirement cost is depleted.

For NEE's non-rate regulated operations, the asset retirement cost is allocated to expense using a systematic and rational method over the asset's estimated useful life. Changes in the ARO resulting from the passage of time are recognized as an increase in the carrying amount of the liability and as accretion expense, which is included in depreciation and amortization expense in NEE's consolidated statements of income. Changes resulting from revisions to the timing or amount of the original estimate of cash flows are recognized as an increase or a decrease in the ARO and asset retirement cost, or income when asset retirement cost is depleted.

Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs – For ratemaking purposes, FPL accrues for the cost of end of life retirement and disposal of its nuclear and other generation plants over the expected service life of each unit based on nuclear decommissioning and other generation dismantlement studies periodically filed with the FPSC. In addition, FPL accrues for interim removal costs over the life of the related assets based on depreciation studies approved by the FPSC. As approved by the FPSC, FPL previously suspended its annual nuclear decommissioning accrual. Any differences between expense recognized for financial reporting purposes and the amount recovered through rates are reported as a regulatory asset or liability in accordance with regulatory accounting. See Rate Regulation, Electric Plant, Depreciation and Amortization, and Asset Retirement Obligations above and Note 11.

Nuclear decommissioning studies are performed at least every five years and are filed with the FPSC for approval. FPL filed updated nuclear decommissioning studies with the FPSC in December 2025. These studies reflect, among other things, the expiration dates of the operating licenses for FPL's nuclear units at the time of the studies. The 2025 studies provide for the dismantlement of Turkey Point Units 3 and 4 following the end of plant operation with decommissioning activities commencing in 2052 and 2053, respectively. The studies filed in 2025 also provide for St. Lucie Unit 1 to be shut down beginning in 2056 with decommissioning activities to be integrated with the dismantlement of St. Lucie Unit 2 in 2063. These studies also assume that FPL will be storing spent fuel on site pending removal to a United States (U.S.) government facility. FPL's portion of the ultimate costs of decommissioning its four nuclear units, including costs associated with spent fuel storage above what is expected to be refunded by the U.S. Department of Energy (DOE) under a spent fuel settlement agreement, is estimated to be approximately \$10.2 billion, or \$2.7 billion expressed in 2025 dollars. The ultimate costs of decommissioning reflect the applications submitted to the NRC for the extension of St. Lucie Units 1 and 2 licenses for an additional 20 years.

Restricted funds for the payment of future expenditures to decommission FPL's nuclear units are included in nuclear decommissioning reserve funds, which are included in special use funds on NEE's and FPL's consolidated balance sheets. Marketable securities held in the decommissioning funds are primarily carried at fair value. See Note 4. Fund earnings, consisting of dividends, interest and realized gains and losses, net of taxes, are reinvested in the funds. Fund earnings, as well as any changes in unrealized gains and losses and estimated credit losses on debt securities, are not recognized in income and are reflected as a corresponding offset in the related regulatory asset or liability accounts. FPL does not currently make contributions to the decommissioning funds, other than the reinvestment of fund earnings. During 2025, 2024 and 2023 fund earnings on decommissioning funds were approximately \$224 million, \$238 million and \$144 million, respectively. The tax effects of amounts not yet recognized for tax purposes are included in deferred income taxes.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Other generation plant dismantlement studies are performed periodically and are submitted to the FPSC for approval. Previously approved studies were effective from January 1, 2022 through December 2025 and resulted in an annual expense of \$48 million which is recorded in depreciation and amortization expense in NEE's and FPL's consolidated statements of income. As part of the 2025 rate agreement, the FPSC approved a new annual expense of \$106 million based on FPL's dismantlement studies which became effective January 1, 2026. As of December 31, 2025, FPL's portion of the ultimate cost to dismantle its other generation units is approximately \$2.1 billion, or \$1.2 billion expressed in 2025 dollars.

NEER's AROs primarily include nuclear decommissioning liabilities for Seabrook Station (Seabrook), Duane Arnold Energy Center (Duane Arnold) and Point Beach Nuclear Power Plant (Point Beach) and dismantlement liabilities for its wind and solar facilities. The liabilities are being accreted using the interest method through the date decommissioning or dismantlement activities are expected to be complete. See Note 11. As of December 31, 2025 and 2024, NEER's ARO was approximately \$1.5 billion and \$1.4 billion, respectively, and was determined using various internal and external data and applying a probability percentage to a variety of scenarios regarding the life of the plant and timing of decommissioning or dismantlement. NEER's portion of the ultimate cost of decommissioning its nuclear plants, including costs associated with spent fuel storage above what is expected to be refunded by the DOE under a spent fuel settlement agreement, is estimated to be approximately \$11.4 billion, or \$2.3 billion expressed in 2025 dollars. The ultimate cost to dismantle NEER's wind and solar facilities is estimated to be approximately \$4.5 billion.

Seabrook files a comprehensive nuclear decommissioning study with the New Hampshire Nuclear Decommissioning Financing Committee (NDFC) every four years; the most recent study was filed in 2023. Seabrook's decommissioning funding plan is also subject to annual review by the NDFC. Currently, there are no ongoing decommissioning funding requirements for Seabrook, Duane Arnold and Point Beach, however, the NRC, and in the case of Seabrook, the NDFC, has the authority to require additional funding in the future. NEER's portion of Seabrook's, Duane Arnold's and Point Beach's restricted funds for the payment of future expenditures to decommission these plants is included in nuclear decommissioning reserve funds, which are included in special use funds on NEE's consolidated balance sheets. Marketable securities held in the decommissioning funds are primarily carried at fair value. See Note 4. Market adjustments for debt securities result in a corresponding adjustment to other comprehensive income (OCI), except for estimated credit losses and unrealized losses on debt securities intended or required to be sold prior to recovery of the amortized cost basis, which are recognized in other – net in NEE's consolidated statements of income. Market adjustments for equity securities are recorded in change in unrealized gains (losses) on equity securities held in NEER's nuclear decommissioning funds – net in NEE's consolidated statements of income. Fund earnings, consisting of dividends, interest and realized gains and losses are recognized in income and are reinvested in the funds. The tax effects of amounts not yet recognized for tax purposes are included in deferred income taxes.

Major Maintenance Costs – FPL expenses costs associated with planned maintenance for its non-nuclear electric generation plants as incurred. FPL recognizes costs associated with planned major nuclear maintenance in accordance with regulatory treatment. FPL defers nuclear maintenance costs for each nuclear unit's planned outage to a regulatory asset as the costs are incurred. FPL amortizes the costs to O&M expense using the straight-line method over the period from the end of the current outage to the next planned outage where the respective work scope is performed.

NEER uses the deferral method to account for certain planned major maintenance costs. NEER's major maintenance costs for its nuclear generation units, combustion turbines and battery storage are capitalized (included in noncurrent other assets on NEE's consolidated balance sheets) and amortized to O&M expense using the straight-line method over the period from the end of the current outage to the next planned outage where the respective work scope is performed.

Cash Equivalents – Cash equivalents consist of short-term, highly liquid investments with original maturities of generally three months or less.

Restricted Cash – As of December 31, 2025 and 2024, NEE had approximately \$194 million (\$46 million for FPL) and \$159 million (\$101 million for FPL), respectively, of restricted cash, which, as of December 31, 2024, was offset by \$244 million of cash received on exchange-traded derivative positions resulting in a balance of \$(85) million. Restricted cash accounts are included in current other assets on NEE's and FPL's consolidated balance sheets and primarily relate to debt service payments and margin cash collateral requirements (funding) at NEER and bond proceeds held for construction at FPL. In addition, where offsetting positions exist, restricted cash related to margin cash collateral of \$50 million is netted against derivative assets and \$81 million is netted against derivative liabilities as of December 31, 2025 and \$279 million is netted against derivative assets as of December 31, 2024. See Note 3.

Allowance for Doubtful Accounts and Credit Losses – NEE, including FPL, follows the current expected credit loss model to account for credit losses for financial assets measured at amortized cost, which includes customer accounts receivable. FPL maintains an accumulated provision for uncollectible customer accounts receivable that is estimated using a percentage derived from historical revenue and write-off trends, adjusted for current events and forecasts. NEER regularly reviews collectibility of its receivables and establishes a provision for losses estimated as a percentage of accounts receivable based on the historical bad debt write-off trends, adjusted for current events and forecasts. When necessary, NEER uses the specific identification method for all other receivables. NEE's credit department monitors current and forward credit exposure to counterparties and their

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

affiliates using established standards and credit quality indicators such as credit ratings, certain financial ratios and delinquency trends. NEE requires credit enhancements or secured payment terms from customers who do not meet the minimum criteria.

Inventory – FPL values materials, supplies and fuel inventory using a weighted-average cost method. NEE's materials, supplies and fuel inventories, which include emissions allowances and renewable energy credits, are carried at the lower of weighted-average cost and net realizable value, unless evidence indicates that the weighted-average cost will be recovered with a normal profit upon sale in the ordinary course of business.

Energy Trading – NEE provides full energy and capacity requirements services primarily to distribution utilities, which include load-following services and various ancillary services, in certain markets and engages in power and fuel marketing and trading activities to optimize the value of electricity and fuel contracts, generation facilities and natural gas and oil production assets, as well as to take advantage of projected favorable commodity price movements. Trading contracts that meet the definition of a derivative are accounted for at fair value and realized gains and losses from all trading contracts, including those where physical delivery is required, are recorded net for all periods presented. See Note 3.

Storm Funds, Storm Reserves and Storm Cost Recovery – The storm funds provide coverage toward FPL's storm damage costs. Marketable securities held in the storm funds are carried at fair value. See Note 4. Fund earnings, consisting of dividends, interest and realized gains and losses, net of taxes, are reinvested in the funds. Fund earnings, as well as any changes in unrealized gains and losses, are not recognized in income and are reflected as a corresponding adjustment to the storm reserve. The tax effects of amounts not yet recognized for tax purposes are included in deferred income taxes. The storm funds are included in special use funds and the storm reserves in noncurrent regulatory liabilities or, in the case of a deficit, in regulatory assets on NEE's and FPL's consolidated balance sheets.

During 2024, the FPSC approved FPL's request to recover eligible storm costs and replenishment of the storm reserve totaling approximately \$1.2 billion, related to Hurricanes Debby, Helene and Milton which impacted FPL's service area in 2024. The amount was collected through an interim surcharge for a 12-month period that concluded in December 2025 and is subject to refund based on an FPSC prudence review. Recoverable storm costs are reflected as current regulatory assets on NEE's and FPL's consolidated balance sheet as of December 31, 2024. The unpaid portion of the storm restoration costs as of December 31, 2024, of approximately \$557 million, including estimated capital costs, is included in current other liabilities on NEE's and FPL's 2024 consolidated balance sheet.

During 2023, the FPSC approved FPL's request to recover eligible storm costs and replenishment of the storm reserve totaling approximately \$1.3 billion primarily related to Hurricanes Ian and Nicole which impacted FPL's service area in 2022. The amount was collected through an interim surcharge for a 12-month period that concluded in March 2024.

Impairment of Long-Lived Assets – NEE evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. The impairment loss to be recognized is the amount by which the carrying value of the long-lived asset exceeds the asset's fair value. In most instances, the fair value is determined by discounting estimated future cash flows using an appropriate interest rate.

Impairment of Equity Method Investments – NEE evaluates its equity method investments for impairment when events or changes in circumstances indicate that the fair value of the investment is less than the carrying value and the investment may be other than temporarily impaired (OTTI). An impairment loss is required to be recognized if the impairment is deemed to be other than temporary. Investments that are OTTI are written down to their estimated fair value and cannot subsequently be written back up for increases in estimated fair value. Impairment losses are recorded in equity in losses of equity method investees in NEE's consolidated statements of income. See Note 4 – Nonrecurring Fair Value Measurements.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Goodwill and Other Intangible Assets – NEE's goodwill and other intangible assets are as follows:

	Weighted- Average Useful Lives (years)	December 31, 2025	2024
		(millions)	
Goodwill (by reporting unit):			
FPL segment, primarily rate-regulated utilities		\$ 2,965	\$ 2,965
NEER segment:			
Rate-regulated assets, primarily transmission		1,154	1,167
Clean energy assets		420	424
Customer supply		299	299
Corporate and Other		11	11
Total goodwill		<u>\$ 4,849</u>	<u>\$ 4,866</u>
Other intangible assets not subject to amortization, primarily land easements		<u>\$ 137</u>	<u>\$ 137</u>
Other intangible assets subject to amortization:			
Purchased power agreements	18	\$ 635	\$ 633
Biogas rights agreements	28	952	933
Other, primarily transportation contracts and customer lists	17	299	214
Total		1,886	1,780
Accumulated amortization		(256)	(202)
Total other intangible assets subject to amortization – net		<u>\$ 1,630</u>	<u>\$ 1,578</u>

NEE's, including FPL's, goodwill relates to various acquisitions which were accounted for using the acquisition method of accounting. Other intangible assets are included in noncurrent other assets on NEE's consolidated balance sheets. NEE's other intangible assets subject to amortization are amortized, primarily on a straight-line basis, over their estimated useful lives. Amortization of the other intangible assets was approximately \$65 million, \$62 million and \$58 million for the years ended December 31, 2025, 2024 and 2023, respectively, and is expected to be approximately \$60 million, \$56 million, \$54 million, \$52 million and \$51 million for 2026, 2027, 2028, 2029 and 2030, respectively.

Goodwill and other intangible assets not subject to amortization are assessed for impairment at least annually by applying a fair value-based analysis. Other intangible assets subject to amortization are periodically reviewed when impairment indicators are present to assess recoverability from future operations using undiscounted future cash flows.

Pension Plan – NEE records the service cost component of net periodic benefit income to O&M expense and the non-service cost component to other net periodic benefit income in NEE's consolidated statements of income. NEE allocates net periodic pension income to its subsidiaries based on the pensionable earnings of the subsidiaries' employees. Accounting guidance requires recognition of the funded status of the pension plan in the balance sheet, with changes in the funded status recognized in other comprehensive income within shareholders' equity in the year in which the changes occur. Since NEE is the plan sponsor, and its subsidiaries do not have separate rights to the plan assets or direct obligations to their employees, this accounting guidance is reflected at NEE and not allocated to the subsidiaries. The portion of previously unrecognized actuarial gains and losses and prior service costs or credits that are estimated to be allocable to FPL as net periodic (income) cost in future periods and that otherwise would be recorded in accumulated other comprehensive income (loss) (AOCI) are classified as regulatory assets and liabilities at NEE in accordance with regulatory treatment. See Note 12 – Employee Pension Plan and Other Benefits Plans.

Stock-Based Compensation – NEE accounts for stock-based payment transactions based on grant-date fair value. Compensation costs for awards with graded vesting are recognized on a straight-line basis over the requisite service period for the entire award. Forfeitures of stock-based awards are recognized as they occur. See Note 14 – Stock-Based Compensation.

Retirement of Long-Term Debt – For NEE's rate-regulated subsidiaries, including FPL, gains and losses that result from differences in reacquisition cost and the net book value of long-term debt which is retired are deferred as a regulatory asset or liability and amortized to interest expense ratably over the remaining life of the original issue, which is consistent with their treatment in the ratemaking process. NEE's non-rate regulated subsidiaries recognize such differences in interest expense at the time of retirement.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Structured Payables – Under NEE's structured payables program, subsidiaries of NEE issue negotiable drafts, backed by NEECH guarantees, to settle invoices with suppliers with payment terms (on average approximately 90 days) that extend the original invoice due date (typically 30 days) and include a service fee. At their discretion, the suppliers may assign the negotiable drafts and the rights under the NEECH guarantees to financial institutions. NEE and its subsidiaries are not party to any contractual agreements between their suppliers and the applicable financial institutions.

As of December 31, 2025 and 2024, NEE's outstanding obligations under its structured payables program were approximately \$4.2 billion and \$4.0 billion, respectively, and are included in accounts payable on NEE's consolidated balance sheets.

A rollforward of NEE's structured payables is as follows:

	December 31,	
	2025	2024
	(millions)	
Obligations outstanding at the beginning of the year	\$ 3,988	\$ 4,701
Invoices added to the program	8,036	6,363
Invoices paid	(7,850)	(7,076)
Obligations outstanding at the end of the year	<u>\$ 4,174</u>	<u>\$ 3,988</u>

Income Taxes – Deferred income taxes are recognized on all significant temporary differences between the financial statement and tax bases of assets and liabilities, and are presented as noncurrent on NEE's and FPL's consolidated balance sheets. In connection with the tax sharing agreement between NEE and certain of its subsidiaries, the income tax provision at each applicable subsidiary reflects the use of the "separate return method," except that tax benefits that could not be used on a separate return basis, but are used on the consolidated tax return, are recorded by the applicable subsidiary that generated the tax benefits. Any remaining consolidated income tax benefits or expenses are recorded at the corporate level. Included in other regulatory assets and other regulatory liabilities on NEE's and FPL's consolidated balance sheets is the revenue equivalent of the difference in deferred income taxes computed under accounting rules, as compared to regulatory accounting rules. The net regulatory liability totaled \$2,702 million (\$2,665 million for FPL) and \$2,916 million (\$2,880 million for FPL) as of December 31, 2025 and 2024, respectively, and is being amortized in accordance with the regulatory treatment over the estimated lives of the assets or liabilities for which the deferred tax amount was initially recognized.

Production tax credits (PTCs) are recognized as wind and solar energy is generated and sold based on a per kWh rate prescribed in applicable federal and state statutes and are recorded as a reduction of current income taxes payable, unless limited by tax law in which instance they are recorded as deferred tax assets. NEER and FPL recognize ITCs as a reduction to income tax expense when the related energy property is placed into service. Prior to 2025, FPL recognized ITCs as a reduction to income tax expense over the depreciable life of the related energy property. As of December 31, 2025 and 2024, FPL's accumulated deferred ITCs were approximately \$1,079 million and \$966 million, respectively, and are included in noncurrent regulatory liabilities on NEE's and FPL's consolidated balance sheets. Clean energy tax credits generated during the taxable year can be transferred to an unrelated purchaser for cash and are accounted for under *Accounting Standards Codification 740 – Income Taxes*. Proceeds resulting from the sales of clean energy tax credits for the years ended December 31, 2025 and 2024 of approximately \$1,527 million (\$180 million for FPL) and \$1,304 million (\$0 million for FPL), respectively, are reported in the cash paid (received) for income taxes – net within the supplemental disclosures of cash flow information on NEE's consolidated statements of cash flows. In connection with entering into the agreements to sell clean energy tax credits, NEECH provides certain indemnifications to the purchasers regarding the existence and qualifications of such credits. NEE has not recorded any material liability related to these indemnifications after considering the nature of the indemnifications and NEE's experience in generating and utilizing clean energy tax credits. NEE's exposure to refund credits sold generally terminates based on the individual purchaser's tax return statute of limitations which cannot be estimated.

On July 4, 2025, the One Big Beautiful Bill Act (OBBBA) was signed into law which, among other things, modified tax legislation affecting clean energy tax credits, bonus depreciation rules and tax treatment of research and development expenses and interest deductions. Specifically, the OBBBA provides for 100% bonus depreciation with no phase out for unregulated property acquired after January 19, 2025, 100% expensing with no phase out of domestic research and development expenses incurred in taxable years beginning after 2024, and the use of earnings before interest, taxes, depreciation and amortization (EBITDA), rather than earnings before interest and taxes (EBIT), with no phase out for purposes of calculating the interest limitation for taxable years beginning after 2024. The OBBBA did not change the federal corporate income tax rate and did not require remeasurement of deferred tax assets or liabilities.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

A valuation allowance is recorded to reduce the carrying amounts of deferred tax assets when it is more likely than not that such assets will not be realized. NEE recognizes interest income (expense) related to unrecognized tax benefits (liabilities) in interest income and interest expense, respectively, net of the amount deferred at FPL. At FPL, the offset to accrued interest receivable (payable) on income taxes is classified as a regulatory liability (regulatory asset) which will be amortized to income (expense) over a five-year period upon settlement in accordance with regulatory treatment. All tax positions taken by NEE in its income tax returns that are recognized in the financial statements must satisfy a more-likely-than-not threshold. NEE and its subsidiaries file income tax returns in the U.S. federal jurisdiction and various states, the most significant of which is Florida, and certain foreign jurisdictions. Federal tax liabilities, with the exception of certain refund claims, are effectively settled for all years prior to 2022. State and foreign tax liabilities, which have varied statutes of limitations regarding additional assessments, are generally effectively settled for years prior to 2021. As of December 31, 2025, NEE had unrecognized tax benefits of approximately \$143 million that, if recognized, could impact the annual effective income tax rate. See Note 5.

Noncontrolling Interests – Noncontrolling interests represent the portions of net assets in consolidated entities that are not owned by NEE and are reported as a component of equity on NEE's consolidated balance sheets. As of December 31, 2025, noncontrolling interests on NEE's consolidated balance sheets primarily reflects the interests related to differential membership interests discussed below, as well as other noncontrolling interests in certain wind and solar generation and transmission assets sold to non-affiliated parties and XPLR Infrastructure Partners, LP (XPLR) (formerly NextEra Energy Partners, LP).

Certain subsidiaries of NextEra Energy Resources have sold Class B noncontrolling membership interests in entities that have ownership interests in wind generation, solar generation and battery storage facilities, with generating/storage capacity in operation or under construction totaling approximately 12,350 MW, 5,409 MW and 2,624 MW, respectively, as of December 31, 2025, to third-party investors (differential membership interests). The third-party investors are allocated earnings, tax attributes and cash flows in accordance with the respective limited liability company agreements. Those economics are allocated primarily to the third-party investors until they receive a targeted return (the flip date) and thereafter to NEE. NEE has the right to call the third-party interests at specified amounts if and when the flip date occurs. NEE has determined the allocation of economics between the controlling party and third-party investor should not follow the respective ownership percentages for each wind generation, solar generation and battery storage project but rather the hypothetical liquidation of book value (HLBV) method based on the governing provisions in each respective limited liability company agreement. Under the HLBV method, the amounts of income and loss attributable to the noncontrolling interest reflects changes in the amount the owners would hypothetically receive at each balance sheet date under the respective liquidation provisions, assuming the net assets of these entities were liquidated at the recorded amounts, after taking into account any capital transactions, such as contributions and distributions, between the entities and the owners. At the point in time that the third-party investor, in hypothetical liquidation, would achieve its targeted return, NEE attributes the additional hypothetical proceeds to the differential membership interests based on the call price. A loss attributable to noncontrolling interests on NEE's consolidated statements of income represents earnings attributable to NEE.

As of December 31, 2025 and 2024, approximately \$10,654 million and \$9,062 million, respectively, of noncontrolling interests on NEE's consolidated balance sheets relates to differential membership interests. For the years ended December 31, 2025, 2024 and 2023, NEE recorded earnings of approximately \$1,578 million, \$1,329 million and \$1,135 million, respectively, associated with differential membership interests, which is reflected as net loss attributable to noncontrolling interests on NEE's consolidated statements of income.

Redeemable Noncontrolling Interests – Certain subsidiaries of NextEra Energy Resources sold Class B noncontrolling membership interests in entities that have ownership interests in wind generation, solar generation and battery storage facilities to third-party investors. As specified in the respective limited liability company agreements, if, subject to certain contingencies, certain events occur, including, among others, those that would delay completion or cancel any of the underlying projects, an investor has the option to require NEER to return all or part of its investment. As these potential redemptions were outside of NEER's control, these balances were classified as redeemable noncontrolling interests on NEE's consolidated balance sheet as of December 31, 2024. During 2025, the contingencies associated with the December 31, 2024 balance were resolved and reclassified to noncontrolling interests.

Variable Interest Entities (VIEs) – An entity is considered to be a VIE when its total equity investment at risk is not sufficient to permit the entity to finance its activities without additional subordinated financial support, or its equity investors, as a group, lack the characteristics of having a controlling financial interest. A reporting company is required to consolidate a VIE as its primary beneficiary when it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, and the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE. NEE and FPL evaluate whether an entity is a VIE whenever reconsideration events as defined by the accounting guidance occur. See Note 9.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Leases – NEE and FPL determine if an arrangement is a lease at inception. NEE and FPL recognize a right-of-use (ROU) asset and a lease liability for operating and finance leases by recognizing and measuring leases at the commencement date based on the present value of lease payments over the lease term. For sales-type leases, the book value of the leased asset is removed from the balance sheet and a net investment in sales-type lease is recognized based on fixed payments under the contract and the residual value of the asset being leased. NEE and FPL have elected not to apply the recognition requirements to short-term leases and not to separate nonlease components from associated lease components for all classes of underlying assets except for purchased power agreements. ROU assets are included in noncurrent other assets, lease liabilities are included in current and noncurrent other liabilities and net investments in sales-type leases are included in current and noncurrent other assets on NEE's and FPL's consolidated balance sheets. Operating lease expense is included in O&M expense, interest and amortization expenses associated with finance leases are included in interest expense and depreciation and amortization expense, respectively, and rental income associated with operating leases and interest income associated with sales-type leases are included in operating revenues in NEE's and FPL's consolidated statements of income. See Note 10.

Disposal of Businesses – In 2023, FPL sold its ownership interests in its Florida City Gas business for cash proceeds of approximately \$924 million. In connection with the sale, a gain of approximately \$406 million (\$306 million after tax at NEE and \$300 million after tax at FPL) was recorded in NEE's and FPL's consolidated statements of income for the year ended December 31, 2023 and is included in gains on disposal of businesses/assets – net.

In July 2025, a subsidiary of NEET entered into an agreement to sell a 50% equity interest in a joint venture, consisting of a rate-regulated electric transmission asset located in California. NEER expects to close the sale in the first quarter of 2026, subject to the satisfaction of customary closing conditions, for cash proceeds of approximately \$270 million, subject to closing adjustments. Upon closing, the transmission assets and liabilities will be removed from NEE's balance sheet and NEE's remaining 50% interest will be reflected as an equity method investment.

In 2024, subsidiaries of NextEra Energy Resources sold 100% ownership interests in certain natural gas and oil shale formations and, as part of a joint venture (pipeline joint venture), sold an ownership interest, representing an approximately 15% economic interest, in three natural gas pipeline facilities located in the southern U.S. for total cash proceeds of approximately \$101 million. A NextEra Energy Resources subsidiary has operated and continues to operate two of the pipeline facilities included in the sale. In connection with the sale, a gain of approximately \$120 million (\$77 million after tax) was recorded in NEE's consolidated statements of income for the year ended December 31, 2024 and is included in gains on disposal of businesses/assets – net. NEE's remaining equity method investment interest, an approximately 85% economic interest, in the pipeline joint venture is a noncontrolling interest based on the governance structure of the joint venture.

In 2024, subsidiaries of NextEra Energy Resources sold an ownership interest, representing an approximately 65% economic interest, as part of a joint venture (renewable assets joint venture), consisting of a portfolio of five wind generation facilities and three solar generation facilities located in geographically diverse locations throughout the U.S. with a total generating capacity of 1,634 MW, for cash proceeds of approximately \$900 million. A NextEra Energy Resources subsidiary continues to operate the facilities included in the sale. In connection with the sale, a gain of approximately \$103 million (\$76 million after tax) was recorded in NEE's consolidated statements of income for the year ended December 31, 2024 and is included in gains on disposal of businesses/assets – net. NEE's remaining equity method investment interest, an approximately 35% economic interest, in the renewable assets joint venture is a noncontrolling interest based on the governance structure of the joint venture. Upon the projects in the renewable assets joint venture obtaining financing in the fourth quarter of 2024, NEE received a distribution of approximately \$386 million.

In 2023, subsidiaries of NextEra Energy Resources sold to an XPLR subsidiary their 100% ownership interests in five wind generation facilities and three solar generation facilities located in geographically diverse locations throughout the U.S. with a total generating capacity of 688 MW for cash proceeds of approximately \$566 million, plus working capital of \$32 million. A NextEra Energy Resources subsidiary continues to operate the facilities included in the sale.

2. Revenue from Contracts with Customers

Revenue is recognized when control of the promised goods or services is transferred to customers at an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The promised goods or services in the majority of NEE's contracts with customers is, at FPL, for the delivery of electricity based on tariff rates approved by the FPSC and, at NEER, for the delivery of energy commodities and the availability of electric capacity and electric transmission.

FPL and NEER generate substantially all of NEE's operating revenues, which primarily include revenues from contracts with customers, as well as derivative (see Note 3) and lease transactions at NEER. For the vast majority of contracts with customers, NEE believes that the obligation to deliver energy, capacity or transmission is satisfied over time as the customer simultaneously receives and consumes benefits as NEE performs. In 2025, 2024 and 2023, NEE's revenue from contracts with customers was approximately \$25.8 billion (\$18.2 billion at FPL), \$23.5 billion (\$16.9 billion at FPL) and \$24.8 billion (\$18.2 billion at FPL), respectively. NEE's and FPL's receivables are primarily associated with revenues earned from contracts with customers, as well

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

as derivative and lease transactions at NEER, and consist of both billed and unbilled amounts, which are recorded in customer receivables and other receivables on NEE's and FPL's consolidated balance sheets. Receivables represent unconditional rights to consideration and reflect the differences in timing of revenue recognition and cash collections. For substantially all of NEE's and FPL's receivables, regardless of the type of revenue transaction from which the receivable originated, customer and counterparty credit risk is managed in the same manner and the terms and conditions of payment are similar.

FPL – FPL's revenues are derived primarily from tariff-based sales that result from providing electricity to retail customers in Florida with no defined contractual term. Electricity sales to retail customers account for approximately 90% of FPL's 2025 operating revenues, the majority of which are to residential customers. FPL's retail customers receive a bill monthly based on the amount of monthly kWh usage with payment due monthly. For these types of sales, FPL recognizes revenue as electricity is delivered and billed to customers, as well as an estimate for electricity delivered and not yet billed. The billed and unbilled amounts represent the value of electricity delivered to the customer. As of December 31, 2025 and 2024, FPL's unbilled revenues amounted to approximately \$705 million and \$573 million, respectively, and are included in customer receivables on NEE's and FPL's consolidated balance sheets. Certain contracts with customers contain a fixed price with maturity dates through 2054. As of December 31, 2025, FPL expects to record approximately \$590 million of revenues related to the fixed price components of such contracts over the remaining terms of the related contracts. Certain of these contracts also contain a variable price component for energy usage which FPL recognizes as revenue as the energy is delivered based on rates stipulated in the respective contracts.

NEER – NEER's revenue from contracts with customers is derived primarily from the sale of energy commodities, electric capacity and electric transmission. For these types of sales, NEER recognizes revenue as energy commodities are delivered and as electric capacity and electric transmission are made available, consistent with the amounts billed to customers based on rates stipulated in the respective contracts as well as an accrual for amounts earned but not yet billed. The amounts billed and accrued represent the value of energy or transmission delivered and/or the capacity of energy or transmission available to the customer. Revenues yet to be earned under these contracts, which have maturity dates ranging from 2026 to 2055, will vary based on the volume of energy or transmission delivered and/or available. NEER's customers typically receive bills monthly with payment due within 30 days. Certain contracts with customers contain a fixed price which primarily relate to electric capacity sales through 2038 and certain power purchase agreements with maturity dates through 2034. As of December 31, 2025, NEER expects to record approximately \$580 million of revenues related to the fixed price components of such contracts over the remaining terms of the related contracts as the capacity is provided. The power purchase agreements also contain a variable price component for energy usage which NEER recognizes as revenue as the energy is delivered based on rates stipulated in the respective contracts.

3. Derivative Instruments

NEE and FPL use derivative instruments (primarily swaps, options, futures and forwards) to manage the physical and financial risks inherent in the purchase and sale of fuel and electricity, as well as interest rate and foreign currency exchange rate risk associated primarily with outstanding and expected future debt issuances and borrowings, and to optimize the value of NEER's power generation and natural gas and oil production assets. NEE and FPL do not utilize hedge accounting for their cash flow and fair value hedges.

With respect to commodities related to NEE's competitive energy business, NEER employs risk management procedures to conduct its activities related to optimizing the value of its power generation and natural gas and oil production assets, providing full energy and capacity requirements services primarily to distribution utilities, and engaging in power and fuel marketing and trading activities to take advantage of expected future favorable price movements and changes in the expected volatility of prices in the energy markets. These risk management activities involve the use of derivative instruments executed within prescribed limits to manage the risk associated with fluctuating commodity prices. Transactions in derivative instruments are executed on recognized exchanges or via the over-the-counter markets, depending on the most favorable credit terms and market execution factors. For NEER's power generation and natural gas and oil production assets, derivative instruments are used to hedge all or a portion of the expected output of these assets. These hedges are designed to reduce the effect of adverse changes in the wholesale forward commodity markets associated with NEER's power generation and natural gas and oil production assets. With regard to full energy and capacity requirements services, NEER is required to vary the quantity of energy and related services based on the load demands of the customers served. For this type of transaction, derivative instruments are used to hedge the anticipated electricity quantities required to serve these customers and reduce the effect of unfavorable changes in the forward energy markets. Additionally, NEER takes positions in energy markets based on differences between actual forward market levels and management's view of fundamental market conditions, including supply/demand imbalances, changes in traditional flows of energy, changes in short- and long-term weather patterns and anticipated regulatory and legislative outcomes. NEER uses derivative instruments to realize value from these market dislocations, subject to strict risk management limits around market, operational and credit exposure.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Derivative instruments, when required to be marked to market, are recorded on NEE's and FPL's consolidated balance sheets as either an asset or liability measured at fair value. At FPL, substantially all changes in the derivatives' fair value are deferred as a regulatory asset or liability until the contracts are settled, and, upon settlement, any gains or losses are passed through the fuel and purchased power cost recovery clause (fuel clause). For NEE's non-rate regulated operations, predominantly NEER, essentially all changes in the derivatives' fair value for power purchases and sales, fuel sales and trading activities are recognized on a net basis in operating revenues and the equity method investees' related activity is recognized in equity in losses of equity method investees in NEE's consolidated statements of income. Settlement gains and losses are included within the line items in the consolidated statements of income to which they relate. Transactions for which physical delivery is deemed not to have occurred are presented on a net basis in the consolidated statements of income. For commodity derivatives, NEE believes that, where offsetting positions exist at the same location for the same time, the transactions are considered to have been netted and therefore physical delivery has been deemed not to have occurred for financial reporting purposes. Settlements related to derivative instruments are substantially all recognized in net cash provided by operating activities in NEE's and FPL's consolidated statements of cash flows.

For interest rate and foreign currency derivative instruments, all changes in the derivatives' fair value, as well as the transaction gain or loss on foreign denominated debt, are recognized in interest expense and the equity method investees' related activity is recognized in equity in losses of equity method investees in NEE's consolidated statements of income. As of December 31, 2025, NEE's AOCI included immaterial amounts related to discontinued interest rate cash flow hedges with expiration dates through October 2033 and foreign currency cash flow hedges with expiration dates through September 2030.

Fair Value Measurements of Derivative Instruments – The fair value of assets and liabilities are determined using either unadjusted quoted prices in active markets (Level 1) or other pricing inputs that are observable (Level 2) whenever that information is available and using unobservable inputs (Level 3) to estimate fair value only when relevant observable inputs are not available. NEE and FPL use different valuation techniques to measure the fair value of assets and liabilities, relying primarily on the market approach of using prices and other market information for identical and/or similar assets and liabilities for those assets and liabilities that are measured at fair value on a recurring basis. NEE's and FPL's assessment of the significance of any particular input to the fair value measurement requires judgment and may affect placement within the fair value hierarchy levels. Non-performance risk, including the consideration of a credit valuation adjustment, is also considered in the determination of fair value for all assets and liabilities measured at fair value.

NEE and FPL measure the fair value of commodity contracts using a combination of market and income approaches utilizing prices observed on commodities exchanges and in the non-exchange traded markets, or through the use of industry-standard valuation techniques, such as option modeling or discounted cash flows techniques, incorporating both observable and unobservable valuation inputs. The resulting measurements are the best estimate of fair value as represented by the transfer of the asset or liability through an orderly transaction in the marketplace at the measurement date.

Exchange-traded derivative assets and liabilities are valued using observable settlement prices from the exchanges and are classified as Level 1 or Level 2, depending on whether positions are in active or inactive markets.

NEE, through its subsidiaries, including FPL, also enters into non-exchange traded commodity derivatives. The majority of the valuation inputs are observable using exchange-quoted prices.

NEE, through NEER, also enters into full requirements contracts, which, in most cases, meet the definition of derivatives and are measured at fair value. These contracts typically have one or more inputs that are not observable and are significant to the valuation of the contract. In addition, certain non-exchange traded derivative options at NEE have one or more significant inputs that are not observable, and are valued using industry-standard option models.

In all cases where NEE and FPL use significant unobservable inputs for the valuation of a commodity contract, consideration is given to the assumptions that market participants would use in valuing the asset or liability. The primary input to the valuation models for commodity contracts is the forward commodity curve for the respective instruments. Other inputs include, but are not limited to, assumptions about market liquidity, volatility, correlation and contract duration as more fully described below in Significant Unobservable Inputs Used in Recurring Fair Value Measurements. In instances where the reference markets are deemed to be inactive or do not have transactions for a similar contract, the derivative assets and liabilities may be valued using significant other observable inputs and potentially significant unobservable inputs. In such instances, the valuation for these contracts is established using techniques including extrapolation from or interpolation between actively traded contracts, or estimated basis adjustments from liquid trading points. NEE and FPL regularly evaluate and validate the inputs used to determine fair value by a number of methods, consisting of various market price verification procedures, including the use of pricing services and broker quotes to support the market price of the various commodities. Where there are assumptions and models used to generate inputs for valuing derivative assets and liabilities, the review and verification of the assumptions and models are undertaken by individuals in an independent control function.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NEE uses interest rate contracts and foreign currency contracts to mitigate and adjust interest rate and foreign currency exchange exposure related primarily to certain outstanding and expected future debt issuances and borrowings when deemed appropriate based on market conditions or when required by financing agreements. NEE estimates the fair value of these derivatives using an income approach based on a discounted cash flows valuation technique utilizing the net amount of estimated future cash inflows and outflows related to the agreements.

The tables below present NEE's and FPL's gross derivative positions as of December 31, 2025 and 2024, as required by disclosure rules. However, the majority of the underlying contracts are subject to master netting agreements and generally would not be contractually settled on a gross basis. Therefore, the tables below also present the derivative positions on a net basis, which reflect the offsetting of positions of certain transactions within the portfolio, the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral, as well as the location of the net derivative position on the consolidated balance sheets.

December 31, 2025

(a) Includes the effect of the contractual ability to settle contracts under master netting arrangements and the netting of margin cash collateral payments and receipts. NEE and FPL also have contract settlement receivable and payable balances that are subject to the master netting arrangements but are not offset within the consolidated balance sheets and are recorded in customer receivables – net and accounts payable, respectively.

(b) Reflects the netting of approximately \$154 million in margin cash collateral received from counterparties.

(c) Reflects the netting of approximately \$321 million in margin cash collateral received from counterparties.

As of December 31, 2025 and 2024, NEE had approximately \$94 million (\$5 million at FPL) and \$47 million (\$2 million at FPL), respectively, in margin cash collateral received from counterparties that was not offset against derivative assets in the above presentation. These amounts are included in current other liabilities on NEE's consolidated balance sheets. Additionally, as of December 31, 2025 and 2024, NEE had approximately \$70 million (none at FPL) and \$58 million (none at FPL), respectively, in margin cash collateral paid to counterparties that was not offset against derivative assets or liabilities in the above presentation. These amounts are included in current other assets on NEE's consolidated balance sheets.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Significant Unobservable Inputs Used in Recurring Fair Value Measurements – The valuation of certain commodity contracts requires the use of significant unobservable inputs. All forward price, implied volatility, implied correlation and interest rate inputs used in the valuation of such contracts are directly based on third-party market data, such as broker quotes and exchange settlements, when that data is available. If third-party market data is not available, then industry standard methodologies are used to develop inputs that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs, including some forward prices, implied volatilities and interest rates used for determining fair value are updated daily to reflect the best available market information. Unobservable inputs which are related to observable inputs, such as illiquid portions of forward price or volatility curves, are updated daily as well, using industry standard techniques such as interpolation and extrapolation, combining observable forward inputs supplemented by historical market and other relevant data. Other unobservable inputs, such as implied correlations, block-to-hourly price shaping, customer migration rates from full requirements contracts and some implied volatility curves, are modeled using proprietary models based on historical data and industry standard techniques.

The significant unobservable inputs used in the valuation of NEE's commodity contracts categorized as Level 3 of the fair value hierarchy as of December 31, 2025 are as follows:

Transaction Type	Fair Value at December 31, 2025		Valuation Technique(s)	Significant Unobservable Inputs	Range	Weighted- average ^(a)
	Assets	Liabilities				
	(millions)					
Forward contracts – power	\$ 486	\$ 378	Discounted cash flow	Forward price (per MWh ^(b))	\$— — \$333	\$53
Forward contracts – gas	455	129	Discounted cash flow	Forward price (per MMBtu ^(c))	\$— — \$15	\$4
Forward contracts – congestion	47	23	Discounted cash flow	Forward price (per MWh ^(b))	\$(63) — \$58	\$—
Options – power	23	1	Option models	Implied correlations	69% — 75%	71%
				Implied volatilities	37% — 312%	91%
Options – primarily gas	71	82	Option models	Implied correlations	69% — 100%	94%
				Implied volatilities	16% — 145%	46%
Full requirements and unit contingent contracts	193	296	Discounted cash flow	Forward price (per MWh ^(b))	\$19 — \$430	\$90
				Customer migration rate ^(d)	—% — 28%	1%
Forward contracts – other	575	259				
Total	\$ 1,850	\$ 1,168				

(a) Unobservable inputs were weighted by volume.

(b) Megawatt-hours

(c) One million British thermal units

(d) Applies only to full requirements contracts.

The sensitivity of NEE's fair value measurements to increases (decreases) in the significant unobservable inputs is as follows:

Significant Unobservable Input	Position	Impact on Fair Value Measurement
Forward price	Purchase power/gas	Increase (decrease)
	Sell power/gas	Decrease (increase)
Implied correlations	Purchase option	Decrease (increase)
	Sell option	Increase (decrease)
Implied volatilities	Purchase option	Increase (decrease)
	Sell option	Decrease (increase)
Customer migration rate	Sell power ^(a)	Decrease (increase)

(a) Assumes the contract is in a gain position.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The reconciliation of changes in the fair value of commodity contract derivatives that are based on significant unobservable inputs is as follows:

	Years Ended December 31,					
	2025		2024		2023	
	NEE	FPL	NEE	FPL	NEE	FPL
	(millions)					
Fair value of net derivatives based on significant unobservable inputs as of December 31 of prior year	\$ 387	\$ 34	\$ 951	\$ 24	\$ (854)	\$ 9
Realized and unrealized gains (losses):						
Included in operating revenues	587	—	339	—	2,792	—
Included in regulatory assets and liabilities	(24)	(24)	49	49	23	23

Transfers in ^(a)	(17)	—	20	(12)	(129)	1
Transfers out ^(a)	(1)	—	(7)	—	367	2
Fair value of net derivatives based on significant unobservable inputs as of December 31	<u>\$ 682</u>	<u>\$ 32</u>	<u>\$ 387</u>	<u>\$ 34</u>	<u>\$ 951</u>	<u>\$ 24</u>
Gains (losses) included in operating revenues attributable to the change in unrealized gains (losses) relating to derivatives held at the reporting date	<u>\$ 395</u>	<u>\$ —</u>	<u>\$ (25)</u>	<u>\$ —</u>	<u>\$ 1,482</u>	<u>\$ —</u>

(a) Transfers into Level 3 were a result of decreased observability of market data. Transfers from Level 3 to Level 2 were a result of increased observability of market data.

Income Statement Impact of Derivative Instruments – Gains (losses) related to NEE's derivatives are recorded in NEE's consolidated statements of income as follows:

	Years Ended December 31,		
	2025	2024	2023
	(millions)		
Commodity contracts ^(a) – operating revenues (including \$299 unrealized gains, \$8 unrealized gains and \$2,502 unrealized gains, respectively)	\$ 470	\$ 97	\$ 2,513
Foreign currency contracts – interest expense (including \$20 unrealized gains, \$58 unrealized losses and \$81 unrealized gains, respectively)	(25)	(71)	(62)
Interest rate contracts – interest expense (including \$518 unrealized losses, \$542 unrealized gains and \$634 unrealized losses, respectively)	(392)	1,349	(226)
Gains (losses) reclassified from AOCI to interest expense:			
Interest rate contracts	1	2	(1)
Foreign currency contracts	(3)	(3)	(2)
Total	<u>\$ 51</u>	<u>\$ 1,374</u>	<u>\$ 2,222</u>

(a) For the years ended December 31, 2025, 2024 and 2023, FPL recorded gains (losses) of approximately \$(49) million, \$50 million and \$5 million, respectively, related to commodity contracts as regulatory liabilities (assets), respectively, on its consolidated balance sheets.

Notional Volumes of Derivative Instruments – The following table represents net notional volumes associated with derivative instruments that are required to be reported at fair value in NEE's and FPL's consolidated financial statements. The table includes significant volumes of transactions that have minimal exposure to commodity price changes because they are variably priced agreements. These volumes are only an indication of the commodity exposure that is managed through the use of derivatives. They do not represent net physical asset positions or non-derivative positions and the related hedges, nor do they represent NEE's and FPL's net economic exposure, but only the net notional derivative positions that fully or partially hedge the related asset positions. NEE and FPL had derivative commodity contracts for the following net notional volumes:

Commodity Type	December 31, 2025		December 31, 2024	
	NEE	FPL	NEE	FPL
	(millions)			
Power	(249) MWh	—	(189) MWh	—
Natural gas	(1,087) MMBtu	378 MMBtu	(1,131) MMBtu	503 MMBtu
Oil	3 barrels	—	(25) barrels	—

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of December 31, 2025 and 2024, NEE had interest rate contracts with a net notional amount of approximately \$47.3 billion and \$35.2 billion, respectively, and foreign currency contracts with a notional amount of approximately \$6.0 billion and \$1.2 billion, respectively.

Credit-Risk-Related Contingent Features – Certain derivative instruments contain credit-risk-related contingent features including, among other things, the requirement to maintain an investment grade credit rating from specified credit rating agencies and certain financial ratios, as well as credit-related cross-default and material adverse change triggers. As of December 31, 2025 and 2024, the aggregate fair value of NEE's derivative instruments with credit-risk-related contingent features that were in a liability position was approximately \$4.0 billion (\$38 million for FPL) and \$3.8 billion (\$11 million for FPL), respectively.

If the credit-risk-related contingent features underlying these derivative agreements were triggered, certain subsidiaries of NEE, including FPL, could be required to post collateral or settle contracts according to contractual terms which generally allow netting of contracts in offsetting positions. Certain derivative contracts contain multiple types of credit-related triggers. To the extent these contracts contain a credit ratings downgrade trigger, the maximum exposure is included in the following credit ratings collateral posting requirements. If FPL's and NEECH's credit ratings were downgraded to BBB/Baa2 (a three level downgrade for FPL and a one level downgrade for NEECH from the current lowest applicable rating), applicable NEE subsidiaries would be required to post collateral such that the total posted collateral would be approximately \$650 million (\$30 million at FPL) and \$500 million (none at FPL) as of December 31, 2025 and 2024, respectively. If FPL's and NEECH's credit ratings were downgraded to below investment grade, applicable NEE subsidiaries would be required to post additional collateral such that the total posted collateral would be approximately \$3.2 billion (\$65 million at FPL) and \$2.4 billion (\$25 million at FPL) as of December 31, 2025 and 2024, respectively. Some derivative contracts do not contain credit ratings downgrade triggers, but do contain provisions that require certain financial measures be maintained and/or have credit-related cross-default triggers. In the event these provisions were triggered, applicable NEE subsidiaries could be required to post additional collateral of up to approximately \$1.7 billion (\$95 million at FPL) and \$1.4 billion (\$70 million at FPL) as of December 31, 2025 and 2024, respectively.

Collateral related to derivatives, including amounts posted for margin, current exposures and future performance with exchanges and independent system operators, may be posted in the form of cash or credit support in the normal course of business. As of December 31, 2025 and 2024, applicable NEE subsidiaries have posted approximately \$98 million (none at FPL) and \$19 million (none at FPL), respectively, in cash and \$1,560 million (none at FPL) and \$1,334 million (none at FPL), respectively, in the form of letters of credit and surety bonds each of which could be applied toward the collateral requirements described above. FPL and NEECH have capacity under their credit facilities generally in excess of the collateral requirements described above that would be available to support, among other things, derivative activities. Under the terms of the credit facilities, maintenance of a specific credit rating is not a condition to drawing on these credit facilities, although there are other conditions to drawing on these credit facilities.

Additionally, some contracts contain certain adequate assurance provisions whereby a counterparty may demand additional collateral based on subjective events and/or conditions. Due to the subjective nature of these provisions, NEE and FPL are unable to determine an exact value for these items and they are not included in any of the quantitative disclosures above.

4. Non-Derivative Fair Value Measurements

Non-derivative fair value measurements consist of NEE's and FPL's cash equivalents and restricted cash equivalents, special use funds and other investments. The fair value of these financial assets is determined by using the valuation techniques and inputs as described in Note 3 – Fair Value Measurements of Derivative Instruments as well as below.

Cash Equivalents and Restricted Cash Equivalents – NEE and FPL hold investments primarily in money market funds. The fair value of these funds is estimated using a market approach based on current observable market prices.

Special Use Funds and Other Investments – NEE and FPL hold primarily debt and equity securities directly, as well as indirectly through commingled funds. Substantially all directly held equity securities are valued at their quoted market prices. For directly held debt securities, multiple prices and price types are obtained from pricing vendors whenever possible, which enables cross-provider validations. A primary price source is identified based on asset type, class or issue of each security. Commingled funds, which are similar to mutual funds, are maintained by banks or investment companies and hold certain investments in accordance with a stated set of objectives. The fair value of commingled funds is primarily derived from the quoted prices in active markets of the underlying securities. Because the fund shares are offered to a limited group of investors, they are not considered to be traded in an active market.

Fair Value Measurement Alternative – NEE holds investments in equity securities without readily determinable fair values, which are initially recorded at cost, of approximately \$647 million and \$665 million as of December 31, 2025 and 2024, respectively, and are included in noncurrent other assets on NEE's consolidated balance sheets. Adjustments to carrying values are recorded as a result of observable price changes in transactions for identical or similar investments of the same issuer.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Recurring Non-Derivative Fair Value Measurements – NEE's and FPL's fair value measurements made on a recurring basis by fair value hierarchy level are as follows:

	December 31, 2025				
	Level 1	Level 2	Level 3	Total	
	(millions)

- (a) Primarily represents investments accounted for under the equity method and loans not measured at fair value on a recurring basis (Level 2).
- (b) Approximately \$340 million and \$396 million is included in current other assets and \$195 million and \$233 million is included in noncurrent other assets on NEE's consolidated balance sheets as of December 31, 2025 and 2024, respectively (primarily Level 3).
- (c) As of December 31, 2025 and 2024, substantially all is Level 2 for NEE and FPL.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Special Use Funds and Other Investments Carried at Fair Value – The special use funds noted above and those carried at fair value (see Recurring Non-Derivative Fair Value Measurements above) consist primarily of NEE's nuclear decommissioning fund assets of approximately \$10,953 million (\$7,683 million for FPL) and \$9,799 million (\$6,874 million for FPL) as of December 31, 2025 and 2024, respectively. The investments held in the special use funds and other investments consist of equity and available for sale debt securities which are primarily carried at estimated fair value. The amortized cost of debt securities is approximately \$4,181 million (\$1,881 million for FPL) and \$3,720 million (\$1,780 million for FPL) as of December 31, 2025 and 2024, respectively. Debt securities included in the nuclear decommissioning funds have a weighted-average maturity as of December 31, 2025 of approximately eight years at both NEE and FPL. Other investments primarily consist of debt securities with a weighted-average maturity as of December 31, 2025 of approximately nine years. The cost of securities sold is determined using the specific identification method.

Unrealized gains recognized on equity securities held as of December 31, 2025, 2024 and 2023 are as follows:

	NEE			FPL		
	Years Ended December 31,			Years Ended December 31,		
	2025	2024	2023	2025	2024	2023
	(millions)					
Unrealized gains	\$ 748	\$ 917	\$ 881	\$ 472	\$ 668	\$ 598

Realized gains and losses and proceeds from the sale or maturity of available for sale debt securities are as follows:

	NEE			FPL		
	Years Ended December 31,			Years Ended December 31,		
	2025	2024	2023	2025	2024	2023
	(millions)					
Realized gains	\$ 80	\$ 53	\$ 40	\$ 69	\$ 46	\$ 35
Realized losses	\$ 78	\$ 86	\$ 169	\$ 61	\$ 71	\$ 147
Proceeds from sale or maturity of securities	\$ 3,189	\$ 2,874	\$ 2,380	\$ 2,176	\$ 2,274	\$ 1,921

The unrealized gains and unrealized losses on available for sale debt securities and the fair value of available for sale debt securities in an unrealized loss position are as follows:

	NEE		FPL	
	December 31,		December 31,	
	2025	2024	2025	2024
	(millions)			
Unrealized gains	\$ 62	\$ 25	\$ 34	\$ 16
Unrealized losses ^(a)	\$ 68	\$ 119	\$ 37	\$ 61
Fair value	\$ 1,344	\$ 2,224	\$ 709	\$ 1,160

(a) Unrealized losses on available for sale debt securities in an unrealized loss position for greater than twelve months as of December 31, 2025 and 2024 were not material to NEE or FPL.

Regulations issued by the FERC and the NRC provide general risk management guidelines to protect nuclear decommissioning funds and to allow such funds to earn a reasonable return. The FERC regulations prohibit, among other investments, investments in any securities of NEE or its subsidiaries, affiliates or associates, excluding investments tied to market indices or mutual funds. Similar restrictions applicable to the decommissioning funds for NEE's nuclear plants are included in the NRC operating licenses for those facilities or in NRC regulations applicable to NRC licensees not in cost-of-service environments. With respect to the decommissioning fund for Seabrook, decommissioning fund contributions and withdrawals are also regulated by the NDFC pursuant to New Hampshire law.

The nuclear decommissioning reserve funds are managed by investment managers who must comply with the guidelines of NEE and FPL and the rules of the applicable regulatory authorities. The funds' assets are invested giving consideration to taxes, liquidity, risk, diversification and other prudent investment objectives.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Nonrecurring Fair Value Measurements – NEE tests its equity method investments for impairment whenever events or changes in circumstances indicate that the fair value of the investment is less than the carrying value. Indicators of impairment may include, among other things, an observable market price below NEE's carrying value. Investments that are OTTI are written down to their estimated fair value on the reporting date and an impairment loss is recognized.

NextEra Energy Resources owns a noncontrolling interest in XPLR, primarily through its limited partner interest in XPLR Infrastructure Operating Partners, LP (XPLR OpCo), and accounts for this ownership interest as an equity method investment. During the preparation of NEE's March 31, 2025 financial statements, it was determined that NextEra Energy Resources' investment in XPLR was OTTI as a result of a significant decline in trading price of XPLR's common units following XPLR's announcement of a strategic repositioning, including suspension of the distribution to common unitholders for an indefinite period. The impairment reflected NEE's fair value analysis using the market approach and the observable trading price of XPLR's common units at March 31, 2025 of \$9.50. When making the OTTI determination, NEE considered, among other things, the extent to which the publicly traded unit price was less than cost. Based on the fair value analysis, the equity method investment with a carrying amount of approximately \$1.7 billion was written down to its estimated fair value of \$1.0 billion, resulting in an impairment charge of \$0.7 billion (\$0.5 billion after tax), which is reflected in equity in losses of equity method investees in NEE's consolidated statements of income for the year ended December 31, 2025. Should NEE determine, based on future analysis which includes the current and future trading prices of XPLR's common units, that an additional impairment is other-than-temporary, an impairment loss would be recorded, which would impact NEE's consolidated statements of income.

During the preparation of NEE's December 31, 2024 financial statements, it was determined that NextEra Energy Resources' investment in XPLR was OTTI as a result of a significant decline in trading price of XPLR's common units. The impairment reflected NEE's fair value analysis using the market approach and the observable trading price of XPLR's common units at December 31, 2024 of \$17.80. When making the OTTI determination, NEE considered, among other things, the extent to which the publicly traded unit price was less than cost. Based on the fair value analysis, the equity method investment with a carrying amount of approximately \$2.6 billion was written down to its estimated fair value of approximately \$1.8 billion, resulting in an impairment charge of \$0.8 billion (\$0.6 billion after tax), which is recorded in equity in losses of equity method investees in NEE's consolidated statements of income for the year ended December 31, 2024.

During the preparation of NEE's September 30, 2023 financial statements, it was determined that NextEra Energy Resources' investment in XPLR was OTTI as a result of a significant decline in trading price of XPLR's common units during the final three trading days of the third quarter of 2023 following the announcement of a decrease in XPLR's distribution growth rate expectations. The impairment reflected NEE's fair value analysis using the market approach and the observable trading price of XPLR's common units at September 30, 2023 of \$29.70. When making the OTTI determination, NEE considered, among other things, the extent to which the publicly traded unit price was less than cost. Based on the fair value analysis, the equity method investment with a carrying amount of approximately \$4.2 billion was written down to its estimated fair value of approximately \$3.0 billion, resulting in an impairment charge of \$1.2 billion (\$0.9 billion after tax), which is recorded in equity in losses of equity method investees in NEE's consolidated statements of income for the year ended December 31, 2023.

5. Income Taxes

Effective January 1, 2025, NEE and FPL adopted an accounting standards update that provides guidance for reporting on income taxes and requires additional disclosures related to cash paid (received) for income taxes – net and the effective income tax rate. NEE and FPL adopted the updated standard for income taxes using the full retrospective approach, which changed the presentation of certain information below.

The components of income taxes are as follows:

	NEE			FPL

6. Acquisitions

Symmetry Acquisition – On January 9, 2026, a wholly owned subsidiary of NextEra Energy Resources acquired 100% of the equity interests of Symmetry Energy Solutions, a commercial and industrial natural gas business, from Energy Capital Partners, LLC. The acquired business provides natural gas supply, storage and asset management solutions to a broad range of end users nationwide. Symmetry Energy Solutions supplies natural gas in the U.S. to approximately 5,500 commercial and industrial customers in 34 states, providing synergies and expansion opportunities for NEE's commercial and industrial gas business. The purchase price included \$805 million in cash consideration as well as working capital and other adjustments of approximately \$341 million (subject to certain post-closing adjustments).

Under the acquisition method, the purchase price will be allocated to the assets acquired and liabilities assumed based on their fair value. The allocation of the purchase price to each of the major categories of assets acquired and liabilities assumed has not been completed as of the date of this filing given the proximity of the acquisition date.

7. Property, Plant and Equipment

Property, plant and equipment consists of the following:

	NEE		FPL	
	December 31,		December 31,	
	2025	2024	2025	2024
	(millions)			
Electric plant in service and other property	\$ 170,129	\$ 151,677	\$ 94,837	\$ 87,596
Nuclear fuel	2,026	1,676	1,201	1,140
Construction work in progress	24,556	21,658	7,673	7,214
Property, plant and equipment, gross	196,711	175,011	103,711	95,950
Accumulated depreciation and amortization	(40,514)	(36,159)	(21,956)	(19,784)
Property, plant and equipment – net	<u>\$ 156,197</u>	<u>\$ 138,852</u>	<u>\$ 81,755</u>	<u>\$ 76,166</u>

FPL – As of December 31, 2025, FPL's gross investment in electric plant in service and other property for the electric generation, transmission, distribution and general facilities of FPL represented approximately 43%, 15%, 37% and 5%, respectively; the respective amounts as of December 31, 2024 were 43%, 14%, 36% and 7%. Substantially all of FPL's properties are subject to the lien of FPL's mortgage, which secures most debt securities issued by FPL. The weighted annual composite depreciation and amortization rate for FPL's electric plant in service, including capitalized software, but excluding the effects of decommissioning, dismantlement and the depreciation adjustments discussed in the following sentences, was approximately 3.4%, 3.5% and 3.4% for 2025, 2024 and 2023, respectively. In accordance with the 2021 rate agreement (see Note 1 – Rate Regulation – Base Rates Effective January 2022 through December 2025), FPL recorded reserve amortization in 2025, 2024 and 2023 of approximately \$593 million, \$328 million and \$227 million, respectively. During 2025, 2024 and 2023, FPL recorded AFUDC of approximately \$223 million, \$245 million and \$190 million, respectively, including the equity component of AFUDC of approximately \$172 million, \$189 million and \$155 million, respectively.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NEER – As of December 31, 2025, wind, solar, battery storage, nuclear and rate-regulated electric transmission assets represented approximately 41%, 23%, 8%, 5% and 5%, respectively, of NEER's depreciable electric plant in service and other property; the respective amounts as of December 31, 2024 were 45%, 23%, 2%, 6% and 5%. The estimated useful lives of NEER's plants range primarily from 30 to 35 years for wind facilities, 30 to 40 years for solar facilities, 20 to 35 years for battery storage and 23 to 47 years for nuclear facilities. The estimated weighted average useful life of NEER's rate-regulated electric transmission assets is 45 years. NEER's natural gas and oil production assets represented approximately 13% and 15% of NEER's depreciable electric plant in service and other property as of December 31, 2025 and 2024, respectively. A number of NEER's generation and regulated transmission assets are encumbered by liens securing various financings. The net book value of NEER's assets serving as collateral was approximately \$39.0 billion as of December 31, 2025. Interest capitalized on construction projects amounted to approximately \$657 million, \$439 million and \$310 million during 2025, 2024 and 2023, respectively.

Jointly-Owned Electric Plants – Certain NEE subsidiaries own undivided interests in the jointly-owned facilities described below, and are entitled to a proportionate share of the output from those facilities. The subsidiaries are responsible for their share of the operating costs, as well as providing their own financing. Accordingly, each subsidiary's proportionate share of the facilities and related revenues and expenses is included in the appropriate balance sheet and statement of income captions. NEE's and FPL's respective shares of direct expenses for these facilities are included in fuel, purchased power and interchange expense, O&M expenses, depreciation and amortization expense and taxes other than income taxes and other – net in NEE's and FPL's consolidated statements of income.

NEE's and FPL's proportionate ownership interest in jointly-owned facilities is as follows:

		December 31, 2025			
	Approximate Ownership Interest	Gross Investment ^(a)	Accumulated Depreciation ^(a)	Construction Work in Progress	
			(millions)		
FPL:					
St. Lucie Unit 2	85 %	\$ 2,366	\$ 922	\$ 139	
Scherer Unit 3	25 %	\$ 413	\$ 201	\$ 7	
NEER:					
Seabrook	88 %	\$ 1,492	\$ 604	\$ 140	
Wyman Station Unit 4	91 %	\$ 38	\$ 16	\$ —	
Stanton	65 %	\$ 144	\$ 43	\$ 2	
Transmission substation assets located in Seabrook, New Hampshire	88 %	\$ 168	\$ 32	\$ 2	

(a) Excludes nuclear fuel.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

8. Equity Method Investments

As of December 31, 2025 and 2024, NEE had 60 and 53 equity method investments with carrying amounts of approximately \$5,528 million and \$6,118 million, respectively. These entities primarily own electric generation facilities or natural gas pipelines. As of December 31, 2025 and 2024, the principal entities included in investment in equity method investees on NEE's consolidated balance sheet were XPLR (see Note 4 – Nonrecurring Fair Value Measurements), in which subsidiaries of NEE held ownership interests of 52.5% and 52.6%, respectively, and Mountain Valley Pipeline, LLC (Mountain Valley Pipeline), in which a subsidiary of NEE held ownership interests of 33.4% and 33.3%, respectively.

Summarized combined information for XPLR and Mountain Valley Pipeline is as follows:

	2025	2024
	(millions)	
Operating revenue	\$ 1,753	\$ 1,513
Operating income (loss)	\$ 84	\$ (325)
Net loss	\$ (194)	\$ (82)
Total assets	\$ 29,235	\$ 30,144
Total liabilities	\$ 8,726	\$ 7,501
Partners'/members' equity ^(a)	\$ 20,509	\$ 22,643
NEE's share of underlying equity in the principal entities	\$ 3,997	\$ 4,727
Difference between investment carrying amount and underlying equity in net assets ^(b)	(1,874)	(1,889)
NEE's investment carrying amount for the principal entities	<u>\$ 2,123</u>	<u>\$ 2,838</u>

(a) Reflects NEE's interest, as well as third-party interests, in XPLR.

(b) In 2025 and 2024, approximately \$(2.1) billion and \$(2.2) billion, respectively, are associated with Mountain Valley Pipeline, primarily reflecting impairment charges in 2022 and 2020, and are being amortized over 40 years.

Through XPLR OpCo, XPLR owns, or has a partial ownership interest in, a portfolio of contracted clean energy assets consisting of wind, solar and battery storage projects. NEE has an approximately 52.5% noncontrolling interest in XPLR, primarily through its limited partner interest in XPLR OpCo, and accounts for its ownership interest in XPLR as an equity method investment, which totaled approximately \$1.0 billion and \$1.8 billion as of December 31, 2025 and 2024, respectively. NextEra Energy Resources operates essentially all of the energy projects owned by XPLR and provides services to XPLR under various related party operations and maintenance, administrative and management services agreements (service agreements). Under these service agreements, NextEra Energy Resources incurred costs of approximately \$1,387 million, \$255 million and \$141 million for the years ended December 31, 2025, 2024 and 2023, respectively, primarily in connection with wind repowering, which have been or will be reimbursed by XPLR. NextEra Energy Resources is also party to a cash sweep and credit support (CSCS) agreement with a subsidiary of XPLR. Amounts due from XPLR of approximately \$498 million and \$159 million are included in other receivables and \$183 million and \$128 million are included in noncurrent other assets as of December 31, 2025 and 2024, respectively. NEECH or NextEra Energy Resources guaranteed or provided indemnifications, letters of credit or surety bonds totaling approximately \$1.8 billion as of December 31, 2025 primarily related to obligations on behalf of XPLR's subsidiaries with maturity dates ranging from 2026 to 2063, including certain project performance obligations and obligations under financing and interconnection agreements. Payment guarantees and related contracts with respect to unconsolidated entities for which NEE or one of its subsidiaries are the guarantor are recorded on NEE's consolidated balance sheets at fair value. As of December 31, 2025, approximately \$58 million related to the fair value of the credit support provided under the CSCS agreement is recorded as noncurrent other liabilities on NEE's consolidated balance sheet.

NEE has an approximately 33.4% noncontrolling interest in Mountain Valley Pipeline and accounts for its ownership interest as an equity method investment which totaled approximately \$1.1 billion and \$1.0 billion as of December 31, 2025 and 2024, respectively. Mountain Valley Pipeline owns and operates a 303-mile interstate natural gas pipeline system.

Certain services, primarily engineering, construction, transportation, storage and maintenance services, are provided to subsidiaries of NEE by related parties that NEE accounts for under the equity method of accounting. Charges for these services amounted to approximately \$928 million, \$749 million and \$656 million for the years ended December 31, 2025, 2024 and 2023, respectively.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

9. Variable Interest Entities (VIEs)

NEER – As of December 31, 2025, NEE consolidates a number of VIEs within the NEER segment. Subsidiaries within the NEER segment are considered the primary beneficiary of these VIEs since they control the most significant activities of these VIEs, including operations and maintenance, and they have the obligation to absorb expected losses of these VIEs.

Five indirect subsidiaries of NextEra Energy Resources have an ownership interest ranging from approximately 50% to 67% in entities which own and operate solar generation facilities with generating capacity of approximately 280 MW. Each of the subsidiaries is considered a VIE since the non-managing members have no substantive rights over the managing members, and is consolidated by NextEra Energy Resources. These entities sell their electric output to third parties under power sales contracts with expiration dates ranging from 2037 through 2042. These entities have third-party debt which is secured by liens against the assets of the entities. The debt holders have no recourse to the general credit of NextEra Energy Resources for the repayment of debt. The assets and liabilities of these VIEs were approximately \$506 million and \$148 million, respectively, as of December 31, 2025. There were eight of these consolidated VIEs as of December 31, 2024 and the assets and liabilities of those VIEs at such date totaled approximately \$1,708 million and \$520 million, respectively. As of December 31, 2025 and 2024, the assets and liabilities of these VIEs consisted primarily of property, plant and equipment and long-term debt, respectively.

NextEra Energy Resources consolidates a VIE which has a 10% direct ownership interest in wind and solar generation facilities which have the capability of producing approximately 400 MW and 599 MW, respectively. These entities sell their electric output under power sales contracts to third parties with expiration dates ranging from 2034 through 2040. These entities are also considered a VIE because the holders of differential membership interests in these entities do not have substantive rights over the significant activities of these entities. The assets and liabilities of the VIE were approximately \$1,301 million and \$71 million, respectively, as of December 31, 2025, and \$1,346 million and \$76 million, respectively, as of December 31, 2024. As of December 31, 2025 and 2024, the assets of this VIE consisted primarily of property, plant and equipment.

NextEra Energy Resources consolidates 34 VIEs that primarily relate to certain subsidiaries which have sold differential membership interests in entities which own and operate wind generation, solar generation and battery storage facilities with generating/storage capacity of approximately 11,950 MW, 4,810 MW and 2,624 MW, respectively. These entities sell, or will sell, their electric output either under power sales contracts to third parties with expiration dates ranging from 2027 through 2054 or in the spot market. These entities are considered VIEs because the holders of differential membership interests do not have substantive rights over the significant activities of these entities. NextEra Energy Resources has financing obligations with respect to these entities, including third-party debt which is secured by liens against the generation facilities and the other assets of these entities or by pledges of NextEra Energy Resources' ownership interest in these entities. The debt holders have no recourse to the general credit of NextEra Energy Resources for the repayment of debt. The assets and liabilities of these VIEs totaled approximately \$28,768 million and \$1,485 million, respectively, as of December 31, 2025. There were 30 of these consolidated VIEs as of December 31, 2024 and the assets and liabilities of those VIEs at such date totaled approximately \$23,902 million and \$1,546 million, respectively. As of December 31, 2025 and 2024, the assets and liabilities of these VIEs consisted primarily of property, plant and equipment and accounts payable, respectively.

Other – As of December 31, 2025 and 2024, several NEE subsidiaries had investments totaling approximately \$6,592 million (\$5,075 million at FPL) and \$5,848 million (\$4,506 million at FPL), respectively, which are included in special use funds and noncurrent other assets on NEE's consolidated balance sheets and in special use funds on FPL's consolidated balance sheets. These investments represented primarily commingled funds and asset-backed securities. NEE subsidiaries, including FPL, are not the primary beneficiaries and therefore do not consolidate any of these entities because they do not control any of the ongoing activities of these entities, were not involved in the initial design of these entities and do not have a controlling financial interest in these entities.

Certain subsidiaries of NEE have noncontrolling interests in entities accounted for under the equity method, including NEE's noncontrolling interest in XPLR OpCo (see Note 8). These entities are limited partnerships or similar entity structures in which the limited partners or non-managing members do not have substantive rights over the significant activities of these entities, and therefore are considered VIEs. NEE is not the primary beneficiary because it does not have a controlling financial interest in these entities, and therefore does not consolidate any of these entities. NEE's investment in these entities totaled approximately \$2,525 million and \$3,315 million as of December 31, 2025 and 2024, respectively. As of December 31, 2025, subsidiaries of NEE had guarantees related to certain obligations of one of these entities, as well as commitments to invest an additional approximately \$235 million in several of these entities. See further discussion of such guarantees and commitments in Note 15 – Commitments and – Contracts, respectively.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

10. Leases

NEE has operating and finance leases primarily related to land use agreements that convey exclusive use of the land during the arrangement for certain of its renewable energy projects and substations, as well as buildings and equipment. Operating and finance leases primarily have fixed payments with expected expiration dates ranging from 2026 to 2083, with the exception of operating leases related to three land use agreements with an expiration date of 2106, some of which include options to extend the leases up to 34 years and some have options to terminate at NEE's discretion. As of December 31, 2025, NEE's ROU assets and lease liabilities for operating leases totaled approximately \$442 million and \$458 million, respectively; the respective amounts as of December 31, 2024 were \$372 million and \$387 million. As of December 31, 2025, NEE's ROU assets and lease liabilities for finance leases totaled approximately \$1,108 million and \$1,143 million, respectively; the respective amounts as of December 31, 2024 were \$826 million and \$840 million. NEE's lease liabilities as of December 31, 2025 and 2024 were calculated using a weighted-average incremental borrowing rate at the lease inception of 4.37% and 3.83%, respectively, for operating leases and 5.91% and 4.92%, respectively, for finance leases, and a weighted-average remaining lease term of 38 years and 44 years, respectively, for operating leases and 39 years and 33 years, respectively, for finance leases. As of December 31, 2025, expected lease payments over the remaining terms of the leases were approximately \$4.1 billion with no one year being material.

NEE has operating and sales-type leases primarily related to certain battery storage facilities and a natural gas and oil electric generation facility. These facilities sell their electric output under power sales agreements to third parties that provide customers the ability to dispatch the facilities. As of December 31, 2025, the power sales agreements have expiration dates ranging from 2026 to 2050 and NEE expects to receive lease payments of approximately \$432 million, \$431 million, \$415 million, \$415 million, \$415 million and \$4,936 million in 2026 through 2030 and thereafter, respectively. Operating lease income of approximately \$286 million, \$193 million and \$99 million was recognized as operating revenue in NEE's consolidated statements of income in 2025, 2024 and 2023, respectively.

11. Asset Retirement Obligations

NEE's AROs relate primarily to decommissioning obligations of FPL's and NEER's nuclear units and to obligations for the dismantlement of certain of NEER's wind and solar facilities. For NEE's rate-regulated operations, including FPL, the accounting provisions result in timing differences in the recognition of legal asset retirement costs for financial reporting purposes and the method the regulator allows for recovery in rates. See Note 1 – Rate Regulation and – Decommissioning of Nuclear Plants, Dismantlement of Plants and Other Accrued Asset Removal Costs.

A rollforward of NEE's and FPL's AROs is as follows:

	NEE	FPL
	(millions)	(millions)
Balances, December 31, 2023	\$ 3,437	\$ 2,170
Liabilities incurred	157	56
Accretion expense	165	87
Liabilities settled	(75) ^(a)	(31)
Revision in estimated cash flows – net	14	13
Balances, December 31, 2024	3,698 ^(b)	2,295 ^(b)
Liabilities incurred	102	13
Accretion expense	177	93
Liabilities settled	(53) ^(a)	(26)
Revision in estimated cash flows – net	(239)	(205)
Balances, December 31, 2025	<u>\$ 3,685</u> ^(b)	<u>\$ 2,170</u> ^(b)

(a) Includes approximately \$24 million and \$39 million related to sales of businesses and assets during the years ended December 31, 2025 and 2024, respectively.

(b) Includes the current portion of AROs as of December 31, 2025 and 2024 of approximately \$16 million (\$12 million for FPL) and \$27 million (\$19 million for FPL), respectively, which are included in current other liabilities on NEE's and FPL's consolidated balance sheets.

Restricted funds for the payment of future expenditures to decommission NEE's and FPL's nuclear units included in special use funds on NEE's and FPL's consolidated balance sheets are presented below (see Note 4).

	NEE	FPL
	(millions)	(millions)
Balances, December 31, 2025	\$ 10,953	\$ 7,683
Balances, December 31, 2024	\$ 9,799	\$ 6,874

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NEE and FPL have identified but not recognized ARO liabilities related to the majority of their electric transmission and distribution assets and pipelines resulting from easements over property not owned by NEE or FPL. These easements are generally perpetual and only require retirement action upon abandonment or cessation of use of the property or facility for its specified purpose. The related ARO liability is not estimable for such easements as NEE and FPL intend to use these properties indefinitely. In the event NEE or FPL decide to abandon or cease the use of a particular easement, an ARO liability would be recorded at that time.

12. Employee Retirement Benefits

Employee Pension Plan and Other Benefits Plans – NEE sponsors a qualified noncontributory defined benefit pension plan for substantially all employees of NEE and its subsidiaries. NEE also has a supplemental executive retirement plan (SERP), which includes a non-qualified supplemental defined benefit pension component that provides benefits to a select group of management and highly compensated employees, and sponsors a contributory postretirement plan for other benefits for retirees of NEE and its subsidiaries meeting certain eligibility requirements. The total accrued benefit cost of the SERP and postretirement plans is approximately \$204 million (\$78 million for FPL) and \$212 million (\$86 million for FPL) as of December 31, 2025 and 2024, respectively.

Pension Plan Assets, Benefit Obligations and Funded Status – The changes in assets, benefit obligations and the funded status of the pension plan are as follows:

	2025	2024
	(millions)	
Change in pension plan assets:		
Fair value of plan assets as of January 1	\$ 5,121	\$ 4,897
Actual return on plan assets	659	469
Benefit payments	(216)	(245)
Fair value of plan assets as of December 31	<u>\$ 5,564</u>	<u>\$ 5,121</u>
Change in pension benefit obligation:		
Obligation as of January 1	\$ 2,625	2,785
Service cost	69	71
Interest cost	136	131
Special termination benefit ^(a)	—	27
Plan amendments	4	(3)
Actuarial losses (gains) – net ^(b)	79	(141)
Benefit payments	(216)	(245)
Obligation as of December 31 ^(c)	<u>\$ 2,697</u>	<u>\$ 2,625</u>
Funded status:		
Prepaid pension benefit costs at NEE as of December 31	<u>\$ 2,868</u>	<u>\$ 2,496</u>
Prepaid pension benefit costs at FPL as of December 31 ^(d)	<u>\$ 2,072</u>	<u>\$ 1,954</u>

(a) Reflects enhanced early retirement benefit.

(b) Primarily due to the difference in actual versus expected discount rate.

(c) NEE's accumulated pension benefit obligation, which includes no assumption about future salary levels, as of December 31, 2025 and 2024 was approximately \$2,616 million and \$2,553 million, respectively.

(d) Reflects FPL's allocated benefits under NEE's pension plan.

NEE's unrecognized amounts included in accumulated other comprehensive income (loss) yet to be recognized as components of prepaid pension benefit costs are as follows:

	2025	2024
	(millions)	
Unrecognized prior service benefit (net of \$1 tax expense)	\$ —	\$ 1
Unrecognized gains (losses) (net of \$14 tax expense and \$3 tax benefit, respectively)	42	(12)
Total	<u>\$ 42</u>	<u>\$ (11)</u>

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NEE's unrecognized amounts included in regulatory assets (liabilities) yet to be recognized as components of net prepaid pension benefit costs are as follows:

	2025	2024
	(millions)	
Unrecognized prior service cost	\$ 3	\$ —
Unrecognized (gains) losses	(5)	92
Total	<u>\$ (2)</u>	<u>\$ 92</u>

The following table provides the assumptions used to determine the benefit obligation for the pension plan. These rates are used in determining net periodic pension income in the following year.

	2025	2024
Discount rate	5.43 %	5.58 %
Salary increase	4.90 %	4.90 %
Weighted-average interest crediting rate	3.79 %	3.88 %

NEE's investment policy for the pension plan recognizes the benefit of protecting the plan's funded status, thereby avoiding the necessity of future employer contributions. Its broad objectives are to achieve a high rate of total return with a prudent level of risk taking while maintaining sufficient liquidity and diversification to avoid large losses and preserve capital over the long term.

The NEE pension plan fund's current target asset allocation, which is expected to be reached over time, is 41% equity investments, 36% fixed income investments and 23% alternative investments. The pension fund's investment strategy emphasizes traditional investments, broadly diversified across the global equity and fixed income markets, using a combination of different investment styles and vehicles. The pension fund's equity and fixed income holdings consist of both directly held securities as well as commingled investment arrangements such as common and collective trusts, pooled separate accounts, registered investment companies and limited partnerships. The pension fund's convertible security assets are principally direct holdings of convertible securities and include a convertible security oriented limited partnership. The pension fund's alternative investments consist primarily of private equity and real estate oriented investments in limited partnerships as well as absolute return oriented limited partnerships that use a broad range of investment strategies on a global basis.

The fair value measurements of NEE's pension plan assets by fair value hierarchy level are as follows:

December 31, 2025 ^(a)				
	Quoted Prices in Active Markets for Identical Assets or Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
	(millions)			
Equity securities ^(b)	\$ 1,321	\$ 3	\$ 1	\$ 1,325

(c) Includes foreign investments of \$186 million.

(d) Includes foreign investments of \$69 million.

(e) Includes foreign investments of \$185 million.

(f) Includes foreign investments of \$28 million.

(g) Includes foreign investments of \$274 million.

Expected Cash Flows – The following table provides information about benefit payments expected to be paid by the pension plan for each of the following calendar years (in millions):

2026	\$ 228
2027	\$ 222
2028	\$ 220
2029	\$ 214
2030	\$ 214
2031 – 2035	\$ 1,029

Net Periodic (Income) Cost – The components of net periodic (income) cost for the plans are as follows:

	Pension Benefits			Postretirement Benefits		
	2025	2024	2023	2025	2024	2023
	(millions)					
Service cost	\$ 69	\$ 71	\$ 64	\$ 1	\$ 1	\$ 1
Interest cost	136	131	132	8	9	9

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Other Comprehensive Income – The components of net periodic income (cost) recognized in OCI for the pension plan are as follows:

	2025	2024	2023
	(millions)		
Prior service benefit (cost) (net of \$0 tax benefit and \$0 tax expense, respectively)	\$ (2)	\$ —	\$ 1
Net gains (net of \$17 tax expense, \$19 tax expense and \$7 tax expense, respectively)	54	60	23
Total	<u>\$ 52</u>	<u>\$ 60</u>	<u>\$ 24</u>

Regulatory Assets (Liabilities) – The components of net periodic income recognized during the year in regulatory assets (liabilities) for the pension plan are as follows:

	2025	2024
	(millions)	
Prior service cost	\$ 2	\$ —
Unrecognized gains	(96)	(129)
Total	<u>\$ (94)</u>	<u>\$ (129)</u>

The assumptions used to determine net periodic pension income for the pension plan are as follows:

	2025	2024	2023
Discount rate	5.58 %	4.88 %	5.05 %
Salary increase	4.90 %	4.90 %	4.90 %
Expected long-term rate of return, net of investment management fees	8.00 %	8.00 %	8.00 %
Weighted-average interest crediting rate	3.88 %	3.89 %	3.82 %

Employee Contribution Plan – NEE offers an employee retirement savings plan which allows eligible participants to contribute a percentage of qualified compensation through payroll deductions. NEE makes matching contributions to participants' accounts. Defined contribution expense pursuant to this plan was approximately \$92 million, \$83 million and \$78 million for NEE (\$47 million, \$44 million and \$43 million for FPL) for the years ended December 31, 2025, 2024 and 2023, respectively.

- (a) Includes tax exempt bonds that permit individual bondholders to tender the bonds for purchase at any time prior to maturity. In the event these tax exempt bonds are tendered for purchase, they would be remarketed by a designated remarketing agent in accordance with the related indenture. If the remarketing is unsuccessful, FPL would be required to purchase these tax exempt bonds. As of December 31, 2025, these tax exempt bonds totaled approximately \$1,566 million. All tax exempt bonds tendered for purchase have been successfully remarketed. FPL's syndicated revolving credit facilities are available to support the purchase of the tax exempt bonds. Variable interest rate is established at various intervals by the remarketing agent.
- (b) As of December 31, 2025, includes approximately \$1,975 million of floating rate notes that permit individual noteholders to require repayment at specified dates prior to maturity. FPL's syndicated revolving credit facilities are available to support the purchase of the floating rate notes.
- (c) Variable rate is based on an underlying index plus a specified margin.
- (d) Interest rate contracts, primarily swaps, have been entered into with respect to certain of these debt issuances. See Note 3.
- (e) Foreign currency contracts have been entered into with respect to certain of these debt issuances. See Note 3.

As of December 31, 2025, minimum annual maturities of long-term debt for NEE are approximately \$3,499 million, \$10,343 million, \$10,588 million, \$9,916 million and \$7,270 million for 2026, 2027, 2028, 2029 and 2030, respectively. The respective amounts for FPL are approximately \$641 million, \$328 million, \$1,992 million, \$948 million and \$500 million.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of December 31, 2025 and 2024, short-term borrowings had a weighted-average interest rate of 4.43% (3.74% for FPL) and 4.82% (4.59% for FPL), respectively. Subsidiaries of NEE, including FPL, had credit facilities for general corporate purposes with total capacity as of December 31, 2025 of approximately \$22.8 billion (\$4.4 billion for FPL) which provide for the funding of loans and/or issuance of letters of credit. As of December 31, 2025, letters of credit outstanding under these credit facilities totaled approximately \$4.3 billion (\$3.3 billion for FPL). There were no borrowings outstanding under these facilities as of December 31, 2025. As of February 13, 2026, NEE, including FPL, had credit facilities for general corporate purposes with total capacity of approximately \$24.6 billion (\$5.6 billion for FPL).

NEE has guaranteed certain payment obligations of NEECH, including most of those under NEECH's debt, including all of its debentures and commercial paper issuances, as well as most of its payment guarantees and indemnifications. NEECH has guaranteed certain debt and other obligations of subsidiaries within the NEER segment.

In March 2023, NEECH completed a remarketing of \$2.5 billion aggregate principal amount of its Series K Debentures due March 1, 2025 that were issued in February 2020 as components of equity units issued concurrently by NEE (February 2020 equity units). The debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing of the debentures, the interest rate on the debentures was reset to 6.051% per year, and interest is payable on March 1 and September 1 of each year, commencing September 1, 2023. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the February 2020 equity units, on March 1, 2023, NEE issued approximately 33.4 million shares of common stock in exchange for \$2.5 billion.

In August 2023, NEECH completed a remarketing of \$2.0 billion aggregate principal amount of its Series L Debentures due September 1, 2025 that were issued in September 2020 as components of equity units issued concurrently by NEE (September 2020 equity units). The debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing of the debentures, the interest rate on the debentures was reset to 5.749% per year, and interest is payable on March 1 and September 1 of each year, commencing September 1, 2023. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the September 2020 equity units, on September 1, 2023, NEE issued approximately 27.3 million shares of common stock in exchange for \$2.0 billion.

In August 2025, NEECH completed a remarketing of approximately \$2.0 billion aggregate principal amount of its Series M Debentures due September 1, 2027 that were issued in September 2022 as components of equity units issued concurrently by NEE (September 2022 equity units). The debentures are fully and unconditionally guaranteed by NEE. In connection with the remarketing of the debentures, the interest rate on the debentures was reset to 4.685% per year, and interest is payable on March 1 and September 1 of each year, commencing September 1, 2025. In connection with the settlement of the contracts to purchase NEE common stock that were issued as components of the September 2022 equity units, on September 1, 2025, NEE issued approximately 22.8 million shares of common stock in exchange for \$2.0 billion.

In March 2024, NEECH issued \$1.0 billion principal amount of its exchangeable senior notes due 2027 (the notes). A holder may exchange all or a portion of its notes at any time prior to the maturity date in accordance with the related indenture. Upon exchange, NEECH will pay cash up to the aggregate principal amount of the notes being exchanged and has the right, at its sole discretion, to pay or deliver cash, shares of NEE common stock or a combination of both, in respect of the remainder, if any, of NEECH's exchange obligation in excess of the aggregate principal amount of the notes being exchanged. As of December 31, 2024, the exchange rate, which is subject to certain adjustments as set forth in the indenture, is 14.6927 shares of NEE common stock per \$1,000 in principal amount of notes, which is equivalent to an exchange price of approximately \$68.06 per share of NEE common stock.

NEECH used \$52 million of the net proceeds from the sale of the notes to enter into capped call transactions. Under the capped call transactions, NEECH purchased capped call options with an initial strike price of \$68.06 and an initial cap price of \$83.34 in each case per share of NEE common stock and subject to adjustment in certain circumstances. The capped call transactions may be settled with cash or, at NEE's election, with shares of NEE common stock. Any capped call settlement value is expected to offset the value to be delivered upon exchange of the notes as a result of share price improvement up to the cap price.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In June 2024, NEE sold \$2.0 billion of equity units (initially consisting of Corporate Units). Each equity unit has a stated amount of \$50 and consists of a contract to purchase NEE common stock (stock purchase contract) and, initially, a 5% undivided beneficial ownership interest in a Series N Debenture due June 1, 2029, issued in the principal amount of \$1,000 by NEECH. Each stock purchase contract requires the holder to purchase by no later than June 1, 2027 (the final settlement date) for a price of \$50 in cash, a number of shares of NEE common stock (subject to antidilution adjustments), based on a price per share range described in the following sentence. If purchased on the final settlement date, as of December 31, 2025, the number of shares issued per equity unit would (subject to antidilution adjustments) range from 0.6934 shares if the applicable market value of a share of NEE common stock is less than or equal to \$72.31 (the reference price) to 0.5547 shares if the applicable market value of a share is equal to or greater than \$90.38 (the threshold appreciation price), with the applicable market value to be determined using the average closing prices of NEE common stock over a 20-day trading period ending on May 26, 2027. Total annual distributions on the equity units are at the rate of 7.299%, consisting of interest on the debentures (5.15% per year) and payments under the stock purchase contracts (2.149% per year). The interest rate on the debentures is expected to be reset on or after December 1, 2026. A holder of an equity unit may satisfy its purchase obligation with proceeds raised from remarketing the NEECH debentures that are part of its equity unit. The undivided beneficial ownership interest in the NEECH debenture that is a component of each Corporate Unit is pledged to NEE to secure the holder's obligation to purchase NEE common stock under the related stock purchase contract. If a successful remarketing does not occur on or before the third business day prior to the final settlement date, and a holder has not notified NEE of its intention to settle the stock purchase contract with cash, the debentures that are components of the Corporate Units will be used to satisfy in full the holders' obligations to purchase NEE common stock under the related stock purchase contracts on the final settlement date. The debentures are fully and unconditionally guaranteed by NEE.

In October 2024, NEE sold \$1.5 billion of equity units (initially consisting of Corporate Units). Each equity unit has a stated amount of \$50 and consists of a contract to purchase NEE common stock (stock purchase contract) and, initially, a 5% undivided beneficial ownership interest in a Series O Debenture due November 1, 2029, issued in the principal amount of \$1,000 by NEECH. Each stock purchase contract requires the holder to purchase by no later than November 1, 2027 (the final settlement date) for a price of \$50 in cash, a number of shares of NEE common stock (subject to antidilution adjustments), based on a price per share range described in the following sentence. If purchased on the final settlement date, as of December 31, 2025, the number of shares issued per equity unit would (subject to antidilution adjustments) range from 0.6050 shares if the applicable market value of a share of NEE common stock is less than or equal to \$82.87 (the reference price) to 0.4841 shares if the applicable market value of a share is equal to or greater than \$103.58 (the threshold appreciation price), with the applicable market value to be determined using the average closing prices of NEE common stock over a 20-day trading period ending on October 27, 2027. Total annual distributions on the equity units are at the rate of 7.234%, consisting of interest on the debentures (4.635% per year) and payments under the stock purchase contracts (2.599% per year). The interest rate on the debentures is expected to be reset on or after May 1, 2027. A holder of an equity unit may satisfy its purchase obligation with proceeds raised from remarketing the NEECH debentures that are part of its equity unit. The undivided beneficial ownership interest in the NEECH debenture that is a component of each Corporate Unit is pledged to NEE to secure the holder's obligation to purchase NEE common stock under the related stock purchase contract. If a successful remarketing does not occur on or before the third business day prior to the final settlement date, and a holder has not notified NEE of its intention to settle the stock purchase contract with cash, the debentures that are components of the Corporate Units will be used to satisfy in full the holders' obligations to purchase NEE common stock under the related stock purchase contracts on the final settlement date. The debentures are fully and unconditionally guaranteed by NEE.

Prior to the issuance of NEE's common stock, the stock purchase contracts, if dilutive, will be reflected in NEE's diluted earnings per share calculations using the treasury stock method. Under this method, the number of shares of NEE common stock used in calculating diluted earnings per share is deemed to be increased by the excess, if any, of the number of shares that would be issued upon settlement of the stock purchase contracts over the number of shares that could be purchased by NEE in the market, at the average market price during the period, using the proceeds receivable upon settlement.

On February 5, 2026, NEECH sold a total of \$1.3 billion principal amount of its fixed-rate debentures, with interest rates ranging from 4.40% to 5.85% and maturity dates ranging from 2031 to 2056. Additionally, on February 10, 2026, NEECH sold a total of €1.3 billion principal amount of its fixed-rate debentures, with interest rates ranging from 2.989% to 3.624% and maturity dates ranging from 2030 to 2034.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

14. Equity

Earnings Per Share – The reconciliation of NEE's basic and diluted earnings per share attributable to NEE is as follows:

	Years Ended December 31,		
	2025	2024	2023
	(millions, except per share amounts)		
Numerator – net income attributable to NEE	\$ 6,835	\$ 6,946	\$ 7,310
Denominator:			
Weighted-average number of common shares outstanding – basic	2,064.5	2,052.9	2,026.1
Equity units, stock options, performance share awards, restricted stock and exchangeable notes ^(a)	6.1	6.3	4.7
Weighted-average number of common shares outstanding – assuming dilution	2,070.6	2,059.2	2,030.8
Earnings per share attributable to NEE:			
Basic	\$ 3.31	\$ 3.38	\$ 3.61
Assuming dilution	\$ 3.30	\$ 3.37	\$ 3.60

(a) Calculated primarily using the treasury stock method. Performance share awards are included in diluted weighted-average number of common shares outstanding based upon what would be issued if the end of the reporting period was the end of the term of the award.

Common shares issuable pursuant to equity units, stock options, performance share awards and/or exchangeable notes, as well as restricted stock which were not included in the denominator above due to their antidilutive effect were approximately 59.6 million, 33.9 million and 39.1 million for the years ended December 31, 2025, 2024 and 2023, respectively.

ATM Program – On December 31, 2025, NEE established an at-the-market equity issuance program (ATM program) pursuant to which NEE may offer and sell, from time to time, NEE common stock having an aggregate gross sales price of up to \$4 billion.

Common Stock Dividend Restrictions – NEE's charter does not limit the dividends that may be paid on its common stock. FPL's mortgage securing FPL's first mortgage bonds contains provisions which, under certain conditions, restrict the payment of dividends and other distributions to NEE. These restrictions do not currently limit FPL's ability to pay dividends to NEE.

Stock-Based Compensation – Net income for the years ended December 31, 2025, 2024 and 2023 includes approximately \$185 million, \$138 million and \$139 million, respectively, of compensation costs and \$33 million, \$29 million and \$26 million, respectively, of income tax benefits related to stock-based compensation arrangements. Compensation cost capitalized for the years ended December 31, 2025, 2024 and 2023 was not material. As of December 31, 2025, there were approximately \$196 million of unrecognized compensation costs related to nonvested/nonexercisable stock-based compensation arrangements. These costs are expected to be recognized over a weighted-average period of 1.9 years.

As of December 31, 2025, approximately 74 million shares of common stock were authorized for awards to officers, employees and non-employee directors of NEE and its subsidiaries under NEE's: (a) Amended and Restated 2021 Long Term Incentive Plan, (b) 2017 Non-Employee Directors Stock Plan and (c) earlier equity compensation plans under which shares are reserved for issuance under existing grants, but no additional shares are available for grant under the earlier plans. NEE satisfies restricted stock and performance share awards by issuing new shares of its common stock or by purchasing shares of its common stock in the open market. NEE satisfies stock option exercises by issuing new shares of its common stock. NEE generally grants most of its stock-based compensation awards in the first quarter of each year.

Restricted Stock and Performance Share Awards – Restricted stock typically vests within three years after the date of grant and is subject to, among other things, restrictions on transferability prior to vesting. The fair value of restricted stock is measured based upon the closing market price of NEE common stock as of the date of grant. Performance share awards are typically payable at the end of a three-year performance period if the specified performance criteria are met. The fair value for the majority of performance share awards is estimated based upon the closing market price of NEE common stock as of the date of grant less the present value of expected dividends, multiplied by an estimated performance multiple which is subsequently trued up based on actual performance.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The activity in restricted stock and performance share awards for the year ended December 31, 2025 was as follows:

	Shares/Units	Weighted-Average Grant Date Fair Value Per Share/Units
Restricted Stock:		
Nonvested balance, January 1, 2025	3,163,775	\$ 68.44
Granted	1,313,993	\$ 71.18
Vested	(1,322,804)	\$ 69.81
Forfeited	(221,576)	\$ 76.19
Nonvested balance, December 31, 2025	<u>2,933,388</u>	\$ 67.56
Performance Share Awards:		
Nonvested balance, January 1, 2025	1,844,728	\$ 61.48
Granted	1,524,397	\$ 66.79
Vested	(1,167,236)	\$ 67.14
Forfeited	(373,413)	\$ 68.12
Nonvested balance, December 31, 2025	<u>1,828,476</u>	\$ 61.07

The weighted-average grant date fair value per share of restricted stock granted for the years ended December 31, 2024 and 2023 was \$61.78 and \$72.24, respectively. The weighted-average grant date fair value per share of performance share awards granted for the years ended December 31, 2024 and 2023 was \$63.23 and \$71.79, respectively.

The total fair value of restricted stock and performance share awards vested was \$154 million, \$106 million and \$106 million for the years ended December 31, 2025, 2024 and 2023, respectively.

Options – Options typically vest within three years after the date of grant and have a maximum term of ten years. The exercise price of each option granted equals the closing market price of NEE common stock on the date of grant. The fair value of the options is estimated on the date of the grant using the Black-Scholes option-pricing model and based on the following assumptions:

	2025	2024	2023
Expected volatility ^(a)	22.63 – 23.61%	21.34 – 22.09%	19.72 – 20.57%
Expected dividends	2.73 – 2.87%	2.55 – 3.02%	2.45 – 2.86%
Expected term (years) ^(b)	6.6	6.6	6.6
Risk-free rate	3.99 – 4.40%	3.79 – 4.43%	3.50 – 4.50%

(a) Based on historical experience.

(b) Based on historical exercise and post-vesting cancellation experience adjusted for outstanding awards.

Option activity for the year ended December 31, 2025 was as follows:

	Shares Underlying Options	Weighted-Average Exercise Price Per Share	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (millions)
Balance, January 1, 2025	10,581,165	\$ 56.54		
Granted	1,128,542	\$ 69.08		
Exercised	(1,101,436)	\$ 34.54		
Forfeited	(96,482)	\$ 68.04		
Expired	(2,571)	\$ 73.80		
Balance, December 31, 2025	<u>10,509,218</u>	\$ 60.08	5.0	\$ 216
Exercisable, December 31, 2025	8,383,655	\$ 58.64	4.1	\$ 185

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The weighted-average grant date fair value of options granted was \$15.34, \$11.62 and \$14.46 per share for the years ended December 31, 2025, 2024 and 2023, respectively. The total intrinsic value of stock options exercised was approximately \$44 million, \$68 million and \$22 million for the years ended December 31, 2025, 2024 and 2023, respectively.

Cash received from option exercises was approximately \$38 million, \$47 million and \$14 million for the years ended December 31, 2025, 2024 and 2023, respectively. The tax benefits realized from options exercised were approximately \$11 million, \$16 million and \$5 million for the years ended December 31, 2025, 2024 and 2023, respectively.

Preferred Stock – NEE's charter authorizes the issuance of 100 million shares of serial preferred stock, \$0.01 par value, none of which are outstanding. FPL's charter authorizes the issuance of 10,414,100 shares of preferred stock, \$100 par value, 5 million shares of subordinated preferred stock, no par value, and 5 million shares of preferred stock, no par value, none of which are outstanding.

Accumulated Other Comprehensive Income (Loss) – The components of AOCI, net of tax, are as follows:

Accumulated Other Comprehensive Income (Loss)						
	Net Unrealized Gains (Losses) on Cash Flow Hedges	Net Unrealized Gains (Losses) on Available for Sale Securities	Defined Benefit Pension and Other Benefits Plans	Net Unrealized Gains (Losses) on Foreign Currency Translation	Other Comprehensive Income Related to Equity Method Investees	Total
	(millions)

(a) Reclassified to interest expense in NEE's consolidated statements of income. See Note 3 – Income Statement Impact of Derivative Instruments.

(b) Reclassified to gains on disposal of investments and other property – net in NEE's consolidated statements of income.

(c) Reclassified to other net periodic benefit income in NEE's consolidated statements of income.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

15. Commitments and Contingencies

Commitments – NEE and its subsidiaries have made commitments in connection with a portion of their projected capital expenditures. Capital expenditures at FPL include, among other things, the cost for construction of additional facilities and equipment to meet customer demand, as well as capital improvements to and maintenance of existing facilities. At NEER, capital expenditures include, among other things, the cost, including capitalized interest, for development, construction and maintenance of its competitive energy businesses. Also see Note 6 – Symmetry Acquisition.

As of December 31, 2025, estimated capital expenditures, on an accrual basis, for 2026 through 2030 were as follows:

	2026	2027	2028	2029	2030	Total
	(millions)					
FPL:						
Generation: ^(a)						
New ^(b)	\$ 4,255	\$ 3,505	\$ 4,365	\$ 4,125	\$ 3,525	\$ 19,775
Existing	1,180	1,360	1,300	1,300	1,350	6,490
Transmission and distribution ^(c)	4,540	4,910	4,775	5,900	6,720	26,845
Nuclear fuel	270	340	425	385	380	1,800
General and other	940	755	740	665	620	3,720
Total	<u>\$ 11,185</u>	<u>\$ 10,870</u>	<u>\$ 11,605</u>	<u>\$ 12,375</u>	<u>\$ 12,595</u>	<u>\$ 58,630</u>
NEER: ^(d)						
Wind ^(e)	\$ 2,750	\$ 1,240	\$ 1,050	\$ 120	\$ 110	\$ 5,270
Solar ^(f)	8,045	3,840	1,620	5	10	13,520
Other clean energy ^(g)	2,900	3,070	525	15	10	6,520
Nuclear, including nuclear fuel	685	1,070	850	525	440	3,570
Regulated electric and gas transmission	1,095	1,050	760	650	740	4,295
Other	905	460	310	335	370	2,380
Total	<u>\$ 16,380</u>	<u>\$ 10,730</u>	<u>\$ 5,115</u>	<u>\$ 1,650</u>	<u>\$ 1,680</u>	<u>\$ 35,555</u>

(a) Includes AFUDC of approximately \$195 million, \$200 million, \$220 million, \$210 million and \$175 million for 2026 through 2030, respectively.

(b) Includes land, generation structures, transmission interconnection and integration and licensing.

(c) Includes AFUDC of approximately \$80 million, \$95 million, \$105 million, \$165 million and \$160 million for 2026 through 2030, respectively.

(d) Represents capital expenditures for which applicable internal approvals and also, if required, regulatory approvals have been received.

(e) Consists of capital expenditures for new wind projects and repowering of existing wind projects totaling approximately 3,575 MW, and related transmission.

(f) Includes capital expenditures for new solar projects (including solar plus battery storage projects) totaling approximately 11,435 MW and related transmission.

(g) Includes capital expenditures primarily for battery storage projects totaling approximately 4,616 MW and related transmission, as well as renewable fuels projects.

The above estimates are subject to continuing review and adjustment and actual capital expenditures may vary significantly from these estimates.

In addition to guarantees noted in Note 8 with regards to XPLR, NEECH has guaranteed or provided indemnifications or letters of credit related to third parties, including certain obligations of investments in joint ventures accounted for under the equity method, totaling approximately \$815 million as of December 31, 2025. These obligations primarily relate to guaranteeing the obligations under equity capital contribution and purchased power agreements and the residual value of a financing lease. Payment guarantees and related contracts with respect to unconsolidated entities for which NEE or one of its subsidiaries is the guarantor are recorded at fair value and are included in noncurrent other liabilities on NEE's consolidated balance sheets. Management believes that the exposure associated with these guarantees is not material.

Contracts – In addition to the commitments made in connection with the estimated capital expenditures included in the table in Commitments above, FPL has firm commitments under long-term contracts primarily for the transportation of natural gas with expiration dates through 2042.

As of December 31, 2025, NEER has entered into contracts primarily for the purchase of wind turbines, wind towers, solar modules, batteries and transmission equipment and related construction and development activities, as well as for the supply of uranium, and the conversion, enrichment and fabrication of nuclear fuel with expiration dates through 2033. Approximately \$8.7 billion of related commitments are included in the estimated capital expenditures table in Commitments above. In addition, NEER has contracts primarily for the transportation and storage of natural gas with expiration dates through 2041.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The required capacity and/or minimum payments under contracts, including those discussed above as of December 31, 2025, were estimated as follows:

	2026	2027	2028	2029	2030	Thereafter
	(millions)					
FPL ^(a)	\$ 1,195	\$ 1,175	\$ 1,135	\$ 1,125	\$ 1,055	\$ 6,405
NEER ^{(b)(c)}	\$ 6,795	\$ 1,865	\$ 495	\$ 200	\$ 140	\$ 360

- (a) Includes approximately \$425 million, \$430 million, \$430 million, \$425 million, \$425 million and \$4,540 million in 2026 through 2030 and thereafter, respectively, of firm commitments related to natural gas transportation agreements with affiliates. The charges associated with these agreements are recoverable through the fuel clause and totaled approximately \$409 million, \$409 million and \$417 million for the years ended December 31, 2025, 2024 and 2023, respectively, of which \$73 million and \$99 million, respectively, were eliminated in consolidation at NEE for the years ended December 31, 2024 and 2023.
- (b) Includes approximately \$150 million of commitments to invest in technology and other investments through 2031. See Note 9 – Other.
- (c) Includes approximately \$1,140 million and \$315 million for 2026 and 2027, respectively, of joint obligations of NEECH and NEER.

Insurance – Liability for accidents at nuclear power plants is governed by the Price-Anderson Act, which limits the liability of nuclear reactor owners to the amount of insurance available from both private sources and an industry retrospective payment plan. In accordance with this Act, NEE maintains \$500 million of private liability insurance per site, which is the maximum obtainable, except at Duane Arnold which obtained an exemption from the NRC and maintains a \$100 million private liability insurance limit. Each site, except Duane Arnold, participates in a secondary financial protection system, which provides up to \$15.8 billion of liability insurance coverage per incident at any nuclear reactor in the U.S. Under the secondary financial protection system, NEE is subject to retrospective assessments of up to \$1,161 million (\$664 million for FPL), plus any applicable taxes, per incident at any nuclear reactor in the U.S., payable at a rate not to exceed \$173 million (\$99 million for FPL) per incident per year. NextEra Energy Resources and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook and St. Lucie Unit 2, which approximates \$20 million and \$25 million, plus any applicable taxes, per incident, respectively.

NEE participates in a nuclear insurance mutual company, Nuclear Electric Insurance Limited (NEIL), which provides property damage, nuclear accident decontamination and premature decommissioning insurance for each plant for losses resulting from damage to its nuclear facilities, either due to accidents or acts of terrorism. Additionally, NEIL provides accidental outage coverage for losses in the event of a major accidental outage at an insured nuclear plant. Pursuant to regulations of the NRC, each company's property damage insurance policies provide that all proceeds from such insurance be applied first to place the plant in a safe and stable condition after a qualifying accident, and second, to decontaminate the plant before any proceeds can be used for decommissioning, plant repair or restoration.

NEE and FPL nuclear facilities each have accident property damage, nuclear accident decontamination and premature decommissioning liability insurance from NEIL with limits of \$1.5 billion, except for Duane Arnold which has a limit of \$50 million due to being placed in a deferred decommissioning status in 2020. All the nuclear facilities, except for Duane Arnold, also share an additional \$1.25 billion nuclear accident insurance limit above their dedicated underlying limit. This shared additional excess limit is not subject to reinstatement in the event of a loss. All coverages are subject to sublimits and deductibles.

NEE also participates in an insurance program that provides limited coverage for replacement power costs if a nuclear plant is out of service for an extended period of time because of an accident. In the event of an accident at one of NEE's or another participating insured's nuclear plants, NEE could be assessed up to \$175 million (\$110 million for FPL), plus any applicable taxes, in retrospective premiums in a policy year. NextEra Energy Resources and FPL are contractually entitled to recover a proportionate share of such assessments from the owners of minority interests in Seabrook, Duane Arnold and St. Lucie Unit 2, which approximates \$3 million, \$2 million and \$4 million, plus any applicable taxes, respectively.

Due to the high cost and limited coverage available from third-party insurers, NEE does not have property insurance coverage for a substantial portion of either its transmission and distribution property or natural gas pipeline assets. If FPL's storm restoration costs exceed the storm reserve, such storm restoration costs may be recovered, subject to prudence review by the FPSC, through surcharges approved by the FPSC or through securitization provisions pursuant to Florida law. See Note 1 – Storm Funds, Storm Reserves and Storm Cost Recovery.

In the event of a loss, the amount of insurance available might not be adequate to cover property damage and other expenses incurred. Uninsured losses and other expenses, to the extent not recovered from customers in the case of FPL, would be borne by NEE and FPL and could have a material adverse effect on NEE's and FPL's financial condition, results of operations and liquidity.

NEXTERA ENERGY, INC. AND FLORIDA POWER & LIGHT COMPANY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Legal Proceedings – NEE, FPL, and certain current and former executives, are the named defendants in a purported shareholder securities class action lawsuit filed in the U.S. District Court for the Southern District of Florida in June 2023 and amended in December 2023 that seeks from the defendants unspecified damages allegedly resulting from alleged false or misleading statements regarding NEE's alleged campaign finance and other political activities. The alleged class of plaintiffs are all persons or entities who purchased or otherwise acquired NEE securities between December 2, 2021 and January 30, 2023. In September 2024, the class action lawsuit was dismissed with prejudice by the U.S. District Court for the Southern District of Florida. Following appeal, on November 26, 2025, a panel of the U.S. Court of Appeals for the 11th Circuit reversed the dismissal and remanded the lawsuit for further proceedings. The defendants' petition for the U.S. Court of Appeals for the 11th Circuit to have the full court rehear the appeal was denied. The defendants are vigorously defending against the claims in this proceeding.

NEE, along with certain current and former executives and directors are the named defendants in purported shareholder derivative actions filed in the 15th Judicial Circuit in Palm Beach County, Florida in July 2023, March 2024 and May 2025, in the U.S. District Court for the Southern District of Florida in October 2023 and November 2023 (which were consolidated in January 2024) and in the U.S. District Court for the Southern District of Florida in July 2024 and May 2025, seeking unspecified damages allegedly resulting from, among other things, breaches of fiduciary duties and, in the consolidated cases and the July 2024 case, violations of the federal securities laws, all purporting to relate to alleged campaign finance law violations and associated matters. The defendants are vigorously defending against the claims in these proceedings. NEE also has received demand letters and books and records requests from counsel representing other purported shareholders and containing similar allegations. These demands seek, among other things, a Board of Directors investigation of, and/or documentation regarding, these allegations. These derivative cases, demands and requests remain stayed pending the outcome of the securities class action lawsuit described above, except for the May 2025 action, which the court closed after the plaintiff voluntarily dismissed the case.

In November 2024, NEE was named as defendant in an antitrust lawsuit (Avangrid, Inc. et al. v. NextEra Energy, Inc.) filed in the U.S. District Court for the District of Massachusetts. The original complaint sought damages of \$350 million, which would be tripled in the event of a finding of monopolization under the Sherman Act, from the defendants for alleged violations of federal and state antitrust laws, as well as Massachusetts state laws. In September 2025, the U.S. District Court for the District of Massachusetts dismissed the alleged violations of federal and state antitrust laws. In December 2025, the court heard oral argument on NEE's motion to dismiss the remaining Massachusetts state law claims. NEE is vigorously defending against the remaining claims in this proceeding.

XPLR, NEE and certain NEE executives who also serve or served as directors or officers of XPLR are the named defendants in a purported federal securities class action lawsuit filed in the U.S. District Court for the Southern District of California (Southern District of California) in July 2025 that seeks unspecified damages alleging that the defendants made false and misleading statements regarding XPLR's business model, XPLR distributions, and its arrangements relating to noncontrolling class B members' interests under certain limited liability company agreements to which XPLR and certain of its subsidiaries are or were a party. The alleged class includes all persons or entities other than the defendants and certain affiliated parties of the defendants as named in the lawsuit who purchased or otherwise acquired XPLR securities between September 27, 2023 and January 27, 2025. In January 2026, the plaintiffs filed an amended complaint expanding the putative class period to include all persons or entities other than the defendants and certain affiliated parties of the defendants as named in the lawsuit who purchased or otherwise acquired XPLR securities beginning on May 8, 2023. The defendants are vigorously defending against the claims in this proceeding and plan to file a motion to dismiss the complaint.

XPLR, NEE and certain current and former XPLR directors or officers, some of whom are also current and former NEE executives, are the named defendants in a purported unitholder derivative action filed in the Southern District of California in August 2025. The complaint alleges, among other allegations, that defendants breached their fiduciary duties by making, or causing XPLR to make, false and misleading statements regarding XPLR's business model, distributions, financial arrangements and equity needs. The plaintiff seeks declaratory and monetary relief, changes to corporate governance and internal procedures, and attorneys' fees and costs. In November 2025, the Southern District of California issued an order to stay proceedings pending resolution of the motion to dismiss phase in the purported federal securities class action lawsuit described above.

16. Segment Information

The tables below present information for NEE's two reportable segments, FPL, a rate-regulated utility business, and NEER, which is comprised of competitive energy and regulated transmission businesses. Corporate and Other represents other business activities, includes eliminating entries, and may include the net effect of rounding. FPL has a single reportable segment. See Note 2 for information regarding NEE's and FPL's operating revenues.

NEE's and FPL's chief operating decision maker (CODM) is NEE's chief executive officer. The CODM makes key operating decisions and evaluates the reportable segment's operating results, including net income attributable to NEE, for financial planning, analysis of performance and resource allocation.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

As of December 31, 2025, each of NEE and FPL had performed an evaluation, under the supervision and with the participation of its management, including NEE's and FPL's chief executive officer and chief financial officer, of the effectiveness of the design and operation of each company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)). Based upon that evaluation, the chief executive officer and the chief financial officer of each of NEE and FPL concluded that the company's disclosure controls and procedures were effective as of December 31, 2025.

Internal Control Over Financial Reporting

(a) Management's Annual Report on Internal Control Over Financial Reporting

See Item 8. Financial Statements and Supplementary Data.

(b) Attestation Report of the Independent Registered Public Accounting Firm

See Item 8. Financial Statements and Supplementary Data.

(c) Changes in Internal Control Over Financial Reporting

NEE and FPL are continuously seeking to improve the efficiency and effectiveness of their operations and of their internal controls. This results in refinements to processes throughout NEE and FPL. However, there has been no change in NEE's or FPL's internal control over financial reporting (as defined in the Securities Exchange Act of 1934 Rules 13a-15(f) and 15d-15(f)) that occurred during NEE's and FPL's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, NEE's or FPL's internal control over financial reporting.

Item 9B. Other Information

(b) Rule 10b5-1 trading arrangements adopted during the three months ended December 31, 2025 were as follows:

- On December 9, 2025, Terrell Kirk Crews II, Executive Vice President, Chief Risk Officer, adopted a Rule 10b5-1 trading arrangement that is intended to satisfy the affirmative defense of Rule 10b5-1(c) for the sale of 19,672 shares of NEE's common stock until May 29, 2026.
- On December 9, 2025, Mark Lemasney, Executive Vice President, Power Generation Division, adopted a Rule 10b5-1 trading arrangement that is intended to satisfy the affirmative defense of Rule 10b5-1(c) for the sale of 3,217 shares of NEE's common stock until September 4, 2026.
- On December 9, 2025, James May, Executive Vice President, Treasurer, adopted a Rule 10b5-1 trading arrangement that is intended to satisfy the affirmative defense of Rule 10b5-1(c) for the sale of 4,672 shares of NEE's common stock until December 9, 2026.
- On December 11, 2025, Nicole Daggs, Executive Vice President, Human Resources and Corporate Services, adopted a Rule 10b5-1 trading arrangement that is intended to satisfy the affirmative defense of Rule 10b5-1(c) for the sale of 4,189 shares of NEE's common stock until December 11, 2026.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this item will be included under the headings "Business of the Annual Meeting," "Information About NextEra Energy and Management" and "Corporate Governance and Board Matters" in NEE's Proxy Statement which will be filed with the SEC in connection with the 2026 Annual Meeting of Shareholders (NEE's Proxy Statement) and is incorporated herein by reference, or is included in Item 1. Business – Information About Our Executive Officers.

NEE has adopted the NextEra Energy, Inc. Code of Ethics for Senior Executive and Financial Officers (the Senior Financial Executive Code), which is applicable to the chief executive officer, the chief financial officer, the chief accounting officer and other senior executive and financial officers. The Senior Financial Executive Code is available under Corporate Governance in the Investor Relations section of NEE's internet website at www.nexteraenergy.com. Any amendments or waivers of the Senior Financial Executive Code which are required to be disclosed to shareholders under SEC rules will be disclosed on the NEE website at the address listed above.

Item 11. Executive Compensation

The information required by this item will be included in NEE's Proxy Statement under the headings "Executive Compensation" and "Corporate Governance and Board Matters" and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this item relating to security ownership of certain beneficial owners and management will be included in NEE's Proxy Statement under the heading "Information About NextEra Energy and Management" and is incorporated herein by reference.

Securities Authorized For Issuance Under Equity Compensation Plans^(a)

NEE's equity compensation plan information as of December 31, 2025 is as follows:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	15,406,835 ^(a)	\$ 60.08 ^(b)	54,567,191 ^(c)
Equity compensation plans not approved by security holders	—	—	—
Total	15,406,835	\$ 60.08	54,567,191

(a) Includes an aggregate of 10,509,218 outstanding options, 4,545,444 unvested performance share awards (at maximum payout), 285,124 unvested restricted stock units (including future reinvested dividends) under the NextEra Energy, Inc. Amended and Restated 2021 Long Term Incentive Plan and former long term incentive plans, and 67,049 fully vested shares deferred by directors under the NextEra Energy, Inc. 2017 Non-Employee Directors Stock Plan, and its predecessors, the 2007 Non-Employee Directors Stock Plan and the FPL Group, Inc. Amended and Restated Non-Employee Directors Stock Plan.

(b) Relates to outstanding options only.

(c) Includes 52,862,453 shares under the NextEra Energy, Inc. Amended and Restated 2021 Long Term Incentive Plan and 1,704,738 shares under the NextEra Energy, Inc. 2017 Non-Employee Directors Stock Plan.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item, to the extent applicable, will be included in NEE's Proxy Statement under the heading "Corporate Governance and Board Matters" and is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services

NEE – The information required by this item will be included in NEE's Proxy Statement under the heading "Audit-Related Matters" and is incorporated herein by reference.

FPL – The following table presents fees billed for professional services rendered by Deloitte & Touche LLP, the member firms of Deloitte Touche Tohmatsu, and their respective affiliates (collectively, Deloitte & Touche) for the fiscal years ended December 31, 2025 and 2024. The amounts presented below reflect allocations from NEE for FPL's portion of the fees, as well as amounts billed directly to FPL.

	2025	2024
Audit fees ^(a)	\$ 3,478,000	\$ 4,046,000
Audit-related fees ^(b)	802,000	236,000
Tax fees ^(c)	302,000	497,000
All other fees ^(d)	52,000	13,000
Total	\$ 4,634,000	\$ 4,792,000

- (a) Audit fees consist of fees billed for professional services rendered for the audit of FPL's and NEE's annual consolidated financial statements for the fiscal year, the reviews of the financial statements included in FPL's and NEE's Quarterly Reports on Form 10-Q during the fiscal year and the audit of the effectiveness of internal control over financial reporting, comfort letters, and consents.
- (b) Audit-related fees consist of fees billed for assurance and related services that are reasonably related to the performance of the audit or review of FPL's and NEE's consolidated financial statements and are not reported under audit fees. These fees primarily relate to the audit of storm costs and the pre-implementation internal control assessment of information technology systems.
- (c) Tax fees consist of fees billed for professional services rendered for tax compliance, tax advice and tax planning. These fees primarily relate to research and development tax credit advice and planning services.
- (d) All other fees consist of fees for products and services other than the services reported under the other named categories. In 2025 and 2024, these fees relate to training.

In accordance with the requirements of the Sarbanes-Oxley Act of 2002, the Audit Committee Charter and the Audit Committee's pre-approval policy for services provided by the independent registered public accounting firm, all services performed by Deloitte & Touche are approved in advance by the Audit Committee, except for audits of certain trust funds where the fees are paid by the trust. Permitted services specifically identified in an appendix to the pre-approval policy are pre-approved by the Audit Committee each year. This pre-approval allows management to request the specified permitted services on an as-needed basis during the year, provided any such services are reviewed with the Audit Committee at its next regularly scheduled meeting. Any permitted service for which the fee is expected to exceed \$500,000, or that involves a service not listed on the pre-approval list, must be specifically approved by the Audit Committee prior to commencement of such service. The Audit Committee has delegated to the Chair of the committee the right to approve audit, audit-related, tax and other services, within certain limitations, between meetings of the Audit Committee, provided any such decision is presented to the Audit Committee at its next regularly scheduled meeting. At each Audit Committee meeting (other than meetings held to review earnings materials), the Audit Committee reviews a schedule of services for which Deloitte & Touche has been engaged since the prior Audit Committee meeting under existing pre-approvals and the estimated fees for those services. In 2025 and 2024, none of the amounts presented above represent services provided to NEE or FPL by Deloitte & Touche that were approved by the Audit Committee after services were rendered pursuant to Rule 2-01(c)(7)(i)(C) of Regulation S-X (which provides for a waiver of the otherwise applicable pre-approval requirement if certain conditions are met).

Supplemental Information to be Furnished With Reports Filed Pursuant to Section 15(d) of the Securities Exchange Act of 1934 by Registrants Which Have Not Registered Securities Pursuant to Section 12 of the Securities Exchange Act of 1934

No annual report, proxy statement, form of proxy or other proxy soliciting material has been sent to security holders of FPL during the period covered by this Annual Report on Form 10-K for the fiscal year ended December 31, 2025.

Exhibit 31(a)

Rule 13a-14(a)/15d-14(a) Certification

I, John W. Ketchum, certify that:

1. I have reviewed this Form 10-K for the annual period ended December 31, 2025 of NextEra Energy, Inc. (the registrant);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

NEXTERA ENERGY, INC.

NextEra Energy, Inc. (NYSE: NEE) is one of the largest electric power and energy infrastructure companies in North America. NextEra Energy has two principal businesses, Florida Power & Light Company (FPL) and NextEra Energy Resources, LLC. FPL is the largest electric utility in the state of Florida and the U.S. FPL's strategic focus is centered on investing in generation, storage, transmission and distribution facilities to deliver on its value proposition of keeping customer bills low and delivering high reliability, outstanding customer service and energy from diverse generation sources for the benefit of its more than 6 million customer accounts. Through its subsidiaries and affiliates, NextEra Energy Resources is one of the largest energy infrastructure developers in the U.S. NextEra Energy Resources' strategic focus is centered on the development, construction and operation of long-term contracted generation facilities, including renewables, nuclear and natural gas, as well as battery storage facilities. Subsidiaries and affiliates of NextEra Energy Resources also build and own regulated electric and gas transmission assets, include a leading gas and power supplier, and deliver integrated energy and technology solutions to utilities and businesses across the U.S. For more information about NextEra Energy companies, visit these websites: www.NextEraEnergy.com, www.FPL.com, www.NextEraEnergyResources.com.
