| * An ERC is determined based on one of | of the following methods: |
| (a) If actual flow data are available fro | |
| Divide the total annual single fami | ly residence (SFR) gallons sold by the average |
| number of SFR customers for the | same period and divide the result by 365 days. |
| (b) If no historical flow data are available FRC = (Total SFR gallons sold to | able use: mit 000)/365 days/350 gallons per day). |

| * An ERC is determined based on one of the following methods: |
| (a) If actual flow data are available from the preceding 12 months: |
| Divide the total annual single family residence (SFR) gallons sold by the average number of SFR customers for the same period and divide the result by 365 days. |
| maniaes of or it obstantions for the same period and direct the local by 600 days. |
| (b) If no historical flow data are available use: |
| ERC = (Total SFR gallons sold (omit 000)/365 days/280 gallons per day). |

CERTIFICATION OF ANNUAL REPORT

I HEREBY CERTIFY, to the best of my knowledge and belief:

* Each of the four items must be certified YES or NO. Each item need not be certified by both officers. The items being certified by the officer should be indicated in the appropriate area to the left of the signature.
