Re: Docket No. 20260000-OT
Florida Power & Light Company
2025 Annual Status Report on Storm Protection Plan Programs and Projects

Dear Mr. Teitzman:

Enclosed for filing is the Florida Power & Light Company 2025 Annual Status Report on its Storm Protection Plan Programs and Projects pursuant to Rule 25-6.030(4), Florida Administrative Code ("F.A.C.").

Thank you for your assistance with this matter. If you or your staff have any questions regarding this filing, please contact me on (561) 691-7144.

Respectfully submitted,

/s/ Christopher T. Wright

I. EXECUTIVE SUMMARY

Florida Power & Light Company (“FPL”) submits this 2025 Annual Status Report on its Storm Protection Plan (“SPP”) Programs and Projects pursuant to Rule 25-6.030(4), Florida Administrative Code.¹ This Report also provides the results for FPL’s pole inspection programs and joint use pole attachment audit for calendar year 2025. Finally, this Report provides a summary of FPL’s storm preparedness activities and readiness.

In Section 366.96(3), Florida Statutes, the Florida Legislature directed each utility to file a ten-year SPP that explains the storm hardening programs and projects the utility will implement to achieve the legislative objectives of reducing restoration costs and outage times associated with extreme weather events and enhancing reliability. The Florida Legislature also directed the Florida Public Service Commission (“Commission” or “FPSC”) to conduct an annual proceeding to determine the utility’s prudently incurred SPP costs and to allow the utility to recover such costs through a charge separate and apart from its base rates, to be referenced as the Storm Protection Plan Cost Recovery Clause (“SPPCRC”). *See* Section 366.96(7), Fla. Stat.

This Report on the SPP projects and activities completed during calendar year 2025 is based on FPL’s 2023-2032 SPP (“2023 SPP”) approved by Commission Order PSC-2022-0389-FOF-EI issued in Docket No. 20220051-EI on November 10, 2022.² This Report on the SPP projects and activities planned for completion during calendar year 2026 is based on FPL’s 2026-2035 SPP (“2026 SPP”) approved by Commission Order PSC-2025-0218-FOF-EI issued in Docket No. 20250014-EI on June 19, 2025.³

The Commission-approved SPPs are systematic approaches to achieve the legislative objectives of Section 366.96, Florida Statutes, to protect and strengthen transmission and distribution (“T&D”) infrastructure from extreme weather conditions, reduce outage times and restoration costs, and improve overall service reliability to customers. The FPL 2026 SPP is largely a continuation and expansion of previously approved storm hardening and storm preparedness programs. Detailed explanations of the benefits of the SPP projects and programs are provided in the Commission-approved 2026 SPP.

FPL’s storm hardening efforts have contributed to improved restoration performance as more of FPL’s T&D infrastructure has become hardened over the years.

The performance of FPL’s T&D system during the 2024 hurricane season demonstrates that the storm hardening programs under FPL’s SPP work and will continue to benefit customers through both reductions in restoration costs and customer outage times associated with extreme weather events. For example, FPL fully restored power to approximately 250,000 customers impacted by

¹ Pursuant to Rule 25-6.030(4), Florida Administrative Code, FPL is providing an annual status report on the SPP programs and projects performed or planned to be performed during calendar years 2025 and 2026.

² The FPL 2023 SPP is available at: <https://www.floridapsc.com/pscfiles/library/filings/2022/11240-2022/11240-2022.pdf>.

³ *Aff’d, Citizens of the State of Florida vs. Fay*, Nos. SC2-22=1733, *et seq.*, 2024 Fla. LEXIS 1792, 49 Fla. L. Weekly S 275, 2024 WL 4777828 (Fla. Nov. 14, 2024). The FPL 2026 SPP is available at: <https://www.floridapsc.com/pscfiles/library/filings/2022/11240-2022/11240-2022.pdf>.

Hurricane Debby within two days of restoration, FPL fully restored power to approximately 680,000 customers impacted by Hurricane Helene within four days of restoration, and FPL fully restored power to its more than two million customers impacted by Hurricane Milton within six days of restoration.

Given that FPL's storm hardened assets are expected to have service lives ranging from 40 to 70 years, the SPP programs will continue to provide significant benefits to the customers and the communities served by FPL both now and for many years to come, including years with multiple extreme weather events, such as the 2022 and 2024 hurricane seasons.

While FPL has made significant progress toward strengthening the T&D infrastructure, FPL must continue its T&D storm hardening and storm preparedness plans and initiatives. Storms remain a constant threat and Florida is the most hurricane-prone state in the nation. With the significant coastline exposure of FPL's system, and the fact that many customers are in close proximity to the coast or a major body of water, the SPP programs and projects are critical to maintaining and improving grid resiliency and storm restoration as directed by the Legislature in Section 366.96, Florida Statutes.

Section II of this Report provides an updated status on the SPP programs and projects performed during 2025, including a comparison of the actual costs and rate impacts with the estimated costs and rate impacts. Section II also identifies the SPP programs and projects planned to be performed during 2026, as well as the associated estimated costs and rate impacts.⁴

Section III of this Report provides the results for FPL's pole inspection programs and joint use pole attachment audit for calendar year 2025.

Section IV of this Report provides a summary of FPL's storm preparedness activities and readiness.

In addition, FPL has voluntarily included new Appendix C that provides a snapshot of the regional project priority rankings for the Distribution Feeder and Distribution Lateral Hardening Programs, including associated franchise information. The regional project rankings are from FPL's 2026 annual system assessment based on the Commission-approved SPP selection and prioritization criteria using the most current historical data available through year-end 2025. The system is reassessed annually, and the rankings are subject to change in each subsequent annual assessment based on updated historical data available at that time and any Commission-approved changes in the SPP selection and prioritization criteria. The final selected projects will be presented for FPSC approval in FPL's annual SPPCRC filings.

⁴ All details and data for the SPP projects are based on information known and available as of March 1, 2026.

II. REPORT ON STORM PROTECTION PLAN PROGRAMS AND PROJECTS

Pursuant to Rule 25-6.030(4), Florida Administrative Code, this section provides the following information required by the Rule: (a) identification of all SPP projects completed or planned for completion during calendar year 2025; (b) the actual 2025 SPP project costs and rate impacts compared with the estimated 2025 SPP project costs and rate impacts; and (c) the estimated 2026 SPP project costs and rate impacts.

A. DESCRIPTION OF THE 2025 AND 2026 SPP PROGRAMS AND PROJECTS

1. Distribution Inspection Program

The FPL Distribution Inspection Program was initiated in 2006 and approved as part of FPL's 2023 and 2026 SPPs. The Distribution Inspection Program is an eight-year pole inspection cycle for all distribution poles that targets approximately one-eighth of the system annually (the actual number of poles inspected can vary somewhat from year to year). Annually, FPL plans to inspect an average of approximately 161,500 poles throughout FPL's service area. A detailed description of FPL's Distribution Inspection Program is provided in Section IV(A) of FPL's 2023 and 2026 SPPs.

2. Transmission Inspection Program

The FPL Transmission Inspection Program was initiated in 2006 and was approved as part of FPL's 2023 and 2026 SPPs. Under this program, FPL plans to inspect an average of approximately 85,550 poles annually throughout FPL's service area. A detailed description of FPL's Transmission Inspection Program is provided in Section IV(B) of FPL's 2023 and 2026 SPPs.

3. Distribution Feeder Hardening Program

The FPL Distribution Feeder Hardening Program was initiated in 2006 and was approved as part of FPL's 2023 and 2026 SPPs. Under this program, FPL hardens existing distribution feeders and certain critical distribution poles to meet the National Electrical Safety Code ("NESC") extreme wind loading criteria ("EWL"). A detailed description of the Distribution Feeder Hardening Program is provided in Section IV(C) of FPL's 2023 and 2026 SPPs.

4. Distribution Lateral Hardening Program

The FPL Distribution Lateral Hardening Program was initiated as a limited pilot in 2018 and was approved as a permanent program in FPL's 2023 SPP and continued in FPL's 2026 SPP. Under this program, FPL targets certain overhead laterals that were impacted by recent storms and have a history of vegetation-related outages and other reliability issues for conversion from overhead to underground or, if appropriate, to be overhead hardened. A detailed description of the FPL Distribution Lateral Hardening Program is provided in Section IV(D) of FPL's 2023 and 2026 SPPs.

5. Transmission Hardening Program

The FPL Transmission Hardening Program was initiated in 2007 and was approved as part of FPL's 2023-2032 and 2026-2035 SPPs. Under this program, FPL hardens transmission structures and associated equipment, and replaces all wood transmission structures with steel or concrete structures. A detailed description of the Transmission Hardening Program is provided in Section IV(E) of FPL's 2026 SPPs approved in Docket No. 20250014-EI

6. Distribution Vegetation Management Program

The FPL Distribution Vegetation Management Program was originally approved in 2007 and was included in FPL's 2023-2032 SPP and 2026-2035 SPP. This program consists of a system-wide three-year average vegetation maintenance cycle for feeders; mid-cycle targeted vegetation maintenance for certain feeders; six-year average vegetation maintenance cycle for laterals; and continued education of customers through its Right Tree, Right Place initiative. A detailed description of the FPL Distribution Vegetation Management Program is provided in Section IV(F) of FPL's 2026 SPP approved in Docket No. 20250014-EI.

7. Transmission Vegetation Management Program

The FPL Transmission Vegetation Management Program was initiated decades ago and was approved as part of FPL's 2023-2032 SPP and 2026-2035 SPP. The Transmission Vegetation Management Program includes visual and aerial inspections of all transmission line corridors, Light Detection and Ranging ("LiDAR") inspections of North American Electric Reliability Corporation's ("NERC") transmission line corridors, developing and executing annual work plans to address identified vegetation conditions, and identifying and addressing priority and hazard tree conditions prior to and during storm season. A detailed description of the FPL Transmission Vegetation Management Program is provided in Section IV(G) of FPL's 2026 SPP approved in Docket No. 20250014-EI.

8. Substation Storm Surge/Flood Mitigation Program

FPL's Substation Storm Surge/Flood Mitigation Program was initiated in 2020 and was approved as part of FPL's 2023-2032 SPP and 2026-2035 SPP. Under this program, FPL plans to raise the equipment at certain substation locations above the flood level and construct flood protection walls around other substations or, alternatively, consider whether it is appropriate to relocate the substation based on the experience during recent extreme weather events and the conditions that exist at the time. A detailed description of the FPL Substation Storm Surge/Flood Mitigation Program is provided in Section IV(H) of FPL's 2023 and 2026 SPPs.

B. SPP PROJECTS AND ACTIVITIES COMPLETED IN 2025 AND PLANNED FOR 2026

The tables below provide the SPP projects and associated costs completed in calendar year 2025 and planned for calendar year 2026. The tables are separated by SPP costs recorded to and recovered through the SPPCRC and base rates.

All of FPL’s storm hardening projects and activities are included in its SPP and recovered through the SPPCRC. There are no “base rate” SPP projects included in FPL’s Commission-approved SPPs. However, FPL currently records and recovers through base rates the costs of removal and retirements associated with SPP projects and programs for assets existing prior to 2021 through base rates, as well as certain ancillary costs not currently recovered through the SPPCRC.

Project level detail for the actual 2025 SPP projects is provided in Appendix A, and project level detail for the estimated 2026 SPP projects is provided in Appendix B.⁵ Appendix C provides a snapshot of the regional project priority rankings for the Distribution Feeder and Distribution Lateral Hardening Programs based on FPL’s 2026 annual system assessment.⁶

FPL SPP Projects & Activities Planned & Completed for 2025 – 2026 (SPPCRC Only)

Program Name	Projects/ Activities Planned 2025	Estimated Cost 2025 (Millions)^(a)	Projects/ Activities Completed 2025	Actual Cost 2025 (Millions)^(a)	Projects/ Activities Planned 2026	Estimated Cost 2026 (Millions)^(a)
Distribution Inspection	180,000	\$42.5	193,199	\$42.5	180,000	\$50.1
Transmission Inspection	84,000	\$49.8	84,056	\$61.3	84,200	\$52.1
Distribution Feeder Hardening	194	\$623.7	192	\$681.9	275	\$301.6
Distribution Lateral Hardening	1,298	\$687.1	1,402	\$684.4	1,099	\$686.9
Transmission Hardening (structures)	347	\$24.2	244	\$16.3	312	\$26.8
Distribution Vegetation Management (miles)	18,041	\$120.4	18,597	\$116.7	18,055	\$121.7
Transmission Vegetation Management (miles)	9,410	\$15.4	9,610	\$17.6	9,457	\$16.8
Substation Storm Surge/Flood Mitigation	2	\$8.5	1	\$8.6	1	\$8.5
Totals^(b)	N/A	\$1,571.7	N/A	1,629.2	N/A	\$1,264.6

^(a) Excludes costs of removal and other base related costs associated with the SPP projects, which are recorded to and recovered through base rates. See table below.

^(b) Totals may not agree due to rounding.

⁵The 2025 and 2026 SPP project level detail is consistent with FPL’s April 1, 2026 and May 1, 2026 SPPCRC filings, respectively, in Docket No. 20260010-EI.

⁶ The rankings are subject to change in each subsequent annual assessment based on updated historical data available at that time and any Commission-approved changes in the SPP selection and prioritization criteria. The final selected projects will be presented for FPSC approval in FPL’s annual SPPCRC filings.

FPL SPP Projects & Activities Planned & Completed for 2025 – 2026 (Base Rates Only)

Program Name	Projects/ Activities Planned 2025^(a)	Estimated Cost 2025 (Millions)^(b)	Projects/ Activities Completed 2025^(a)	Actual Cost 2025 (Millions)^(b)	Projects/ Activities Planned 2026^(a)	Estimated Cost 2026 (Millions)^(b)
Distribution Inspection	N/A	\$23.5	N/A	\$23.3	N/A	\$42.0
Transmission Inspection	N/A	\$10.6	N/A	\$6.6	N/A	\$10.2
Distribution Feeder Hardening	N/A	\$45.6	N/A	\$12.8	N/A	\$10.2
Distribution Lateral Hardening	N/A	\$44.8	N/A	\$42.4	N/A	\$34.1
Transmission Hardening (structures)	N/A	\$5.2	N/A	\$1.9	N/A	\$4.7
Distribution Vegetation Management (miles)	N/A	\$0.0	N/A	\$0.0	N/A	\$0.0
Transmission Vegetation Management (miles)	N/A	\$0.0	N/A	\$0.0	N/A	\$0.0
Substation Storm Surge/Flood Mitigation	N/A	\$0.0	N/A	(\$0.1)	N/A	\$0.0
Totals^(c)	N/A	\$129.7	N/A	\$87.0	N/A	\$101.1

^(a) There are no “base rate” SPP projects included in FPL’s Commission approved SPP.

^(b) Limited to the costs of removal and other base related costs associated with the SPP projects planned or completed during the applicable calendar year.

^(c) Totals may not add due to rounding.

C. ACTUAL AND PROJECTED BILL IMPACTS FOR CALENDAR YEARS 2025 AND 2026

The tables below provide the total actual and estimated SPP expenditures to be incurred during the applicable year, and the associated actual and estimated rate impacts for FPL’s typical residential, commercial, and industrial customers. The rate impacts shown below are based on the total estimated and actual SPP expenditures incurred only during the applicable calendar years, irrespective of whether those costs were recovered in the SPPCRC or through base rates.

Total Estimated/Actual SPP Costs (SPPCRC + Base Rates)

Year	SPPCRC (millions)	Base Rates (millions)	Total (millions)
2025 Estimated	\$1,571.7	\$129.7	\$1,701.3
2025 Actual	\$1,629.2	\$87.0	\$1,716.2
2026 Estimated	\$1,264.6	\$101.1	\$1,365.7

Note: Totals may not add due to rounding.

Actual/Projected Bill Impacts (SPPCRC + Base Rates)⁷

Year	Residential (RS-1)	Commercial (GSD-1)	Industrial (GSLDT-3)
2025 Estimated	\$0.00239/kWh	\$0.43/kW	\$0.06/kW
2025 Actual	\$0.00237/kWh	\$0.42/kW	\$0.06/kW
2026 Estimated	\$0.00223/kWh	\$0.41/kW	\$0.06/kW

III. POLE INSPECTIONS AND JOINT USE AUDITS

This Section provides the results for FPL’s pole inspection programs and joint use pole attachment audit for calendar year 2025.

⁷ The bill impacts are based only on the actual/estimated costs incurred during the applicable calendar year and do not reflect the cumulative revenue requirement since the SPP was implemented. The bill impacts associated with the cumulative revenue requirement since the SPP was implemented are reflected in FPL’s annual SPPCRC filings with the Commission. For purposes of estimating the rate impacts for the estimated and actual SPP expenditures incurred during a calendar year, FPL assumed 50% of the expenditures are placed in-service during the applicable calendar year.

A. POLE INSPECTIONS

1. Distribution

a. Description of the Distribution Inspection Program

See Section II(A)(1) of this Report.

b. 2025 Accomplishments

See Section II(B).

c. 2026 Plan

See Section II(B).

d. NESC Compliance for Strength and Structural Integrity

The following methods are used by FPL's vendor to determine NESC compliance for strength and structural integrity of FPL's poles.

Strength Assessment

On wood distribution poles, a strength assessment is performed to determine compliance with the NESC standards for strength. The strength assessment is based on a comparison of measured circumference versus the original circumference of the pole. The effective circumference is measured and data is collected to ensure that the actual condition of the pole meets NESC Grade B requirements as outlined in Table 261-1 of the NESC. If the pole does not meet the Grade B NESC requirements, the pole will be reinforced or replaced.

Loading Assessment

A loading assessment is performed on all distribution poles and includes a combination of field measurements, span length, attachment heights (including third-party attachments), and wire sizes based on FPL construction standards. If NESC requirements are not met, the pole will be reinforced, replaced, or the attachments will be relocated. Consistent with Order No. PSC-14-0594-PAA-EI, any pole that had less than 80% of full load at the prior eight-year inspection cycle will continue to be exempt from the loading assessment during the next eight-year inspection cycle, and Chromium Copper Arsenate ("CCA") poles will only be excavated if they are older than 28 years. To ensure that these exceptions to the standard eight-year inspection cycle do not compromise existing safety and storm hardening programs, FPL conducts annual testing on 1% of the exempted poles. This exemption was approved and continued as part of the 2026 SPP.

e. Summary Data and Results of 2025 Distribution Pole Inspections

Florida Power and Light Annual Wood Pole Inspection Report (Reporting Year 2025) (Cycle Year 4 of 8)												
a	b	c	d	e	f	g	h	i	j	k	l	m
Total # of Wooden Poles in the Company Inventory	# of Wood Pole Inspections Planned this Reporting Year	# of Wood Poles Actually Inspected this Reporting Year	# of Wood Poles Failing Inspection this Reporting Year	Wood Pole Failure Rate (%) this Reporting Year	# of Wood Poles Designated for Replacement this Reporting Year	Total # of Poles Replaced this Reporting Year	# of Wood Poles Requiring Minor Follow-up this Reporting Year	# of Wood Poles Overloaded this Reporting Year	Method(s) V = Visual E = Excavation P = Prod S = Sound B = Bore R = Resistograph	# of Wooden Pole Inspections Planned for Next Reporting Year	Total # of Wood Poles Inspected (Cumulative-to-Date) in the Current 8-Year Cycle	% of Wooden Poles Inspected (Cumulative-to-Date) in the Current 8-Year Cycle
1,256,416	154,800	157,031	Grade B & C		Grade B & C	Grade B & C				154,800	642,867	51
(1)			10,513	6.7	5,691	2,993	4,822	5,510	V, E, S, B		(1)	(1)
If b - c > 0, provide explanation		N/A										
If d - g > 0, provide explanation		Grade B & C poles failing > poles replaced due to: - Of the 10,513 wood poles failing inspection in 2025, 4822 are reinforcement (not replacement) candidates. 7,227 poles were reinforced in 2025. - 2,993 poles, including concrete, were replaced in 2025. - Remaining reinforcement and replacement candidates identified during the 2025 Inspection Cycle are planned for reinforcement/replacement in subsequent years.										
Description of selection criteria for inspections		Poles to be inspected annually are selected/prioritized throughout FPL's service area based on the last cycle's inspection dates, to ensure that poles are compliant with FPL's established eight-year cycle. As such, approximately 1/8 of the distribution poles are inspected annually.										
(1) FPL began its third 8-year inspection cycle in January 2022, at which time there were approx. 1,418,948 total distribution poles in the system, 1,256,416 of which were wood. FPL continues to inspect approx. 1/8 of the total population in each year of the cycle.												

Remediation

As previously discussed, poles are remediated if they do not meet the NESC Grade B requirement. Remediation is categorized into two groups (Level 1 and Level 2) in order to allow for efficient scheduling and resource allocation.

Level 1 – This group of remediation requires more immediate attention. Urgent needs are addressed immediately.

Level 2 - Remediation that does not require immediate attention.

The following table provides a summary of the wood pole inspection findings for the poles identified as poles requiring remediation.

Inspection Type	Remediation Type	NESC Min. (Grade C)	Requirement (Grade B - Higher Standard)	Total Wood Remediation	Primary Cause(s)	Remediation Options
Visual	Restorable	0	n/a	0	N/A	Pole to be strengthened by installing C-Truss
	Non-Restorable	52	n/a	52	Decayed/Split Top, Cracks, Woodpecker Holes	Pole to be replaced with new pole.
Strength	Restorable	77	3,224	3,301	Shell Rot, Decay, Insects	Pole to be strengthened by installing C-Truss
	Non-Restorable	41	1,609	1,650	Decayed/Split Top, Woodpecker Holes, Shell Rot	Pole to be replaced with new pole.
Loading	Restorable	0	1,521	1,521	Overloaded	Pole to be strengthened by installing ET Truss
	Non-Restorable	552	3,437	3,989	Overloaded	Pole will be evaluated to determine the most cost effective method to address the overloading. Options are: 1. Install intermediate pole(s). 2. Replace pole with a stronger class pole.

2. Transmission

a. Description of Transmission Inspection Program

See Section II(A)(2).

b. 2025 Accomplishments

See Section II(B).

c. 2026 Plan

See Section II(B).

d. NESC Compliance for Strength and Structural Integrity

The following methods are used during pole/structure inspections for determining NESC strength and structural integrity compliance:

Strength Assessment

For wood transmission poles/structures, the strength assessment is based upon a comparison of measured circumference versus the original circumference of the pole. If the effective circumference is measured and the actual condition of the pole does not meet NESC requirements as outlined in Table 261-1 of the NESC, the pole is designated for reinforcement or replacement with concrete or steel transmission pole/structure.

Loading Assessment

FPL performs a loading assessment on wood transmission poles/structures with third-party attachments. This assessment is based on a combination of pole/structure length, framing configuration, span length, attachment heights (including third-party attachments) and conductor

size. If the loading does not meet NESC requirements, the pole is designated for reinforcement, replacement, or relocation of the third-party attachments.

e. Summary Data and Results of 2025 Transmission Pole Inspections

Summarized in the following sections are the 2025 inspection results and causes by transmission pole/structure materials:

Wood Transmission Poles/Structures

FPL's 2025 results from its six-year cyclical wood transmission pole/structure inspections are in the table below. In addition, FPL performed its annual visual inspections on 100% of its wood poles/structures.

Florida Power & Light Company Annual Wood Pole Inspection Report (Reporting Year 2025)										
a	b	c	d	e	f	g	h	i	j	k
Total # of Wooden Poles in the Company Inventory as of 01-2025	# of Wood Pole Inspection Planned this Annual Inspection	# of Wood Poles Inspected this Annual Inspection	# of Poles Failing Inspection this Annual Inspection	Pole Failure Rate (%) this Annual Inspection	# of Wood Poles Designated for Replacement this Annual Inspection	Total # of Wood Poles Replaced this Annual Inspection (1)	# of Poles requiring Minor Follow-up this Annual Inspection	# of Poles Overloaded this Annual Inspection	Method(s) V=Visual E=Excavation P=Prod S=Sound B=Bore R=Resistograph	# of Wood Pole Inspections Planned for Next Annual Inspection Cycle
3,182	734	734	26	3.5%	26	253	n/a	0	V / P / S / B	397
If b - c > 0, provide explanation										
If d - g > 0, provide explanation										
Description of selection criteria for inspections		FPL prioritizes its inspections based on factors such as: framing configuration (structural loading), transmission components, system importance, customer count, and inspection history for a transmission line section. Other economic efficiencies, such as multiple transmission line sections within the same corridor, are also considered.								

- (1) Inclusive of SPP and Non-SPP work, such as work inspections, relocations, proactive rebuilds and system expansion.
- (2) The planned inspections for this cycle include the wood poles from the merger with Gulf Power.

Concrete and Steel Transmission Structures

In 2025, FPL completed visual inspections on 100% of its transmission poles/structures and bucket truck inspections were completed on approximately 1/10 of its concrete and steel poles/structures. The following table provides FPL's 2025 concrete and steel transmission pole/structure inspection results.

POLE INSPECTION REPORT			
Company: Florida Power & Light			
Summary of Concrete & Steel Transmission Pole Inspections			
Period: January 2025 thru December 2025			
Type of Inspection:		Concrete & Steel Transmission Structures Visual / Bucket	
Type of Pole:			
	Average Class	Varies	
	Materials	Concrete & Steel	
	Average Vintage	2007	
	Installed Population as of 01/01/2026	82,239	
		% Planned	% Completed
Percent Inspections Planned & Percent Completed:		100%	100%
Reason for Variance/Plan to Address Backlog:			
No. of inspected poles addressing a prior backlog:		0	0
		No. of Structures	% of Inspection
No. of structures identified for reinforcement:		0	0%
No. of poles identified for replacement:		274	0.3%
No. of structures identified for a change inspection cycle:		N/A	N/A
No. of structures that required no change in inspection cycle or remediation:		80,117	99.7%
No. of structures identified as overloaded:		0	0%

Remediation

To help prioritize and to better plan for future years, FPL has established the following priority levels of inspection reporting:

Level 1 Priority – Identified as approaching the minimum NESC requirements for Grade B construction with the potential to fall below the minimum before the end of the current year. These poles/structures are incorporated into current year work plans for reinforcement, remediation, or replacement with concrete or steel transmission pole/structure. The timeframe for completion is typically driven by customer provided access to the facilities and the coordination of a scheduled outage with other facility clearances scheduled on the grid.

Level 2 Priority – Identified as approaching the minimum NESC requirements for Grade B construction but will not fall below the minimum prior to the end of the following year. These poles/structures are identified for reinforcement, remediation, or replacement with concrete or steel transmission pole/structure as planned work by the end of the calendar year following inspection.

Non-priority – Identified as having reduction in capacity, but still above the minimum NESC requirements. When reported, these structures are documented but do not require specific action until the next inspection.

Wood Transmission Structures

Wood Transmission Structures					
Inspection Item	Level 1	Level 2	Non-Priority	Primary Cause(s)	Remediation
Ground-Line	0	0	0	Decay, Rot, Insects, Voids	Level 1 - Reinforce, Remediate, or Replace in year found
Above Ground-Line	0	26	0	Wood-Pecker Holes, Decay, Insects	
Overload (3 rd Party)	0	0	0	3rd Party Attachments	Level 2 - Reinforce, Remediate, or Replace the following year
Total	0	26	0	Refer to the Above	Non-Priority – No action required

Concrete & Steel Transmission Structures

Concrete & Steel Transmission Structures				
Inspection Item	Level 1	Level 2	Non-Priority	Primary Cause(s)
Base of Pole (Identified for Replacement)	0	274	0	Corrosion/ Cracks
Base of Pole (Identified for Repair)	0	0	0	Cracks
Total	0	274	0	Refer to the Above

B. JOINT USE POLE ATTACHMENT AUDITS

1. FPL Overview

FPL administers annual audits of joint use facilities and attachments to its poles (*e.g.*, cable, fiber, and telecommunication attachments). Approximately 20% of FPL's service area is audited annually through its joint use surveys to determine the number and ownership of jointly used poles and associated attachments.

Additionally, joint use poles are inspected as part of FPL's Distribution Inspection Program. This is described more fully in FPL's pole inspection reporting requirements response.

2. Extent and Results of the Joint Use Pole Attachment Audit

In addition to FPL's Distribution Inspection Program, NESC safety audits are conducted by the Commission. Apparent NESC variances are identified and recorded by Commission auditors. FPL investigates the identified NESC variances and makes corrections where necessary. Additionally, as part of FPL's daily work activities, including construction, maintenance, and reliability initiatives, NESC safety issues may be identified and corrected. While Commission-identified variances are tracked, FPL does not specifically track corrective activities completed as part of its daily work activities.

Percent of system audited.

Feeders: Approximately 20% annually.

Laterals: Approximately 20% annually.

FPL does not specifically maintain/track its joint use audits at this level of detail. See FPL's overview above.

Date Audit Conducted

Ongoing – See FPL's overview above.

Date of Previous Audit

Ongoing – See FPL's overview above.

List of Audits Conducted Annually

Joint use poles, attachments, strength/loading tests – see FPL's overview above and FPL's pole inspection reporting requirement response.

JOINT USE AUDITS	
(A) Number of company owned distribution poles. (FPL owned poles at 12/31/25)	1,457,182
(B) Number of company distribution poles leased. (Non-FPL owned poles)	256,298
(C) Number of owned distribution pole attachments. (FPL owned poles w/attachments)	1,102,482
(D) Number of leased distribution pole attachments. (Non-FPL owned poles w/attachments)	256,298
(E) Number of authorized attachments	1,758,851
(F) Number of unauthorized attachments	5,194
POLE INSPECTIONS – JOINT USE POLES	
G) Number of distribution poles strength tested.	86,647
(H) Number of distribution poles passing strength test. ⁽¹⁾	Grade B & C 80,081
(I) Number of distribution poles failing strength test (overloaded). ⁽¹⁾	Grade B & C 4,378
(J) Number of distribution poles failing strength-test (other reasons). ⁽²⁾	Grade B & C 2,188
(K) Number of distribution poles corrected (strength failure).	N/A ⁽²⁾
(L) Number of distribution poles corrected (other reasons).	N/A ⁽²⁾
(M) Number of distribution poles replaced.	N/A ⁽²⁾
1. FPSC SAFETY AUDITS	
(N) Number of apparent NESC violations involving electric infrastructure.	270
(O) Number of apparent NESC violations involving third-party facilities.	46
Suggested Alternatives:	None

⁽¹⁾ NESC required standard = Grade C; FPL Higher Standard = Grade B

⁽²⁾ K, L, M not tracked at the joint use level

3. Suggested Alternatives:

None.

4. Joint Use Pole Rents and Revenues

“Pole rent” revenues are jurisdictional. There are no lost revenues because all back-billings for joint use pole ownership true-ups, as well as unauthorized attachments, are made back to the date of the previous audit/true-up.

IV. STORM PREPAREDNESS ACTIVITIES AND READINESS

A. SYSTEM HARDENING

See Section II(A)(3) of this Report for details regarding Distribution Feeder Hardening Program, Section II(A)(4) of this Report for details regarding Distribution Lateral Hardening Program, and Section II(A)(5) of this Report for details regarding Transmission Hardening Program. See Section II(B) of this Report for 2025 actual costs and Section II(C) of this Report for 2026 estimated costs.

1. Distribution

a. Storm Hardening Activity During 2025

See Appendix A – FPL 2025 Project Level Detail.

b. Method of Selection for Feeder Hardening and Lateral Hardening Projects

Feeder Hardening: The remaining feeders were identified and prioritized by the Operations and Reliability teams by the difficulty to restore, the overall performance of the feeders, as well as coordination with other internal and external projects (e.g., vegetation management, system expansion, permit availability, road relocation projects, etc.). See Section IV(C)(5) of the FPL 2026-2035 SPP for a detailed description of the criteria used to select and prioritize the Distribution Feeder Hardening Program.

Lateral Hardening: During 2025, the priority for hardening was targeted for feeders that have the greatest number of laterals that experienced an outage during recent major hurricanes and that have a history of vegetation outages or overall reliability issues. See Section IV(D)(5) of the FPL 2026-2035 SPP for a detailed description of the criteria used to select and prioritize the Distribution Lateral Hardening Program.

c. 2025 Costs Incurred and Expected Benefits

See Section II(B) of this Report for 2025 actual costs for the Distribution Feeder Hardening Program and Distribution Lateral Hardening Program.

See Section IV(C)(1) of the FPL 2026-2035 SPP for a description of the Distribution Feeder Hardening Program and benefits. See Section IV(D)(1) of the FPL 2026-2035 SPP for a description of the Distribution Lateral Hardening Program and benefits.

d. 2026 Projected Activities and Budgets

See Appendix B – FPL 2026 Project Level Detail. See Section II(C) for 2026 projected costs for the Distribution Feeder Hardening Program and Distribution Lateral Hardening Program.

2. Transmission

a. Description of Hardening Program

See Section II(A)(5) for details regarding Transmission Hardening Program.

b. Method of Selection

Transmission Hardening Program: The annual prioritization/selection criteria for the wood structures to be replaced includes proximity to high wind areas, system importance, customer counts, and coordination with other storm initiatives. See Section IV(E)(5) of the FPL 2026-2035 SPP for a detailed description of the criteria used to select and prioritize the Transmission Hardening Program.

c. 2025 Accomplishments

See Section II(A)(5) for details regarding Transmission Hardening Program. See Appendix A – FPL 2025 Project Level Detail. See Section II(B) of this Report for 2025 actual costs.

d. 2026 Plans

See Appendix B – FPL 2026 Project Level Detail. See Section II(C) of this Report for 2026 projected costs.

B. COORDINATION WITH LOCAL GOVERNMENTS

1. Overview

FPL’s External Affairs organization consists of manager-level employees who are dedicated to meeting the information and communication needs of local governments and communities every day. These individuals interface with members of local governments and community leaders to identify and resolve issues of common concern to the company and the communities it serves. The External Affairs team is engaged with local governments on critical infrastructure functions, line clearing, storm readiness, joint use of public rights-of-way, fuel/rate adjustments, undergrounding and other day-to-day issues.

FPL’s Account Managers assigned to governmental accounts provide customer service to government accounts and are available to assist with many of the issues that affect local governments, including storm readiness, restoration, and recovery. They are also especially helpful to local governments on account issues such as billing, fuel costs, construction, and service reliability.

FPL’s Customer Service organization conducts meetings with county emergency operations managers to discuss critical infrastructure facility (“CIF”) locations in each jurisdiction and to allow local Emergency Operations Centers (“EOCs”) to designate CIFs specific to the respective

communities, within certain limitations. Agreed-upon locations are factored into FPL's storm restoration and capacity shortage plans.

FPL invites local, state, and federal emergency response personnel to participate in its annual storm dry run. This exercise provides FPL the opportunity to share its plans to improve service reliability and storm communications and solicit input on how FPL and government agencies can better collaborate in emergency situations.

FPL maintains an Emergency Operations Center Team that consists of trained representatives who assist FPL External Affairs in meeting the needs of local governments in times of emergency. This team consists of more than 100 employees that staff the county EOCs and interface with local officials throughout the FPL service area. By staffing EOCs, FPL is physically present to provide company updates to county and city officials, as well as obtain information from the EOC to help FPL's restoration efforts.

2. Tree Maintenance and Underground Conversion Projects

FPL meets with all counties and municipalities requesting information on vegetation management and underground conversions. This includes working with local governments to establish language in applicable ordinances that encourages citizens to plant the right tree in the right place to avoid interference with overhead facilities. FPL also attends and participates in meetings and workshops with cities interested in initiating overhead to underground conversions at their cost. Discussions have also included special considerations such as using public rights-of-way and the use of underground switch cabinets. Additionally, FPL meets with local governments to explain its efforts to enhance service reliability and provide information on SPP projects within their jurisdiction. FPL's External Affairs managers assist in coordinating the necessary permits and easements that are needed for the placement of equipment and routing of new underground lines that are being constructed as part of FPL's Distribution Lateral Hardening Program undergrounding projects that occur within municipal property and public rights of way.

Separately, FPL meets with local governments who express interest in converting overhead facilities to underground service as part of FPL's voluntary Overhead to Underground Conversion Program. FPL also continued to promote overhead-to-underground conversions in 2025. In 2025, three municipalities signed voluntary undergrounding agreements and moved forward with four projects, as previously reported in FPL's Annual Distribution Reliability Report filed on February 27, 2026.

3. Storm Response Tests and Dry Run

In addition to its annual corporate-wide storm dry run and individual business unit dry-run exercises, FPL takes every opportunity to test its storm preparation and restoration plans to be ready for a potential event. Additionally, depending on the forecasted track of an actual storm, this may include the activation of FPL's storm command center and the mobilization and positioning of employees and equipment for rapid restoration. These activities provide opportunities to evaluate plans, systems, and communications in order to be even better prepared for the next event. FPL representatives also take part in city and/or county sponsored drills and

exercises upon request and invite key government stakeholders and emergency managers to our annual corporate-wide storm dry-run event.

4. Status of Local Coordination Programs

ONGOING PROGRAMS

(a) Number of city/county liaisons initiated.

FPL External Affairs and Government Account Managers routinely interface with city and county government officials to discuss storm-readiness and other issues of concern. The quantity of these interfaces and the unique situational dynamics of each issue make it administratively burdensome and non-productive to capture on an ongoing basis. FPL does keep track of official meetings and the number of EOCs that are contacted, as well as the number that are staffed with company representatives.

(b) Number of periodic communications initiated with cities/counties.

FPL External Affairs provides quarterly email communications to city and county governments. FPL also established an online Government Portal website that allows government officials to obtain the latest media releases and information on customer outages, estimated restoration times, FPL crew resources, outage maps and other information. FPL Government Account Managers also communicate with cities and counties through monthly newsletters that address topics from energy conservation to storm preparation.

(c) Number of restoration training and assistance programs conducted.

FPL External Affairs, Customer Service, and other FPL representatives meet with local governments to discuss critical infrastructure function locations and provide training on subjects such as how to address/report on downed power lines.

(d) Number of city/county problem resolution plans.

FPL External Affairs and Government Account Managers interface with city and county governments routinely to discuss storm readiness and other issues of concern. The quantity of these interfaces and the unique situational dynamics of each storm make it administratively burdensome and nonproductive to capture on an ongoing basis.

STORM PREPARATION

(a) Number of communication links and contingency plans established.

FPL is prepared to support all 36 county EOCs and nine satellite EOCs, should these locations be impacted by an emergency situation. FPL is able to report on the number of direct links with EOCs activated during emergency conditions. FPL representatives are also available to meet one-on-one with emergency managers, and city and county government officials as needed.

(b) Number of operational contingency plans developed for emergency services.

FPL meets with personnel from all county EOC locations to obtain input on critical infrastructure function locations within their jurisdiction and other facilities designated by the respective EOCs as CIFs. This critical infrastructure information is then factored into FPL's restoration and capacity shortfall plans. In addition, assigned FPL EOC representatives work with the counties to assist with emergency priorities and External Affairs Managers have open communications with counties and cities to address necessary contingencies. Tracking the number of contingency plans is administratively burdensome and non-productive and does not provide meaningful information.

(c) Number of public communications plans developed prior to, during and after the storm.

FPL develops communication plans for the media and all news/media releases are shared with local governments. The number of communication plans is not meaningful but counting the number of releases to local governments can be accomplished.

(d) Number of city/county mitigation guidelines prepared and distributed.

See response to subpart (b), above.

STORM RESTORATION

(a) Number of emergency communication links maintained.

FPL is prepared to support all 36 county EOCs and nine satellite EOCs if impacted by an emergency situation. Also, an online Government Portal Website allows government officials to obtain the latest news releases and information, including customer outages, estimated restoration times, and FPL crew resource information.

(b) Number of priority emergency services restored.

FPL can report on critical infrastructure locations restored on a daily basis and provides this information through its Government Portal website.

(c) For each tropical storm, hurricane and other emergency event impacting the utility's service area, what community coordination actions does the utility pursue not otherwise in (a) and (b), above.

In addition to outgoing communications and information provided by FPL EOC representatives, FPL External Affairs Managers are made available to interface with public officials to address their concerns.

ONGOING INITIATIVES

Communications Programs

FPL External Affairs Managers made presentations to educate communities served by FPL on topics of interest, including, but not limited to, service reliability, energy conservation, storm readiness, RTRP and power generation. These presentations help address the informational needs of local community-based organizations. FPL External Affairs Managers provided over 1,400 community presentations in 2025.

The FPL communications team conducts year-round media outreach to educate the public about service reliability projects, grid enhancements, safety and storm preparedness, as well as other topics of interest to customers.

Government/Community Communications

FPL's email network to local elected officials continues to be utilized to share breaking news and important updates to local state and federal public officials in a timely and consistent manner.

Government Outreach

FPL External Affairs and Government Account Managers contact government officials prior to storm season through written correspondence and meetings.

Government Portal Website

FPL External Affairs implements a dedicated Government Portal website during named storms, which is customized with the types of information that government leaders rely on to help with their recovery efforts. The site contains company-wide and county-specific information that includes:

- News alerts and releases
- Customer outage information and outage maps
- CIF information
- Estimated Time to Restore ("ETR") information
- FPL staging site locations and available personnel resources

C. 2026 STORM SEASON READINESS

On April 20, 2026, FPL presented at the Commission's 2026 Hurricane Preparedness Workshop. FPL's comprehensive storm plan focuses on readiness, restoration, and recovery in order to respond safely and as quickly as possible in the event the electrical infrastructure is damaged by a storm. FPL is well-prepared for the 2026 storm season and continues to train and hone its storm preparedness and response capabilities.

In addition to the initiatives to strengthen its system and improve storm preparedness discussed previously, FPL will complete the following additional storm preparedness activities for the 2026 storm season:

- Extensive storm restoration training based on employees' storm roles including Incident Management Team Workshops;
- Annual company-wide hurricane dry run in May;
- Management workshops throughout the storm season to keep focus on key storm restoration policies/processes;
- Plan for and review mutual assistance agreements to ensure they are adequate and ready;
- Continue to focus on improving outage communications and estimated restoration times to customers;
- Clear vegetation from all feeder circuits serving critical infrastructure functions (*e.g.*, CIF hospitals, 911 centers, police and fire stations, etc.) prior to the peak of hurricane season;
- Continue development of new technology to be utilized by storm damage assessors to improve damage assessment collection/analysis capabilities, including the use of drones to perform equipment assessments in difficult to access facilities; and
- Participate in industry conferences to share best practices from the previous storm seasons across utility companies.

Appendix A – FPL 2025 Project Level Detail

Region	Substation	Feeder	2025 Actual/Estimated Start Year ⁽¹⁾	Actual Start Year	2025 Actual/Estimated Completion Year ⁽²⁾	Updated Completion Year	2025 Actual/Estimated Costs	2025 Actual Costs

Less: Cost of Removal	\$ 47,824,628	\$ 14,457,225
Less: Other Base Related Cost	\$ (2,226,132)	\$ (2,029,387)
Total Clause Capital	\$ 623,700,000	\$ 683,351,107

Notes:

(1) Start date reflects the projected and revised actual/estimated year when initial project costs will begin to accrue (e.g., preliminary engineering/design, site preparations, or customer outreach, if applicable).

(2) Completion year reflects the projected and revised actual/estimated date when project will be completed.

(4) Base capital IT Equipment in support of Hardening program

(5) This cost is associated with concrete poles used for feeder hardening projects stored at the contractor holding site.

When poles are transferred from storage yard to construction work order the storage yards will be credited and the pole costs will be allocated to specific project where the pole will be installed.

Notes:
(1) Start year reflects the projected and revised estimated/actual year when initial project costs will begin to accrue (e.g., preliminary engineering/design, site preparations, or customer outreach, if applicable).
(2) Completion year reflects the projected and revised estimated/actual when the project will be completed.
(3) Costs associated with the Northwest Lateral Hardening Building and Equipment. All of the cost associated to this project are in Base, not in SPPCRC.
(4) Costs associated with 'uTrack', which is virtual augmentation reality application that is only being utilized by the SPP Distribution Lateral Hardening Program - these costs are recovered in base rates. This IT tool was originally referenced in the Commission approved 2023-2032 SPP, and allows FPL to better illustrate to customers where the facilities will be installed, as well as to better respond to customers questions and concerns in a timely fashion.

Northwest	Ft.Walton Beach	3	2026	2026	2026	2026	\$ 200,000	\$ 92,200
Northwest	Panama City	8	2026	2026	2026	2026	\$ 300,000	\$ 79,992
Total						41	\$ 1,000,000	\$ 1,000,000

Sub Total Capital Expenditures	\$ 311,811,570	\$ 311,811,570
Less: Cost of Removal	\$ 18,411,570	\$ 18,411,570
Less: Other Base Costs	\$ -	\$ -
Total Clause Capital	\$ 293,400,000	\$ 293,400,000

Notes:

(1) Start year reflects year when initial project costs will begin to accrue (e.g., preliminary engineering/design, site preparations, or customer outreach, if applicable).

(2) Completion year reflects the estimated/actual date when project will be completed.

(1) Start year reflects the year when initial project costs will begin to accrue (e.g., preliminary engineering /design, site preparations, or customer outreach, if applicable).

(2) Completion year reflects the year when the project will be completed.

(3) Costs associated with the uTrack application, which include the reality augmentation tool that allows FPL to illustrate where facilities will be installed under the Distribution Lateral Hardening Program. Costs associated with the uTrack application are recovered in base rates.

(4) Wire and Cable Blanket 2026 Rate Case Company Adjustment

Notes:

1. Overhead lateral factors are totaled by feeder, and feeders are ranked based on these totals; all laterals on each feeder are then hardened accordingly.
2. Duplicative rankings are assigned where a single feeder spans multiple franchise boundaries; in such cases, the feeder is reflected in each applicable franchise's ranking.
3. Duplicative rankings are assigned where a single feeder spans regional boundaries; in such cases, the feeder is reflected in each applicable franchise in the majority region's ranking.
4. Non-sequential rankings are primarily attributed to the execution of the management area approach and commitment to work in all management areas throughout the service territory.

Notes:

1. Overhead lateral factors are totaled by feeder, and feeders are ranked based on these totals; all laterals on each feeder are then hardened accordingly.
2. Duplicative rankings are assigned where a single feeder spans multiple franchise boundaries; in such cases, the feeder is reflected in each applicable franchise's ranking.
3. Duplicative rankings are assigned where a single feeder spans regional boundaries; in such cases, the feeder is reflected in each applicable franchise in the majority region's ranking.
4. Non-sequential rankings are primarily attributed to the execution of the management area approach and commitment to work in all management areas throughout the service territory.

FPL Regional Project Priority Rankings for the Distribution Lateral Hardening Program (2026 Assessment)

East Region, as of December 2025

FPL Regional Project Priority Rankings for the Distribution Lateral Hardening Program (2026 Assessment)

East Region, as of December 2025

Region	Franchise	Substation	Feeder	Rank
EAST	Palm Beach Gardens	SQUARE LAKE	407736	In Progress
EAST	Palm Beach Gardens	JUNO BEACH	402633	In Progress
EAST	Royal Palm Beach	ACME	405269	In Progress
EAST	South Palm Beach	LANTANA	402835	In Progress
EAST	Wellington	LOXAHATCHEE	407664	In Progress
EAST	Wellington	ACME	405269	In Progress
EAST	West Palm Beach	NORTON	404531	In Progress

Notes:

1. Overhead lateral factors are totaled by feeder, and feeders are ranked based on these totals; all laterals on each feeder are then hardened accordingly.
2. Duplicative rankings are assigned where a single feeder spans multiple franchise boundaries; in such cases, the feeder is reflected in each applicable franchise's ranking.
3. Duplicative rankings are assigned where a single feeder spans regional boundaries; in such cases, the feeder is reflected in each applicable franchise in the majority region's ranking.
4. Non-sequential rankings are primarily attributed to the execution of the management area approach and commitment to work in all management areas throughout the service territory.

Notes:

1. Overhead lateral factors are totaled by feeder, and feeders are ranked based on these totals; all laterals on each feeder are then hardened accordingly.
2. Duplicative rankings are assigned where a single feeder spans multiple franchise boundaries; in such cases, the feeder is reflected in each applicable franchise's ranking.
3. Duplicative rankings are assigned where a single feeder spans regional boundaries; in such cases, the feeder is reflected in each applicable franchise in the majority region's ranking.
4. Non-sequential rankings are primarily attributed to the execution of the management area approach and commitment to work in all management areas throughout the service territory.

Notes:

1. Overhead lateral factors are totaled by feeder, and feeders are ranked based on these totals; all laterals on each feeder are then hardened accordingly.
2. Duplicative rankings are assigned where a single feeder spans multiple franchise boundaries; in such cases, the feeder is reflected in each applicable franchise's ranking.
3. Duplicative rankings are assigned where a single feeder spans regional boundaries; in such cases, the feeder is reflected in each applicable franchise in the majority region's ranking.
4. Non-sequential rankings are primarily attributed to the execution of the management area approach and commitment to work in all management areas throughout the service territory.

Notes:

1. Overhead lateral factors are totaled by feeder, and feeders are ranked based on these totals; all laterals on each feeder are then hardened accordingly.
2. Duplicative rankings are assigned where a single feeder spans multiple franchise boundaries; in such cases, the feeder is reflected in each applicable franchise's ranking.
3. Duplicative rankings are assigned where a single feeder spans regional boundaries; in such cases, the feeder is reflected in each applicable franchise in the majority region's ranking.
4. Non-sequential rankings are primarily attributed to the execution of the management area approach and commitment to work in all management areas throughout the service territory.
