 An ERC is determined based on one of the following methods: (a) If actual flow data are available from the preceding 12 months: Divide the total annual single family residence (SFR) gallons sold by the average number of SFR customers for the same period and divide the result by 365 days. (b) If no historical flow data are available use: ERC = (Total SFR gallons sold (omit 000)/365 days/280 gallons per day).
ERU = (1018) 5FK DBIIONS SOID (OMIL VOUI/300 DBYS/200 GBIIONS PBI UBY).

Re: 2021 Class "C" Water and Wastewater Utility Report

Dear Mr. Maurey,

Attached are an original and two copies of the December 31, 2021 annual report for Grove Land Utilities, LLC ("Grove Land").

As you know, on April 30, 2012 the Commission issued its Order No. PSC-12-0224-PAA-WS granting Grove Land a certificate to operate a water and wastewater utility. The Order also established initial rates. The Utility's treatment, distribution, or collection systems are not yet constructed and no services for compensation were provided in 2019. Therefore are no operating results to report.

Since there were no operations we are only submitting information on the following pages of the annual report:

-page F-2 - General information
 -page F-3 - Income Statement
 -page F-4 - Balance Sheet
 -page F-6 - Proprietary Capital
 -page F-7 - Tax Expense
 -page V-1 - Certification

If you have any questions, please contact Derek Wells at (772) 234-2410 ext. 203 or via email at dwells@evansprop.com.

Very truly yours,

Ronald L. Edwards Manager
