DATE: January 21, 2021 TO: Office of Commission Clerk (Teitzman) 78 Division of Engineering (Phillips, Ellis, Kistner) FROM: Division of Accounting and Finance (Higgins) ALM Division of Economics (Forrest, Coston) Office of the General Counsel (Stiller, Trierweiler) RE: Docket No. 20200245-EI – Petition for a limited proceeding to approve third solar base rate adjustment, by Duke Energy Florida, LLC. **AGENDA:** 02/02/21 – Regular Agenda – Tariff Filing – Interested Persons May Participate **COMMISSIONERS ASSIGNED:** All Commissioners PREHEARING OFFICER: Graham CRITICAL DATES: 7/18/21 (8-Month Tariff Suspension Date) SPECIAL INSTRUCTIONS: None

### Case Background

By Order No. PSC-2017-0451-AS-EU, issued on November 20, 2017, the Florida Public Service Commission (Commission) approved Duke Energy Florida, LLC's (DEF or Company) Second Revised and Restated Settlement Agreement (2017 Settlement).<sup>1</sup> The 2017 Settlement allows for the inclusion into base rates of up to 700 megawatts (MW) of solar projects which meet certain criteria through a Solar Base Rate Adjustment (SoBRA) mechanism.

<sup>&</sup>lt;sup>1</sup> Order No. PSC-2017-0451-AS-EU, issued November 20, 2017, in Docket No. 20170183-EI, *In re: Application for limited proceeding to approve 2017 second revised and restated settlement agreement, including certain rate adjustments, by Duke Energy Florida, LLC.* 

Docket No. 20200245-EI Date: January 21, 2021

On April 30, 2019, the Commission approved DEF's First SoBRA tranche which consisted of two solar projects, Hamilton and Columbia with a total installed capacity of 149.8 MW.<sup>2</sup> On July 22, 2019, the Commission approved DEF's Second SoBRA tranche which consisted of three solar projects, Trenton, Lake Placid, and DeBary with a total installed capacity of 194.4 MW.<sup>3</sup>

On May 29, 2020, DEF filed a petition for approval of the Third SoBRA tranche which consisted of five solar projects, Twin Rivers, Santa Fe, Charlie Creek, Duette, and Archer, which established Docket No. 20200153-EI.<sup>4</sup> On November 17, 2020, due to permitting issues for the Archer solar project located in Alachua County, DEF filed a notice of withdrawal and the docket was subsequently closed.<sup>5</sup>

On November 11, 2020, DEF filed the instant petition for approval of the Third SoBRA tranche which consists of five solar projects, Twin Rivers, Santa Fe, Charlie Creek, Duette, and Sandy Creek. The petition is similar in scope to that filed in Docket No. 20200153-EI with the Archer project being replaced by the Sandy Creek project. While the total installed capacity of the projects is 374.1 MW, DEF is seeking recovery of only 355.8 MW. This represents the remaining capacity available through the 2017 Settlement's SoBRA Mechanism.

The Commission has jurisdiction pursuant to Sections 366.06 and 366.076, Florida Statutes, (F.S.).

<sup>&</sup>lt;sup>2</sup> Order No. PSC-2019-0159-FOF-EI, issued April 30, 2019, in Docket No. 20180149-EI, In re: Duke Energy Florida, LLC's Petition for Limited Proceeding to Approve First Solar Base Rate Adjustment.

<sup>&</sup>lt;sup>3</sup> Order No. PSC-2019-0292-FOF-EI, issued July 22, 2019, in Docket No. 20190072-EI, In re: Duke Energy Florida, LLC's Petition for Limited Proceeding to Approve Second Solar Base Rate Adjustment.

<sup>&</sup>lt;sup>4</sup> Document No. 02844-2020 filed May 29, 2020, in Docket No. 20200153, In re: Duke Energy Florida, LLC's Petition for Limited Proceeding to Approve Third Solar Base Rate Adjustment.

<sup>&</sup>lt;sup>5</sup> Document No. 12493-2020 filed November 18, 2020, in Docket No. 20200245, *In re: Duke Energy Florida, LLC's Petition for Limited Proceeding to Approve Third Solar Base Rate Adjustment.* 

### Discussion of Issues

**Issue 1:** Are the installed costs of the solar projects proposed by DEF (Twin Rivers, Santa Fe, Charlie Creek, Duette, and Sandy Creek) within the installed cost cap required by subparagraph 15(a) of the 2017 Settlement?

**Recommendation:** Yes. The estimated installed costs appear reasonable and the resulting weighted average cost of the combined projects in DEF's Third SoBRA tranche is below the installed cost cap of \$1,650 per kilowatt alternating current ( $kW_{ac}$ ), as required by the 2017 Settlement. (Phillips)

**Staff Analysis:** The Third SoBRA tranche consists of five projects: Twin Rivers, Santa Fe, Charlie Creek, Duette, and Sandy Creek. Each of the projects is designed to be approximately 75 MW. The capacity and projected in-service dates for each project are listed in Table 1-1. DEF is only seeking recovery through the SoBRA Mechanism of 56.6 MW of the Sandy Creek project. The recovery of the remaining 18.3 MW of capacity may be addressed in a future docket.

Installed Capacity and Projected In-Service dates of Third Sobra Trainche			
Project Name	Capacity (MW)	<b>Estimated In-Service Date</b>	
Twin Rivers	74.9	February 2021	
Santa Fe	74.9	March 2021	
Charlie Creek	74.9	December 2021	
Duette	74.5	December 2021	
Sandy Creek	74.9 (56.6 SoBRA)	April 2022	

Table 1-1	
Installed Capacity and Projected In-Service dates of Third SoBRA Tranche	

Source: Direct Testimony of DEF witness Benjamin M. H. Borsch Exhibit (BMHM-1)

Paragraph 15 of the 2017 Settlement outlines the conditions under which DEF may seek cost recovery of certain solar facilities. Subparagraph 15(c) outlines the issues to be considered for projects that are below 75 MW. The requirements for average installed cost and overall reasonableness of costs are addressed in this issue, while system cost-effectiveness, and need for the facilities, are addressed in Issues 2 and 3, respectively.

Subparagraph 15(a) of the 2017 Settlement specifies that the weighted average cost of all projects in a SoBRA tranche may be no more than \$1,650 per  $kW_{ac}$  installed to be eligible for recovery. The 2017 Settlement states all construction costs for the projects are to be included, such as land acquisition costs. The estimated installed cost and cost per kWac for each project are listed in Table 1-2. The unit cost of both the weighted average of all projects and each project individually are below the \$1,650/ kW<sub>ac</sub> requirement. The amount listed for the Sandy Creek project is the total amount, but only a partial amount coinciding with the 56.6 MW of capacity will be allowed recovery through the SoBRA mechanism.

Estimated instance obst, in rotal and by onit of oapacity			
Project Name	<b>Estimated Installed Cost</b>	<b>Estimated Installed Cost</b>	
	(\$)	(\$/kWac)	
Twin Rivers	\$100,037,587	\$1,336	
Santa Fe	\$108,910,046	\$1,454	
Charlie Creek	\$97,950,968	\$1,308	
Duette	\$108,572,491	\$1,457	
Sandy Creek	\$99,123,932	\$1,323	
Weighted Average Unit Cost	-	\$1,376	

 Table 1-2

 Estimated Installed Cost, in Total and by Unit of Capacity

Source: Direct Testimony of DEF witness Benjamin M. H. Borsch Exhibit (BMHM-1)

In three of the projects, DEF will be leasing the land for the facility instead of purchasing it. Lease costs are not included in the k was calculation. In response to staff's data requests, the Company provided the estimated net present value of payments under these three leases. Even including lease costs as part of the k was calculation, the weighted average cost of all projects is less than the 1,650/k ac installed cost cap.

The installed cost of a project consists of major equipment, balance of system, construction management, transmission interconnection, and land cost. This includes but is not limited to the cost of solar panels, transformers, contractors, legal fees, development fees, and insurance. DEF utilized a competitive process when soliciting contractors and procuring material and equipment for the Third SoBRA tranche. Given the use of competitive bidding in multiple aspects of the projects, the costs appear to be reasonable.

#### Conclusion

Based on staff's review, the estimated installed costs appear reasonable and the resulting weighted average cost of the combined projects in DEF's Third SoBRA tranche is below the installed cost cap of 1,650 per kW<sub>ac</sub>, as required by the 2017 Settlement.

**Issue 2:** Are the solar projects proposed by DEF cost effective pursuant to subparagraph 15(c) of the 2017 Settlement?

**Recommendation:** Yes. DEF's proposed Third SoBRA tranche would result in lower system costs as compared to the system without the projects, as required by the 2017 Settlement. (Phillips)

**Staff Analysis:** Subparagraph 15(c) defines the cost-effectiveness of a SoBRA tranche to be whether the projects will lower the projected system cumulative present value revenue requirement (CPVRR) as compared to a system without the projects. This compares the cost of the added generation, transmission, operation and maintenance (O&M) and other expenses of the proposed SoBRA tranche to the avoided traditional generation, transmission, fuel, and O&M expenses that would otherwise have been incurred if the facilities were not constructed.

Overall, DEF estimates that the Third SoBRA tranche would produce savings of \$37 million over the life of the projects before consideration of costs associated with carbon dioxide (CO<sub>2</sub>) and equivalent emissions. Inclusive of CO<sub>2</sub> emissions costs, DEF estimates a savings of \$234 million. The primary driver of the savings is avoided fuel costs, approximately \$435 million, followed by avoided generation costs of \$217 million, and avoided CO<sub>2</sub> emissions costs of \$197 million. The Company also ran scenarios with high and low fuel costs, with only the low fuel and no CO<sub>2</sub> emission cost scenario resulting in a loss for customers, of approximately \$20 million. The breakeven point for the Third SoBRA tranche is expected to be in 2048 if carbon emission costs are not included and 2040 if carbon emission costs are included. The results of each scenario are listed in Table 2-1.

System CPVRR Savings/(Costs) by Fuel and Emissions Scenario (\$ Millions)			
Fuel / Emissions	High Fuel	Mid Fuel	Low Fuel
Scenario			
No CO <sub>2</sub>	\$173	\$37	(\$20)
With CO <sub>2</sub>	\$376	\$234	\$177

Table 2-1
System CPVRR Savings/(Costs) by Fuel and Emissions Scenario (\$ Millions)

Source: Direct Testimony of DEF witness Benjamin M. H. Borsch Exhibit (BMHM-4)

#### Conclusion

Based on staff's review, DEF's proposed Third SoBRA tranche would result in lower system costs as compared to the system without the projects, as required by the 2017 Settlement.

*Issue 3:* Are the solar projects proposed by DEF needed pursuant to subparagraph 15(c) of the 2017 Settlement?

**Recommendation:** Yes. DEF's proposed Third SoBRA tranche is needed as it will produce economic benefits to the general body of ratepayers, provide firm summer capacity, and increase the fuel diversity of DEF's generation. (Phillips)

**Staff Analysis:** Subparagraph 15(c) of the 2017 Settlement specifies that one of the issues to be considered is whether, when considering all relevant factors, there is a need for the SoBRA projects. Need is undefined in the 2017 Settlement, but can be reasonably interpreted to include multiple forms of need, such as economic, reliability, and fuel diversity.

As discussed in Issue 2, the Third SoBRA tranche is projected to produce savings over the life of the project between \$37 and \$234 million, with and without  $CO_2$  emission costs, respectively. In response to staff's data request, DEF estimates that for its scenario including  $CO_2$  emissions costs, annual customer savings begin in 2040 and continue for the life of the projects. Based on this analysis, an economic need could be supported.

Regarding reliability, due to their production characteristics solar facilities only contribute towards the reliability of the summer peak. Each of the facilities has been constructed at a direct current capacity of approximately 130 percent of the alternating current capacity, resulting in increased energy during shoulder periods, and increased contribution towards summer firm capacity. While DEF's net firm system demand is lower in summer than in the winter, summer tends to control unit addition planning. The proposed solar facilities would improve DEF's summer reserve margin slightly in the early years while decreasing its winter reserve margin by avoiding or deferring conventional generation, addressing a reliability need. The projects will also defer the construction of a single combustion turbine in the year 2027 that would otherwise be needed for reliability purposes.

Fuel diversity through renewable energy generation, such as the projects of DEF's Third SOBRA tranche, is encouraged by several statutes, including Section 366.91, F.S., which states in part:

Renewable energy resources have the potential to help diversify fuel types to meet Florida's growing dependency on natural gas for electric production, minimize the volatility of fuel costs, encourage investment within the state, improve environmental conditions, and make Florida a leader in new and innovative technologies.

The energy production of the Third SoBRA tranche would offset the remainder of the DEF system's fuel consumption, which is primarily natural gas.

### Conclusion

There is a need for DEF's proposed Third SoBRA tranche when considering the economic, system reliability, and fuel diversity benefits to the general body of ratepayers.

**Issue 4:** Are the solar projects proposed by DEF otherwise in compliance with the terms of paragraph 15 of the 2017 Settlement?

**Recommendation:** Yes. DEF's Third SoBRA tranche meets the requirements of the 2017 Settlement and the projects are eligible for cost recovery through the SoBRA mechanism established therein. (Phillips)

**Staff Analysis:** Paragraph 15 of the 2017 Settlement outlines various criteria and requirements to be met by projects to be considered eligible for recovery through the SoBRA mechanism it established. These include: the reasonableness of installed costs which must include certain categories of costs and be below an installed cost threshold, as discussed in Issue 1 based on subparagraph 15(a); the projection that the projects will produce system savings on a CPVRR basis, as discussed in Issue 2 based on subparagraph 15(c); and whether, when considering all relevant factors, there is a need for the projects, as discussed in Issue 3 based on subparagraph 15(c).

Other requirements exist within Paragraph 15 for the projects, discussing various factors such as the role of affiliate companies, the amount of capacity allowed to be sought by year, and how the calculation of the revenue requirement is to be conducted. Based on staff's review, these factors, along with those outlined in Issues 1 through 3 have been met by DEF's Third SoBRA tranche.

### Conclusion

Based on staff's review, DEF's Third SoBRA tranche meets the requirements of the 2017 Settlement and the projects are eligible for cost recovery through the SoBRA mechanism established therein.

*Issue 5:* What is the annual revenue requirement associated with each of the solar projects proposed by DEF?

**Recommendation:** The total jurisdictional annual revenue requirement associated with each of the five proposed projects is as listed in Table 5-1. (Higgins)

**Staff Analysis:** In the 2017 Settlement, DEF received authorization for a framework to recover costs associated with the construction and operation of a then-conceptual series of solar generating facilities.<sup>6</sup> The authorized SoBRA framework included conditions by which the Company may petition the Commission to implement project-specific estimated annual revenue requirements subject to certain agreed-upon conditions.<sup>7</sup> The instant petition by the Company represents the final SoBRA-related request under the 2017 Settlement.

The Company is requesting the Commission approve annual revenue requirements for the five plants that comprise DEF's Third SoBRA under the 2017 Settlement. The requested revenue requirements are associated with these five proposed generating plants: Twin Rivers, Santa Fe, Charlie Creek, Duette, and Sandy Creek. As shown in Issue 1, the Twin Rivers and Santa Fe projects are planned to go into service in early 2021, while Charlie Creek and Duette projects are planned to go into service in the fourth quarter of 2021, and the Sandy Creek project is planned to go into service during the second quarter of 2022. Staff notes the capital and O&M portions of Sandy Creek's annual revenue requirement have been reduced to 75.6 percent to reflect only 56.6 megawatts of the 74.9 megawatts of the facility's capacity being included for recovery under the SoBRA framework. DEF may seek recovery of the remaining portion of the Sandy Creek plant in a separate proceeding.

The major classifications/components of the requested annual revenue requirement are: production and transmission costs related to capital deployment, production and transmission depreciation and depreciation-related expenses, operation and maintenance expenses, insurance and property expenses, and taxes.

The proposed cumulative annual revenue requirement associated with all five plants under the Third SoBRA is approximately \$62.5 million. Staff notes that per the terms of the 2017 Settlement, DEF is required to perform a true-up if the actual/final capital expenditures are different from the estimated capital expenditures, or if the facility in-service dates vary from those originally assumed. Any credit/refund is to be effectuated through the Capacity Cost

<sup>&</sup>lt;sup>6</sup> Order No. PSC-2017-0451-AS-EU, issued November 20, 2017, in Docket No. 20170183-EI, *In re: Application for limited proceeding to approve 2017 second revised and restated settlement agreement, including certain rate adjustments, by Duke Energy Florida, LLC;* Docket No. 20100437-EI, *In re: Examination of the outage and replacement fuel/power costs associated with the CR3 steam generator replacement project, by Progress Energy Florida, Inc.;* Docket No. 20150171-EI, *In re: Petition for issuance of nuclear asset-recovery financing order, by Duke Energy Florida, Inc. d/b/a Duke Energy;* Docket No. 20170001-EI, *In re: Fuel and purchased power cost recovery clause with generating performance incentive factor;* Docket No. 20170002-EG, *In re: Energy conservation cost recovery clause; Docket No. 20170009-EI, In re: Nuclear cost recovery clause.* <sup>7</sup> 2017 Settlement, Section 15.

Docket No. 20200245-EI Date: January 21, 2021

Recovery Clause.<sup>8</sup> Table 5-1 displays the proposed cumulative annual revenue requirements by plant associated with DEF's Third SoBRA request:

Table 5-1 Third SoBRA Estimated Jurisdictional Annual Revenue Requirement		
Plant Revenue Requirement (\$000)		
Twin Rivers	\$13,083	
Santa Fe	13,902	
Charlie Creek	12,475	
Duette	13,400	
Sandy Creek <sup>9</sup>	<u>9,683</u>	
Total	<u>\$62,543</u>	

# Tabla 5 1

Source: Direct Testimony of DEF witness Thomas G. Foster, Exhibit (TGF-1)

#### Conclusion

The total jurisdictional annual revenue requirement associated with each of the five proposed projects is as listed in Table 5-1.

<sup>&</sup>lt;sup>8</sup> 2017 Settlement, Section 15.

<sup>&</sup>lt;sup>9</sup> Sandy Creek project's annual revenue requirement represents only 75.6 percent of the total, which is the amount being included for recovery under the SoBRA framework.

**Issue 6:** Should the Commission approve the tariff sheets reflecting the annual revenue requirements for the Twin Rivers and Santa Fe solar projects? In addition, should the Commission grant staff administrative authority to approve the tariffs for the Charlie Creek, Duette solar projects and the Sandy Creek projects?

**Recommendation:** Yes. The Commission should approve the tariff sheets as shown in Attachment A of the recommendation, which reflect the annual revenue requirements listed in Issue 5 for the Twin Rivers and Santa Fe projects, effective with the first billing cycle on or after the commercial in-service date of both units. In addition, the Commission should grant staff administrative authority to approve tariffs for the Charlie Creek and Duette projects for implementation effective with the first billing cycle on or after the commercial in-service date of both units and the Sandy Creek project for implementation effective with the first billing cycle on or after the commercial in-service date of that unit, using the annual revenue requirements listed in Issue 5 for each of these projects. (Forrest, Coston)

**Staff Analysis:** Issue 5 of the recommendation provides the annual revenue requirements associated with each of the five projects proposed by DEF in its proposed Third SOBRA. As noted in Issue 1, these projects have varying implementation dates. As such, the Company has requested that the rates be implemented over three phases.

The Company stated in its petition that the Twin Rivers and Santa Fe projects are scheduled to go into commercial service in early 2021. Per the 2017 Settlement, subparagraph 15(g), "DEF shall be authorized to begin applying the base rate charges for each adjustment authorized by this Paragraph to meter readings beginning with the first billing cycle on or after the commercial inservice date of that solar generation project." DEF clarified with staff that the Twin Rivers project is scheduled for a February 2021 in-service date and the Santa Fe project is scheduled for a March 2021 in-service date; therefore, under the scheduled in-service dates the tariffs, as shown in Attachment A to the recommendation, would be effective with the first billing cycle in April 2021. The Company should provide notification in the docket file of the actual in-service dates of these projects.

The proposed tariffs reflecting the revenue requirements for the Twin Rivers and Santa Fe projects are included as Attachment A of the recommendation. These tariffs reflect a total revenue requirement of \$13,083,000 for the Twin Rivers project and \$13,902,000 for the Santa Fe project. The uniform percentage increase calculations for the class revenue increases and resulting base rate increases are shown in Exhibit C to the petition, which are calculated using the methodology approved in subparagraph 15(e) of the 2017 Settlement. For a residential customer using 1,000 kilowatt-hours, the monthly base rate increase will be \$0.78.

DEF stated in its petition that the Charlie Creek project and Duette project are anticipated to go online in the last quarter of 2021 and that the Sandy Creek project is anticipated to go online in the second quarter of 2022. The Company requested staff be given administrative authority to approve the tariffs associated with these projects at the time the units go online. As with the Twin Rivers and Santa Fe projects, the Company should provide notification in the docket file of the actual in-service date of these projects.

#### Conclusion

Staff recommends that the Commission should approve the tariff sheets as shown in Attachment A of the recommendation, which reflect the annual revenue requirements listed in Issue 5 for the Twin Rivers and Santa Fe projects, effective with the first billing cycle on or after the commercial in-service date of both units. In addition, the Commission should grant staff administrative authority to approve tariffs for the Charlie Creek and Duette projects for implementation effective with the first billing cycle on or after the commercial in-service date of both units and the Sandy Creek project for implementation effective with the first billing cycle on or after the commercial in-service date of that unit, using the annual revenue requirements listed in Issue 5 for each of these projects.

**Recommendation:** If a protest is filed within 21 days of the issuance of the order, the tariffs should remain in effect, with any revenues held subject to refund, pending resolution of the protest. If no timely protest is filed, this docket should be closed upon the issuance of a consummating order. (Stiller, Trierweiler)

**Staff Analysis:** If a protest is filed within 21 days of the issuance of the order, the tariffs should remain in effect, with any revenues held subject to refund, pending resolution of the protest. If no timely protest is filed, this docket should be closed upon the issuance of a consummating order.

Matthew R. Bernier ASSOCIATE GENERAL COUNSEL

January 13, 2021

#### VIA ELECTRONIC FILING

Adam Teitzman, Commission Clerk Florida Public Service Commission 2540 Shumard Oak Boulevard Tallahassee, Florida 32399-0850

> Re: Duke Energy Florida, LLC's Petition for Limited Proceeding to Approve Third Solar Base Rate Adjustment; Docket No. 20200245-EI

Dear Mr. Teitzman:

Enclosed for filing on behalf of Duke Energy Florida, LLC ("DEF") are amended legislative and clean tariff sheets (Exhibits A and B) to replace those filed on November 18, 2020 (DN 12493-2020). After filing its Petition, DEF realized the tariff sheets bear an effective date of February 1, 2021 on the lower-left hand corner but should instead have a blank effective date.

Thank you for your assistance in this matter. If you have any questions concerning this filing, please feel free to contact me at (850) 521-1428.

Sincerely,

/s/ Matt Bernier

	RATE SCHEDULE RSS-1 RESIDENTIAL SEASONAL SERVICE RIDER
	Availability:
	Available throughout the entire territory served by the Company. Applicable:
	To customers receiving residential service under Rate Schedule RS-1, RSL-1 or RSL-2 that meet the special provisions of this schedule.
	Rate Per Month:
	Other than as stated below, the otherwise applicable rate schedule for electric service will apply.
	Standard Customer Charge \$ 11.4011.52
I	Seasonal Customer Charge \$ 5.986.04
	Seasonal Billing Periods:
	The billing months of March through October.
	Special Provisions: 1. To qualify for service under this rider, the customer's premise must be occupied each year during a portion of the billing months of
	November through February and must not be occupied at least three months during the billing months of March through October.
	<ol> <li>The maximum allowable consumption for a seasonal billing period is 210 kWh. However, if the seasonal billing period exceeds 30 days, the maximum allowable consumption is increased by seven (7) kWh per day.</li> </ol>
	<ol> <li>If kWh usage during the seasonal billing period is less than or equal to the maximum allowable consumption for the billing period, the seasonal customer charge will apply. For non-seasonal billing months and those seasonal billing months that exceed the allowed maximum allowable consumption, the standard customer charge will apply.</li> </ol>
	4. All other provisions of the otherwise applicable rate schedule will apply to customers served under this schedule.

Page 1 of 3

#### **RATE SCHEDULE IST-2** INTERRUPTIBLE GENERAL SERVICE **OPTIONAL TIME OF USE RATE**

Availability:

Available throughout the entire territory served by the Company

## Applicability:

At the option of the customer, applicable to customers otherwise eligible for service under Rate Schedule IS-2, where the billing demand is 500 kW or more, provided that the total electric requirements at each point of delivery are measured through one meter. For customer accounts established under this rate schedule after June 3, 2003, service is limited to premises at which an interruption of electric service will primarily affect only the customer, its employees, agents, lessees, tenants, or business guests, and will not significantly affect members of the general public, nor interfere with functions performed for the protection of public health or safety. Examples of premises at which to: retail businesses, offices, and governmental facilities open to members of the general public, stores, hotels, motels, convention centers, theme parks, schools, hospitals and health care facilities, designated public shelters, detention and correctional facilities, police and fire stations, and other similar facilities.

#### Character of Service

Alternating current, 60 cycle, single-phase or three-phase, at the Company's standard voltage available.

#### Limitation of Service:

Standby or resale service not permitted hereunder. Interruptible service under this rate schedule is not subject to interruption during any time period for economic reasons. Interruptible service under this rate schedule is subject to interruption during any time period that electric power and energy delivered hereunder from the Company's available generating resources is required to a) maintain service to the Company's firm power customers and firm power sales commitments, or b) supply emergency interchange service to another utility for its firm load obligations only. The Company will not make off-system purchases during periods to maintain service to interrupt ble loads except under the conditions set forth in Special Provision No. 4 of this rate schedule.

Service under this rate is subject to the Company's currently effective and filed "General Rules and Regulations for Electric Service."

### Rate Per Month:

## **Case Background**

HC Waterworks, Inc. (HC or Utility) is a Class B utility providing water service to approximately 949 residential customers, 9 general service customers, and 1 private fire protection customer in the Leisure Lakes, Lake Josephine, and Sebring Lakes subdivisions in Highlands County. HC also provides wastewater service to 323 residential wastewater customers in the Leisure Lakes subdivision. On October 15, 2019, HC filed its application for an increase in water rates. The Utility requested that the application be processed using the Proposed Agency Action (PAA) procedure and a test year ended June 30, 2019. The Utility was notified of deficiencies in the MFRs on November 12, 2019, and December 6, 2019. The deficiencies were cured and December 13, 2019, was established as the official filing date.

Docket No. 20190166-WS Date: January 21, 2021

On May 22, 2020, the Commission issued PAA Order No. PSC-2020-0168-PAA-WS (Order). In the Order, the Commission found the Utility's quality of service to be unsatisfactory due to the high volume of customer complaints and therefore, reduced the Utility's return on equity by 50 basis points. The Commission also ordered the Utility to work with its customers and the Office of Public Counsel (OPC) to resolve customer service issues. On June 12, 2020, OPC timely filed a petition protesting those portions of the Order related to the Commission's decision on HC's quality of service.<sup>1</sup> On June 16, 2020, HC filed its response to OPC's petition and also a cross petition requesting the Commission dismiss OPC's protest.<sup>2</sup>

On August 11, 2020, HC and OPC filed a joint motion for approval of a stipulation and settlement agreement (Attachment A).<sup>3</sup> The agreement addresses issues associated with the Utility's quality of service which the joint movants have entered into in order to resolve litigation. On September 15, 2020, Commission staff held an informal meeting with the parties to discuss the settlement agreement. Subsequently, staff sent a data request to the parties on December 18, 2020, requesting clarification of certain terms within the settlement agreement. HC<sup>4</sup> and OPC<sup>5</sup> filed their responses on December 21, 2020, and January 8, 2021, respectively. In response to staff's data request, the joint movants indicate that the instant docket shall be closed upon the Utility's filing of its final status report. Additionally, the responses confirm that OPC has scheduled a virtual meeting with customers, Highlands County Commission personnel, and HC to occur on January 21, 2021, which staff plans to attend.

The Commission should vote on whether or not to approve the joint stipulation and settlement agreement filed August 11, 2020 by HC and OPC. The Commission has jurisdiction pursuant to Sections 367.081 and 367.121, F.S.

#### BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Application for increase in water rates in Highlands County by HC Waterworks, Inc.

DOCKET NO. 20190166-WU FILED: \_\_\_\_\_August 11 , 2020

#### STIPULATION AND SETTLEMENT AGREEMENT

WHEREAS, HC Waterworks, Inc. (HC or Utility), and the Citizens of the State of Florida, through the Office of Public Counsel ("OPC"), have signed this Stipulation and Settlement (the "Agreement;" unless the context clearly requires otherwise, the term "Party" or "Parties" means a signatory to this Agreement); and

WHEREAS, on August 26, 2019, HC initiated the subject docket by submitting a Request for Test Year Approval Pursuant to Rule 25-30.430, Florida Administrative Code; and

WHEREAS, on October 15, 2019, HC filed its Application for increase in interim and final water rates; and

WHEREAS, on May 22, 2020, the Public Service Commission ("PSC" or "the Commission") entered PAA Order PSC-2020-0168-PAA-WS, approving an increase in water rates for HC Waterworks ("PAA Order"); and

WHEREAS, page 24 of the PAA Order "require[s] that HC engage with its customers and the Office of Public Counsel in an ongoing effort to address the Utility's service quality and communication issues," and

WHEREAS, OPC filed a Petition Protesting Portions of the PAA Order and Motion for Clarification of the PAA Order on June 12, 2020; and

WHEREAS, HCW filed a response and cross-protest petition on June 16, 2020; and

Ċ.

#### ATTACHMENT A

PSC Docket No. 20190166-WU Stipulation and Settlement Agreement

WHEREAS, the Parties to this Agreement have undertaken to resolve the issues raised in this docket so as to achieve fairness to customers and the Utility and to ensure compliance with the applicable Florida Statutes and Florida Rules of Administrative Procedure; and

WHEREAS, the Parties have entered into this Agreement in compromise of positions taken in accord with their rights and interests under Chapters 350, 367 and 120, Florida Statutes, as applicable, and as a part of the negotiated exchange of consideration among the parties to this Agreement each has agreed to concessions to the others with the expectation that all provisions of the Agreement will be enforced by the Commission as to all matters addressed herein with respect to all Parties upon acceptance of the Agreement as provided herein and upon approval in the public interest;

NOW THEREFORE, in consideration of the foregoing and the covenants contained herein, the Parties hereby stipulate and agree:

- This Agreement will become effective on the date it is approved by the Commission (the "Effective Date").
- 2. The Parties agree to work together to engage with HC's customers. The Parties further agree that the appropriate Commission Staff should be involved in HC's engagement with customers and the Office of Public Counsel in the ongoing effort to address the Utility's service quality and communication issues referenced in the PAA Order.
- 3. The Parties agree that HC shall file quarterly status reports in PSC Docket No. 20190166 beginning three months after the Final Order approving rates is entered and ending one year after the Final Order is entered. The quarterly status reports shall include details regarding (a) all customer complaints received by HC from August 1, 2020 to the end of the reporting period, and (b) all other communication between HC and its customers

Page 2 of 5

PSC Docket No. 20190166-WU Stipulation and Settlement Agreement

(individual and system-wide customer communications) from August 1, 2020 to the end of the reporting period. Regarding the customer complaints, the details to be included in the quarterly status reports shall include, but not be limited to, the name, address and contact information (phone and/or email) of each complaining customer; the substance of each complaint; whether and how each complaint was resolved; the amount of time from HC's receipt of the original complaint to resolution; and the Utility's post-resolution follow-up with the customer (the date and manner in which the resolution was communicated to the customer).

- 4. The Parties agree that HC will timely inform its customers before any pre-planned outages, including but not limited to, system repairs and service. This does not include unforeseen outages beyond HC's control, such as spontaneous outages caused by sudden power outages, lightning strikes, hurricanes, or mechanical failures, in which case HC will notify customers as soon as the emergency allows. HC Waterworks will follow the prescribed noticing for precautionary boil water notices pursuant to the Florida Department of Environmental Protection and Department of Health regulations.
- 5. The Parties agree to withdraw their respective petitions regarding the PAA Order, and that the terms agreed to herein shall be made part of an Amended PAA Order. The Parties agree that the terms of the Amended PAA Order shall, without protest from either Party, become final and effective upon the issuance of a Consummating Order or issuance of such other Order entered by the Commission to implement the terms of the Amended PAA Order.
- 6. The Parties agree and respectively request that the Commission Staff participate in any scheduled activities with HC's customers, HC, and OPC in order to address service quality and communication, and to measure customer satisfaction on or before February 28, 2021.

Page 3 of 5

PSC Docket No. 20190166-WU Stipulation and Settlement Agreement

This may include, but is not limited to, participation in any customer meetings, County Commissioner meetings, or follow-up telephone calls.

- No Party to this Agreement will request, support, or seek to impose a change in the application of any provision hereof.
- 8. The provisions of this Agreement are contingent on approval of this Agreement in its entirety by the Commission without modification. The Parties agree that approval of this Agreement is in the public interest. The Parties further agree that they will support this Agreement and will not request or support any order, relief, outcome, or result in conflict with the terms of this Agreement in any administrative or judicial proceeding relating to, reviewing, or challenging the establishment, approval, adoption, or implementation of this Agreement or the subject matter hereof. No party will assert in any proceeding before the Commission or any court that this Agreement or any of the terms in the Agreement shall have any precedential value, except to enforce the provisions of this Agreement. Approval of this Agreement in its entirety will resolve all matters and issues in Docket No. 20190166-WU pursuant to, and in accordance with, Section 120.57(4), Florida Statutes. No party shall seek appellate review of any order issued in this Docket, as it relates to the enforceability of this Agreement.
- This Agreement is dated as of the date the last signature is affixed. It may be executed in counterpart originals, and a scanned .pdf copy of an original signature shall be deemed an original.

Page 4 of 5

PSC Docket No. 20190166-WU Stipulation and Settlement Agreement

In Witness Whereof, the Parties evidence their acceptance and agreement with the

provisions of this Agreement by their signature.

- **AGENDA:** 02/02/21 Regular Agenda Interested Persons May Participate

COMMISSIONERS ASSIGNED:All CommissionersPREHEARING OFFICER:BrownCRITICAL DATES:None

SPECIAL INSTRUCTIONS: None

#### **Case Background**

On September 28, 2020, Ni Pacolet Milliken Utilities, LLC (Ni Pacolet or Seller) and Florida Utility Systems, Inc., (FUSI or Buyer) filed a joint application for transfer of majority organizational control of Ni Florida, LLC (Ni FL or Utility) to FUSI. Ni FL is a Class A utility serving approximately 750 water connections in Lee County and 2,700 wastewater connections in Pasco County. Ni Pacolet is currently the sole owner of Ni FL, and FUSI is a wholly owned subsidiary of SouthWest Water Company.

The purchase agreement is structured as a purchase of 100 percent of the equity interests and is not an asset acquisition. As such, this application does not involve a transfer of the facilities or the land owned by Ni FL or occupied by the Ni FL systems, and Ni FL will continue to own or

Docket No. 20200221-WS Date: January 21, 2021

lease the land on which its facilities are located. The transfer of majority organizational control of Ni FL by the purchase agreement is subject to Commission's approval, and according to the application, the closing will occur within 15 days after the Commission's vote approving the transfer.

The Commission has jurisdiction pursuant to Sections 367.071, Florida Statutes (F.S.).

# Discussion of Issues

*Issue 1:* Should the application for transfer of majority organizational control of Ni FL in Lee and Pasco Counties from Ni Pacolet to FUSI be approved?

**Recommendation:** Yes. The transfer of majority organizational control from Ni Pacolet to FUSI is in the public interest and should be approved effective the date of the Commission vote. The resultant order should serve as the water and wastewater certificates, with the territories described in Attachment A. The Utility should file a notice of closing, in the docket file, within 15 days of the Commission's vote approving the transfer. The Utility's existing rates and charges should remain in effect until a change is authorized by the Commission in a subsequent proceeding. The tariff pages reflecting the transfer should be effective on or after the stamped approval date on the tariff sheets pursuant to Rule 25-30.475(1), Florida Administrative Code, (F.A.C.). (Doehling, D. Andrews, Sibley)

**Staff Analysis:** This application is for the transfer of majority organization control of Ni FL in Lee and Pasco Counties on the parent level from Ni Pacolet to FUSI. Based on staff's review, the application is in compliance with the governing statute, Section 367.071, F.S., and Rule 25-30.037(4), F.A.C., concerning applications for transfer of majority organizational control. As stated in the case background, the closing of the purchase agreement will occur within 15 days of the Commission's vote approving the transfer. As such, staff recommends Ni FL file a notice of closing, in the docket file, within 15 days of the Commission's vote approving the transfer.

#### **Noticing and Territory**

Ni FL provided notices of the application pursuant to Section 367.071, F.S., and Rule 25-30.030, F.A.C. No objection to the transfer was filed with the Commission, and the time for doing so has expired. The notices contained a description of the territory for Ni FL, which is appended to this recommendation as Attachment A.

#### **Technical and Financial Ability**

Pursuant to Rule 25-30.037(4)(c), F.A.C., the application contains statements describing the technical and financial ability of the Buyer to provide service. According to the application, the Buyer's parent company, SouthWest Water Company, is a nationwide utility with the resources, expertise, and managerial capabilities to successfully operate the Utility. In addition, there will be no change in the day-to-day operational management of the system.

The transfer application also states that the Buyer has sufficient financial assets to ensure the continuing operation of the Utility. Because the Buyer is a wholly owned subsidiary of its parent company, staff reviewed the financial statements of the parent company and recommends it has the financial capability to provide any necessary funding. The transfer application states that the parent of the Buyer will supply the necessary funding as needed. Based on the information above, staff recommends the Buyer has the technical and financial capability to provide service to the existing service territory.

#### Rates and Charges

The Utility's water and wastewater rates were last approved in a file and suspend rate case docket in 2016.<sup>1</sup> The rates were subsequently reduced, effective January 6, 2021, to reflect the expiration of amortized rate case expense associated with the rate case in 2016 as required by Section 367.0816, F.S.<sup>2</sup> The Utility also applied for and received approval of three price indexes and pass-through rate adjustments. In 2019, the Commission approved a revision of the wastewater service availability charges.<sup>3</sup> The Utility's miscellaneous service charges, non-sufficient fund charges, and customer deposits for water and wastewater have been approved by the Commission in various other dockets.<sup>4</sup> The Utility's existing rates and charges are shown on Schedule No. 1, which is attached to this recommendation. Rule 25-9.044(1), F.A.C., provides that, in the case of a change of ownership or control of a utility, the rates, classifications, and regulations of the former owner must continue unless authorized to change by this Commission. Therefore, staff recommends that the Utility's existing rates and charges remain in effect until a change is authorized by this Commission in a subsequent proceeding.

#### Conclusion

Based on the above, staff recommends that the transfer of majority organizational control from Ni Pacolet to FUSI is in the public interest and should be approved effective the date of the Commission vote. The resultant order should serve as the water and wastewater certificates, with the territories described in Attachment A. The Utility should file a notice of closing, in the docket file, within 15 days of the Commission's vote approving the transfer. The Utility's existing rates and charges should remain in effect until a change is authorized by the Commission in a subsequent proceeding. The tariff pages reflecting the transfer should be effective on or after the stamped approval date on the tariff sheets pursuant to Rule 25-30.475(1), F.A.C.

RE:	Docket No. 20200222-EI – Petition for approval of modifications to rate schedule FB-1, FixedBill program by Duke Energy Florida, LLC.	
AGENDA: 02/02/21 – Regular Agenda – Tariff Filing – Interested Persons May Participate		
COMMISS	IONERS ASSIGNED:	All Commissioners
PREHEAR	ING OFFICER:	Administrative
CRITICAL	DATES:	05/28/21 (8-Month Effective Date)
SPECIAL I	NSTRUCTIONS:	None

## **Case Background**

On September 28, 2020, Duke Energy Florida, LLC (DEF or utility) filed a petition for approval of modifications to its optional FixedBill (FB-1) rate schedule and associated Tariff Sheet No. 6.391. The FB-1 rate schedule, or tariff, is available to residential customers and offers participating customers a predetermined electric bill for 12 months.

DEF is proposing revisions to its FB-1 rate schedule to implement a pilot program which would allow the utility to control the heating, ventilation, and air conditioning (HVAC) thermostats of participating customers taking service on the FB-1 rate schedule, through December 31, 2021. DEF stated that its goal is to test eligible customers' willingness to allow DEF to control their thermostats in exchange for a \$50 prepaid credit card. The proposed pilot program would be limited to 2,000 participants. The revised Tariff Sheet No. 6.391 is attached to this recommendation as Attachment A.

Docket No. 20200222-EI Date: January 21, 2021

At the November 3, 2020 Agenda Conference, the Commission suspended DEF's revised tariff to allow staff sufficient time to review the petition and gather all pertinent data. Staff issued a data request to DEF for which responses were received on December 16, 2020. On January 6, 2020, staff held an informal meeting with DEF to obtain additional information and clarifications to DEF's responses to staff's data request. On January 15, 2021, DEF provided staff additional information related to its FixedBill program.<sup>1</sup> The Commission has jurisdiction over this matter pursuant to Sections 366.03, 366.04, 366.05, and 366.06, Florida Statutes (F.S.).

<sup>&</sup>lt;sup>1</sup> Document No. 01347-2021.

## **Discussion of Issues**

**Issue 1:** Should the Commission approve DEF's modifications to its FB-1 rate schedule?

**Recommendation:** Yes. The Commission should approve DEF's modifications to its FB-1 rate schedule effective on the date of the Commission vote. The proposed revisions will allow DEF to control customers' thermostats within set parameters to achieve peak demand reductions. Participating customers benefit by receiving a \$50 prepaid credit card and the general body of ratepayers benefits by any demand reductions. Staff also recommends that DEF, at the end of the pilot program, file a report in the docket file on the results of the pilot program. (Guffey)

#### Staff Analysis:

#### **Description of Current Optional FB-1 Tariff**

The FB-1 rate schedule was first approved in 2017 by Commission Order No. PSC-2017-0451-AS-EU<sup>2</sup> and became effective on March 1, 2018. This tariff allows participating customers to receive a fixed monthly bill for 12 months, which is calculated using the prior 12-month average usage plus an additional risk and usage adder. The order approving the FB-1 tariff states that the difference between the calculated amount customers would have otherwise paid under traditional residential rates and what customers are actually billed under the FixedBill tariff will be treated as a below the line revenue or expense, along with any costs to implement and maintain the program. In 2018, the Commission approved a revision to the original FB-1 tariff which specified that customers taking service under the optional Non-Standard Meter Rider (NSMR) tariff may not participate in the FixedBill Program.<sup>3</sup>

Pursuant to the currently effective FB-1 rate schedule, customers who voluntarily enroll in the FixedBill program need to enter into a Service Agreement with DEF for a term of 12 months. The Service Agreement will automatically renew for an additional 12 months unless the customer notifies the utility of their intention to be removed from the program. DEF calculates a new monthly FixedBill amount for the following year and notifies the customer of the new amount before the current 12-month FixedBill period expires. Currently, approximately 53,000 customers are enrolled in the FixedBill Program.

To be eligible to enroll in the FixedBill Program, a customer must take service under the standard residential rate schedule, must have lived in their current residence for the past 12 months, must have a load profile that can be modeled with reasonable predictability, and must be current on their bill payments.

#### Proposed Revisions to the FB-1 Tariff

DEF is proposing revisions to its FB-1 Tariff Sheet No. 6.391 to establish a pilot program that would allow DEF to have limited control of participating customers' thermostats. DEF stated customers opting to participate in the pilot program would need to have qualifying smart, WI-FI

<sup>&</sup>lt;sup>2</sup> Order No. PSC-2017-0451-AS-EU, issued November 20, 2017, in Docket No. 20170183-EI, *In re: Application for limited proceeding to approve 2017 second revised and restated settlement agreement, including certain rate adjustments, by Duke Energy Florida, LLC.* 

<sup>&</sup>lt;sup>3</sup> Order No. PSC-2018-0435-TRF-EI, issued August 28, 2018, in Docket No. 20180088-EI, *In re: Petition for limited proceeding for approval of a smart meter opt-out tariff, by Duke Energy Florida, LLC.* 

enabled thermostats such as Nest, Ecobee or Emerson thermostats. Under the pilot, the utility would be allowed to control the thermostat by adjusting the temperature within a specified range. The maximum number and duration of control events would be outlined in the customer's service agreement. DEF stated that there will be up to three events each month in the shoulder seasons (March-May and October-November) and up to five events each month in the summer and winter (June-September and December-February). These limits should be considered maximums, and the utility anticipates fewer events in any given month. DEF stated its goal is to leverage the existing FB-1 program and introduce technology to further enhance energy savings along with peak energy demand reduction. DEF explained that smart thermostats use predictive algorithms to understand the household's heating and cooling needs, automatically adjusting the system's performance to match the user's needs. The customer has the ability to override the automatic settings of their thermostat. The smart thermostat will communicate each participating customer's usage data to a third-party aggregator that will receive data from all participating customers. This data will be used to provide daily energy optimizations to determine when and if specific customers' load should be reduced while maintaining customers' personal comfort levels.

DEF proposes to limit the proposed program to 2,000 participants and the proposed FB-1 tariff modification would be effective until December 31, 2021. Participants will be enrolled on a first-come-first-serve basis. In response to staff's data request, DEF stated that even in the event that the utility fails to enroll 2,000 customers, the utility would still implement this voluntary pilot program. There is no initial set-up fee for customers who wish to participate in the proposed voluntary pilot.<sup>4</sup> At the conclusion of the pilot on December 31, 2021, DEF will evaluate customer interest and receptiveness to additional options under the FixedBill tariff and the associated value.<sup>5</sup>

DEF stated that once the program is approved, the utility would market the pilot program on its webpage, social media, etc. Prior to DEF taking control of a participating customer's thermostat, for a particular event, DEF will inform the customer via email or text message, mobile app or via the thermostat. The customer would have the option to opt out of participation in the energy reduction program for that day.

DEF explained that its goal is to test customer willingness to allow DEF to control customers' thermostats in exchange for a \$50 prepaid credit card. DEF stated that shareholder money will fund the \$50 prepaid credit card; therefore, the general body of ratepayers bears no risk associated with the proposed pilot program. DEF also confirmed that all administrative costs associated with this pilot program will be recorded below the line.

A customer would be able to participate in the pilot program and the current Commissionapproved Demand-Side Management (DSM) programs. While the proposed FB-1 tariff pilot program is similar to its residential EnergyWise DSM program, DEF stated that this pilot program is separate and it will not seek to apply any associated demand or energy savings towards its DSM goals. DEF's current similar DSM programs for residential customers are the load management tariffs RSL-1 and RSL-2 which provide for monthly load management bill

<sup>&</sup>lt;sup>4</sup> Response No. 7 in Staff's First Data Request. Document No. 13566-2020.

<sup>&</sup>lt;sup>5</sup> Response No. 1 in Staff's First Data Request. Document No. 13566-2020.

credits in return for allowing DEF to interrupt service to a water heater, central heating system, central cooling system, or a pool pump. Under these load management programs, customers receive bill credits based on the number of appliances selected by the customer to be interrupted. DEF does not see an overlap between the existing load management programs and the proposed pilot program. DEF stated that if a customer is enrolled in both a load management program and the proposed pilot program, the traditional load management program would take precedence in the event the utility determines it needs to reduce the customer's heating or cooling load.

#### Reporting Requirements for the FB-1 Tariff Pilot Program

Staff recommends that DEF provide a report to the Commission at the conclusion of the pilot program on the program's results. This report should include information related to total number of residential customers enrolled in the pilot, the average number of events per customer per month, the average event duration per customer per month, and total demand (kilowatt) and estimated energy (kilowatt-hour) savings. DEF should also include a discussion on any lessons learned from the pilot. The utility should file this report in the docket file within 30-days of termination of the pilot.

## Conclusion

Having reviewed the petition, staff data request responses, and responses given at an informal meeting, staff recommends that the Commission should approve DEF's revised Optional FixedBill (FB-1) pilot rate schedule and associated Tariff Sheet No. 6.391 effective on the date of the Commission vote. The proposed pilot program will allow DEF to achieve peak demand reductions, while gauging customer receptiveness to HVAC control by way of a WI-FI enabled thermostat combined with the FixedBill program. Participating customers will benefit by receiving a \$50 prepaid credit card and the general body of ratepayers will benefit by any demand reductions realized. Staff also recommends that DEF, at the end of the pilot program, file a report in the docket file on the results of the program.

#### **Issue 2:** Should this docket be closed?

**Recommendation:** Yes. If Issue 1 is approved and a protest is filed within 21 days of the issuance of the order, the tariff should remain in effect pending resolution of the protest. If no timely protest is filed, this docket should be closed upon the issuance of a consummating order. (Brownless)

**Staff Analysis:** If Issue 1 is approved and a protest is filed within 21 days of the issuance of the order, the tariff should remain in effect pending resolution of the protest. If no timely protest is filed, this docket should be closed upon the issuance of a consummating order.

	Page 2 of 3 RATE SCHEDULE FB-1 Optional – FixedBill Program (Continued from Page No. 1)
	ormal Weather: Weather at the 50 <sup>th</sup> weather percentile based on the Company's historical seasonal heating degree-days and cooling egree-days.
	ctual Weather: Weather experienced during a historical time period measured using actual heating degree-days and cooling degree- ays.
P	redicted Weather Normalized Monthly kWh Usage: The customer's predicted monthly usage (kWh) based on Normal Weather.
	redicted Weather Adjusted Total kWh Usage: The customer's predicted total usage (kWh) for the applicable time period based on ctual Weather.
re th pr	isk Adder: This adder is used to compensate the Company for the risk associated with weather-related consumption and non-weather lated impacts.—This adder and will not exceed 6%Through December 31. 2021 in recognition of reduced risk from customers who grant e Company the ability to control different customer owned assets outside of or in addition to applicable Commission-approved DSM orgams. the Company will provide up to 2,000 customers \$50 in the form of a prepaid credit card in accordance with the terms of the orgams. the Company will provide up to 2,000 customers \$50 in the form of a prepaid credit card in accordance with the terms of the orgams. The Company the Agreement.
W	sage Adder: This adder is used to compensate the Company for the risk associated with increased usage by customers in their first year hile on <i>FixedBill</i> not associated with weather. The initial usage adder will be 4% and capped at 6%. This adder will only be applied during e customer's first year on the <i>FixedBill</i> program.
	tandard Residential Tariff: The Company's RS-1, RSL-1 and RSL-2 Rate Schedules, beginning Sheet Nos. 6.120, 6.130, and 6.135, spectively.
Те	erms and Conditions:
1.	The customer will enter into a Service Agreement with the Company that will specify the Monthly FixedBill Amount that the customer will be required to pay and, as applicable, all requirements associated with allowing control of customer owned assets.
2.	The term of the Service Agreement will be for twelve (12) months. The Company will calculate a new Monthly FixedBill Amount for the following year, and notify the customer of the new contractual amount before the current 12-month FixedBill period expires. The customer will be automatically renewed at the new Monthly FixedBill Amount for the following year unless the customer notifies the Company of their intent to be removed from the FixedBill program.
3.	Removal from the program:
	A. Move from Current Residence. If a participating customer moves from their current residence before the 12 month Service Agreement period expires, Applicable Removal Charges will apply.
	B. Delinquent FixedBill Payments. If a customer becomes delinquent in a FixedBill payment, the Company will follow standard procedures for Standard Residential Tariff customers. If the customer is disconnected for nonpayment, the customer will be removed from the FixedBill program and Applicable Removal Charges will apply.
	C. Increased Actual Energy Usage Above Expected Usage (Excess Usage). The Company reserves the right to terminate the customer's <i>FixedBill</i> program Service Agreement if the customer's total Actual Energy Usage in months three (3) through nine (9) of the contract year exceeds their Predicted Weather Adjusted Total kVM_Usage by at least 30% for at least three months. If the customer is removed from the <i>FixedBill</i> program due to excessive usage, Applicable Removal Charges will apply. The Company will notify the customer in advance if they are at risk of being removed from the program due to excessive usage.
	D. Customer Voluntary Removal. If a customer chooses to leave the FixedBill program prior to the end of the 12-month Service Agreement period, the customer will be removed from the FixedBill program and Applicable Removal Charges will apply. After the end of each Service Agreement period, eligible customers will automatically renew for the next FixedBill Service Agreement period unless the customer indicates their intention to return to the Standard Residential Tariff. If the Standard Residential Tariff election is made prior to the automatic renewal of the FixedBill Service Agreement, no Applicable Removal Charges will apply.
